Euthymol Shaving Soap, like the salts, is certain to be a credit to the family to which it belongs, as well as to Parke, Davis & Co., the manufacturers. It is non-irritating, antiseptic and convenient, and bids fair largely to supersede the unclean shaving-mug, with its attendant possibility of germ-infection. It has a pleasing odor, is easily applied, and affords a creamy, persistent lather. It is marketed in collapsible tubes.

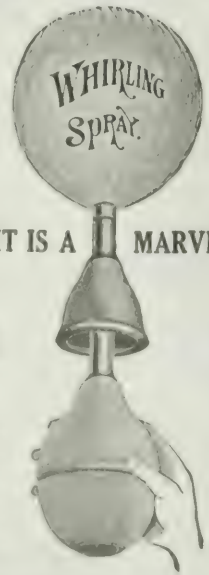
Rockwood & Co.'s Cocoa Powders.

Rockwood & Co., 88 Washington avenue, Brooklyn, N. Y., who are erecting a new factory in addition to their present plant to enable them to take care of their rapidly increasing business, have a new advertisement in this issue of the ERA in which they call attention to the meritorious quality of their Cocoa Powders. Their plant is one of the finest in the world and they manufacture Cocoa for all purposes and at prices which will satisfy the most exacting buyer. Soda fountain operators particularly will find Rockwood & Co.'s Cocoa just suited to their needs. Read the Rockwood & Co.'s advertisement on another page and let them show what they can do for you.

B. F. Goodrich Co.'s Druggists' and Surgical Goods.

The B. F. Goodrich Company, Akron, Ohio, are well-known manufacturers of druggists' and surgical goods. Their line is very comprehensive, embracing all kinds of rubber goods, Atomizers, Bed Pans, Crutch Tips, Ice Bags, Cushions of all kinds, Fountain and Combination Syringes, Tubing and a very extensive variety of Water Bottles. A full list of these goods is given in their advertisement on another page. Write to the B. F. Goodrich Co., Akron, Ohio, for particulars and prices, and please mention the ERA.

THE MARVEL "WHIRLING SPRAY" SYRINGE



IT IS A MARVEL

WAS AWARDED THE GOLD MEDAL, DIPLOMA, AND CERTIFICATE OF APPROBATION, BY THE SOCIETE D'HYGIENE OF FRANCE, OCTOBER, 9, 1902.

as the latest and best improvement in Vaginal Syringes. Particular attention is called to the fact that by reason of its peculiar construction the Marvel Syringe cleans and thoroughly irrigates [illegible] by means of whirling spray, which [illegible] the folds and permits the injection to come into contact with the entire surface, instantly dissolving and removing and not [illegible] with discharges.

NEW AND ATTRACTIVE

Advertising signs and novelties will be cheerfully supplied on receipt of a line from you, with your card or label, that we may be certain to get your name and address correct. If you write to us we will send you customers, not only for our remedy, but for all you sell. Your customers will be pleased, your business will be enlarged and your profits thereby increased to our mutual advantage as a result of our outlay and enterprise and your cooperation.

PLEASE REMEMBER the *VERY LIBERAL DISCOUNT OF* **EIGHT PER CENT**

which all wholesale druggists allow on our remedy on one gross lots or over from the list price of $18.00 per gross, and of five per cent on half gross lots and over, and send in your orders direct to your wholesaler, but write to us for the advertising matter. It pays to sell SYRUP OF FIGS AND ELIXIR OF SENNA, and we wish to increase your sales. Thanking you most cordially, we are, yours very truly,

CALIFORNIA FIG SYRUP CO.

Louisville, Ky. SAN FRANCISCO, CAL. New York, N. Y.

BUSINESS NOTICES

Blood Wine Co. Offer Free Merchandise.

The Blood Wine Company, Bloomington, Illinois, [illegible] Mess. have a new advertisement on page [illegible] and attention to the merits of Blood Wine which they claim is a most valuable tonic and one which will [illegible] weak-ness and physical exhaustion. They state that it is made of the purest drugs, contains no opiates, and the formula has been approved by the Internal Revenue Department so that Blood Wine can be sold without the payment of tax.

Blood Wine has given great satisfaction wherever sold and to further introduce it to the local trade, the manufacturers offer to send one and two pounds $1.00 to any druggist who will furnish them with the names of twenty-five of his customers, the object of the manufacturers being to circularize each customer and furnish him with a coupon to be presented to the druggist for a trial bottle of Blood Wine free. The list of names can be written by the druggist or his clerk in a very few minutes and the scheme, as planned, has in it the elements of good advertising in that it creates customers. The sales of this remedy pay the druggist a good profit and satisfy the buyer. Read the advertisement on page 480 of this issue and fill out the blank at once.

Lippincott's New 1910 Sundries Catalogue.

In addition to being a triumph of the printer's art, the handsome new Sundries Catalogue for 1910 just issued by A. H. & F. H. Lippincott, Inc., Philadelphia, and now ready for distribution, will be of particular interest to soda fountain owners, as it contains a vast amount of information pertaining to the successful operation of the fountain. The catalogue is also replete with illustrations, prices and descriptions of the various sundries employed in connection with the dispensing apparatus, reflecting in a high degree the Lippincott quality, both in the production of the book and the goods it describes. You will be missing a great opportunity if you neglect to send for one.

The manufacturers state that the book is too expensive for general distribution but that they will be pleased to send you a copy of it if you will send them 10 cents with coupon No. 2 which forms a part of their advertisement on page 479 of this issue of the ERA. With this catalogue they will send you a coupon [illegible] of which [illegible] appears in the advertisement, good for $1 on your first purchase of at least $10 worth of sundries at their regular prices. But be sure to send for the "New Sundries Catalogue." It will help you in your business.

Standardization of Suprarenal Preparations.

Standardization of Suprarenal Preparations is advised in an editorial in a recent number of the *Journal of the American Medical Association*. The editor of the *Journal* quotes from the report of Schultz, Bulletin 61, Hyg. Lab. Bureau of Public Health and Marine Hospital-Service, to the effect that of six different suprarenal products examined, only two were of the strength claimed; the others varied from 3.7 to 66.6 per cent of [illegible] strength. In the face of these findings and similar reports from other pharmacologic laboratories, it is of great importance that the practitioner exercise unusual care in the selection of the suprarenal in solution on which he depends for definite results.

In this connection the reader's attention is directed to Supracapsulin, which is one of the two products showing the required strength and retaining same, being accorded the highest percentage of any examined. Supracapsulin is manufactured and marketed by the Pharmaceutical Department of the Cudahy Packing Co., South Omaha, Neb. This company not only has unusual facilities for manufacturing its product, but, as the result of experimental research covering several years, it has given the profession a solution of this important drug the permanency of which it guarantees. Under the circumstances, it would seem that the following statement is entirely justified: "To make sure of securing results, specify Supracapsulin (Cudahy's).

DRUG LABELS BOXES PRINTED LITHOGRAPHED

BUSINESS NOTICES

Making Ice Cream With Snow.

Many druggists would undoubtedly make their own ice cream if they could be assured that the product would always freeze smooth and firm and not "weak after repacking." For this reason, the offer of B. Heller & Co., 512 South Jefferson street, Chicago, will no doubt appeal to a very large number of progressive druggists. They have a product known as "Snow," that gives the ice cream that "stand-up" quality which prevents it from breaking down when the carbonated water strikes it. It has several other desirable features that should appeal strongly to every ice cream maker.

B. Heller & Co., the manufacturers of "Snow" have published an "Ice Cream Makers' Guide" for the trade, which is described in their advertisement in this issue of the ERA and which they are sending out free to all druggists. The "Guide" contains a large number of ice cream formulas, many helpful suggestions, and other valuable information for any one who operates a fountain.

Woodworth's Imperishable Perfumes.

It pays to push the best goods in the perfumery line, as a trade well established by selling the finest odors only is the trade which will be permanent and satisfactory to both dealer and consumer. Such a class of perfumes is that manufactured by the C. B. Woodworth Sons Co., Rochester, N. Y., advertised on another page of this issue of the ERA, and any retail druggist who will devote a part of his energy to pushing these odors is sure to reap handsome profits. The manufacturers call particular attention to Woodworth's "Blue Lilies," which they say has the largest sale of any American perfume. It is a most popular odor, a quick mover, and shows a better profit than any other perfume of the same high quality. They also manufacture a full line of all other odors, Toilet Waters, Sachets and Toilet Creams. The perfume and toilet articles trade belongs to the retail druggist and it will remain with him if he will cater to the demands of his trade. Write to the C. B. Woodworth Sons Co., Rochester, N. Y., for a copy of their new catalogue now in press. A postal card request will bring you one.

United Watch Co.'s Special Offer to Druggists.

A coupon which forms part of the advertisement of the United Watch Co., Inc., appearing in this issue of the ERA, entitles the holder to 50 cents, the conditions which accompany it being of a character that should appeal to druggists, particularly those who have a jewelry department and who want to make money and save time and trouble. But turn to the advertisement, read the offer for yourself, and then write to the United Watch Co., making use of the coupon.

Genuine Lanolinum Liebreich.

Graab & Kranich, Berlin-Rixdorf, call attention in their advertisement to a decision of the Prussian High Court which has ordered the Vereinigte Werke of Charlottenberg, represented by Victor Koechl & Co., of New York, to cease selling Lanolinum Liebreich. They state that you can get the genuine Liebreich brand of Lanolin exclusively under their trade mark and that it is sold on very favorable terms. A reproduction of their trade mark appears on page 517.

Glass Shelf Fixtures for Drug Stores.

Glass Shelf Fixtures for drug stores is a specialty of the Norwich Nickel & Brass Co., Norwich, Conn., whose salesrooms are located at 712 Broadway, New York, and 26 Kingston street, Boston, Mass. An illustration of these handy fixtures is shown in their advertisement on another page. Write for their 1910 catalogue.

Crown Shampoo-Bag for Washing the Hair.

Several claims are made for the Crown Shampoo-Bag advertised on another page of the ERA, which should attract the attention of druggists who are on the lookout for new and taking specialties. See the advertisement and write to the Laboratories of Jas. C. Fuller, D. C., for particulars.

LEARN TO SWIM

BY ONE TRIAL

Over half a million sold annually through dealers. Now is the time to place in stock this popular device for swimming

PRICE TO TRADE

No. 1, $2 per doz., retails at 25c. each.
No. 2, $3 per doz., retails at 35c. each.

Sold by jobbers throughout the United States, Great Britain and Australia.

These goods are extensively advertised in leading publications such as Ladies' Home Journal, Collier's, Saturday Evening Post, Youth's Companion, etc.

Department stores, toy stores, druggists, stationers, seashore houses, sporting goods dealers and general merchandise retailers make big sales by displaying the **WATER WINGS** in their stores and windows. Three color show cards for exhibition, and circulars for distribution sent with every order.

AYVAD MFG. CO., Hoboken, N. J.

ASK YOUR JOBBER FOR THE

ADVANCE FEVER THERMOMETER

(Patented October 6th, 1908)

Perfectly Aseptic, equipped with Lenz Finders and anti-rolling devices, provided with means to limit the extent to which it should be inserted into the body.

Insertion Aseptic

Projection for Antirolling

Lenz Finder

Lenz Finder

The Advance is actually the only improvement in Fever Thermometers which has been demanded by the profession for many years.

STANDARD PRICES for Advance Thermometers

½ Min. Registration, with Certificate, in Rubber Case.....$6.50 per dozen
1 Min. Registration, with Certificate, in Rubber Case.....$8.25 per dozen
2 Min. Registration, with Certificate, in Rubber Case.....$6.00 per dozen

RED OR BLUE BULB FOR RECTAL USE.

1 Min. Registration, with Certificate, in Rubber Case.....$6.25 per dozen

Every Instrument tested by the Certified Government Standard and fully guaranteed.

On the ordinary thermometers the scale is so located that a portion thereof is inserted into the mouth or other organs of the body when making a test of the bodily temperature, and by reason of this fact that portion of the scale which is inserted into the body is worn off, and, in addition to this, the coloring material of the scale gets into the body, and this is one great objection which THE ADVANCE THERMOMETER obviates. Any manufacturer pretending to sell THE ADVANCE is making fraudulent claims and will be brought to justice through the intervention of the U. S. Patent Courts. Manufactured by

CHARLES NURNBERG CO.

Money Saving in first cost and money making in the increased sales it effects.

The Wolverine Knock-Down Show Case

is built to meet the needs of merchants who want a handsome durable case at a reasonable price. The frame is of golden oak, the fixtures nickeled and the best plate glass is used for the top. Its knock-down construction reduces the freight to one third of the rate for set up. At the same time it is so simple that you can set it up in five minutes without tools.

MICHIGAN SHOW CASE COMPANY

53 East Fort Street **Detroit, Mich.**

COCOA POWDERS

You have not exhausted the possibilities in Cocoa Powder buying, without at least seeing what we can do for you.

We make nearly one hundred varieties, and certainly some one of them should suit your requirements. Our Cocoa plant is one of the finest in the world and we keep abreast with all improvements.

Our machinery enables us to furnish not only a Cocoa more completely freed from the oil than others but also **ANY** degree of dryness desired.

We can give you the Dutch processed Cocoa of highest grade and fully equal to the finest imported, and we can give under the same process, Cocoa that is slightly processed or heavily processed. We can give the same **QUALITY** of Cocoa not Dutch processed.

We can give you a Cocoa Powder that could only be sold at a small profit at $1.00 per lb., and from that absolutely pure Cocoa down to a price that would **SURPRISE YOU**.

If you are a large user we can and will make a blend solely for your purpose. We make only absolutely pure Cocoa powders.

We pack in barrels, half barrels, 50 and 25 lb. drums and 10, 5 and 1 lb. tins.

PLEASE REMEMBER other manufacturers **MAY** be able to please you, **BUT** you should see what we can do before you place your contracts or orders.

PLEASE REMEMBER other manufacturers **MAY** be able to satisfy you, but **WE CAN** and our capacity assures you of prompt deliveries.

YOU SIMPLY DON'T KNOW UNTIL YOU TRY

Make a note of the brand—Y & S—on our Pepsin Gum. This brand—Y & S—has been used by us and our antecedents for forty years on the best known stick licorice in this country.

It means just as high quality when used on our chewing gum.

Four flavors: LICORICE, PEPPERMINT, WINTERGREEN, SPEARMINT. Each piece wrapped singly, 5 pieces to package, 20 packages to box. Order a trial box, assorted if required, from your jobber.

NATIONAL LICORICE CO.
BROOKLYN, N. Y.

Major's Cement

Oldest and Best

Unexcelled and does all that is claimed for it in mending broken articles of Glass, Bric-a-brac, Earthenware, etc. Don't incur the displeasure of your customers by unwittingly selling them some inferior preparation. Major's Cement has had a successful record of over thirty years which proves its worth.

It retails for 15c. per bottle.
Your jobber can supply you.

Major's Rubber Cement will mend all articles of rubber; Major's Leather Cement unequalled for repairing articles of leather. They are of the highest grade and sell for the same price, 15c. per bottle.

ROOT JUICE PROPOSITION
A BIG WINNER

Exclusive newspaper and other advertising. The plan which gets results. Many druggists have sold six dozen bottles of Root Juice (dollar size) in one day. The L. H. Ott Drug Co., of Harrisonburg, Va., sold 77 bottles in one day, and a few days later sold 110 bottles. They sold over 700 bottles since the 12th of last February. W. A. Gutelius, of Bluffton, Ind., sold over 2000 bottles in less than a year. J. W. O'Harrow, Bloomington, Ind., did even better, and hundreds of druggists throughout fifteen States, are doing a wonderful business with Root Juice, as it has the merit, and our advertising is the most catchy and convincing.

Our proposition is open to one live druggist in every town and city. Get it quick, or some one will beat you to it.

W. P. CABLER ROOT JUICE MED. CO.
Fort Wayne, Ind.

$5.50 PROFIT
on a
$6.00 ORDER

Would you spend 50c. to make $5.50 and at the same time insure the future regular patronage of twenty-five people? You can do it if you co-operate with us in the sale of

KRANK'S
PINK BLUSH
MASSAGE CREAM

A quality article, a toilet necessity so near perfection that in the short time it has been on the market the sales are wonderful.

Thousands of Dollars for Advertising

To tell the people of its merits and direct them to the druggists.

To make our plan a complete success, we wish your co-operation in selling an article of merit, under the *protected price selling plan*, which pays you a profit of 50 per cent. You have the same opportunity as your competitor, you buy and sell at just as low a price as he can.

If you are interested in our proposition send for our booklet which explains all about our advertising campaign. How Pink Blush is marketed, and how to make $5.50 profit on a $6.00 order. Write us today.

You Need This Machine in Your Business.

You wouldn't think of crushing your ice in the old fashioned way by hand—machines do the work so much better and easier and in one tenth of the time.

Ice Crushing Machines Are a Necessity. You Need Them in Your Business.

There are all kinds of Ice Crushers on the market, some good, some bad, and some indifferent, but

Users of "Little Giant Ice Crushers" Say They Are the Best

We know it, and have known it for years and we want you to know it by actual experience, too, that's why we are making you our

10 DAYS FREE TRIAL

We don't ask you to buy until you have used the machine 10 days. WRITE US TODAY for our Special Offer and Catalogue.

The largest users of crushed ice are using "Little Giant Machines," they bought them in competition with other makes and satisfied themselves it's the machine they want for they RUN SO EASILY AND SAVE MUCH ICE.

"Little Giant Machines" use a shearing cutting process to chip the ice. They do not break or smash the ice. That's why our machine will outlast two of any other make. We do the same work with less power and no breakage to machine.

FIRST COST ALL THE COST

If you've used Ice Crushers in the past you know what it means, to be sure of your machine during the busy season. YOU DON'T FIND THE "LITTLE GIANTS" LAID UP THEY WORK EVERY DAY WITHOUT EXPENSE FOR REPAIRS

Write us right NOW for our complete catalogue and our 10 DAYS FREE TRIAL OFFER.

If our goods don't sell Your Money Back—and you keep the premium. That is fair, isn't it?

CHICHESTER CHEMICAL CO.
2315-17-19 Madison Square, Philadelphia, Pa.

To Members of The C. C. Co. Spatula Club:

IMPORTANT—I have a handsome and valuable novelty for you complimentary. Too expensive to send unless I am sure of your *latest* and *correct* address, which please send with your *Membership Certificate Number* to

2317 MADISON SQUARE, PHILADELPHIA, PA.

J. C. HOOPER, *Secy.*,
C. C. Co. Spatula Club.

Here's the Point:

You proclaim yourself a discriminating buyer—establish your business upon the highest level of professional confidence—by dispensing **'Roche' chemicals** and **alkaloids.** Why? Because physicians have learned, through their acquaintance with Digalen, Thiocol, and other widely used 'Roche' products, to **put their trust in anything** bearing **the 'Roche' symbol.** The other day one of New York's leading ophthalmologists said to us—**"Your Homatropine is the best I have ever used."** The fact is, we specialize in the production of **chemicals, alkaloids, and specialties of rare quality.**

Specify 'ROCHE' when ordering the following:

Aconitine	**Atropine**	**Eserine**	**Hyoscine**
Arecoline	**Colchicine**	**Homatropine**	**Pilocarpine**

(in vials of 1, 2, 5, 10, and 15 grains, and upward.)

Benzo-Naphthol	**Hexamethylenetetramine**
Benzoic Acid	**Iodides**
Bismuth Salts	**Kresapol**
Bromides	**Morphine**
Brucine	**Phenolphthalein**
Caffeine	**Salicylic Acid**
Carbolic Acid, U. S. P.	**Salol**
Cocaine	**Saponin**
Codeine	**Sodium Benzoate**
Creosote (Beechwood)	**Sparteine**
Cumarin	**Strychnine**
Guaiacol (Carbonate)	**Theobromine**
Guaiacol (Liquid)	**Veratrine**

MAY A GREAT MONTH FOR PHARMACY.

Without doubt the month just ended was one of the most important for pharmacy of any similar period within recent memory. The A.Ph.A. convention at Richmond, while chiefly devoted to Pharmacopœial revision, was notable for the variety of subjects discussed and the large number of thoughtful and well-considered papers that were submitted.

At the Pharmacopœial Convention the representation was large, the integrity of the Pharmacopœia was preserved and on the committee of revision for U.S.P. IX have been placed highly qualified and eminent men who can be trusted to take proper care of the interests of the divers elements that are concerned in producing the best Pharmacopœia within the limits of human possibility. Dr. Wiley's election to the presidency was a well deserved honor and at the same time it is a public warning to the opponents of pure foods and drugs not to attempt to tamper with this revision.

THE RIKER-REXALL CONTROVERSY.

In this issue of the ERA we are giving considerable space to an explanation which Louis K. Liggett, president of the United Drug Co., has sent to his shareholders, accompanied by a letter addressed to his "Dear Pardners." In this letter he complains that the trade papers, and the ERA in particular, have misrepresented him, a charge to which we do not plead guilty, for we have merely printed the news concerning the litigation in question.

In a way the story brings home the conviction that Mr. Liggett recognizes the underlying principle which stands for the success of all co-operative organizations when he says that each city represented in the company must earn at least its own dividends and that each and every stockholder must be treated alike. This apparently is frank enough to suit the majority, for any other contention would be antagonistic to co-operative effort. Viewed in this light, it becomes a question of some interest to learn to what extent the court will uphold Mr. Liggett's assertion that the Rikers neglected the United Drug Co.'s agency interests in New York, Brooklyn and Boston.

The real question at issue in this controversy, is the right of the Rexall management to deprive a shareholder of his inherited privilege as exclusive distributer of these goods in his city. Because the Riker and Jaynes companies happen to be located in large cities does not change the issue. If they can be deprived of their rights as exclusive distributers,

the shareholder in a smaller city is in the same predicament and with good reason he objects.

Undoubtedly, it was a mistake to give shareholders this exclusive privilege, regardless of the size of the city. It would be better for the company and its shareholders if the number of distributers was increased to some healthier proportion, say to one druggist for every 10,000 of population.

But the fact remains, that the druggists who stood by this company in its early days, when success was by no means sure, did so with the understanding that each druggist was building up an exclusive business for himself in his locality.

If the management of the United Drug Co. now wishes to change this original agreement, it would be in better taste for him to take it up logically and legitimately with the shareholders, instead of arbitrarily trying to force a shareholder to give up his rights, even if this shareholder has not fulfilled all of his implied obligations.

SOME HARD "KNOCKS" FOR "BOOSTERS."

Practicers of substitution in Chicago are being hit hard in a series of 50 advertisements which President McConnell, of the Economical Drug Co., is printing in the *Tribune*, of that city. Plain talks to the people is the best way to describe these terse, telling shots at the substituters. Mr. McConnell's own attitude on this question—a position which has won success for him—is given as follows:

> OUR STRICT RULE IS TO GIVE THE CUSTOMER PRECISELY WHAT IS ASKED FOR, and a clerk would be discharged who would dare to suggest a substitute. If the customer asks our opinion, or seeks our advice, it is given HONESTLY—generally, to consult a physician, as being the only safe rule, and probably cheaper in the end. We do not endorse patent medicines. There are some good ones, but the majority are worthless and should be avoided by sensible people. But if a customer asks for a secret nostrum, that is HIS business and he is entitled to have his wants filled without argument or parley.

Another extract from one of the advertisements is worth the attention of non-substituters and we believe Mr. McConnell would not object to its use by druggists in other cities, in cases where they are fighting the substitution evil:

> **How to Protect Against Substitution**
>
> A prize of $50 was recently offered by Ainslee's Magazine for the best motto with which to combat substitution. The money was awarded to a man who submitted the following terse and significant phrase: "No, thank you, I want what I asked for. Good-bye."
>
> If every self-respecting man or women would answer likewise when an attempt is made by a dishonest druggist to substitute something of his own make for the article called for by the customer, it would soon end the rascally substitution game.
>
> "A much better formula for use in Loop Substituting "joints" is: "No, thank you, I'll go to THE ECONOMICAL, where they always give me what I ask for."

In many ways Mr. McConnell's campaign is a remarkable one. He has built up a big business by advertising liberally and now that he does not need to use so much space has learnt of the efficacy of printers' ink has caused him to enter this educational crusade against substituters. He has the best of the argument and will get the best of the business, as against competitors who do not sell their patrons what they want.

INTERCHANGE OF CERTIFICATES.

Annual proceedings of the National Association of Boards of Pharmacy, giving the details of the 1909 meeting at Los Angeles, which have just been issued, confirm the impression which had been formed regarding the activity of the officers and the growth of their work in the direction of raising the standard of examinations and enabling the pharmacists who are qualified in one State to practice in another through the interchange of certificates. There are now 23 boards represented in active membership, Delaware having been the latest to qualify. In addition there are nine associate members, these being of boards that are in sympathy with the movement, but which cannot become active members until legal obstacles are overcome.

During the year 177 certificates were granted on the interchange plan. It is a curious fact that the two chief beneficiaries in adding pharmacists to their population in this way were the widely separated States of Vermont (42) and Texas (31). Totals for other divisions: Maine 21, Florida 18, Virginia 13, District of Columbia 10, Michigan 8, Oklahoma 8, Arizona 5, Indiana 5, Kentucky 4, Maryland 4, Massachusetts 4, Alabama 2, Arkansas 1, Louisiana 1. Other active members are Georgia, New Mexico, Oregon, South Dakota, North Dakota and West Virginia.

ASSOCIATION JOURNALS.

At the recent meeting of the American Pharmaceutical Association in Richmond, it was decided to make the "Bulletin" of the Association a regular monthly publication, to be sent to all of the members of the Association and to accept a selected line of advertisements.

In this connection it will no doubt be interesting to many members of the A.Ph.A. to know how this class of publications is recognized by the Postoffice Department, so far as enjoying the privileges of the second class postage rate is concerned.

The principal law under which publications are entitled to transmission as second class matter is the Act of March 3, 1879, but in July, 1894, a special act was passed by Congress for the purpose of extending the second class postage rates to publications which are published under the auspices of "societies, orders, trades unions and institutions of learning." It is assumed that this journal of the American Pharmaceutical Association expects to obtain its postal privileges under this so-called "educational" Act of July 16, 1894.

A few months since, the postoffice authorities expressed their views very fully on the standing of these publications, in a communication issued by Acting Third Assistant Postmaster General Travers in regard to the *South Carolina Pythian*, for the priv-

ilege of second class rates. In so far as subscriptions are concerned, the Acting Third Assistant Postmaster-General states very distinctly in this connection that:

"In all cases it must appear that it is left to the option of the member whether he will subscribe or not. The subscription must not be forced or made obligatory upon him."

The method of circulating the publication to members of societies is very fully discussed in this communication and the following are **not regarded** as meeting the law in fact:

(1) Where so called subscriptions of members are paid by deducting the subscription price from the membership fees or dues under a provision of the constitution or by-laws of the organization to the effect that such part of each member's dues or fees is set aside to pay his subscription.
(2) Where the subscription takes the form of a definite statement over the member's signature when transmitting his fees or dues, that a stated portion shall be used for the purpose of paying his subscription.
(3) Where subscriptions of members of societies, etc., are paid from funds contributed by the members and such funds belong to the society.
(4) Where subscriptions by members of societies, etc., are made obligatory upon such members by the constitution or by-laws of the society.

On the contrary, so far as subscriptions to members of societies are concerned, the following **are regarded** as meeting the requirements of the law:

(1) Members subscribing to the publisher direct and paying therefor independently of any dues or fees of a society.
(2) Members subscribing through the officers of societies and paying therefor independently of any dues or fees of the societies.
(3) Where the constitution and by-laws make special provision for the payment of dues with and without a subscription to the publication, provided the dues **without the publication** are an amount materially less than the dues **with the publication.**

As to the insertion of advertisements in these so-called "educational" publications which are allowed to circulate through the mails at second class rates, the Acting Assistant Postmaster-General quotes the following opinion of the Assistant Attorney-General for the Postoffice Department:

"I have to state that, in my opinion, a paper containing advertisements in the interest of other persons or concerns than the society, order, trades union, or institution of learning which such paper represents is not entitled to the privileges of the law quoted.

"My opinon is strengthened by the fact that the Act of Congress (March 3d, 1879, 1 Supp. R.S. 246) which authorizes you to accept at second-class rates certain periodical publications having a 'legitimate list of subscribers' expressly states: 'That nothing herein contained shall be so construed as to prohibit the insertion in periodicals of advertisements attached permanently to the same.'

"This proviso applies only to the Act in which it was incorporated, and as Congress has not seen fit to insert a similar provision in the Act of July 16, 1894, we can not place it there."

In further consideration of the advertising and subscription privileges of such publications, we quote the following from this letter:

"Accordingly, the department has uniformly held that publications containing advertisements in the interests of other persons or concerns than the society or trades union or institution of learning which the paper represents are not entitled to the privileges of that Act.

"Considering, therefore, that Congress undoubtedly intended to extend the second-class mailing privileges to certain publications under the conditions above set forth, it is clear that if these publications are to enjoy the second-class mailing privileges under an act other than the one specially designed for them the requirements of the alternative act should be fully met. They certainly can not enjoy the privileges of both acts without the restrictions of either. In this connection two observations may be made:

"1. It is a fact disclosed by answers to many inquiries that but few of the organizations whose publications are entered under the Act of March 3, 1879, and having the 'list of subscribers' based on a by-law or resolution providing for setting aside a portion of the members' dues, are actually abiding by the resolution, but, on the contrary, the moneys paid on account of alleged subscriptions enter into the general funds of the organization, and the cost of printing and circulating the publication is merely paid therefrom.

"2. It is manifestly an injustice to publishers competing in the same or a similar field and having papers which would be patronized by the members of an organization to be compelled to secure and maintain a list of subscribers based on the drawing power of the paper as such, whereas the competing organization paper's list of subscribers is composed of members also who were drafted in under a by-law of the organization and receive the paper as one of the benefits of membership, and not on account of voluntary subscription. Publishers of other papers have entered complaints asserting that people will not pay for that which they can receive free. Consequently, those receiving a paper through the medium of membership in a society are not disposed to pay for some other paper in the same field."

We are prompted to refer to this matter and to quote so freely from this official communication, because the subject does not seem to be clearly understood by many officials and members of associations who wish to publish such organs. In allowing these "educational" publications the privilege of second class postage rates under the Act of July 16, 1894, it evidently was not the intention of Congress to extend to these publications all the privileges that are permitted to independent publishers who are operating under the Act of March 3, 1879.

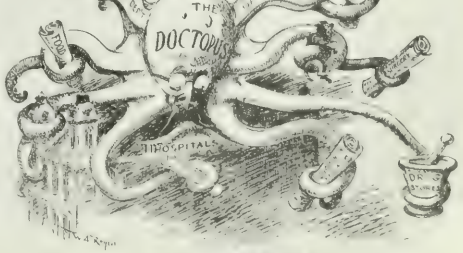
For further information on this subject we commend our readers to this letter of Acting Third Assistant Postmaster-General Travers, dated November 19, 1909, and known officially as "Form 3500-C." Copies can no doubt be obtained by applying to the Third Assistant Postmaster-General at Washington.

NOW IT IS THE "DOCTORS' TRUST."

When Senator Owens introduced his bill at Washington for a National department of health, with the head a member of the President's cabinet, it met with quite a lot of favorable comment and little opposition, but as the subject has been further discussed objectionable features have been brought to light and as a result of the hearings on the measure there is little likelihood of any legislation, for the present, at least.

Our readers who are interested have been fully informed through the daily papers regarding most of the arguments *pro* and *con* that have been offered. The present Federal machinery for conserving the health of the people has been admirably administered and it is extremely doubtful if any better results would follow its concentration into one department, while the creation of high-salaried positions and the further amplification of purposes would enormously increase the expense. Within the States the public health is now well cared for by effective boards and in emergencies and epidemics demanding Federal aid it has been demonstrated repeatedly that

N. Y. HERALD VIEW OF LATEST A.M.A. PROJECT.



the present statutes and should have been enough thorough and successful in action. We fail to see where pharmacy or pharmacists would be benefited in any material way should the new department be created.

With the physicians it is different, for the newspapers see in the proposition much to benefit them and have gone so far as to characterize the members of the A.M.A. who are supporting the movement as being the "Doctors' Trust." Druggists who remember the attitude of some physicians when the mythical "Drug Trust" was on the spit can now smile complacently at the grilling of the "Doctors' Trust," or "Dococtopus," as some of the papers call the new monster.

DO NOT MISS YOUR STATE MEETING.

Summer's grist of meetings of the State pharmaceutical associations has already begun and during the next two months there will be busy times for members and officers of these useful and beneficial organizations. Lack of space prevents the publication of the programmes, but the majority of the associations are yearly improving in the attractions offered to attendants at their sessions, both in mental pleasures and physical enjoyments. It is a high duty for all pharmacists to belong to their State organizations, for aside from the benefits just mentioned a full membership enables the officers to secure legislative reforms, or oppose hostile and oppressive legislation, as the case may be. To work in this direction successfully a solid front must be presented and the State body affords the most practical and effective way of emphasizing the wishes of the pharmacists of any commonwealth.

WAR ON HABIT-FORMING AGENTS.

In line with the general movement against habit-forming drugs the recent bulletin on "Habit-Forming Agents," prepared by Dr. Kebler and liberally summarized on page 432 of the May *Soda Fountain*, is a notable and comprehensive contribution to the literature on this subject. It has deservedly attracted much attention throughout the country and cannot fail to have an important bearing upon the suppression of this menace to the public welfare. For the information of our readers who may desire to peruse the indictment of habit-formers in its entirety it may be stated that the document is known officially as Farmers' Bulletin 393.

ANOTHER VERSION OF PHARMACY "REFORM."

A most remarkable brief in opposition to the Hill Pharmacy Bill, pending in the New York Legislature, discloses a curious trend of thought, based upon inconsistency and a desire for lowering the admission to and the practice of pharmacy. The proponents declare that there is no necessity for practical examinations and wish that provision stricken out, the effect of which is obvious. They want the size of fines cut from $50 to $25, which would put a premium upon carelessness, or lawlessness, whichever might be the source of violation.

Next they want the "police power" taken from the Board of Pharmacy, because, forsooth, "it is unconstitutional," but in the next breath they ask to have this same "police power" lodged with the Board of Health. It does not take much of a lawyer to appreciate that if it is unconstitutional for one board to exercise this power it would be unconstitutional for the other board to do so. As a matter of fact and law there isn't any real question of constitutionality at all; it is merely a case of using a lot of words in an attempt to harass and annoy the members of the Board of Pharmacy for doing their duty to their profession and to the public.

It might be a good thing if the doctors were entrusted with the "police power" to force dishonest druggists to obey the laws, for the physicians would be even more aggressive, persistent and active in making them walk the chalk line of purity than has been the case with the present State Board of Pharmacy.

LIABILITY OF EMPLOYERS FOR INJURIES.

Minnesota's Supreme Court, in reversing a lower court in the suit of J. J. Krenzer against the Spencer-Kellogg Company, of Minneapolis, has laid down the principle, which is of interest to employers and which will no doubt be extensively quoted in future liability suits, that an employer "must use reasonable care to select competent employees." The syllabus follows:

First—It is the duty of a master to use reasonable care to select competent employees, and where a master mechanic neglects such duty he is liable to another of his employees injured by the fault of the incompetent servant.

Second—Whether or not a workman is the fellow servant of another workman depends upon the character of the act performed, which may be a question of the jury.

Third—The selection of competent servants and the determination of the particular work to be performed by each are duties of the master which cannot be delegated by him so as to avoid liability for their negligent performance.

Renomination of Assemblyman George H. Whitney by the Republicans of Saratoga County is a fitting recognition of the good work done in the New York Legislature by this faithful, conscientious and progressive legislator, who has reflected credit alike upon his constituents, upon his chosen profession and upon himself. Mr. Whitney is a shining example of the possibilities of useful public and professional service of which druggists are capable.

Governor Hughes' appointment to the Supreme Court bench by President Taft is a fitting recognition of earnest and conscientious endeavor for better government. While pharmacists have differed with him as to what is best for them, none will question his sincerity of purpose.

In many sections movements are on foot for a safe and sane observance of the Fourth of July. In this direction druggists should heartily co-operate, for, next to the victims, they probably are among the greatest sufferers through disagreeable and usually profitless experiences in giving temporary or other aid to the maimed and otherwise injured patriots.

Readers of THE ERA who do not receive *The Soda Fountain* are missing most interesting news of a drug trade nature. *The Soda Fountain* fits in half way between two issues of THE ERA and aside from its own position in that industry offers information and news of value to druggists.

Reported passage of the Whitney Pharmacy Bill at Albany again puts the representatives of the New York State Board of Pharmacy "up to" Governor Hughes. This presents as much "opportunity" as the Hill bill which was introduced in the Senate, but which was defeated by its Assembly pals.

His Promoter and the Wizard Tree.

By Emma Gary Wallace.

THE Smithers entered their hotel apartments at exactly 11 p. m. unspeakably weary, much in need of abundant wherewith to remove the alkali grit and grime of the desert and with a peculiar feeling of being adrift on a limitless and unfriendly sea. They felt as dejected as they looked.

At 7 in the morning they emerged radiant in shining cleanliness, snowy linen and the light of hopeful expectancy illuminating their respective countenances. The Smithers looked as happy as they felt.

The magic of the glorious California sunshine was all about them and the sparkling electric air like purest crystal elixir. Deceptively near, appeared the great snow-capped sentinels of the beautiful San Gabriel Valley with Old Baldy and Grey Back wrapped in a marvelous opalescent veil of purple and gold and pink. Through the open window drifted the mingled perfume of orange blossoms, Cherokee roses and heliotrope.

Mrs. Smithers breathed long and deeply. The man by her side looked approvingly at her, quite as if he thought her the fairest sight of all.

* * * * * * * *

"The Ralph Uretons live here," he remarked in a matter of fact tone. "You remember, Ralph and I officiated in the twin capacity of head and assistant clerks for the Summers Drug Company over twenty years ago?"

Mrs. Smithers nodded. Her eyes were glued to the beauty of the hotel pergola where the sunlight filtered through countless roof blossoms and made shifting patterns on the cement floor below.

"We must hunt him up after breakfast. His sister gave me his address. He is in the drug business still and ought not to be hard to find."

"Yes," Mrs. Smithers responded brightly, "I promised her faithfully that we would be sure to find him right away. She spoke very proudly of his success."

"I'm sure I hope he has succeeded. He was a right good fellow and deserved all the luck that could come his way. When he landed here, his assets inventoried less than fifty dollars in money, a society girl for a wife and a well-seated case of tuberculosis. Yes, he surely deserves all the success that he can have won. We'll look him up as soon as we satisfy this bear-like appetite which is gnawing at my vitals."

A few directions from the hotel clerk started them on their way and in the first happiness of their arrival the tourists fared forth to seek the touch of the hand of "some one from home."

* * * * * * * *

The store was not difficult to locate. It was situated on the main artery of the business system and as the mildly well-to-do Smithers stepped inside the genteel doors which opened to admit them, they gave a gasp of astonishment. They had not expected anything so fine. The entire place was done in white onyx, snowy tiles and richest mahogany—and such mahogany! One felt as if he were looking into the warm pulsing depths of a great Oriental jewel. Surely fortune had favored the erstwhile seeker after health and wealth.

An inquiry and a card brought Ralph Ureton from his office in less time than it takes to tell it, and the travelers found themselves being greeted in such a manner as to leave no shadow of doubt of the warm-heartedness of their welcome.

A telephone message to Mrs. Ureton asked her to prepare a room for their guests, for of course his home would be theirs during their stay, and not to hurry with her morning engagements because he would not bring them out until he brought them in his machine in time for lunch.

In vain the Smithers protested against such an intrusion, but their self-appointed host simply refused to listen to them. They would chat here awhile, he said, and then he would take them for a spin and bring up at his own home by 1 o'clock. He would just telephone the "Baltimore" to have their things sent around to his house. It was most evident that the alchemy of prosperity had not changed one molecule of the essence of brotherly love which always had been one of Ureton's strongest characteristics.

"How did it all come about?"

Ureton looked thoughtful a moment. "I don't wonder you ask," he replied, "it does seem like a bit of magic, doesn't it, Bob? Well, I remember what a persistent chap you always were, and I suppose you will not be satisfied until you get something of the story. So here goes:

"As I wrote you, years ago, at the time of my arrival, I was about down and out, both physically and financially. My wife had never been accustomed to hardships, and yet many faced her, not only poverty but poverty alone, for the great white plague had fastened its clutches upon me and day by day was sapping my life away.

"And yet, Bob, it was our very poverty that proved our greatest riches. I tell my clerks never to regret poverty, it is sent for a purpose—and it is up to them to find out what that purpose is. Some of 'em solve the riddle and some never try.

"My worldly resources stood at just $47.97 and I wasn't able to work. Cheerful, eh?

"Well, we reached here weary and wondering what would come next. To save money we walked up from the little station and about half way I was taken with a spasm of coughing and we had to stop. Before I was able to go on again, my wife had spied a sign back in a field. It read, "To be sold for taxes." There were lots of 'em in those days. This was twenty years ago, remember, and this beautiful city with its palm boulevards and pepper-tree drives was then but a town of shacks.

"I made a mistake, old fellow, when I said my assets stood at $47.97, for I had millions I hadn't reckoned on. By my side was the bravest woman who ever struggled to save a drowning man, and if it hadn't been for her this story never would have been, to be told.

"We walked slowly along until we came to a little hotel and then she left me to rest and went out to prospect for gold, she said.

"When she came back she held a legal document in her hand and her face was bright.

" 'I've bought a ranch,' she said gaily, 'and who knows but there may be gold upon it. We have a home of our own and *now* all you have to do is to get well.'

"There was a sob in her voice in spite of her gaiety. I looked at her hand, friends, and her diamond engagement ring was gone. What had she done?

"Why, she had sold the jewel to some one, inquired the way to the City Hall, then a low board building—I'll show you our City Hall of today—found that the place she had seen advertised for taxes comprised about four and a half acres and could be had for a song, purchased it, was approached by a man lounging in the office who had a tent house to sell and after a little dickering she had agreed to buy it and pay for it when he delivered it on our property before sundown. That night, folks, we slept on our own estate.

"The purchase of land, house and even the few things necessary—we improvised what we could—pretty well used up our cash. Our few goods arrived by freight and even the packing boxes became clever furniture under the skillful touch of the Madam.

"I began to sleep and to eat and when I was wondering where the eatables were to come from, a sign appeared upon the front of our establishment which stated that fashionable millinery would be made out of material on hand. I've got that sign yet and it looks pretty good to me yet, even if it was home-made.

"Would you believe it, that little woman had all she could do right from the start. In a month I was able to put in a little garden and by using my strength carefully found that more was on tap in consequence. I began to long for something to do and my wife pointed out to me the great future of Eucalyptus. Rather doubtfully, I went to work a little each day as I was able, and planted out land to Red and Blue Gum Eucalyptus trees. The work in the earth and air put new life into me. The trees became friends and I grew to love them every one. I studied and found that the finest forest conditions could be had by setting them seven and a half feet apart, thus making 780 trees to the acre possible. We used all our land and eventually bought more and as money was coming in, we hired a cheap man to help.

"For two years the trees have to be cultivated and watered and after that they will have struck root deep enough to find water for themselves and will need no further care until the time of cutting, which is from five to seven years for fuel and about ten years for lumber. These trees grow in this climate at an astonishing rate, the Blue Gum being without doubt the fastest growing tree in the world. Seedlings frequently make a growth of an average of six inches per day the first year, and a Government Forestry Bulletin notes a tree nine years

the finest mahogany and is manufactured into exclusive furniture, store, bank and office fittings. Perhaps you noticed the store as you came in. It is all in Eucalyptus-mahogany. Fine, isn't it?

"Time justified our labors. Land began to rise. The Government awoke to the growing scarcity of hardwood timber. Some time ago, no less an authority than the then chief of the United States Forestry Service, Clifford Pinchot, sounded the note of warning of a timber famine ahead, stating that twenty years would exhaust the present supply and the standing growth. The lure of our wonderful climate drew thousands of home seekers and the business section grew out and encompassed our property. At the end of three years I had gone into a small drug store. At the end of five years, we erected a good-sized plant for extracting the Eucalyptol Oil from the leaves of the Blue Gum Eucalyptus, also some of the medicinal resins. The Madam looked after that, having taken in her millinery sign. Next thing I knew we were making big money manufacturing the finest Eucalyptus cough drops that could be bought anywhere.

"At the end of ten years the standing Eucalyptus was worth on an average of from seven to ten dollars a tree, and we sold it and received pretty handsome returns. The land was worth as many thousands as it had cost single dollars, for it was now cut up into city lots. I tell you, I hated to see those stumps dug out, for the sprouts spring up from the old stumpage and in another five or ten years are ready to cut again, without having cost an hour's care, making a perpetual income — see, just as I bought more land out west and replanted again. It had been a gold mine sure enough.

"Our cough drop orders now warranted a big factory and we did a thriving business in Eucalyptol. The crude oil has an odor resembling turpentine and a secondary odor of cinnamon.

"According to Dr. Attfield, it is not yet a settled question whether the Eucalyptol is the most valuable medicinal constituent of Eucalyptus oils or not, as they contain numbers of groups of ingredients.

"From the stringy bark varieties are obtained fibres used for paper manufacture and building thatch. Yes, it is a remarkable tree all right.

"Now, you see how I was able to build up a fortune, own not only the finest drug store anywhere around but a dozen others just as good—no pun intended, either.

"Here is the machine. Come along and see our city and then the best will be left to the last, for having introduced you to it and the wizard tree, you have yet in store the pleasure of meeting and knowing the best woman in the whole world—I call her the Creton promoter. A promoter, you know, must have courage, perseverance, initiative and decision, and let me tell you, she's IT."

Chapter Members Appear in One-Act Comedy.

BOSTON, May 20.—Boston Chapter 1, W.O.N.A.R.D., introduced a novelty in the way of entertainment at its April meeting. The event occurred in the evening, instead of at the usual afternoon hour, and the number participating in the entertainment [illegible] Music and fancy dancing formed the first part of the programme, while the one-act comedy, "The Kleptomanine," by members of the chapter, formed the second part.

Mrs. Jessie F. Waterhouse was in charge of the comedy, and those taking part were Mrs. Frances LaPierre Hayes, Mrs. Lilla [illegible], Miss Winifred Bell Wescott, Miss Martha Morey, Dr. Charlotte Farrington, Mrs. Blanche Edmunds and Miss Sally LaPierre.

Those taking part in the first part of the programme included Ralph Odiorne, violinist; Leo K. Andrews, accompanist; Miss Lily Chamberlain, whistling soloist, and Miss Sally LaPierre, Miss Dorothy Cunningham and Miss Jessie Lockwood in [illegible] dances.

[illegible] was about 250, but in a programme of 28 [illegible] were advertising. The advertising committee comprised Mrs. Wm. H. Henderson, chairman; Miss I. C. Gallivan, Mrs. Ella H. LaPierre, Mrs. J. W. Lowe and Mrs. J. J. Flanagan.

CORRESPONDENCE

Chicago R.D.A. Stands Firmly for the N.A.R.D.

[illegible]

Enclosed find resolutions adopted at the last quarterly meeting of the Chicago Retail Druggists' Association, the concluding paragraph of which instructs me, as secretary, to send same to you with the request that they be published in your valued journal.

Thanking you in advance for this favor on behalf of this association, I remain, sincerely yours,

Chicago, May 3, 1910. [illegible] M. LIGHT, *Secretary.*

The resolutions adopted are as follows:

Whereas, Various interests are actively at work to undermine and destroy the influence of the National Association of Retail Druggists, which during the seven years of its history has served the retail drug interests so faithfully and well; and

Whereas, The policy of these subversive interests is to [illegible] and create [illegible] to their purposes in the National body by the [illegible] and serving [illegible] the sole object of [illegible] and [illegible] that [illegible] the retail drug interests as represented by the Chicago Retail Druggists' Association in quarterly meeting assembled.

Resolved, That we hereby express our deepest loyalty to the great National Association of Retail Druggists of which we are proud to belong as the banner local association of retail druggists of Chicago, and to which we pledge [illegible] with our fellow members of America [illegible] by the [illegible] of organized protection and educational benefits and be it further

Resolved, That we condemn all enemies of druggists' associations, and the associations themselves as long as the deceptive tactics employed by our enemies succeed and succeed and urge them both as individuals and as associations to disregard and resent all false reports and malicious charges and to stand manfully and loyally by our National body and its trusted leaders, knowing always that a true interpretation of facts, and the facts themselves will ever prove, as they always have done, that in the National Association of Retail Druggists as a fearless, independent, conserving and constructive force, we have the truest and best exponent of the retail druggists' commercial and professional needs that [illegible] one fact, one that it has taken years of self-sacrificing labors of many heroic men to build, and the destruction of which would amount to a calamity, the enormity of which would be too large to estimate; and be it finally

Resolved, That a copy of these resolutions be sent to the Journal of the American Medical Association with the request that they be published therein, and to the medical and pharmaceutical press of the country, accompanied by a similar request in order that it may be made clear that the 900 retail pharmacists of America's most representative city which constitute the Chicago Retail Druggists' Association, resent the [illegible] to a [illegible] for the upbuilding, advancement and perpetuity of the National Association of Retail Druggists.

Effect of A.M.A. Article Nil in California.

Editor The Pharmaceutical Era:

I like the impartiality of your journal. As an expression from a retail druggist, I wish to state that I consider the late A.M.A. article very unjust and unwise toward the N.A.R.D. and A.D.S. I feel all members of those associations around here wish to co-operate with the medical profession as a whole, but we fail to see the least hope of ever doing away with what is known as household or patent preparations. To supply the demand that the druggist is called on to meet, we prefer introducing and selling a line in such cases that we know has merit and which the druggists themselves can control. We fail to find anything unethical in selling a party who refuses to see a physician a preparation we know to be an efficient one—rather than any of the numerous nostrums which we know nothing about whatsoever. Dr. Simmons' article is a dead one around here. OTTO J. MOURON.

Sonora, Cal., April 25, 1910.

Won by The Era's Apparent Fairness.

Editor The Pharmaceutical Era:

Kindly send me the ERA. Card $1 enclosed. Your apparent fairness towards the A.D.S. is what wins me.

Brooklyn, N. Y., May 1910. EDWARD WOLFF.

15,000 Doctors Expected to Attend.

St. Louis physicians are preparing for the 61st annual session of the American Medical Association in St. Louis June 7-10. It is expected 15,000 delegates will attend.

Papa's Personaltee.

By Joel Blanc, Jr.

MISSIS SPRIGGINS and her husban Bill, what is a druggist allsow, was spenting the eavning at our house and wile mama and Missis Bill was saying that thay gessed that Missis Snook got her new flour hat at a rummyidge sail them men was a talking airyplain stuff abowt the salvashun of the retale druggist beeing in the power of his personaltee. And I was under the tabble playing with a string and Bill Spriggins laig.

Papa swells up his chest cleer down to his stummick and he says he has arroved at the mentil condishun wich nables him to pumpusly eggnore them cutters and departmint stores cause he has riz to the full preesheashun of the grandjer of his own personaltee. Bill Spriggins he helps hisself to six olives and after he had revyved from the one what I had stuffed with kiann peper he says he is just treeting them chanes of stores with dignyfide and silent contemp cause hes come two the reeleyezashun that a perfeshnul man what is okkypide in the dignyfide pursoot of prepearing propryeatairy preskripshuns and selling stamps aint got nuthing to feer as long as he reelyes upon his own charming personaltee.

When Bill he stops to breeth and ketch his breth papa releaves him at secon base and starts for the home plait by saying that the fool publick aint never gowing to be weened from the legitmit farmussy by the umpirick method of selling postil cards what is dopted by them masheen shops what is called endless chanes and so4th. Papa continyous that the ding gasted publick what thinks of medsin like it was so much cole or shreded saw dust biskit, allways reelyes implickitly upon the oner of the personaltee of the high sighintifick farmussist and them narrer minded dubs what judges a medsin by the kwantitty thay gets for sixty 7 sents aint never gowing to be turned to the cutters and chanes just to get a better price and better survis.

Then papa blose out his sparkling plug and Bill Spriggins goes to bat agen. Bill says that the farmussists holds the life and deth and salvashun of the blamed fule publick in the pam of thare hands. He says it is the personaltee of the farmussist what keeps the deer publick from beeing skared intwo the riger mortus (riger mortus is Latin for beeing two ded to imbam). Bill he says that peeples aint gowing to send thare dainty infunt childs to chane stores for importint medsins like poorus plasters, blume of yuth and bed bug poyzen cause if it wasent for the personaltee of the farmussist the poyzen mite not kill the bugs. Then Bill goes owt on a fowl tip and papa calls for a high ball and mama gives him a uther cup of sassyfrass tee. And papa says that all the legitmit farmussists has two do is to treat the modarn trade Kaptin Kids and uther trust pirits with silunt dissDane. Papa says that the personaltee of the farmussists should be cultyvatid by devoting thare enurgees too the purity of thare spices and inkreesing the rekliss abandun of thare shocases, by deevoting more time to the propergander and less to keeping shaved, by doing more with thare own hands and never cleening thare nales, and by adding dignutty to thare personaltee and wareing fewer cleen shurts.

Then papa gets his breth ketched out at first and Bill gets reddy to make a home run. Bill says personaltee is individyoualtee and peeples aint gowing to bandon the individyoualtee of the growchy, slowpoky, mentalee prodigus farmussists to go to stores ware individyoualtee is lost by evrybudy wareing the same sort of cleen white coats, ware the shocases is so cleen that peeples is fraid to tuch them, and ware thay gets thare goods be4 thay has time to reed the directry threw.

By this time papa and Bill was beeming at eech uther like luvers. Thay just settled back in thare chares and beemed while Papa picked his bad tooth with a fork wile Bill blowed his nose with a napkin. Papa and Bill shure is got powurfull personaltees and individyoualtees.

Long be4 this mama and Missis Bill had finished thare post mortum after deth Topsies on the wardroabs of thare deerest friends, and I thinked it was bout time for them wimmen to put thare nine to bat. So as I had finished tying Bills laig to the string and the string to the tabble laig I comed out and got on the bleechers as a safe distunce from the crockry.

Mama wunked at Missis Bill and she says with a soft pussy cat sofy piller kind of voyce what made me move hier up on the bleechers soze I could drop over the fense when the amberlans come, mama says; What abowt the personaltees of the shoe clerk, the grosherie clerk, the beef stake bucher, the juler, and all uther storekeepers?

Aw, says papa. You daintee specmins of femninty better keep out of this. You just let us lords of creeashun continyou to pet and pamper you and hook up your gowns. You beelong to the sex what was made for love and mattynees. You just let us sturn and brillyunt mails continyou to pervide you with choclit eklares and extry hare. Me and Bill cherishes our wifes tenderly and dont want you to task your branes with nuthing more intrykate than trying to stand off the landlord and raze munny for the life insurance.

Mama just smiled in that gentul way what makes me pitty papa and Missis Bill she beemed on Bill soze I dident blame him for being afrade to go home in the dark with her. Mama says: Thay aint no dowt that personaltee in bizness is a mighty vallyble thing, but personaltee is just what the word says, its sumthing to do with the inside and owtside of the person and it aint got nuthing more to do with the drug bizness or the perfeshin of farmussy than it has to do with selling hambug stake.

The man what knows the shoe bizness well enuff to make me take a shoe what fits and at the same time make me bleeve that Ime getting a comfortble shoe what is 3 sizes two small is using more power of personaltee than you ever can use on a preskripshun. The bucher what has the nack of pleezing peeple with a porterhouse taste and a chuck stake purse is got a more valable personaltee than any farmussist ever had. You yurself wont by yure shurts cept from one sailsman in one store and you gets shurts what looks like thay was made out of the flags of all nashuns just cause you are inflooinced by the personaltee of that sailsman.

Then Missis Bill she come to bat. Missis Bill she said. I dont see why it takes any less personaltee to sell spices in a groshery store than in a drug store, or to sell postils in a soovynear shop, or chewing gum in a candy store, or sody water in a bakery. I dont take much stock in the man what puts personaltee in a preskripshun and forgets to put the right direckshuns on the labil. A man's personaltee is the thing he IS thare4 it is gowing to be just as valeyble whether he is running a dinky little potheycarry shop or a shoe shining parlor. Two here you men talk you would think that personaltee was a galenikal what Galen handed down to the privit ownership and for the exkloosive use of gradjywates of farmussy collidges.

Then mama made the winning run in the 9th ining with this; When you men are talking abowt personaltee what you means is just bull heded conseat. You got a idea that you are speshully ordaned to run the drug business in any old way it has been runned for fifty years. Whenever any one starts to improof on your methids you draws yourself up like turkles trying to stand on thare hind legs and then you falls over on your backs and wigles your 4 foots and waggles your heads and not beeing able to see anything but the sealings of your stores you yawps about personaltee.

The truth of the matter is that haff of you aint got no personaltee nor no individyoualtee cause if you had you would alsow have progressiv enterprize.

That made papa and Bill so mad thay jumped to thare feets and the string on Bills ankul pulled the tabble over and he thawt papa did it and hit papa in the tooth and papa jammed Bill in the I with a salt seller and then papa ketched me and Ime just getting soze I can set on my pants agen.

Will Treat of Bismuth Salts and Cocaine Law.

PHILADELPHIA, May 20.—Franklin M. Apple, chairman of the ethical preparations committee of the Philadelphia Association of Retail Druggists, has announced that the booklet to be sent to physicians early in June will be devoted to comments on salts of bismuth and extracts from the cocaine law of Pennsylvania. Both of these topics are regarded by the committee which has charge of the U.S.P. and N.F. propaganda as being of particular importance and of timely interest.

Bad Fire in Medico-Chirurgical College.

PHILADELPHIA, May 20.—Fire in the chemical laboratory of the Medico-Chirurgical College recently damaged the building to the extent of $25,000 and ruined $50,000 worth of surgical instruments, apparatus, equipment and chemicals. The department of pharmacy and particularly that of pharmaceutic chemistry and the Meeker laboratory, were heavy losers.

BOOK REVIEWS

PRESCRIPTION WRITING AND FORMULARY. By John M. Swan, M.D., associate professor of clinical medicine, Medico-Chirurgical College of Philadelphia. 32mo., 185 pages. Flexible leather, $1.25 net. Philadelphia and London: W. B. Saunders Co.

This little book should enable any practitioner who will study it to become well grounded in the art of prescription writing, for it contains a very clear and authoritative exposition of the principles which must be understood by anyone who undertakes to prescribe in the language of science. The construction and latinity of prescriptions which are fully set forth, is followed by chapters on the United States Pharmacopœia and its official preparations, weights and measures, doses, number of ingredients, abbreviations and miscellaneous considerations, incompatibility and formulary which contains 1043 prescriptions, classified under the names of the diseases which they are prescribed for. In these prescriptions the author has confined himself to the use of standard pharmacopœial remedies to an extent that would delight the heart of the most ardent exponent of U.S.P. propaganda. If all were like the author in this respect the propagandist, like Othello, would find his "occupation gone."

POCKET THERAPEUTICS AND DOSE-BOOK, by Morse Stewart, Jr., B.A., M.D. Fourth edition, rewritten. Small 32mo., 263 pages. Cloth, $1 net. Philadelphia and London: W. B. Saunders Company.

In preparing the Pocket Therapeutics and Dose-Book for publication, the author has carefully gone over the previous edition and deleted those remedies now obsolete and incorporated others since approved by the medical profession. The little book contains, besides much other very valuable information, a comprehensive classification of medicines; a complete table of poisons, their symptoms, antidotes, and treatment; an index of diseases and appropriate remedies; a lengthy list of drugs and chemicals and their incompatibilities, and a table of solubilities. Some pertinent pointers are given on prescription writing, and there are also included a list of abbreviations and the tables of weights and measures used in writing and compounding prescriptions. The book should prove alike useful to the pharmacist, physician and nurse.

A COMPEND OF PHARMACY, by F. E. Stewart, M.D., Ph.G. Based upon Prof. Joseph P. Remington's "Text Book of Pharmacy" and the U.S.P., eighth edition, revised and enlarged [illegible] to the additions and corrections made in the U.S.P. to [illegible] with the new Food and Drug Act, 1906. With a very complete index and numerous useful and practical tables. 12mo., 294 pages. Cloth, $1 net. Philadelphia: P. Blakiston's Son & Co.

The Compend as noted by the author in the preface is not intended as a short cut to a pharmaceutical education nor as a book to serve for "cramming." Its object is to present information concerning official products and preparations in such a clear, concise and condensed form as to facilitate memorizing. That this has been attained with success in previous editions is readily gathered from their considerable use, by the student, in preparation for college quizzes and State board examinations, and by the practical pharmacist for general review work.

WINDOW DISPLAYS FOR DRUGGISTS, comprising [illegible] descriptions of over [illegible] displays which have been designed and used successfully by druggists throughout the country, together with [illegible] on the subject of window dressing [illegible] Edited by Harry B. Mason, editor of the Bazaar of Pharmacy. 12mo. 182 pages. $1. Detroit: [illegible]

This is a new edition of the book which appeared under a similar title [illegible] years ago. Much new matter has been [illegible] pertaining to the goods to be displayed and engravings which appear in Part II. The druggist who considers the [illegible] worthy of his attention cannot fail to be satisfied [illegible] which contains many suggestions [illegible] practical form. Most commendable is the fact that the description of each display is accompanied by an illustration showing full details of arrangement and points in construction that could scarcely be told by any writer, however gifted. The book should prove informative to all who are interested in the subject.

PROCEEDINGS OF THE NATIONAL WHOLESALE DRUGGISTS' ASSOCIATION, 35th annual meeting, Richmond, Va., 1909. 8vo., 525 pages.

This volume, uniform in style and binding with the volumes of preceding years, contains a complete stenographic report of the meeting held in Richmond last October and a full list of the membership, roster of past and present officers, committees, etc. A new feature introduced in the "proceedings" is that of the portraits of the officers and the members of the board of control which appear in the initial pages. There are on the rolls 273 active, and 246 associate members, not including the honorary and complimentary members, according to the report of J. E. Toms, the secretary, and under whose able direction the volume has been edited and put through the press.

COST ACCOUNTING PATHFINDER. By Frank E. Goodwin, Associate Editor Farm Machinery. Cloth. 12mo., narrow. 128 pages. St. Louis, Mo.: Midland Publishing Co.

The contents of this little book, although applied directly to cost-accounting of transactions in farm machinery, can be studied with considerable benefit for application to any business. It was written in the hope and belief that merchants are ready to transform their methods to knowledge instead of guesswork. Strenuousness of competition nowadays will not allow a man to estimate anything: to survive he must be able to know. Costs must be proportioned to the safe selling price. In line with these facts, the author has presented much general information relating to cost accounting, expenses, profits, daily records, perpetual inventories, the benefits of well-kept books, ratio of profits and expenses on cost and sales, etc.

MINERAL RESOURCES OF THE UNITED STATES, 1908. 2 volumes, 8vo., cloth. Part I. Metallic products. 816 pages. Part II. Non-metallic products. 890 pages. U. S. Geological Survey, Washington: Government Printing Office.

Following the precedent established last year, Mineral Resources of the United States for the calendar year 1908 is published in two separate parts. Part I contains statistics of the metallic products and Part II of the non-metallic products of the country. Products in which the manufacturing pharmacist is especially interested, such as arsenic, borax, bromine, lithium minerals, sulphur and other chemical materials, are summarized as to the principal statistical information regarding them and are treated in separate articles. There is also a very comprehensive and interesting article on mineral waters.

PROCEEDINGS of the tenth annual meeting of the American Conference of Pharmaceutical Faculties, 1909.

Retiring Secretary George C. Diekman has sent out the volume of proceedings of the tenth annual meeting of the American Conference of Pharmaceutical Faculties held at Los Angeles last August, which in size and style is uniform with the previous edition and contains the presidential address of Prof. H. P. Hynson. There are now 33 institutions holding membership in the Conference.

Girls' Capital Their Sense of Smell.

The late caller at the office of the throat and nose specialist noticed that the three young women ahead of him for a consultation exhaled sweet essences when they swished past, says the New York *Sun*. When his time came for an interview he commented on that pleasing fragrance.

"Oh, yes," said the doctor, "they can't help getting impregnated with the stuff. Those girls are saleswomen in perfumery departments in big stores. Every winter I have several perfumery saleswomen for regular patients. The girls in every big perfumery department in town are selected because of their sensitiveness to odors. When the season for colds sets in they have to look sharp. The slightest catarrhal affection attacks their sense of smell. Since that is their capital they can't afford to have it impaired, and they depend upon a specialist to keep them in good shape."

Just Dragging.

When people complain that "time flies" they often mean that it is dragging them over the bumps.

Dr. Wiley Chosen President of the U. S. Pharmacopoeial Convention.

Father of Pure Food and Drug Legislation Honored With Ten Year Term at Head of Great Joint Body of Pharmacists, Physicians, Chemists and Other Scientific Men—34 States and 160 Institutions Represented—Successful Meeting.

Officers and members of the Eighth Revision Committee photographed at the New Willard Hotel, Washington, May 10, 1910.

Official Declaration of General Principles Adopted for Revising the Pharmacopoeia

EVER since the last revision of the Pharmacopoeia in 1905 and more especially since the passage of the Federal Food and Drugs Act, medical and pharmaceutical bodies have devoted much time to discussing the principles which should be followed by the revision committee in preparing a new issue of that work. The extent to which the suggestions thus made have been recognized is difficult to determine. However, the "principles" laid down for the guidance of the new committee by the Pharmacopoeial Convention of 1910 are as follows, all of the paragraphs being adopted excepting Nos. 15, 16 and 17, which were referred to the committee of revision for consideration and with power to act:

1. Scope of the Pharmacopoeia.

We recommend that the Committee of Revision be authorized to admit into the Pharmacopoeia any medicinal substance of known origin; but no substance or combination of substances shall be introduced if the composition or mode of manufacture thereof be kept secret, or if it be controlled by unlimited proprietary or patent rights and the list of substances should be carefully selected, with standards for identity and purity, as far as possible. Substances used only for technical purposes should not be admitted to the next Pharmacopoeia, and a statement should be placed in the preface to the effect that standards of purity and strength, prescribed in the text of the Pharmacopoeia, are intended solely to apply to substances which are used for medicinal purposes or in determining the identity and the purity of the same.

2. Doses.

We recommend that after each pharmacopoeial article (drug, chemical, or preparation) which is used or likely to be used internally or hypodermically, the committee be instructed to state the average approximate (but neither a minimum nor a maximum) dose for adults, and, where deemed advisable, also for children. The metric system to be used, and the approximate equivalent ordinary weights or measures inserted in parentheses. It is to be distinctly understood that neither this Convention nor the Committee of Revision created by it intends to have these doses regarded as obligatory on the physician or as forbidding him to exceed them whenever in his judgment this seems advisable; the Committee should be directed to make a distinct declaration to this effect in some prominent place in the new Pharmacopoeia.

3. Nomenclature.

We recommend that changes in the titles of articles at present official be made only for the purpose of insuring great accuracy, brevity, or safety in dispensing, and to eliminate therapeutically suggestive titles. In the case of newly admitted articles, it is recommended that such titles be chosen as are in harmony with general usage and convenient for prescribing; but in the case of chemicals of a definite composition the scientific name should be given at least as a synonym.

There should also be inserted, after each article used by physicians in prescriptions, a carefully considered abbreviated name, which may be known as an official abbreviation, in order that uniformity may be established throughout the country, with the object of preventing mistakes in reading and compounding prescriptions, and further, to serve as authorized abbreviations in labeling the store furniture of the pharmacist.

4. Synonyms.

We recommend that the list of synonyms should be enlarged for the next revision, and the synonyms printed in the text of the Pharmacopoeia, immediately after the English name of the substance. A statement should be made in the preface of the Pharmacopoeia, that substances labeled with an official synonym, must comply with the same standards, tests and requirements as are demanded for the official article under any name.

5. Purity and Strength of Pharmacopoeial Articles.

We recommend that the committee be instructed to revise as carefully as possible the limits of purity and strength of the pharmacopoeial chemicals and preparations for which limiting tests are or may be given. While no concession should be made towards a diminution of medicinal value, allowance should be made for unavoidable, innocuous impurities or variations due to the particular source or mode of preparation, or to the keeping qualities of the several articles.

The "Purity Rubric," which limits the percentage of innocuous impurities, as introduced into the Eighth Revision, should be continued, and tests and requirements should be appended to each article carrying a "Purity Rubric."

In the case of crude drugs and natural products, the limits of admissible impurities should be placed at such a figure as to exclude any that would not be accepted by other countries.

6. International Standards.

The International Conference for the Unification of Formulas for Potent Remedies performed a signal service for all countries by recommending the various pharmacopoeias of the world to adopt certain standards for potent medicines. It is recommended that the next Committee of Revision adopt these standards, but it is believed that it would be unwise to require the acceptance of the details of pharmaceutical or other processes recommended by the International Conference.

If the finished product conforms to the International standards we believe that each country should be left free to adopt such detail and manipulation as may seem to them best. Nothing should prevent, however, the adoption of the recommendations of the conference, as to details, if in the opinion of the next Committee of Revision, by so doing, the Pharmacopoeia can be improved.

7. General Formulae.

It is recommended that general formulae be introduced, as far as the particular nature of the several drugs will permit, for fluid extracts, tinctures and such other preparations as are made by identical processes, and that the general formula to be followed in each case be merely indicated by reference.

8. Appending a List of Preparations in which an Official Article is Used.

It is recommended that, especially for the convenience of practicing physicians, there should be appended after each article in the text a list of the official preparations in which it is used.

A few exceptions may be made to this in such cases as water, alcohol, glycerin, sugar, etc.

9. Alcoholic Percentage in Official Preparations.

It is recommended that a range of volume content, of absolute alcohol, be stated in the Pharmacopoeia, for each preparation containing alcohol.

10. Assay Processes.

We recommend that the committee be instructed to introduce assay processes for as many of the potent drugs and preparations made therefrom as may be found practicable, provided that the processes of assay are reasonably simple (both as to methods and apparatus required) and lead to fairly uniform results in different hands. As regards the products of such

[illegible] tests of identity and purity should be added where [illegible]

[illegible] that [illegible] tests or assays when [illegible] and [illegible] may be submitted.

11. Serums and other Biological Products.

It is recommended that serums and other biological products of [illegible] if standardized by the Government or [illegible] may be admitted to the next Revision of the Pharmacopoeia.

12. Weights and Measures.

It is recommended that the committee be instructed to retain the metric system of weights and measures as adopted in the Eighth Decennial Revision.

13. Supplement.

It is recommended that the Committee of Revision be authorized to prepare a supplement to the Pharmacopoeia at any time they may deem such action desirable.

14. Publicity.

We recommend to the General Committee to make public for comment and criticism an abstract of standards and tests before adoption.

15. Atomic Weights.

It is recommended that the system of atomic weights, authorized by the International Committee (O = 16), be adopted for the next Revision.

16. Physical Constants.

It is recommended that the official methods for taking physical constants be inserted in the "Introductory Notices," and these shall apply to all articles in which physical constants are officially used, unless otherwise specifically excepted.

17. Standard Temperature.

It is recommended that the standard temperature of 25° C. (77° F.) be retained, as used in the present Revision (except in the case of alcohol), and that a table be inserted in the appendix for corresponding figures of 15° C. (59° F.).

18. Compound Preparations.

It is recommended that the introduction of new compound preparations to be discouraged as far as possible.

19. Pharmacognostical Descriptions.

It is recommended that, with the description of a crude drug, thereby be included brief, pharmacognostical descriptions, both macroscopic and microscopic where practicable, and there should be added a statement of the appearance of the structural elements in the powder, when examined microscopically, as a means of detecting adulteration.

20. Powdered Drugs.

It is recommended that, in the next Pharmacopoeia, powdered drugs be required to represent the entire drug unless specifically stated otherwise. Where the drug can be powdered without residue this should be required; in other cases the amount of allowable tailings, gruffs, or residue should be determined and inserted in the text.

21. Diagnostical Reagents.

It is recommended that there be included in the next Pharmacopoeia, such reagents, with standards for strength and purity, as are needed for the proper execution of tests that are valuable and important in the making of a correct diagnosis.

22. Date when the next Pharmacopoeia becomes Official.

It is recommended that the Committee of Revision print upon the title page of the next Pharmacopoeia a definite date, reasonably distant from the actual date of publication, announcing when the new Pharmacopoeia is intended to go into effect and to supersede the preceding one.

23. Precedents.

In all matters not specially provided for, in these "General Principles" the rules established for previous revisions, if there are any, should generally be followed.

NINTH CONVENTION PRESENTS NEW FEATURES.

Representation Enlarged in Scope and Numbers and General Revision Committe Increased in Size.

THE ninth decennial meeting of the United States Pharmacopoeial Convention, held in Washington the first of last month presented some features which are new to the work of pharmacopoeia making in this country. For the first time delegates of the National Wholesale Druggists' Association, the National Dental Association, the Association of Official Agricultural Chemists, the Association of State and National Food and Dairy Departments, and [illegible] appointed by the Secretaries of Agriculture and of Commerce and Labor were accorded recognition. Many suggestions regarding drugs and chemical names [illegible] to discuss on the general committee of revision, [illegible] to action of the convention, was performed by a conference of fifty members of the Pharmaceutical Association, the committee having charge of the Eighth Revision [illegible] to be present as the General Committee of Revision met to have names to select from the members of the Committee of Revision of fifteen members.

The first session was called to order by Dr. Otto A. Wall, of St. Louis, the presiding officer of the convention in the absence of the president, Dr. Horatio C. Wood of Philadelphia, who was suffering from illness and unable to attend. While the delegates were waiting for the arrival of Secretary Nagel of the Department of Commerce and Labor, who was slated to address the convention, Vice-President Wall introduced Señor Castro, Minister of Costa Rica, who said he presented the greetings of Spanish-America and told how the Pharmacopoeia in Spanish had been adopted as its own countries official work.

Secretary Nagel, in his preliminary remarks, said that he appeared more in the character of a substitute for the Secretary of Agriculture. He said the work the delegates were doing was of a kind that would make government regulation of their business unnecessary and sharply condemned "the opposition of the large interests" to the efforts of the government to regulate commerce and establish standards of honesty and fair dealing.

"If the time and talent and money which were spent in attempting to block legislation which was inevitable had been expended in co-operating to that end," declared the Secretary, "how much sooner the results would have been accomplished and how much greater would have been the benefits to all!"

Dr. Wood Sends Greetings to Delegates From Sick Bed.

Secretary Nagel's address was received with applause. Acting-President Wall then called Third Vice-President Wilcox, of New York, to the chair and proceeded to read the president's address, which was in the nature of a farewell, and profoundly stirred every one who listened to it. Dr. Wood said in part:

"*Moriturî salutamus!* From a sick-bed the president of the U.S. Pharmacopoeial Convention of 1890 and of 1900 sends salutation to the men of the convention of 1910, with a brief account of his stewardship during the last decade.

"It is a striking example of the payment which in this mad country of America eminence requires of the men who would gain it, that of the board of trustees—seven in number, appointed in the Act of Incorporation on the 11th day of July, 1900—three are permanently invalided and four are dead. None of these men were old. Omitting the secretaries, chosen for their youthful activity, of the five officers elected by the convention in 1900, the first vice-president and the treasurer are dead, and the president is as he is.

"I have thought in looking over the propositions for changes in the constitution and by-laws, recommended to you by the board of trustees, that if the original board elected by the convention were still alive some of these recommendations might not have been made; and I beg of you, when it comes to the final decision, that you think carefully over the matter, and if any doubt arises cleave to that which is old rather than that which is new and experimental. The experience of a busy life has taught me the wisdom of the old adage, 'It is better to let well enough alone.'"

Compliment of Chairman of 8th Revision Committee.

In his address Dr. Wood made several recommendations, complimenting the chairman of the Committee of Revision for his labors on the last Pharmacopoeia. A touch of the pathetic was given to the closing part of the address as it recounted how the writer had begun his scientific career as a medical student in 1860 and that with the writing of this message he closed it.

A committee on credentials of delegates was announced, as also a nominating committee, consisting of one delegate from every institution or organization represented in the convention.

On motion of C. S. N. Hallberg, members of Congress who were either physicians of pharmacists were invited to attend the convention.

Dr. H. W. Whelpley, secretary of the board of trustees, announced that the correspondence of his office relating to the last revision had been turned over to the Historical Section of the A.Ph.A. for preservation.

The treasurer reported the total receipts from the sale of the U.S.P. VIII to May 1 as $114,440.77, with disbursements leaving a cash balance of $8894.01. There were also on hand 2000 volumes of the Pharmacopoeia in English and about the same number in Spanish.

Prof. Joseph P. Remington read his report as chairman of the Committee of Revision, in which he said that 40,000 copies of the U.S.P. were sold just before the passage of the Food and Drugs Act. He also referred to the excellent work that Prof. Jose G. Diaz, of the University of Havana, Cuba, had done in translating the Pharmacopoeia into the Spanish

Dr. H. W. WILEY, Washington, new president of U.S.P. Convention.

Dr. OTTO A. WALL, St. Louis, acting president of Washington meeting.

Dr. MURRAY G. MOTTER, Washington, re-elected secretary U.S.P. Convention.

language. A vote of thanks was tendered to Professor Diaz and on recommendation of the board of trustees the University of Havana, represented by Dr. Diaz and two compatriots, was given a place among the delegates.

The proposed changes in the constitution and by-laws submitted by the board of trustees were then taken up in accordance with a provision of the constitution that a motion to change must be acted upon favorably by the board of trustees at least three months prior to the decennial meeting, and can be adopted by a not less than three-fourths vote of the convention. Under this clause the constitution was so changed as to admit to full membership in the convention delegates appointed by the Secretary of Agriculture, the Secretary of Commerce and Labor, the Association of Official Agricultural Chemists, the Association of State and National Food and Dairy Departments, the National Wholesale Druggists' Association and the National Dental Association.

Prof. W. C. Anderson, of Brooklyn, moved to amend the report of the board of trustees by adding the name of the National Association of Retail Druggists. The chair stated that this was new business and not an amendment, and after a little parleying Professor Anderson appealed from the ruling, the vote standing 108 for to 137 against. A motion to lay the appeal on the table was carried almost unanimously.

The general principles to be followed in revising the Pharmacopœia occupied the attention of the delegates nearly all of one afternoon. A preliminary draft of the "general principles" had been prepared by the board of trustees and copies of these were passed around to each delegate. These principles were discussed pro and con and were finally adopted by the convention as printed on page 565 of this issue of the ERA.

The nominating committee, after nearly an all night's conference, presented its report. The "slate" as brought in by the committee was headed by Dr. Harvey W. Wiley, chief of the Bureau of Chemistry, Department of Agriculture, and bore the name of Dr. N. S. Davis, of Chicago, for first vice-president. A motion by Thomas F. Main, of New York, to reverse the names, was defeated by a vote of 155 to 61. Mr. Main stated that his only motive for making the motion was that he feared the election of Dr. Wiley as president might be embarrassing to Dr. Wiley in his governmental work. There were no other contests and the entire ticket was elected, as follows:

President, Dr. Harvey W. Wiley, Washington.
First vice-president, Dr. N. S. Davis, Chicago.
Second vice-president, Prof. Charles Caspari, Jr., Baltimore.
Third vice-president, Dr. O. T. Osborn, New Haven.
Fourth vice-president, Leo Eliel, South Bend, Ind.
Fifth vice-president, Dr. W. A. Bastedo, New York.
Secretary, Dr. Murray Galt Motter, Washington.
Assistant secretary, Dr. Noble P. Barnes, Washington.
Treasurer, Samuel L. Hilton, Washington.
Trustees, Prof. James H. Beal, Scio, Ohio; F. W. Meissner, La Porte, Ind.; William Jay Schieffelin, New York; Dr. George H. Simmons, Chicago, and Dr. H. M. Wheipley, St. Louis.

The president of the convention, Dr. H. W. Wiley, and the chairman of the committee of revision, Prof. J. P. Remington, are ex-officio members of the board of trustees.

General Committee of Revision, J. P. Remington, Henry Kraemer, C. Caspari, Jr., C. L. Diehl, J. O. Schlotterbeck, A. B Lyons, H. C. Wood, Jr., O. T. Osborn, M. I. Wilbert, H. H Rusby, Reid Hunt, A. R. L. Dohme, A. B. Stevens, G. M. Beringer, E. G. Eberle, L. E. Sayre, E. Kremers, W. A. Puckner, L. F. Kebler, C. S. N. Hallberg, C. H. LaWall, G. D. Rosengarten, V. Coblentz, J. W. Hatcher, J. M. Good, H. V. Arny, J. A. Koch, S. P. Sadtler, W. Bodemann, Eli H. Long, O. Raubenheimer, C. E. Vanderkleed, T. Sollman, C. F. Nixon, John F. Anderson, N. S. Davis, J. M. Francis, C. E. Caspari, R. H. True, W. G. Gregory, H. M. Gordin, J. W. England, C. W. Edmunds, G. C. Diekman, P. Marvel, E. H. Bartley, W. S. Haines, W. C. Alpers, Lewis C. Hopp and Albert Plaut.

This committee later organized by electing the following officers: Chairman, J. P. Remington, Philadelphia; vice-chairmen, C. Lewis Diehl, Louisville, and H. C. Wood, Jr., Philadelphia, and secretary, C. H. LaWall, Philadelphia. The executive committee of fifteen to do the actual work of revision is to be elected by the General Committee.

President Wall installed the officers, beginning with board of trustees and working up the list until he reached the name of Dr. H. W. Wiley, who was brought to the rostrum amid great applause. On taking the chair Dr. Wiley made a brief speech in which he said that in other organizations it was largely the part of the president to be a figurehead, and that he thought he could fill the part of figurehead without much study or preparation. He also added that it was the duty of the president to see that the other officers of the convention did their duty. This he hoped to do, also promising a speedy revision of the Pharmacopœia if the officers all worked together. In his opinion the Pharmacopœia should be beyond criticism and a guide, not only for physicians and pharmacists, but also for the officers of the law.

At the last session a large number of reports from various associations were presented for the guidance of the pharmacopœia makers, but these were all referred after discussion to the consideration of the Revision Committee. One proposition that caused considerable discussion was that pertaining to raising funds for the use of the Revision Committee. The debate started when a report was read from the board of trustees providing for a tax of $50 on each association represented and an additional assessment of $25 if the original tax was not paid within a year. The initiation fee for all new associations coming in before the next decennial convention, according to the report, was to be $100.

It was claimed that such action would decrease the representation, besides putting too heavy a burden on many medical and pharmaceutical societies, and that it would operate to bar from the convention physicians who were most needed in the prosecution of the work of revision.

After an hour's debate a substitute resolution was passed

The convention, by resolution, recommended that National [illegible] of the Pharmacopœia by those druggists whom they find to be without the book, and also, that every physician should be requested by the various medical associations to keep a Pharmacopœia in his office.

Votes of thanks were tendered to the retiring officers, the outgoing board of trustees, the Surgeon-General of the Public Health and Marine Hospital Service and to the retiring chairman, Charles E. Dohme. In declaring the convention adjourned Dr Wiley referred to the splendid opportunities for work of a character that should cement and bind together all schools of the healing art.

Fine Show of Living Medicinal Plants.

The exhibit of living medicinal plants exhibited at the Richmond meeting was chiefly contributed by the United States Bureau of Plant Industry, Eli Lilly & Co., of Indianapolis; Prof. Henry Kraemer and Prof. H. H. Rusby. The New York Botanical Garden sent specimens of the plants yielding cinnamon, camphor, vanilla, black pepper, coca, tea and coffee. Dr. Hoell Tyler sent from Redlands, Cal., flowering specimens of Eriodictyon or Yerby Santa. Prof. L. E. Sayre sent from Kansas a specimen of Brauneria (Echinacea) augustifolia. Prof. E. G. Eberle sent from Texas, Cynoglossum Cicuta, two specimens of Artemisia and a number of plants which arrived too late to permit of determination and labeling. Prof. E. V. Howell sent from Chapel Hill, N. C., Trillium erectum, arum and mandrake. Although a few specimens were duplicated by different contributors, most of them were represented by solitary specimens.

Spigelia or pink root was sent by the Bureau, Eli Lilly & Co. and Professor Howell. Two species of Phlox which are used as adulterants of pink root were sent by Eli Lilly & Co., Professor Kraemer and the Bureau, and the latter sent Ruellia ciliicosa, which is another important adulterant of this drug. Digitalis was sent by Professor Kraemer and Eli Lilly & Co. Peppermint, spearmint, elecampane, Hepatica triloba and Porteranthus (Gillenia) trifoliata, by the Bureau and Eli Lilly & Co.; Hydrastis by the Bureau, Professor Kraemer and Eli Lilly & Co.; tansy, lily of the valley, blue flag, calamus, burdock, geranium, cimicifuga, blood-root, sumach and arum by the Bureau, Eli Lilly & Co. and Professor Rusby; belladonna and Rumex crispus by the Bureau and Professor Rusby; black haw, wild cherry, white oak, flowering dogwood, sassafras (from both staminate and pistillate plants), mandrake and Triosteum perfoliatum by Eli Lilly & Co. and Professor Rusby.

In addition to the above names, the Bureau sent the following: Cypripedium hirsutum, Hyoscyamus niger, Thymus vulgaris, Artemisia absinthium, Carum carvi, Lavandula vera, Chelone glabra (Balmony), Levisticum officinale, Nepeto cataria, Foeniculum vulgare, Mentha Citrata, Mentha crispa, Mentha longifolia, Pyrethrum cinerariaefolium (Dalmatian insect powder), Monarda fistulosa, Baptisia tinctoria, Glycyrrhiza glabra, Pycnanthemum albescens, Rubia tinctoria (madder), Althaea officinalis, Salvia officinalis, Rhamnus purshiana, Panax quinquefolium (ginseng), Valeriana officinalis, Iris florentina, Colchicum autumnale, Conium maculatum, Collinsonia canadensis, Calendula officinalis, Caulophyllum thalictroides, Apocynum cannabinum, Chamaelirium luteum.

Eli Lilly & Co. sent Odostemen (Berberis) nervosa, one of the Oregon grape roots, Hepatica acutiloba, shepherd's purse, Polemonium, Mitchella, Jeffersonia, Senecio aureus, Bicuculla Canadensis or squirrel corn, Gnaphalium obtusifolium, Aesculus glabra, Cercis, Hydrangea, Trillium, Equisetum hyemale, Aralia nudicaulis, Asarum Canadense, A. reflexum, yarrow, tulip trees, mullein, Virginia creeper, paw-paw, witch hazel, dandelion, poke root, beech drops and common plantain.

Professor Kraemer sent aconite, pleurisy root, blue passion flower, yellow jasmine, male fern, senega and Brauneria [illegible].

Professor Rusby sent Xanthorrhiza, the pink flowered form of Cornus florida, the rhizome of Solomon's seal, Rumex obtusifolia, butternut, Veratrum viride, dracontium, scopola, Euonymus, cocoa, yellow avens seed and Actaea alba.

New Yorkers Discuss Maximum Doses.

The principal subject of discussion at the May meeting of the New York Branch of the American Pharmaceutical Association was the publication of a statement of the maximum dose after each preparation included in the U.S.P. President Otto Raubenheimer read a prescription calling for 1 fluidounce fluidextract nux vomica, dose 4 drops 3 times a day, increasing 1 drop every three days until dose of 13 drops was reached. He thought this prescription showed the necessity of a table of maximum doses. Dr. R. A. Hatcher contended that 1 drop of water from a standard dropper equaled 1 minim, whereas 1 drop of the above fluidextract would equal only ½ minim, the final dose not being so very large for a normal person. He said that strychnine thrown into the blood was excreted very swiftly and the dose might be quickly repeated without disastrous results. No law, he said, however, would protect the pharmacist from giving a child the maximum dose.

Dr. Hatcher was of the opinion that the phrase "maximum dose" should not be used, "lethal dose" being better and he proposed a definition of the same by which the Pharmacopœia would not be involved in any legal procedure. He claimed that nothing, in the eye of the law, would relieve the pharmacist of all responsibility. For instance, the pharmacist should satisfy himself that digitalis is not taken by a patient through a long expanse of time.

Would Give Offices to Retail Druggists.

In connection with the Richmond meeting of the A.Ph.A. several reports were made. Thomas Cook, in commenting on the work of the nominating committee, said that the tendency in selecting presidential timber for office in the past had favored journalists and college professors, but he thought that for the good of the membership a retail pharmacist should be the next executive. As a member of the committee he had so voted. A vote of thanks was given Mr. Raubenheimer for his work in, and the interest he had aroused in, the comparative study of the various pharmacopœias, the members responding by rising.

J. Leon Lascoff read a very interesting paper on "The Practical Side of a Professional Pharmacy" and Hiland Flowers read another on "Enamel Ware as to Friability and Acid Reaction, and Possibilities of Danger from Boric Acid and Chipping."

George Hitchcock was elected vice-president of the branch to succeed A. M. Roehrig. Following delegates were appointed: To the New Jersey Ph.A. at Cape May meeting, Thomas Gallagher, Prof. H. J. Lohman and Charles Kuehne; to the New York Ph.A. meeting at Saratoga, Dr. George C. Diekman, Hugh Craig and J. Leon Lascoff.

Joint Meeting of Physicians and Pharmacists.

Almost a week previous to the above meeting the branch held its third joint meeting with the Medical Society of the County of New York. George H. Hitchcock, chairman of the committee on arrangements, called the assemblage to order and turned the meeting over to Dr. John Weeks. Dr. Warren Coleman, the first speaker, favored a limited Pharmacopœia, as an educational advantage, and the inclusion of biological tests.

Dr. Walter A. Bastedo was of the opinion that it didn't matter what drugs were in the Pharmacopœia so long as the list included the good ones. Dr. Bastedo commented on the variations in strength of the various elixirs of iron, quinine and strychnine.

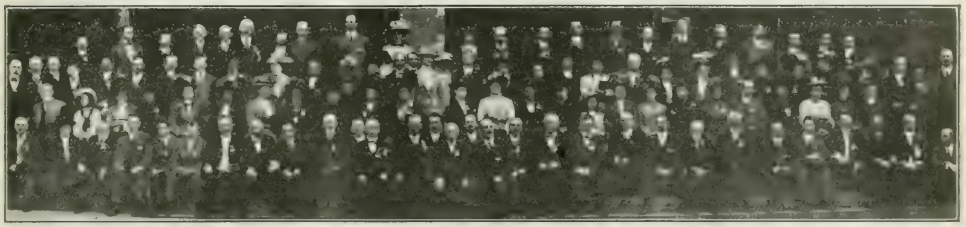
Prof. J. P. Remington declared that the U.S.P. can never be a doctors' book. The next Pharmacopœia, he said, would contain more synthetic preparations than the present edition. He suggested that the branch present to each medical college a set of U.S.P. preparations. In line with the first statement made by Professor Remington, Prof. H. H. Rusby said that the Pharmacopœia can never be used as a work of study by medical students.

Dr. Robert A. Hatcher reiterated his former stand to the effect that the U.S.P. should include only those drugs of known medicinal value and said that unless it is revised to the satisfaction of the physicians, a separate pharmacopœia for the latter would be necessary. The greatest obstacle to the practicing physician, he said, is lack of thorough preparation in pharmacy and part of this blame lies on the pharmacist.

Other speakers were Dr. W. C. Alpers, Dr. George C. Diekman, Albert Plaut, Dr. Egbert LeFevre, Jacob Diner, Prof. Virgil Coblentz, Dr. Walters and Caswell A. Mayo.

Pharmacopoeial Revision Chief Topic at Richmond A.Ph.A. Meeting.

More Scientific Papers Presented Than Ever Before—President Rusby Urges Better Standards and Discusses Chain Stores—Mercenaries Denounced by a Close Vote and Doctors Should Be Permitted to Do Their Own Reforming of Practice.



Group photograph of members of American Pharmaceutical Association taken at Hotel Jefferson, Richmond, Va., May 5, 1910.

FOR the amount of work accomplished within a given period the 58th annual session of the American Pharmaceutical Association held in Richmond during the week beginning May 2 marks a record. The programme extended over but five days, every minute of the time being devoted to meetings of sections or of allied organizations to such an extent that but little opportunity was offered for sight-seeing. The meetings were held in the Hotel Jefferson, between 250 and 300 members being registered as present.

The first general session of the association was opened on Tuesday by President Rusby, who introduced the Reverend George W. McDaniel, who offered a brief prayer. Then came an address of welcome by Hon. W. H. Mann, Governor of Virginia, in which he complimented the ladies, saying that he was glad to see so many of them present. He spoke of the meeting the association held in Richmond a decade ago and said that he hoped the city would continue to remain in the circuit of places visited. After a brief response by Dr. H. M. Whelpley, of St. Louis, Mayor D. C. Richardson extended a cordial welcome to the association on the part of the city of Richmond, Prof. J. H. Beal, of Scio, Ohio, replying for the membership.

Fraternal greetings on the part of a number of allied organizations were presented, E. H. Ladish, of Chicago, speaking for the N.A.R.D.; Edgar D. Taylor, for the N.W.D.A.; M. I. Wilbert, for the United States Public Health and Marine Hospital-Service; Dr. L. F. Kebler, for the Department of Agriculture, and Dr. Murray Galt Motter, for the American Medical Association. Telegrams of greeting were also received from the secretary of the Los Angeles Retail Druggists' Association, and from Mrs. Lee, president of the Women's Organization of the N.A.R.D.

Planning for Larger Attendance at Meetings.

Vice-President C. B. Lowe, of Philadelphia, took the chair while President Rusby read his annual address. This was devoted to a number of phases of the association's work, one of the important topics pertaining to methods of increasing the membership. As an inducement to join the association the two most important attractions offered to would-be members were attendance at the annual meetings and the association's publications. To facilitate greater attendance attention should be given to hotel rates and transportation and an effort should be made on the part of the committees on arrangements and transportation to secure a material reduction in the amount of these expenses. The various committees, especially those on the establishment of local branches, on drug reform, on publicity and on National and State legislation, should be organized on a more systematic basis and conducted by more sustained methods. The work of each year should be performed with a view to its continuation by the committee's successors, and these successors should inaugurate a more systematic and formal method of performing their work, preserving a secretary's record book for future consultation.

"Sustaining Members," a New Class, Suggested.

Provision for a new class of members to be known as sustaining members, was recommended by President Rusby. Such members would be those who felt that they could afford an annual contribution to the working funds of the association. He thought if such a class was organized, more than a hundred would be found to contribute under such conditions.

In discussing pharmacopœial matters President Rusby said the real issue between physicians and pharmacists is the unwillingness of the former to permit the Pharmacopœia to afford those provisions which are absolutely essential to the convenient, successful and safe performance of the pharmacist's duty, and to the welfare of great numbers of patients of those physicians whose practices in the selection of drugs differ from those of the objecting body. It was the duty of the association's members to express themselves upon the subject, so that the Pharmacopœia committee may understand that we represent the belief and the determination of the profession as a whole. As bearing upon this subject Dr. Rusby called attention to the following facts and principles:

Recommendations Regarding Pharmacopoeial Revision.

1. It is a fact, perfectly well established by fifty years of official experience, that the admission to or the deletion from the Pharmacopœia of an article has scarcely a perceptible influence upon the extent of its use. When dismissed from the Pharmacopœia because the very best professional judgment regards it as therapeutically valueless, it will continue to be used as before, the only effect being to deprive pharmacists and their patrons of official standards for its control.

2. Many articles of little therapeutic activity, yet in common use, whether wisely so or not, may, through their contained impurities, seriously affect the physical, chemical or therapeutical preparations of prescriptions into which they enter, so that it becomes necessary for their purity to be safeguarded.

3. The primary object of the Pharmacopœia is not to teach therapeutics, to influence therapeutical practice or to create an incorrect, however creditable impression regarding it, but to respond to the demands of such practice by providing suitable information and standards for rendering it as safe and efficient as the conditions permit.

4. All preceding revisions of the Pharmacopœia have been based upon the declared principle that it is the actual use of an article that is to determine its recognition in the Pharmacopœia, in spite of considerations as to its therapeutical merit.

It would be out of place in a presidential address to discuss pharmacopœial revision per se, and these suggestions are made in order to impress the importance of the duty of this association to take definite action in applying that knowledge and judgment which especially pertain to it.

One more direction in which such duty applies may well be pointed out, namely, the necessity for more definite standards. One of the most baneful possible conditions, as to its power to cause errors of judgment, or to provide for unjust discrimination, or an accusation of it when it does not exist, is a want of definiteness in the expression of a standard. The Pharmacopœia is now replete with defects of this class. Many of its definitions are absolutely meaningless and a larger number of its descriptions and directions are incapable of enabling a positive decision to be reached.

I therefore recommend that the association reiterate, as its conviction, a statement found in the sixth revision of the Pharmacopœia, and which has governed all subsequent revisions, that it is "best to refrain from dropping drugs and preparations which are, on inquiry, found to be in rather more than purely local use;" also in another proposition, submitted by Professor Oldberg and adopted by the Committee of Revision in 1890, to the effect that the primary consideration in the recognition of a medicinal article by the Pharmacopœia is the fact that it or its preparations is in common occurrence in the pharmacy, rather than considerations of its therapeutical importance or value.

That it is the opinion of this association that the definitions, descriptions and tests of the Pharmacopœia should be so fully

and definitely stated as to insure as far as is practicable against misunderstanding or failure in interpretation by those employing the book.

With regard to the National Formulary, President Rusby seemed to be afraid that the attitude of the association toward the N.F. might be abused, and that the results of such abuse might cause a widening of the breach between the medical and pharmaceutical professions, and he recommended that a committee, of which the chairman of the N.F. committee should be a member, be appointed immediately to consider the practicability of the publication of the N.F. by the U.S. Pharmacopœial Convention, and that the committee, if it should approve of the suggestion, should submit a plan to bring about the change recommended.

Dr. Rusby Sees Grave Dangers in Commercialism.

The ethics imposed by scientific teachers came in for some attention and the question was asked: "What is to be expected from the students of an institution who see the professor to whom they look for an example go upon the witness stand and, for a fee, swear to the exact opposite of that which he has been teaching them as the truth in his instruction course?" "The danger of commercialism," President Rusby said, "the most serious that has ever threatened the profession, now looms comparatively near at hand." He continued:

I refer to the enlistment of vast amounts of capital in the crushing out of individual enterprise, in the elimination of professional responsibility, in the reduction of professional employees to a state of serfdom, and in the destruction of an honest means of livelihood on the part of great numbers of people engaged in pharmaceutical pursuits. That this attempt will become successful unless actively opposed is manifest when we note that the same means are being employed which have already proven successful in other lines, and which are now applied to ours with the additional advantage of successful previous experience. The interests engaged in this work are the most deadly possible enemies toward all the objects of our association and of all other institutions in which educational and professional ideals are cultivated.

How shall we meet this stupendous danger? To this question I have seen one to see but one answer, and that is through the strength of union. We must in this instance fight fire with fire. While it is not appropriate for me at this time to discuss either the merits or demerits of the American Druggists' Syndicate or to enter into any discussion of its past history, I feel that I should not refrain from directing your earnest and studious attention to the plan by which it proposes to fight this common danger. I am convinced that this plan, or some modification of it is the only one which promises any hope of success. Without submitting any recommendation in the premises, I submit the opinion that it would be a most happy consummation to discover some satisfactory ground for a community of interest, if not of action, between two institutions whose interests harmonize in so many ways as do those of the A.Ph.A. and A.D.S.

Publication of Syllabus Cause for Congratulation.

The association was congratulated by the president upon the completion and publication of the National Pharmaceutical Syllabus. He also believed that a special course in pharmacognosy, with a subsequent examination and license, should be required of every person having immediate charge of an importing or trading business in drugs and chemicals, and he recommended that the committee on National legislation should be instructed to make a suitable inquiry into the subject. Professional titles, he thought, should be appended to the names of all members entitled to them, and the same with their names should be printed in the list of members.

The address took the usual course, that part relating to the publication of the N.F. by the Pharmacopœial Convention being referred to a special committee consisting of Prof. J. P. Remington, Wm. C. Anderson, Geo. M. Beringer, C. Lewis Diehl and L. F. Kebler. The committee on the remaining portions of the address was J. H. Beal, Charles Holzhauer, Henry C. Blair, F. C. Godbold and C. A. Mayo.

Secretary Caspari was directed to send greetings to the following absent members who were unable to attend the meeting on account of ill-health: S. A. D. Sheppard, Dr. J. E. Bode, Oscar Oldberg and Charles E. Dohme. Dr. Linno Sayre was [illegible] and a message of condolence was sent to Prof. F. J. Wulling of Minneapolis, who was called home from the meeting on account of the death of his father.

Nominations for Next Year's Officers.

The [illegible] committee consisting of one member from each State, submitted the following report, which was adopted [illegible] the names [illegible] to be presented to the [illegible]

For president—Charles Holzhauer, Newark, N. J.; E. H. Lynch, Chicago; J. M. Good, St. Louis; E. G. Eberle, Dallas, Texas; A. M. Rochrig, Buffalo; George F. Payne, Atlanta; Theodore D. Wetterstrom, Cincinnati; M. Noll, Atchison, Kan.; Otto Raubenheimer, Brooklyn, N. Y.

For [illegible] vice-president—E. C. Bent, Dell Rapids, S. D.; E. H. Lynch, Chicago; J. M. Good, St. Louis; E. G. Eberle, Dallas, Texas; A. M. Rochrig, Buffalo; George F. Payne, Atlanta; Theodore D. Wetterstrom, Cincinnati; M. Noll, Atchison, Kan.; Otto Raubenheimer, Brooklyn, N. Y.

For [illegible] vice-president—Charles Holzhauer, Newark, N. J.; E. Berger, Tampa, Fla.; J. O. Burge, Nashville, Tenn.

For members of the council—E. C. Bent, Dell Rapids, S. D.; E. H. Lynch, Chicago; J. M. Good, St. Louis; E. G. Eberle, Dallas, Texas; A. M. Rochrig, Buffalo; George F. Payne, Atlanta; Theodore D. Wetterstrom, Cincinnati; M. Noll, Atchison, Kan.; Otto Raubenheimer, Brooklyn, N. Y.

Treasurer's Report.

Treasurer Whelpley reported a summary of the funds of the association, the total amount in the treasury on May 1 being $28,223.89, an increase since last July of $4083.54. The life membership fund is now $17,141, the endowment fund $5016.70, the centennial fund $2386.25 and the Ebert legacy $2822.90, the Ebert prize fund $938.36, the Proctor monument fund $3805.28 and the Motter scholarship fund $30.

Secretary Caspari made a brief report covering the income and expenses of the National Formulary.

Prof. Joseph P. Remington, chairman of the committee to which was referred that part of President Rusby's address relating to the publication of the N.F. by the Pharmacopœial Convention, reported against the recommendation. The report of W. S. Richardson, chairman of the committee on parcels post, was read, in which it was stated that there was no hope for the passage of the bill now before Congress. A hearing held on the bill was attended by representatives of various retail interests, who were uniformly opposed to the bill. The promoters of the measure were interested in mail order houses.

Support Given to Cullom and Pure Paint Bills.

S. L. Hilton, chairman of the committee on National legislation, read his report which was referred to the Section on Education and Legislation. This report gave a detailed history of the legislation that had been attemped during the past year, the chairman recommending among other things that the association should direct its efforts toward securing the passage of the Cullom bill. Support was given, likewise, to the pure paint bill.

After a hot contest in which advocates for various cities as the place of next meeting were heard, the men from Boston won on a vote of 59 to New Orleans 26 and Cedar Point 38. The time of the meeting is to be fixed by the council.

The following members were appointed to serve as the committee on Pharmaceutical Syllabus, recommended by President Rusby: Willis G. Gregory, C. S. N. Hallberg, George M. Beringer, Harry B. Mason, E. C. Eberle and H. F. Taylor, each to serve from seven years to one year in the order named.

Dr. R. F. Hatcher, as chairman of the committee of the American Medical Association on N.F., presented a report to the effect that his society would be glad to co-operate in any way to increase the value and efficiency of the National Formulary. He believed that the standards adopted for that work should be as high as those provided for the Pharmacopœia. The report was received, referred to the N.F. committee and the co-operation of the A.M.A. invited.

Report of Committee on President's Address.

Prof. J. H. Beal, chairman of the committee on president's address, presented the following report which was adopted as read:

In the opinion of your committee your president is entitled to the thanks of the association for the frank and fearless manner in which he has discussed matters which are of vital concern to the association and to the cause which it represents, irrespective of our agreement or disagreement with the opinion expressed by him.

With respect to the specific recommendation contained in the address, we report as follows:

We approve of the recommendations concerning increase in membership fee for we think we refer to

1. The creation of a class of members to be known as sustaining members, or by some other appropriate title, the same to be provided for under [illegible] by-laws of the council and hereafter submitted for the [illegible] of the association.

2. The establishment of new branches in districts which are [illegible] to maintain them in proper efficiency and to increase the efficiency and working forces of those already established.

3. The authorization of such changes in the character and scope of the Bulletin as will justify a reasonable expectation of [illegible] in its circulation and [illegible] among our members, and in its [illegible] as a [illegible]

In connection [illegible] we refer [illegible] to use the income from the Ebert legacy prior to [illegible] when the fund and the [illegible] will [illegible] the sum [illegible] by [illegible] We therefore recommend that the [illegible] of the president be [illegible] for [illegible]

The committee approves the following recommendations:

1. [illegible] the meeting [illegible] of the important committees of the association by such [illegible] a number of financial

Dr. H. H. RUSBY, New York,
retiring president of the A.Ph.A.

E. G. EBERLE, of Dallas,
new president of the A.Ph.A.

Prof. W. B. DAY, of Chicago,
first vice-president of the A.Ph.A.

support as the funds of the treasury may now or hereafter warrant.

5. That the committee on National and State legislation be supplemented and strengthened by the addition of sub-committees closely allied with the work of the various State pharmaceutical associations.

6. That the work of the committee on publicity be supplemented and strengthened by the addition of sub-committees located in the principal centers of population.

7. That the committee on National legislation inquire into the desirability and practicability of the establishment of legal requirements for proper educational and technical qualification of those who are directly in charge of the importation and wholesaling of drugs and chemicals, in order that the public health may be more properly safeguarded.

8. The recommendation that all ex-presidents be made ex-officio members of the council being one which involves an amendment to the fundamental law of the association, and the proposition being of such far-reaching possibilities, we recommend that it be sent over to the council for further consideration.

9. We approve of the president's recommendation that all committees and officers having charge of the arrangements for future meetings be instructed to make greater efforts to secure more favorable rates for transportation and hotel accommodations and that the committee should, as far as possble, avoid the selection of expensive hotels or headquarters.

10. We approve the recommendation that the association place itself on record as endorsing the statement contained in the sixth revision of the United States Pharmacopoeia, "that it is best to refrain from dropping [from the official list] drugs and preparations which on inquiry are found to be of more than purely local use," and that the primary consideration in determining the official recognition of a medicinal article, should be that it or its preparations are of common occurrence in pharmacy, rather than mere academic opinions concerning therapeutic value.

11. We also concur in the opinion of the president that the definitions, descriptions and tests of pharmacopoeial articles should be so fully and definitely stated as to insure as far as practicable against the possibility of their misinterpretation, and also that it would be advisable to include in the text of the Pharmacopoeia descriptions of the more important powdered drugs in so far as the inclusion of such description is capable of practical usefulness.

In addition to the specific recommendations sent to this committee for consideration, we also find in the president's address various expressions of personal opinion upon questions and policies concerning which men may justly and honestly differ.

The committee therefore deems the present occasion opportune for the reassertion of the right of every member to the free expression of his personal opinion regarding questions of vital concern to pharmacy or to the welfare of this association, and also of the fact, founded upon the constitution and long established association traditions, that no such assertion of personal opinion, whether of officer or lay-member, can be regarded as reflecting the association policy regarding such question, unless the same shall have been duly expressed and ratified by concurrent vote of the council and general session of the association in the formal manner provided in the constitution and by-laws.

Dr. H. F. Taylor, Albany, N. Y., called attention to the fact that the president's recommendation regarding titles in the Pharmacopoeia had not been acted upon and offered a motion to provide for the appointment of such a committee. The motion prevailed and Dr. Taylor, Prof. Joseph P. Remington and C. S. N. Hallberg were appointed.

Prof. L. E. Sayre presented the report of the committee on drug reform which was received in printed form. Among other things the committee suggested that the work of law enforcement could be aided by creating a separate division of the Scientific Section to consist of all those who are especially interested in analyses with reference to the different drug laws, in other words, to form a clearing house for drug inspectors and analysts. The formation of a permanent committee was recommended.

Members Almost Equally Divided as to A.D.S.

C. M. Ford, of Denver, then introduced the following resolutions, which were adopted after a motion to table them was lost by a vote of 32 to 33:

Resolved, That in the opinion of the American Pharmaceutical Association, it is neither wise nor expedient, even in pursuit of schemes which it is claimed will advance the material welfare of dispensing pharmacists, to assail, antagonize or malign any class inseparably joined to us by commercial or professional ties.

Further, That we seriously deprecate the hostile attitude toward the medical profession and the jobbing fraternity of various drug journals assuming to represent pharmacists in general or some considerable body of pharmacists in particular.

Further, That we respectfully urge upon the officers of the American Druggists' Syndicate a more careful supervision of the utterances of their so-called "organ."

Its harsh language is hurtful to pharmacists and embarrassing to them in their relations with one another and with physicians and jobbers.

The mercenary schemes of a few overzealous and adventurous individuals, who, being frequently without any training in pharmacy, and who have entered its ranks solely for gain and to exploit their peculiar ideas of high finance, can have no sympathy with its aims or traditions. Such schemes can be helpful and profitable to only an insignificant few and must necessarily bring inevitable disappointment and disaster to the multitude who follow in their train. Be it further

Resolved, That we recommend that any movement for the reform of medical practice be allowed to originate and proceed within the medical profession.

Further, That we are opposed to any attempt upon the part of the pharmacal press to dictate or compel any such reform, believing as we do that the medical profession is eminently qualified to institute and carry out its own necessary reforms.

Actual Practice of Metric System Advised.

Prof. Henry Kraemer, reporting for the committee on weights and measures, referred to the work of the Bureau of Standards, Washington, D. C., and was of the opinion that more general approval of the metric system can be accomplished if teachers in public schools would lay more stress on its advantages and give practical exercises, using the actual measures and weights. The report was adopted.

The scope and plans for publishing the *Journal of the American Pharmaceutical Association* were outlined in the minutes of the council read at the last general session of the

association. The new journal is to be issued as a monthly and to begin publication July 1, 1911. It will include editorials, pharmaceutical abstracts, papers read before the association and news of the various branches. Suitable advertising will be accepted. The editorials will be confined to what may elsewhere appear in the journal, or they will be signed by contributors who will be responsible for them. Prof. C. S. N. Hallberg will be editor, with Prof. Charles Caspari and C. Lewis Diehl as associates. Arrangements will also be made so that each member may receive additional a bound volume containing one year's numbers of the journal on the payment of a small fee.

The subject of physiological or biologic standardization came up for discussion many times during the meetings of the various sections. A resolution, coming in from the Scientific Section recommending the subject to the Pharmacopœial Revision Committee for consideration, was approved and the association appointed the following members as a committee on physiological testing: Dr. E. M. Houghton, Detroit; Dr. Reid Hunt, Washington; Dr. H. C. Wood, Jr., Philadelphia; Dr. Robert A. Hatcher, New York; Dr. T. Sollman, Cleveland, and Dr. J. Crawford, Philadelphia.

A set of thirty resolutions, under the title "General Principles to be Observed in the Ninth Revision of the Pharmacopœia" and sent to the Scientific Section for discussion, were returned without recommendation. These were taken up separately, amended and in this form were directed to be sent to the U.S.P. Convention as expressing the views of the members of the A.Ph.A.

State Associations Good Recruiting Fields.

Prof. W. B. Day, of Chicago, reported on his work as chairman of the committee on membership and said that the most fruitful place for recruiting was the meetings of State associations. It is proposed to have a member to represent this committee at the meeting of each State organization during the year.

F. B. Hayes, chairman of the committee on publicity, told of his work during the year and proposed that the thanks of the association should be given to the local papers for their interest and help.

Dr. H. M. Whelpley announced the appointment of Ewen McIntyre, of New York, as honorary president for the ensuing year.

The following officers who had been elected last fall were then duly installed by retiring President Rusby: President, E. G. Eberle, Dallas, Texas; first vice-president, William B. Day, Chicago; second vice-president, Otto F. Claus, St. Louis; third vice-president, Leonard A. Seltzer, Detroit; secretary, Charles Caspari, Jr., Baltimore; treasurer, Henry M. Whelpley, St. Louis; reporter on the progress of pharmacy, C. Lewis Diehl; members of the council, J. H. Beal, Joseph P. Remington and H. H. Rusby.

The entertainment features included a card party for the ladies at the Women's Club on Wednesday evening; a luncheon at Lakeside Park, old Virginia picnic style, and dancing on Thursday afternoon and evening, and a reception on Friday evening, tendered to the association by his excellency, William Hodges Mann, at the Governor's mansion. Local secretary, Prof. T. A. Miller, made every effort to give the visitors a good time and his work in this direction was thoroughly appreciated by every one who came in contact with him.

New Officers of Sections.

Beginning on Tuesday afternoon the various sections held sessions nearly continuously until the end of the week. In the number of papers read the Scientific Section, under the direction of Chairman Wilbert, headed the list with more than [illegible] in the programme. Chairman Rahlmann of the Section on Practical Pharmacy, made an interesting feature of his symposium on the pharmacopœias of the world, con[illegible] by correspondence. The election of the other sections was conducted by the arrangement of their respective chairmen and the rule was freely used that the members were getting far more mental pabulum than they could well digest in the present rate of consumption.

The officers of the various sections are:

[illegible] chairman, A. R. Cahn, Chicago; secretary, Wm. G. Reichhelm, Baltimore. Pharmacy and Materia Medica, chairman, J. L. Lascoff, Louisville, Ky.; secretary, Otto Raubenheimer, Brooklyn, N. Y. Chemistry, chairman, H. L. Fullerton, Medford, Wis.; secretary, C. S. Mason, Philadelphia. Microscopy, chairman, L. E. Sayre, Lawrence, Kan.; secretary, E. M. Ahrens, Philadelphia. Historical Pharmacy, chairman, L. F. Kebler, Washington; secretary, Prof. Sydney Yeomans, Chicago. Education and legislation, chairman, Prof. C. W. Johnson, Seattle, Wash.; secretary, Prof. W. J. Teeters, Iowa City, Iowa; associates, Prof. J. W. Sturmer, Lafayette, Ind., and M. Neil, Atchison, Kan. Practical pharmacy and dispensing, chairman, Louis Saalbach, Pittsburg; secretary, P. Henry Utech, Meadville, Pa., associate, Wm. A. Heal, Detroit, Mich.

33 SCHOOLS NOW IN CONFERENCE OF FACULTIES.

Pharmaceutical Syllabus Approved and By-Laws Amended as to High School Minimum.

At the eleventh annual meeting of the American Conference of Pharmaceutical Faculties held at Richmond, May 2-7, 26 colleges of pharmacy were represented by delegates. On account of the death of the president of the conference, Wm. M. Searby, the vice-president, E. H. LaPierre, presided. The vice-president, in his address, called particular attention to the growth of the conference from 17 schools at its organization in 1900 to 33 schools now holding membership.

The report of the chairman of the executive committee showed that the conference was doing much toward assisting in raising the standards of pharmaceutical education.

The Pharmaceutical Syllabus was carefully considered and the conference voted to approve its general scope and purposes. The following were elected to represent the conference on the general syllabus committee: J. H. Beal, H. H. Rusby, J. O. Schlotterbeck, J. A. Koch, W. C. Anderson, C. B. Lowe and H. V. Arny.

The by-laws were amended so as to provide that one year of high school be the minimum requirement for entrance to all schools holding membership in the conference.

Prof. J. T. McGill, of Vanderbilt University, read a paper on "The High School in the Southern States." His aim was to show that the Southern States had ample high school facilities to prepare students to meet the minimum requirement of one year's high school work. These officers were elected:

President, J. O. Schlotterbeck, University of Michigan, Ann Arbor; vice-president, W. J. Teeters, State University of Iowa, Iowa City; secretary-treasurer, Charles W. Johnson, University of Washington, Seattle; executive committee, chairman, J. A. Koch, Pittsburg College of Pharmacy; E. G. Eberle, Baylor University, College of Pharmacy, Dallas; L. E. La Pierre, Massachusetts College of Pharmacy, Boston; J. M. Good, St. Louis College of Pharmacy.

Bureau of Chemistry Thrown Open to Visitors.

Many of the delegates attending the Pharmacopœial Convention took the opportunity to visit the laboratories of the Bureau of Chemistry and the Hygienic Laboratory during their short stay in Washington. The former is located in a new building at 216 13th street, S. W., just south of the new building of the Agricultural Department. On Wednesday evening the building was thrown open to visitors, the function partaking of the nature of a housewarming. Secretary of Agriculture James Wilson, assisted by Assistant Secretary W. M. Hayes, Dr. H. W. Wiley, F. L. Dunlap and W. D. Bigelow, received the guests, who were then shown about the building by assistants connected with the department. During the evening a concert programme was given by the Marine Band. Refreshments were served.

The building, which is new, has been only occupied for a few months and is said to be fireproof and sanitary in every respect. In it are located the various laboratories connected with the headquarters of the Department of Agriculture, the food and drug divisions, of course, forming only a part of the Bureau of Chemistry's work. Investigations pertaining to drugs are done in the drug inspection, synthetic products or pharmacological laboratories of the division, eleven rooms on the fifth floor and five rooms on the sixth floor being devoted exclusively to this work.

Social Features of the Convention.

No stated entertainment programme having been prepared by those in charge of the business meetings of the Pharmacopœial Convention, the visiting delegates and their families were busy most of the time in viewing the sights of the Capital City. A number of Washingtonians well known to pharmacists threw open their houses, however, and not a few of the visitors took the opportunity to accept the invitations so graciously extended to them as guests. Among those who entertained were Dr. and Mrs. L. F. Kebler, Mr. and Mrs. Wymond H. Bradbury and Mr. and Mrs. J. Leyden White.

Prof. Howell Gives His Views on the Ideal of Pharmacy's Future.

Development of Medicine in Foreign Countries Reviewed and Deductions Made—Mr. Heffner Believes Dr. Stewart's Plan Would Provoke Complications.

By Edward Vernon Howell, A.B., Ph.G., dean of Department of Pharmacy, University of North Carolina, Chapel Hill:

I have read with much interest the very valuable paper, "Shall We Have a Profession of Pharmacy? An Ideal Outlined," by Dr. F. E. Stwart, of Philadelphia, in the ERA for February, 1910.

In an interesting way, many of the things that prevent the idealistic practice of pharmacy and medicine are discussed. I agree thoroughly with the writer's statements that pharmacists should not recommend the so-called patent medicines, whether prepared by individuals, clubs or organizations. Private formulas worked up and advertised to a public for their own administration is not my idea of professional pharmacy. On the other hand, I do not believe in physicians using ready-made mixtures of medicines, patented or trade-marked or both, as *advertised directly to them by the medical samplers of manufacturing houses.*

Dr. Stewart's suggestion in regard to a new type—the apothecary-physician, who shall be "trained as pharmacologists, whose function it will be to select, prepare, standardize, compound and dispense medicine to meet the demands of the medical profession" and perhaps "perform the function of prescribing for minor complaints for which the public usually goes to the drug store"—does not offer, to my mind, the solution to the question, "Are we to have a Profession of Pharmacy?" Taking the suggestion as offered by Dr. Stewart as good, but differing as to the solution offered by him for an ideal profession of pharmacy, I quote the following dates from Pareira's Materia Medica in the development of medicine and pharmacy in England, Russia and Portugal:

From various writings we find that the practice of medicine and surgery among the ancient Britons was in the hands of the Druids. Superstition might be termed the foundation of their vocation. They also practiced the simpler operations of pharmacy. Some idea may be had of their knowledge of the cure of diseases when one reads of the charms they used, and the enumeration of such medicinal substances, applied with incantations and superstitious rites, as mistletoe of the oak, selago, vervain, samolus, etc. The mistletoe was cut with a golden knife only when the moon was six days old. When consecrated by certain forms it was considered an antidote to poisons and a preventative of sterility. Pliny, lib, XVI, c. 44. The vervain after libations of honey, as gathered at the rising of the dog star, when neither moon or sun shone, the left hand only to be used. Thus used it was recommended for fevers and distempers, as an antidote for snake bites, and a charm to win friendships. Pliny, lib, XXV, c. 9.

Anglo-Saxon Medicine.

Medicine and surgery was practiced by women and afterwards by ecclesiastics and leeches (medical, chirugi). Superstition was woven about the use of drugs, the principal ones were herbs, many having their virtues ascribed to the sun, moon and planets.

Anglo-Norman and Early English Medicine.

The first rudiments of scientific study of medicine seemed to be first exhibited in this period (end of eleventh to end of fifteenth century). At first it seems the instruction and practice of medicine was in the hands of the clergy, then was gradually passed to laymen. Some crude distinctions seem to have existed as to physicians, surgeons, apothecaries and alchemists. On the introduction of spices, gums and other Oriental products after the Crusades, the grocers who sold these became grocer-apothecaries. Some of the early grocer-apothecaries to the crown were foreigners.

In A.D. 1231 the society of pepperers existed. In A.D. 1345 the grocers were incorporated, and in A.D. 1456 they fined one John Ayshfelde six shillings and eight pence "for makynge of untrewe powder of gynger, cynamon and saunders." (Pure Food Law.) Roger Bacon, philosopher and alchemist (druggist?), described the methods of making tinctures, elixirs, gave rules for diet and medicine.

Modern English Medicine (From Fifteenth Century On).

These statutes, charters, etc., will give some idea of the progress of medicine and pharmacy.

1511—Partly Ecclesiastical.—The examination and admission of physicians and surgeons by the bishop of the diocese, aided by members of the faculty. 3 Hen. 8, c. 11.

1518—Incorporation of the Royal College of Physicians, of London, by charter.

1522—Separation From Ecclesiastical Influence.—Charter confirmed by statute. Examination and admission to the exercise of physic in England vested in the College. 14 and 15 Hen. 8, c. 5.

1540—Physicians to examine drugs. 32 Hen. 8, c. 42.

1542-3—Ministration of medicines for external diseases allowed to every one. 34 and 35 Hen. 8, c. 8.

1553—Wardens of the grocers to go with the physicians to examine "poticary wares, drugs and compositions." I. Mar. sess. 2, c. 9.

1605—Separation of Professions.—The apothecaries separately incorporated by the name of the "Master, Wardens, and Society of the Art and Mystery of Pharmacopolites of the City of London." Charter, 13 Jac. 1.

1606—Organization.—Apothecaries incorporated with the grocers.

1745—Separation of Professions.—The union of barbers and surgeons dissolved, and the surgeons separately incorporated. 18 Geo. 2, c. 15.

1800—Charter of incorporation of the Royal College of Surgeons. 40 Geo. 3, 22 d. March, 1800.

Charter altering title of Masters, etc., to President. 3 Geo. 4, 13th Feb., 1822.

Charter creating class of Fellows. 7 Vic., 14th Sept., 1843.

1815—Legislation Towards a Profession.—Apothecaries' Act. No person (except those previously in practice) to practice as an apothecary in England or Wales without examination. 55 Geo. 3, c. 194.

1843—Organization.—Incorporation of the Pharmaceutical Society of Great Britain.

Russian Empire.

Before the Eleventh Century, A.D.—During this epoch there were no professors of the healing art. Medicine was practiced in emergencies by the heads of families (Medicina domestica). Baths in popular use.

A.D.—From about the end of the tenth century to the end of the seventeenth century, A.D.

Subsequently to the introduction of Christianity into Russia (988 A.D.) medicine was practiced by regular professors, most of whom were foreigners (English, Dutch and German).

990 A.D.—John Smer, of Smera, a Pole, the first physician mentioned by name.

1534—Merbal (in Russ.) with figures.

1553—Commencement of commercial intercourse with England during the reign of Ivan Vassilievitch. Subsequently to this period English medical men visited Russia; some being sent, at the request of the Czar, by the English sovereign.

1581—Establishment of the Imperial Court Dispensary, in the Kremi district, in Moscow; and the appointment of James Frencham, an Englishman, to the office of Apothecary to it.

1620—Establishment of an Apothecaries' Board. To this board was committed the supervision of the court dispensary, the appointment of military surgeons, the establishment of new military dispensaries, the payment of the salaries of medical officers, and the settlement of disputes (in 1707, this received the name of Apothecaries' Chancery and in 1725 that of Medical Chancery).

1631—Military dispensaries instituted.

1657—Prohibition of private trade in rhubarb, and the establishment of the Crown monopoly. (In 1762 the monopoly ceased.)

Peter the Great (who reigned alone from 1696 to 1725) greatly encouraged medicine, as well as the arts and sciences generally. He established public medical institutions (hospitals, schools, libraries, museums, etc.), botanical gardens, etc. He promoted the translation of foreign medical books into the Russian language; and encouraged the establishment of chemical manufactories.

1701 to 1713—Appointment of eight private dispensaries in Moscow in addition to the two Royal ones.

1721—The establishment of private dispensaries in St. Petersburg, and other places, ordained.

1763—Foundation of the Imperial Medical College by Catherine II.

1778—Pharmacopoeia Rossica. Petrop. 1778, 8vo.

Portugal.

1449—Legislative.—Privileges granted by Alfonso V to the Apothecary Ananias on his arrival in Portugal from Ceuta. (First legislative notice of Pharmacy subsequent to the foundation of the monarchy.)

1450—Drug Law.—Inspection of drugs ordained.

1461—Separation of Professions.—Physicians and surgeons prohibited from preparing medicines; and apothecaries prohibited from practicing medicine and surgery.

1521—Legal Examinations.—Examinations of apothecaries ordained.

1711—Pharmacopea Lusitana reformada. D. Caetano de Santo Antonio.

1713—Pharmacopea Bateana. D. Caetano de Santo Antonio.

1716—Authoritative Standards.—Pharmacopea Ullisiponense. Joao Vigiie.

1772—Scientific Instruction.—Chair of Pharmacy established in the University of Coimbra.

From the early history of medicine and pharmacy and a glance at these laws, we see the need in the past for the (*a*) separation of the practice of pharmacy and medicine; (*b*) for the examination of medicines (Pure Drug Law); (*c*) examinations for the right to practice pharmacy and medicine, and laws to regulate this practice; (*d*) for schools to teach these professions; (*e*) for some authoritative list of medicines, for the physician to prescribe and the pharmacist to prepare for the treatment of disease.

In our consideration for higher ideals for any profession we

are very apt to forget many of the fundamental principles involved. In the two professions under discussion there are two important ones that we must not forget, first, that *laws regulating* practice in either profession are based on the *organic principle of protection* and safety to the public at large; second, that *ethical conduct* on the part of those engaged in these professions, that are controlled by laws of safety and protection, that this *ethical* conduct going hand in hand with the question of "making a living" is to be secured *largely* through educational influence.

It is an observation, too, that those in most need of reforms for their own protection are rarely the originators of such reforms, either in education or matters of public safety. There is a more or less definite ideal that medicine *prescribed* should be a matter of *record*, and laws compelling such records would have a powerful influence in preventing the sale and distribution of patents to the public, prescribing by the pharmacist and administering medicines by the physician.

From a careful perusal of those historical dates and reading between the lines one sees that the problems of our day were matters of notice then. For our various sects and schools of medicine, there were divisions in ancient days, as the following sects with their peculiar rules for guidance sprung up. The very Temples of the Asclepiades were breeding places of medical schools or systems. I mention the Cnidian School, Dogmatic, Independent School of Crotona, Hippocratic, and the Hippocratic school perverted by his sons, Thessalus and Draco, and his son-in-law, Polybus; the school of Praxagoros of Cos, Alexandrian, Pythagorean, Empirical, Methodic, Eclectic, Pneumatic, Stahlian, and Galenical schools, etc. From chaotic conditions of superstition, bickerings and comparative ignorance, the medical profession has slowly but steadily advanced to its present high standard, always declaring itself for the best preparation and cure of disease. When I observe that laws were passed (see above) restraining physicians from dispensing medicine and prohibiting pharmacists from prescribing medicine I conclude that these laws were the result of a demand on the part of the public for such separation of the two professions and not a voluntary action for such a separation on the part of the physicians. And this is the relation I hold that should exist today between pharmacy and medicine. I quote the following from the article, "either the pharmacologist to be evolved by the operation of the educational system proposed by the National Syllabus Convention will have to add sufficient knowledge of these branches of medicine to warrant licensing him (the apothecary-physician) to prescribe or recommend medicines, or the medical profession will have to be educated up to the point of appreciating a pharmacologic profession."

This latter suggestion I think will be helpful as a solution. I have just begun a course of lectures and laboratory work in pharmacy for the medical students here in the University of North Carolina. Almost at once I saw the field for good work, of mutual interest and value to the separate but dependent professions. Here it seems to me is the chance to harmonize the difficulties in the way of an ideal profession of pharmacy and medicine. And I firmly believe medical students feel the need of and would welcome a course in pharmacy. I speak authoritatively for those that are now under my instruction.

Accepting then the definition of pharmacy as the science and art of preparing, preserving, compounding medicines, and dispensing them on the prescription of physicians, and the definition of medicine as the art of preventing, alleviating and curing diseases, I believe that the pharmacist should prepare and the physician prescribe only those remedies that have been selected by men of both professions, skilled in botany, chemistry, pharmacy, therapeutics, toxicology, pharmacognosy, pharmaco-dynamics and therapy-dynamics.

The way is open for this selection of medicinal agents, and there is opportunity for the physician to prescribe and the pharmacist to make or buy for his dispensing, through pre-

[illegible] to make [illegible] the name of disease. The [illegible] to have a right to know that [illegible] with [illegible] [illegible] [illegible]

Point Made at Lilly Banquet of Protecting Retailers From Dispensing Physicians.

Each year the house of Eli Lilly & Co., manufacturing pharmacists, of Indianapolis, is the host to the graduating classes of a number of medical and pharmaceutical schools. The first class to be en ertained and banqueted in 1910 was that of the Indianapolis College of Pharmacy, of which Prof. John H. Gertler is dean. After being given full opportunity to see all the new pharmaceutical appliances and being initiated into the latest methods of pharmaceutical manipulation, they repaired to the Claypool Hotel and seated themselves as the guests of the Lilly Company at a banquet which, as the head waiter expressed it, was "one of the widest spreads this tavern has ever known." There were covers for 90, as besides the 72 students there were present J. George Mueller, of the Mooney-Mueller Drug Co., and G. Barret Moxley, president of the A. Kiefer Drug Co., both of Indianapolis, and several members of the working force of the Lilly plant, headed by the president, J. K. Lilly, who sat at the head of the table.

With the coffee and cigars, Mr. Lilly opened the programme of speeches, all of which were informal. Mr. Lilly paid a heartfelt tribute to the late Augustus Kiefer, who had been a life-long friend of his father, the late Col. Eli Lilly.

"In 1876," said Mr. Lilly, "my father, who had left an unsatisfactory partnership, asked Mr. Kiefer for a job. Mr. Kiefer advised him to go into business for himself. My father said he had only $1300, to which Mr. Kiefer replied that it was enough, to go ahead, start a laboratory in Indianapolis with the necessary pots and kettles and he should see to it that Indianapolis wholesalers would buy everything he made. Mr. Kiefer kept his word and the business grew. My father found an unsuspecting uncle in southern Indiana who had $2500. I had the pleasure some time later of paying to that uncle $18,000 for the $2500 furnished in time of need."

Mr. Moxley and Mr. Mueller followed in clever speeches, testifying to the admirable policy of the Lilly house, which sells directly to the jobber and to the jobber only in such a way that the retailer is thoroughly protected and the medicine-furnishing physician is cut off from receiving supplies at the expense of the dispensing pharmacist and druggist. Both these speakers commended at length the Eli Lilly & Co. plan of marketing goods and hoped that others in the trade might follow their honest, open and above-board example. Mr. Moxley made a point in the assertion that there is no line of trade that produces the high class intelligent men that are to be found in the retail drug business and said there was an added pleasure to the wholesale drug trade in dealing with men of such knowledge, ability and business integrity. Remarks were made by Professors Gertler and Halley and John S. Wright, who, as the master of ceremonies on these occasions of Lilly hospitality, has managed so many of these affairs that with him at the fore there is never at any point a hitch in the proceedings.

Wisconsin Pharmacist a Collector of Medals.

Henry Rollman, a member of the State Board of Pharmacy, is the owner of one of the most valuable collections of medals in Wisconsin. One is a silver medal which was purchased 12 years ago for $20, issued during the reign of Queen Victoria in 1876, and valued at $250. Another rare George III medal, purchased for $9 and valued at $60, is owned by him.

? QUESTION BOX ?

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not answered by mail, and ANONYMOUS COMMUNICATIONS WILL RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Dry Shampoo.

(S. Drug Co.)—The term "dry shampoo" is really applied to liquid or highly spirituous preparations on account of the rapidity with which the hair dries after their use. For this reason such shampoos are especially adapted to washing ladies' hair. Two formulas of this kind are the following:

(1)

White castile soap	1 dram.
Oil of lavender	1 dram.
Rectified spirit	8 ounces.
Water	3 ounces.

Macerate for a day or two, filter and add—

Ammonia water	1 ounce.

(2)

Tincture of quillaja	2 ounces.
Ammonia water	6 ounces.
Cologne water	2 ounces.
Alcohol	4 ounces.
Water	24 ounces.

Mix, adding the water last.

Shampoo Powders.

(1)

Dried carbonate of sodium	1½ drams.
Dried curd soap	1½ drams.
Solution of orange	q. s. to color.

Mix. This for a pint of water.

(2)

Powdered borax	16 ounces.
Powdered camphor	1 dram.
Oil of bergamot	½ dram.

Mix intimately.

(3)

Powdered borax	16 ounces.
Potassium carbonate	16 ounces.
Powdered castile soap	4 ounces.
Oil of rose geranium	2½ drams.

Rub up the oil in a mortar with the borax, then mix with

the other ingredients by sieving. Put up in closely stoppered bottles. For use, about 2 ounces of the mixture is dissolved in a quart of soft, warm water and used as any shampoo.

Label Paste and Varnish.

(W. T. C.)—"Will you publish in your next issue a method for permanently fixing labels inside of glass paper weights. I have on hand about 1000 of these weights and want to have the labels printed and fixed in so that they may not be easily removed."

We think almost any good label paste will answer the purpose, especially if the label, after the paste has had sufficient time to dry, be covered with varnish. We give a formula for such a paste and also for label varnish:

LABEL PASTE.

Tragacanth powder	1 ounce.
Dextrin	1 ounce.
Wheat flour	6 ounces.
Powdered acacia	2 ounces.
Salicylic acid	1 dram.
Water	2 pints.

Mix the powders intimately; add all at once, half the water; make an even mixture, and pour in a thin stream into the remainder of the water heated to boiling in a suitable vessel.

LABEL VARNISH.

Sandarac	150 parts.
Mastic	50 parts.
Venice turpentine	15 parts.
Spirit	800 parts.

Macerate with frequent agitation, until solution is complete, then filter; make up to 1000 parts with spirit.

Printed labels are first brushed over with a thin mucilage, and when perfectly dry, are painted with the varnish. Labels that are written are painted with two coats of collodion before applying the varnish.

Magnesia Usta.

(S. R. P.)—"What should be given for 'magnesia usta'?"

Magnesium oxide, U.S.P., or light magnesia. The old Latin title "magnesia usta" is still to be found in the German Pharmacopœia.

Chemical Reactions in Making Dobell's Solution.

(Dobell's)—"In making Dobell's solution by rubbing together the sodium bicarbonate and sodium borate with the glycerin and allowing effervescence to cease before adding the water and other ingredients, do I get the same product in the finished solution that is obtained by following the N.F. formula? What is the chemical reaction that takes place when these two salts are added to the glycerin? Is the medical properties of the borax and sodium bicarbonate destroyed?"

The products in the finished solution are practically identical whichever method is used in their preparation. Scoville ("Art of Compounding") states that Dobell's solution is sometimes ordered without any water, only glycerin, borax, bicarbonate of sodium and carbolic acid being used, and a strong [illegible]. If these be mixed cold, the reaction does not start promptly and may continue for several hours. It should be hastened by using a part of the glycerin at first, which is heated with the borax and bicarbonate, and when the reaction has ceased the carbolic acid and the rest of the glycerin are added.

Glycerin in the presence of water decomposes borax, forming sodium metaborate and boroglycerol, and water reacts with the boroglycerol, yielding glycerin and boric acid. The chemical reactions which take place may be represented by the following equations:

$$Na_2B_4O_7 + 2C_3H_5(OH)_3 = 2C_3H_5BO_3 + 2NaBO_2 + 3H_2O$$

$$C_3H_5BO_3 + 3H_2O = C_3H_5(OH)_3 + H_3BO_3$$

$$H_3BO_3 + NaHCO_3 = NaBO_2 + CO_2 + 2H_2O$$

These succeeding changes have been frequently discussed in pharmaceutical journals and various works on pharmaceutical chemistry. Other polyhydric alcohols, such as mannitol, dulcitol, [illegible] and sugar act like glycerin in decomposing borax. The chief medical properties of the salts in the finished solution are probably similar or identical with those of the original substances themselves. According to the Physician's Manual of the U.S.P. and N.F., Dobell's solution is the earliest of alkaline antiseptic solutions, preferable when carbolic acid is not contraindicated.

Ink for Hectograph.

(Subscriber)—Here are some formulas for hectograph inks:

Violet—Methyl violet, 1 part; water, 7 parts; alcohol, 1 part.

Blue—Water-soluble anilin blue, 10 parts; glycerin, 10 parts; water, from 50 to 100 parts, as desired.

Red—Diamond fuchsin, 10 parts; alcohol, 10 parts; acetic acid, 2½ parts; mucilage of acacia, 80 parts. Mix and dissolve.

Green—Anilin-green D, 10 parts; glycerin, 10 parts; acetic acid, 2 parts; alcohol, 10 parts; water, from 50 to 100 parts, as desired.

Black—Anilin black, 5 parts; absolute alcohol, 5 parts; mucilage of acacia, 5 parts; water, 35 parts. Mix and dissolve by the aid of a very gentle heat. Let the solution stand in a warm place 24 hours and filter. For some hints relating to the use of the hectograph, see ERA of May 4, 1905, page 496.

Copper Sulphate, Phenol and Hydrogen Dioxide.

(H. L. S.)—"In mixing copper sulphate solution with phenol and then adding a few drops of hydrogen dioxide, the mixture blackens (dark greenish), generating heat and gas. Is hydrogen dioxide reducing copper sulphate?"

Several reactions are possible in this mixture. Phenol may reduce the copper sulphate, probably forming oxides of copper and liberating sulphuric and sulphurous oxides, or the hydrogen dioxide may oxidize the phenol to pyrocatechin, quinone, and hydroquinone. The greenish-black color of the mixture is probably chiefly due to the combination of colors produced by the bluish-green solution of copper sulphate, the reddish-black oxide of copper, and intermediate products. The chemical reactions which occur would produce heat, and no doubt some free oxygen would be evolved.

NO SUBSTITUTION—SHORT HOURS.

Two Features of Big Establishment That Popularize Its Drug Department.

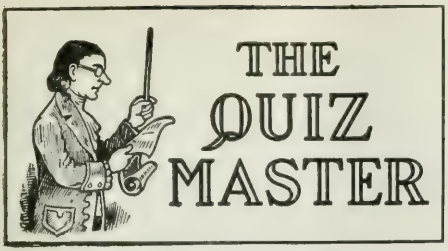
MINNEAPOLIS, Minn., May 20.—The evil of substitution has no more pronounced or energetic enemy than L. S. Donaldson, president of the L. S. Donaldson Co., of this city, proprietors of the largest department store west of Chicago. Comprised in the establishment is an extensive drug department, where hundreds of prescriptions are compounded every day. The department is in charge of C. E. Fisher, and A. M. Guernsey is the head prescription man. There are nine prescription clerks.

"I never allow substitution in my store," said Mr. Donaldson to the ERA man. "I would instantly discharge any employee found guilty of this offense. We do not have to substitute. There is no necessity for it, as we always have so large a stock of the best grades of proprietary goods that the market affords. Substitution is a poor policy, anyway. You never can create a large business by means of it. Should we lose a customer by substituting, he would also be lost as a patron of every other part of the store. I do not think that department stores substitute. It is the retail druggists that do this, and they are often driven to it. In our drug department we have always given the people of Minneapolis precisely what they wanted, and the result is that we have the largest drug deparment of any Western department store.

"One of the advantages we have is the ease with which we can at all times secure competent prescription men. This is because of our short hours, which are alluring to them after serving years in drug stores with their long hours."

Arrangements Made for New York Ph.A. Meeting.

The 32d annual meeting of the New York State Pharmaceutical Association will be held at the United States Hotel, Saratoga Springs, June 21-24. Arrangements have been made with the Trunk Line Committee for special rates from any point in New York State. Besides the regular business programme, entertainment has been provided in the way of a carriage ride and card party for the ladies, a base ball game between the N.Y.Ph.A. and N.Y.Ph. Travelers' nine, an entertainment by the local committee and an excursion to Lake George or Schuylerville.



A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

THREE PRIZES of $5.00, $3.00 and $2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each monthly series of questions. In the event of a tie for any one of the prizes offered, such prize will be equally divided among the successful contestants. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (8x10 in.), one side only, with your Name and Address at the top of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be sent at one time, and must be with us not later than the 15th of the following month.

CORRECT ANSWERS to each series of questions and the names of the three contestants who have been awarded the prizes will be published in the Era, after the close of the respective contests.

WE INVITE our readers to send us their questions for publication in this department, particularly questions related to the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

The Quiz Master

Care of Pharmaceutical Era 82 Fulton St., New York

QUESTIONS, JUNE SERIES, 1910.

1—At ordinary temperatures, is liquid petrolatum soluble in water; in alcohol?

2—Why do crystals form in many extracts on standing?

3—What are the solubilities in water (25° C.) of the following: (a) codeine sulphate; (b) lithium citrate; (c) potassium citrate; (d) sodium salicylate?

4—In the presence of water, what incompatibility exists between bismuth subnitrate and sodium bicarbonate?

5—Why should ether never be mixed with hot fluids?

6—Does quinine have a more bitter taste when in solution, or when suspended in a liquid?

7—What is the nature of the white powder frequently found as a coating upon commercial ginger?

8—Should ginger which is coated with a white powder be used as a medicine or a condiment?

9—How many grains of strychnine sulphate must be dissolved in one pint of water in order to make a two per cent solution? Show work.

10—What is meant by a local anesthetic?

11—What are the ingredients in powder of ipecac and opium; ointment of potassium iodide?

12—Why should a metallic percolator not be used in making tincture of nutgall?

13—What is the appearance, odor and taste of boric acid?

14—What effect does cold water have upon gelatin?

15—What is the source of expressed oil of almond?

16—What is the official English name for (a) $C_{12}H_{22}O_{11}$; (b) $ZnSO_4 + 7H_2O$; (c) $Fe(PH_2O_2)_3$; (d) CS_2?

17—Why should sodium bicarbonate not be dissolved in boiling water?

18—What is posology?

19—How would you prepare pills of potassium iodide?

20—What is the advantage in using graduates which have the same scale marked upon both sides, or which are encircled by the markings?

21—What are two official drugs to which the name "Indian Hemp" is applied?

22—At a temperature of 25° C., what would be the volume (in fl. oz.) and weight (in avoir. lbs.) of a quantity of chloroform which could be put into a can which is just large enough to contain one pound (avoir.) of ether? Show work.

23—What U.S.P. liniments contain fluidextracts, and what are the fluidextracts?

24—In liquid preparations and ointments, why is precipitated sulphur preferable to other forms of sulphur?

25—What substance is contained in the present U.S.P. tincture of iodine, which was not in the tincture of iodine of the Pharmacopœia of 1890?

26—Upon exposure to the air, what changes do aqueous solutions of salicylates tend to undergo?

27—What effect does solution of chlorinated soda have upon red litmus paper?

28—What two official volatile oils, found in most drug stores and belonging to the same plant family, are obtained by expression?

29—In preparing lime water, is it proper to add water indefinitely to the undissolved powder in the bottle?

30—For internal use, what kind of oil of turpentine should be dispensed?

31—Why is calomel or yellow mercuric oxide incompatible with ointment of rose water?

32—Why is compound tincture of lavender sometimes called "red lavender"?

33—What are emetics?

34—What is a good solvent for balsam of tolu when it is used as a coating for pills?

35—What are some of the methods used in writing prescriptions for indicating large or unusual doses?

36—In making preparations by maceration, what is one part of the process which should be given careful attention?

37—What adulterants are sometimes added to absorbent cotton to increase the rate of absorption of water?

38—What is the action of salicylic acid when applied to the skin?

39—When is alcohol said to be denatured or denaturized?

40—Acetone is largely used in manufacturing what class of U.S.P. preparations?

41—What is the objection to filling capsules by hand in warm weather?

42—What are the chemical differences between aluminum, alumina and the official alum?

43—What containers are preferably best adapted for holding lard?

44—How would you try to preserve the prescription number on a bottle, when the contents are destructive to the label?

45—Why is borax frequently used in welding and soldering metals?

46—What is the retail price of a bottle of toilet water which cost 60c., and sold at a profit of 33⅓ per cent? Show work.

47—In physiology, what is meant by digestion?

48—What is meant by balsams, as applied to a class of U.S.P. drugs?

49—What is the purity rubric for silver nitrate; for sulphurous acid?

50—How does iodine occur in nature?

Competitors, Please Notice.

The above list of questions is the complete series for June, and all who desire to compete for the prizes should see that their answers are received by the Quiz Master not later than July 15. Do not send your answers in parts, but mail them all at one time, and be sure to follow the instructions given at the head of this department.

The judges of the April contest of the Quiz Master's Department have awarded the prizes as follows:

First prize, $5, to Thomas L. Cantrall, Athens, Ill.

Second prize, $3, to Fred V. Alter, San Antonio, Texas.

Third prize, $2, to Edwin R Mohler, Philadelphia, Pa.

Contestants wishing to know the grades which they have made in the April contest may obtain this information on request by sending two cents for postage to the Quiz Master.

THE QUIZ MASTER.

Questions and Answers, April Series, 1910.

1—What are four liquids used in pharmacy, which on ac-

count of their volatile and penetrating properties, should not be inhaled directly from the bottles?

Carbon disulphide, concentrated hydrochloric acid, solution of formaldehyde and stronger ammonia water.

2—Why should "hyd." be not used as an abbreviation to designate the name or part of the name of an ingredient employed in a prescription?

The abbreviation "hyd." is too indefinite as it may indicate several different words, for example, hydrargyrum, hydrastine, hydriodic, hydrochloric or hydrocyanic.

3—What is meant by the term "pipe" as applied to a pill mass?

A pill mass which has been rolled out into a cylinder, and is ready for division into the required number of pills is termed the "pipe."

4—What is an official drug which is a capsular fruit; a pith?

Cardamom; sassafras pith.

5—In the process of percolation, why is it advisable before putting the drug in the percolator to moisten with the menstruum the pledget of cotton which is inserted into the neck of the percolator?

A percolate sometimes refuses to pass from the percolator, and this difficulty is frequently avoided by moistening the pledget of cotton.

6—In physiology, what is meant by sensory nerves?

Sensory nerves are those which convey to nerve centers impulses resulting in sensation.

7—In fluidextract of senega, what change is prevented by potassium hydroxide?

Solution of potassium hydroxide tends to form soluble compounds with the pectin principle present in the root, thereby preventing gelatinization of the fluidextract.

8—How many grams of potassium permanganate in 100 grams of an aqueous saturated solution of potassium permanganate? Show work.

6.25 gm. One part of potassium permanganate is soluble in 15 parts of water, therefore, in every 16 parts of a saturated solution there is one part of potassium permanganate, and in one part of the saturated solution there is 0.065 part of potassium permanganate ($1 + 16 = 0.0625$). Then in 100 grams of a saturated solution there are 6.25 grams of potassium permanganate ($0.0625 \times 100 = 6.25$).

9—If iron wire is dissolved in sulphuric acid, what gas is generated and what chemical salt is formed?

Hydrogen is the gas generated, and ferrous sulphate is formed. $H_2SO_4 + Fe = FeSO_4 + H_2$.

10—Should ground colocynth contain more than a trace of the seeds?

No, the Pharmacopœia specifies distinctly that in all cases the seeds should be separated and rejected.

11—What would be your method for sticking a label upon a tin box?

Remove the glossy surface of the metal by a few strokes of emery paper, and paste the label upon the box. Some authorities advise coating the top of the box with tincture of benzoin before attaching the label.

12—What are sialagogues?

Sialagogues are medicines which promote the flow of saliva.

13—What is the official average dose of oil of bitter almond; compound solution of sodium phosphate; elixir of ammonium bromide; mixture of sassafras and opium?

Oil of bitter almond, ½ minim; compound solution of sodium phosphate, 2 fluidrams; elixir of ammonium bromide, [illegible] grains of ammonia and opium, 10 grains.

14—What U. S. P. preparations contain asafetida?

Emulsion of asafetida, pills of asafetida, and tincture of asafetida.

15—Why is a small amount of water necessary in the [illegible] in making tincture of capsicum?

Capsicum contains a small quantity of constituent which is soluble in water, but not in alcohol and a little water is therefore necessary in the menstruum in order to prevent the formation of a cloudy preparation.

16—What root is sometimes mistaken for, or used as an adulterant in, althæa root?

Althæa, possibly also phytolacca and scopola.

17—The acidity of normal urine is due chiefly to the presence of [illegible]

The acidity of normal urine is due chiefly to the presence of monosodium orthophosphate, NaH_2PO_4, and perhaps also to the acid salts of uric acid.

18—What are the three principal kinds of foods stored in seeds?

Starch, oil and albuminous substances.

19—What would you do if you accidentally spilled concentrated sulphuric acid upon your hands?

Immediate pour a large quantity of water (never a small quantity) over the hands, and then apply a thick paste of sodium bicarbonate. After permitting this paste to remain for about a half hour remove, and cover the hands with petrolatum. If the burns are very severe, consult a doctor immediately after administering the temporary treatment.

20—What is the nature of the precipitate which collects on the inner sides of a lime water bottle?

This precipitate consists of calcium carbonate, and is formed by the action of carbon dioxide upon the lime water. $CO_2 + Ca(OH)_2 = CaCO_3 + H_2O$.

21—How would you remove the precipitate which forms upon the inside of lime water containers?

A small quantity of strong hydrochloric acid poured into the empty container, will act upon the precipitate and form a soluble compound which can then be easily removed.

22—What objection is sometimes made to putting drugs into capsules in the form of a soft mass?

Some medicines, put into capsules in the moist condition, may cause the gelatin composing the capsule to dissolve or soften.

23—What are four common names for spearmint?

Garden mint, heart mint, our lady's mint and sage of Bethlehem.

24—In most cases, what simple tests will distinguish resins from gums?

Gums will dissolve in water, while resins will not. Resins are soluble in alcohol, gums are not.

25—What are two important classes of compounds which are carbohydrates?

Starches and sugars.

26—How is potassium chlorate manufactured?

Most of the potassium chlorate now in commerce is manufactured by the electrolysis of potassium chloride. It may also be manufactured by first passing chlorine into a solution of calcium hydroxide almost to the point of saturation, then concentrating the liquid and adding potassium chloride, after which the mixture is boiled down until it has a specific gravity of 1.28. On cooling, potassium chlorate will crystallize out. $6Ca(OH)_2 + 6Cl_2 = 5CaCl_2 + Ca(ClO_3)_2 + 6H_2O$, then $Ca(ClO_3)_2 + 2KCl = CaCl_2 + 2KClO_3$.

27—What is the objection to making infusions from fluidextracts?

Infusions are prescribed by physicians, when they desire preparations containing only the water-soluble principles of drugs. In most cases, fluidextracts are strongly alcoholic, and therefore infusions prepared from them will contain only the principles that were extracted by the menstruum used in making the fluidextract.

28—Seven and one-half grams of bismuth subnitrate are divided into 15 powders; what volume of water expressed in cubic centimeters will equal the weight of one of these powders?

Five-tenths or one-half of a cubic centimeter is the volume of an amount of water equivalent in weight to one dose of the bismuth subnitrate. In each dose there is one-half of a gram of bismuth subnitrate ($7.5 \div 15 = 0.5$), and since one gram of water has a volume of one cubic centimeter, then the volume of one-half of a gram is five-tenths or one-half of a cubic centimeter.

29—What are the ingredients used in preparing compound solution of cresol?

Cresol, linseed oil, potassium hydroxide and water.

30—What is meant by an alternate branching stem?

An alternate branch stem is one in which the twigs are arranged in a more or less spiral line about the stem.

31—Why should buckthorn bark be collected at least one year before it is used?

Buckthorn bark is kept at least one year before it is used in order to render inert the irritating and nauseating principles which are destroyed during the process of drying the drug.

32—What are the differences between a sulphate, a sulphite and a sulphide?

A sulphate is a salt of sulphuric acid; a sulphite is a salt of sulphurous acid and a sulphide is the salt formed by the action of hydrogen sulphide upon a base. A sulphate and a

sulphite both contain oxygen, while a sulphide is a combination of sulphur with some base.

33—How would you detect the presence of free iodine in thymol iodide?

Shake about 0.5 gm. of thymol iodide with 10 cc. of water, filter the mixture, and add starch test solution to the filtrate; if free iodine is present, the solution will be colored blue.

34—In selecting a cork for a bottle, why is it preferable to obtain one which is slightly larger than the mouth of the bottle?

A cork which just fits a bottle is apt to get crowded so far into the neck that it cannot be easily removed without the use of a corkscrew or other instrument. This difficulty can usually be avoided by using a cork which is slightly larger than the mouth of the bottle.

35—Why is it advisable to seal a package containing a prescription before giving it to the customer?

To prevent anybody tampering with the prescription.

36—What change in appearance does aromatic spirit of ammonia undergo after it has been prepared for some time?

Aromatic spirit of ammonia will assume a darker color owing to the action of the ammonia upon the oils or upon impurities in the alcohol.

37—How does sapo differ chemically from sapo mollis?

Sapo is a compound of sodium and fatty acids, while sapo mollis is a compound of potassium and fatty acids.

38—What is a retort?

A retort consists essentially of a bulb-shaped flask having a round bottom and a long tapering neck bent at an acute angle with the body. It is used for the distillation and decomposition of substances by heat.

39—What is meant by acute poisoning?

Acute poisoning is the immediate untoward physiological effect produced by the administration of toxic substances.

40—What is the objection to dispensing small quantities of hydrogen dioxide water from large containers?

Dispensing small quantities of hydrogen dioxide water from large containers would hasten deterioration by subjecting the liquid to frequent agitation and exposure to air.

41—How many fluidounces of infusion of digitalis can be made from one ounce (avoir.) of digitalis?

63.9056+ fl. oz. According to the official formula, 15 grams or 231.486 grains of digitalis are used in preparing 1000 cubic centimeters or 33.814 fluidounces of infusion of digitalis. Then 1 grain of digitalis will represent 0.14607+ fluidounces of infusion (33.814 ÷ 231.486 = 0.14607+), and one ounce (avoir.) or 437.5 grains will make 63.9056+ fluidounces (0.14607 × 437.5 = 63.9056+).

42—Why should care be exercised in opening a bottle of stronger ammonia water?

Care should be exercised in opening a bottle of stronger ammonia water, particularly if it has been stored in a warm place, in order to avoid accidents, such as that of injuring the sight of the operator by the violent expulsion of the liberated gas.

43—What change does phenyl salicylate undergo in the small intestine?

In the small intestine, phenyl salicylate is broken up by the pancreatic juice, and yields about 36 per cent of phenol and 64 per cent of salicylic acid.

44—At what hours of the day should medicines be administered which are directed to be given "three times a day"?

There is no understanding among physicians regarding this matter, but when not distinctly specified perhaps the majority of them would expect the medicines to be administered immediately before meals, while others probably would mean that the medicines should be given at 11 a. m. and 3 and 7 p. m., respectively. The physician should give each patient definite instructions upon this point.

45—What substance added to iodine will increase its solubility in water?

Potassium iodide.

46—What is the principal pharmaceutical use for liquid petrolatum?

It is principally used as a vehicle for medicinal substances which are to be administered by means of an atomizer.

47—In preparing a pill mass in a mortar, should the mass be triturated or kneaded with the pestle?

Most pill masses are of such consistency that kneading and not trituration must be employed in order to quickly produce a homogeneous mass.

48—What is the difficulty frequently encountered in preparing the official syrups which are made by simply mixing fluidextracts with syrups?

Syrups so prepared are frequently cloudy because of the precipitation of insoluble matter from the fluidextracts by the water present in the syrup.

49—What is a good method for conducting the filtration of volatile liquids?

When filtered, volatile liquids must be protected from undue evaporation. The funnel employed should be covered by a plate of glass or a cap of sheet rubber, and the neck of the funnel should pass into the receiving bottle through a tightly fitting stopper. Provision may be made for the escape of air from the receiving bottle by having the cover of the funnel and the cork of the receiving bottle perforated by short pieces of glass tubing which are connected by rubber tubing.

50—In physiological action, the salts of gold closely resemble those of what other metal?

They closely resemble the salts of mercury in physiological action.

The Era Course in Pharmacy.

The ERA COURSE IN PHARMACY is a home study course in pharmacy which is divided into ten parts with recitations and examinations by mail. Thorough instruction is given in General Chemistry, Theoretical and Practical Pharmacy, Botany and Materia Medica. New classes are organized each month, and now is an excellent time for students to enroll. The cost of the Course is ten dollars. A Prospectus will be sent by the publishers of THE PHARMACEUTICAL ERA to any one who applies.

Tents for Missouri Pharmacists Who Want Them.

A heavy attendance is expected at the convention of the Missouri Ph.A. at Maryville, June 14-17. Ed G. Crear, local secretary, wrote to W. H. Lamont, St. Louis, that arrangements were being made for tents for the druggists, each shelter to contain two, three or four rooms, floored, electric lighted and supplied with water. Those who will not care for the outing feature will be taken care of in hotels and homes. The meeting room will hold 800. On the grounds will be a race track, tennis court, base ball diamond and a perfect athletic field.

"Barn Dance" to Entertain Jersey Pharmacists.

CAPE MAY, May 20.—One of the features of the annual meeting here next month of the New Jersey Pharmaceutical Association will be the entertainment provided by the Traveling Men's Auxiliary of the State organization. It will take place on the evening of June 16 and has been styled "The Heckers' Social and Barn Dance." In accordance with this idea, decorations, refreshments, costumes and in fact every detail will be typical of the farm.

"Country School" for Pennsylvania Ph.A. Members.

PHILADELPHIA, May 20.—One of the entertainment features of the annual meeting of the Pennsylvania Pharmaceutical Association to be held at Buena Vista Springs on June 28-30 will be a "Country School," in which prominent representatives of the trade will bow to the stern will and mandates of Mrs. David McMurtrie, of Altoona, who has been selected by Chairman D. E. Bransome, of the entertainment committee, to enact the role of the "school marm."

Wisconsin Ph.A. Meets at Pine Point.

MILWAUKEE, May 20.—Local Secretary W. H. Barr, of the Wisconsin Ph. A., has completed the programme for the 30th annual convention which will be held together with the 15th annual meeting of the Wisconsin Pharmaceutical Travelers' Association, at Pine Point, Elkhart Lake, June 28 to July 1.

Silver Anniversary of the Tennessee Ph.A.

On account of the closing of a hotel the plans for the silver anniversary meeting of the Tennessee Ph.A. have been changed and it will be held at the Gayosa Hotel, Memphis, July 19-21. Members will be finely entertained.

Manhattan Ph.A. Fails to Obtain Quorum.

Due to lack of a quorum the Manhattan Pharmaceutical Association did not hold its regular May meeting.

BOARD EXAMINATIONS

Massachusetts.

BOSTON, May 20.—Only 10 applicants out of a total of 52 succeeded in passing the March examinations for registration as pharmacists before the State Board. The successful men were:

Pharmacists—George W. Goodell, Peabody; Harry W. Perry, Somerville; Frederick F. Eggeston, Salem; Walter R. Dresser, Brighton; Nathan M. Oresnick, Boston; William A. Briggs, Williamstown; John J. Murphy, Boston; Walter J. Tremblay, Northampton; Benjamin P. Waters, Wareham; Roland G. Wright, Jr., Billerica.

The following received certificates as assistant pharmacists: Michael J. Cunniam, South Boston; William H. Herbert, Lee; Allendoe W. Israel, Holyoke; Israel Brody, Chelsea; Charles C. Gammon, Springfield; Howard H. Golding, Stoneham; Lee A. Hegeman, Worcester; Harry F. Kenney, Roxbury; James F. Fallon, Charlestown; Miss Vera G. Fox, Newton; William H. Mansfield, Springfield; Charles E. Brooks, Fall River; Wm. H. Phillips, Fall River; Louis Rabinovitz, Malden; William A. Roody, Boston; Joseph Tarr, Roxbury.

Of the 53 candidates for registration in pharmacy who were examined during April just 15 were successful, as follows: George H. DuPaw, Malden; Francis H. Henley, Clinton; William T. Hunter, Fall River; Robert J. Curley, Holyoke; Justin N. Dows, Lowell; George H. Dudley, Beverly; John A. Hyte, Somerville; James F. Maynard, Boston; James Murphy, New Bedford; Charles E. Saunders, Worcester; Arland W. Carroll, Winchendon; Samuel C. George, Boston; James B. Young, Natick.

Certificates as assistant pharmacists were granted to George F. Barbour, Haverhill; Moses B. Clark, Lynn; Charles J. White, Boston; Harvey H. Bronson, Palmer; Hyman Seligman, Salem; George F. Clayton, New York; William J. Dorey, Boston; Wm. Linnihan, Watertown; Alfred N. Moreau, Boston; Harold Rosen, Malden; William A. Smith, New York; Joseph A. Talbot, Arctic, R. I.

Illinois.

SPRINGFIELD, May 20.—At the March examination of the Illinois Board of Pharmacy in Chicago, 26 of the 96 applicants for registered pharmacist, one of the three who took the examination for local registered pharmacist, and 6 of the 77 applicants for assistant pharmacist passed successful examinations. The names follow:

Registered Pharmacists—Elmer C. Barber, H. L. Bellamy, James S. Bradt, I. V. Comes, B. Ross Cool, George Cunningham, Mott Dawson, Lloyd Funt, Matthew W. Finlay, Vincent Gerard, Louis F. Hamm, James S. Honeyman, Cornelius H. Hughes, H. Gunther Herder, S. N. Jacobson, Albert C. Kaufmann, M. A. Lapidsky, Wm. J. Maguire, Edward Miller, Hugh M. Reid, Peter O. Rose, John F. Scott, William Schwartz, Jos. M. Weinstein and M. J. Zacharias, all of Chicago; John S. Benson and William E. Ruesch, Joliet; G. A. Gunnemann, Grant Park; Thomas E. Hennessy, Hoopeston; Joseph M. Kreiter, Lincoln; John J. Levitt, Cairo; Franklin C. Mayer, Lewistown; Lyle K. Rowe, Hebron; Sidney H. Venco, Belvidere; and George A. Williams, Gardner.

Local Registered Pharmacist—Edward H. Kreiling, Dunlap.

Assistant Pharmacists—Walter E. Ammermann, Albert Almquist, Henry V. Alexander, Clifford J. Bower, Robert B. Bond, Frederick H. Bohn, Roy E. Baker, Edward J. Backus, Sidney B. Curtis, Henry W. Colson, Wm. R. Eberle, John P. Golombiewski, Benjamin Gold, Andrew B. Heistrom, Fred L. Hill, Fred Hollingsworth, Ernest T. Janz, Casimier Kwiecki, Lucian D. Lyons, Nathan Lyons, Frank E. McKamy, Walter O. Nolting, Rocco A. Navigato, Louis A. Pieper, Wolf Rosenberg, J. H. Lanier Robb, Julius Sucherman, Rollo Sarginson, Thomas H. Schopp, Nathan Talmage, Charles Trachman, Chester H. Taylor, Arthur Vance, Otto J. Wruck, Otto Zeman and Rocco Zito, all of Chicago; Adolph E. Anderson, Moline; Arthur F. Baggs, Aurora; Carl F. Bode, Cairo; Guy M. Blue, Tremont; Earl I. Dawson, Danville; Jay F. Hayes, Charleston; Robert F. Johnson, Peoria; Scoville H. Johnson, Paris; James C. Keefrey, Streator; Leslie F. Parker, Downers Grove; William A. Smith and Edwin J. Setz, Joliet, and Erle W. Tanner, Lewistown.

Mississippi.

WINONA, May 20.—The Mississippi druggists are getting on to higher things. The State Board of Pharmaceutical Examiners [illegible] good work. Examiners of the State Board [illegible] Law a registered man. Out of a class of 97 up for examination last month [illegible] examination was as follows:

William A. Brown, Rodney, Miss., 1; E. Partington, Greenville, 1; W. [illegible], Pascagoula, 1; B. Berry, Lexington, 1; E. Ewing, Hazlehurst, 1; W. P. Brown, Sardis, 1; John L. West, Jr., Waynesboro; J. E. Bullard, Hattiesburg, J. W. [illegible], Summerville, 1; E. [illegible], West, 1; Spencer [illegible], Hattiesburg, 1; [illegible], Agricultural College, 1; Albert Lee, [illegible], 1; W. L. [illegible], Meridian, 1; [illegible], 1; H. [illegible], 1; [illegible], 1; [illegible], 1; J. [illegible], 1; [illegible], 1; Harry H. Peterson, Biloxi, 1; J. Ward, Jr., [illegible], 1; [illegible], 1; [illegible], 1; Lee Ingram, [illegible], Eugene E. H. Meyer, Vicksburg, 1; [illegible], Meridian, 1; [illegible], Hattiesburg, 1; [illegible], 1; [illegible], 1; [illegible],

The SODA FOUNTAIN and CANDY COUNTER

Kansas Druggists Appreciate Value of Fountains—Typical Store in Average Town.

Pharmacy of Kiowa Drug Co., to the left, Raymond Zerber, chief dispenser; to the right, Chas. McClanahan, general manager.

KIOWA, Kan., May 20.—The illustration herewith sent you is of a prosperous and typical pharmacy of this section of the country and shows the soda fountain with only a portion of the drug store, which latter is well equipped for the prescription and general drug business. The Kiowa Drug Co. realizes the importance of the fountain, not only for direct profits, but as an advertising attraction. Consequently the president and manager, Charles McClanahan, takes a personal interest in its operation. For the last two seasons Raymond Zerber has been the chief dispenser and has built up an excellent trade, due to his attention to duty and his adaptability for the work of pleasing soda consumers.

Mr. Zerber, in a chat with the ERA representative, said:

"I am a constant reader of your magazine, *The Soda Fountain*, and have noticed many articles concerning Northern and Eastern and Southern fountains, including interviews with the men who run them. You might imagine that Kansas and other Western States were doing nothing, but I want to tell you that in this region there is just as much interest in good soda water as you will find in any other part of the country.

"One of our sources of success is our daily 'specials,' which we have tested as to value in various ways. At the opening of the season of 1909 we began the campaign of special drinks and sundaes. We advertised them in the windows and by hand-painted show cards on the back bar of the fountain. In the course of time we found that many patrons, regardless of the signs, would ask when they came in: 'What have you special today?' The announcements, of course, answered them, but they seemed to like to inquire and receive a verbal reply. We told them and invariably the order given by these patrons was for the special.

"Last summer we ran a line of fancy sundaes at 15 cents through the entire season and found a steady and increasing demand for them. We have adopted the same policy for the coming summer. There are many people who prefer something of this sort, rather than a beverage which can be disposed of more quickly, and we are here to give them what they want. Price is not the only thing.

"Neatness and cleanliness are of great importance. A cleanly kept fountain in a neatly arranged store is a big asset. Too much ornamentation is not desirable. It is not so home-like and there is a great deal in making your patrons feel as if they were more or less at home—that is, make them all your friends as well as patrons. Familiarity is not necessary, but a pleasant greeting costs nothing.

"You may be interested in a drink which I have found to be popular, although it is very simple. Here is the formula: Two-thirds of an ounce of coca-cola, two-thirds of an ounce of orangeade, put in a 12-ounce glass and add enough carbonated water solid to fill. I have named this drink the 'Flower Girl Soda,' which seems very appropriate, as you will no doubt say when you try it. I have never told any of my customers what I put in this drink, nor has any one yet told me what it was composed of. They just seem to like it and ask no questions."

Kiowa is a town of 2000 population and supports five soda fountains, with the patronage constantly growing.

Blue Law Enforced Against Soda Water.

ALTOONA, Pa., May 23.—County Detective James Spangler last evening arrested Jacob Slinik, proprietor of Kantner's Pharmacy, charging him with violating the old blue laws by selling ice cream and soda water on Sunday. This, the county detective declared, was done on account of the remonstrances of other 11th avenue dealers, who declared that they lost trade through obeying the law and keeping closed.

FORMULAS

[illegible] tionery.—Editor Era.

Four Candle Sundae.

On a [illegible] glass serving plate [illegible] disherful of vanilla ice cream. Take one-half of a banana, slice it into four parts (lengthwise). Place the pieces around the ice cream on the saucer in the form of a square, pour over one ladleful of strawberry [illegible] top with whipped cream and chopped nuts and then dress with a thin slice of pineapple and a cherry.

Banana a la Delmonico.

Place on a white plate a banana split lengthwise and on it put two small disherfuls of vanilla ice cream. Over one of the portions of ice cream put crushed maraschino cherries and over the other crushed raspberries. In the center between the two portions of ice cream put a spoonful of whipped cream. Over all sprinkle chopped pecans and top with whole maraschino cherries.

May Blossom Sundae.

Vanilla ice cream, 1 disherful; strawberry ice cream, 1 disherful; crushed pineapple, 1 ounce; crushed raspberries, 1 ounce; dispense in a 9-ounce stem glass, put a lady finger at each side at the top of the glass and cover with whipped cream and a cherry.

Royal Billiken.

Cut a peach in two, place the halves a little distance apart on a fancy plate and between them put a scoopful each of vanilla and strawberry ice cream. Over all pour a ladleful of crushed peaches and top off with whipped cream and a cherry.

Decoration Sundae.

[illegible] on the shape of an egg on a dish and over it pour cream de menthe syrup. Around the ice cream lay ½ dozen creme de menthe cherries and a spray of mint.

Mint Royal.

Into a 12-ounce glass draw ½ ounce of strawberry syrup and 1½ ounces of grape juice. Fill the glass one-third full of shaved ice. Add four sprigs of mint and six rose leaves, crushing them against the inside of the glass with a spoon. Fill the glass with carbonated water, stir well, and then decorate with a slice of lemon and two cherries on toothpicks. Serve with straws.

Strawberry Mousse.

Whip one pint of double cream until stiff; mash, strain, and sweeten one pint of strawberries and stir into the cream; place in a fine sieve until free of all liquid, then put in a mold, pack in plenty of ice and salt and let stand for three hours to chill.

Nebraska Nectar.

[illegible] juice, ½ ounce; orange juice, ½ ounce; grape syrup, 1 ounce; solution acid phosphate, 2 dashes; carbonated water, enough to fill a 12-ounce glass.

Chocolate Nut Sundae.

In a [illegible] cup place a cup of ice cream (10 to the quart) and pour [illegible] ounces of rare ripe chocolate syrup. Over this sprinkle a spoonful of broken walnuts, add a little whipped cream and a cherry.

Cocoanut Ice Cream.

Cook 4 quarts of cream and 1½ pounds of sugar, add 3 vanilla beans and pour the mixture while hot over two cocoanuts which have been fresh and finely grated. Cover until cold; freeze and add a little extract of lemon; then pack down to ripen. Serve with a little whipped cream.

Carolyn Punch.

Orangeade syrup (J. H. S. Co.'s), 2 ounces; angostura bitters 3 dashes; grape juice, 1 ounce; ice and fill with coarse stream. Serve in [illegible] glass.

Raspberry Sherbet.

Raspberry pulp, 1 pint; raspberries, 1 ounce; water, 1 quart; sugar 1 pound. Dissolve the sugar in the water, add to the other ingredients and freeze. The pulp will be found to make a sherbet much richer and of a more natural flavor than either a syrup or an extract.

Spring Ramble.

Strawberry syrup, ½ ounce; orange syrup, ½ ounce; pineapple syrup, ½ ounce; lemon juice, 2 dashes; shaved ice, ½ glassful. Place the ice in a glass, draw on the syrups and fill with carbonated water. Trim with a slice of pineapple and two strawberries. Serve with straws.

Caramel Ice Cream.

Dissolve 2½ pounds of sugar in 5 quarts of cream; add 15 eggs and 3 ounces of caramel, mix thoroughly and freeze.

Maple Shake.

Plain cream, 3 ounces; maple syrup, 2 ounces; ice cream, 1 small disherful; place all in glass with cracked ice, shake well, fill with carbonated water, fine stream, and serve in a bell glass. Decorate with slices of fresh lemon.

Coffee Bouche.

Coffee extract, 1½ ounces; powdered sugar, 1 tablespoonful; shaved ice, 3 ounces; milk, enough to fill a 12-ounce glass. Shake well, strain, and top off with whipped cream.

Chocolate Frappe.

Chocolate paste, 1 ounce; grated cocoanut, ½ ounce; white of 1 egg; mix thoroughly with a spoon, then add hot water and top off with a spoonful of whipped cream. The water must be boiling hot.

Flat Iron Special.

Shaved ice, 2 ounces; vanilla syrup, 1 ounce; pineapple syrup, 1 ounce; strawberry syrup, 1 ounce; place all in a tall glass, nearly fill with carbonated water, adding a slice each of orange and pineapple, and two strawberries. Serve with straws.

Fragrine Flipp.

Shaved Ice, 2 ounces; strawberry syrup, ½ ounce; pineapple syrup, ½ ounce; ginger syrup, ½ ounce; 1 egg; solution of acid phosphate, 1 dash. Place in a 12-ounce glass, fill with carbonated water, shake, strain, toss and serve with straws.

Skibo Treat.

Shaved ice, 2 ounces; 1 egg; nectar syrup, 1¼ ounces; milk, 3 ounces; fill with carbonated water, shake, strain, and serve in thin glass with grated nutmeg.

Fountains in Drug Stores.

—H. O. DANNER, a prominent Pittsburg druggist, is creating considerable favorable comment among his fellow druggists and patrons by the replacing of his old soda fountain with a handsome new apparatus with greatly improved facilities.

—THEODORE MUELLER, proprietor of the Central Drug Store at West Allis, Wis., is having plans drawn for an addition to be built to his store building. Arrangements will be made for a large laboratory and an ice cream parlor.

—MANY improvements are being made to the Pioneer Drug Store at Evansville, Wis. New shelving, furniture and fixtures have been installed in addition to new ice cream parlors and a new fountain.

—THE R. B. Clark Drug Co., of Monroe, Wis., held its formal soda fountain opening recently. Souvenirs were given to each visitor and music was provided throughout the day.

—PHILIP TESSIER has opened a new drug store at the corner of Savin Hill avenue and Sidney street, Dorchester, Mass., in which he has installed an onyx wall apparatus.

—J. A. YOUNG, of Erie, Pa., is adding to repapering and repainting his drug store, has further improved it by installing a fine new soda fountain of the iceless type.

—NEUMANN REGNER DRUG CO., De Pere, Wis., has purchased a large phonograph, which will be used for concert work in the company's large ice cream parlors.

—HARRY LANGDON has installed a nine-foot Innovation fountain in a new store at the corner of Pearl and Cross streets, Somerville, Mass.

—JOHN J. FORREST is moving into a new building at 453 Essex street, Lawrence, Mass., and installing a 20-foot Innovation fountain.

—E. W. LACONTUR is opening a new store at the corner of Williams and Almond streets, Fall River, Mass., and installing a new fountain.

Window Trims for the Fountain.

Practical Suggestions for Utilizing Imitation Fruits to Attract Attention.

THE average fountain does not receive its deserved portion of show-window advertising. Announcement strips are not show-window advertising. On the contrary, they are often so poorly made and crudely placed that they temporarily destroy any advertising value the window might possess.

To properly advertise soda water in the window, one must, for the time being, devote the entire window to that purpose. As soda fountain goods cannot be advantageously used, the display must be of a decorative character. In the following a few suggestions will be found.

The Mammoth Orange.

Take a half-dozen clean barrel hoops and entwine and cross them to form a spherical cage. Cover this cage smoothly with heavy, opaque paper. Over this place a cover of light yellow crepe paper. This is the "orange." Now for the "orange peel." Cut from medium weight cardboard eight "slices" of orange peel. Each of these "slices" is to be one-eighth of a sphere. That is, each of the pieces is to be a sharp-pointed oval which, when bent over the "orange" will cover one-eighth of it. In dimensions, each "slice" is to be in length equivalent to one-half the circumference of the "orange," and in greatest breadth one-eighth of the circumference. Along the middle of each of these pieces and extending from point to point on the "slice," lay a heavy copper wire. Over the full length of the wire glue a strip of tough paper to hold the wire firmly in place along the cardboard. Cover the inside—wire side—of each of the "slices" with white crepe paper. Apply paste lightly to the cardboard over the entire surface, and then gently press the paper against the paste. After the paste has become thoroughly dry, trim the edges of the crepe paper smoothly around the cardboard. In the same manner cover the other side of the "slices" with orange-colored crepe paper. Place the "slices," one upon the other, and at one end drive a wire pin through all the slices. Clinch the pin, so as to form a pivot from which the slices may radiate. Fasten this pivot point firmly to one side of the "orange." Now bend the slices upward and, by the aid of the imbedded wires, inward towards the "orange" in curves. The object is to bend the "slices of skin" so that the whole will have the appearance of an orange with a slit and partially loosened skin.

Drape the window with sharply contrasting paper, such as violet or emerald. Take large flower-pot, waste-basket, or similarly formed receptacle, cover it with paper like drapery, invert it upon the floor of the window as a pedestal and place the "orange" upon it. Use signs of appropriate wording to advertise orangeade or orange phosphate, or any orange drink or dish.

The Tulip.

The following effective display, although it was called the "tulip," is not an exact flower model. It can be called the name of any other flower if circumstances so require. The suggested colors may also be changed to harmonize with the design and general purpose of the display.

Make twelve cardboard "slices" as described above for making an "orange." The pieces may be from three to five feet in length, depending upon the size of the window, the doll used and the general environment. Six of the "slices" representing the "leaves" should be five-sixths as long as the remaining six slices. Cover the wire side of the shorter "leaves" with brilliant crimson paper and the reverse side with pale yellow paper; cover the wire side of the larger leaves with delicate pink paper and the outer side with white paper. Join the points of all the twelve leaves with a wire pivot, allowing the wire to remain long enough to fasten the design to a stand. Make the stand of a large, heavy board, or fasten the flower model directly to the center of the window floor. In fixing the pivot, place all the smaller leaves together on top of the large leaves, the wire sides being upwards. Now move the leaves so as to radiate from the center, curving the small leaves upward so as to form a cup, then bending over the large leaves so as to form the second wall of the cup. Within this cup stand a large doll, in white and tinsel and dressed as a fairy. In one hand of the doll place a gilt wand and on the head place a tinsel crown. In the other hand place a small soda glass filled with cotton, wax or other material to simulate a liquid. Hang up a large card on which is lettered the following:

> Our Tulip Fairy bids you welcome to our
> FAIRY FOUNTAIN.
> The sweetest of sweets for
> "HER" sweet TULIPS.

Drape the window in brilliant colors and use such other signs as may be desirable.

The Ever-Bubbling Pool.

The following somewhat intricate display was used by a Chicago confectioner to advertise his fountain. It attracted attention for many weeks:

In the center of the bottom of a large dish pan have tinsmith set a small pipe, opening into the pan. From the outer end of the pipe run a rubber tube which has been attached to the neck of a funnel. In some nearby, hidden place, install an electric fan in a box, with the top of the funnel so set in front that the fan will force air through the funnel and tube into the pan. Place the pan in the window and fill with pink or yellow liquid, such as is used for show-globes. Cover the sides of the pan with artificial flowers and vines. Arrange the window so as to represent a bower of flowers, vines and rustic wood, with a cool, shady dell and pool in the center. When the fan revolves the liquid in the "pool" will be kept constantly bubbling by air coming through the tube.

The display card may be lettered:

> Our Soda Is Just As Deliciously
> BUBBLING
> as the liquid in this dainty pool.
> It gives the cooling comfort usually found only
> IN NATURE BEAUTY SPOTS LIKE THIS.

Importance of Reporting Complaints.

Some fountain employers require the man behind the counter to make a formal report of all complaints made by customers, and even where there is no such hard and fast rule, it would seem to be advisable for a dispenser to report all such matters, with full particulars to the manager. If the complaint is in regard to the quality of the goods it is important that it should be looked into by the proper parties, so if necessary steps may be taken to prevent a repetition of the necessary steps may be taken to prevent a repetition.

In some cases, of course, complaints will be found to have been entirely justifiable upon the part of the customer, while there are others in which the customer is altogether unreasonable, and is kicking merely because it is his nature to kick. And while the dispenser should receive all complaints with tact and suavity, he should be careful to avoid even the appearance of taking sides with the customer against the store. If the complaint is made by a regular customer, and one who is not prone to find fault it would naturally be deemed of more importance than if it came from a stranger, and in such a case the dispenser might, while expressing surprise that there could be anything radically wrong with the goods, thank the customer for calling the matter to his attention, at the same time assuring him that it will be fully investigated.

Coca-Cola Must Pay Extra License in Mississippi.

JACKSON, May 20.—Replying to an inquiry from State Auditor E. J. Smith, Attorney-General Hudson advises that all dealers in coca-cola must pay a privilege license of $25 per year to sell that beverage, and that the fact of a license to sell soda pop and other soft drinks, or run a soda water stand, does not entitle them to sell coca-cola. This tax will cause a great many dealers to quit handling the article, as their profits in a year will not reach that sum. The auditor had been besieged with many letters of inquiry on this subject.

There is no doubt that the legislative intent was to curtail the drinking of coca-cola. Efforts were made to pass a law prohibiting its sale in the State, or to tax it out of existence, on the alleged ground that it contained cocaine or other elements injurious to health.

Shellac Coating for Chocolates Violates the Law.

Food Inspection Decision 119, which will be printed in full in the June *Soda Fountain*, rules against the use of shellac as a coating for chocolates and other confections.

Group Photograph of United States Pharmacopoeial Convention, N

ADVERTISING HINTS

Key Systems.

The mere fact that advertising pays is not enough to satisfy the business druggist. He desires to know what advertisements pay best, which of several papers or form of mailing list yields the best return per dollar of investment, and what classes of drug store merchandise show the greatest increase of demand through advertising.

These are problems which have engaged the attention of the greatest and most skilled advertisers and the attempts of solution have resulted in the creation of many key systems.

A keyed advertisement is one which contains some word, number, coupon, or offer which enables the advertiser to connect the purchaser of an advertised article with some one of several mediums or methods used to advertise that article. Druggists are fairly familiar with the systems of varying street, room, and department numbers used as keys by general advertisers. Here we shall deal only with systems which may be advantageously used by the retailer.

Coupon keys consist of coupons which form a part of the advertisement and upon which are announced special offers. In order to take advantage of the offer the purchaser is required to present the coupon at time of purchase. Thus, one may offer a 25 cent [illegible] and a 25 cent [illegible] for 25 cents provided the purchaser presents a copy of the part of the advertisement in which the offer is made. This part is the "coupon," and although the advertisement may appear to the average reader to be identical in the several papers, yet each ad carries a distinguishing mark which shows the name of the paper which printed it. The "keying" may be effected by printing the coupon in one paper in 10 point type, while the [illegible] is printed in 9 point type. Or the coupon may be [illegible] as a [illegible] plain and fancy-faced border rules.

Of course no keying is effective unless the sale of purchases [illegible] with it is [illegible] and the special offer [illegible] to those who present it [illegible] the key.

At the conclusion of the sale a comparison of the number of coupons clipped from the several mediums should readily tell which paper pays the best. At the same time, one must consider more than the mere number of coupons returned. He must consider the circulation of the mediums, for as advertising rates are almost always based upon provable circulation, so the advertiser should consider cost of space in connection with number of coupons received.

To find out what parts of town, or what business or professional classes are most strongly appealed to by a certain paper or class of goods, the advertiser has only to add the name, address and occupation lines to his coupon make-up, and insist that the coupons shall be fully filled out at time of purchases. When purchases are made by women, as they will be in the majority of cases, the occupation line should show the business or profession of the head of the family.

To find which medium yields the best returns on general lines irrespective of immediate sales, it is well to print a coupon in exchange for which the advertiser will give a calendar, free sample, or advertising novelty, without an attendant purchase. In all such offers the advertiser should refuse to accept coupons from young children.

Mailing List Keys.

To find out what style of language to use, what section or class is most strongly appealed to by a mailed folder, form letter, or other style of matter, the keying is merely a question of labor. One may either print a coupon upon the matter or demand the return of some particular paragraph or part. If mailed according to a classified list, the advertiser may place an identifying mark with pen, pencil or dating stamp upon the returnable part of the matter. Thus, an "L" would signify that the piece was mailed to the home of a lawyer, while a simple "X" might indicate a factory worker, and so on.

In cases where a plate furnished by a manufacturer is used, and no special price or premium is offered, it may be found unwise or impossible to key directly in or upon the advertisement. In such cases it is well to attach a special ticket or tag to the stock of the advertised goods and so ask the purchaser at the time of sale what medium led him or her to make the purchase. The name of the medium and such other information as may be secured can be written upon the tag which be removed before delivering the goods.

For local advertising there are two weaknesses generally shown in using keyed advertisements. One is, that the advertiser depends too much upon the bald offer, and pays too little attention to copy-making. The other common fault is that he fails to use his windows, show cases and general facilities to back and push the printed advertisement.

...v Willard Hotel, Washington, D.C., May 10, 1910, with Dr. Wall Presiding.

MOSTLY PERSONAL

Promotion for Popular Milwaukee Druggist.

Following the recent death of Ferdinand T. Yahr, president of the Yahr & Lange Drug Co., wholesale druggists, Milwaukee, the company has been reorganized and L. A. Lange, former secretary, was promoted to the presidency. Other changes made included the election of Fred E. Yahr as secretary, and the election of C. G. Forster, head of the Forster Lumber Co. and the Hilty Lumber Co., of Milwaukee, as director to succeed the late President Yahr. Mr. Forster is a son-in-law of the deceased president and will represent the estate in the business. Max Rosenthal was continued as treasurer of the company.

L. A. Lange, the new president, has devoted his entire life to the drug business and has been secretary of the Yahr & Lange Drug Co. since 1900. He became identified with the company in 1897 as manager when it was known as the Charles Baumbach Co. In 1900, when the name of the company was changed to the Yahr & Lange Drug Co., he was made secretary and manager of the drug department.

Leonard A. Lange is one of those men with a charming personality, a man with whom it is a rare pleasure to spend a half hour in conversation but who is so busy during the day that these half hours are generally very few in number. He is a Milwaukeean by birth, having made his debut in life on November 3, 1848, and obtained his early education in the schools of that city when it was just commencing its rapid growth.

LEONARD A. LANGE,
of Milwaukee, Wis.

Entering the drug business when 20 years old, Mr. Lange became connected with the firm of Burnham & Van Schaack, of Chicago, as receiving clerk, remaining with them and their successors, E. Burnham & Son, and the E. Burnham Son & Co., until the organization of the firm of Morrisson, Plummer & Co., of which he was one of the original members. Later when this concern was incorporated, he was made vice-president and secretary, which office he held until May, 1897. He then moved to Milwaukee to become manager of the Charles Baumbach Drug Co. When the name of the latter house was changed to the Yahr & Lange Drug Co. Mr. Lange was made secretary and general manager, filling this position until the death of Ferdinand T. Yahr on May 1 of this year when he was elected president of the company.

From his long and intimate association with the drug trade, both wholesale and retail, Mr. Lange enjoys a wide acquaintance and is favorably known. He has always taken an active interest in the N.W.D.A., being a member of both the proprietary and legislative committees and has always made it a special point to be in attendance at all meetings of the associations.

Aside from his business affairs he finds the greatest enjoyment in his home life. At times he becomes a follower in the footsteps of Isaac Walton and these occasional expeditions are generally said to result without fail in something besides the fisherman's proverbial luck. During the winter season Mr. Lange is an ardent follower of that sport made famous by the story of Rip Van Winkle's extended nap and the scores he rolls are sometimes said to cause the younger bowlers much alarm during the private tournaments.

As a chairman of the hall board of managers of the Jesu Roman Catholic parish, Mr. Lange is an active worker in religious circles, taking a great interest in the young men of the parish for whom a fully equipped gymnasium has been erected through his efforts. He is also a member of the Royal League and the North American Union, two fraternal organizations.

—ALFRED E. HEMENWAY, of Milton, a registered pharmacist, has been appointed Deputy U. S. Internal Revenue

Collector, in charge of the district of Massachusetts in the vicinity of Springfield. He spent 14 years at the Customs in Montreal and then opened a drug store on his own account in Malden. Meanwhile he took the civil service examinations for the position sections, with the result that he stood third on the list of eligibles and was selected for the important district, which includes the cities of Springfield, Holyoke and Northampton.

—Miss JULIA C. GODDING, former National secretary of the W.O.N.A.R.D. and former president of Boston Chapter, recently had a busy time there. She accompanied her husband to the A.Ph.A. convention, where Mr. Godding was elected as one of the candidates for president. She received Wednesday as a Souvenir from a guest at a reception to the members of Dr. and Mrs. Eugene F. Kelley on that night and departed on Monday for Cincinnati, where Mrs. Godding was a delegate to the Federation of Women's Clubs convention. Next day the members of Cincinnati Chapter, W.O.N.A.R.D., tendered a reception to Mrs. Godding at the Hotel Sinton. After the business a sightseeing touring ride was mapped out by the ladies. From Cincinnati, Mrs. Godding returned to Boston.

—CHARLES H. STOCKING, Ph.C., B.S., recently elected dean of the Kansas City College of Pharmacy, will spend his summer vacation in the vicinity of Stockbridge, Mich., where he will put in much of his time fishing. Mr. Stocking graduated from the University of Michigan School of Pharmacy a year ago and as a student was assistant to Prof. A. B. Stevens in the senior year. He was a charter member and one of the first presidents of the Prescott Club, a student organization at his alma mater.

—Dr. H. M. WHELPLEY, of St. Louis, dean of the St. Louis College of Pharmacy, has returned home from the Richmond and Washington conventions. He will make a report in June to the St. Louis Medical Society. On his way home Dr. Whelpley stopped over to visit the Cincinnati Museum and study the Indian relics. At Cincinnati he and Dr. Wiley were entertained at a dinner given by Prof. John Uri Lloyd at the Business Men's Club.

—FRIENDS of Anton Tomkiewicz, well known south side druggist, are doing their utmost to bring about the reappointment of Mr. Tomkiewicz as park commissioner by the new Social Democratic administration of Milwaukee. While many official heads are being lopped off, it is believed that the Socialists look with favor upon the popular druggist.

—A. W. KILER, Columbus, president of the Ohio State Board of Pharmacy, was present at the recent regular meeting of the Eastern Branch of the New York State board. Mr. Kiler's stay in this city was short and only incidental to his trip to Richmond, Va., where he attended the annual meeting of the A.Ph.A.

—E. J. BASTABLE, Phar.D., a former Washington druggist, has joined the forces of Parke, Davis & Co. He will call upon the physicians of the National capital. He will undoubtedly prove of valuable assistance to George Dawson, who attends to the commercial interests of the company in Washington.

—L. P. HUBBARD, formerly of Ripon (Wis.) and now a druggist in Green Lake, a suburb of Seattle, Wash., in writing to friends in Ripon says that the trout season is in full swing and that he can catch as many trout there in an hour as he could [illegible] in Fox, Wisconsin's Green Lake in a week.

—[illegible] M. ATTEE, [illegible] of the Food Division of the Department of Agriculture in Philadelphia, has resigned to accept a similar position with the Bureau of Chemistry at Washington, D. C. Mr. Attee has been in the service of the Department of Agriculture for [illegible] years and during that time has been stationed in Philadelphia, Boston, Chicago and New York. He is a graduate of the Philadelphia College of Pharmacy and a member of the Philadelphia Pharmaceutical Association.

—[illegible] of the Pharmaceutical Society of Great Britain, [illegible] of the Pharmaceutical Society of Ireland, [illegible] of the Pharmaceutical Society of Australia, [illegible] of the Pharmaceutical Society of New Zealand, [illegible] of the Pharmaceutical Society of South Africa, [illegible] of the Pharmaceutical Society of India, [illegible] of the Pharmaceutical Society of Canada, [illegible] of the Pharmaceutical Society of Japan, [illegible] of the Pharmaceutical Society of Switzerland, [illegible] of the Pharmaceutical Society of Belgium, [illegible] of the Pharmaceutical Society of Holland, [illegible] of the Pharmaceutical Society of Germany, [illegible] of the Pharmaceutical Society of Austria, [illegible] of the Pharmaceutical Society of Hungary, [illegible] of the Pharmaceutical Society of Italy, [illegible] of the Pharmaceutical Society of Spain, [illegible] of the Pharmaceutical Society of Portugal, [illegible] of the Pharmaceutical Society of Mexico, [illegible] of the Pharmaceutical Society of Brazil, [illegible] of the Pharmaceutical Society of Argentina, [illegible] of the Pharmaceutical Society of Chile, [illegible] of the Pharmaceutical Society of Peru, [illegible] of the Pharmaceutical Society of Bolivia, [illegible] of the Pharmaceutical Society of Uruguay, [illegible] of the Pharmaceutical Society of Paraguay, [illegible] of the Pharmaceutical Society of Ecuador, [illegible] of the Pharmaceutical Society of Venezuela, [illegible] of the Pharmaceutical Society of Colombia, [illegible] of the Pharmaceutical Society of Panama, [illegible] of the Pharmaceutical Society of Costa Rica, [illegible] of the Pharmaceutical Society of Nicaragua, [illegible] of the Pharmaceutical Society of Honduras, [illegible] of the Pharmaceutical Society of Salvador, [illegible] of the Pharmaceutical Society of Guatemala, [illegible] of the Pharmaceutical Society of Cuba, [illegible] of the Pharmaceutical Society of Haiti, [illegible] of the Pharmaceutical Society of Santo Domingo, [illegible] of the Pharmaceutical Society of Porto Rico, [illegible] of the Pharmaceutical Society of Jamaica, [illegible] of the Pharmaceutical Society of Trinidad, [illegible] of the Pharmaceutical Society of Barbados, [illegible] of the Pharmaceutical Society of Guiana, [illegible] of the Pharmaceutical Society of Surinam, [illegible] of the Pharmaceutical Society of Curaçao, [illegible] of the Pharmaceutical Society of Aruba, [illegible] of the Pharmaceutical Society of Bonaire, [illegible] of the Pharmaceutical Society of Saba, [illegible] of the Pharmaceutical Society of St. Eustatius, [illegible] of the Pharmaceutical Society of St. Martin, [illegible] of the Pharmaceutical Society of St. Barthélemy, [illegible] of the Pharmaceutical Society of Guadeloupe, [illegible] of the Pharmaceutical Society of Martinique, [illegible] of the Pharmaceutical Society of St. Lucia, [illegible] of the Pharmaceutical Society of Grenada, [illegible] of the Pharmaceutical Society of St. Vincent, [illegible] of the Pharmaceutical Society of Grenadines, [illegible] of the Pharmaceutical Society of Barbuda, [illegible] of the Pharmaceutical Society of Antigua, [illegible] of the Pharmaceutical Society of St. Kitts-Nevis, [illegible] of the Pharmaceutical Society of Anguilla, [illegible] of the Pharmaceutical Society of Montserrat, [illegible] of the Pharmaceutical Society of Dominica, [illegible] of the Pharmaceutical Society of St. Lucia, [illegible] of the Pharmaceutical Society of St. Vincent, [illegible] of the Pharmaceutical Society of Grenadines, [illegible] of the Pharmaceutical Society of Barbuda, [illegible] of the Pharmaceutical Society of Antigua, [illegible] of the Pharmaceutical Society of St. Kitts-Nevis, [illegible] of the Pharmaceutical Society of Anguilla, [illegible] of the Pharmaceutical Society of Montserrat, [illegible] of the Pharmaceutical Society of Dominica.

—[illegible] of the Pharmaceutical Society of Great Britain, [illegible] of the Pharmaceutical Society of Ireland, [illegible] of the Pharmaceutical Society of Australia, [illegible] of the Pharmaceutical Society of New Zealand, [illegible] of the Pharmaceutical Society of South Africa, [illegible] of the Pharmaceutical Society of India, [illegible] of the Pharmaceutical Society of Canada, [illegible] of the Pharmaceutical Society of Japan, [illegible] of the Pharmaceutical Society of Switzerland, [illegible] of the Pharmaceutical Society of Belgium, [illegible] of the Pharmaceutical Society of Holland, [illegible] of the Pharmaceutical Society of Germany, [illegible] of the Pharmaceutical Society of Austria, [illegible] of the Pharmaceutical Society of Hungary, [illegible] of the Pharmaceutical Society of Italy, [illegible] of the Pharmaceutical Society of Spain, [illegible] of the Pharmaceutical Society of Portugal, [illegible] of the Pharmaceutical Society of Mexico, [illegible] of the Pharmaceutical Society of Brazil, [illegible] of the Pharmaceutical Society of Argentina, [illegible] of the Pharmaceutical Society of Chile, [illegible] of the Pharmaceutical Society of Peru, [illegible] of the Pharmaceutical Society of Bolivia, [illegible] of the Pharmaceutical Society of Uruguay, [illegible] of the Pharmaceutical Society of Paraguay, [illegible] of the Pharmaceutical Society of Ecuador, [illegible] of the Pharmaceutical Society of Venezuela, [illegible] of the Pharmaceutical Society of Colombia, [illegible] of the Pharmaceutical Society of Panama, [illegible] of the Pharmaceutical Society of Costa Rica, [illegible] of the Pharmaceutical Society of Nicaragua, [illegible] of the Pharmaceutical Society of Honduras, [illegible] of the Pharmaceutical Society of Salvador, [illegible] of the Pharmaceutical Society of Guatemala, [illegible] of the Pharmaceutical Society of Cuba, [illegible] of the Pharmaceutical Society of Haiti, [illegible] of the Pharmaceutical Society of Santo Domingo, [illegible] of the Pharmaceutical Society of Porto Rico, [illegible] of the Pharmaceutical Society of Jamaica, [illegible] of the Pharmaceutical Society of Trinidad, [illegible] of the Pharmaceutical Society of Barbados, [illegible] of the Pharmaceutical Society of Guiana, [illegible] of the Pharmaceutical Society of Surinam, [illegible] of the Pharmaceutical Society of Curaçao, [illegible] of the Pharmaceutical Society of Aruba, [illegible] of the Pharmaceutical Society of Bonaire, [illegible] of the Pharmaceutical Society of Saba, [illegible] of the Pharmaceutical Society of St. Eustatius, [illegible] of the Pharmaceutical Society of St. Martin, [illegible] of the Pharmaceutical Society of St. Barthélemy, [illegible] of the Pharmaceutical Society of Guadeloupe, [illegible] of the Pharmaceutical Society of Martinique, [illegible] of the Pharmaceutical Society of St. Lucia, [illegible] of the Pharmaceutical Society of Grenada

Mr. Liggett Gives His Version of Real Facts in Riker vs. Rexall

Criticises The Era's Report, but Admits Truth of Statements, Except as to One Court Scene at Which He Was Not Present—Wants a Co-operative By-law That Will Hold Water—Asserts That Rikers Neglected United Drug Agency.

Under date of May 12, Louis K. Liggett, president of the United Drug Co., Boston, sent to his stockholders a pamphlet dated April 15, entitled "Real Facts Regarding the Riker vs. Rexall Case." In the letter of May 12, Mr. Liggett states the facts as to the effect of the court proceedings precisely as did the ERA, but by leaving out context tries to make it appear that the ERA did not state the result fairly. The ERA said plainly that the Rikers had won the injunction, just as Mr. Liggett admits, but declared:

Vice-Chancellor Howell ordered the temporary injunction to continue until the final hearing in the litigation. Without passing upon the main controversy, he declared it would be unfair to permit the status quo to be interrupted pending final adjudication. Several months will probably elapse before the suit is disposed of.

That disposes of the charge that the ERA tried to convey any erroneous impression. Another point that Mr. Liggett tries to make is that the attack of his lawyer on the trade press did not take place. As stated in the ERA this attack was made in the court room, after recess had been taken and therefore was no part of the proceedings, nor did the Vice-Chancellor take any notice of the outbreak, although he had not yet left the bench. Mr. Liggett was not present at the time and his denial has nothing material on which to stand. The outbreak was not directed toward the Vice-Chancellor, but the lawyer addressed his remarks to the newspaper man, walking across the court room toward him and shaking his finger with vehemence at the object of his tirade. With these corrections in mind Mr. Liggett's letter makes interesting reading:

Mr. Liggett "Chokes Off" Would-be Sympathizers.

Dear Pardner: BOSTON, May 12, 1910.

I received a letter this morning from one of my good friends telling me that he had read in the ERA that the United Drug Co. had lost its suit with the Riker Co., and extended his sympathy to me.

I wonder how many people think the same as he does—that we have lost our suit—and how many sympathizers there are? I am writing this letter in the hopes that I may choke them off.

I don't need any sympathies, and I know the United Drug Co. doesn't—for two reasons:

First—We haven't lost any suit. We think the decision is in our favor. What happened in Newark on the 7th and 8th of April was only a skirmish. The real battle comes in the trial.

Second—Even if we are licked we are not deserving of any sympathy, no man in business is who has had a run for his money, and that is what we will have had by the time we get through with this case.

Facts Just as The Era Stated Them.

Now—the facts of the matter are these:

The Judge has refused our petition to remove the temporary injunction that the Riker Company obtained against us, until such a time as there is a final hearing and disposition of our case. In other words, the Riker Co. obtained a temporary injunction from the court without having heard our side of the case. We asked the Judge to hear our side and then remove the injunction, but as is the case in most of these hearings the court decided that we were not being damaged by continuing the injunction until a final hearing of the case because even under the injunction we were permitted to sell the Riker Co. and sell any one else in New York, Brooklyn and Boston so long as we sell the Riker Co. For that reason he believed, there being so many new points of law involved in this case, that it should be given a full trial—and that's all there is to it.

After there has been a trial of this case we are going to know just "where we are at" in these cities, and until there is a trial we will all be guessing. We think we are going to win—if we didn't we wouldn't be fighting the case.

The ERA in this article has given the impression to the trade that we lost our suit, and goes out of its way to rap us hard because we are trying to knock out our by-law that was supposed to protect our own agents. That's true. That's just what we are trying to do. Our lawyers decided months ago that this particular by-law was too indefinite to be binding and that it would not hold water in court. The United Drug Co. doesn't want any by-laws that are invalid—that won't hold water in court. If we find out that this by-law is valid, all well and good—we'll quit—take our medicine and say nothing more.

Wants a By-Law That Will be Valid.

If it isn't binding we are going to have a new by-law that is—that will give to our stockholders all of the protection they ask for and it is your right as stockholders, controlling the interests of this company, to demand that you get such a by-law as is valid and will protect your interests.

The ERA—and I suppose I am a fool to allow myself to be angered by any such nonsensical attack as is made on page 491 of that magazine—is chuck full of theories and misrepresentation in its article headed—"RIKER WINS INJUNCTION." The beginning, which is supposed to be very sensational is a big lot of buncombe. No such statement as they report was made by the lawyer for the United Drug Co. (Liggett's lawyer, as they call it). There was a question by the Judge as to why the case had been postponed and our lawyer took occasion to inform the Judge that the other side had been giving information regarding the case to the trade journals, and that the president of the Riker Co. had in an interview stated that all of the postponements were due to us which was untrue, and our lawyer so stated it to the court—he stated that there had been four postponements of the case, three of which were occasioned by the other side, and one by our side, due to sickness. I don't believe personally, nor do I think any of the lawyers believed that any one intentionally postponed this case—but as you will observe—the ERA publishes a big bunch of slush about it.

Could Have Been Treasurer of Riker Co.

It is true that the Riker Co. charged—according to their lawyer's arguments—that the occasion of all the trouble is the fact that I am disappointed in not becoming treasurer of the Riker Co. Unquestionably the lawyers of the Riker Co. had this thought suggested to them, but whoever gave them such an idea as that must have been hunting pretty hard to find a nail to hang his hat on.

If I had wanted to be treasurer of the Riker Co. it would have been a cinch for me to have been that, or anything else, by simply insisting upon it at the time I brought about the consolidation of the Jaynes and Riker deal. That company was my creation, and not theirs. I could have done what I wanted, I think, by asking for it before I put the deal through.

After all, this whole affair is a bunch of buncombe from start to finish. My only object in writing to you is the fact that I have been keeping still for a matter of four or five months now, and only three weeks ago did I sit down and dictate a letter to the stockholders reviewing this entire case, following the arguments of the lawyers in Newark, which by reason of the conservatism that I have attempted to practice the past five months I have refrained from sending out, but in view of the fact that I believe that all of this stuff that is appearing is premeditated and wilfully published, I am enclosing in printed form the letter that I dictated three weeks ago. It tells the story in a nutshell.

Will Abide by Verdict in September.

I only have this to say in closing that the stockholders of the United Drug Co. have only to think twice to realize that this company is strictly co-operative—that they own it and control it. When it comes to our meeting next September it is up to them if they have any ideas different from the management of this company—if they don't approve of the attitude we assume in forcing each stockholder to do his own share of the work—then is the time for them to take such action as is necessary to bring it about, and they can do it.

This thing about Liggett running the United Drug Co. is to me all rot. I'm not running the United Drug Co. excepting as my position as president and general manager of the company permits me. If any one can show that I have wilfully utilized my position for my personal benefit, or to make a dollar for myself, and not to share it equally with all of the stockholders of the company, then it's time for me to resign my position, and it's time for the stockholders to ask for it, but any one who attempts this is going to have a difficult time to prove it, for the reason that there never has been a time that anything done by the management has not been done for the benefit of all the stockholders and divided among them pro rata with the number of shares of stock they hold in the company.

Yours sincerely, LOUIS K. LIGGETT, President.

Mr. Liggett's Version of the Real Facts.

In the booklet of April 15, Mr. Liggett narrates in detail his relations with the Riker company, beginning back in 1906, when Mr. Jaynes went to him and wanted to dispose of his business. In the spring of 1907 the United Drug Co. issued stock for the purpose of purchasing a large interest in Jaynes & Co., the idea being to secure a larger outlet for Rexall goods. Says Mr. Liggett, continuing:

At that time arrangements were made with Mr. Cosden, who was then secretary of the Wm. B. Riker & Son Co., to come over to Boston and take charge of the Jaynes business. When the Riker Co. found that Mr. Cosden was going to do this they offered him much better terms than we were offering, with the result that there was brought about a suggestion of a consolidation of the Riker-Jaynes business. This looked good to your board of directors from the United Drug Co.'s standpoint, because it was verbally agreed at the time between the owners of the Riker Co. and the directors of the United Drug Co. that the manufacturing business of the Riker and Jaynes companies should be given to the United Drug Co., and the United Drug Co.'s goods should be pushed more extensively in Boston and New York. In other words, these cities would be made living examples of what could be done with the Rexall agency.

On such an agreement as this the consolidation was brought about—capital was furnished through my efforts to finance it,

and the business was given a tremendous momentum by reason of the large volume of retail business that was had by this combination.

BUT, NOW COMES THE RUB:

We did not get the manufacturing business of the Riker or Jaynes companies as agreed upon—they went back on their promises—they didn't push the United Drug Co.'s products harder as they agreed—but rather took the Jaynes products to New York and pushed them in the Riker stores in that city and brought the Riker products to Boston and pushed them in the Jaynes stores here. The business obtained by the United Drug Co. in 1907 and 1908 following this consolidation was less than we had been obtaining from the individual Riker business in New York and Jaynes business in Boston. In other words—we had invested our money in their business in an effort to secure more business from them, and upon promises to secure it, and had gotten in return 4 per cent interest on our money in dividends and less business than we had been getting before we brought about the consolidations.

In other words—the Riker Co. had no conception or thought of owning the Jaynes business. I created that conception—took no profit in exchange for it—didn't make a dollar out of the transaction myself—but worked for the sole purpose of getting more business for the United Drug Co.—and got what? I got less business for the United Drug Co., and a very embarrassing situation in exchange for my efforts.

You can be assured that I was most heartily ashamed of the condition. Written agreements as to what should be done were not entered into because the directors of the Riker Co. were directors of the United Drug Co., and directors of the United Drug Co. were directors of the Riker Co., and they were not thought necessary.

Tried to Get Rikers to Buy Hall & Lyon Co.

During the year of 1907 I served as a member of the board of directors of the Riker Co. and in my capacity as director I used all the persuasion possible to bring about the carrying out of these agreements. In the fall of 1907, as you will readily recall, came the panic. I did all that was in my power during that panic to get the Riker Co. to buy the Hall & Lyon Co. I did this, knowing at the time that we were not getting from the Riker Co. what we were entitled for, but I believed that I could eventually, by reasonable arguments and moral persuasion force them to carry out their agreements with us. * * *

The Riker Co. refused to buy the Hall & Lyon Co. after dilly-dallying around with it for a matter of a month or two. They claimed the company was too heavily in debt and stated further that the Hall & Lyon Co. was insolvent, and they wouldn't buy an insolvent concern. It was at that time that the directors of the United Drug Co. voted to sell their Riker stock and buy Hall & Lyon stock—we knew the Hall & Lyon Co. was not insolvent—and yet we didn't know any more than the Riker Co. had the chance of knowing. In a year's time the Hall & Lyon Co. was on a sound basis—but that has nothing to do with the Riker case—I merely mention it to let you know how we came to sell our stock in the Riker Co. and what we did with it.

The management of the Riker Co. didn't like our disposing of our interests in their company and buying the Hall & Lyon Co. Why they didn't like it we don't know and don't care.

Friction Over Sale of Cahoon-Lyon Co.

Their next move was to secure control of the Cahoon-Lyon Drug Co. in Buffalo. The general manager of the Riker business was at that time one of the members of the executive committee of the Cahoon-Lyon Drug Co., of Buffalo. They attempted to get control of the company—of its stock—and until within 24 hours of its annual meeting they had secured control, but when it came to casting votes the next day at the meeting, it was found that the United Drug Co., with the assistance of the independent stockholders, was in control in place of them, and the result was more friction between the two organizations—that is, the Riker Co. and the United Drug Co.

From that day, February 12, 1907, Mr. Liggett declares that the personal relations between members of the Riker and United companies have been friendly and that the only reason he can see why the Rikers should not have the Rexall agency is that the Rikers have not pushed and displayed Rexall goods to the extent which he believes should have been done. In 1907 he remonstrated and was assured that better work would be done, but soon there was a falling off. In December, 1908, he had a serious talk on the subject with Mr. Cosden, the Riker president, the latter promising to do better. For 1909 a guarantee was discussed and $75,000 agreed upon.

In the first four months, says Mr. Liggett, things went along in fine shape but then fell back. He continues:

When the 1st of December came we found that in place of buying $75,000, or 11-12 of that amount up to that time, they had bought less than $40,000 from us, although they were operating at that time [illegible] and 25 stores altogether in [illegible] the Jaynes stores had been [illegible] to us [illegible] and the Riker [illegible] from the Riker [illegible] of December 31, 1908, we had a total [illegible] of $41,168. In other words, 1907, with their combined stores, amounting to 11, their purchases were almost [illegible] 1909, when they had 22 stores.

Mr. Liggett tells of an interview with Mr. Cobb, who he says is the largest stockholder in the Riker concern, in which Mr. Liggett protested that the United Drug Co. was not being treated fairly. An order was promptly sent for the balance of the $75,000 guarantee. For 1910 he suggested a guarantee of $250,000, not that he expected the Rikers to agree to it, but because he considered their territory to be reasonably worth that sum to the United company.

Mr. Liggett suggests that his "pardner" addressed might be thinking something like the following question:

"Why should the United Drug Co. demand the Riker Co. to buy $75,000 worth of goods? Why should they ask them to buy $250,000 worth of goods? How long is it before the United Drug Co.—or Liggett, as some see fit to express it—is coming to my town to say to me—you have got to give us so much business or we'll cancel your agency?"

I'm going to answer these questions as follows:

In the first place, we have cancelled since we have been in business [illegible] agents—we have made many changes by reason of deaths, selling out of business, failures, but even with that, not many, considering the large number of stockholders we have, but on our own part we have cancelled but five agents—and I see no reason why during the next five years we should cancel more than five more if the stockholders of the company do what they ought to do—that is, see that their agency—that they themselves and their clerks—treat the United Drug Co. fairly—and by fairly I mean that our goods are given the display that the exclusive agency entitles them to have—that our advertising is reasonably backed up by displays—that the public in the city know or are taught to know where the Rexall store is by reason of window displays and counter displays of our goods, and the use in their own advertising of the words "The Rexall Store."

That is all the United Drug Co. is entitled to ask of you, but you stockholders are entitled to ask of this management, or me—because at the present time I am manager—that I see that each city stands on its own bottom—that it earns at least its own dividends—that we treat each and every stockholder alike—that we show favoritism to none.

What would you think of me, and how embarrassing would be my position two or three years from now, if I allowed this Riker case to go on simmering, and some day, at one of our annual stockholders' meetings, some one of you would ask, "How much money is the United Drug Co. making in New York?"—and I should be forced to answer—We are losing money in New York. Your thoughts and mine would be: These fellows are getting dividends, and we are making them for them. That isn't fair, is it? It isn't co-operation, is it? Isn't this management entitled to ask each stockholder of the company that he give enough effort and push to our goods to see that he earns the dividends that he draws from the company?

PRESIDENT HUHN HUNTS RECRUITS IN AUTO.

Head of N.A.R.D. and A.D.S. Will Not Be Drawn Into Any Controversy to Divert His Uplifting Efforts.

MINNEAPOLIS, May 20.—Charles H. Huhn, president of both the N.A.R.D. and A.D.S., said recently to the ERA correspondent:

"It is not my purpose to create any more disturbance nor to be dragged into any more unimportant discussions upon questions which have no bearing upon the future welfare and success of the N.A.R.D. I have already been too much handicapped by these side issues that have come up since the turn of the year, so I have been unable to carry out my plan for increasing the N.A.R.D. numerically and helping to make the influence of that organization indispensable to retail druggists.

"I desire to devote what time there is left between now and the Pittsburg convention to the sole purpose for which the N.A.R.D. was organized, namely, the bettering of conditions for retail druggists. If I inadvertently injure the feelings of any one or particular man or member by what I shall have to say hereafter, I shall be willing to correct any mistakes.

"The kind of work I want from this time forward from the members of the N.A.R.D. is exactly of the kind that the Minneapolis R.D.A. has agreed to do shortly—to secure as members of the Minneapolis association and of the N.A.R.D. the twenty-five retail druggists in this city who are not yet members. George A. Rose, Sherman H. Brownlee, Thomas Voegeli and myself will go after these men in our automobiles in mass, taking along with us as many members of the associations as will fill the four machines.

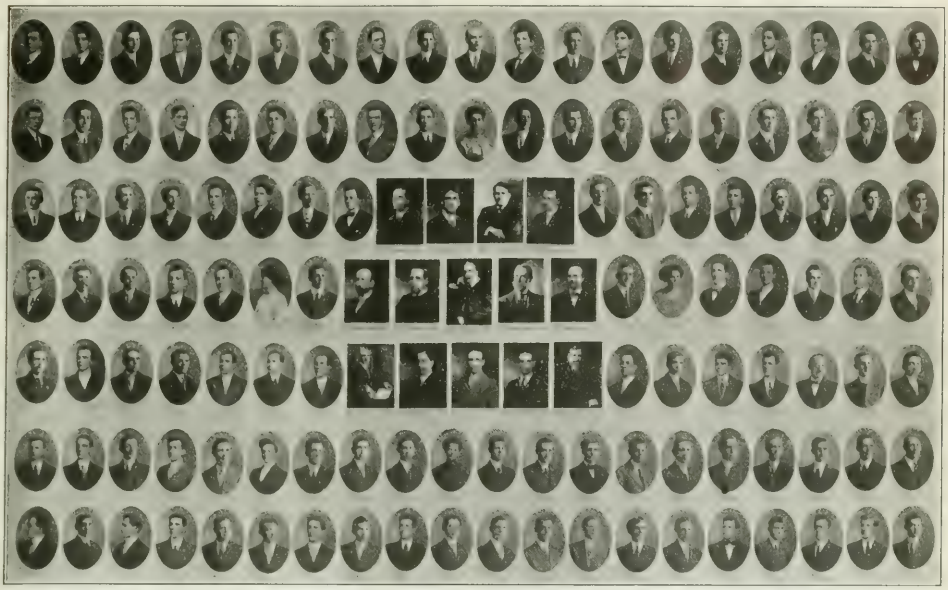
"That you may see that I am not sitting with my feet up many hours during these days, I will state that my time is now divided between erecting a warehouse, remodeling my store for more room, and last, but not least, serving on the grand jury.

"I hope, therefore, that every member of the N.A.R.D. will give me all the help he possibly can to make the organization of greater usefulness to the retailer than it has yet been. It is a source of gratification to know that the dues are coming in faster than ever before and that the expenses of this National organization are much lighter, proportionately, than in any previous year of its existence."

Mr. Huhn added in his genuine "Charlie" way:

"Tell them that the fat boy is with and for the N.A.R.D. every minute!"

Commencement Season in Full Swing—Graduating Class of Phila. College of Ph.



Exceptional proficiency marked the achievements generally of the Class of 1910 which was graduated on the evening of May 26 from the Philadelphia College of Pharmacy, the eighty-ninth commencement of the institution. The class numbered 120 and included five young women. The class officers are E. P. Gibney, president; L. C. Connelly, vice-president; E. C. Hickory, treasurer, and J. J. Goodwin, secretary.

BROOKLYN C.P. CONFERS NINETY-SIX DEGREES.

Valedictorian Distinguishes Himself by Able Oration at Commencement Exercises and Wins Prize.

With the applause of an audience of 3000, many of them parents, sweethearts or friends, ringing in their ears, and to the time of their own march, "The Class of 1910," the 92 graduates of the Brooklyn College of Pharmacy, led by Dr. A. E. Hegeman and Dr. Charles E. Gesell, proceeded two abreast to their places on either side of the immense stage of the Academy of Music, on which stood, in their honor, the trustees and faculty of the institution. The boxes were gayly decorated with the National colors and the footlights backed with innumerable bouquets of beautiful flowers and exquisite floral pieces. Adding to the color of the picture were the American and class flags placed side by side at the rear of the stage.

The valedictory was delivered by Emanuel M. Siegler. He spoke on education, elaborated on his conception of the subject and concluded by showing how pharmacy could fulfill his views. It was so obvious that Mr. Siegler believed everything he said that although his voice was very low, his listeners remained in a state of tension throughout his oration in order to catch every word.

In his address to the graduates, the Rev. John F. Carson, D.D., declared that the large number of people present was evidence of appreciation and approbation of the college and he concluded that inasmuch as so many Manhattanites were present, the institution must be the best of its kind in the State. This remark seemed to tickle everyone present and the applause that followed swept the house. Mr. Carson gave the graduates, besides the compliment to their alma mater, considerable good advice.

Before presenting the various prizes awarded for efficient work during the past year, President Rehfuss delivered a short address in which he commented on the recent status of pharmacy. "A vast change has occurred in the past ten years: pharmacy, perhaps the last of all the professions, has yielded to capital and the trusts. The big corporation stores—the chain stores—are here to stay. Nevertheless, there is always an opportunity for the wideawake pharmacy graduate. The laws of our State require that the registered pharmacist be a college graduate. Never was the necessity for higher education more obvious." Mr. Rehfuss congratulated the graduates on the successful conclusion of their college courses: the examination ratings, in particular, being gratifying.

The recipients and their respective prizes are as follows: Miss Elvira Kalkbrenner, postgraduate gold medal awarded for highest general standing; Joel Sissman, college senior gold medal awarded for highest general standing during year and in final examinations; Julius R. Globus, college silver medal, second highest general proficiency in senior class; Benjamin Melcher, bronze medal, third highest proficiency in senior class; Emanuel M. Siegler, Anderson gold medal, highest standing in theory and practice of pharmacy; Samuel Saletan, board of trustees silver medal, highest general proficiency in junior year; Joseph Bailin, alumni prize, compound microscope, awarded by Dr. Wm. H. Weygandt. The honor roll consisting of the names of those seniors and juniors who received over 90 per cent standing during the past year is as follows:

Seniors, Pauline Myerson, Joseph Apicella, Joseph Bailin, Samuel J. Cohen, Sam Fine, Julius R. Globus, Abraham Leder, Samuel Lessinger, Simon Lubarsky, Abraham Markoff, Benjamin Melcher, Oscar Mennin, Emanuel M. Siegler, Joel Sissman, Harry Stein, Soreo Tomilow and Paul Zingler; juniors, Nettie Givener, Jennie Loeb, Emilia L. Monaco, Lucelle Rein, Mary Schenck, Rose Shuloff, Israel Bromberg, Carmino Cava, Walter C. Currey, Harry M. Dichter, Sam Feitelson, Abraham Freidman, Benjamin Freidman, Charles L. Gesell, Jr., Jacob Goldberg, Maurice Harowitz, David Kaplan, Sol. Leder, George M. Perry, Samuel Saletan, Louis Steinberg, Frank Wallach, John Weinmann, Jr., and William Wolf.

The degrees were conferred by Dr. William C. Anderson, dean of the college, as follows:

Doctors of pharmacy, Elvira Kalkbrenner, Louis Stempel, Max A. Lipkind and Morris Steinberg.

Graduates in pharmacy, Pauline Gilman, Celia Mishkin, Pauline Myerson, Toni Sanntrock, Matilda Schuval, Debora Spero, Joseph Apicella, Leopold Bahr, Joseph Bailin, Louis Bar, Nathan Bass, George Berger, Joseph H. Betz, Osias Bierner, David Boyarsky, David Braunstein, Lazar Bresler, Joseph T. Belsito, John I. Brill, Max E. Brunke, Francis T. Cizmowski, Samuel J. Cohen,

Wm H Cotter Max Dorfman William Duffy Irving Elsker, Julius Friedman Andrew Fredericks Sutro Fine Morris Fried Meyer Gal Gustave Hansen Oppenheimer Henry M Gottschalk Jr. Julius R. Globus, Louis Gluckman, Max Goldman, Israel M. Goodman, Isaac Greenblatt, Walter M. Hahn, Max Heller, Hermann Hensel, Nepaulin Hermans, Jerry O. Kaiser Abraham Kaufman Hyman Kolker Isaac M Landman, Abraham Lesker, Joseph Lesser Samuel Lesinger, Louis Lesker, Hyman E. Levy, Theodore Lilienfeld, Julius London Simon Lubarsky, Harry M Marcus, Joseph B. Mellit, Arnold A. Meyerowitz, Joel Hart Mohamed Oscar Morgan, Jerome Mishkin Matthew Morrison, David Pomerantz, Israel Rabinowitz, Jacob Rosenzweig, Joseph Block, Louis Rosenberg, Max Rosenthal, Isadore Rosh, Samuel Rosenberg, Peter Jacob Schlegel, Clement L. Shaw, Isadore M. Siegel, Joel Sloss, Jacob Benjamin Spencer, Harry Stein, Alexander Stewart, Joseph Sussman, Samuel B. Taylor, Charles Tilney, Harris Tomashoff, Franklin B. Tompkins, Max Timmermann, J. J. A. Van Dieuse, Jr., Harry Walters, Charles Walther, Walter Wehn, Isaac Weinberg, George L. Wells, Aaron Wiesenthal, Paul Zinsser, Max Zschiesche.

The invocation was made by Rev. Gordon H. Eaglesfield, D.D. The vocal music of a high order and consisting of operatic and other selections, was rendered by Mme. Marie Stoddart, Mrs. Mary Gordon FitzGibbon, Senor Guetary and Frederic Weld. Their efforts were enthusiastically received and several encores called for. The orchestra was that of Mr. Kleine, son of the recently deceased treasurer of the college and Kings County Pharmaceutical Society, Oscar C. Kleine. The commencement exercises were followed by the annual senior banquet. Dr. William H Weygandt was toastmaster.

N.Y.C.P. HOLDS 80TH ANNUAL COMMENCEMENT.

Dr. Chandler Talks Interestingly of College's Progress Before Conferring 105 Ph.G. Degrees.

The 80th annual commencement of Columbia University New York College of Pharmacy was held recently at Carnegie Hall. The officers, trustees and faculty, having marched to their respective positions on the platform, were followed by the graduating class conducted by Hieronimus H. Herold, Ph.G. Prayer was offered by Rev. Dr. Floyd S. Leach and an address made by Vice-President Charles F. Chandler. The latter reviewed the history of the institution, calling particular attention to the distinguished men who had participated in its earlier life. He compared numerically the teaching staff of two professors in 1829, and the present faculty of 13 professors and 5 instructors. He also talked interestingly of the old quarters of the institution, first in rooms belonging to the University of the City of New York and later in a building in East 23d street. The present condition of the college is very satisfactory: of students there are 140 juniors, 125 seniors, 2 students of food and drug chemistry, 7 post-graduates, 15 special students and included in the total of 289 students for the year just ended, are 8 young ladies. When the new building in West 68th street was completed, the college assumed a mortgage of $125,000. This amount has since been decreased to $90,000 and the floating debt eliminated.

The names of candidates for degree of graduate in pharmacy, in the absence of Secretary Thomas F. Main, were read by E. W. Runyon, '73, late professor in pharmacy at the California College of Pharmacy. The degrees were conferred by Professor Chandler to the following:

Elmer Auchenpaugh, Katherine R. Bahan, Samuel Baron, Szues Bela, S. R. Merrill Benson, Isidor Berkowitz, Abraham Binder, Earl S. Bixler, Samuel Bloch, Robert L. Blyler, Lyle H. Bly, Morris Russell, David Cantor, John J. Carson, Harold T. Cartwright, Robert Clark, George F. Clayton, Abraham Cohen, David [illegible] Clifford D. Cole, Conrad A. [illegible] Howard Cornelius, Leon L. Cypress, Anthony D. Della Donna, Effie [illegible] Letting, Demetrio Fabregas, Jerome Fitzpatrick, Joseph Freedman, Max Fromer, Robert [illegible] Geo. J. Gelbert, Henry Gerber, Edward M. Gibbons, Samuel Glaserof, Jacob David Samuel Goldberg, Frederick Goodman, Samuel B. Greenwald, Walter Hewlett, Charles E. Hicks, Harry B. Hansen, Fannie Hart, Edward A. Helmlich, Martin G. Heldt, Hieronimus Herold, Martin A. Holt, Martin L. Hoyt, Grover W. S. Humphreys, Alton E. Hutton, Isidor Jaffey, Leo E. Kantor, Isidore Kaplansky, George Kassnoff, Ernest E. King, Bernard W. Knecht, William H. Krauser, Howard A. Krumwiede, Alvin E. Kuhlmann, Frank [illegible] Lawson, Meyer A. Leschower, Benj. Lesser, Calixto W. Lindsay, Edward McCrone Jr., Marcus E. Marcus, Antonio Martinez, Rueben Meyer, William S. Moore, John F. Cornelius, Joseph Pecarsky, Oscar O. Propst, Wilbert M. Ralph, Walter Reingardt, Victor H. Rhoads, Louis H. Richter, Walter A. Rothrock, Arthur Rothbluck, Irving H. Roediger, Leo Rosenthal, Samuel Rosenthal, George [illegible] Schettener, Harris Schlesinger, Malcolm L. Schlesinger, Louis W. Schwartz, Meyer Schwartzman, Charles Schwartz, Samuel Schwartz, Isidor S. Segal, Jacob Seligman, Theodore H. Sheel, Judas Taub, Samuel Teitelman, Emanuel Tregant, Wilbur H. Tyrrell, Herman Vogel, Arthur A. Von St. George, Monroe H. Wall, Samuel Weiner, Harry Weis, Vincent T. Whalen, James W. Wise, Frederick Yaffa, Otto G. Zorn.

The awarding of the alumni prizes to the three senior students most proficient in their college work during the past year was made by Hieronimus A. Herold to the following: First prize, gold medal, Walter Regnault; second prize, silver medal, Samuel Baron, and third, bronze medal, Herman Vogel. The roll of honor, read by Curt P. Wimmer, A.M., Phar.D., consisted of these names: Walter Regnault, Samuel Baron, Henry Vogel, Samuel Glaserof, Frederick Yaffa, Harold T. Cartwright, Earl W. Blake, Anton Robitsek, Leo Roon, Harry Weis, Arthur E. Cole, Richard Elting and Samuel Tolmach. The trustees' special prizes of $100 each were awarded by Prof. George C. Diekman to Frederick Yaffa, most proficient in materia medica; Walter Regnault, chemistry, and Leo Roon, pharmacy.

The address to the graduates was delivered by William Dawson Johnston, M.A., and the valedictory address by Alvin E. Kuhlmann. Benediction was offered by Dr. Floyd S. Leach. The Seventh Regiment Band furnished the music. A cornet solo by S. Finkelstein won much applause.

Interesting Exercises at St. Louis C. of P.

The 1910 graduating class of the St. Louis College of Pharmacy was entertained by the faculty at Hotel Jefferson with a banquet. Dr. H. M. Whelpley was toastmaster. These toasts were responded to: "Eighty-eight Years Ago," Dr. Enno Sander; class valedictory, Oscar F. Heitmeyer, Jr.; "The Omega Phi Society," Rube R. Armstrong; class motto, Miss Coyal Vilera Laubender; "The Ph.B. Class," Harry Claiborne McCormack; "The Pharmaceutical Press," Harry B. Mason. Presentation of the portrait of Solomon Boehm was made by Prof. Otto A. Wall.

The following evening Harry B. Mason, of Detroit, delivered the valedictory address at the 44th annual commencement of the college in Memorial Hall. Frank William Weyler, of St. Louis, was awarded a silver medal for the highest grade in the examination for the degree of graduate in pharmacy. Earle Carnahan, of Fort Smith, Ark., was given a silver medal for the highest grade for bachelor in pharmacy. Miss Bettie Prince Coussens, of St. Louis, was recommended for membership in the American Pharmaceutical Association with dues for 1910 paid by the college. The graduates were:

Graduates in pharmacy, Abraham Paul Cohen, William Joseph Conery, Albert Guy, Charles Thomas Hampton, James Dent Handy, Oscar Frederick Heitmeyer, Jr., Hosea Olo Hembey, Nova Hill, Mary Amerial Hobart, Mrs. Bertha Grace Huffman, Harrison Leo Kollme, Edward Albert Kroencke, Daniel Locke Leyerle, James Wood Lipscomb, Clarence Robert McCormick, Thomas Michael Mcgoverick, William Russell Mason, Joseph Nelson Mills, Christopher Otho Moffett, James Charles Murphy, Rose Pasbach, John Morton Ross, Rube Reid Armstrong, Joseph Riffey, Francis Martin Rudi, Irving Henry Schwartz, Theodore Samuel Schwartzman, Adolph Joseph Stueckemann, Leonard Julius Paul Stueckemann, William Harry Thornton, Rodney Davis Tolson, Frank William Weyler, William Heye Zimmermann.

Bachelor of pharmacy, Rube Reid Armstrong, George Thomas Bixon, Earle Carnahan, George William Collins, Bettie Prince Coussens, Harry Lester Coussens, Lloyd Lucius Crocker, Harry Claiborne Dyer, Milton Jenks Harnist, Coyla Vilera Laubender, Dorian Edward Mooney, Edgar L. Muse, Otto John Moser, Milton Heidel Stueckemann.

Degrees Conferred by University of Pittsburg.

School of Pharmacy of the University of Pittsburg last month conferred degrees on the following:

Graduate in Pharmacy—Robert Archibald, Lorenzo Alvino, Hornee E. Allen, Albert P. Blayney, Harriett A. Barber, Joseph F. Brantlinger, first honor; Cecil R. Bloom, Louis Boreman, Harry A. Beurl, Mark B. Cartwright, Peter L. Connor, Harry V. Day, Harry Diamond, Robert Eugene Fluke, Frederick W. Gatt, Bernard E. Gloekler, Norman A. Grauer, Roy H. Heiser, Guy B. House, John L. Jordan, Robert E. Krause, Jay W. Lafferty, Vincent H. Levin, Michael C. Little, James A. Martin, Frank A. Muselli, Jacob I. Mendelson, Howard I. Miller, Charles T. Moore, Charles R. Muldoon, John A. Mowery, second honor; Patrick H. McCullough, Charles R. McLaughlin, Michael L. McNally, Robert K. Norman, Walter J. Ochsenhirt, William T. Phillips, Morgan W. Porter, Charles A. Rhea, Forney A. Reeves, Lawrence J. Roe, Floyd L. Schweitzer, Frank I. Sharpnack, Andrew J. Metana, Irvin S. Smith, Charles E. Snyder, Clarence A. Stauffer, fourth honor; Frank Taylor, Stephen R. Wallace, John C. Wolpert, Wilfred F. Wise, Edwin H. Willets, Arthur S. Williams, Carlos H. Woodford.

Doctor of Pharmacy—Rhuard T. Moffitt, Leanore Darbaker, Jodie Pierson Wydick, Samuel Wydick.

Certificate of Proficiency—Warner H. McDonnell, third honor; George A. Meyer, Theodore J. Schill.

Fifty-three Graduates at Atlanta.

Grand Opera House was the scene of the exercises when the Atlanta College of Pharmacy recently graduated a class

of 53. Features were the address of Supreme Court Justice Lumpkin and the presentation of a handsome Shriner's pin to the dean, Dr. George F. Payne. Those graduating were:

Ph.G.—William Alfred Brown, Charles Frederick Benison, George Washington Bagley, Jr., Abraham Berman, Jeff Burkett Berry, Thomas Nathan Bussey, Joseph Cleveland Brewton, Manry Zol Buford, Philip Doyle Butler, Arthur Lee Clotfelter, Frank Graves Craig, Ernest Corn, John Arthur Diggs, John Edgar Epting, James Overby England, Alfred Keith Folger, Delmar Goode, John Pink Graham, Kenneth Lawrence Gray, Barney Frederick Herman, John Wesley Harrison, Miss Clare Virginia Hogan, Charles Groover Hodges, George Woodfin Huling, William Hudgens Irby, Robert Thurman Johnson, Julian Porter Key, Selim Ibraheem Katibah, Grover Cleveland Lamb, James Arthur Leggett, Thomas Grayson Lucius, Thomas Lever, Richard Wyatt Miller, George Washington Mathews, Oliver Carroll McElroy, Felix Kenneth McElroy, B. Hugh Mobley, George M. Mills, Lott Wilson Nelson, Andrew Houston Riddle, Lewis Alcun Roberts, John Calvin Runyan, Neal Troy Ritter, S. Lester Sharpe, Fred William Smith, William Claud Thomasson, Frederick Teague, John I. West, Jr., J. Franklin White, Dan Gee Waggoner, Edmund James Ward, Jr.

Ph. Chemist—Percy Young Ashford, Warren Forrest Bedenbaugh, Wilton Robinson Earle, George Marion Mills.

Phar.D.—Warren Forrest Bedenbaugh.

Gratifying Year for Massachusetts C.P.

BOSTON, May 21.—Commencement week at the Massachusetts College of Pharmacy has passed into history after one of the most gratifying years in the career of the college. The hop on Tuesday night in Horticultural Hall was a delightful occasion. Nearly 200 persons attended the function. Rev. A. R. Williams, of East Boston, made the invocation, and the commencement address was by Hon. John N. Cole, former speaker of the Massachusetts House of Representatives. President C. Herbert Packard conferred upon William Frederick Sawyer, former secretary of the State Board of Registration in Pharmacy, and for many years identified with the college, the honorary degree of Doctor of Pharmacy. Lyman W. Griffin, Ph.G., secretary of the college, read the roll of graduates upon whom the degrees were conferred by President Packard. The list is as follows:

Degree of Doctor of Pharmacy—Sarkis Garabed Aboonaian, Richard Mitchell Altmann, Henry Barone, John Patrick Barry, George Aaron Bridges, Harry Llewellyn Bruce, Percy James Callaghan, Ernest Orlando Cook, Edwin Brown Curtis, Henry Charles Foerster, Charles Joseph Foley, Winslow Cobb Garratt, Samuel Chester George, Robert Paul McKeogh, Clarence Joseph Norton, Robert Carl Peterson, Julian West Pollard, Elos Albert Ray, Daniel Reidy, Jr., Nancy Leonard Reilly, Charles Elmer Sanders, Carrie Leona Sears, Julius Simon, Carlton Bancroft Wheeler, Mihran Bedros Yardumian, James Burke Young.

Degree of Pharmaceutical Chemist—Addie Lavelle Howes, John Joseph Rourke.

Forty-eight Graduates at Northwestern University.

Forty-eight graduates of the Northwestern University School of Pharmacy in Chicago were given diplomas at the recent annual commencement exercises of the school held in Fisk Hall, Evanston. Those graduated were:

E. H. Abbott, W. E. Ammermann, Earl Barnette, H. L. Bellamy, George D. Butle, W. L. Carr, W. J. Carrick, J. F. Cunningham, Edward Devlin, C. F. Eckstam, J. D. Ernst, C. F. Folkrod, Mott Foresman, J. P. Graf, D. G. Harden, H. W. Harris, I. J. Heckman, J. M. Heinen, J. S. Honeyman, H. A. Isham, H. F. Isted, Raph. Jacobson, E. L. Kadlec, Jay Kaplan, F. M. Keeley, J. M. Knochel, W. A. Krafft, M. A. Lapjansky, H. M. Lappley, Chris W. Lee, J. J. Levitt,, A. S. Lindeman, F. E. McKamy, C. D. McKelvey, E. O. Morrison, W. J. Mueller, O. H. Ohlson, J. P. O'Rourke, R. J. Orr, J. D. Picard, F. A. Quilling, M. A. Roth, Longin Tabenski, H. E. Wagener, C. P. Witter, A. P. Zimmer.

Fifty Graduates at Chicago C.P.'s 50th Birthday.

School of Pharmacy of the University of Illinois, formerly the Chicago College of Pharmacy, celebrated the close of its 50th year at the commencement exercises held at the Central Auditorium of the Y.M.C.A. recently. President Edmund J. James conferred the degree of graduate in pharmacy on 50 candidates. The address was made by Thomas Whitfield, who is the only surviving member of the first class graduated by the school—that of 1860. In the evening the alumni of the school had a reunion and banquet at the Blackstone Hotel. Two hundred graduates attended.

Large Attendance at Albany C.P. Exercises.

At the recent 29th commencement of Albany (N. Y.) College of Pharmacy there was a large attendance. Numerous prizes were awarded. After the exercises in Odd Fellows' Hall there was a banquet. The graduating class consisted of the following:

Roy Irving Bauder, Leopold Branche, H. Harden Clow, Harold Way Cole, Charles Thomas Eldridge, Ellis William Eldridge, Michael Giaquinto, Walter John Joseph Hope, Jr., William Henry Jacobs, Guy Walter Knapp, Philip Joseph Krank, Dana William Lawrence, Walter Earl Lawrence, Thomas Ernest Lee, Charles George Mailloux, Charles Ignatus McCarty, John Stoddard McCormick, Paul Alonzo Mead, Arthur John Merriman, Leon Merle Randall, Harry Eugene Roble, Seth Erle Shanks, Daniel J. Shea, James Herbert Spencer, Douglas Reynolds Spiers, Frank Genung Thompson, Thomas O'Neil Vincent, Clarence Robert Whitaker.

College of Pharmacy, University of Memphis.

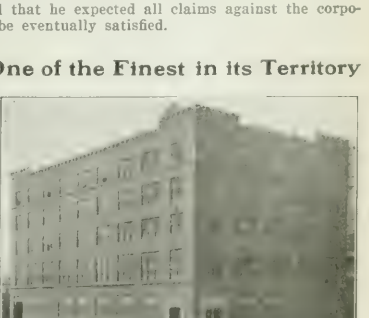
University of Memphis, which is now four years old, has just graduated the following in its College of Pharmacy:

E. S. Conser, W. P. Gallimore, C. E. Gillespie, Fred'k Ulman.

Hegeman Corporation Gets Two Jungmann Stores.

Another step in the bankruptcy proceedings against J. Jungmann (corporation), druggists, New York, was taken early in May when Judge Holt granted an application authorizing Harry S. Patterson, receiver, to sell two of the company's stores, at 1020 Third avenue and 1 East 42d street, to Hegeman & Co. It is stated that the amount of the sale will be something more than $75,000. An inventory made in February valued the stock in the Third avenue store at $67,496, and in the 42d street store at $24,416. The other three stores, at 50 Church street, 488 Columbus avenue and 15 East 23d street, will continue to be operated by the receiver for the present. In an interview with an ERA representative Mr. Patterson said that he expected all claims against the corporation would be eventually satisfied.

Milwaukee Drug Co. Now Occupies New Building, One of the Finest in its Territory



MILWAUKEE, May 20.—The Milwaukee Drug Co. has completed and taken possession of its handsome new building. The structure is one of the fines, and most modern of its kind in the entire drug world. It is of reinforced concrete and brick, five stories high and basement, being located at Michigan and Jefferson streets. It is completely equipped with an automatic sprinkler system, while all stairways and openings are enclosed so that the structure is absolutely fireproof. Nearly 90,000 square feet of floor space are provided for.

The basement is given up to the storage of heavy drugs, bottles, the location of the oil room, sponge room and excelsior rooms, besides the heating plant. The first floor includes handsome offices, sundry department and shipping room. The order department is on the second floor. On the third floor are the laboratory, liquor department and cigar department. The fourth and fifth floors are given up to storage and medicine departments. Every possible arrangement and device to bring about convenience and economy of labor as well as the dispatch of business has been provided for. There are 14 city telephones and 23 house telephones. There are toilet facilities on each floor. Two steel spiral chutes, two electric dummies and an electric elevator system have been installed.

One of the special features is the system of vaults. Two vaults, each 32 x 16 feet, have been installed and are the largest to be found in any mercantile establishment of Milwaukee. One is located on the first floor and will be used for office purposes; the other is on the second floor, where chemicals, explosives and medicines will be stored. The location is especially satisfactory, being diagonally across the street from the postoffice and near all the railroad depots. The officers are: President, Howard Greene; vice-president, treasurer and general manager, William B. Strong; secretary, George A. Moehle.

LEGISLATION, TELEPHONE AND PROPAGANDA.

These the Chief Subjects Discussed at May Meeting of Kings County Pharmaceutical Society.

At the May meeting of the Kings County Pharmaceutical Society Dr. Muir made an interesting report on pharmacy legislation at Albany. Charles Heimerzheim, chairman of the special committee to investigate the question of higher telephone commissions, reported that nothing further was likely to develop in this direction for several months. He was asked to present a report on the society's propaganda work for the past year at the next meeting. In a general discussion Dr. Muir said that every druggist he had interviewed had obtained results from the propaganda. To consummate the detail work all the society's dues, amounting to $1000, had been spent. Few organizations declared such a dividend to their members.

Dr. Muir called attention to the surplus of $8196 in the treasury of the Brooklyn College of Pharmacy and mentioned the fact that the institution had no indebtedness.

The following new members were elected: Ernst Meyer, 4624 Fifth avenue; Paul G. Wolff, 4902 Fifth avenue; Isaac M. Brand, 5424 Fifth avenue; D. B. Sterritt, 1222 Bedford avenue, and Joseph Ehrenwald, 285 Columbus street, all of Brooklyn, and Samuel Schermann, East Islip, L. I. Five were dropped. Treasurer Paradis reported $331 in the society's treasury and college surplus as given above; $115 was ordered to be paid to Secretary Hegeman for expenses.

ILLINOIS TRAVELERS HOLD SUCCESSFUL FEAST.

Prominent Men Participate in Banquet Preliminary to Annual Meeting of I.Ph.A. at Decatur June 14.

CHICAGO, May 20.—The I.P.T.A. banquet given at the Hotel LaSalle recently was an unqualified success. Men of prominence in the professional, political and business world made eloquent addresses, and the large gathering of druggists, salesmen and others enjoyed a very pleasant evening. Lee O'Neil Brown, minority leader of the Illinois House of Representatives; George M. Bagby, assistant corporation counsel of Chicago, and H. W. Miller, newspaper man of Ottawa, all responded to toasts in a fitting manner, and excellent speeches followed by President W. D. Duncan, of the I.Ph.A.; President L. P. Larsen, of the C.R.D.A.; President F. W. Dudley, of the I.P.T.A.; Secretary Thomas H. Potts, of the N.A.R.D., and President B. A. C. Hoelzer, of the Social Drug Club.

The coming Illinois Ph.A. meet at Decatur, Ill., June 14-8, was a topic much discussed among those present and the interest in this subsequent affair was plainly manifest. Decatur being a most accessible city and having excellent railroad connections, it is believed the meeting will have a record attendance. A complete new pharmacy bill will be submitted to the convention, and the formal endorsement of the bill agreed upon for the presentation to the next session of the Legislature is scheduled. Special trains will be run from Chicago, as well as southern Illinois, and the greatest meet ever held in the State is anticipated. There will be a fine programme of entertainment for the visitors, including field events with prizes.

KILLING OF JOSEPH BILL GREATLY DEPLORED.

New York R.D.A. Discusses Telephones and Elects Delegates to State Meeting at Saratoga.

The May meeting of the New York Retail Druggists' Association, held at Burger's, 20 Avenue C, this city, was well attended. The principal business of the evening consisted of the report of the legislative committee and its subsequent discussion. As to the [illegible] the sentiment of opinion was that the members endeavor to obtain slot machines for [illegible] and if nothing better could be done to leave the 20 per cent commission on Manhattan calls and 10 per cent on suburban calls as at present. The fact that the Joseph bill had [illegible] was greatly deplored. It was thought that in the [illegible] have granted other [illegible] and continue reducing the commissions having been [illegible] it would have served as an [illegible] to get the [illegible] to comply with the [illegible]

The [illegible] was called to the annual meeting of the N.Y.Ph.A. at Saratoga. Peter Diekman, Dr. Joseph Weinstein, Charles Bernstein, I. Z. Godfield, G. Goldblood, R. Strass; alternates, George J. Palitz, B. Collé, J. Almour, J. A. Klein, B. Miller and D. Berkman. It was voted to send $50 to the N.Y.Ph.A. as a contribution. Two new members were elected: J. Felberg and H. Perlman.

The association endorsed Dr. George C. Diekman as a member of the Board of Pharmacy to succeed himself in case the present law is not changed.

PHILADELPHIA A.R.D. TAKES UP NEW ISSUES.

Registration Bureau for Clerks, Liability Insurance, Legislative Candidates Interest the Members.

PHILADELPHIA, May 20.—New issues which would enhance the value of membership in the Philadelphia Association of Retail Druggists was the feature of the May monthly meeting. The opening of a registration bureau for clerks, to be conducted by the association's representative, J. H. Barlow, was unanimously agreed upon after it had been recommended to the meeting by Chairman J. N. G. Long in his report for the executive committee. The majority favored the no-fee system and supported the claim that here was another valuable incentive to join the association.

The other issue was that of liability insurance. D. J. Reese, second vice-president, had been appointed chairman of a special committee to investigate the system and its advantages when taken up by the association as a whole. By the latter plan, it is believed that a considerable saving can be secured to members. Mr. Reese stated the results of his interviews. All of them showed that the companies were anxious to treat with the organization and thereby be assured with little trouble of a large amount of business from so strong an organization whose insurance policies of this character are now widely scattered. As some of the companies had not been able to make a final proposition, owing to lack of time, the investigation by the committee was ordered continued.

Another evidence of the steady interest in the work of the association was furnished by the report of William A. Carpenter, chairman of the membership committee, who submitted the names of eight applicants. All of them were elected.

Charles Leedom called attention to the candidacies of two prominent members of the association for re-election to the Legislature. They were Theodore Campbell and E. H. Fahey. Representative Barlow had been circulating petitions among the druggists in the respective districts favoring the return of Messrs. Campbell and Fahey.

National Wholesale Association Now Incorporated.

At Washington in May the National Wholesale Druggists' Association was incorporated, under the law governing incorporations in the District of Columbia. The incorporators were: Charles A. West, chairman committee on legislation, Boston; Dr. William Jay Schieffelin, New York; Albert Plaut, New York; Thomas F. Main, New York; C. Mahlon Kline, Philadelphia; George D. Kauffman, Columbus; Charles W. Whittlesey, New Haven; W. L. Dewoody, Pine Bluff, Ark.; W. S. Amos, Kansas City, Mo.; F. E. Holliday, general representative, New York; J. E. Toms, secretary, New York. The trustees are the members of the board of control. The action was authorized at the last annual meeting of the association and qualified the N.W.D.A. delegates for participation in the Pharmacopœial Convention.

New Officers and Banquet for Chicago Bowlers.

CHICAGO, May 20.—The Social Drug Club Bowling League celebrated the close of the season with a banquet at the Boston Oyster House on May 3, and 40 members and invited guests partook of an elaborate spread. The officers for next year were elected as follows: President, O. W. Schmidt; first vice-president, J. F. Forbich; second vice-president, H. F. Mathews; secretary, J. M. Schwalbe; treasurer, H. F. Shaper.

Pharmacy Legislation Discussed by Chicago Drug Men.

CHICAGO, May 20.—The Chicago Retail Druggists' Association held a special meeting recently in the Northwestern University Building for the purpose of discussing, criticizing and revising the complete draft of the new Illinois pharmacy law, which was presented by Mr. Wells, Chicago member of the committee on legislation of the Illinois Ph.A. The meeting was well attended.

W. S. MERSEREAU, AGED 73 YEARS.

For Over Half a Century Engaged in Drug Trade in New York City.

William S. Mersereau, for four years first vice-president of Schieffelin & Co., New York City, and connected with this wholesale drug firm for the past fifty-five years, died recently after an illness of six weeks' duration, in his home at Elizabeth, N. J. Mr. Mersereau was born in New York City in July, 1837, and began his business career at Hempstead, L. I., where he engaged in the retail business. In 1855, he became connected with Schieffelin Bros. & Co. and shortly thereafter assumed charge of the entire business in New York City and later took charge of considerable of this firm's export and import operations. From 1880 until 1903, he was a partner in the business and when at the latter date it became incorporated under the present style he was elected second vice-president.

The following minute was adopted at the recent meeting of the Metropolitan Drug Club, of this city:

"*In memoriam*, William S. Mersereau. He laid down life's burden on May 14, 1910, having been engaged in the wholesale drug business for a period of fifty-five years. A man of gracious and winning personality, of unswerving integrity, of wide and varied information, his counsel was frequently sought and was always at the service of his fellow laborers in the trade, and we, the members of the Metropolitan Drug Club, who from close association knew and valued his sterling character and highly esteemed and respected him as a man and merchant, hereby record our profound sorrow at his decease, and convey to the officers of the corporation which he served so faithfully, and to the members of his family, our sincere sympathy in the more intimate loss they have sustained."

Remarks relative to Mr. Mersereau's high character and long service in the trade were made at this meeting by W. P. Ritchey, C. S. Littell, Jacob Weil, W. O. Kuebler, Joseph Plaut and others.

Mr. Mersereau was twice married, his first wife dying 18 years ago. By this first marriage he left four children: William T. R. Mersereau, Charles M. Mersereau, Mrs. Alice Teimpson and Miss Frances H. Mersereau. Mr. Mersereau was an active member in his church at Elizabeth. He was a member of the New York State Pharmaceutical Association.

Ferdinand T. Yahr, Successful Wholesale Merchant.

MILWAUKEE, May 20.—Ferdinand T. Yahr, president of the Yahr & Lange Drug Co., well known wholesale house, died recently after an illness of only four weeks. He was 65 years of age. Mr. Yahr was born at Heltrungen, Prussia, December 17, 1834, of parents who were sturdy German stock of long lineage. He received a common school education and in 1849 he came to Wisconsin, settling near Watertown. There he resided until 1853 when he moved to Berlin, where he lived until 1861, then moving to Princeton, Wis.

Mr. Yahr was prominent in public affairs at Princeton, holding many minor offices, and in 1890 he was elected to the State Senate and two years later was a presidential elector, casting his vote for Grover Cleveland. While at Princeton he first became interested in the Charles Baumbach Drug Co., of Milwaukee. Several blocks of stock were purchased at different times and it was not until 1897 that he bought the stock of Charles Baumbach and became sole owner. The name was changed July 1, 1900, to the Yahr & Lange Drug Co. Since that time the business has been very successful and Mr. Yahr dies leaving an estate of $315,000. Besides his wife he is survived by six children. Mr. Yahr was a thirty-third degree Mason and a member of several societies and clubs.

Venerable New York Druggist and "Forty-niner" Dies.

UTICA, N. Y., May 20.—William Blaikie, probably the oldest druggist in the State, died recently here, aged 88. He had conducted a drug store in Utica since 1854. Mr. Blaikie was a "Forty-niner," going to California by way of Cape Horn at the beginning of the gold fever. During the Civil War, as an abolitionist, he made his home a station on the "underground railroad," thus aiding in the escape of many slaves. In later years he was a leader in the State movements designed to prevent cruelty to children and to animals and gave liberally to promote organizations having such purpose. Seven years ago, accompanied by his daughter Margaret, he made a six weeks' visit to Scotland, his native land, where he visited Andrew Carnegie at Skibo. From 1878 until 1908, he was president of the Utica Savings Bank, and also officiated as president of the St. Andrew's Society in Utica.

TWO PROMINENT WHOLESALERS WHO DIED RECENTLY.

The late WILLIAM MERSEREAU, of New York City.

The late FERDINAND T. YAHR, of Milwaukee, Wis.

Two Drug Store Owners End Lives With Poison.

In Westchester Village, this city, Edgar Ferris, 59, head of Ferris Bros., recently took a fatal dose of carbolic acid. Ill health and nervousness due to overwork was the cause. He was wealthy. A widow and daughter survive.

In Bridgeton, N. J., Harry Kirchhoff, when informed that he had been indicted for selling liquor illegally, took a dose of poison and died in a few minutes.

Obituary Notes.

—FRANCIS S. WARNER, 55, who for the last 30 years had a drug store at 37th street and Seventh avenue, Manhattan, died in his apartments, in the Knickerbocker apartments, at Riverside Drive and 97th street. A widow and one brother, Willard Warner, of Washington, D. C., survive.

—DORA J. EVANS, wife of W. Ashton Evans, a Washington druggist, died on May 22. She had been active in Washington Chapter, W.O.N.A.R.D., and was one of its most beloved members. She is survived by a husband and two children.

—WM. A. MOLL, owner of the Elker Drug Co., manufacturers, Manhattan, is dead in Brooklyn, aged 44; is survived by a widow and three daughters.

—WM. H. CARSLAKE, Bordentown, N. J.; survived by widow and brother, Geo. M. Carslake, manufacturing druggist.

—BENJ. G. TEMPLETON, 60, vice-president Tartar Chemical Co., Manhattan; pneumonia, Brooklyn; widow and daughter.

—MRS. E. E. BRUCE, 55, wife of president of E. E. Bruce & Co., Omaha; failed to survive surgical operation.

—F. W. REEVES, 82 Park avenue, Brooklyn, N. Y.; died suddenly of a complication of diseases.

—EDWARD C. WILL, 37, of McBride & Will, Marshalltown, Iowa; diphtheria; widow survives.

—EDW. S. NOTT, 64, Hamburg, N. Y.; widow and daughter.

—GEO. WEINSBERG, So. St. Louis veteran; family survives.

—FREDERICK P. CARTER, 82, retired, Brooklyn, is dead.

—GIDEON S. CALDER, 76, Providence, R. I.; bachelor.

NOTE—*A, advanced; D, declined; C, correction; N, new.*

See page 632 and following pages for Prices Current.

NEW YORK, May 25.—Although dealers in drugs and chemicals report the general market quiet with business chiefly routine, the consensus of opinion is that the aggregate volume is fully equal if not in excess of that of the corresponding period last year. There have been quite a number of price changes, but not all of them have been in favor of the seller. Opium is quiet with quoted prices somewhat nominal. Quinine continues steady, but without new feature. Tonka beans show quite a range of prices, while guarana is easier owing to free offerings from producing points. Jalap root is firmer with the outlook favorable to an early advance. Cape aloes is selling at the inside quotation. Porto Rican bay rum is getting scarce and prices are higher. Buchu leaves, both long and short varieties, continue scarce and firm. Star aniseed quotations have been again advanced. Cod liver oil is receiving considerable attention and the trend of values is upward. Grains of paradise are firmer owing to scarcity, and prickly ash berries are much higher. All iodides have been advanced 10c. per pound and all bromides 5c. per pound below [illegible].

Opium is unsettled at present, heavy buyers and absent but there is no material improvement in demand, and business is of a [illegible] character. Jobbers are asking $6.10@$6.35 per ounce, $6.70@7.00 for granulated and $7.20@$7.40 for U.S.P. powdered.

Quinine [illegible] continues to move only in a limited routine way and the market remains a quiet appearance with manufacturers' prices steadily maintained on the basis of 14c. for bulk in 100-ounce tins. At the auction sales in Amsterdam on May 6 there were sold 1400 kilos of the sulphate at 10.52 florins per kilo, an advance from 10.37 florins per kilo, the ruling price at the April sale. Cables received on the 19th instant report the bark shipments to Europe for the first half of May to be 270,000 kilos.

COD LIVER OIL—Norwegian has materially advanced since our last report, quotations now being on the basis of $32@$34 per barrel, as to brand, quantity and seller. Cables received on May 16 regarding the progress of the fishing this season to date report the official figures as follows: 48,600,000 fish yielding 31,250 barrels of oil, against 50,600,000 fish and 39,815 barrels of oil for the corresponding period last year. While the total production is 8565 barrels less than that of last year, the shortage is not as large as was expected a few weeks ago.

HAARLEM OIL—Prices have been advanced sharply owing to reduced stocks and adverse rulings by the customs authorities, and the price has been advanced to $5.75@$6.00 per gross with the prospect of still higher prices in the near future.

BAY RUM—Owing to the continued scarcity in this market and also to the advance in cost of importation, Porto Rican has been marked up to $1.75@$1.80 per gallon by the barrel, and $2.00@$2.15 per gallon for less.

BUCHU LEAVES—The demand continues active and jobbers are asking $1.00@$1.10 per pound for long and 90c.@$1.00 for short. In London, it is reported, but little business in the leaves is now possible owing to spot scarcity. Cables received last week from several Cape Town exporters state that there is nothing to offer.

GUARANA—This article is quiet and easier, the nominal range of quotations being $3.00@$3.15. Those who are supposed to know say that values have apparently started on a downward movement on reported prospects of a distinct improvement in the supply to be offered in the near future.

TONKA BEANS—Angostura continue to harden in price owing to continued scarcity and spot quotations for jobbing parcels show a further advance to $1.75@$2.00 per pound, as to quantity and seller.

SERPENTARIA—Virginia snakeroot is firmer and jobbers have advanced their quotations to 72@80c. per pound. Reports are current that bids are being solicited for forward shipment of new crop but no actual figures are named and spot holders maintain firm views.

OIL BERGAMOT—Is easier and recent [illegible] show a lower range for leading brands. The present ruling market prices for prime grades are $4.25@$4.40.

PRICKLY ASH BERRIES—Continue scarce, with the limited stock closely concentrated and quotations ranging from $2.25@$2.35 per pound. The bark is also higher, 33@38c. per pound being asked.

CAPE ALOES—While our quotations show an apparent decline, this variety of aloes is firmly held at 22@27c. per pound. Curacoa aloes is also firmer owing to light spot stocks and the report that there is no more stock to come forward from primary sources of supply.

STAR ANISEED—Holders have advanced their quotations for prime quality to 26@33c. per pound.

BALSAM PERU—True remains in low supply and while most jobbers quote $2.00@$2.15 for quantities usually bought by retailers these prices for case lots can be shaded considerably.

MASTIC—Prices are fairly steady for desirable grades. Mail advices recently received are to the effect that it will require fully six months before the new crop can be shipped and the actual existing small stocks are in the hands of strong holders. The producing shrubs are said to have suffered greatly by strong land winds.

CODEINE—Manufacturers have reduced prices and jobbers quote $4.50@$4.65 per ounce for alkaloid and $4.40@$4.60 per ounce for phosphate.

GOLDEN SEAL ROOT—Is quoted at $2.40@$2.55 per pound, but [illegible] within [illegible]. Are expected and lower prices are looked for.

WAX, CARNAUBA—Continues [illegible] good export demand and small available stocks, and quotations have been advanced to [illegible] for No. 1. Reports say [illegible] Brazil and prices have been marked up to 30@36c. per pound.

Just 1311 formulas are given in the new edition of the Dispensers' Soda Water Guide. Every fountain operator needs it.

Our Advertising is Making New Customers For You

We are spending $150,000 in national magazines to help you sell the best dyes in the world.

For no one who reads our advertising can withstand the provable superiorities—provable by chemical analysis, provable in actual results—of Diamond Dyes.

Through this advertising we are telling hundreds and hundreds of women right in your vicinity of the possibilities, the economy, the virtues of Diamond Dyes.

And a word from you, the Diamond Dye card displayed, the literature on the counter, will make frequent sales.

Every sale so made, with your recommendation, will win a lasting customer, keep the old ones and so help other sales in your store.

DIAMOND DYES

Are MADE RIGHT and WORK RIGHT

There is no guess work with Diamond Dyes, you can recommend them to your customers and be sure they will be satisfied with the results.

Any dye chemist will tell you there is no "theory" behind Diamond Dyes and that they are made chemically correct—their action positive and the results certain.

A pleased customer is a steady customer. You can please your trade by carrying a full assortment of Diamond Dyes and recommending their use.

Be sure you take advantage of our advertising.

FACTS THAT WILL HELP YOU

Always be sure that your customers get the right kind of Diamond Dyes for the materials they intend to dye. For while it is almost impossible to fail with Diamond Dyes, if the directions are carefully observed, it is imperative that the right dyes be used.

Frequently customers want to know why one dye won't do for any kind of materials. Then, tell them this:

Wool, silk and like materials are made up of animal fibres, while cotton, linen and mixed goods are composed of vegetable fibres, which are entirely different in composition and slower to take up the dye. And the only way to get absolutely sure and satisfactory results is to use the kind of dye especially adapted to the fabric. This is supported by the authority of all the most eminent dye-chemists.

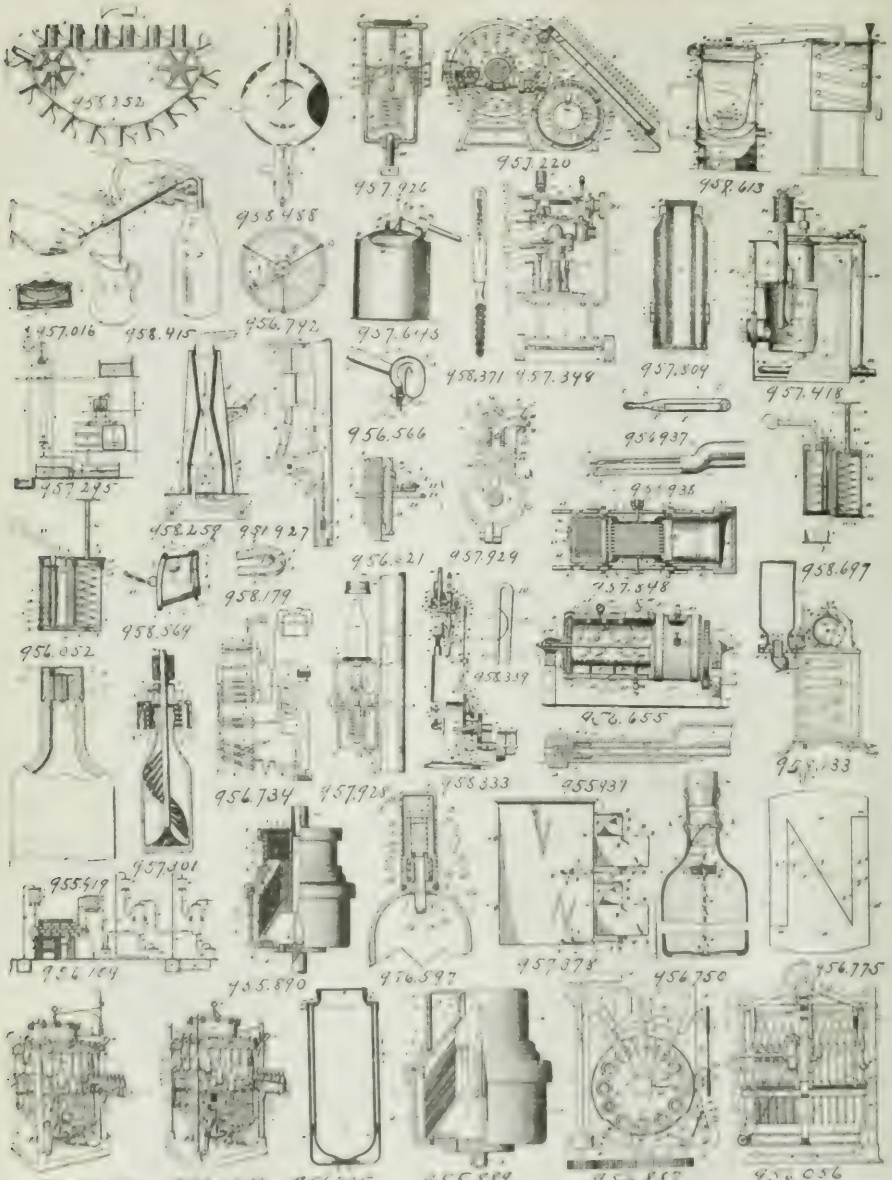
If care is taken to secure the proper dye, there is positively no reason for failure. For dyeing at home with Diamond Dyes is just as simple, as sure of success, as washing a shirt-waist.

But be sure to explain carefully the reasons for the separate dyes. For every imitation that is sold undermines the confidence of your trade in the possibilities of home-dyeing and kills possible profits.

WELLS & RICHARDSON COMPANY

BURLINGTON, VT.

PATENTS, TRADE MARKS, ETC.—(See Page 614.)



PATENTS.

Granted April 26, 1910.

955,352—Thomas E. Marshall, Poughkeepsie, N. Y., assignor to DeLaval Separator Co., Jersey City, N. J. Apparatus for clarifying and filtering liquids and like substances.

955,589—Thomas B. Marshall, Centrifugal clarifier and filter.

955,937—Christian W. V. Mosse, Copenhagen, Denmark. Apparatus for closing bottles.

956,056—John Stephen, Valhalla, Eng. Non-refillable bottle.

956,285 and 956,286—Jules E. Bucherer, Lucie O. Atomizer.

956,375—Frank C. Bennett, Detroit. Locket atomizer.

PAPE'S DIURETIC

A MILLION DOLLAR ADVERTISING CAMPAIGN

A million dollars spent within the next year in an Advertising Campaign to introduce PAPE'S DIURETIC and PAPE'S DIAPEPSIN to the public, certainly means some big, profitable business to wide-awake druggists throughout the United States and Canada.

NO drug stock is complete without Pape's Diuretic and Diapepsin. Your very best patrons will want them. Don't disappoint them by telling them: "We haven't got these splendid preparations," or, "We're just out."

PAPE'S DIURETIC is for the Kidneys and Urinary Disorders. The formula is on each package. Nearly every newspaper in North America will bring this effective remedy before millions of people, in large announcements to be run nearly every day. Almost every street-car will have an effective card. In addition to the immense *newspaper* advertising appropriation, we will spend *more* money to tell about PAPE'S DIURETIC on Billboards, in Magazines and in other modern advertising ways.

YOUR wholesaler is waiting for your order *now*. The price is $4.00 per dozen, with the usual discount allowed for quantity orders.

PAPE'S DIAPEPSIN has scored a wonderful success and the new and increased advertising will make this splendid preparation the *distinct leader* in its class. Your customers like Diapepsin because it *does* what is claimed for it—bringing relief to out-of-order stomachs.

WE will spend about *twice* the amount in advertising this season that we did during last season's record breaker. Your Diapepsin customers are valuable. They are of the better class of men and women. If *you* recommend Diapepsin, you usually make a friend —a friend who, in turn, will recommend you. *Try this.* All the larger stores find profit in doing it.

HERE'S a *business* proposition: *Buy* Pape's Diapepsin and Pape's Diuretic, to get the *best* discounts wholesalers allow. Our advertising and the results of the use of both remedies will increase the demand for them. It is wasteful to buy a *few* packages. They are *staple* as any proprietary in your stock. Buy in *quantity* and keep the *discounts* yourself.

BOTH Pape's Diapepsin and Pape's Diuretic are $4.00 per dozen from *any* legitimate wholesaler in the world.

THE PAPE, THOMPSON & PAPE CO., Cincinnati, Ohio.

PURE ALKALOIDS

There is no class of medicinal chemicals in which extreme purity and uniformity are of greater importance than in the Alkaloids. Consistent with the high standard of excellence which we strive to maintain in all of our products, our Alkaloids may be relied upon to conform to the most rigid requirements for purity. Special attention is directed to the following:

Cocaine Hydrochloride, Codeine Alkaloid and **Sulphate, Atropine Alkaloid** and **Sulphate, Apomorphine Muriate Crystals, Aconitine, Caffeine, Caffeine Citrated, Digitalin, Diacetyl-Morphine, Diacetyl-Morphine Hydrochloride, Hyoscine Hydrobromide, Homatropine Hydrobromide, Ethyl-Morphine Hydrochloride, Morphine Sulphate** and **other Salts of Morphine, Pilocarpine Hydrochloride, Scopolamine Hydrobromide, Strychnine Alkaloid** and **Salts, Etc.** ***Specify "M.C.W."***

MALLINCKRODT CHEMICAL WORKS

ST. LOUIS **NEW YORK**

AGENCY FOR *Whitman's* CHOCOLATES AND CONFECTIONS

A Sign that People are Seeking

"With money in their hands"

Our system of selling our package Chocolates and Confections through selected, protected sales agencies makes it a little difficult, sometimes, for the public to buy Whitman's.

Whitman's are not "on sale everywhere."

Every mail brings inquiries "Where is your agency in——?" ranging all the way from Eastport, Maine, to Santa Barbara, California

We limit our sale to protected agencies and cultivate close relations with each agent, endeavoring through each store to supply *fresh* packages to all the fine candy trade that it can possibly reach. We send inquiries to his store, advertise him to the best people by *direct advertising*. But we can't reach the transient trade. He must attend to that.

The costly "general advertising" of Whitman's in the leading publications is all in the interest of the local agent.

The store that has the Whitman agency does wisely to see that the outside display signs are large enough and striking enough to let everyone who passes by *know* that the Fussy Package (and all the others) can be bought inside.

Millions of well-to-do Americans who want the best are hunting the Whitman agent everywhere.

If you have the agency—or if you should get it—*let these people know.*

Write for new catalogue of packages in true colors, samples of advertising matter and our offer to the leading druggist.

STEPHEN F. WHITMAN & SON, Inc., FOURTH AND RACE STREETS *Philadelphia, U.S.A.*

PROPRIETORS RE-ELECT PRESIDENT CHENEY.

In His Annual Address, He Says That Association Need Only Fight Legislation, Not Doctors.

In his address at the 28th annual meeting of the Proprietary Association of America, held recently at the Hotel Astor in this city, President Frank J. Cheney, of Toledo, Ohio, said that the association need only fight legislation. "It is not necessary to fight the doctors," he added. "The American Medical Association is getting weaker yearly and the doctors are fighting among themselves. The doctors are the proprietors' best friends." He said that the policy of the association had been criticised as too conservative, but he thought that conservatism was the best policy.

Other subjects to come up for discussion were the parcels post bill, the raising of freight rates throughout the country and recent rulings of the U. S. Board of Food and Drug Inspection. George L. Douglass, attorney of the association, advised the members on numerous legal points relating to their various businesses. The following officers were elected: President, Frank J. Cheney, Cheney Medicine Co., Toledo; first vice-president, John W. Kennedy, J. C. DeWitt Co., Chicago; second vice-president, A. H. Beardsley, Pa. Mexican Co., Lockport, Ind.; secretary-treasurer, Ernest C. Pitcher, Hillrod Manufacturing Co., New York. Executive committee consists of: J. F. Hindes, Emerson Drug Co., Baltimore; W. H. Gove, Lydia E. Pinkham Medicine Co., Lynn, Mass.; R. R. Land, Binghamton, N. Y.; D. M. Newbro, The Herpicide Co., Detroit; J. A. Patten, Chattanooga Medicine Co., Chattanooga; W. E. Weiss, The J. W. James Co., Wheeling; J. B. McFatrich, M.D., Murine Eye Remedy Co., Chicago.

G. BARRET MOXLEY IS PRESIDENT.

Succeeds His Father-in-Law as Head of the A. Kiefer Drug Co., of Indianapolis.

At a special meeting of the stockholders of the A. Kiefer Drug Co., Indianapolis, the board of directors of the association, which had consisted of five members, was increased to seven. The following now compose the directorate: Thomas A. Alford, G. Barret Moxley, Charles Mayer, M. P. Lynch, Frederick G. Beckman, C. J. W. Parker, Jr., Oscar C. Maurer. The new board of directors elected the following officers: President, G. Barret Moxley; first vice president, Charles Mayer; second vice-president, M. P. Lynch; secretary and treasurer, J. Edward Stilz. The business will be continued without interruption, in accordance with the wishes and life-long purpose of Mr. Kiefer.

Charles Mayer, first vice-president, is a son-in-law of Mr. Kiefer. Mr. Moxley, who was first vice-president and is now president, was a son-in-law, but his wife died a few years ago. Mr. Kiefer had always spoken of him as "my son." All the directors and all the officers with the exception of Mr. Mayer, have long been employees in the house, and were given interest therein by Mr. Kiefer, who appreciated their faithful service. His wish was that the house he had founded should continue under his name and be his monument.

MR. LAMB FINED $25 FOR FIGHTING THE LAW.

Judge Who Decides Suit Says Constitutionality of Registration Fee of $2 Was Settled 10 Years Ago.

Thomas Lamb, of 84 Court street, Brooklyn, who has been futilely fighting the New York State Board of Pharmacy for the last years to avoid the penalties exacted by Judge Isaac Sanders in the Fifth District Court to pay his annual $2 registration fee and was fined $25 for his negligence in not doing so at the proper time. Judge Sanders was a member of the legislative committee which passed upon the present pharmacy law before it was enacted and he and his associates at that time endeavored to provide for every possible contingency which might arise. The present situation was thus anticipated and the recent decision to the effect that the provision for an annual registration fee was constitutional was exactly on a line with that arrived at in committee ten years ago.

Mr. Lamb filed suit and accepted the provisions for registration but did not tender the requisite $2 fee. A letter of notification was sent to him by the board that his application was irregular and an official application form was included. Assemblyman Robert Conklin, attorney for the Greater New York Retail Druggists' Protective Association, replied on behalf of Mr. Lamb, enclosing in the letter a form of application for the latter. Mr. Conklin requested that the matter be brought into court as a test case since a score of Brooklyn druggists, actuated not by any financial consideration but in defense of a principle, were concerned as well as his particular client. He desired that the facts be submitted to the court and a decision asked for. In compliance with his request, the attorneys for the board, Steiner & Petersen, prepared a submission of controversy which was voluminous. This they sent to Mr. Conklin at Albany, at the same time asking the the latter to have his client, Mr. Lamb, execute the same in order that the questions involved might be submitted to the Appellate Division at the first instance. After a delay of several days, Mr. Conklin replied that his client had changed his mind and that the Protective Association would fight the case. The result was as recorded above.

PROMOTION REWARDS ABILITY AND SERVICE.

New Manager of Lilly's Chicago Branch Entered Drug Business When a Boy—Always an Active Worker.

CHICAGO, May 20.—Announcement has been made of the appointment of William McGibbon, of Grand Rapids, Mich., to the managership of the Chicago branch of Eli Lilly & Co. to fill the vacancy caused by the death of Albert H. Chatkins.

WILLIAM McGIBBON

Mr. McGibbon entered the drug business as a clerk in a retail store when a school boy in Bay City, Mich. At the age of 18 he went on the road. In 1904 he entered the service of Eli Lilly & Co., having Michigan as his territory. Mr. McGibbon has been an active worker in pharmaceutical associations, especially in the travelers' auxiliaries. He is a member of the Episcopal Church and a 32d degree Mason. Personally Mr. McGibbon is a most companionable man. His obliging disposition, fair dealing, indefatigable industry and thorough knowledge of the drug trade have made him peculiarly successful as a business getter. His promotion comes as a recognition of special ability and service.

FOUND GUILTY OF SUBSTITUTION.

Canadian Court Convicts Prominent Cut Rate Druggists of False Pretenses.

Montreal, May 20.—A verdict of guilty of false pretenses was rendered against Hubert H. Lyons, proprietor of the well-known cut rate drug store in that city, and the same charge was brought against Patrick Sullivan, of Lyons and Montgomery, proprietors of the Golden Pestle Pharmacy.

This was done in the case of prescriptions calling for the latter preparation and also when customers asked for Pepto-Mangan. Pestle Pharmacy was purchasing it at 25 cents and Montreal pharmacies at 49 cents per bottle, whereas its retail price per bottle is $1. Customers secured through this [illegible] were [illegible].

Sometimes Pasteur's Solution was sold as Pepto-Mangan at the Pepto-Mangan price, the evidence showing price charged and preparation dispensed to be entirely optional with the clerk, Gude's Pepto-Mangan only being dispensed when the name of the manufacturer was given. A fine was imposed.

Special credit is due to Henry Miles, of the firm of Lamplough, Miles Co., Ltd., agents for Pepto-Mangan in Canada, in working up the case. The preparation is manufactured by Dr. A. Gude, of Leipsic, and completed by M. J. Breitenbach Co., New York.

Subsequently three more charges were made against Lyons under the Proprietary Medicines Act of 1908 for not having proper labels on the substituted goods mentioned above. The prosecution is by the Dominion Government.

TRYING TO FORCE PAYMENT OF OBLIGATIONS.

Forty Cases Against a St. Louis Publisher, in Some of Which Rural New Yorker Charges Bad Faith.

Rural New Yorker, of April 16, contains an interesting article showing how easy it is for some people to lend their money to other folks and how hard it is to get any returns, except in the form of paper promises or excuses. *Rural New Yorker* makes special complaint against E. G. Lewis, or the Lewis Publishing Co., St. Louis, Mo., naming about 40 instances in which persons lent money to Lewis, or his corporations, in a few cases recovery having been effected after maturity upon publishing the facts. One case where payment had not been made at last accounts was that of an old Texas soldier who lent Lewis $400 which he was holding in trust for an old woman. A note was given for the money, but the old soldier was unable to collect on it when it expired last December. Says *Rural New Yorker*:

"It is an old trick of fake financial promoters to have different forms of so-called securities to offer their deluded customers. When a patron becomes suspicious or dissatisfied with one security, in a great burst of apparent frankness and fairness, they offer him another stock or bond or certificate of some sort, in exchange for the original investment. This allays suspicions and fears for a while, and most important of all, it gives the promoter time to go ahead with his schemes.

"Lewis first sold the bank stock. Then he gave his notes for the stock. After that he traded stock in his publishing company, or his real estate company for the notes. The people who refused to make these exchanges had an offer to take Trust Company stock and those who accepted got an 'interim receipt.' The two women at North Tarrytown, N. Y., refused all temptations to change the notes for anything except cash, and they now have their money. This old soldier loaned the money that he had in safe keeping for an old woman. He returned Lewis' note on the written promise that a check would be sent for it. In return he got an 'interim receipt' entitling him to stock in a trust company later on, and not a word of explanation for refusing to send the check as promised.

"The Texas Mexican check for $5000 is based on a note similar to those held by Mrs. Orton and Mrs. Dinsdale, and the [illegible] Lewis deliberately used and said that Mr. Johnson, the postmaster, demanded a fee for collecting the money, and offered that as an excuse for not paying the notes. We proved conclusively by the papers that there was not even a semblance of truth in this pretense. What excuse has he now for not paying this Texas note, which is more than a year overdue, and on which interest payments were defaulted for over three years?"

BOWLERS WHO TOOK PART IN RECENT TOURNAMENT.

Group picture of members of the New York, Baltimore and Philadelphia teams at second championship tournament of American Drug Trade Bowling Association, held at Atlantic City, May 6-7.

A.D.S. IN BUSINESS AS LE BAR & BAILEY?

Store C. H. Goddard Said He Was Interested in and Another on East Side Use Same Buying Name.

The management of the drug store at 70th street and Broadway, New York City, in which C. H. Goddard, secretary of the American Druggists' Syndicate, at the recent stockholders' meeting, announced himself to be interested, is at the present time conducting business under the firm name of Pond, Bowes & Cartwright. The manager denies any knowledge of Mr. Goddard's connection with the store. It was understood that after May 1 the store was to have been renovated to the extent of $12,000 expenditure, which would include new windows, extension of the store, etc. It is also understood that all checks are signed LeBar & Bailey. A block from the site of Mr. Goddard's venture, corner of Amsterdam avenue and 71st street, is a store of the Riker chain. Immediately across the street is the store of H. A. Willmott, 220 Amsterdam avenue, a member of the A.D.S. An ERA representative was informed at the latter location that they had met with no competition whatever from Mr. Goddard's store.

Business is being conducted in a small drug store situated in Second avenue, between 70th and 71st streets, under the buying name of LeBar & Bailey. The young man in charge has been employed in this situation for two weeks. He said that the store would be given a specific name in several days. He denied any knowledge of Mr. Goddard's connection with the store. Other druggists in the vicinity said they had not suffered from competition arising from this source.

As the ERA goes to press, a huge sign has been erected over the latter location. On it is painted in large letters the name "Yellow Front Drug Store" and a notification that business is being conducted under new ownership and managership. The clerk said that LeBar & Bailey were the owners of this store and also of that at 70th street and Broadway.

It is understood that measurements have been taken for the proposed extension of the Broadway store, but the ERA representative observed no changes in its general appearance.

Philadelphia Wins Bowling Championship.

ATLANTIC CITY, May 20.—In a [illegible] which far surpassed in its features any match in the previous history of the American Drug Trade Bowling Association, the team of the Philadelphia League won the championship on May 7 with a total of 18 points. The New York team was second with 17 points and Baltimore third with a total of 10 points. Enthusiastic supporters, representing the drug trade of the three cities, were present in force. [A picture of the bowlers who took part in the match is printed on this page.]

MARCHAND'S
MEDICINAL PREPARATIONS

If you, Mr. Pharmacist, had devoted over *a quarter of a century* to the manufacture of five high grade preparations with only one standard of purity and uniformity, wouldn't you feel they were better than those made by a newcomer?

Then, is it any wonder we are proud of *our* preparations?

We were the first to manufacture Peroxide of Hydrogen (Marchand's) for medicinal purposes—that was thirty-one years ago—we are the PIONEERS.

PHYSICIANS KNOW

That MARCHAND'S PEROXIDE OF HYDROGEN (medicinal, 15 Vol.) is superior, because it is 50% *stronger* than the ordinary U.S.P., 10 Vol., and because it contains *NO ACETANILID*, and is absolutely free from any impurities.

That HYDROZONE (30 Vol.) is *THREE TIMES AS STRONG* as the ordinary preparations, and that it is the *most powerful of all germicidal agents*, yet is *absolutely non-poisonous.*

That GLYCOZONE ($C_3H_6O_4+C_3H_8O_3$), because of its remarkable properties is of signal value when applied to inflamed mucous membranes or other tissues. It is especially serviceable in acute and chronic forms of gastritis, intestinal catarrh, gastric ulcer, etc.

HYDROZONE AND MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) are put up in the best quality of flint glass bottles, for the reason that flint glass is not so brittle as amber glass. This, in connection with Marchand's improved process of manufacture, reduces the risk of breakage to a minimum.

When a prescription or a request comes to you for MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal), HYDROZONE, GLYCOZONE, MARCHAND'S EYE BALSAM or the DREVET MFG. CO.'S U.S.P. H_2O_2 Official, see that it is dispensed and no attempt made to urge anything else upon the customer.

Your profit is LARGER than it would be if you urged the sale of an inferior article.

BUSINESS NOTICES

Cigar Trade in Drug Stores.

Among the new advertisers in this issue of the ERA is Johnson & Co., of 152 Federal street, Boston, who are making a specialty of assisting druggists to increase their cigar business and put the same on a more satisfactory and more profitable basis.

In a recent interview with Mr. J. H. Johnson, the head of this concern, he stated as follows: "The price-cutting evil in the cigar trade has developed into a mania, and in many localities druggists are selling popular brands at cost, and in some cases at less than cost. There is no reason why any druggist who will exercise average business judgment cannot make his cigar department one of the most profitable lines in his store. The cigar business in some respects is like the proprietary medicine business, or any other line of proprietary goods. A great deal of money is spent advertising leading brands of cigars, and unless the retailer is protected in the selling price it is only a question of time when such brands will be used as 'baits' by some cutter, and very soon thereafter everybody else in that town must fall into line and sell at the cut price.

"Our policy is to protect the retailer in his profit, and under no circumstances do we supply our goods to any retailer who will not keep up our established retail prices. This not only protects the dealer in his profits, but prevents some other retailer from cutting into his trade on these brands. We also limit the number of retailers who handle our goods, and try to give each dealer as much territory as legitimately belongs to him. In the smaller places we give exclusive agencies, and in larger places exclusive sections of the city.

"We also have a special plan which we carry out with our agencies of furnishing them with a percentage of free goods on all of their orders. This is in lieu of the usual discount for quantities, and works out most satisfactorily and beneficially to our customers.

"We are able to supply fully as good or better grades of cigars for the same price, than a dealer can buy through his regular jobber, because we deal direct with the retail trade. We have been successful in assisting a number of leading druggists in New England to place their cigar business on a thoroughly satisfactory and profitable basis, and we are desirous of extending our connections with the better class of druggists, not only through New England, but in all sections of the United States.

"Our plan calls for no unusual purchases or expense on the part of the dealer, but we gradually work his trade over to our lines for which he is exclusive agent, and we put the dealer in a position where no competitor can come in and kill his profits or take away his trade."

Pape, Thompson & Pape Co.'s Publicity Campaign.

Pape, Thompson & Pape Co., of Cincinnati, Ohio, manufacturers of Pape's Diuretic and Pape's Diapepsin, are spending thousands of dollars to acquaint the public with these remedies and their value in various diseases. This advertising campaign is being carried on through newspapers, by means of cards in street cars, on bill-boards and in other ways. Both of these preparations are already well known and this campaign of publicity is sure to increase the demand for them. Both Pape's Diuretic and Pape's Diapepsin can be obtained from any legitimate wholesaler at $4 each per dozen and there is good profit in handling them. Any information, displays, etc., required will be gladly furnished upon application to the Pape, Thompson & Pape Co., Cincinnati, Ohio, and mentioning the ERA.

New Sales Manager for Liquid Co.

J. B. Greiner has been made general sales manager of the Liquid Carbonic Co., Chicago, to succeed S. P. De Lano, resigned. Mr. Greiner has been with the company thirteen years, five of which were spent as a salesman in New England territory and for the last eight years he has been manager of the Chicago branch. He is a man of great force and originality, with exceptional executive powers.

BUSINESS NOTICES

Benger's Infant Food Different From All Others.

"The [illegible] foods and cannot be [illegible] recommending [illegible] does not [illegible] patients."—*Wm. Weir*

Benger's Food is different from all other foods in that the druggist is able to tell all about it. It is especially devised to be used with milk or varying proportions of milk and water. A pancreatized cereal milk modifier, its action is based upon the presence of two active ferments, Amylopsin and Trypsin. One converts the carbohydrates of the cereal into soluble sugars, while the other profoundly modifies the casein of the milk, so that it can be adapted to suit almost any form of gastric insufficiency, whether it be infant or adult. Druggists who recommend Benger's Food to mothers, especially those who ask them for the best food for children, will be suggesting the most modern form of infant feeding, and will be supported in their suggestions by their medical clients. Benger's Food, besides being the most remunerative proprietary food on the market, is "retained when all other foods are rejected."

Nurnberg's Advance Fever Thermometer.

Charles Nurnberg Co., Inc., Carr Building, East 138th street and Third avenue, New York, with factories in Brooklyn, N. Y., and Berlin, Germany, is the most important manufacturer of clinical thermometers in the world. This great enterprise was founded by Charles Nurnberg in 1895 and was incorporated in 1907. The output is enormous and the sales have increased from 51,376 thermometers in 1904 to 995,864 in 1909. The company supplies clinical thermometers to the Medical Supply Department of the United States Government and its products reach all parts of the country, Canada and European countries. The "Advance," a clinical thermom- [illegible] is particularly [illegible] to the trade. It is [illegible] equipped with lenz-finders and anti-rolling devices, and is provided with means to limit the extent to which it should be inserted into the body. For further information read the advertisement of the Charles Nurnberg Co., Inc., on another page of this issue of the ERA.

Turn-A-Minit Agitators for Druggists and Chemists.

Druggists will be interested in the announcement of the Turn-A-Minit Churn Co., 2800 Metropolitan Tower, New York City, made on another page, calling attention to the Turn-A-Minit Agitator, a new apparatus especially recommended for use in making emulsions, compounding formulas, at the soda fountain and in the home. It is built on entirely new principles and not only saves the time of the operator, but produces thorough admixture. It is built of solid removable parts, the jar in the small size (1 quart) being made of glass and in the larger size of heavy porcelain. The mechanical parts are simple in construction and will stand extremely rough usage. It can be used for various kinds of compounding, mixing syrups, salves, ointments, etc., and is a decided improvement over the mortar and pestle for many purposes. The Agitator is illustrated in the advertisement above referred to, which you should read and then send to the manufacturers for descriptive circulars.

Madam Dean's Antiseptic Vaginal Suppositories.

As there is a growing demand for a reliable Antiseptic Vaginal Suppository, it will be to the mutual interest of every retail druggist to at once write to the United Medical Co., Inc., Lancaster, Pa., whose advertisement will be found on page 636, for free samples, terms, etc., of their Madam Dean's Antiseptic Vaginal Suppositories. Do it now and get in line to supply the demand which you will surely have for this valuable remedy.

Just 1311 formulas are given in the new edition of the Dispenser Soda Water Guide. Every fountain operator needs it.

This is a Picture of the BE-SS-T ICE CREAM DISHER

THE "BE-SS-T" DISHER has a lot of exclusive features. One of them is the *Finger-Hook* that gives you a good grip on the hardest cream no matter how wet or slippery your hand may be. This will appeal to you as a practical dispenser.

You'll appreciate the extra-long thumb lever too—for long levers make light work. This Disher is only part of the splendid Mosteller line.

BUSINESS NOTICES

Planten's Elastic Soft Capsules.

[illegible] Mr. H. Planten was the first to [illegible] Elastic Soft Capsules to the profession [illegible] these goods were offered to the [illegible] trade. Physicians, however, seemed wedded to the "Hard Filled Capsules" introduced by Mr. Planten some time previously, and the manufacture of "Elastic Soft" Capsules was therefore discontinued by him till a more opportune time. In 1860 Mr. Planten reintroduced "Elastic Soft" Filled Capsules and they were favorably received. So-called "Hand-Made" Filled Capsules [illegible] and they were the style "Adopted" by other manufacturers when the popularity of "Planten's" Elastic Soft Capsules had been well established. Frequent improvements were made in the effort to make capsules more rapidly, but not until the firm of H. Planten & Son had perfected their machinery was there any decided advance in the methods of manufacturing this class of capsules.

Please remember, therefore, when you are in the market for "Elastic Soft" Capsules that "Planten's" were the original and for beauty of finish as well as general excellence they are unsurpassed at the present time.

Resor-Bisnol Chemical Co. to Push Specialty.

Resor-Bisnol, an intestinal antiseptic, which has been made by Burrough Bros., Baltimore, Md., for over twelve years, is now manufactured by the Resor-Bisnol Co., 106 West Lombard street, Baltimore. As told in the May issue of the ERA, the latter company was organized by A. G. Stollenwerck, who sold out his interest in the Burrough Bros. Co. and bought the Resor-Bisnol business *in toto*, proprietary rights, formulæ, good will, etc. The Resor-Bisnol Chemical Co. is a close corporation with $40,000 capital and will extensively push this [illegible] Mr. Stollenwerck is the president and [illegible] H. S. Hunt vice president of the new corporation.

Toilet Paper on Which Money Can be Made.

A new departure in toilet paper selling to the trade has been inaugurated by the Tissue Company, of Cleveland, Ohio. It consists in printing advertisements on every other sheet of the paper and then selling the rolls to the drug and grocery stores throughout the country. Each roll consists of 1000 sheets, every other one a blank and on the rolls sold to druggists the articles advertised consist of Sen-Sen, Beeman's Pepsin Gum, Cascarets, White's Yucatan Gum, Warner's Safe Cure and other articles sold by druggists.

The Tissue Company has been in operation for a number of years in Cleveland but its product has been sold exclusively to hotels, office buildings, factories, rail and boat lines. So much general advertising has been offered the company that a new field had to be developed in which to market the tissue. The price asked for the tissue is declared to be less than the actual cost of the paper. In fact the price of tissue paper has advanced from 2 cents per pound upward in the last year when bought from the paper mills in carload lots and this tissue with advertising affords the only means through which the average druggist can sell toilet paper at a low price and still make a profit.

Sell A-Corn Salve and Make 217 Per Cent Profit.

The Giant Chemical Co., Philadelphia, have a proposition which should interest every retail druggist who desires to make big returns on a small investment. They are manufacturers of A-Corn Salve and in an advertisement on another page they demonstrate how the retail druggist may make a profit of 217 per cent or $3.70 on an investment of $1.70. This proposition is worth looking into. Order of your regular jobber or write to Smith, Kline & French Co., Philadelphia, sole [illegible]

BUSINESS NOTICES

Mulford Puts Antimeningitis Serum on the Market.

Antimeningitis Serum is now placed on the market by the H. K. Mulford Co. who announce that they are prepared to supply it from their various branch houses as well as from Philadelphia. The serum is supplied in packages the entire contents of which have been sterilized. Each package contains two syringes of 15 cc. each, being the dose usually administered to young children, while for adults, or for malignant cases, 30 cc. (2 syringefuls) are to be injected at one dose. With each package is a special needle for puncturing the spinal canal. The needle is made of soft-tempered metal which will not break, and is given sufficient stiffness by a special stylet. This stylet fits into the needle and is of exactly the same length. The end is beveled so that when it is fitted into place the bevel corresponds to that of the needle point, making one smooth surface. When the stylet is rotated its point clears the lumen of any accidental obstruction. This needle serves both for drawing the spinal fluid and for the injection of the Antimeningitis Serum, being left in position during the entire operation. When as much fluid as possible has been drawn off, the syringe is attached to the needle by means of a combined rubber and metal coupling previously sterilized. The metal tip is connected with the syringe by means of a small piece of rubber tubing, in order to avoid all danger of breaking the syringe point or injuring the cord by bending the syringe or by sudden movement of the patient.

Every physician will welcome the news that they are now able to secure Antimeningitis Serum, because it is the only remedy known to be of service in the treatment of cerebrospinal meningitis.

The H. K. Mulford Company, recognizing their responsibility to the medical profession and wishing to co-operate with the authorities thereof in furnishing therapeutic agents for the treatment of poor patients, will, on receipt of certified order from the physician stating that he receives no fee for his services and that the patient is indigent, furnish the Antimeningitis Serum, without charge, except in communities where the Boards of Health supply curative sera for indigent patients.

Burnham Toilet Preparations.

The E. Burnham Toilet Preparations are considered by beauty specialists to be among the finest requisites made, being prepared from the original E. Burnham formulas and containing nothing that will injure the most sensitive skin or delicate complexion. The Burnham Preparations are used extensively in the leading beautifying establishments of the country on account of the rapidity of their action and the satisfactory manner in which they produce results. The line comprises more than fifty different articles, and all are guaranteed under the Food and Drugs Act. The manufacturers state that during the year 1910 $75,000 will be expended in increasing the demand for these goods and druggists who are farsighted will do well to lay in a supply and get the benefit of this publicity.

High-Grade Hand-Colored Local Cards.

The local view card is the card that never goes out of style. Other cards have their day and are forgotten, but the local view is the backbone of the business, the cause of the business in fact. The National Colortype Co., of Cincinnati, Ohio, are turning out better cards every year and increasing their output as fast as they can install suitable machinery. They can now deliver their high-grade hand-colored card in two or three weeks. Ask them for samples and they will gladly send them, if you mention THE PHARMACEUTICAL ERA in writing to them.

Sell the Fischer Bunion Protector.

The Fischer Bunion Protector is highly recommended and extensively advertised. Its sale by druggists gives them an opportunity to make money. Read the Fischer Manufacturing Co.'s advertisement on another page and write to them for particulars.

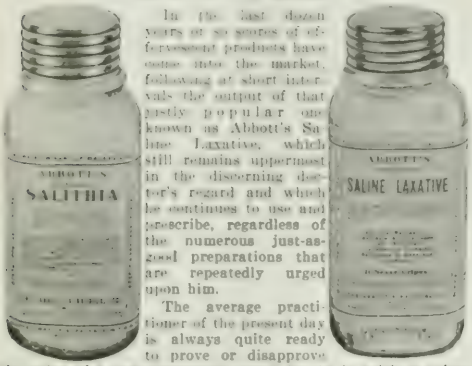
BUSINESS NOTICES

Abbott's Twin Salines.



In the last dozen years or so scores of effervescent products have come into the market, following at short intervals the output of that justly popular one known as Abbott's Saline Laxative, which still remains uppermost in the discerning doctor's regard and which he continues to use and prescribe, regardless of the numerous just-as-good preparations that are repeatedly urged upon him.

The average practitioner of the present day is always quite ready to prove or disapprove the value of a new therapeutic agent, but he is quick to reject what he finds is a mere make-believe bolstered up by nothing but printed adjectives. So, in connection with effervescent products, through a period of fifteen years each new one has been studiously compared with Abbott's Saline Laxative only to be found wanting.

Another top-notch product is Salithia. A host of practitioners, the manufacturers say, are using it today and find it to be a very effective eliminant in all disorders dependent on an excess of uric acid in the system. In addition to chemically pure magnesium sulphate it contains lithium carbonate and colchicine in correct proportions. It has been found that rheumatism, gout, myalgia and a host of kindred complaints yield to this remedy as they do to no other.

Both Saline Laxative and Salithia are marketed to conform to the N.A.R.D. schedule in three sizes, retail price—small, 25c.; medium, 50c., and large, $1.00, and sold to the trade at $2.00, $4.00 and $8.00 per dozen, respectively. The Abbott Alkaloidal Co., of Chicago, will be pleased to send Trade Price-List and discounts to any druggist on request.

Advertising Campaign for Drosis Now On.

A new advertisement in this issue of the ERA is that of the Drosis Co., Buffalo, N. Y., who are spending a large sum of money in calling the attention of the public to the merits of Drosis, a new Deodorant. This advertising campaign has been carefully planned to reach the greatest number of consumers of this class of articles, the mediums employed being the leading women's magazines circulated in this country. The Drosis Co. want dealers to be prepared to supply the demand that is sure to follow such advertising and to make their share of the profit on the sale of these goods—50 per cent. Send in your order today, the manufacturers will furnish you booklets and show cards.

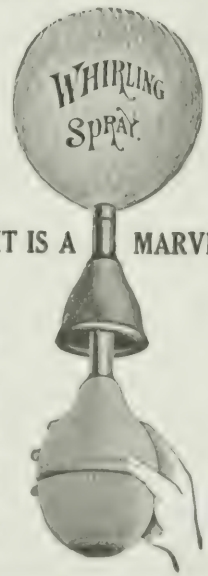
Cyclone Insecticide a Money-Maker.

This is the season of the year when the druggist is likely to have the greatest number of calls for insecticides. The Boston Chemical Co., 30 Portland street, Boston, Mass., are cognizant of this demand and to meet it they call attention in this issue of the ERA to Cyclone Insecticide which they say is a "money-maker" for the druggist who sells it. Read the ad and write to the manufacturers for full particulars.

Borcherdt's Malt Extract and Combinations.

The Borcherdt Malt Extract Co., Chicago, Ill., in their advertisement call attention to their Malt Extract and Combinations, which they say are distinctly ethical products, being detailed to the medical profession. Borcherdt's Malt Soup Extract they especially recommend for preparing Dr. Keller's Malt Soup. Read adv and order from your jobber or direct.

THE MARVEL "WHIRLING SPRAY" SYRINGE



IT IS A MARVEL

WAS AWARDED THE GOLD MEDAL, DIPLOMA, AND CERTIFICATE OF APPROBATION, BY THE SOCIETE D'HYGIENE OF FRANCE, OCTOBER, 9, 1902,

as the latest and best improvement in Vaginal Syringes. Particular attention is called to the fact that by means of its specially constructed Hard Rubber Spray Nozzle and Double Rubber Shield, which can be used at pleasure, a stream or whirling spray, which may be directed to any part of the vagina with a pressure sufficient to cause the injection to come into contact with the entire surface, instantly dissolving and washing out all secretions and discharges.

Have You Tried Them

JUDGMENTS IMPOSED ON DRUG LAW VIOLATORS

Washington, May 20.—The Department of Agriculture has given public notice of judgments [illegible] in the courts on cases reported to the United States Attorney-General by the Board of Food and Drug Inspection for violations of the Food and Drugs Act [illegible]

Bunge C. Fuqua and Samuel Lyon, trading as Lyon-Bunge Chemical Co. of Shreveport, Louisiana, manufacturers of "Sure Thing Tonic." Product was adjudged misbranded as to ingredients and medicinal claims advanced for it. Defendants [illegible]

Lyon-Bunge Co., Ltd., New Orleans, shipped a consignment of drug labeled "Bunge's Head Ache." Same misbranded in that statements on label were false. Plead guilty [illegible]

Joseph Perlitch, doing business as The Perlitch Pharmacy, Brooklyn, N. Y., shipped in interstate traffic consignment drug labeled "U-Re-Ka Headache Powders." Misbranded in that quantity and proportion of acetanilid was not stated. Plead guilty and fined $25.

George W. Burns, trading as The Analgine Tablet Co., Bernardsville, N. J., shipped in interstate commerce a consignment of drug labeled "Analgine Tablets." Same misbranded in that label did not state quantity or proportion of acetanilid [illegible]

O. A. Johnson, doing business under name of The Dr. Johnson Remedy Co., sold and shipped and possessed for shipment [illegible] packages of Antiseptic Tonic, two packages or bottles of "Blood Purifier," one package or bottle of "Special No. 4," all of which packages constituted "Dr. Johnson's mild combination treatment for cancer." Defendant was indicted on six different counts for misbranding but court quashed each because they failed to state facts sufficient to constitute any crime or offense.

Trading Stamp Suit Reaches U. S. Supreme Court.

Washington, May 20.—The District Court of Appeals has reversed a decision of Judge Mullowney in the Federal Police Court. [illegible] the Commissioners of the District of Columbia, commissioners of [illegible] all trading stamp companies in the District to the effect [illegible] Judge Mullowney dismissed the cases. The Commissioners took an appeal, and the Appellate Court has ruled in favor of the plaintiffs. Attorneys for the defendants have taken steps to carry the matter to the United States Supreme Court, and the decision of the highest tribunal will be awaited with keen interest by all interested parties.

Good Showing of American Druggists' Fire Ins. Co.

At the annual meeting of the executive committee of the American Druggists' Fire Insurance Co. held at Cincinnati, the business for the first three months of 1910 showed an increase of 53 per cent, with a premium increase of 35.4 per cent over the corresponding period of last year. The losses for the first three months of the year amounted to $4549.64.

The committee carefully considered a request from many different sources for an increase in the limit of insurance to be carried on the best risks in the best fire protected cities, but after a most thorough discussion, it was unanimously decided to invariably continue this limit of $3000 on any one risk in cities having the best fire protection.

Secretary Freericks reported that all arrangements had been completed for entering three more States and the appointment of B. C. Ansley, of Los Angeles, Cal.; Harry E. Ring, of Portland, Me., and George A. Gilmore, of Epping, N. H., as general agents for those States, was approved. Arrangements were made for representation at the different State and National meetings. Owing to a continued confusion of the A.D.F.I. Co. with concerns that also profess to do a druggists' insurance business, the committee instructed the officers of the company to make every possible effort in order to prevent such continued misunderstanding, and to make it especially clear, that the American Druggists' Fire Insurance Co. is a capital stock company operated along legitimate lines and that it does business in compliance with the laws of the different States, and is under the direct supervision of the different State insurance commissioners.

To Bring A Customer Back Again

should be the constant aim of every druggist. The impression he secures of your store and your merchandise on his first call usually decides whether he returns or not.

If your store is attractive and equipped with up-to-date selling facilities the chances are the customer will return.

We make cases that are attractive, that wear, that possess individuality, and are reasonable in price. We claim, moreover, the same high grade of cabinet-making and finish that has given Grand Rapids its world-wide reputation. Write for Catalogue B-10.

THE SECRET
OF THE
SUCCESSFUL FOUNTAIN

IN the new edition of this popular and valuable work the "General Information" regarding the operation and care of a soda fountain has been carefully revised and over 500 new formulas added, thereby bringing it right up to the present season.

Following is a summary of the formulas contained in this new edition:

Fancy Beverages	573
Sundaes and Frappes	142
Ice Creams, Ices, Sherbets, Frozen Pudding, etc.	128
Phosphates, Punches; Orange, Lemon and Lime Beverages	161
Chocolate and Egg Drinks	61
Hot Drinks	155
Miscellaneous Syrups, Meads, Salted Almonds, Nuts, etc.	117
TOTAL FORMULAS	1337

This book is indispensable to every soda fountain owner and dispenser. The new *interleaved* copies are particularly convenient as a practical working formula book, with plenty of space for notes and additions.

IN THREE BINDINGS

"The Dispenser Soda Water Guide" is issued in three styles of bindings, as follows:

Flexible cloth	$1.00 a copy
Cloth boards	1.50 a copy
Cloth interleaved	2.00 a copy

THE ERA DOSE BOOK

FIFTH EDITION
Revised and Enlarged

With Appendix giving percentages of Alcohol and Quantities of Narcotics in U.S.P. and N.F. Preparations, supplying just the information required to label these preparations so they will comply with the FEDERAL FOOD AND DRUGS ACT. Adopted as a standard by pharmaceutical associations.

The Fifth Edition of this valuable reference work brings the posology of the materia medica down to date, and includes all of the Newer Remedies and Synthetics that have been introduced within recent years.

Contents: Dose List; Percentage Solutions; Dose Equivalents; Veterinary Doses; Incompatibles; Properties of Remedial Agents; Drops in Fluidram; Solubilities; Latin Words and Phrases; Specific Gravities of Metals; Latin Cardinal and Ordinal Numbers; French and German Prescription Terms; Poisons and Their Antidotes; International Atomic Weights; Specific Gravities of Official Substances; The Metric System; Mathematical Memoranda; Boiling Point of Water at Different Barometer Readings; Thermometric Equivalents; Hydrometer Tables; Appendix.

The Era Dose Book is in handy form for reference, saves time in prescribing and dispensing, and makes accuracy easy.

Price, 50 cents per copy, postpaid

FOR OVER SIXTY YEARS
An Old and Well-Tried Remedy

MRS. WINSLOW'S SOOTHING SYRUP

has been used for over Sixty Years by Millions of Mothers and their Children while Teething, with Perfect Success. It Soothes the Child, Softens the Gums, Allays all Pain, Cures Wind Colic, and is the best remedy for Diarrhoea. Sold by Druggists in every part of the world.

Be sure and ask for

Mrs. Winslow's Soothing Syrup

and take no other kind.

TWENTY-FIVE CENTS A BOTTLE

Make a note of the brand—Y & S—on our Pepsin Gum. This brand—Y & S—has been used by us and our antecedents for forty years on the best known stick licorice in this country.

It means just as high quality when used on our chewing gum.

Four flavors: LICORICE, PEPPERMINT, WINTERGREEN, SPEARMINT. Each piece wrapped singly, 5 pieces to package, 20 packages to box. Order a trial box, assorted if required, from your jobber.

NATIONAL LICORICE CO.
BROOKLYN, N. Y.

ROOT JUICE PROPOSITION
A BIG WINNER

Exclusive newspaper and other advertising. The plan which gets results. Many druggists have sold six dozen bottles of Root Juice (dollar size) in one day. The L. H. Ott Drug Co., of Harrisonburg, Va., sold 77 bottles in one day, and a few days later sold 110 bottles. They sold over 700 bottles since the 12th of last February. W. A. Gutelius, of Bluffton, Ind., sold over 2000 bottles in less than a year. J. W. O'Harrow, Bloomington, Ind., did even better, and hundreds of druggists throughout fifteen States, are doing a wonderful business with Root Juice, as it has the merit, and our advertising is the most catchy and convincing.

Our proposition is open to one live druggist in every town and city. Get it quick, or some one will beat you to it.

W. P. CABLER ROOT JUICE MED. CO.
Fort Wayne, Ind.

FOUR YEARS OF THE PURE DRUG LAW.

Beginning with July 1 the Federal Pure Food and Drugs Law enters upon its fifth year of usefulness. With the elapse of four years the measure has had a fair test and that so little complaint has been found with its provisions is a remarkable tribute to the intelligence of its authors. Its enforcement, with rare exceptions, has been along conservative lines. The lay newspapers, some of which formerly clamored against the law and found fault with officials charged with its enforcement, have now come around to the position that too much leniency is shown in punishing offenders.

There is apparently good reason for denouncing some of the fines as ridiculously small, but experts who have followed the subject closely will not be prepared to criticise the courts for inflicting seemingly light penalties. The hasty critics are unaware that in revolutionizing conditions there has been an underlying policy of working the changes without undue hardship, or loss of property, to the producers, manufacturers and merchants affected by the law. It is notable that there have been comparatively few second offenders, a fact which justifies the lenient view taken by a majority of the judges. But after four years it may be expected that more severe penalties will be imposed, for this length of time ought to afford ample opportunity for all to learn whether they are amenable or not to the law.

NEW YORK'S NEW PHARMACY LAW.

In response to a general demand we are printing in this issue of the ERA the full text of the new Pharmacy Law which was signed by Governor Hughes on June 8. This measure was the outcome of persistent efforts on the part of some prominent pharmacists to improve the New York Pharmacy Law which began before the higher courts had upheld its constitutionality of the old law and with a view to ending the annoying attacks upon it and the Pharmacy Board made by elements which sought to avoid prosecution for violations. The new law does not interfere with continuing the old prosecutions, but expressly provides for their continuance, so that the anti-board druggists have gained no benefits through their long and determined opposition to the present board.

While we have felt that the old system of election of board members by the incorporated pharmaceutical societies was both proper and desirable, we approach the new condition of appointment by the State Regents with a conviction that they will per-

form this duty with a high sense of propriety and consequent satisfaction. The Regents are men of high character and we do not believe that political influence will in any way affect their selections. As a beginning, the appointment of Warren L. Bradt as secretary of the new board is evidence that the Regents are disposed to accept the general estimate of pharmacists of the State that the work of the retiring board has been of a high standard of merit and that their purpose will be to continue to preserve the excellence of endeavor which has characterized the efforts of the men who have labored in this field so effectively towards raising pharmacy in the public esteem and towards preserving the public health and life through enforcing the pharmacy laws. We doubt if the Regents will go outside of the nominees of the New York State Ph.A. In fact, this provision of the law may be regarded more in the light of a safety valve than in any other way, for, paradoxically, its presence will undoubtedly make its utilization forever unnecessary.

One important relief is to be gained through bringing the Regents into pharmacy affairs and that is the ending of the perennial attacks upon the law through the Legislature by persons who seek to evade its enforcement in that way. It is improbable that any further attempt to amend the Pharmacy Law will be given any consideration by the law-makers for a long term of years to come, unless actively urged by the Regents, who are men opposed to sham and intolerant of persons who trifle with human life.

NEW YORK'S NEW ANTI-COCAINE LAW.

Although the ERA printed the new provisions of the New York Anti-Cocaine Law, on page 450, May number, there has been inquiry for the text of the law, including the old provisions which were reenacted and the same is printed in full elsewhere in this issue. This law is section 1746, Penal Code, and makes the unlawful sale or possession of cocaine or eucaine a felony, going so far as to make the mere unlawful possession presumptive evidence of guilt.

Medical men have been slow to recognize the existence of this new law and even some pharmacists have been in doubt about the provisions. One point that the doctors seem to fail to understand is that requiring the use of the name and address of the prescriber upon the certificate of sale given by the pharmacist. This provision is equally mandatory with the rest of the law and no pharmacist has any excuse for violating it. If the physician does not desire to have it known that he writes prescriptions for dope-fiends he has his remedy in refusing to continue that branch of his practice. This law is now in force and has been in effect since last April.

PROMOTING PHARMACEUTICAL EDUCATION.

While one of the favorite points of attack for opponents of the New York Pharmacy Law was the provision permitting the board's surplus funds to be applied to the requirements of the New York College of Pharmacy and the Brooklyn College of Pharmacy, it is interesting to note that this disposition of the funds has had the approval of the courts and in far away but enlightened New Zealand it is proposed to apply the surplus funds of the New Zealand Board of Pharmacy "to promote pharmaceutical education in the Dominion, either by establishing a college of pharmacy or assisting some outside institution." The surplus funds amount to about $8000 and it is expected that much good can be done with this sum in the direction of promoting education in pharmacy.

The constitutionality of the provision of the New York statute diverting surplus funds to educational purposes was not decided by Mr. Justice Carr, of the Appellate Division of the Supreme Court, in the recent opinion in which he upheld the Pharmacy Law generally. The court declared that it was "not necessary" to go into a consideration of this objection by Lawyer Conklin and held that an authority quoted by him in support of his objection was undeniably not applicable to the Pharmacy Law, so that by inference at least this disposition of the board's surplus has the approval of the Appellate Division, as well as of the Legislature and the great majority of pharmacists who have at heart the uplifting of the profession in every practical way. The new law, effective August 1, does away with this diversion of the funds, so that it will no longer be a subject of contention.

ARE SPECIAL EDITIONS DESIRABLE?

"Special Editions" formed the subject of an extremely interesting discussion at a recent meeting of the American Trade Press Association. There are various kinds of special editions of trade and other publications and the utility of the various sorts was threshed out at length. The consensus of opinion was that a regular issue when made larger on account of unusual news demands and because of abnormal advertising pressure was a perfectly legitimate proposition, but that the special edition which was made up of "unaccustomed text matter" and a mass of transient advertisements was a nuisance to the regular readers and more or less of an injustice to the permanent advertisers, if not a direct or indirect loss to the publishers.

Readers are accustomed to the character and make-up of their favorite journals, they know approximately where to find the matter they want and are inclined to be disgusted when confronted with a great mass of other material. Such editions are more often thrown aside without perusal than they are read, for the task appals the average subscriber, who, even if not bored will usually lay the number aside until more time is available, a condition which seldom comes.

Regular, persistent advertising is universally conceded to be the secret of success. Permanent advertisers are entitled to get all that is due them in journals which they patronize. The point was made that their ordinary announcements are dwarfed in comparison in the enormous "specials," unless they pay for extra space, which they ought not to be required to do. Even in that case they are paying extra for less likelihood of proportionate benefit than they would derive from the usual announcement in an ordinary issue, for a smaller percentage of subscribers would be likely to read the "special" than would go through a regular number, while the added

quantity of unusual matter would detract from the attention which the reader would ordinarily give to the journal. It seemed to be the consensus that the permanent advertiser was more or less a victim, rather than a beneficiary.

On the other hand the "special" due to the demands of trade conventions, of Spring or Fall or Christmas advertising, or anything in the proper sphere of the journal, was perfectly legitimate, provided there was no loading up with "unaccustomed news and other copy," or forcing in of a lot of transient or nondescript advertising which would belittle in comparison the announcements of regular patrons.

TWO IMPORTANT DRUG TRADE EVENTS.

St. Louis was the scene recently of several events of importance to the drug trade of the country, two of them being notable in their nature and both being reported in *The Soda Fountain* for June—this number being issued midway between the June ERA and the July ERA. The end of the Sanitol Chemical Laboratory Company's litigation, the vindication of the minority stockholders and the settlement between Mr. Luyties and his opponents, certainly interested thousands of druggists. The meeting of wholesale druggists of the Middle West—mostly members of the N.W.D.A.—was characterized by the consideration of National legislation and other matters affecting the trade. One feature of general moment was the offer of co-operation made by the members to Dr. Wiley in relation to placing their facilities at the disposal of the revisers of the U.S.P. IX.

An account also of the work of the Revision Committee was given, besides numerous other matters. No druggist, even if he is not a convert to the soda fountain idea, can now afford to be without *The Soda Fountain* publication. A dollar sent to 82 Fulton street, New York, is all that is required to secure its monthly visits for a year.

CO-OPERATIVE MANAGEMENT.

Such unfortunate experiences as that of the Sanitol Company could be largely prevented if the shareholders of co-operative concerns would take a more active interest in the management. The party who originates and organizes one of these companies is usually engaged as its general manager; in fact, that, as a rule, is what he is working for, regardless of his apparent interest in the welfare of the druggists, physicians or dentists who are invited to become shareholders.

If the business is successful the manager attributes the result to his personal efforts and he forgets that without the co-operation of the shareholders his efforts would have been non-productive. When the egotistical microbe begins to work its development is usually very rapid, and it soon causes the manager to feel that he is the "whole thing"; that the company's property and assets represent the product of his brain and muscle, and then he handles the business as if it were his personal property.

The value of the services of such a man should not be under-estimated and he should be well paid; but, on the other hand, he has no right to ignore his early promises to those who have helped him to success, or to forget the larger principle of co-operation, for which all of them are working.

While it is advisable to have a board of directors that will work in harmony with the management any attempt on the part of the manager to select his special friends should be vigorously opposed. This purpose can be accomplished by the adoption of suitable by-laws requiring rotation in office and giving the shareholders ample time to consider all nominations.

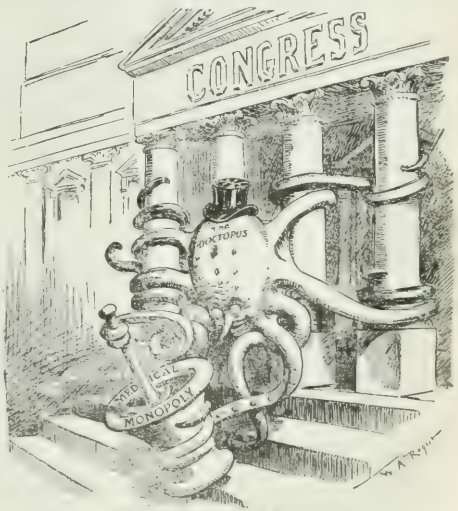
One frequent and serious error is lack of reliable and clear information regarding the company's financial condition. It is the easiest kind of a proposition for the manager to issue a favorable statement. Inventory values can be raised, real estate increased, recent obligations withheld from entry until after the statement is published, "good-will" and "patents" included at any old price or "clipped formulas" rated at $50,000 each.

All of these troubles can be avoided by the exercise of ordinary business forethought on the part of those who are responsible for the success of these enterprises, and who are sincere in their efforts to do what is best for all the shareholders.

One thing that every such corporation should provide for, is an auditing committee, elected by the shareholders, entirely independent of the management, and responsible only to the shareholders. Such a committee should make an annual inventory of the company's assets and furnish a complete statement of its condition. The committee should consist of members who are qualified for such work; they should be well paid for their services and authorized to employ such expert accountants and assistants as they may require—*and there should be a majority of new members on such a committee each year.*

Such a committee is an absolute necessity in each

ANOTHER N. Y. HERALD VIEW OF SITUATION.



WHAT THE OCTOPUS IS CONCOCTING.

of these co-operative concerns to protect the interests of all concerned. It is not only a wholesome check on the management, but it relieves the manager of possible unjust criticism, besides providing each shareholder with information to which he is entitled. Further than this, each shareholder has only himself to blame if he does not insist on the creation of such a committee and a proper performance by its members of their duties.

NO SUBSTITUTION—NO "NOSTRUMS."

Charles H. McConnell, of Chicago, in his fight in the newspapers against substituting druggists, has lately been carrying the campaign to extremes which are attracting attention throughout the country. His series of advertisements has already been referred to in these columns, but there are so many interesting features that it seems impossible to do justice to the symposium of anti-substituting literature and prohonesty pleas that this aggressive druggist has presented to his readers. Here is a big type starter:

NO SUBSTITUTION.

WE WILL NOT KNOWINGLY BE A PARTY TO THAT OR ANY OTHER FRAUD, DECEPTION OR SWINDLE.

This appeared in one of his latest advertisements, which announced that in addition to being governed by this policy there would no longer be on sale in the pharmacy any of the patent preparations which were mentioned by name in Federal Bulletin 377, which dealt with medicated soft-drinks and habit-formers. In black type, an inch high, the words **"NOT ON SALE"** preceded a list of the affected preparations, with an explanation of the reasons which had prompted the advertiser to discontinue their sale. The goods in stock were given a window display, appropriately labeled, before Mr. McConnell consigned them to the "garbage cans," as he said.

Perhaps this druggist can afford to lose the $25,000 a year which his course involves, for he makes claim to doing the largest prescription business in the country, but in any event his radical action in this matter will serve to greatly strengthen the campaign against substitution. One of his recent gems in the latter connection reads:

> The subject is too technical for the lay reader. The only safe rule for him is the demand voiced by the robust barytone in Fritzi Scheff's opera of "Mlle. Modiste"—
>
> "I WANT WHAT I WANT WHEN I WANT It"—BANG!
>
> The "Bang" being on the nose of the rascally clerk who says you don't!"

> "Another circular, of slightly impolitic reply is that
> Inspired by the maiden
> Go to Father—she said when I asked her to wed
> She knew that I knew that her father was dead
> And she knew that I knew what a life he had led
> And she knew that I knew what she meant when she said
> Go to Father

[illegible] of a certificate for [illegible] an allowance on the [illegible] of some [illegible] Among the [illegible] of [illegible] and [illegible] to an amount [illegible] of [illegible]

patriotism. Its fact pageants offer many more opportunities [illegible] the underlying principles of our free form of government and for giving striking object lessons in patriotism than can possibly be found in fireworks. Pageantry is creative and educational. It is by all manner of means to be preferred to the noisy and more costly celebrations that have killed and maimed so many of our people in recent years.

"Vicious" is the characterization of the new New York Anti-Cocaine Law made by the *Journal of the American Medical Association*, which declares that the law does not prevent "renegade physicians" from prescribing for cocaine habitués, while it discloses to patients the fact that they are being given cocaine—"a fact that the conscientious physician is usually careful to conceal." It is unfortunate that the new law should give offense to honest practitioners, but they have only the "black sheep" in their own profession to blame. The cocaine curse must be eradicated, even though the drastic law needed does not please everybody.

It is a startling illustration of the danger of political meddling with pharmacy boards that is presented in Pennsylvania in connection with the recent anti-cocaine crusade. One of the most prominent candidates for appointment on the State Board of Pharmaceutical Examiners, a man of prominence and supported by strong political forces, was found to be one of the most flagrant offenders against the law and is now serving one year in prison, besides being fined $500. That he was not successful in securing the appointment is a matter for general congratulation.

Congress adjourned for the summer without progressing the bill for a department of public health. At the hearings in committee the measure was given many hard knocks and the opponents apparently had the best end of the argument. The political doctors interested are making herculean efforts to elect Congressmen the coming November who will favor the bill. As no benefits commensurate with the enormous expense are likely to accrue there is little justification for the project and with rare exceptions, so far as we are advised, the druggists of the country are opposed to it.

What the A.D.S. is to retail drugdom the Agra will be to the retail grocery trade, if the plans of the promoters are successful. Agra is short for American Grocers' Association and it will handle everything in the grocery line, except fresh and green products, working on a co-operative basis. As in the case of the A.D.S., the object is to increase profits by doing away with the jobber, but this elimination is even less likely to be complete in the grocery trade than it is in the drug world.

"Doctors' Trust" was an issue in the Vermont State Republican convention, where an effort was made by the political doctors to include in the platform a plank approving the proposed Federal health department, but the proposition was completely defeated. But this result will not discourage the physicians who favor the innovation and who are exceptionally active everywhere in trying to secure endorsements for the project.

American Medical Association refused to approve the Cullom bill in Congress for the regulation of the opium trade and laid the subject over for a year. The doctors are in harmony in this respect with many druggists, the latter being [illegible] opposed to the measure as a tax. The necessity for the latter is extremely doubtful.

New York State Ph.A. has gone on record as favoring the Ohio idea of establishing local branches of the State associa[illegible] [illegible] Ohio Ph.A. [illegible] a number of these branches during the year with excellent results.

[illegible] should [illegible] [illegible] [illegible]

The Mighty Post Card.

By Emma Gary Wallace.

TO be vastly powerful or to wield a mighty influence for good or evil in any direction, it is not always necessary that a thing should be imposing in size or itself valuable from a money point of view.

The tuberculosis germ is invisible to the naked eye; the gypsy moth has destroyed hundreds of thousands of splendid trees and the weevil has ruined innumerable and costly crops. On the other hand, there are countless little things which make for our daily comfort and happiness—friendly germs, bees which fertilize our plants and flowers, and so on without end, not to mention the army of commercial articles of real value which may be had for the smallest coins of currency.

The Picture Post Card.

When the first picture post cards were prepared for market as a purely business venture, it is highly probable that either consciously or unconsciously the following steps of reasoning were followed:

(1) Something attractive which appeals to the artistic sense will sell if the price is popular.
(2) From one to five cents will be a popular range of prices which practically every one can afford.
(3) The majority of people dislike to write letters, especially long descriptive ones.
(4) The picture post card will often illustrate clearly much that the letter-writer would say and so save time and effort, especially for the traveler.
(5) The picture post card will be an easy means to an end. It will serve as a pleasant reminder at a minimum outlay of labor and money.

And so the picture post card was launched upon the market. It catered to a human weakness—the dislike of avoidable work; a human virtue—the love of the beautiful; and a fixed human characteristic—the laudable desire to give pleasure to those for whom we care and to be remembered kindly.

A Success From the Start.

It was a success from the beginning. Any one of the three reasons assigned would have made it fairly successful. The combination of the three made its success simply phenomenal.

Firms everywhere at home and abroad prepared to turn out picture post cards. They vied with each other to produce novelties until the government had to declare what was and was not mailable.

The range of subjects covered was wide, the products highly creditable and many of them decidedly educational and artistic.

In a wonderfully short time indeed, the excellence of workmanship of many of these cards and the variety of places, persons and things pictured spoke eloquently of the vast outlays of money, time and ability brought to bear upon the industry to produce such results.

Public appreciation was evident by the rapidly increasing sales. Dealers, who at first had refused to be bothered, were convinced at last of the wisdom of stocking cards because the public wanted them and expected to find them readily.

A Stock Room Glimpse.

In the stock room of the distributing office could be found almost any series likely to be thought of or wanted: character studies, national or race types, winter scenes, stage celebrities, whole series illustrating songs, hymns and poems, copies in miniature of famous oil and water color paintings, animal studies, places and scenes historical, biblical and otherwise, series picturing every land known to civilized man, sporting subjects, natural history, botany, quaint and picturesque corners of the world, express trains, cathedrals, child subjects, naval, military, imperial, marine and art sets.

No wonder that with such a wealth of subjects it became a fad to collect picture post cards. There was ample chance for every person to find plenty along the particular line of interest which appealed. It was easy to illustrate one's own trip with them gathered by the way, to plan post card showers for shut-ins, to have one's home done on a post card for distant friends.

More subjects yet were devised to please—local views, series illustrating industrial activities from start to finish, actual photographic cards of great beauty and fine finish, stereoscopic cards intended for use in a good stereoscope, panoramic pictures fine enough to frame handsomely.

Then the craze grew apace and special season cards were designed, such as Easter, Christmas and birthday, invitation cards, cards expressing pleasing sentiments and so on until countless legitimate changes were rung on the picture post card. Post card exchanges were established and the aggregate sums of money expended were very great.

A Harmless Fad.

It seemed quite as if the whole world had gone picture-daffy, and following on the heels of this harmless fad came the moving picture show of which the stereopticon and the picture post card are the legitimate ancestors, on one side of the house at least.

Many a ray of cheer, many a day was brightened by the arrival of a kindly thought from somewhere even though printed, or of a far-away view of some sort one might never see in reality, or again of a wisely comical animal face.

But like all good things which have achieved success, unworthy imitations soon arose and attempted to share the merited popularity of the picture post card.

Imitations are, it is said, the sincerest flattery, but unfortunately the imitators ofttimes color the imitation with their own mental atmosphere. So it was here, for cards began to be made which pandered directly to the lower side of human nature. Subjects were displayed which were decidedly improper—subjects at once immodest and suggestive.

The Druggist as a Distributer.

As the druggist is very largely the medium of distribution for the picture post cards, the elimination of the improper card from his own racks, at least, lies in his own hands and be it said in justice to this great and honorable body that the great majority would scorn to allow the immoral post card to find a resting place within their walls and that in the few cases when such cards have crept in with unassorted orders they have been indignantly rejected when discovered.

With the endless varieties and makes that are all right from which to choose, it is but a matter of time and care to make selections that are harmlessly amusing, instructive and beautiful.

Sometimes in catalogues for retailers there are designs which are eminently desirable, while sandwiched in here and there are lines which are objectionable.

It would seem better in such cases to give the entire line the cold shoulder rather than to encourage even by partial patronage the firm which will stoop to manufacture or sell that which is neither desirable nor welcome. There are so many makers offering entire lines that are clean that there

Two Groups at A. Ph. A. Meeting.

FIRST GROUP: *On the left, Mathias Noll, of Atchison, Kan.; on the right, Charles E. Clarke, of Racine, representative of Horlick's Malted Milk Company.*

SECOND GROUP: *From left to right: William Bodemann, of Chicago; Prof. Julius O. Schlotterbeck and Prof. Alviso B. Stevens, of the University of Michigan, Ann Arbor.*

is no occasion for hesitation in the matter of cutting adrift from doubtful goods.

Printed Descriptions.

Before me lies matter descriptive of cards in some instances not so bad in themselves, but given an unpleasant color by the description itself. In other cases the cards are not such as would be chosen by a man for his wife or daughters.

No comments are made on the following quotations:

"Caricatures of women with various portions of the anatomy padded, so that the cards can be used for pin cushions. The boys' always have fun with these."

"A silken veil is used in the poses to heighten the seductive effect."

"Large, voluptuous models in close-fitting abbreviated Jersey suits shown in striking poses."

"The poses exemplify a perfect abandonment of freedom."

"Models have posed in very spoony situations. • • • A suggestive title for each picture."

There are others across which we draw the curtain of silence with bowed head.

The W.O.N.A.R.D. and the Post Card.

It was against the picture post card with a distinctly immoral influence that the W.O. has gone on record as opposing and not, let it be understood, against the multitude of fine cards which it is a joy to possess.

It is time and effort well spent to examine one's racks and if there is a single line there even near to the border line of the objectionable to consign it to the flames.

If such lines did not sell they would not be manufactured and every retailer who refuses to handle them is dealing a death blow at that class of business.

It is sad indeed to find any one so lost to honor as to knowingly traffic in any kind of "dope" for the sake of gain, whether it paralyzes the moral or the physical nature, or in that which leaves society polluted as if a foul stream had coursed through it.

One Step at a Time.

People do not become debased all at once. The first step has to be almost imperceptibly lower than the ground whereon the feet have stood, and for a long time the descent is so gradual as to be scarcely noticeable.

Omit one step and the downward course may be halted altogether. We are told that "Vice is a monster of frightful mien." Perhaps so, when it is unmasked, but clothed in tinsel and gold and handled by respectable people in a respectable way, and even it may be attractive to unguarded youth.

Individual responsibility is the heritage of every person and whether we will or not we are in a greater or lesser degree the keeper of our brother's safety.

It is George Horace Lorimer who says: "It's good to have money and the things that money can buy; but it's good, too, to check up once in a while and make sure you haven't lost the things that money can't buy."

St. Louis W.O.N.A.R.D. Acts on Medical Circulars.

The Women's Organization of St. Louis, at a dinner at the Southern Hotel recently, adopted resolutions condemning the distribution of patent medicine circulars in drug stores and public places. The following were elected members of the executive board: Mesdames Victor Diesing, William Ittner, Andrew Ludwig, Jennie Busch, E. A. Nernins, Charles Renner, H. Fricke, Martin Noll, Richard Kring, L. A. Fritz. Mrs. William Ittner is president and Mrs. Victor Diesing secretary.

Nashville Branch Will Hold a July Meeting.

"Filtration" and "What Books Should a Druggist Have in His Library" will be the subjects at the meeting of the Nashville (Tenn.) Branch of the A.Ph.A. on July 14. The branch was organized last April and has more than 30 members. The president is J. O. Burge; Ira B. Clark, vice-president; L. P. Brown, secretary; R. L. Eve, treasurer; Wm. R. White, council member.

Municipal Drug Store for Swedish City.

Stockholm, June 20.—The city of Stockholm is about to establish a municipal drug store, which it is estimated will save the taxpayers $75,000 a year. The apothecaries' shops here are conducted on monopolistic lines and the people are compelled to pay high prices for medicines. It is expected that the innovation will tend to make the charges more moderate.

CORRESPONDENCE

Satisfied With Mr. Liggett's Management.

Editor The Pharmaceutical Era:

With many of your friends we regret that you should persist in presenting the Riker-Rexall controversy in such a partisan manner.

Your articles certainly lead to the opinion that there is but one side to the case.

To my mind, the most serious feature of the Riker plan is their encroachment of the field in suburban towns where old stockholders have built up a Rexall trade, and now the Rikers come in and divide it up.

Co-operation and protection have spelled success for the United Drug Co., and the stockholders are well satisfied with Mr. Liggett's management along those lines. Very truly,

FRED'K A. RUSSELL.

Tarrytown-on-Hudson, N. Y., June 15, 1910.

Mr. Kirchhoff Surprised by News of His Death.

Editor The Pharmaceutical Era:

I was very much surprised when I read an article published in THE PHARMACEUTICAL ERA, June number, page 609, to learn the sad news that I had taken a dose of poison and died in a few minutes after taking the same. It would please me to have you rectify the error in your next issue. My health has been very poorly for some time, but after a much needed rest and change of climate I am gradually getting better, and expect to be able to return to Bridgeton, N. J., early in the fall, a live, healthy man. Yours respectfully,

Lewes, Del., June 9, 1910. HARRY C. KIRCHHOFF.

Gave Him an Education in Pharmacy at Home.

Editor The Pharmaceutical Era:

This is to certify that I have taken the ERA COURSE IN PHARMACY for the past ten months and completed the course, for which I received my diploma a few days ago. I feel so thankful to you and all connected with the course for what you did in helping me secure a pharmaceutical education at home. I feel sure I can pass any State board, and I cannot recommend it too highly to anyone desiring to take the course. Yours respectfully, THOS. W. SHYLER, Ph.G.

Greenville, S. C.

Trustees Elected by Massachusetts C.P.

BOSTON, June 20.—At the annual meeting of the Massachusetts College of Pharmacy President C. Herbert Packard presided. Reports showed a particularly successful year. The assets are $335,000 over liabilities. E. O. Engstrom, of Pittsfield, was elected a trustee to fill the unexpired term of William F. Sawyer, resigned. Irving P. Gammon, of Brookline; John G. Godding, of Boston, and George E. Grover, of Somerville, were elected to serve as trustees for five years each. Linville H. Smith, of Jamaica Plain, was re-elected a trustee of trust funds.

Picnic of Washington Chapter, W.O.N.A.R.D.

On June 8 the ladies of Washington Chapter, W.O.N.A.R.D. were hostesses at a picnic in Rock Creek Park. Dainty and satisfying refreshments were served, and the time was passed in social intercourse and games. Prizes were awarded to the winners among children, women and men. Among the ladies who actively participated were: Mesdames R. W. Duffey, Chas. J. Fuhrmann, W. S. Richardson, A. C. Taylor, W. C. Field, A. T. Kerfoot, Wm. Memler and Misses Irene and Naomi Richardson.

Young Woman Pharmacist Now a Physician.

MILWAUKEE, June 20.—Miss Irene Gabriella Tomkiewicz of this city and widely known as the only Polish-American girl in the United States to have a graduate pharmacist's degree, has added new laurels to her long list of honors. At the recent commencement of Marquette University Medical School, Miss Tomkiewicz was one of the two young ladies who received an M.D. degree. She is the daughter of John W. S. Tomkiewicz, druggist at 545 Lincoln avenue.

Politics and Politeness.

By Joel Blanc.

"POLITICS and politeness? Whoof! Cut it out!" Thus, in imagination, I hear one voice say. From another of my most respected and beloved critics, the above heading will probably elicit a good-natured "More-of-little-old-Joel's-hot-air." Well, here is my usual come-back: "Retail druggists, as a class, are about as devoid of political finesse as a herd of sheep. More so, in fact, for sheep follow a leader." I first wrote that opinion about five years ago, and my experiences of the last year have confirmed it many times. My favorite, and oft-used character, "Mike the Grafter," the lovable old man who was formerly a machine politician, is not over-drawn. In him I but picture an old-time machine politician of Illinois, one whom I knew intimately and admired greatly. But now for my treatise upon real life of the present—a little essay from which I hope you will profit.

Courtesy of Government Officials.

For over a year my duties have brought me repeatedly in contact with officials and employees of the National Government. Hardly a day passes but that I find it necessary to visit some executive department, the Senate or House document room in the Capitol, a committee room, or the office of a Congressman or Senator. Right here I want to go on record as saying that one of the chief reasons why this has been the happiest year of my life, is that I have been treated with courtesy by all the government servants with whom I have come in contact. I find it easier to secure access to the presence of a United States Senator than it was to secure interviews with the proprietors of a good many seven by thirteen and a half drug stores, when I was a traveling man.

The document room of the House of Representatives is located in crowded quarters just off of Statuary Hall, in the House end of the Capitol. Here is employed a varying force of from ten to twenty young men. There are times when they have but little to do, but during most of the office hours this document room is the busiest place in your Uncle Sam's scrap factory. Sometimes the applicants for documents line up before the railing five lines deep. There are Congressmen, their secretaries, impetuous kid pages from the House, newspaper men, correspondents, and an assortment of general public, including types of the cranks and freaks with which the Capital is so well supplied. The boys of the document room have to scramble through bundles of papers, scurry up and down ladders to reach the higher files, and yet, in the midst of the hustlingest hustle, they maintain themselves as self-possessed, obliging gentlemen. For those who are not familiar with the methods, and cannot explicitly describe what they want, the document clerks will scan indexes, look over "calendars," and seem to be as deeply interested in the desired document as is the person who came for it.

Learning Lessons of Self-Control.

I wish I could line up the drug clerks of the country and march them through that document room at a slow pace. They would learn lessons of self-control, concentration of business thought, kindly patience and good manners, that years of other teaching would not impress upon them.

The Senate document room is as different from the House room as the Senate is from the House. Situated on the quiet gallery floor of the Senate wing, carpeted and upholstered, with an air of repose and in sharp contrast with the rush of the House room, it is presided over by men considerably older than those of the other document room; but here the same unfailing courtesy, the same seeming eagerness to oblige, is to be found, and the gentlemanly applicant who goes there meets only gentlemen.

I have used the document rooms for illustration because they represent the extremes of conditions which one will find throughout government offices. It matters little where one may go throughout the labyrinthine government buildings, from elevator conductor to Representative or Senator, he will find the same natural, unexaggerated politeness—provided he conducts himself as a gentleman. This applies to executive as well as legislative departments. Dr. Wiley's proverbial good nature is but a magnified reflection of what is to be found from one end of the city to the other, from Navy Yard to Hygienic Laboratory.

Now, you may say that this is "just politics, just sham, just palaver." You may say that these people are working for everybody, draw their salaries from the population of the country in general, and are looking out for themselves first, last and all the time.

Politeness a Profitable Business Asset.

For the sake of an hypothesis upon which to argue, we will acknowledge the truthfulness of the statement. Is not every planned act and word of every man performed or spoken for his own good? Do not the druggist and drug clerk draw their living from or the hope to profit by all people with whom they come in contact within the store? Is not politeness more directly profitable when bestowed upon one who does pass or may pass money directly across the counter than when a government servant uses it upon strangers who contribute to his salary only in infinitesimal measure through the revenue stamps upon the cigar boxes?

Probably you have met some man whom you had previously read of as "a ward heeler," "political tough" or "office-chasing bum." Probably you have been surprised to find that the supposedly dirty, vulgar hoodlum was a finely and yet modestly dressed, clean lipped, clean living man of apparent refinement. When I first opened that unending book of Human Nature to make it a life study, my most amazing and most helpful lessons were learned by coming in personal contact with some of the "notorious characters" of whom I had read. How well I remember my first meeting with "Mike the Grafter." I had pictured a man wearing spring bottom trousers, such as the stock-yards workers wore, vestless, collarless, a bandana handkerchief around his neck, and a leather cap upon his head. When, in the residence of the mayor of Chicago of that time, I was introduced to Mike, I nearly fainted—for what he was and is, I have often told you.

Do Not Judge by Appearances.

Now, I ascribe the self-control, the ease and politeness of the men in political life to their having learned a lesson which many of us in the commercial world have failed to learn. Seemingly, many of us persistently refuse to learn it. That lesson is headed "Do not judge by appearances." The most ill-bred druggist or clerk in the world is the one who truckles to a coat and sneers at a brain.

The old theory that gentlemen are born, has given place to the realization of the fact that gentlemen are bred. Moreover, the breeding of a gentleman lasts as long as life itself. We may sneer at the thought of being a gentleman for profit, but we must not forget that he who is polite behind the counter for profit's sake soon finds that his nature is changing, and in the course of time he becomes a natural gentleman all the time.

Develop Business Politeness.

Let me call your attention to another development of business politness. The business boor of today is usually found in a small store. Successful business men have learned to value politeness as one of their chief commercial assets. The grumpy, snarly or slovenly clerk has no hope of securing a high position in a large establishment, until he reforms his manners. None but men on his own level will employ him. Proprietors also should remember that one of the chief attractions of the great competing establishments is the uniform politeness which the high officials practice and demand of their subordinates.

For another illustration of the value of politeness in business we can go back to George Washington. When he responded to the hat salute of one of his negro servants by tipping his own hat, he explained it by the statement that he would allow no inferior to be more of a gentleman than himself.

Lessons for Store-Owning Druggists.

The worst as well as the best of us are prone to salaam to the dollar and scoff at the dime. The politeness of politicians should afford store-owning druggists many good lessons upon this trait. We may say that politicians only consider votes. Granting that, we can but respect the consideration which makes their politeness general and continuous, instead of periodic and spasmodic, as our own conduct oftentimes is. Then, it is well to remember that if you bow to a true gentleman who wears a silk hat, and he sees you scowl at one who wears a battered hat, he knows that it was the hat and not the man you bowed to, and he values you accordingly.

Should be Courteous to Each Other.

Now for the last point on political politeness: The men in the government service are courteous to each other. Whether they are so by rule or choice, I do not know—it makes no

different stores. [illegible] A store occupied by both men and boys will not be any more thing but a collection of boors to other people. If you treat your clerks like cattle they will treat each other in a similar manner. If your patrons see and hear ill-bred actions and words among the men of the store, no over-the-counter suavity in the world will appeal to them. It is generally believed that a man who will kick a dog will kick anything he is not afraid of. If the men in the store do not treat each other with civility, the civility with which they treat their patrons is an open, bare-faced sham.

Compared with the actions the average individual sees in the majority of retail stores in other lines, drug store folk are paragons of politeness. But occasionally we find a drug store which seems to be managed by men and boys who are utterly lacking in politeness. Such places are probably beyond reform. More often we find a store wherein one person is the bull in a china shop. It is to the owners of such stores that I appeal for reform—especially where the owner happens to be the bull.

Drugs in Panama Canal Zone.

By Lewis A. Smith.

NO doubt all druggists, as well as all other intelligent people of the United States, are more or less familiar with the great ditch-digging enterprise Uncle Sam is engaged in upon the Isthmus of Panama. At least the salient features of this gigantic undertaking are familiar to every one who reads the newspapers.

Sanitation, prophylaxis and medical treatment is a sine qua non in this one-time mosquito paradise. The Department of Sanitation, under Col. W. C. Gorgas, made it possible for Americans to dig and live on the Isthmus. They can continue living and digging only so long as the sentinels of health are on guard. The removal of three million cubic yards of earth per month from a place infested with infected stegomayae is not possible, as the French might testify. So, while the Department of Sanitation may not be an integral part of the Canal digging machine, it is at least a necessary adjunct.

As a cog in this part of the machine, the druggist plays his accustomed role of "The Man Behind the Gun." There are two main hospitals in the Canal Zone, Colon Hospital, in Colon, situated near the Atlantic entrance to the Canal, and Ancon Hospital, built at Ancon Hill, overlooking the Pacific entrance. The former hospital has 500 beds and averages about 300 patients, the latter 1200 beds, and averages about 900 patients, including 200 insane. There are also twelve or more dispensaries, one in each town along the line of construction, and at Palo Seco Leper Asylum, on an island in the Pacific, there are at present 25 lepers. Taboga Sanitarium, for convalescing white Canal employees, is on an island in the Bay of Panama. In the city of Panama is Santo Tomas Hospital, being in charge of Panamanian physicians, but having two or more American physicians on the staff, detailed there by the Sanitary Department.

As medical attention, as well as drugs, are furnished free to all Canal employees and their families, it may be readily understood why a large amount of drugs are expended. I dare say, if one druggist had a monopoly of selling all drugs used by employees at an ordinary drug store profit, Messrs. Carnegie and Rockefeller's charity corporations would for such a one be unnecessary. Every employee, who is not sufficiently energetic to contract a tropical disease, imagines he begins to feel returning symptoms of a half-forgotten "States" ailment. Why not? Medical attention and drugs are furnished free. The only people living in the Canal Zone who are not neurasthenics are the ones just returning from or are about to go for a six weeks' vacation in the States.

In my experience as druggist for one year at Colon Hospital and two and a half years at Ancon Hospital, I have observed but little change in the nature of the drugs prescribed, although for some time strictly tropical diseases seem to be disappearing, while "States" ills are becoming more fashionable.

More quinine sulphate and magnesium sulphate are dispensed than any other two drugs. At Ancon Hospital we dispense on an average 50 kilos of the former, and 125 kilos of the latter per month. [illegible] of the quinine is used in the form of "quinine tonic," consisting of quinine sulphate, [illegible] water, [illegible]. One dr. preparation per [illegible]

month of this mixture are shipped to the towns and labor camps along the line of the Canal, where it is dispensed chiefly to the laborers for prophylactic purposes. No doubt it decreases the prevalence of malaria, although it is not as necessary as formerly. Mosquitoes in the Canal Zone are becoming conspicuous by their absence.

Practically every patient entering Ancon Hospital receives a nice large dose of 50 per cent solution of Epsom salt, after which they are considered malaria suspects until they prove their innocence or confess.

All drugs and hospital supplies used in the hospital and the line dispensaries are requisitioned for from the Medical Storehouse at Cristobal, which in turn orders its supplies from the Medical Supply Depot in the United States. During the last fiscal year about $166,000 of expendable property was used by the Department of Sanitation. The medical storehouse carries in stock practically all drugs entering into preparations listed in the U.S. Pharmacopœia, but no patent medicines and very few proprietary articles.

Cristobal and Ancon are the American sections of Colon and Panama cities, respectively, being separated only by a street. In Panama City there are 20 or more drug stores, and in Colon about six. Colon has a population of about 12,000, and Panama 30,000. There is no strictly up-to-date American drug store in either place. The drug stores no doubt derive considerable support from the 10,000 Americans residing in the Canal Zone, as there are a great many articles people from the States are accustomed to purchasing from drug stores, that are not furnished free by the commission—such as patent and proprietary medicines, atomizers, toilet articles, etc. Either the proprietor or an employee in each store speaks English.

Since the "American invasion" practically all the drug stores carry in stock articles of the above nature of American manufacture, although I believe by far the larger part of the stock of drugs, etc., are purchased from Germany and England. Without doubt wholesale drug houses in the States could increase their business in the Republic of Panama and all of the Central American republics, if they were to employ the same hustling methods that they do in the States. Panama City is growing rapidly and becoming more Americanized every day. In my opinion both the Yankee spirit, and a great many Americans, themselves, are in the tropics to stay.

Recent arrivals from the States, especially women and children, wth the ice cream soda habit, feel keenly the absence of soda fountains, for while there are a few small ones in Panama City, there is no place where the color line is drawn, and the menu is extremely antiquated and limited.

Ice is scarce and electric fans an unknown luxury. The Y.M.C.A. club houses in the Canal Zone serve ice cream, limeade, grape juice, etc., but the service and the soda fountain atmosphere is not the same as at home.

An up-to-date ice cream parlor and freezing weather are almost the only things that "canal diggers" do not have the same as in "God's country." However, we are reconciled to the absence of the latter, and hope for the former some day.

What People Think of Price-Cutting.

In an article in the *Commercial Union* it is stated that when the price of a standard article is reduced without any reason it is the most natural thing in the world for people to reduce their conception of the value of that article in accordance with the lowered price. When a buyer purchases an article at a fair price he naturally expects that it is equal to representations and that it is guaranteed. If the same article is purchased at a cut price, what becomes of the guarantee?

How can quality be maintained at a standard point when the price is allowed to fluctuate?

Does not the offering of a superior article at a cut price cause distrust in the purchaser's mind against the value of all advertised articles?

Is there any better standard of value than uniform price [illegible]?

Is there any other known method by which an article will stand or fall on its own merits?

If the manufacturer places his price too high his product will never succeed even with the best advertising and the most perfect organization.

In view of the fact that the advertised goods are uniformly the most economical and satisfactory, the dealer who makes [illegible] of a reputable manufacturer's goods to secure petty [illegible] is not a good customer for the manufacturer or a safe merchant from the buyer's standpoint.

New York State Ph. A. Names Nominees for New Board of Pharmacy.

Local Branches Suggested, Membership Increased, Propaganda Approved, Scholarships Established, Drug Clerks Hours to be Shorter, Valuable Papers Read.

Members of the New York State Ph.A. on the outing at Lake George; by Fred C. Thatcher, photographer, Lake George, N. Y.

SARATOGA, June 24.—The thirty-second annual convention of the New York State Pharmaceutical Association this week was remarkable for its harmony, for while some threatening clouds might have been noted at the opening still they all blew away and no storm disturbed the proceedings.

President Thomas Stoddart being delayed, the meeting was called to order and the president's address was read by Arthur S. Evans, the first vice-president. The association was welcomed to Saratoga Springs by the Hon. Willard Lester who spoke warmly of the work that had been done by the druggists in helping Saratoga in her efforts to have the famous mineral springs placed under the control of the State. Dr. Willis G. Gregory, Buffalo, responded. Thomas R. Kniel extended the welcome of the local drug trade and said he could promise the members anything that they wanted "except Teddy and the tail of Halley's comet." In responding ex-President William Muench, Syracuse, said that the beauties of the place, its many historic associations, and its world famed waters were all inducements for the association to visit Saratoga, but that they would never have come so often as they did had it not been for the loyalty and the open hearted hospitality of the local druggists.

Would Establish Local Branch Associations.

President Stoddart's address pointed out that the association did not have on its rolls even a majority of the pharmacists of the State and that this fact was being continually thrown into the teeth of the officers in their legislative efforts. He urged more active organizing work and suggested that the association establish local branches, a suggestion that was received favorably by the committee to which the president's address was referred and ratified by the whole convention. He also recommended that a larger percentage of the annual income be devoted to the U.S.P. and N.F. propaganda work and that the work be actively pushed by a committee. This also met with approval, but the convention did not agree with the suggestion that whenever a subject of vital importance and interest to all the pharmacists of the State came up that the secretary be instructed to send out notices to all whether or not they be members of the association.

President Stoddart referred to the formation of several large corporations operating drug stores, but said that he did not think that they threatened any dire calamity to the small druggist "as there is not at present, and never was, either any corporation, or any individual, strong and powerful enough ever to fully control the output in any given line of business or trade." He praised the work of the present Board of Pharmacy and said that a debt of gratitude was due to the legislative committee for their "most excellent work in giving their voices and influence in favor of the passage of a new pharmacy law, which is bound to better conditions for every pharmacist in the State."

The secretary, E. S. Dawson, drew attention in his report to the falling off attendance at the last convention and suggested that the cause be discovered and that it be discussed whether it would be more wise to hold the meetings in some city rather than in a summer resort. The membership a year ago was 1321, but had fallen to 1286. During the convention 70 new members were elected, bringing the membership total up to 1356, showing a healthy increase in spite of the depletions by death, resignation and dropping for lack of dues. Of the 70 new members 63 were offered by R. W. dePuy, secretary of the Travelers' Auxiliary.

Special committees were appointed to draft resolutions on the deaths of the late Oscar C. Kleine, chairman of the executive committee, and William Blaikie, the association's first treasurer. A committee consisting of Dr. F. P. Tuthill, John E. Grady, and Ulrich Wiesendanger was appointed to draw up a resolution expressing the thanks of the association to Assemblymen Geo. H. Whitney and Charles F. Brown and Senator Henry W. Hill, the legislators to whose efforts are due the passage of the new Pharmacy law. The association also voted to send some token of its good wishes to ex-President William H. Rogers of Middletown, on the eve of his sailing for Europe. Communications were read from the Massachusetts State Pharmaceutical Association, Dr. and Mrs. William C. Anderson in Los Angeles, and Dr. Lyman F. Kebler, of the United States Bureau of Chemistry, and the secretary was instructed to send suitable replies.

The report of the treasurer, Frank Richardson, showed that the association is in a sound financial condition: receipts, $3524.95; disbursements, $2281.88; cash on hand, $1243.07.

Nominations for New Board of Pharmacy.

On the suggestion of Dr. H. L. Taylor, of the State Education Department, a committee of five, Charles B. Sears, Dr. Willis G. Gregory, George H. Hahn, Thomas P. Cook and William Muench were appointed to recommend the best means of balloting for the nominees to be presented by the association to the Board of Regents as candidates for members of the new Board of Pharmacy. This committee suggested that the balloting be held at noon on the second day of the convention and that the nominations be made from the floor; the names of the 25 receiving the highest number of votes to be sent this year and in the future those nine receiving the highest vote. This suggestion was enthusiastically received.

The balloting for the 25 nominees was the most interesting feature of the meeting. The old board was nominated in a body by Peter Diamond and seconded in several laudatory speeches from different members. John J. Healy, Troy, and A. E. Hegeman, Brooklyn, were appointed tellers. Twenty-six pharmacists were named on the tellers' returns, Messrs. Evans and Kleinau having tied for the 25th, but the withdrawal of Edward S. Dawson brought the number down to

that required by law. The list to be sent to the Regents is as follows: George C. Diekman, William Muir, J. B. Todd, J. A. Lockie, C. O. Bigelow, John Hurley, A. S. Wardle, B. M. Hyde, George Remsen, William C. Anderson, Willis G. Gregory, S. A. Grove, Joseph Weinstein, J. C. Krieger, Charles B. Sears, L. W. Miller, W. B. Bissell, Peter Diamond, Thomas Stoddart, Charles L. McBride, A. B. Huested, J. Leon Lascoff, John E. Grady, A. S. Evans and George Klemau.

Clerks Protest Against Longer Hours.

Another interesting feature of the Saratoga meeting was the reception of a delegation of drug clerks from the National Pharmaceutical Society. The twelve delegates were introduced by the president of the Travelers, Edward Schott, and the privilege of the floor given to them by President Stoddart. Their spokesman, Bradley H. Kirschberg, spoke ably against the clause of the new Pharmacy Law which increases the maximum number of working hours for the clerks from 136 hours in two weeks to 140 hours. Dr. Muir, for the legislative committee, said that this clause had been slipped into the law without the knowledge of the committee and when noticed the bill was so far along towards passage that to amend it would have been risky. He moved that the legislative committee be instructed to see that the law is amended from 140, not to the old limit of 136, but to 134 hours. The motion was carried unanimously.

Mr. Kirschberg then asked for enlightenment on that part of the new law which provides for the registration of pharmacists who are registered in other States whose educational requirements are equal to those of New York. He said that the clerks could see no reason why ten States could not very easily raise their requirements to those of New York and that to admit them would be to flood the market with clerks and by the law of supply and demand to reduce the wages. Dr. Muir explained that the law was a grand one; opening for the first time the way to interstate reciprocity, similar to that enjoyed by the medical profession. He showed how elevating a tendency it must have on pharmacy the country over and suggested that the best thing to do is to wait and see whether or not the law is to be used as its framers intended or whether it will be abused.

Scholarships in Schools of Pharmacy.

A third important feature of the convention was the starting of a new idea in the educational phase of pharmacy, namely the establishment, under the control of the association, of several scholarships in the different schools of the State. The generosity of John L. Thompson & Son, of Troy, is responsible for the innovation, but the plan of action comes from Dr. Henry L. Taylor. Scholarships will be for one year, for it is thought that a boy with the proper stuff in him will find a way to get along the second year if he has the help of a free tuition his first season. A standing committee of five will work out the details of the scheme. The proposition had no sooner been made to the association than offers for scholarships came in. Thomas Stoddart and Charles Adam Drefs both offered for the Buffalo College, Kings County Pharmaceutical Society pledged one for Brooklyn and the New York College Alumni made a similar promise for their alma mater.

Graceful Compliment to Dr. Taylor.

The president presented to Dr. Taylor the pen with which the Governor signed the new Pharmacy Law, thanking him in a complimentary speech for his work in behalf of its passage. The pen was neatly framed, together with a certificate of authenticity signed by Governor Hughes. Dr. Taylor made a graceful speech but preferred to turn the pen over to the Board of Pharmacy to be hung in its office in the Capitol. Warren L. Bradt, secretary, accepted the pen on behalf of the new board.

The report of the legislative committee showed that but six bills affecting pharmacy were introduced in the Legislature last winter. All except the State Association and the Cocaine Bill either died in committee or were killed on the floor.

[illegible] committee, the report for the committee on U.S.P. and N.F. propaganda work [illegible] Pharmacopœia Revision Committee.

[illegible] from the pharmacists of the State. This report would help [illegible] the work of all the good elements of the country [illegible] of merit of the National Revision Committee. This suggestion was acted on favorably and the by-laws were amended so as to provide for the appointment of a Pharmacopœia Revision Committee.

As Dr. Anderson was not present, his report for the committee on U.S.P. and N.F. propaganda work was given by Dr. Muir, who showed the efforts of the committee had been largely centered in the encouragement of holding "get-together meetings," and he urged that the individual pharmacists do all they could to support this work, saying that while the committee could do much, and was only too glad to do it, still the best work often came from the stores. The committee suggested that all local organizations devote at least two meetings each year to the propaganda work. It was unanimously agreed that the results obtained for these meetings yielded satisfactory results. Mr. Lascoff suggested that the doctors' favorite habit of prescribing ready-made tablets and suppositories might be broken up by practical demonstrations that the druggist could make these to order, as it were. Mr. Raubenheimer pointed out the importance of having the more common N.F. preparations all ready made up so that they could be dispensed quickly.

Dr. Gregory, reporting for the committee on pharmacy and queries, said that a special effort had been made to get papers from young men who had never written before in hope of stimulating their interest in this branch of the association's work. Some of these papers were very good, while the maturer efforts of Mr. Raubenheimer, Professor Sy, Professor Lock and J. Leon Lascoff were, as usual, worthy of consideration and praise. The papers secured by the committee were:

Early History of American Petroleum, Otto Raubenheimer; Oil of Sesamum, Otto Raubenheimer; The Pure Food Law and Its Effects on Drugs and Medicines, Prof. A. P. Sy; Prescription Kinks, Prof. Frank E. Lock; The Hospital Pharmacist, Miss Hattie May Seeley; Show Windows, C. A. Elliott; Side Lines, Tincture of Nux Vomica, Elixir of Lactated Pepsin, Walter C. Fomeznk; Soft Soap, Earl L. Hess; Cleaning Greasy Mortars, Carl E. Freeman; Dead Stock, Royal T. Gulley; Fishing Tackle as a Side Line, C. J. Parker; The Little Man, C. C. Price; Are Drugs a Side Line in Our Business? J. Leon Lascoff.

A very valuable report was the one for the committee on commercial interests by C. O. Bigelow. He showed how higher rents, greater costs, more wages and shorter hours for clerks have all been combining to force the pharmacists to demand higher selling prices and warned all the druggists to do a little figuring and find out just how they stood in this respect. He also showed that the big stores have all been raising prices without any falling off in patronage and drew attention to the fact that recently the press has been educating the public to higher prices. The committee supplemented this report with some excellent papers on the business side of pharmacy. These papers were:

Eternal Vigilance the Pharmacists' Watchword, Thomas P. Cook; The Evils Resulting From the Prescribing of Proprietary Preparations, Charles A. Drefs; A Pharmaceutical Metamorphosis, Judson B. Todd; Suggestions of Commercial Importance to the Pharmacist, E. F. Hunting; The Advantages to a Druggist Sheltered by Realty Holdings, O. J. Larkin; The Back-bone of the Druggist, D. Master, Jr.; A Pessimistic View of the Pharmacist, Otto Regnault; Substitution vs. Salesmanship, Bernard Colle.

The State service committee, through its chairman, Warren L. Bradt, recommended the conference of a special committee with committee on salaries of the State Senate to see if something could not be done to get an increase in pay for pharmacists employed in prisons, hospitals and other public institutions.

Reports were received from the delegates who had represented the association at different meetings and conventions. Edward A. Sayre reported for the recent Cape May meeting of the New Jersey Ph.A.; Otto Raubenheimer for the A.Ph.A. and Dr. Muir for the N.A.R.D.

Among the associations represented was the Italian Pharmaceutical Association, which petitioned the convention through its delegate, Vito Calcagno, that an effort be made to [illegible] dispensing by physicians, an evil with which the Italian druggists are especially beset. Dr. Muir suggested that the Italian organization collect some evidence and present it to the board, and the delegate promised that this would be done, and later drew attention to the suggestion made some years ago that a law be enacted making it impossible for a dispensing doctor to sign his own death certificates and turning all such cases over to the coroner. The legislative committee was instructed to work for the passage of such a law next winter.

Just before the time set for the election of the new officers, the members of the Travelers' Auxiliary marched into the

Committee of National Pharmaceutical Society and Five Honorary Members

Top row, left to right: Morris Feinberg, J. George Ahrens, Prof. George B. Ferguson, Saul Kobrick, Bradley H. Kirschberg, Secretary Samuel W. Fraser, Saul Patterson, Peter Diamond, Orest S. Ghirardi, Vito Calcagno, Carl W. Bliss, counsel; bottom row: Saul Lourie, Henry Glassman, President W. E. Crews, Dr. George C. Diekman, Edward Schott, Dr. Joseph Weinstein.

meeting in a body and their new officers were presented. They were:

President, H. P. Snow; vice-president, John A. Dixon; secretary and treasurer, R. W. de Puy; chairman of the executive committee, D. M. Woodward; chairman of the entertainment committee, Louis E. Treat.

The committee on time and place of the next meeting, consisting of George Reimann, chairman; Thomas Lamb and T. S. Gardner, reported the selection of Thousand Islands Park and the announcement was received with applause.

The election of officers resulted as follows:

President, Arthur S. Evans, of Utica; first vice-president, Charles B. Sears, of Auburn; second vice-president, L. J. Schlesinger, of Yonkers; third vice-president, Charles F. Fish, of Saratoga Springs; secretary, Edward S. Dawson, of Syracuse; treasurer, Frank Richardson, of Cambridge; executive committee, Alfred M. Palmer, of Olean; John J. Healy, of Troy, and Peter Diamond, of New York City.

The members and their friends spent a whole day on an excursion to Lake George. The local committee maintained Saratoga's reputation as a good place for a good time, for the programme was especially attractive. It included two dances, a card party and a drive for the ladies, a base ball game between the "Tigers" alias the State Ph.A. base ball team and the "Pirates" as played by the Travelers' Auxiliary, which the druggists won by a more than comfortable score. As usual, the Auxiliary provided an evening's entertainment and a right royal good time it proved to be.

ARKANSAS A.PH. RECOMMENDS ALKALOID LAWS

Members Also Favor Establishment of a State Pharmacy Department and Propose Board Candidates.

FORT SMITH, June 20.—The creation of a State pharmacy department and the enactment of laws stringently regulating the sale of morphine, cocaine and other alkaloid drugs were recommended to the Arkansas Legislature by the Arkansas Association of Pharmacists at its recent 28th annual meeting. The invocation was made by the Rev. Dean Murray, of St. John's Church, and the address of welcome by Mayor W. J. Johnston. Frank Schachleiter, of Hot Springs, and W. A. Bostick replied. About 250 were in attendance.

For appointment to fill the vacancy on the State Board of Pharmacy, Wm. F. German, Fort Smith; J. B. Bond, Sr., Little Rock, and Frank Schachleiter were recommended to Governor Donaghey.

Much of the discussion was devoted to criticism of "cut rate" methods of business. Papers were read by C. A. Hoffman, Little Rock, and R. A. Warren, Clarkesville, and the latter urged the establishment of a Pasteur institute at Little Rock.

Miss Mary A. Fein as secretary and treasurer, reported 72 new members elected and $400 subscribed at this convention.

The following officers were elected for the ensuing year: President, Henry Weimar, Hot Springs; first vice-president, W. A. Bostick, Van Buren; second vice-president, S. W. Hawkins, Fort Smith; secretary and treasurer, Miss Mary A. Fein, Little Rock; member executive committee to succeed A. L. Morgan, Camden, L. K. Snodgrass, Little Rock.

The convention was to a great extent a personal triumph for Miss Fein, who now begins her 15th year as secretary. She was presented by H. H. Adams, president of the Patten-Worsham Drug Co., Dallas, with a handsome gold-mounted fountain pen. From the members at Fort Smith she received a gold-headed umbrella and many others sent flowers, candy and perfume to her room at the hotel. The association presented her wth $100.

Features of the entertainment afforded were a ball at Goldman Hotel, field events at Electric Park, a strawberry festival and an auto ride.

The 1911 meeting will be held in Little Rock.

The following were elected officers of the Arkansas Travelers' Pharmaceutical Association, which met in conjunction with the State association: President, W. R. Patterson, Oklahoma City; first vice-president, J. L. Bowner, Little Rock; second vice-president, E. H. Rutledge, St. Louis; third vice-president, A. C. Meyer, St. Louis; secretary and treasurer, I. W. Kurtz, Fort Smith.

ALABAMA PH.A. TO BECOME A CORPORATION.

President Lee Whorton Raps Proprietaries in Annual Address, Commends New Food and Drug Law.

MOBILE, June 20.—At the 29th annual meeting of the Alabama Pharmaceutical Association the address of welcome was delivered by the Hon. Boykin B. Boone and responses made on behalf of the druggists by J. T. Roe, of Mobile, and W. P. Thomason, of Guntersville. In his presidential address, Lee Whorton, of Gadsden, expressed his gratification occasioned by the new model Pure Food and Drug Law which had been given the State. He recommended that the State Board of Pharmacy be delegated as a committee on adulterations and that the board employ a chemist to analyze specimens obtained in the open market. He expressed his desire that the association discourage self-medication and all proprietary nostrums. He especially condemned the immodest and insulting advertisements of some of these nostrums. That the association might be a more useful body, he recommended that it be incorporated. Because this had not been done before, the Alabama Ph.A. was not represented in the Pharmacopœial Convention. To encourage sociability and stimulate fellowship, Mr. Whorton offered $10 as a prize for a poem to be set to a "good old tune" for use as an ode at the annual meetings.

Charles M. Carr, Chicago, in a short address, elaborated on the N.A.R.D. and its work and was presented with a handsome gold-headed cane. Secretary W. E. Bingham read a paper on "New Volatile Oils." Another paper, by D. E. Morgan, was

also read by the secretary. Mr. Morgan proposed by a system of State dispensaries to do away with saloons and "blind tigers." J. D. Humphreys, of Huntsville, addressed the association on the small number of papers read and recommended that the president appoint a number of members to prepare themselves on certain subjects for the next meeting. Dr. C. A. Mohr, of the State Medical Association, said that a large number of druggists did not appreciate the physician, but that lately more advancements had been made by the physicians towards the pharmacists during the year than ever before.

A eulogy on the late Dr. P. C Candidus, one time honorary president of the A.Ph.A., prepared by Dr. E. F. Galt, secretary of the State Board of Pharmacy, was read by John Roe. It was biographical in nature. Dr. Candidus organized the association in 1881 and was its president for five consecutive terms. A resolution in tribute to his memory was adopted and a page reserved in the minutes for its inscription. The widow of Dr. Candidus was present and was greatly affected.

The following officers were elected: President, John T. Roe; first vice-president, W. P. Thomason, Guntersville; second vice-president, D. P. McDiarmid, Talladega; secretary, W. E. Bingham, Tuscaloosa; treasurer, F. F. Ravenscroft, Union Springs; executive committee, S. A. Williams, Troy; C. T. Ruff, Montgomery, and L. L. Scarborough, Anniston. Delegates to the N.A.R.D. convention at Pittsburg, September 12, appointed were: W. P. Thomason, Carl Whorton and J. E. Tucker, the last of Demopolis. New members elected, 49.

Features of the meeting were the matinee enjoyed by the ladies at the Lyceum Theater and the ball and banquet, participated in by both the members and their ladies, at German Relief Hall. Mobile Chapter, W.O.N.A.R.D., also held an informal reception for the visiting ladies. Prizes for securing the largest number of new members were awarded, in their respective order, to W. P. Thomason, J. T. Hawkins, Mobile, and F. F. Ravenscroft. Carl Whorton, Gadsden, received prize for best paper read, Miss Carie Whorton, prize for lady traveling greatest distance to convention, and J. D. Humphrey prize for latter distinction among the men.

Rhode Island Ph.A. Reaffiliates With N.A.R.D.

PROVIDENCE, June 20.—The law providing for registration of pharmacists which became active in January was the principal topic of discussion at the recent annual meeting of the Rhode Island Pharmaceutical Association. It met with the unanimous approval of the members. Elucidation of the new law was made by President Howard A. Pearce; James O'Hare, chairman of the committee on legislation; Prof. John E. Groff, pharmacist at the Rhode Island Hospital; Herbert Haynes, G. T. Armstrong and G. S. Morgan. It was voted to reaffiliate with the N.A.R.D. The following officers were elected:

President, A. J. Johnson, Jr., Pawtucket; vice-presidents, Providence County, E. T. Carlton; Bristol County, C. A. Gilroy; Newport County, R. F. Downing; Washington County, P. B. Davis; Kent County, A. L. L'Amoreaux; secretary, Clarence Beaumet; treasurer, G. T. Armstrong; executive committee, H. A. Pearce, H. L. Sawtelle and Enoch W. Nars. President Johnson appointed the following committees: Nominations, James O'Hare, John E. Groff and E. T. Carlton, membership, E. S. Bummerkranz; entertainment, W. A. Helmer, G. W. Payne, H. L. Chatterton; papers and essays, E. S. Bummerkranz, H. L. Chatterton and Adolph Backat; delegates to Pharmacopoeial Convention, H. A. Pearce, A. W. Tennant and E. A. Johnson.

Ex-President British Pharmaceutical Society is Dead.

London, June 20.—Michael Carteighe, ex-president of the British Pharmaceutical Society and a vice-president of the British Pharmaceutical Conference and long a strong factor in the agitation for better pharmaceutical legislation in Great Britain, is dead, aged 39. He was born in Lancashire and was educated at University College, London, where he took part in many important chemical and physical researches and at the most notable being an investigation of the constitution of [illegible]. In 1892 he entered the London School of Pharmacy and won many prizes. A year later he joined the firm of Dinneford & Co., [illegible] Carteighe was a member.

Mr. Carteighe held many high offices in the organizations in which he was active. In 1891 he was [illegible] of the London Pharmaceutical Conference and of the London. Twelve years later he went to the United States as a commissioner to the Council of the Society of Arts on a similar commission, and while visiting the World's Fair at Chicago he was elected [illegible] of the American Ph.A.

REVISION OF THE PHARMACEUTICAL SYLLABUS.

National Committee Reorganized, Sub-Committees Appointed and Work to be Completed October 1.

The responsibility for the revision of the Pharmaceutical Syllabus, published in February of the present year, has been assumed by the American Pharmaceutical Association, the American Conference of Pharmaceutical Faculties and the National Association of Boards of Pharmacy, each of the organizations named having provided members for its representation on the National Committee on the Syllabus and agreed to assume its proportionate share of the expenses. Both the Conference of Faculties and the Association of Boards have formally adopted the syllabus as a guide for future examinations during the syllabus period.

At the recent Richmond meeting the National Committee reorganized by the election of Willis G. Gregory as chairman, and Henry C. Taylor, of Albany, as secretary. The members of the committee representing the three associations named, are as follows:

A.Ph.A., Willis G. Gregory, Buffalo; C. S. N. Hallberg, Chicago; E. G. Eberle, Dallas, Tex.; Harry B. Mason, Detroit; Chas. Caspari, Jr., Baltimore; George M. Beringer, Camden, N. J.; Henry L. Taylor, Albany, N. Y. Boards: E. O. Engstrom, Pittsfield, Mass.; Samuel L. Hilton, Washington, D. C.; Charles Gietner, St. Louis; C. T. Heller, St. Paul, Minn.; David F. Jones, Watertown, S. D.; C. O. Bigelow, New York; Ernest Berger, Tampa, Fla. Conference of Faculties, J. H. Beal, Scio, Ohio; H. H. Rusby, Newark, N. J.; J. O. Schlotterbeck, Ann Arbor, Mich.; Julius A. Koch, Pittsburg; William C. Anderson, Brooklyn; C. B. Lowe, Philadelphia; Henry V. Arny, Cleveland.

This committee has organized several sub-committees and will prepare a revision of the Syllabus which is to be reported to the secretary not later than October 1, 1910. Criticisms and suggestions that may improve the Syllabus are especially desired and the members of college faculties and of each board are asked to give the same attention and report to Secretary Taylor at the earliest practicable moment.

INDIANA'S MEETING THE BEST IN ITS HISTORY.

155 New Members Join and Visitors are Handsomely Entertained by Wholesalers of Capital City.

INDIANAPOLIS, June 20.—The annual meeting of the Indiana State Pharmaceutical Association, June, 1910, held at the Claypool Hotel, was the largest, most business-like and best meeting ever held by that association. "Heretofore," said one of the old members, "we have had the association on wheels moving about from one place in the State to another. Now and hereafter our annual meetings will be held in Indianapolis, the center of the State."

There are in Indiana 2800 proprietors of drug stores, 4300 registered pharmacists, 490 registered assistant pharmacists. This June meeting had 550 members in attendance, of whom 155 joined at this meeting.

The talks and papers were of unusual interest. "Our Best Customer," was the subject of a paper read by C. E. Elliott, of Sheridan. He declared this best customer is "little Snookums," who from the time of his first howl until he is 5 years old has caused an expenditure of money with the neighboring druggist. Mr. Elliott was of the opinion that the druggist should stand by the Rooseveltian precepts that encourage the multiplication of the species.

Dr. H. E. Barnard, State Food and Drug Commissioner, spoke of the necessity for adequate punishment of the few so-called druggists who violate the ethics of the profession and the moral law by the sale of cocaine, possibly the most dangerous drug known and of which in Indiana a sale can only now be prosecuted under the Food and Drug Law with an insufficient penalty.

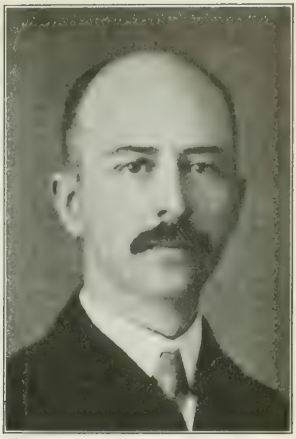
Prof. J. H. Gertler, of the Technical Institute, Indianapolis, suggested that there be more practical training in schools of pharmacy and that such schools be supplied with typical drug stores for practice work.

Dr. J. N. Hurty, secretary of the State Board of Health, read a paper on the life and accomplishments of the great Swedish chemist Carl Wilhelm Scheele.

The pharmacists at this meeting, so far as entertainments of various kinds were concerned, including the great flight of automobiles at the Indianapolis Speedway, were guests of the four wholesale drug houses and of Eli Lilly & Co., manufacturing pharmacists. Some of the members objected to these courtesies as they feared they were putting a burden upon

JOHN T. ROE, Mobile,
elected president of the Alabama State Pharmaceutical Association.

T. S. ARMSTRONG, Plainfield,
elected president of the New Jersey State Pharmaceutical Association.



JOHN R. MUTZ, Edinburg,
elected president of the Indiana State Pharmaceutical Association.

their hosts and at the same time incurring for themselves a certain responsibility.

At this juncture came one of the cleverest and most adroit speeches of the meeting. It was made by G. Barret Moxley, president of the A. Kiefer Drug Co., an eloquent young son of Kentucky, who pleaded that the wholesalers here, were any change made in the pleasant and most agreeable relations, would be the sufferers as these annual visits gave them opportunity to see their friends and patrons that would otherwise be lost.

The following officers were elected for the year:

President, J. R. Mutz, Edinburg; first vice-president, Charles Haupt, Terre Haute; second vice-president, J. D. Brown, Burnett's Creek; third vice-president, John T. Johnson, Fortville; secretary, Maurice Schwartz, Indianapolis; treasurer, Frank H. Carter, Indianapolis; executive committee, Edward W. Stuckey, S. C. Basye and Burton Cassidy.

N.J.PH.A. MEMBERS FIGHT OVER ANNUAL FEES.

Charles Holzhauer Claims Legislative Committee Went Beyond Instructions in Drafting New Bill.

CAPE MAY, June 20.—The 40th annual meeting of the New Jersey State Pharmaceutical Association was presided over by President George M. Andrews, of Woodstown. The report of the legislative committee, presented by H. A. Jorden, of Bridgeton, secretary of the State Board of Pharmacy, was severely criticized, Charles Holzhauer, of Newark, and others, insisting that the committee has gone beyond its instructions. It was voted at the 1909 meeting that the Pharmacy Law should be amended so that applicants for examination by the board would be required to present a diploma from a recognized college of pharmacy. Mr. Holzhauer asserted that the committee had presented a new bill which, if passed, would raise the registration fee from $10 to $20 for registered pharmacists, and from $5 to $10 for assistants. The latter subject the members hadn't even discussed, said Mr. Holzhauer.

In defense, Mr. Jorden explained that the attorney-general advised that an entire new law be drafted in preference to presenting an amendment covering the prerequisite question. Mr. Jorden said that his committee thought that if the law required an applicant for examination to be a college graduate, the number of applicants would be cut down to such an extent as to leave the board without funds. On that account they had advocated an increased registration fee. The proposed measure had since been changed, the fees being made the same as originally, due to its unpopularity. Stephen D. Woolley, of Ocean Grove, and T. S. Armstrong, of Plainfield, both members of the committee under fire, also spoke in defense.

A committee was appointed to draft a new pharmacy law incorporating the graduation prerequisite.

In his report as secretary, Frank C. Stutzlen, of Elizabeth, said the association has 637 active members, 84 associate and 17 honorary members. Henry A. Jorden, as secretary of the board, reported 169 pharmacists registered during the past year out of 569 applicants, also that there are now on the roll 2477 registered pharmacists and 131 registered assistants. David Strauss, Newark, treasurer of the board, reported an expenditure of $3575 and balance of $472.

S. D. Woolley, chairman of the trade interests committee, reported on the telephone situation. The telephone company was not represented at the meeting, although invited. President Andrews said he thought the company would do something for the druggists if the latter would reciprocate. Other reports and papers were presented by the following:

Committee on queries, Dr. P. C. Hommell, Dr. Hommell also read three papers, one on "Cataplasma Kaolini," on "U.S.P. Troches" and on "The Use of U.S.P. Tinctures"; "Interstate Registration," John H. Holcombe; "Oil of Gaultheria," George M. Beringer; "History of N.J.Ph.A.," E. A. Sayre; committee on memorial, H. A. Jorden, and brief address on "The Desirability of Increasing Membership of W.O.N.A.R.D.," Mrs. W. E. Lee, Philadelphia; propaganda work report, J. G. Smith, Rahway.

Resolutions aimed against the distribution of objectionable and obscene advertising of proprietary medicines and other materials sold by druggists, offered by George M. Beringer, were adopted.

Miscellaneous business performed consisted in the awarding to George M. Beringer the U.S.P. prize for his paper on "Synonyms in the U.S.P.," the appropriation of $25 for the N.A.R.D., and notice being given that at the next meeting a change in the constitution placing the cost of a life membership at $25 would be voted upon. The following officers were elected:

President, T. S. Armstrong; first vice-president, Edgar R. Sparks, Burlington; second vice-president, W. Pitt Rich, Verona; secretary, Frank C. Stutzlen; treasurer, J. C. Field, Somerville; executive committee, E. R. Sparks, ex-officio; C. W. Holzhauer, G. M. Hays Deemer, Atlantic City; William E. Warn, Keyport; Charles S. Barnett, Camden; legislative committee, S. D. Woolley, H. H. Deakyne, Atlantic City; L. W. Brown, Montclair; David Strauss, Newark; Bloomfield Hulick.

Twenty-seven new members were admitted. Asbury Park was chosen as the next place of meeting and Mr. Hulick was elected local secretary. The entertainment consisted of prize bowling, the Hecker's Social, yachting, etc.

The Ladies' Auxiliary elected these officers:

President, Mrs. E. A. Sayre; first vice-president, Mrs. George M. Andrews; second vice-president, Mrs. George H. Horning, Roselle Park; secretary, Mrs. Edgar R. Sparks; treasurer, Mrs. S. D. Woolley; committee on reception, chairman, Mrs. Bloomfield Hulick.

The Travelers' Auxiliary elected these officers:

President, Ralph M. Smith; first vice-president, C. M. Fletcher; second vice-president, A. M. Platt; secretary, W. J. Caughey, and treasurer, C. W. Haviland; executive committee, C. P. Pray, W. D. Fox and F. H. Higby.

'PHONE FIGHT AND PROPAGANDA CONTINUED.

President Rehfuss' Recommendations Presented at the Kings County Ph.S. Annual Meeting Adopted.

At the recent annual meeting of the Kings County Pharmaceutical Society, while Vice-President C. O. Douden occupied the chair, James H. Rehfuss presented his report as president of the Brooklyn College of Pharmacy and the Kings County Ph.S., respectively. In the former, he commented favorably on the college's increased educational facilities, the improved work of the instructors, the excellent system of instruction, the faithful work of the trustees and other officers, the college's sound financial basis, the attendance of over 200 students during the past year and the prospects of many more students next year. President Rehfuss expressed his approval of the splendid work of the legislative and propaganda committees and recomended a continuation of N.F. and U.S.P. propaganda next year. This recommendation was later adopted.

"In view of the invasion of the field of the retail pharmacist by the chain drug stores and corporation pharmacists," Mr. Rehfuss said, "there surely never was a time when the retail druggist needed the help of his organization more than now. The policy of the society is to extend such aid to the fullest extent possible and I believe it should spend all its funds if necessary for any purpose which promises to directly benefit the pharmacists of the city."

Mr. Rehfuss recommended that the trade matters committee continue its fight for higher telephone commissions, as he considered the time propitious for such action. This recommendation was also adopted.

In conclusion, the president drew attention to the fact that the resources of the society were no longer limited to the dues collected from its members. The dual relationship of the society and its college and the financial success of the latter makes it possible to employ all the funds of the society for the latter's work for the benefit of pharmacists in Brooklyn.

Dr. William Muir, chairman of the legislative committee, submitted a very comprehensive report.

Adrian Paradis, treasurer, reported $322.28 in the society treasury and $6949 in the college treasury.

Secretary Andrew E. Hegeman reported a membership of 474 pharmacists and that $934 had been collected in dues during the year.

As chairman of the trade matters committee, Charles Heimerzheim presented his report. Almost the entire work of propaganda for the past year was on lines previously devised—the detail man, Dr. Van Horn, called on the physicians, talked with them and left U.S.P. and N.F. preparations. He considered the society's money well spent. Dr. Van Horn visited 925 physicians, 325 of these being among those called upon the year before. Mr. Heimerzheim said that without the help of Dr. Muir, who supervised the preparation of the samples, the work could not have been carried on, as no other member could have devoted the necessary time. On the telephone situation, Mr. Heimerzheim said that a large number of pharmaceutical organizations were represented in the effort to get higher commissions.

Otto Raubenheimer, committee on affairs pertaining to pharmacy, enumerated the features of the meetings during the year. On Dr. Muir's motion, a vote of thanks was extended to this committee and to those who read papers.

Mr. Raubenheimer presented a short report on the U.S.P. Convention and the A.Ph.A. meeting. He said that the Kings County Ph.S. was the only organization represented by a lady delegate, Miss K. C. Mahegin, who was warmly applauded and made a short address upon her experiences.

The following officers were re-elected:

President, James H. Rehfuss; first vice-president, Clarence O. Douden; second vice-president, H. B. Smith; third vice-president, Adrian Paradis; treasurer, Andrew E. Hegeman; secretary, Adrian Paradis; librarian, Dr. Charles F. Kluppert; executive committee, James H. Rehfuss, Clarence O. Douden, Andrew E. Hegeman and Dr. Charles F. Kluppert.

Thomas F. Raymond was engaged as librarian and Wm. L. Perkins re-engaged as counsel. Delegates were appointed as follows:

New York State Ph.A. meeting, Dr. Wm. Muir, Andrew E. Hegeman, Frederick C. Bellin, Dr. Charles F. Kluppert, Otto P. Gilbert, Dr. Wm. H. Weimann, Jr., Adrian Paradis, Dr. Charles F. Heimerzheim, Dr. Wm. H. Nichols, Dr. Charles F. Kluppert and Wm. H. Lehmann.

The sum of $25 was voted to the Proctor fund, of which Dr. Wm. Muir is chairman.

G.A.S. OPPOSES REDUCED 'PHONE COMMISSIONS.

Society Members Are Instructed by Resolutions Not to Sign and to Cancel all Such Contracts.

At the June meeting of the German Apothecaries' Society in this city, the matter of most immediate importance upon which action was taken was undoubtedly the contemplated reduction in telephone commissions from 20 per cent now allowed pharmacists by the New York Telephone Co. to, first, 10 per cent on long distance calls and later to 10 per cent on local calls. The sentiment of the members was strongly against signing any contracts in which the commission was specified as lower than 20 per cent. That the company believes it can easily engineer the reduction is evidenced by the conversation one of its representatives had with a member of the society. The telephone man declared that the pharmacists couldn't do anything, as they had no organization. If the pharmacists didn't sign the contracts, he said, the company would take out the booths and put them in the cigar stores.

The fact that Chicago pharmacists are getting a commission of 33⅓ per cent is a spur to the members to fight for their present percentage and the following resolutions were adopted:

That the value of space in pharmacies occupied by the New York Telephone Co. and the services of pharmacists rendered should be valued at not less than 20 per cent.

That every attempt to reduce the commission will be opposed by us in the most determined manner and that every member of the society be requested not to sign a contract of any kind that does not allow a commission of 20 per cent.

That all members who have, under false impressions, signed such a contract, be requested to cancel same.

That the president of the society appoint a committee of three members whose duty will be to carry out these resolutions and circulate them, and also to confer with committees of other New York pharmaceutical societies for this purpose.

President George Kleinau appointed W. C. Alpers, S. V. B. Swann and Frederic H. Plump as the above committee.

Dr. Alpers and Hugo Kantrowitz were appointed a committee to notify the medical profession and the medical press of the recent enactment of the Smith Cocaine Law and its provisions.

Reports were presented by the proper committees on the Hill Pharmacy Bill, the action taken by Congress on the proposed National Board of Health, the A.Ph.A. meeting at Richmond, Va., and the U.S.P. Convention at Washington, D. C.

The society contributed $50 to the expenses of the New York State Ph.A. meeting at Saratoga Springs. Felix Hirseman, Dr. George C. Diekman, Otto Raubenheimer and George T. Rieffiin were appointed as delegates to the meeting.

The following chairmen of committees were appointed to arrange for celebrating the 60th anniversary of the society in October, 1911:

Music, Helmuth Jarchow; badges and decorations, Felix Hirseman; printed matter, George Leinecker; press, Hugo Kantrowitz; invitations of wholesalers, George T. Rieffiin; subscriptions to the fund, Charles F. Schlenssner; floor, S. V. B. Swann; halls and reception committee, Dr. Charles F. Kluppert; secretary, Henry F. Albert; festival committee, Robert S. Lehmann, toastmaster at banquet and hall, E. C. Goetting, toastmaster at kommers, Dr. William C. Alpers.

On Thursday, July 7, the members will hold their annual summer outing at Witzel's Pavilion, College Point, Long Island. The committee, through Chairman Otto P. Gilbert, announce an interesting programme which includes games and contests for the ladies and children, prizes being offered for all successful contestants. Lederhaus' orchestra has been engaged and plenty of opportunity for dancing is assured. The exercises begin at 2 p. m.

Preparations for the N.A.R.D. Meeting in Pittsburg.

Pittsburg, June 20.—Arrangements are being made for the N.A.R.D. convention here on September 12 which promise to make it more successful than any of its predecessors. Sufficient funds have been subscribed for the entertainment of the visitors and the demand for space at the exposition is greater than expected, so that there is now little left for the late comers. H. F. Pritchard, secretary of the Western Pennsylvania R.D.A., is taking an active interest in the preparations, as also is Edw. J. Kretz, chairman of the general committee of arrangements.

Accountant Elected a Director.

Albert Marsh, chief accountant of the Charles Crittenton Co., has been elected a director of the company.

Prescott Club Veterans of U. of M. School of Pharmacy at A.Ph.A. Meeting of 1910

THE alumni of the University of Michigan School of Pharmacy who attend the annual meetings of the American Pharmaceutical Association, and are otherwise known as the "Prescott Club," dined together during the recent convention at the Hotel Jefferson, Richmond, Va. A letter expressing best wishes and signed by all the members present was sent to Mrs. Prescott, widow of the late Dr. A. B. Prescott, for many years the dean of the school. E. J. Kennedy was elected president for the ensuing year and instructed to make arrangements for the next annual gathering in Boston.

After dinner the camera was brought into requisition, the "boys" lining up as shown in the accompanying picture (from left to right): L. E. Sayre, '94; B. L. Murray, '91; Chas. W. Johnson, '96; Mathias Noll, '81; L. G. Blakeslee, '80; L. A. Seltzer, '92; W. W. Horne, '00; Linwood A. Brown, '04; E. J. Kennedy, '82; John D. Muir, '84; J. O. Schlotterbeck, '87; E. M. Houghton, '93; Wilber J. Teeters, '95; A. B. Stevens, '75; A. B. Lyons, '68; W. A. Dohany, '87.

PRESIDENT MUIR'S SUGGESTIONS ARE ADOPTED.

E. O. Engstrom Chosen to Head National Association of Boards of Pharmacy for the Coming Year.

Among the recommendations made by President John B. Muir at the recent meeting of the National Association of Boards of Pharmacy at Richmond, Va., were the following: That the association should encourage the further formation of local interstate associations, and that such meetings should be held in connection with a board examination; the adoption of the National Syllabus Committee's recommendations; representation of State boards of pharmacy in future pharmacopœial conventions, and that the association set a date not later than 1915 when it will ask its active members to require at least two years' high school work, one year's work in a recognized college of pharmacy, and a total, including college work, of five years' practical experience; a recognized college of pharmacy to be either a member of or eligible to membership in the American Conference of Faculties. President Muir was also in favor of the boards taking up the matter of partial reciprocity with boards not in full active membership. The recommendations were adopted.

Secretary Sala reported that during the eight months which had elapsed since the last annual meeting 157 reciprocal interchanges of registration had been effected.

The following officers were elected: President, E. O. Engstrom, Pittsfield, Mass.; vice-presidents, E. Berger, Tampa, Fla.; F. P. Landon, Keystone, W. Va., and D. F. Jones, Watertown, S. D.; secretary-treasurer, A. F. Sala, Winchester, Ind.; executive committee, A. J. Fischer, Santa Fe, N. M.; R. H. Walker, Gonzales, Texas, and T. A. Miller, Richmond.

The next annual meeting will be held in Boston concurrently with the meeting of the A.Ph.A.

Generous Profit-Sharing Plan Adopted.

DETROIT, June 20.—Parke, Davis & Co. has inaugurated a very elaborate pension plan for old employees. Every employee who has been in the company's servic for 20 years and has attained the age of 65 years for men or of 55 years for women, it is announced, will be given a pension amounting to 25 per cent of his or her salary. The granting of this pension will depend on the judgment and discretion of the Pension Board, which consists of the president, general manager and treasurer of the company. No pension less than $18 per month will be granted. The board may continue the pension to the widow of an employee or in case of inability on account of approaching age it may be transferred to another person. The pensioner may employ himself in any business not in competition with the company. Treasurer George Hargreaves has been working out the details of the plan for several months. About 100 are now eligible.

? QUESTION BOX ?

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not answered by mail, and ANONYMOUS COMMUNICATIONS WILL RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Too Much Acacia.

(G. L. G.)—Submits the following prescription:

Spirits turpentine	1 dram.
Acacia	1½ ounces.
Cinnamon water, enough to make	2 ounces.

Make an emulsion. Directions: A teaspoonful every three hours.

"G. L. G." says he found it impossible to make a 2 ounce mixture, and asks: "Can it be done and if so, how?"

No, not as the prescription is written, there being too large a quantity of acacia ordered for the emulsification of the oil (spirits) of turpentine. Usually, about 30 grains of acacia are sufficient to emulsify one dram of oil and undoubtedly this quantity should have been prescribed in the above. According to Caspari, "oil of turpentine unites very readily with water and gum, and it is surprising to see how small a quantity of gum will suffice in an uncombined form, only a dense creamy layer rising, composed of the oil of turpentine, gum, and some water in intimate union: 20 grains of powdered acacia shaken in a bottle with 1 fluidounce of turpentine, and 4 fluidrams of water then added, will yield a very satisfactory emulsion, which can be kept for days without separating an oily layer." It may be that the prescriber made an error in indicating the amount of acacia; at any rate he should be consulted and the compounder's difficulty explained to him. A standard formula of this character is "Forbes' Emulsion of Oil of Turpentine," National Formulary, page 52.

Screw Worm in Cattle.

(J. L. W.)—The Agricultural Experiment Station of your own State (Texas) has published considerable information bearing upon the treatment of cattle affected with the screw worm pest which you can doubtless secure for the asking. However, the treatment is to get the worms from the wound and let it heal. By injecting into the wound chloroform, solution of corrosive sublimate (60 grains to 1 pint of water), calomel, crude carbolic acid, kerosene, turpentine, cresylic ointment or fresh pyrethrum, the worms will be killed or driven

[illegible] the wound. If the wound is [illegible] and the flies kept away it will soon heal. Corrosive sublimate and calomel will sometimes affect the stock with mercurial poisoning, [illegible] if put where they can lick the wounds. The carbolic acid and corrosive sublimate are good antiseptics and will aid the wound in healing. An ointment recommended by [illegible] consists of [illegible] containing about [illegible] per cent of [illegible]. Preventive measures are to put tar, grease or fish oil on all wounds every day until healed. The stock must be kept free from ticks, as half of the [illegible] of stock [illegible] are said to [illegible] at a place where a tick is killed, giving the necessary blood in which to lay the eggs. All dead animals should be burned or buried at least two feet deep to prevent the flies from laying their eggs in the carcasses or those already laid from escaping.

Shoe Dressing for "Vici Kids."

(J. L. W.)—The following formula for a polish for shoes [illegible] under the name of "French Shoe Dressing":

[illegible]	32 ounces.
[illegible]	8 ounces.
Bichromate of potassium	½ ounce.

Boil and strain while hot into the following mixture, previously [illegible]:

[illegible]	4 drams.
[illegible]	4 drams.
Glycerin	4 drams.
Water	16 ounces.

The latter should be soaked overnight, heated in the morning to dissolve, and strained with pressure. After the logwood and glue mixtures are combined, put indigo, 2 drams, into a large mortar, triturate and slowly incorporate the mixture with it. Put up the dressing in wide-mouthed bottles, with a stubby brush or sponge in the cork.

As a dressing for black patent leather shoes, try the following:

Oil of lavender	½ ounce
Oil of turpentine	½ ounce.
White wax	6 drams.
Olive oil	2 ounces.

Melt the wax with the olive oil by aid of gentle heat, add the oil of turpentine and, when nearly cold, the oil of lavender. Said to be "very useful for restoring the gloss and flexibility of patent leather."

Books on Synthetic Perfumes.

(X. Y. Z.)—We know of no one book which is likely to contain all one might wish to learn concerning synthetic perfumes. However, the following works are recommended: Otta, "L'Industrie des Parfums," Paris, 1909; Charabot, "Les Parfums Artificiels," Paris, 1900; Parry, "Chemistry of Essential Oil and Artificial Perfumes," 2d ed., 1909; Klimont, "Die Synthetischen und Isolirten Aromatica," Liepzig, 1899; Sawer, "Odorographia," 2 volumes, 1892-4 (this work, while not the latest on the subject, contains considerable information on the natural history of the raw materials used in perfumery). Current publications like the "Journal of the Society of Chemical Industry" and "Chemical Abstracts" may also be profitably consulted.

Permanganate-Formaldehyde Method.

(G. G. P.)—You do not inform us of the character of the generator you use, but formaldehyde is easily developed from a solution of formaldehyde by pouring some of the solution upon fine crystals of potassium permanganate contained in a metallic pail. According to Prof. Daniel Base, who presented a paper upon the subject some years ago, "it is a case of [illegible] a part of the formaldehyde according to [illegible] another part, the permanganate in oxidizing a part of the [illegible] sufficient to evaporate nearly all of the liquid." According to [illegible] the [illegible] recommended to [illegible] 200 cc of [illegible] [illegible] permanganate [illegible] 40 cc of [illegible] [illegible] 100 cc of [illegible] [illegible] 100 cc of [illegible] [illegible] 20 cc of [illegible] [illegible] 20 cc of [illegible] [illegible] 20

Pharmacognosy and the United States Pharmacopoeia.

By Prof. Henry Kraemer, Philadelphia, Pa.

PHARMACOGNOSY in both the modern acceptation and application of the term is a comparatively new department of science, although the history of the use of vegetable drugs is as old as that of medicine itself. While we have been accustomed to look upon pharmacognosy as a division of botany, it has so expanded within the past twenty-five years as properly to be regarded as a distinct branch of science. As in bacteriology the problems in the study of bacteria are different from those of the botanist, so in pharmacognosy the problems differ from those in pure botany, being on the one hand similar to those which are considered by the modern agriculturist. In other words, pharmacognosy involves not only a study of botany, including morphology and anatomy, but also studies in chemistry, including both plant chemistry (phyto-chemistry) and drug chemistry (pharmaco-chemistry). That is, the pharmacognosist is not merely concerned with the dried drug as he sees it, but also with those conditions which influence the development of the constituents of the plant, or which modify these constituents in the drug and on which medicinal activity depends. Indeed, the subject is a very broad one and a very complicated one when viewed from all sides, and it is a long way from the living plant from which the drug is derived to the laboratory of the pharmacist who makes the preparation. There are problems at every point in the oft-times circuitous route which the drug travels before reaching its final destination in the finished preparation. In addition to the field problems as those involving the determination of the identity of the plants and variation in the constituents at different seasons of the year, there are also other factors of which cognizance must be taken that influence the quality and appearance of vegetable drugs, as the amount of skill used in the drying and curing of the drugs; the proportion of other plant parts, as of stems attached to roots; the manner and length of time of keeping, and attacks of fungi and insects, etc. We may say, therefore, that pharmacognosy begins with the study of the plants yielding vegetable drugs and ends with the determination not alone of their identity but of their quality also. When one considers that about 70 per cent of the articles included in the Pharmacopœia are vegetable drugs, their constituents, or their preparations, it is seen that the users of the Pharmacopœia must have a knowledge of pharmacognosy, and that the physician is directly dependent upon the work of the pharmacognosist for the therapeutic efficiency of many of the most important medicines which he prescribes. It matters not how perfect the methods for making preparations are, if the materials used in their preparation are spurious, worthless, or vary in quality to a considerable extent. There is no doubt that many useful drugs and their preparations have become and are becoming obsolete for the reason that other drugs which are inert or have different properties have been or are being substituted for them. Such a condition not only baffles the efforts of the therapeutist but also tends to deprive him of remedies which heretofore were considered to have certain valuable properties. But some will say that the drugs are becoming scarce. This is true in some instances, but instead of simplifying the question, renders it more complicated in that the necessity arises for detecting the spurious substitutes that are frequently admixed with the genuine drug or even entirely replace it.

Prof. HENRY KRAEMER, of Philadelphia.

The United States Pharmacopoeia.

While it is not possible to consider all the various phases of pharmacognosy in the Pharmacopœia, it is desirable to give definitions and descriptions of the official vegetable drugs which are adequate for the establishment of their identity and efficiency. In other words, it is the results of the studies in applied pharmacognosy which should be included in the Pharmacopœia, leaving the problems and studies in pure pharmacognosy for the text-books and reference books.

That part of the U.S. Pharmacopœia VIII devoted to pharmacognosy is not only not abreast with the other departments of this work, but, furthermore, when this part is compared with that in the foreign pharmacopœias it is found to be lacking in important particulars. This would lead to the conclusion that we in this country not only do not recognize the importance of the subject but that we are more or less indifferent to the nature of the drugs which we employ. That this condition, or worse, still prevails, is shown by the expressed desire to eliminate standards for crude drugs. It has been proposed to permit all grades of crude drugs to be admitted to this country and to be sold and used in the making of galenicals, the only provision suggested being that the finished preparations shall be standardized. Apart from the many objections that can be raised against such a procedure, as for example, the inadequacy of the assay processes themselves to confirm the identity of the drug on the one hand or its full medicinal value on the other, there are other practical difficulties in the way. To illustrate, Dr. J. M. Francis states in commenting on the results of his assay of many thousands of pounds of belladonna root of the market, that "While theoretically an increased quantity of poor drug will make a good fluidextract, if the latter be standardized by assay, there are, however, practical objections to using an excessive quantity of drug, as the fluid will be highly charged with extractive matter and will not keep well."

On the face of it, it is not reasonable to suppose or believe that a good fluidextract or tincture can be made from a poor drug any more than to suppose that good malt can be prepared from a poor quality of barley grains, or a good extract of beef from a poor quality of meat. It is true that a certain amount of alkaloid may be extracted in some instances from a mouldy, wormy or otherwise inferior drug, but no one would contend that in the majority of cases the medicinal properties of a tincture, fluidextract or infusion is wholly dependent upon the percentage of one such principle alone or that the preparations would be as good in other respects as those made from drugs of good quality. If, however, this be contended, then the better procedure would be to use the alkaloids and other isolated principles themselves. Discussing this question in a recent paper Tschirch[1] writes: "For when the isolated substances are tested pharmacologically, it becomes evident that their action does not correspond with that of the drug itself—for the latter scarcely ever contains a single active constituent, but frequently a remarkable mixture of substances that are often antagonistic to their effects. I will refer only to rhubarb, which, in addition to laxative anthraglucosides, contains astringent tannoglucosides, and owes its therapeutical use to the

*Read at the regular meeting of the City of Washington Branch of the American Pharmaceutical Association held on January 5, 1910.

[1] *Pharm. Jour.* (London), 83, 420, October, 1909; PHARM. ERA, pp. 649, 677, December, 1909.

significance as regards [illegible] antagonistic groups of substances. Although [illegible] from the views of Gmelin [illegible] they are in reality far from [illegible] but are extraordinarily complex substances."

Again, Turner, in a recent paper,[2] has called attention to [illegible] on which medicinal activity depends and to a tendency to abandon the idea that the principles separated by assay truly represent the value of the drug. He says: "Boulanger-[illegible] *Pharm.*, No. 1, 1908, pays particular attention to this question and comes to the following [illegible]

"The endeavor to isolate the 'alkaloid' to which scientific pharmacy paid such vivid attention for nearly one hundred years begins to lose its practical significance. The chemistry of colloids partly takes its place and the chemist and pharmacologist pay more and more attention to certain complex ingredients of drugs, or, as they are usually called, 'extractives' of drugs.

"A diligent and successful investigation of certain drugs showed conclusively that the active principles isolated from them in the course of one hundred years and studied both chemically and pharmacologically did not satisfy the requirements which the physician had right to put to them. Cinchona, digitalis, ergot, rhubarb, buckthorn, cascara sagrada, kola, opium, and nux vomica are the best examples illustrating what was said before.

"Many prominent pharmaceutic chemists and, lately, especially Kunz-Krause, recognized this in proper time and showed that in many cases the production of chemically pure active principles of drugs can no longer be the ultimate purpose of pharmacy. It is more proper to expect that in the future pharmaceutical science will direct its work toward production of chemically unchanged colloidal drug preparations which will have the *total* action of the respective drug."

At any rate, we have not advanced to that point where we know or can isolate the active constituents in all cases, or where we are willing to say that in those cases where certain active constituents have been isolated that they represent the full medicinal value of the drug and could replace the preparations. Hence it cannot be gainsaid that there is an urgent demand for accurate and adequate, if not full, pharmacognostic descriptions in the Pharmacopœia. With the introduction of standards for crude drugs which not only fix the percentage of certain active constituents, but which assure their quality in other ways, preparations can be made by the pharmacist on which the physician can rely for their therapeutic efficiency.

It is not too much to claim that with every drug it is possible to indicate by adequate descriptions and if necessary by other tests than assays a standard quality which will insure uniformity, stability, and efficiency of the preparations into which the drug enters. If there is any class of articles included in the Pharmacopœia which require a purity rubric it is the vegetable drugs, as they vary in medicinal activity from practically zero up to 99 per cent, the official drugs being in some instances entirely substituted by other drugs, or they are of varying degree of quality because of their age, or the conditions under which they have been kept, or because of the presence of a large excess of other parts of the plant than that designated as the drug, or also because of foreign impurities. It would seem to be unnecessary to refer to this subject, as the principle is one so self-evident and funda-[illegible] preparations are specified and will be used by physicians who [illegible]

Foreign Pharmacopœias.

[illegible] and [illegible] the [illegible] will insure the quality and genuineness of the articles both [illegible]

[2] *Amer. Jour. Pharm.*, [illegible] 1910.

under vegetable drugs and medicinal chemicals. One does not go very far in the examination of these books without getting the idea that the pharmacist is expected to have the necessary books of reference, the apparatus and the training which will enable him to use the Pharmacopœia in determining the character of the products therein given. While some of these pharmacopœias do not include tests requiring special expensive pieces of apparatus as is required in our own Pharmacopœia, as in the tests involving the use of the polariscope, they all require the use of the microscope. In other words, the foreign pharmacopœias are more balanced in their treatment of the various subjects, and we would not be likely to hear the comment on a foreign pharmacopœia, as we might regarding our own standard, that it is a "chemist's book."

The treatment of vegetable drugs in the foreign pharmacopœias may be quite complete, as in the Netherlands Pharmacopœia, where a page or more is frequently given to each drug. Or it may be what would be termed adequate, the intention being that the user shall be familiar with the structure of the typical drug either from the study of the drug itself or the books of reference, as in the Swiss Pharmacopœia, the French Codex, the Pharmacopœia of Japan and others. Besides, in a number of foreign pharmacopœias various constants are given, including percentage of ash, percentage of extractive, as also various special tests, some of these being microchemical. Generally speaking, the treatment of the microscopic structure is an essential feature of the descriptions, and may be of the crude drug alone, or more especially of the powdered or ground drug, or of both. In some of these pharmacopœias powdered drugs are not recognized, or only occasionally referred to, probably from a recognition of the difficulty of identifying and determining the percentage of impurity or admixture, and also perhaps in view of the fact that very many drugs deteriorate or lose certain desirable properties when in the comminuted condition. As one goes through these pharmacopœias he is impressed by the fact that there are standards for vegetable drugs as there are for medicinal chemicals and the adequate descriptions and special tests correspond to the identity tests given for chemicals, and the revisers have availed themselves of the scientific progress that has been made in all lines touching their own work.

Pharmacognosy and Commercial Drugs.

It appears to me to be unfortunate that the Committee on Drug Market of the A.Ph.A., representing as it does an association composed of the leaders in education and the scientific workers in pharmacy in this country, should have presented at the last annual meeting a report which tends to throw discredit upon practical or applied pharmacognosy in this country. This is the more to be deplored because of the fact that the Committee on Drug Market of the National Wholesale Druggists' Association incorporated the findings of the A.Ph.A. committee in its report presented at the Richmond meeting and also because the report has been commented upon and considered to represent an actual condition. The N.W.D.A. committee cannot, of course, be blamed for accepting the findings of a committee of our leading scientific association. While I do not know who the experts were to whom specimens were submitted by the A.Ph.A. committee, I may say that I have in mind a recent graduate of a college of pharmacy who was able to take a drug like the one reported on by the A.Ph.A. committee and quantitatively separate the component drugs of the mixture. I do not mean to imply that this is a piece of off-hand work, but that it requires a certain amount of knowledge, training and some patience, but on the other hand I do not want to state that any one claiming to be trained in applied pharmacognosy should be able readily to make a [illegible] of the [illegible] as is referred to in the report of the committee of the A.Ph.A., and furthermore, that the condition of the drug market creates the necessity for work of this kind. As a matter of fact, questions of this kind arise daily in the drug market, and it behooves us to frame the Pharmacopœia in such a manner as to make it a valuable aid and guide in this practical and all-important work, and warrants us in looking to the colleges of pharmacy to train their students in such a manner as to enable them to be useful in this particular field.

Such a report as that of the A.Ph.A. committee tends to hinder progress in that it leads importers and dealers to think that there is no way out of their difficulties, and what is still [illegible]

be detected. Again, such reports tend to minimize the importance of the question in the eyes of dealers, and finally to cause delays in the progress of the sciences of both pharmacy and medicine.

However, we have a responsibility in these matters which we cannot evade, and the dealers in drugs look to us to study the conditions and the materials, and to furnish descriptions and tests for determining identity and establishing standards of quality which will be of practical assistance and upon which they can rely with as much certainty as their tests and standards for chemicals. There appears to me to be no reason why the whole subject of the purchase and sale of vegetable drugs should not at least be on as satisfactory a basis as that of spices and food products. I have sufficient faith to believe that when the standards and tests for vegetable drugs are developed as they should be, or adopted even as we know them today, there will be no more quibbling about the difficulties of obtaining vegetable drugs of satisfactory quality than there is about medicinal chemicals at the present time, and that the dealers will be glad for the adoption of such standards. With the establishment of fair standards it will be possible for importers and wholesaler dealers to insist that the garbling of drugs and the removal of extraneous matter should be carried on by the collectors and distributers before they enter commerce. Such a procedure would be wholly in accordance with the modern way of handling problems of this kind. Why shall 40,000 druggists be worried about gross adulterations and admixtures when these can for the most part be detected at the point where the drugs enter commerce and where such pressure can be brought to bear upon the collectors abroad as well as in this country, as will cause them to remedy deficiencies in their knowledge of the drugs or plants from which they are derived, and prevent continued carelessness in their collection? I am satisfied that the lack of uniformity in the preparations of vegetable drugs at the present time, as shown both by chemical and pharmacological assays, is due to various factors not connected with the plant growth, rather than to inherent variations in the drugs themselves, which usually only vary within certain narrow limits.

U.S. Pharmacopoeia IX.

It has been pointed out that in the commerce of drugs practical problems are continually arising, and hence the Pharmacopœia should contain such information as will help in the solution of these problems. That part of the U.S. Pharmacopœia devoted to pharmacognosy has not had a thorough revision since at least 1890, and with the progress that has been made in applied pharmacognosy in that time, the necessity arises for a vast amount of work in bringing this part up to date and in making it a guide and standard for practical purposes.

In a previous paper[1] I pointed out some of the difficulties connected with revision work, particularly in this department. Soon after the sub-committee on pharmacognosy of the last revision began its work it became evident that it was not a question of developing the special work in hand or improving the Pharmacopœia as it was of conducting a campaign of education showing the necessity for, and importance of, the work. While it remains to be seen what has been accomplished by this campaign of education, there can be no question as to what is required in the inspection and selection of drugs.

In order that the U.S. Pharmacopœia IX may not only be abreast of the times, but also be a valuable guide and handbook, and at the same time a credit to the revisers as well as a source of pride to the physicians and pharmacists of this country, it is important in the first place that the Pharmacopœial Convention abstain from passing any resolutions which would tend to bind the hands of the sub-committee on pharmacognosy and prevent them from doing their best work. Tentative recommendations might be made by the convention and referred to the sub-committee for their consideration and final decision, and these should be welcomed.

This leads me to say that the work of a sub-committee may not only be handicapped by binding resolutions adopted by the convention but also by the giving of instructions by the Committee of Revision as a whole, which tend to hinder the work. Here it may be pointed out that the Committee of Revision does not appear to me to be so constituted as to be any more capable of making binding recommendations on special subjects than the convention itself. Therefore it is to be hoped that in the work of the next revision the sub-committees will be free to carry on the work to the best of their knowledge, experience and ability, and for which they will be held responsible. In my previous paper already referred to I have discussed this matter at some length, and it will not be necessary to go into it further at this time. But after all, as I have elsewhere[2] stated, "it is not so much a matter of method as it is of selecting men to carry on the work of revision who comprehend the scope and intent of a pharmacopœia," for even with the most perfect system there is yet a possibility that the best will not be attained.

In view of the large amount of work which the sub-committee on pharmacognosy will have to do in the next revision this committee should be increased and empowered to employ assistance for carrying on certain detail work. Of the subjects to which special consideration should be given, the following may be mentioned: The definition both in relation to commercial varieties and botanic species, with the object of making them more exact and at the same time the more easily understood; the microscopic structure of the drugs, with the view of aiding identification; special tests and standards for assisting in the determination of quality, and finally the question of the inclusion of powdered drugs with adequate descriptions, and tests. In order to carry on this work in a thorough manner it is desirable that the sub-committee on pharmacognosy be closely allied with the Bureau of Plant Industry and the Botanical Society of America. Again, it is desirable that this committee be in close touch with the large crude drug dealers and importers, for they could undoubtedly supply much information that cannot be gotten in any other way and would be in a position to procure material for the use of the committee. Furthermore the sub-committee on assays should cooperate very closely with the sub-committee on pharmacognosy, and the latter should not only furnish the drugs to be assayed but provide where possible microscopical or other suitable tests for the identification of the proximate principles obtained in the assays.

But already I hear objections to the development of this work along modern lines. The first is that if there is an increase in the number of vegetable drugs or an extension of the space devoted to their consideration, the Pharmacopœia will be less popular with physicians. To this I merely wish to reply that I have reason to believe that the work will be more popular with physicians in that they will be assured of greater uniformity and efficiency in the official preparations.

The other objection that will be brought forward is that the pharmacist will not be able to apply the information given. While this may be true to a certain extent, it is not an objection which should be allowed to hinder progress, and is one which is met in part abroad by the colleges of pharmacy providing special courses of instruction for pharmacists following each revision of the pharmacopœia. But if the colleges do their part it is only a question of time, when this objection can be eliminated entirely.

Conclusions.

In this paper I have attempted to show that pharmacognosy is a science of fundamental importance to the pharmacist, and that the results of the studies in pharmacognosy are of the greatest value to the physician in assuring him uniform and efficient medicines.

I have called attention to the fact that the foreign pharmacopœias give more uniform consideration to the various subjects and are as strong in their treatment of pharmacognosy as in that of chemistry and pharmacy.

It was pointed out that the pharmacognosy of the U.S. Pharmacopœia has not been thoroughly revised for a decade or more, and that the existing needs demand that it shall be completely modernized. Some of the features that should be considered have been enumerated. The work before the next sub-committee on pharmacognosy will be an extensive one, and a wide co-operation is desirable.

Finally, it may be again pointed out that the colleges and schools of pharmacy have a certain share and responsibility in this work, therefore their courses should in part be based upon the Pharmacopœia and should be such as to forestall the assertion that pharmacists will not be able to use the Pharmacopœia when improved to the extent that existing condition demand and by virtue of which it should alone exist.

A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

THREE PRIZES of $5.00, $3.00 and $2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each monthly series of questions. In the event of a tie for any one of the prizes offered, such prize will be equally divided among the successful contestants. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (8x10 in.), one side only, with your Name and Address at the top of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be sent at one time, and must be with us not later than the 15th of the following month.

CORRECT ANSWERS to each series of questions and the names of the three contestants who have been awarded the prizes will be published in the Era, after the close of the respective contests.

WE INVITE our readers to send us their questions for publication in this department, particularly questions related to the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

The Quiz Master

Care of Pharmaceutical Era 82 Fulton St., New York

QUESTIONS, JULY SERIES, 1910.

1—Lead acetate is used in preparing what U.S.P. preparations?

2—What effect does exposure to light and air have upon resorcin?

3—How may resorcin be protected from the action of light and air?

4—Which of the following are lighter and which are heavier than water: acetic acid, oil of cloves, paraffin and thymol?

5—What free acid is found in lemon juice?

6—How is asafetida obtained from the root of Ferula foetida?

7—Which thermometer is given preference by the Pharmacopœia?

8—What official liquid is obtained as a by-product in the manufacture of soap?

9—What official preparation is known as "normal mixture?" What are the ingredients used in making it?

10—What is meant by the process "destruction of the peridermic" as employed in the pharmacopœial description of all seeds?

11—What N.F. solutions contain hydrochloric acid?

12—What is the appearance of balsam of peru?

13—What effect does basic lead acetate test solution have upon sugar?

14—What is the official Latin name for saw palmetto, and what is the botanical name of the plant from which it is obtained?

15—When a "stock bottle" is opened upon a prescription why is it preferable to put it among the regular label material of bottles?

16—What is meant by "botanical accidents" as used in works on botany?

17—What are the U.S.P. preparations which contain both salts of ammonia and of strychnine?

18—What U.S.P. liniment is of such consistency that it is best dispensed in an ointment jar?

19—How would you determine if a drug containing an alkaloid had been completely exhausted by a menstruum?

20—What U.S.P. drug contains physostigmine? What is another name for physostigmine?

21—What is "os sepiæ" and from what is it obtained?

22—What is the objection to using "os sepiæ" in tooth powders?

23—For what purposes is "os sepiæ" most commonly used, as bought by people in a drug store?

24—As applied to a class of official preparations, what are waters?

25—What are three substances, other than acacia, which are frequently employed in making label pastes?

26—What are some of the reasons for coating pills?

27—What is the difference between oil of camphor and camphorated oil?

28—Why should broken packages of seidlitz powders be kept in tightly closed containers?

29—A druggist wishes to prepare five pounds (avoir.) of ointment of potassium iodide; if the wholesale price of potassium iodide is $2.15 a pound (avoir.); of potassium carbonate, 50c. a pound (avoir.), and of benzoinated lard, 30c. a pound (avoir.), what quantity of each of these ingredients will be required, and at the prices quoted what will be the cost respectively of these quantities?

30—In preparing chalk mixture, why is the cinnamon water diluted with water?

31—What is the difference in the action of cocaine upon the unbroken skin and upon mucous membranes or the subcutaneous tissue?

32—What are four common names for sanguinaria?

33—For which of the official pills does the Pharmacopœia state the dose to be two pills?

34—When urine undergoes decomposition, why does it develop an ammoniacal odor?

35—Why are spatulas having balanced handles to be preferred?

36—What is meant by saying that a drug has a cumulative effect?

37—What are four U.S.P. drugs which are likely to produce a cumulative effect?

38—What is briefly the method for preparing medicated gauze?

39—Which of the following are fixed and which are volatile oils: lard oil, oil of anise, oil of cloves, cottonseed oil, cod liver oil, oil of turpentine, oil of theobroma and oil of thyme?

40—What occurs when citric acid is added to a strong solution of Rochelle salt?

41—In the manufacture of what official preparations do the following reactions occur: $HgCl_2 + 2NH_4OH = NH_4Cl + NH_2HgCl + 2H_2O$; $As_2O_3 + 3H_2O = 2H_3AsO_3$?

42—Therapeutically, what are aromatics?

43—What action does solution of hydrogen dioxide have upon phenol?

44—What are eight official solids which are soluble in glycerin?

45—What change will slowly occur in an aqueous solution of chloral hydrate?

46—How would you prepare suppositories containing extract of belladonna leaves as the medicinal ingredient, and oil of theobroma as the suppository base?

47—What is the action upon tincture of ferric chloride of ammonia water; of potassium ferrocyanide test solution; of silver nitrate test solution?

48—What are the solubilities in water and alcohol respectively (at 25° C.) of the following: (a) Benzoic acid; (b) sodium citrate?

49—What test does the Pharmacopœia give for distinguishing citric acid from tartaric acid?

50—How many doses can be obtained from the following prescription, and how much of each of the first three substances will be given in each dose?

R—Tinc. Digitalis	ʒi
Spt. Aetheris nitrosi	ʒiii
Liq. Ammon. acetatis	ʒss
Aquæ q. s. ad	ʒvi

M. Sig. One sixth every 3 hours to re-establish the renal secretion.

Competitors, Please Notice.

The above list of questions is the complete series for July, and all who desire to compete for the prizes should see that

their answers are received by the Quiz Master not later than August 15. Do not send your answers in parts, but mail them all at one time, and be sure to follow the instructions given at the head of this department.

The judges of the May contest of the Quiz Master's Department have awarded the prizes as follows:

First prize, $5, to C. M. Morse, Lawrence, Mass.

Second prize, $3, to Fred Reif, Pittsburg, Pa.

Third prize, $2, to Howard E. Genslev, Harrisburg, Pa.

Contestants wishing to know the grades which they have made in the May contest may obtain this information on request by sending two cents for postage to the Quiz Master.

THE QUIZ MASTER.

Questions and Answers, May Series, 1910.

1—For what are moth balls chiefly used?

Moth balls (naphthalene balls) are chiefly used to prevent the destruction of woolen goods, furs and feathers by moths.

2—What is a microscope?

A microscope is an optical instrument, consisting of a lens or a combination of lenses, used for making an enlarged image of an object not discernible by the naked eye.

3—In the botanical name Papaver somniferum, which is the generic and which the specific name?

Papaver is the generic name, and somniferum is the specific name.

4—What are bacteria?

Bacteria are extremely minute organisms without chlorophyl, consisting of single, spherical, rod-shaped or cork-screw like cells or aggregates of such cells, and occur as saprophytes, or refuse eaters and parasites. This is the definition generally given by most authorities, although some scientists use the word in a more restricted sense.

5—Why must heat be used with caution in the expression of castor oil from the seeds?

If the oil is subjected to high heat, it may acquire an acrid peppery taste and a brownish hue.

6—From what substance is magnesium sulphate chiefly obtained?

Magnesium sulphate is obtained in large quantities from the native carbonate in the mineral magnesite, from the double carbonate of magnesium and calcium known as dolomite and from silicious magnesium hydroxide.

7—What is (a) emery; (b) butter of antimony; (c) galena; (d) king's yellow?

(a) Aluminum oxide in a crystallized state, more or less colored by traces of other substances; (b) antimony terchloride ($SbCl_3$); (c) native lead sulphide (PbS); (d) trisulphide of arsenic (As_2S_3), also known as yellow arsenic sulphide or orpiment.

8—How many 15 minim doses are contained in 60 cc. of tincture of digitalis? Show work.

64.924+ doses. One minim equals 0.06161 cc. and in 60 cc. there are 973.867+ minims (60 ÷ 0.06161 = 973.867+), which is equivalent to 64.924+ doses (973.867 ÷ 15 = 64.924+).

9—What incompatibility exists between many fluidextracts and carbonates?

Many fluidextracts contain acids which react with carbonates and liberate carbon dioxide.

10—How do you account for the deep red color of Basham's mixture, since none of the ingredients used in preparing it has this color?

In preparing Basham's mixture ferric chloride reacts with ammonium acetate and forms ferric acetate which imparts a deep red color to the finished product.

11—What iodides are insoluble or almost insoluble in water?

As a rule the iodides of the heavy metals such as lead, silver and mercury are insoluble in water. Sulphur, bismuth and stannous iodides are almost insoluble, and thymol iodide is insoluble.

12—What is meant by the term "breaking with a conchoidal fracture"?

A drug is said to break with a conchoidal fracture when the surfaces exposed are smooth and shining like the resinous fracture, and are peculiarly curved, one surface being concave like the inside of a clam-shell, while the other is correspondingly convex.

13—In what four pharmaceutical definitions is the term "conchoidal" employed to describe the character of the fracture of a drug?

In the pharmacopœial definitions for aloes, extract of glycyrrhiza, gamboge and rosin.

14—How may benzoic acid be obtained from benzoin?

If benzoin is carefully heated, benzoic acid will be volatilized and may be collected as a sublimate.

15—How would you define ductility of metals?

Ductility is the property in virtue of which some solids may be drawn into a wire or thin sheets.

16—What are four ductile metals?

Gold, silver, platinum and copper.

17—How would you lessen bumping in a liquid?

Bumping in a liquid can usually be lessened by adding some insoluble solid substance such as broken glass, pieces of pumice stone or clay pipe. Another very satisfactory method is to pass continuously a small current of steam or air through the liquid while it is boiling.

18—What the the English equivalents for the following Latin contractions: (a) Adst. febre.; (b) div.; (c) hor. somn; (d) sum.?

(a) When the fever is on; (b) divide; (c) at bedtime; (d) take.

19—What is the difference in the appearance of the upper and under surfaces of cypripedium?

Upon the upper surface of cypripedium are many scars which are circular and depressed, while on the lower surface are numerous wiry roots and a few root scars.

20—How would you prepare pills in which mercury is the only medicinal ingredient, and the choice of excipient is left to the judgment of the pharmacist?

First finely divide the mercury by emulsifying it with some viscid substance such as, a mixture of honey or rose and glycerin, and then form a pill mass by incorporating an inert powder such as a mixture of althea and glycyrrhiza.

21—At what temperature does wool-fat melt, and what occurs if it is heated much above this temperature?

Wool-fat melts at about 40° C. (104° F.). If heated above this temperature it will vaporize, and the vapor so evolved will ignite, burning with a luminous sooty flame.

22—What are the ingredients in syrup of rhubarb?

Fluidextract of rhubarb, spirit of cinnamon, potassium carbonate, water and syrup.

23—What U.S.P. salts of zinc are very deliquescent?

Zinc bromide, zinc chloride and zinc iodide.

24—If 900 gms. of sugar are dissolved in 450 cc. of water, what will be approximately the volume (expressed in cubic centimeters) of the finished solution?

1050 cc. In fluid measure the volume of sugar in solution is approximately two-thirds of its weight. Therefore 900 gms. of sugar when dissolved would represent about 600 cc. (⅔ of 900 = 600), and the volume of the finished solution would be approximately 1050 cc. (450 + 600 = 1050).

25—What is the difference between precipitated manganese dioxide, black oxide of manganese, and binoxide of manganese?

Another Illinois Prize Winner.

T. L. CANTRALL.

Illinois has furnished several first prize winners in the contests of the Quiz Master, and a recent addition to the list is T. L. Cantrall, who was awarded first prize in the April contest. Mr. Cantrall was born at Illiopolis, Ill. When he was about thirteen years of age, the family moved to Athens, Ill., where he received his preliminary education, graduating from the Athens High School in 1903. Mr. Cantrall continued his education at Eureka College, Barnes University School of Pharmacy and Valparaiso University, and from the last named institution received his degree in pharmacy in May, 1909. He is registered in both Indiana and Illinois and at present is the proprietor of a drug store at Athens, Ill., which he purchased last August.

There are no tablets for the official precipitated manganese dioxide.

26—What is meant by making an ointment by fusion?

An ointment is made by fusion when the fatty substances are first melted, then the other ingredients added, and the mixture stirred until congealed.

27—Should white petrolatum which is perfumed, be dispensed for the official white petrolatum?

No, perfumed white petrolatum should not be dispensed for the official white petrolatum as the latter preparation is not perfumed.

28—What are hypodermic tablets?

Hypodermic tablets are tablet triturates or compressed tablets containing active medicinal agents combined with some soluble and inert diluent such as sugar of milk or cane sugar, and are used for preparing solutions which are administered by subcutaneous injection.

29—Why should castile soap not be dispensed, which have assumed a dark color?

The dark color indicates that the iodides have undergone decomposition with the formation of free iodine.

30—What are three substances obtained from animals, which are used as cathartics?

Musk, civet and castor.

31—What is the limit of heat which can be attained upon a sand bath?

A high degree of heat may be attained upon a sand bath, and is only limited by the heat producing power of the fuel used, the burner employed and the fusibility of the sand.

32—How can chenopodium be distinguished from santonica by rubbing the drugs respectively between the thumb and forefinger?

A little chaff rubs off of chenopodium when this drug is rubbed between the thumb and forefinger, and a small black seed remains; santonica similarly treated crumbles into dry scales.

33—When dispensed in capsules why should a mixture of quinine sulphate and sodium salicylate be placed in the capsules in a dry powder and not in the form of a moist mass?

If moisture is present, a chemical reaction will occur between the quinine sulphate and the sodium salicylate forming sodium sulphate and a bulky gelatinous mass of quinine salicylate.

34—What seed for sale in most drug stores, can be used to prepare an agent which is adapted for coloring many alcoholic liquids green?

A very good green coloring agent can be obtained by making an alcoholic tincture of hemp seed.

35—What are the functions of the skin?

The skin is an external investment of the body, protecting the deeper tissues; it is a sensitive organ in the exercise of the sense of touch; it is an important excretory and absorbing organ, and it aids in regulating the temperature of the body.

36—How much [illegible] mercury in blue ointment? What is the percentage?

Sixty-seven grams of mercurial ointment, containing 50 [illegible] of blue ointment, and therefore there are 33.5 gms. (33.5 per cent.) [illegible] in 100 gms. of blue ointment.

37—What is nutgall?

Nutgall is an excrescence produced on Quercus infectoria [illegible]

38—What [illegible] preparing [illegible] and tannic acid?

39—What occurs when silver nitrate is added to a solution of [illegible]?

[illegible]

41—What is meant by [illegible]?

Sugar of [illegible] is not so sweet as cane sugar, and is less liable to ferment in the stomach and bowels.

42—What is meant by a plant bud?

Branches of the stem develop, like leaves and flowers, from buds. According to the organs which result from the development of a bud, the bud is designated as a stem-bud, a leaf-bud or a flower-bud.

43—What change has frequently been noticed to occur in elixir of terpin hydrate which has been made according to the formula given in the National Formulary?

When exposed to a low temperature, terpin hydrate sometimes crystallizes out of the elixir.

44—Powdered opium is used in making what U.S.P. preparations?

Extract of opium, deodorized opium, pills of opium, powder of ipecac and opium, camphorated tincture of opium and troches of glycyrrhiza and opium.

45—What is an easy test for detecting chalk as an adulterant of saffron?

The saffron is washed with water, and any insoluble powder which may separate from the washings is treated with hydrochloric acid; if chalk is present effervescence will occur.

46—What are some other ways, than that just given, in which water can be used to test the purity of saffron?

If the water immediately acquires an orange-yellow tint, when a sample of saffron is shaken with this liquid, it is a strong indication that the drug is adulterated, as pure saffron similarly treated will slowly impart a lemon-yellow tint to the water, and the drug will retain its red color for several hours. Flowers of other plants may be detected by scattering the suspected saffron upon the surface of warm water, when the stigmas of the saffron and the flowers of any other plants present will assume their natural forms. Soluble mineral adulterants may be ascertained by applying chemical tests to the aqueous infusion of the drug.

47—What are four unofficial condiments, not liquids or compound mixtures, which are kept for sale in most drug stores?

Celery fruit, curcuma, dill seed and mace.

48—What is desiccation?

Desiccation is the process of removing water from a solid substance by the application of a moderate heat.

49—What is the appearance of syrup of hydriodic acid?

Syrup of hydriodic acid is a colorless, or not more than pale straw-colored liquid.

50—What simple chemical test will distinguish ammonium iodide from potassium iodide?

When gently heated with potassium hydroxide test solution, an aqueous solution of ammonium iodide evolves ammonia which can easily be detected when inhaled. No ammonia is produced when potassium iodide is similarly treated.

ERA COURSE IN PHARMACY.

Graduates, to June 18, 1910. *Examination Grade, P. C.*

6492	Albert A. Hedin, San Jose, Cal.	98
6258	Jesse Boyd, Denver, Col.	96
6490	Lydia R. Walker, M.D., Greeneville, Tenn.	98
6488	Chas. K. Schumann, Hagerstown, Md.	97
6155	Frank Carlyle Bellamy, [illegible]	96
6241	Sister M. Benedicta, St. Louis, Mo.	98
6242	Sister M. [illegible], St. Louis, Mo.	98
6243	Sister M. [illegible], St. Louis, Mo.	98
6250	A. J. Rice, Aurora, Ind.	98
6301	Clide L. Eddy, Bingham City, Utah	98
6432	John Pamplin, Hartford, Ohio	98
6443	D. J. [illegible], San Francisco, Cal.	98
6446	Ray [illegible], Mountain Iowa	90
6467	J. R. Hensley, Dyer, Tenn.	95
6483	Maud L. Randall, Ogden, Kan.	95
6491	Hugh Vaughan, [illegible], Va.	90

The above graduates will receive diplomas within a short [illegible]. A large and very handsome parchment diploma printed on artificial parchment, with the graduate's name engrossed, [illegible] will be forwarded to all those [illegible] 85. Every one passing the examination [illegible] Era Examination Fee.

The Era Course in Pharmacy is a home study in pharmacy [illegible] from reputable [illegible] and examinations [illegible] $10. Send to the [illegible] Era Pharmaceutical Era, [illegible]

The Three Nominees for the 1911 Presidency of the American Pharmaceutical Assc.

JOHN G. GODDING,
Boston, Mass.

FABIUS C. GODBOLD,
New Orleans, La.

T. ASHBY MILLER,
Richmond, Va.

BOARD EXAMINATIONS

Kentucky.

LOUISVILLE, June 20.—The Kentucky State Board of Pharmacy has issued a circular explaining the new Pharmacy Law. It provides for the registration of assistant pharmacists as well as those with full qualifications. To secure a full certificate, four years of practical experience in a drug store are now required, instead of three, as formerly. Three years' experience with the addition of a course in a school of pharmacy, will be accepted. There will be a fee of $10 for registering pharmacists, and an annual fee of $2 for reregistration, while assistants will be charged $5 for registration and will pay $1 additional annually for reregistration. Failure to register for five consecutive years will cause a name to be stricken off the books, necessitating examination before a new registration will be made

At the April meeting of the board the following passed out of a class of 90 applicants: C. F. Barkhurst, Cincinnati; Albert Borders, Monticello, Ky.; H. C. Buchert, Portsmouth, Ohio; C. R. Burnett, Louisville; D. C. Dunnigan, Winchester, Ky.; G. W. Peck, Cincinnati; V. M. Gegring, Cleveland; E. G. Harris, Cloverport, Ky.; M. W. Hatcher, Louisville; L. Q. Lee, Louisville; A. P. Markendorf, Louisville; R. H. Meinhart, Ashland, Ky.; C. E. Naughton, Louisville; Hunt Priest, Mount Sterling, Ky.; H. D. Richardson, Louisville; C. A. Robertson, Paducah; E. S. Rouse, St. Louisville, Ohio; F. J. Schweitzer, Jr., Louisville; L. H. Sears, Cincinnati; P. M. Smith, Versailles, Ky.; J. N. Smither, Lexington, Ky.; W. Stout, Bethel, Ohio; W. O. Vottler, Louisville; F. M. Warns, Louisville.

This is the last examination under the old law. The next meeting will be held at Dawson Springs, July 12-13, when the examination of applicants for "assistant pharmacist" will take place for the first time under the new law, and a general oral examination will be introduced as a feature of the examination for "registered pharmacist."

Applications should be filed with the secretary of the board, J. W. Gayle, Frankfort, Ky., at least ten days before the meeting.

Oklahoma.

STROUD, June 20.—At the April quarterly meeting of the Oklahoma State Board of Pharmacy, held in Oklahoma City, the following were successful in passing the examination for registered pharmacists: J. B. Bright, Shoalton, Okla.; J. R. Cassell, Fort Worth, Texas; C. D. Carll, Clinton, Okla.; R. C. Cates, Norman, Okla.; H. N. Cheatham, Fort Worth, Texas; W. W. Evans, Oklahoma City, Okla.; W. H. Foster, Oklahoma City; W. B. Hendricks, Cherokee, Okla.; William Kyle, Haskell, Okla.; F. L. Meadows, Oklahoma City; W. J. McCormick, Coweta, Okla.; H. C. McKinney, Norman, Okla.; R. V. Penwell, Bonham, Texas; J. A. Stone, Sapulpa, Okla.; J. R. Thompason, El Reno, Okla.; H. A. Vollmar, Thomas, Okla.; J. T. Wilkinson, Lenapah, Okla.

The following met the requirements of the board and were granted certificates as registered pharmacists on diplomas from schools of pharmacy recognized by the board: H. I. Allis, Tecumseh, Okla.; Henry Ammann, Pittsburg, Pa.; R. L. Bouton, New Albany, Miss.; R. E. Boykin, Oklahoma City; B. B. Campbell, Fostoria, Ohio; C. J. Crowl, Shamokin, Pa.; F. B. Charles, Lindsey, Okla.; W. E. Foertmeyer, Cincinnati; W. D. Hartman, Pittsburg; B. F. Herman, Wesson, Miss.; E. D. Klapp, Tecumseh, Okla.; Wm. K. McMullen, Petrolia, Kan.; George Marion Mills, Atlanta, Ga.; Lewis Glenn Roberts, Edwards, Miss.; Hugh J. Thompson, Helena, Ark.; L. M. Williams, McAlester, Okla.; B. O. Windsor, Muskogee, Okla.

The following were granted registration on reciprocal exchange: John F. Carlton, Sulphur, Okla.; Joseph C. Hart, Roff, Okla.; Charles L. Peques, Siloam Springs; R. A. Snow, Skiatook, Okla.; Frank R. Crook, Oklahoma City, Okla.

The next meeting will be held in Oklahoma City, July 12-13. Applications should be filed with the secretary at least ten days previously. Blanks will be furnished on request by J. C. Burton, secretary, Stroud, Okla.

Wisconsin.

MADISON, June 20.—The annual meeting of the Wisconsin State Board of Pharmacy was concluded recently with the election of the following officers: H. B. Allen, Richland Center, president; Edward Williams, Madison, secretary. The following certificates were granted:

Registered Pharmacists—Edward B. Duncan, Stoughton; Obert A. Bergen, Iola; Arno J. Wolfe, Sheboygan Falls; George W. Haight, Gliddeu; Lin Suits, Medford; Nordahl S. Sandahl, Black River Falls; Pelegia G. Gruszynski, Thorpe; Leonard M. Lund, Viroqua; John F. Huber, Racine; George L. Moundey, Milwaukee; W. C. Kettelhut, Milwaukee; Arthur T. Netzel, Crandon; Bohumil Hamachek, Kewaunee; John V. Collins, Lancaster; Edward F. Stokes, Racine; Leo A. Hild, Arcadia; Theodore G. Thomas, Milwaukee.

Assistant Pharmacists—Alfred W. Deicken, La Crosse; Edwin J. Boberg, Eau Claire; Harold W. Tuttle, Beloit; Charles J. Jarvis, Wautoma; Henry P. Hansen, Haywood; Fred C. Vogt, Monroe; R. T. Murley, Boscobel; Walter Myron Atwood, Madison; Ernest G. Hayek, Racine; John J. McCarthy, Fond du Lac; Alexander M. Trock, Milwaukee; Theodore H. Belling, Fond du Lac; Sister Angelica, Eau Claire; Frank M. Tionen, Appleton; Edward N. Fuhrman, Appleton; Floyd E. Snyder, Greenwood; Theodore Hunchow, Appleton; Paul J. Kolitzke, Appleton; Emanuel M. Hahn, Depere; H. O. Jaastad, Iola; John J. Heinisch, Racine; Roy O. Fischer, Jefferson; Antonio Matesi, Milwaukee; Francis F. Kane, Milwaukee; Wilbur S. Ford, Oconto; Sabus Haas, Richland Center; Edward Erb, Columbus; Albert G. Hammerling, Ripon; William C. Becker, Watertown; Leutena G. Reiser, Edgar; Oscar A. Reischel, Milwaukee; Robert P. Brown, Bloomer; Otto F. Pohland, Chilton; Henry E. Horn, Oshkosh; Angus A. Johnson, West Salem; Willis Cooper, Bangor; Herbert Bourdiairs, Marinette; William F. Ziegenhagen, New London; Elmer A. Lorch, Madison; Jacob J. Herrmann, Kenosha; F. K. Schmitt, Boscobel; Harold H. Holmes, Tomah; Harry F. Mayer, Kenosha; Lawrence P. Peterson, Viroqua.

New York—Eastern Branch.

Following are the names of those who passed the examination held recently by the Eastern Branch of the New York State Board of Pharmacy at the Brooklyn College of Pharmacy:

Registered Pharmacists—William H. Cutter, Leon L. Cypress, Mas Dorfman, Irving Eisler, Richard Elting, Julius Feldman, Antonio Fendale, Harold Fenerelsen, Sam Fine, Morris Fried, Benjamin Gagliano, Mendel Garber, Joseph F. Gennaro, Francis

[illegible] Jos. Bernstein, Julius R. Cohen, Lewis Offenhartz, Lloyd D. Ross, Samuel Goldberg, Isaac M. Goodman, Isaac Grossman, Harry M. Grossman, Jr., James R. Hanks, Ed. A. Hemphill, Martin G. Heidt, Max Hertz, Nathalie Hermsky, Marcus A. Host, Martin L. Huck, Jos. L. Kaiser, George Kamlosh, Herman M. Kanof, Isadore Kodish, Alexander Lamensdorf, Abraham Lasky, Joseph Lerner, Catherine R. Lukas, Leopold Lutz, Joseph Lutin, Samuel Lutton, Nathan Mass, Isaac J. Mayer, George Berger, Moses Reisner, Arthur Rosenberg, Isaac W. Rose, Lloyd Roy Tracy, John J. Shea, Max E. Strauss, Meyer Russell, Rudolph Gustave Hasse, Jr., Cartwright, David J. Cohen, Samuel J. Cohen, Clifford D. Cole, Crystal A. [illegible], Samuel Lincoln, Louis Levine, Meyer A. Levine, Benjamin Lewis, Charles W. Lindsay, Theodore Lindsay, Jr., Isaac Lubarsky, Abraham Matzoff, Manuel E. Mendez, Charles L. Marsden, Antonio Medina, Jose Ramon N. Monsanto, Oscar Montano, Celia Myerberg, Marianne Mottu, Jose A. Mendoza, John F. O'Connor, Matilda Pavenstedt, Andrew H. Pfeil, David Pomersky, Joseph S. Pomeranz, G. Clarence Propst, Louis H. Rothberg, Joseph, Rudolph Joseph Rabinowitz, Isaac Rosen, Arthur Related, Leon, Rosenthal, Samson Rosenblatt, Max Rosenfeld, Dominick A. Rossomano, Eugene Ruff, Solomon [illegible], John G. Sanchez, Benjamin Schapin, Clement L. Shaw, Samuel S. Sidransky, Joel Sissman, Lazarito Splendia, Jacob Sussman, Albert Tartell, Julius I. Traub, Samuel Temlak, Sochor B. Tetz, Charles Timen, Samuel Tommasi, Harris Townshend, Francesco Trapani, Wm. H. Tyrnpany, Herman Vogel, Charles Walther, Walter Wehn, George L. Wells, Samuel Weiner, Harry Weis, James W. Wise, Jr., Aaron Wisenthal, Pasc Zingale, Otto G. Zorn, Frederick Voltz.

Licensed Druggists—Lynn H. Buck, Arthur E. Cole, Edward Fischer, John G. Kaiser, George M. Perry, D. Davis Prosser, Jr., Nestore R. Sanmarco, George F. Schetter, Arturo V. Stilo, Vincent T. Whalen, Luigi de Julio, Achille Landi.

The following qualified for registered pharmacist at June examination held at New York College of Pharmacy: Joseph Apicella, Joseph H. Betz, David Braunstein, Lazar Bresler, Carmello T. Caputo, Jerome Finkenberg, Oscar Garten, Max Goldman, Adolph Hauff, Herman H. Hertz, Isidore Jaffey, Ernest W. Kenecht, Henry M. Landesman, Herman Licht, Ed. J. Miller, John H. McMillan, Samuel Ruwman, Louis W. Schwarz. Mose Scuccimarra, Harry Stein, Theodor Washutzki, Harry A. Bradley, Francis T. Cizmowski, William J. Duffy, Arthur W. Florence, Isidore Lichtenstein, Wilbert M. Roulston and Israel Weinberg. Passed druggists' examination: John J. Cassidy, Jr., Vincenzo Cavaccini, Michele Cerone, William Fey, Charles A. Nash and Joseph Weisberger. Another examination will be held by the Eastern Branch on July 20.

North Dakota.

[illegible], June 20.—Secretary W. S. Parker, of the North Dakota Board of Pharmacy, reports the following as having passed at the March examination:

Registered Pharmacists—O. R. Benson, Michigan, N. D.; Sanford C. Haugen, Devils Lake; Anthony M. Holt, Devils Lake; M. H. Johnson, Antler; Lloyd Lesh, Bowbells; George J. McCabe, Jamestown; Margaret McCarthy, Page; Albert Morris, Walhalla; B. C. Moses, Williston; G. M. Noyer, Jamestown; John Onstad, Clinton, Minn.; R. C. Olsen, Columbus, N. D.; Alfred Peterson, Oberon; Guy L. Stearns, Williston; P. E. Schulstad, Dogden; D. S. Thomson, Williston; T. R. Townswick, Fergus Falls, Minn.; L. J. Wilker, Hensel, N. D.; Roy H. Wood, Fargo; Alfred Walstad, Crosby; C. H. Wave, Abercrombie.

Assistants—Earl M. Harding, McClusky, N. D.; O. J. Korbel, Crosby; A. I. McBride, Rugby; John A. Carman, Detroit, Minn.; James L. Cook, Fargo, N. D.; N. A. Ferguson, Langdon; W. E. Fowler, Langdon; A. M. Hammes, Sarles; W. E. Malloy, Garrison; Ross McFarland, Grafton; Dan McNell, Milton; A. M. Nevander, Underwood; C. K. Neshime, Granville; George Ohmstad, Ray; Perry Pederson, Hawley, Minn.; J. Oliver Rougstad, Litchville, N. D.; Knute Tiegen, Davenport; Charles P. Thomson, Minto; Mark T. Vornhoff, Leeds; Burt I. Close, Stanley; Romeo Campian, Olga; O. A. Otterson, Fargo; I. Simmons, Fargo; Frank Chastek, Glencoe, Minn.; Martin M. Sorenson, East Grand Forks, Minn.; Dwight L. Smith, Minneapolis, Minn.; Roy C. Stinson, Grand Forks, N. D.; Otto Anderson, Manfred; George B. Dougherty, Ross; H. S. Fuerstnow, Tioga; B. O. Grenvold, Adams.

Montana.

[illegible], June 20.—The Montana State Board of Pharmacy at its last meeting elected these officers: I. J. Kreiker of Bozeman, president; T. M. Kehoe, of Billings, secretary; Sid J. Coffee, of Missoula, treasurer. The next meeting will be held [illegible]

[illegible] pleasing the good work of the Montana [illegible] of Pharmacy, which is conducted in connection with the [illegible] College of Agriculture and Mechanic Arts at Bozeman, and assuring the gentlemen that diplomas issued by the [illegible] of graduates of four years practical experience, would be accepted by the board without further examination.

[illegible] were dropped for delinquency. The following [illegible]

[illegible] McKibbin, Great Falls; Otto W. Anderson, [illegible]; Thomas [illegible], Thurlow, N. D.; W. I. Millington, Livingston; [illegible]; Henry W. Chappell, Kenmare, N. D.; [illegible]; Jerome Mead, Lewistown; Harry Mead, Missoula; [illegible]; Ernest E. Sayles, Plentywood; Mary [illegible]; Louis A. Wagner, Columbus; [illegible]

Assistants—[illegible]; Wilson, Missoula; James S. Copling, Dee; [illegible]; A. Ritter, Wooden Shoe; Charles E. Pratt, Deer Lodge; A. L. Starstad, Livingston; Edward F. Lawler, Baker, Mont.; Robert S. Hamilton, Conrad, Mont.; H. A. [illegible], Kenyeth, Mont.

Last Meeting of Present New York Board.

SARATOGA, June 25.—The New York State Board of Pharmacy, which disbands August 1, when the new Pharmacy Law goes into effect, held several meetings during the convention of the New York State Ph.A. The board cleaned up all odds and ends of its regular routine business in anticipation of turning over its work and records to the new board provided for by the law. It was decided to hold its last examinations the third Wednesday and Thursday in July in order to give those entitled to a re-examination an opportunity to obtain their certificates. These examinations will be held by all three branches of the present board.

This examination is intended to take care of all candidates who have one trial coming to them upon applications filed within six months of the date of the examination to occur next month, and also for the reception of applications for examination from candidates with the understanding that but one trial will be granted. Applications should be made immediately to Secretary Bradt, as a large number will no doubt take advantage of the fact of this being the last examination under the present system, and the board requests all the time possible to prepare for the candidates desiring to appear.

The present and ex-members of this all-State board have banded together and formed a club under the name of The Old Guard of Pharmacy. The object of the organization is purely to recall, in the years to come, the days and friends of the years that are past. "The Old Guard" will meet at a dinner on the evening of the second day of the New York Association Convention and drink a toast to Auld Lang Syne. The first of these annual banquets was held at the convention this week.

The following have been elected the officers of this new fellowship: Dr. William Muckenhirn, of Brooklyn, president; Byron M. Hyde, of Rochester, vice-president, and George Reimann, of Buffalo, secretary and treasurer. There are some 25 pharmacists who are eligible to membership, and so far all who have been asked have accepted the invitation to join.

Georgia.

ATLANTA, June 20.—Fifty-six druggists, pharmacists and apothecaries passed the recent examination before the Georgia State Board of Pharmacy as follows:

Druggists—W. H. Aycock, A. A. Austin, A. Berman, D. P. Butler, Ernest Corn, W. M. Cowart, F. G. Craig, J. F. Friddell, A. S. Gray, Ross Golden, C. G. Hodges, W. H. Hogan, George O. Hill, I. W. Irwin, W. H. Irby, R. G. Johnson, R. T. Johnson, Y. C. Killebrew, L. F. Love, G. C. Lamb, A. M. Jones, E. K. McElroy, G. G. Mays, J. M. Norris, E. A. Owens, L. H. Patterson, R. L. Peters, John H. Griffeth, S. L. Sharpe, E. C. Stulls, J. A. Stephens, D. M. Swint, F. Thode, H. L. Williams, J. F. White, L. C. Waldrop, C. L. Williams and A. E. Kuppinger.

Apothecaries—T. N. Bussey, L. W. Baker, M. L. Claxton, G. W. Haling, A. K. Folger, C. F. Grant, W. T. Horne, J. C. Hardman, Miss Clara Hogan, O. C. McElroy, G. M. Mills, R. M. Mitchell and C. N. de LaPerriere.

Pharmacists—A. C. Pitts, E. M. Robinson, B. P. Sanders, E. O. Trawick and S. B. Walling.

Maryland.

BALTIMORE, June 20.—The Maryland Board of Pharmacy has announced that the following candidates for registration passed at the examination held at the University of Maryland May 21:

Pharmacists—William Weltner, Walter H. Geffert, Edmund A. Fahey, Chauncey C. Reese, Elmer H. Kellough, Frits James Bartlett, Harry C. Schwinger, W. Ellsworth Kaufman, Nelson G. Diener, Clarence G. Newhauer, Clarence N. Chavous, Arthur G. Tracey, Walter Lange, Roy Murray Bierley, J. Dorsey Atkins, Paul Sweet and A. A. Terrell.

Assistant Pharmacists—Fred Minder, Minot B. Stannard, Charles K. Stoltemeyer, George Cisek, Leo Dettelbach, George H. Waltz, Earle C. White, George K. Kreis, Claude De Wolfe, William Morgenstern, Maurice C. Easton, Lewis Gitomiskey, Arthur E. Ranck and Lawrence R. Laroque.

Michigan.

DETROIT, June 20.—At the [illegible] Grand Rapids examination of the Michigan Board of Pharmacy the following qualified:

Registered Pharmacists—Wm. C. Barnich, J. B. Cook, F. R. Ostrander, George F. Snyder, S. B. Babcock, Frank Green, W. H. Grinnell, L. A. Hooper, W. T. Knapp, A. J. Kleefus, Stanley F. Smith, Elmer Savage, W. A. Toomey, Bert Fletcher, L. A. Harmon, E. H. McCormick, R. E. Melton, L. E. Niendorf, Jos. L. Pamerleau, E. C. Speckhard, F. C. Tracy, Ed G. Jackson, Leon G. Stuck, A. M. Lindeborg, C. R. Robertson, Harry J. Meyer, E. A. Herron, Geo. J. Doxey, Arthur Gidley, D. Swilaiski, V. D. Andrews, E. Folla.

Vermont.

MONTPELIER, June 20.—Only [illegible] out of 15 candidates passed the recent examinations of the Vermont State Board of Pharmacy. They were: Peleg A. Maotion, of Bennington; Hubert W. Humphreys, of West Rutland, and Ray Irving Kinne, of [illegible].

Indispensable to all druggists is THE ERA Price List.

Group of Equestrian Members of German Apothecaries Society, Central Park, N. Y.

Many members of the German Apothecaries' Society of New York have a strong predilection for all kinds of outdoor and other athletic activities which are conducive to health and at the same time furnish enjoyable recreation. That some of them have found a means of gratifying their desires in this direction is proved by the accompanying picture which shows a group ready for a morning canter. The aggregation of equestrian apothecaries is known in its entirety as the Riverside Riding Club and was organized last year by E. C. Goetting, the well-known New York City pharmacist. The members shown in the picture are (from left to right): Dr. A. Berghaus, William Roschen, George Bruns, Hermann Blomeier, Adolph Schwartz, Rudolf Theis and E. C. Goetting.

Governor Hughes Approves Law Reorganizing N. Y. Pharmacy Board.

Regents of the University Will Appoint New Board to Take Office in August—Full Text of the Statute—Considered to be a Model in Pharmacy Legislation.

Below is printed in full the text of the new Pharmacy Law of New York State, passed by the last Legislature and approved by Governor Hughes on June 8, 1910:

CHAPTER 422—LAWS OF 1910.

(Approved June 8, 1910.)

Section 1. Article eleven of chapter forty-nine of the laws of nineteen hundred and nine, entitled "An Act in relation to the public health, constituting chapter forty-five of the consolidated laws," is hereby amended to read as follows:

ARTICLE 11.

PHARMACY.

Section 230. Definitions.
231. State board of pharmacy; appointments; nominations; examiners; secretary; expenses.
232. Powers and duties of the board; records; employees.
233. Licenses; certificates; examinations; rules.
234. Pharmacies; drug stores; stores.
235. Apprentices and employees.
236. Working hours and sleeping apartments.
237. Adulterating; misbranding and substituting.
238. Poison schedules; register; opium and other prescriptions.
239. Construction of article; temporary permits.
240. Revocation of license; misdemeanors; violations and penalties.
241. Schedules A, B and C.

Section 230. Definitions. As used in this article: 1. "Association" means the New York State Pharmaceutical Association.

2. "Board" when not otherwise limited, means the New York State Board of Pharmacy.

3. "Chemicals" when not otherwise limited, means the chemical materials of medicine.

4. "Council" means the New York State Pharmaceutical Council with a secretary and at least one representative from each school of the State appointed by the regents for a period of five years.

5. "Commissioner" means the Commissioner of Education of the State of New York; "Department," the Education Department of the State of New York; "University," the University of the State of New York; "Regents," the Board of Regents of the University of the State of New York as provided by the education law.

6. "Drugs," where not otherwise limited, means all substances used as medicines or in the preparation of medicines. "Crude drugs" means drugs that have not been changed by manufacture except by desiccation or comminution.

7. "Examiner" means a member of the State Board of Pharmacy.

8. "Formulary" means the latest edition of the National Formulary.

9. "Medicines," where not otherwise limited, means a drug or preparation of drugs in suitable form for use as a curative or remedial substance.

10. "Pharmacy," where not otherwise limited, means the place registered by the board in which drugs, chemicals, medicines, prescriptions or poisons are compounded, dispensed or retailed.

11. "Pharmacology" is the science that treats of drugs and medicines; their nature, preparation, administration and effect.

12. "Pharmacopoeia," when not otherwise limited, means the latest edition of the Pharmacopoeia of the United States of America.

13. "Physician" means a practitioner of medicine as defined by article eight of this chapter; "Dentist" means a practitioner of dentistry as defined by article nine, and "Veterinarian," means a practitioner of veterinary medicine as defined by article ten.

14. "Poisons," where not otherwise limited, means any drug, chemical, medicine or preparation liable to be destructive to adult human life in quantities of sixty grains or less.

15. "Rules," where not otherwise limited, means the rules of the board approved by the regents.

16. "School" means any college or school of pharmacy, or the department of pharmacy of a university, whatever the corporate title, registered by the regents as maintaining a proper educational standard and legally incorporated.

17. "Secretary" means the secretary of the State Board of Pharmacy.

18. "Syllabus" means the latest edition of the syllabus adopted by the board.

Section 231. State Board of Pharmacy; appointments; nominations, examiners; secretary; expenses. The State Board of Pharmacy in office when this section takes effect shall remain in office until August first, nineteen hundred and ten. On and after that date such board shall consist of nine examiners, four of whom shall be residents of the City of New York. At the annual meeting of the association held in nineteen hundred and ten there shall be twenty-five licensed pharmacists nominated by ballot whose name shall be submitted to the regents, immediately thereafter.

Appointments. From the number thus submitted or from the other licensed pharmacists of the State the regents may appoint nine persons, who shall constitute the Board of Pharmacy, whose term of office shall begin on August first, nineteen hundred and ten, three of whom shall hold office for a term of one year, three for a term of two years and three for a term of three years. The successors of the members, whose terms of office have expired, shall be appointed, as hereinafter provided, for a term of three years. A vacancy in the office of any member, caused otherwise than by expiration of term, shall be filled by the regents for the unexpired term of such member.

Nominations. Thereafter, at each annual meeting of the association, nine licensed pharmacists shall be nominated by ballot, whose names shall be submitted to the regents in writing under the seal of the association by the president and secretary hereof, promptly after the adjournment of such meeting. From the number thus submitted or from the other licensed pharmacists of the State the regents may appoint three persons to succeed the members whose terms of office expire on the following July thirty-first.

Examiners. No person shall be appointed as an examiner unless he is a licensed pharmacist, and has legally practiced as such for at least ten years in this State. Each of the candidates

plied present proof of [illegible] qualifications to the regents. The regents may require any applicant for admission to practice of pharmacy [illegible] to appear before beginning his term of office and file with the Secretary of State the certificate of oath of office. The board of any committee thereof may compel witnesses to appear and may take testimony concerning all matters within its jurisdiction. It may make such rules approved by the regents and consistent with the law as may be necessary for the proper performance of its duty, but no rule by which more than a specific sum is required for any specific action by the board shall be amended, suspended, or repealed by a majority vote that required for action thereunder.

Secretary. The secretary shall be a licensed pharmacist who has been engaged in pharmacy for at least ten years in this State. He shall be appointed by the regents, shall hold office during their pleasure and shall receive an annual salary of [illegible] dollars, payable from the moneys received under this article. He shall be the executive officer of the board and shall have such powers and shall perform such duties as are prescribed by the rules. The secretary in office when this article takes effect shall continue in office until his successor has been appointed and qualified.

Expenses. All fees, fines, penalties and other moneys derived from the operation of this article shall be paid into the State treasury and the Legislature shall annually appropriate for the department an amount sufficient to pay all proper expenses incurred pursuant to this article. All funds in the custody of the State Board of Pharmacy when this Act takes effect shall be immediately turned over to the department and shall be available for the payment of all proper expenses of the board, until an appropriation is made by the Legislature as above provided. When such appropriation is so made the unexpended balance of the funds so turned over to the department shall be paid into the State treasury, to be expended as in the case of other moneys derived from the operation of this article.

Section 232. Powers and duties of the board; records; employees. Prior to October first the board shall annually elect from its members a president and a vice-president for the ensuing year, and shall hold one or more meetings each year. At any meeting a majority shall constitute a quorum; but questions prepared by the board may be grouped and edited or answer papers of candidates may be examined and marked by committees duly authorized by the board and approved by the regents.

The board shall have power:

(a) To regulate the practice of pharmacology.

(b) To regulate the sale of drugs, chemicals, medicines and poisons.

(c) To regulate the employment of apprentices and employees in pharmacies.

(d) To regulate the working hours and sleeping apartments of employees in pharmacies.

(e) To regulate and control the character and standard of drugs and medicines compounded and dispensed in the State, to employ inspectors and chemists, to secure samples and to prevent the sale of such drugs, chemicals, medicines and poisons as do not conform to the formulæ, standards and tests of the Pharmacopœia and Formulary.

(f) To regulate the retailing of poisons and to adopt schedules.

(g) To issue temporary permits limited to definite areas.

(h) To investigate alleged violations of the provisions of this article, to conduct hearings in respect thereto, when, in its discretion, it appears to be necessary, and to bring the same to the notice of the attorney general.

Records. It shall be the duty of the board in its rooms provided by the regents to preserve a record of all licenses and certificates which shall be open to public inspection and shall have in all legal proceedings the same weight as evidence that is given to a record of conveyance of lands. It shall render annually to the regents and the association a report of all its proceedings during the preceding year.

[illegible] proceedings of the State Board of [illegible] and [illegible] conferred by this Act shall be transferred to the State Board of Pharmacy, organized under and in pursuance of the provisions of this Act and the [illegible]

[illegible] employees of the State Board of Pharmacy in office when this Act takes effect shall be transferred to the department. The rules of the board, made as hereinbefore provided, shall specify the [illegible] employees transferred to the department [illegible] for pharmacists [illegible] years of age [illegible] pharmacist [illegible] pharmacist [illegible] pharmacist

habitants or less that do not have within three miles a pharmacy or drug store;

1. Physicians may compound medicines, fill prescriptions and sell poisons labeled as required by this article.

2. Storekeepers may in accord with the rules sell medicines and poisons for a period not exceeding one year upon the payment of a fee of three dollars. The storekeeper's certificate is limited to the village or place where the storekeeper resides and may be limited to the sale of certain classes of poisons sold only in original packages and put up by a licensed pharmacist whose name and business address is displayed on the package.

Stores. It shall be lawful for the storekeeper in conformity with the rules to take, use and exhibit the titles certified storekeeper and registered store and to sell medicines and poisons for a period not exceeding one year in a village or place of the State with less than one thousand inhabitants that has no pharmacy or drug store within three miles of it.

Every person practicing as a pharmacist or druggist must at all times display his license conspicuously in his place of business. The proprietor of every pharmacy, drug store or store shall annually in the month of January report under oath to the board any facts required by the board, shall pay the registration fee of two dollars and shall receive a certificate of registration that must be conspicuously displayed at all times in the pharmacy, drug store or store with all licenses. Every person, partnership, association or corporation doing business as the proprietor or proprietors of a pharmacy, drug store or store shall cause the name of such proprietor or proprietors to be displayed upon a sign conspicuously placed upon the exterior of the building and this sign shall be presumptive evidence of ownership of such pharmacy, drug store or store. The proprietor that opens a pharmacy, drug store or store subsequent to the month of January shall, within thirty days of opening, make this report, pay the fee and display the certificate and the sign. Every proprietor of a wholesale or retail pharmacy, drug store or store is responsible for the strength, quality and purity of all drugs sold or dispensed by him, subject to the guaranty provisions of this article.

Section 235. Apprentices and employees. Apprentices may be employed, in accordance with the requirements of this article and the rules, in registered pharmacies and drug stores and may receive instruction in the practice of pharmacology. Apprentices may prepare or dispense receipts or prescriptions, may sell or furnish medicines or poisons in the presence of and under the immediate personal supervision of a pharmacist or druggist who must be either the proprietor or in the actual employ of the proprietor. The proprietor as principal shall be equally liable for violations of this article by his apprentices or his unlicensed employees. Other unlicensed assistants may be employed in registered pharmacies and drug stores for other purposes than the practice of pharmacology and the dispensing, compounding or retailing of drugs, chemicals, medicines, prescriptions or poisons.

Section 236. Working hours and sleeping apartments. No pharmacist, druggist, apprentice or employee in any pharmacy shall be required or permitted to work more than seventy hours per week. Nothing in this section prohibits working six hours overtime any week for the purpose of making a shorter succeeding week, provided, however, that the aggregate number of hours in any such two weeks shall not exceed one hundred and forty hours. The working hours per day shall be consecutive, allowing one hour for an meal. The hours shall be so arranged that an employee shall be entitled to and shall receive at least one full day off in two consecutive weeks. This paragraph applies to cities of the first class. No proprietor of any pharmacy or drug store shall require or permit any clerk to sleep in any room or apartment in or connected with such store that does not comply with the sanitary regulations of the local board of health.

Section 237. Adulterating, misbranding and substituting. A drug is adulterated in any of the following cases:

1. When sold under or by a name recognized in the Pharmacopoeia it differs from the standard determined by the test or formula given.

2. When sold under or by a name recognized in the Formulary the strength, quality or purity or percentage of the alkaloid or alkaloids or other potent ingredient or ingredients differs from the standard determined by the test of formula given.

3. When sold under or by a name not recognized in or according to a formula not given in the Pharmacopoeia or Formulary that is found in some other standard work on pharmacology recognized by the board, it differs in strength, quality or purity from the strength, quality or purity required, or the formula prescribed in the standard work. Provided, however, that all drugs sold by wholesale when not sold to a consumer shall be in accordance with the provisions of the National Food and Drug Act of June thirtieth, nineteen hundred and six.

4. When sold as a homeopathic drug it differs from the strength, quality or purity established by the test or formula given in the latest edition of the Homeopathic Pharmacopoeia of the United States or the American Homeopathic Pharmacopoeia.

5. Its strength, quality or purity differs from the professed standard of strength, quality or purity under which it is sold.

6. It contains methyl or wood alcohol when intended for use as a medicine except when sold as a veterinary liniment for external use only and so labeled.

Misbranding and substituting. A drug is misbranded if

1. The package bears any statement, design or device that is false or misleading in any particular regarding it contents, regarding the State, Territory or county in which it is manufactured or produced.

2. It is an imitation or is offered for sale under the name of another substance.

3. The original contents of the package have been removed in whole or in part and other contents added.

4. The package fails to bear a statement of the percentage contained therein by volume of alcohol and by quantity or proportion of morphine, opium, heroin, chloroform, cannabis indica, chloral hydrate, acetanilide or any derivative or preparation of any of these substances.

5. The package containing a homeopathic drug fails to state that fact.

These statements shall be made in type easily read, conspicuously displayed and described by their common or English names. Alcohol used as a solvent, preservative or for any other purpose is contained in the drug within the meaning of this article. Nothing in this paragraph applies to the compounding and dispensing of drugs and medicines on the written prescription of a physician, dentist or veterinarian, which prescription shall be kept on file by the pharmacist or druggist. Nor does it apply to unadulterated drugs recognized in the Pharmacopoeia and the Formulary and the Homeopathic Pharmacopoeia sold under the names by which they are recognized therein, and not sold under a proprietary name, trade name or trade mark. All adulterated, misbranded or substituted drugs are forfeited to the board for destruction.

Section 238. Poison schedules; register; opium and other prescriptions. It is unlawful for any person to sell at retail or to furnish any of the poisons of schedules A and B without affixing or causing to be affixed to the bottle, box, vessel or package, a label with the name of the article and the word poison distinctly shown and with the name and place of business of the seller all printed in red ink together with the name of such poisons printed or written thereupon in plain, legible characters.

Wholesale dealers in drugs, medicines, pharmaceutical preparations, chemicals or poisons shall affix or cause to be affixed to every bottle, box, parcel and outer inclosure of any original package containing any of the articles of schedule A a suitable label or brand in red ink with the word poison upon it.

Register. Every person who disposes of or sells at retail or furnishes any poisons included in schedule A shall before delivering the same enter in a book kept for that purpose the date of sale, the name and address of the purchaser, the name and the quantity of the poison, the purpose for which it is purchased and the name of the dispenser. The poison register must be always open for inspection by the proper authorities and must be preserved for at least five years after the last entry. He shall not deliver any of the poisons of schedule A or B until he has satisfied himself that the purchaser is aware of its poisonous character and that the poison is to be used for a legitimate purpose. The provisions of this paragraph do not apply to the dispensing of medicines or poisons on physicians' prescriptions.

The board may add to any of the schedules from time to time as such action becomes necessary for the protection of the public. Schedules A, B and C shall remain in force till amended by the rules.

Prescriptions of opium, morphine and chloral. No pharmacist, druggist, or other person shall refill more than once prescriptions containing opium or morphine or preparations of either of them or chloral, in which the dose of opium shall exceed one-quarter of a grain, or of morphine one-twentieth of a grain, or of chloral ten grains, except upon the written order of a physician.

Section 239. Construction of article; temporary permits. This article shall not apply to the practice of a physician that is not the proprietor of a pharmacy, drug store or store, or that is not in the employ of such a proprietor. Except as to the quality of drugs dispensed it shall not prevent physicians from supplying their patients with such articles as the physician deems proper. This article shall not be construed as precluding the ownership of a pharmacy or drug store by an unlicensed person, firm or corporation provided such pharmacy or drug store be conducted in accordance with the provisions of said article. Except as to the labeling of poison and to adulterating, misbranding and substituting, it shall not apply

1. To the sale of drugs, medicines, chemicals, prescriptions or poisons at wholesale when not for the use or consumption of the purchaser.

2. To the sale of paris green, white hellebore and other poisons for destroying insects.

3. To the sale of any substance for use in the arts.

4. To the manufacture and sale of proprietary medicines.

5. To the sale by merchants of the articles in schedule C.

Section 240. Revocation of license; misdemeanors; violations and penalties. No license or certificate shall be granted to any applicant guilty of felony or gross immorality, or that is addicted to the use of alcoholic liquors or narcotic drugs to such an extent as to render him unfit to practice pharmacology. Any license or certificate obtained by misrepresentation or fraud or that is held by any one unfit or incompetent from negligence, habits or other cause may be revoked after reasonable notice and opportunity to be heard. The wilful and repeated violation of any of the provisions of this article or the rules is sufficient cause for the revocation of a license or certificate. The license or certificate revoked shall on formal notice be delivered immediately to the board.

Misdemeanors. It is a misdemeanor for

1. Any person to procure or to attempt to procure a license or certificate for himself or for any other person by making, or causing to be made, any false representations.

2. Any pharmacist to permit the compounding and dispensing of prescriptions of medical practitioners in his pharmacy by any unlicensed person or persons, except in the presence of and under the immediate personal supervision of a pharmacist or druggist.

3. Any unlicensed person to prepare or to dispense a medical prescription or physician's prescription, or to dispense or to sell at retail poisons or medicines except under the immediate personal supervision of a pharmacist or druggist whose license is displayed in the pharmacy or drug store.

4. Any unlicensed person to open or to conduct or to have charge of, or to supervise any pharmacy, drug store or store for retailing, dispensing or compounding drugs, chemicals, medicines, prescriptions or poisons.

5. Any person to fraudulently represent himself to be licensed.

6. Any person to intentionally prevent or knowingly refuse to permit any examiner or inspector to enter a pharmacy, drug

store or store for the [illegible]

§ 2. Any person [illegible] to [illegible] has been revoked to refuse to [illegible]

§ 3. Any person [illegible] of any [illegible] of a [illegible] or [illegible] to fail or display the [illegible]

§ 4. Any [illegible] of [illegible] in a city of the first class to [illegible] more than seventy hours a week in [illegible] or employment that [illegible] or [illegible] and that [illegible] to [illegible] to [illegible] the [illegible] in regard to [illegible]

§ 5. Any person [illegible] or subject to [illegible] drug [illegible] to be used, or [illegible] for sale or [illegible] adulterated, misbranded or substituted drug.

§ 6. Any person [illegible] of the provisions of [illegible] in regard to the [illegible] or dispensing of drugs, [illegible] [illegible] and poisons for which [illegible] to [illegible]

§ 7. Penalty. Any person that violates any of the provisions of this [illegible] who is not otherwise prescribed as for a misdemeanor, shall forfeit to the people of the State of New York the sum of [illegible] for every such violation. Which may be sued for and recovered in the name of the people of the State of New York in an action brought therefor by the attorney-general.

§ 8. Exemption. Any person who violates any of the provisions of this article relating to adulterating, misbranding or substitution shall not be prosecuted or convicted or suffer any of the penalties, fines or forfeitures for such a violation, if he establishes upon the hearing or trial that the drug or drugs alleged to be adulterated, misbranded or substituted were purchased by him under a guaranty of the manufacturer or seller to the effect that said drug or drugs were not adulterated or misbranded within the meaning of this article and proves that he has not adulterated, misbranded or substituted the same. A guaranty in order to be a defense to a prosecution or to prevent conviction or to afford protection must state that the drug or drugs to which it refers are not adulterated, misbranded or substituted within the meaning of the provisions of the statute of New York State and must state also the full name and place of business of the manufacturer, wholesaler, jobber or other person from whom the drug or drugs were purchased. In construing and enforcing the provisions of this article the word "person" shall import both the plural and singular and shall include corporations, companies, partnerships, societies and associations, and the act, omission or failure of any officer, agent or other person acting for or employed by any corporation or association within the scope of his authority or employment shall in every case be deemed to be the act, omission or failure of the corporation or association as well as that of the officer, agent or other person; and that in case of violation of the provisions of this article by a partnership, association or corporation, every member of the partnership or association and the directors and general officers of the corporation and the general manager of the partnership, association or corporation, shall be individually liable and any action, prosecution or proceeding authorized by this article may be brought against any or all of such persons. When any prosecution under this article or under section eleven hundred and forty-two, section eighty, section eighty-one, section eighty-two, section seventeen hundred and forty-two, section [illegible] and forty-six, section [illegible] and forty-seven, section [illegible] and forty-nine, section [illegible] and forty-one and section [illegible] and sixty of the penal law and any amendment thereto is made on the complaint of the [illegible] a fee of [illegible] shall be paid into the State treasury.

§ 241. Schedules A, B and C. These schedules remain in force until revised by the board and approved by the regents.

Schedule A. Arsenic, atropine, corrosive sublimate, potassium [illegible] hydrocyanic acid, morphine [illegible] and all other poisonous vegetable alkaloids and their salts, oil [illegible] podophyllin, opium and its preparations, except paregoric and such others as contain less than two grains of opium to the ounce.

Schedule B. Aconite, belladonna, cantharides, colchicum, conium, cotton root, digitalis, ergot hellebore, henbane, phytolacca, strophanthus, oil of savin, oil of tansy, veratrum viride and their pharmaceutical preparations, arsenical solutions, carbolic acid, chloroform, creosote, croton oil, white precipitate, strophanthin, wood alcohol, mineral acids, oxalic acid, paris green, salts of lead, salts of zinc, white hellebore, or any drug, chemical or preparation which, according to the Pharmacopoeia and Formulary and Homeopathic Pharmacopoeias, is destructive to adult human life in quantities of sixty grains or less.

Schedule C. Ammonia water, bicarbonate of soda, borax, camphor, castor oil, cream of tartar, dye stuffs, essence of peppermint, essence of wintergreen, non-poisonous flavoring essences or extracts, glycerine, licorice, olive oil, sal ammonia, saltpetre, sal soda, Epsom salt, Rochelle salt, sulphur, cod liver oil, vaseline, petroleum jellies, oil of origanum, oil of spike, flaxseed, rock candy, butter color, malt extract, extract of beef, beef, iron and wine, extract of witch hazel, quinine pills, cathartic pills, seidlitz powders, bay rum, perfumes, toilet water, turmeric, talcum powder, composition powders, porous plasters, court plasters, copperas, alum, gum arabic, lithia water.

Section 3. This Act shall not affect pending actions or proceedings, civil or criminal, brought by or against the State Board of Pharmacy, as the same was constituted prior to the taking effect of such Act, but such actions or proceedings shall be prosecuted or defended to a final conclusion, in the same manner, by the State Board of Pharmacy, constituted as herein provided, by the officers having jurisdiction in respect thereto. The provisions of this Act shall not be construed so as to affect or impair any act done, or right accruing, accrued or acquired, or any penalty, forfeiture, or punishment incurred prior to the time when this Act or any part thereof takes effect, under or by virtue of the law amended by such Act, but the same may be asserted, enforced, prosecuted or inflicted as fully and to the same extent as if this amendatory Act had not been passed.

Section 4. Section three hundred and eighteen of such chapter is hereby repealed.

Section 5. This Act shall take effect August first, nineteen hundred and ten, except that the provisions contained in section two hundred and thirty-one, which relate to the nomination and appointment of members of the State Board of Pharmacy and the organization of said board, shall take effect immediately.

New York's New Law Which Makes Unlawful Possession of Cocaine a Crime.

Following is printed the full text of the New York State Anti-Cocaine Law, as enacted by the last Legislature and approved by Governor Hughes on April 21, 1910

CHAPTER 131—LAWS OF 1910.

(Amending Penal Law. Effective April 21, 1910.)

Section 1. Section seventeen hundred and forty-six of chapter eighty-eight of the laws of nineteen hundred and nine, entitled "An Act providing for the punishment of crime, constituting chapter forty of the consolidated laws," is hereby amended to read as follows:

§ 1746. Sale of cocaine or eucaine. It shall be unlawful for any person to sell, furnish or dispose of alkaloid cocaine or its [illegible] or any admixture of cocaine or eucaine, except upon the written prescription of a duly registered physician, which prescription shall be retained by the person who dispenses the same, shall be filled but once [illegible] except [illegible] and [illegible] sold at a [illegible] [illegible] of a licensed pharmacist or licensed druggist [illegible] practicing physician, licensed veterinary [illegible] provided that the [illegible] shall not be admitted to the [illegible] [illegible] [illegible]

Prominent Boston Pharmacist Talks Interestingly of Experiences With Fountains.

C. HERBERT PACKARD, president of the Massachusetts College of Pharmacy and local secretary of the committee of arrangements for the 1911 convention of the A.Ph.A. in Boston, has introduced some of his own original and forceful ideas into the soda fountain business. One of them at least his friends in the Boston Association of Retail Druggists think he ought to get patented but Mr. Packard thinks otherwise, and has on several occasions told his brother pharmacists of the improvements which he uses on his fountain.

Mr. Packard's experience with soda fountains covers nearly three decades, and in that time he has seen a development in them and in the demand for fountain beverages which quite parallels the wonderful development in transportation facilities which mark East Boston, the island district in which his two stores are situated. One of Mr. Packard's stores is in Maverick Square, exactly opposite the entrance to the East Boston Tunnel, the first under-sea tunnel to be built in America, which connects East Boston with the city proper. The other store is at Central Square, a few blocks above. When Mr. Packard entered the Maverick Square store as an errand boy, an ordinary journey from the site of the store to the heart of the city proper required 35 minutes, using horse cars, the ferry boat, and another trip in horse cars on the other side. Oftentimes now Mr. Packard leaves the same store, of which he is now proprietor, boards an electric car, and in five minutes is in Washington street in the city proper, making the journey through the mile of tunnel.

C. HERBERT PACKARD, of Boston, Mass.

"There have been great improvements in transportation facilities," said Mr. Packard, "and there have been great changes in soda fountains. When I came to work in this store," he said to a representative of the ERA, "we had a small marble box on the counter for a soda fountain, and during the winter it was stored and a case of toilet goods or proprietary articles took its place. No soda was sold after the first of October. In 1887, when I bought the store, I remodelled it and put the first wall apparatus in East Boston. From that time, with the remodelled store and the larger and attractive fountain, dates my all-the-year-round soda business. That fountain lasted ten years, when I replaced it with a larger wall apparatus. Three years ago I again remodelled the store, putting in a tile floor among other things, and changing the wall apparatus for a modern Innovation fountain. I had one of the earliest Innovations in East Boston. Changing the store over the first time made a difference of 400 to 500 per cent in the soda business.

"In both of my stores now the soda business is large throughout the whole year. I can remember when ice cream in winter at a soda fountain was an unheard-of thing, but now it is one of the most common."

Mr. Packard is a man of original ideas and of unusual force, characteristics which have revealed themselves in his administration of the several offices which he has been called upon to fill, notably as chairman of the entertainment committee of the N.A.R.D. meeting in Boston several years ago; then as president of the Massachusetts State Pharmaceutical Association, and more recently as president of the Massachusetts College of Pharmacy. Still further evidences may be expected at the A.Ph.A. meeting next year.

When he was asked about fountain methods and whether he found any difference in the character of the trade at the two stores, he replied: "Yes, there is a difference. At the Maverick Square store we have a larger demand for straight drinks, for orangeades, for orange phosphates, for milk shakes and for egg drinks. At the Central Square store we do a larger business in college ices and in ice cream. More of our trade here is for a 5-cent drink, while there it is more of the 10-cent class.

"At both stores we have a good egg drink trade, and I have aimed in this, as in all fountain business, to have everything of the best. I have an arrangement for getting eggs fresh that has proved highly satisfactory. Every five or six days I have a case come down from a dairy farm in Deerfield Valley, western Massachusetts. I have a cousin there who sees that I get the freshest of eggs. Each egg is marked, and my trade has come to know that I have fresh eggs at the soda fountain, and they respond accordingly.

"I have a method of keeping milk and of keeping it chilled that I devised. Many fountain operators keep milk in a reservoir or syrup tank, while others keep it in jars packed in ice in order to keep it chilled. But I use an ice cream container, packed in ice, and it is chilled and sweet night or day. I find it works perfectly and milk shake patrons speak of its sweetness and coldness.

"I also find it desirable to keep a bowl of chopped ice for such drinks as orange phosphates. A little cracked ice adds a zest to the beverage that it lacks without the ice.

"Then I have a brush device for cleaning tumblers, especially those which have had ice cream in them. I have been urged to patent it, but have never felt so inclined and have told about it at meetings of the association. It is a practical, thorough and inexpensive method of cleaning glasses, and requires only one hand to do it, leaving the other free. I took a discarded tumbler washer, had the bottom weighted, so that it would always set firm, and then had a circular brush, in a frame set in around the sides. Then I had another brush for the center, conical in shape, to clean the interior of the glasses. I keep the vessel well filled with water containing any kind of saponaceous material, soapine, pearline, or any kind of washing powder that I may have on hand, to neutralize the butter fat."

At this point a customer had finished a pineapple college ice, and the glass was covered with the cold butter fat. Mr. Packard gave at once a demonstration of his cleaning method. He rinsed the glass in a patented tumbler washer, which took off the great bulk of the matter, but the glass was still decidedly "dirty." He plunged it into his own device, twirled it two or three times around the brushes, and the glass came out clear and shining. "This is the best method of cleaning glasses I have seen anywhere," he said, "and it is quick and easy."

"It has been suggested that the bristles, if constantly in water, will get soft, or that the water in the small cleaner is likely to become foul by standing, but neither of these objections has proved serious. The brushes last about a year and

cost $1 or $1.50 to replace. By first rinsing the glasses the great bulk of foul matter is removed, and it is a simple thing to turn out the water and fill up anew and to add a little more saponaceous material. Every morning the brush is scalded out with hot water. It has worked well with me for two or three years, and I always have clean glasses for my customers. In fact I would not have any other kind, no matter what the trouble might be in order to clean them. Cleanliness about the soda fountain is a prime requisite. With the modern fountain, there is no need of any dirt or unsanitary condition. Everything is marble, slate or metal. It is impossible to spill water on the floor unless one tries to do it. The floor behind the fountain is always dry, and there is no rotten wood to collect filth."

Mr. Packard's fountain is illustrated on the next page.

FORMULAS

In this department will be found each month a number of soda fountain formulas in addition to the complete and varied assortment published every month in The Soda Fountain, which journal contains much other information of value to druggists who own and operate fountains, serve lunches or sell confectionery.—Editor Era.

Glasgow Frappe.

Lemon juice, ½ ounce; 1 egg; powdered sugar, 1 tablespoonful; shaved ice, ¼ glassful; mix, shake and strain into a 12-ounce glass and fill with B. & C. ginger ale.

Oriental Sundae.

Take the juice of 3 oranges and add to it 1 quart of simple syrup. Cut 3 bananas into thin slices and 3 oranges into small squares and mix all together. To serve take a scoopful of vanilla ice cream and put over it 1 ladleful of the above mixture, top off with whipped cream and a maraschino cherry.

Cherry Cooler.

Cherry syrup, 1½ ounces; lemon, 2 slices; juice of half a lemon. Nearly fill a 12-ounce glass with shaved ice, put in the foregoing and fill the glass with carbonated water. Add two maraschino cherries placed on slices of lemon and serve.

Strawberry Cabiri.

Select a good specimen of grapefruit or shaddock, remove the inner edible portion, section by section, and mix it with an equal quantity of ripe strawberries in a suitable dish; add a sufficient quantity of powdered sugar, flavor with Curacao cordial and set the whole on ice for an hour or so. To serve, fill the grapefruit shell (after the hard part has been cut out) with the mixture of fruit, garnish with whipped cream and add a thin slice of sweet orange.

Gloria Sundae.

Mix 6 ounces of malted milk with 1 quart of walnut sundae. Serve a tablespoonful on ice cream.

Lalla Rookh Ice Cream.

Six eggs; cream, 2 quarts; sugar 12 ounces; bring to a boil, cool, add 2 ounces of curacao flavor and freeze. Serve with whipped cream or a highly flavored sauce.

Chocolate Sundae Syrup.

Make a paste of [illegible] 1 quart of hot water to ½ pound of chocolate, stirring continuously. Add 1 pound of sugar, boil, cool, and again bring to a boil, being careful not to burn. Add ½ ounce extract of vanilla and mix. Excellent [illegible] A [illegible] can be made by using a dressing or sauce a mixture made of equal parts of this syrup and nuts. An ordinary syrup of chocolate can be made by adding enough simple syrup to the above formula to make the quantity measure one gallon.

Chocolate Mirage.

[illegible] orange flower water, 8 ounces; curacao flavor, q. s.; chocolate [illegible]

Thin Ices.

On a thin oval-shaped dish place in triangular outline a slice [illegible] Over them pour a small portion of pineapple, cherry and strawberry crushed fruit. Top off with a spoonful of whipped cream, a few nuts and a maraschino cherry. (Our correspondent is probably not aware that quite a different formula is employed for making a beverage dispensed under the above title in various parts of the country. See No. 157, "Dispenser Soda Water Guide," second ed.—EDITOR.)

Egg Lemonade.

Shaved ice, ½ glassful; 1 fresh egg; juice of 1 large lemon; powdered sugar, 3 heaping teaspoonfuls; plain water, 6 ounces. Shake thoroughly and add a small quantity of carbonated water, fine stream only, and grate a little nutmeg on top.

Mint Lemonade.

Peel 1 lemon, slice it in several pieces and drop into a thick lemonade glass; add 5 or 6 spoonfuls of sugar and a sprig of mint. Rub the contents of the glass with a wooden pestle until the juice is well out of the lemon and the sugar is nearly dissolved. Add a ladleful of cracked ice and fill the glass with water. Shake well and strain into another lemonade glass into which a tempting sprig of mint has been placed. A very refreshing drink and can be readily sold for 10 cents.

King George Sundae.

Into a sundae cup turn a cone-shaped measure of ice cream and over it pour a ladleful of chopped walnuts, add a little whipped cream and top off with 3 maraschino cherries.

Frozen Fruits.

Take the ripest of raspberries, currants or strawberries, as desired; press the fruit through a hair sieve into an earthen crock. To every 5 pounds of pulp, add 2½ pounds of sugar, 1 quart of water and the juice of two lemons or oranges. Freeze as you would ice cream and when frozen, put the mixture at once into porcelain-lined cans or an earthen vessel, and well pack in ice and salt.

Pistachio Syrup.

Sugar syrup, 1 gallon; extract of pistachio, ½ ounce; fresh cream or condensed milk, 1 pint; gum foam, ½ ounce. Mix and color with pistachio coloring.

Strawberry Ice Cream.

Strawberry juice, ½ pint; black raspberry juice, 1 tablespoonful; lemon juice, 2 tablespoonfuls; orange flower water, 20 drops; sugar, ½ pound. Dissolve the sugar in the juice and then freeze with cream, 1 quart, and sugar, ½ pound, previously cooked as for pineapple ice cream.

Chocolate Bouche.

Chocolate syrup, 2¼ ounces; shaved ice, 3 ounces; milk, enough to fill a 12-ounce glass. Shake well, strain, and top off with whipped cream.

LOUISIANA CONSIDERING A CAFFEINE LABEL.

Senate Passes Measure Designed to Show the Content Soda Fountain and Other Beverages.

BATON ROUGE, June 20.—The Labbe bill on soda fountain beverages that contain caffeine or theine, or any of their salts, has passed the Senate and now goes to the House for approval.

The Senator from St. Martin vigorously pushed his bill in the face of a motion by Senator Sanford of Orleans, who wanted it reconsidered, but who on hearing it explained, withdrew the objection.

The bill makes it mandatory on druggists operating soda fountains and other places serving beverages of the kind covered by the Act to label each container indicating the quantity of caffeine in the syrup and in the case of dispensers the Act is even more onerous, for it requires them to put up a placard announcing that all such syrups used in the concoction of drinks contain caffeine, which, as described by medical authorities, is a stimulating drug, which, if used in overdoses, causes nervousness in the same degree that excessive use of coffee and tea produces similar results.

Before and After Pure Food Law Enactment.

Dr. W. P. Cutter, Missouri State Dairy, Food and Drug Commissioner, had an exhibit of adulterated food in the Coliseum at St. Louis in connection with the recent convention of the A.M.A. in that city. This food was collected from all parts of the State and was prepared to show the contrast in food [illegible] the Pure Food Law went into effect. This exhibit was of much interest to the medical men.

C. H. Packard's Popular Soda Fountain in His Maverick Square Pharmacy, Boston.

A. E. Packard, chief clerk, behind the fountain. See article on page 693 for experiences of C. Herbert Packard.

A Medical View of Chocolate.

In a recent issue of the *Journal of the American Medical Association*, the editor gave the following information in reply to a correspondent:

1. We are unable to find any statement that irritation of the urinary organs is a common result of the ingestion of chocolate or chocolate candies. If this symptom has been observed, it appears not to have been made the subject of pharmacologic investigation.

2. The principal constituents of the cacao bean are fat (oleum theobromatis), theobromin, other nitrogenous substances, volatile oil, tannin and cocoa red, and gum. The fat is a non-irritating, easily digestible substance having a composition similar to other fats, with the exception that it contains a glycerid of arachidic acid. It is improbable that irritation could be produced by the fat unless indirectly by disturbing digestion in susceptible people. Theobromin (dimethylxanthin) is a base similar to caffein (trimethylxanthin) and acts as a powerful diuretic. It is converted to a large extent into purin compounds and may possibly increase the amount of uric acid in the urine. The other nitrogenous substances are mostly insoluble and indigestible and have no constitutional effect. Nothing appears to be known about the action of the tannin and cocoa red or the gum. It is supposed that the aroma of cocoa depends on a volatile oil, but nothing is known regarding its pharmacologic action so far as we can learn.

3. Ordinary chocolate consists of the roasted and ground cacao beans, from which a portion of the fat has been removed and the residue pressed into cakes, either with or without the addition of sugar. In consequence of the varying methods of manufacture, it is not practicable to give an exact analysis of ordinary chocolate. The following is an analysis of the Caracas cocoa nibs: Moisture, 7.77; nitrogenous substances, including theobromin, 14.13; theobromin, 1.48; fat, 45.54; starch, 19.40; cellulose, 6.19; ash, 4.91; sand, 2.06 (Weighman).

Soda Dispenser Now a Store Owner.

CINCINNATI, June 20.—From a dispenser behind a soda water counter to be the owner and manager of a big drug store on the ninth busiest corner in the United States in less than seven years is the remarkable jump made by Grover C. Hoffman. He realized his ambition to own one of the best paying drug trades in Cincinnati recently when he purchased the stock and fixtures of the Owl Drug Store, Fifth and Walnut streets. Mr. Hoffman started in at the Owl store a little less than seven years ago as a soda water dispenser at a salary of $5 per week. By the payment of $10,000 he has become the sole owner of the store, lease, stock and fixtures.

Information Fountain Advertising.

In a general sense, all advertising imparts information, but there is a class of copy through which indirection of information adds to the strength of the direct information that follows. It is to this sort of copy to which especial attention is herewith called. The object of this kind of information copy is to attract attention to the direct closing statements, rather than to educate. For example:

FIFTY THOUSAND QUARTS OF CHERRIES PER DAY
during the season are canned by one factory for soda fountain use exclusively. The cherries must be fine, or the canners could not sell them.
OUR CHERRIES COME FROM THAT FACTORY.

A card or window strip bearing an announcement like the above serves the double purpose of impressing the consumer with the magnitude of the soda water industries, and at the same time convinces the reader of the high quality of the cherries used at the fountain.

Here is another which is a little deeper, and more direct:

COCOA IS NOT CHOCOLATE!

After most of the butter and nearly all the starch is removed from chocolate, cocoa remains. If you desire nourishment and that rich "nutty" flavor, you want chocolate soda made with chocolate. Much so-called "Chocolate Soda" is made with *cocoa*.
WE MAKE OUR CHOCOLATE SYRUP WITH CHOCOLATE.

Here is a bit of copy of the same class, but all about home:

IT IS THE COME-AGAIN TRADE THAT PROVES QUALITY.
A good many folks have bought all their soda from us for years, and the business has grown on its goodness until
WE ARE USING A BARREL OF FINE SUGAR PER WEEK
in preparing our syrups and fruits.
Doesn't that PROVE that we serve GOOD soda?

From the foregoing examples, our readers will be able to

build up information copy to suit their particular requirements.

Fountain Cleanliness.

It is mighty good business to talk about fountain cleanliness in advertisements. Of course, you must back every cleanliness claim with provable cleanliness. Don't ask people to "look over the counter" at a bucket of slops. Here is a suggestion for cleanliness copy:

CLEANLINESS IS HALF OF SODA SATISFACTION.

Lean over the counter and have a look at the working parts of our fountain. Pass your hand over the metal parts—no dirt or grease there. Look at the draught tube, the spoons, glasses, syrup bottles. Clean? You bet! Um-m-m! No impurity in our soda!

Here is another:

IT'S HARD TO HIDE DIRT AT A SODA FOUNTAIN.

It was easy to do it with the old "hunting case" sort, but with the modern "open face" style, like ours, it is different.

IF THERE IS ANY DIRT IT SHOWS.

Walk behind the counter, lift things up and look underneath. You will find metal, marble and glass [illegible]

NOTHING BUT WHOLESOMENESS, CLEANLINESS AND QUALITY AT THIS FOUNTAIN.

But before we leave this subject of cleanliness, let one more warning be recorded. In many cases claims for cleanliness and sanitation are falsely made. Oftentimes this is the fault of neither owner nor dispenser, so far as labor is concerned, but an old dog house or washstand masquerading as a fountain is generally far from sanitary, and cannot be kept clean. A fountain, to be profitably clean, must look clean. If yours is a war-scarred veteran, put it on the retired list, and get a new one, or leave out the cleanliness and sanitary talk.

Make the Types Talk.

Advertising in general made a progressive leap when it, within a few years, broke loose from the set, stiff, ultra-grammatical style, and commenced to talk as ordinary mortals do.

In every business in which the social side is a feature, or has a value, there is something which encourages familiarity. This is peculiarly true of the soda water business. Drinks have taken names from the fads and hobbies of the day, conversation among patrons adds a personal element to the service, and so, advertisements for the fountain should be couched in that contracted, conversational way in which the town talks.

The Temperance End of Advertising.

Of course, one should take advantage of "The prohibition wave," in advertising his fountain, but in doing so he should bear in mind that in appealing to a prohibition class exclusively he may be catering to the intemperate radicalism of overzealous reformers. No good advertiser ever allies himself in print with a faction. Many a total abstainer is more temperate than a prohibitionist in language and thought, yet is [illegible]

THIS IS NOT A GIN MILL

[illegible]

OUR DRINKS ARE INVIGORATING BUT NOT INTOXICATING.

[illegible]

Formulas.

Just [illegible] appear in the new edition of the Dispenser Soda Water Guide. Every fountain operator needs it.

Fountains in Drug Stores.

—FORTUNATELY for Mr. Hildreth, proprietor of the Adams Pharmacy, Phœnix, Ariz., a splendid new fountain which he had ordered had not arrived when the drug store was burned recently. The fountain came in opportunely as one of the fixtures of the new store which Mr. Hildreth quickly arranged to open in a nearby location. The reopening was a great success.

—HANDSOME new fountain was much admired at the recent opening of Edward Betourne's remodeled pharmacy in Kankakee, Ill. Souvenirs consisting of dainty linen handkerchiefs and small bottles of fine perfumery were gifts to the lady patrons, who were present in large numbers.

—W. H. BUNDY'S store at Marion, Ill., has been purchased by Armstrong, Hartwell & Co., and is being improved. Ed. Hartwell, brother of Dr. Hartwell, is in charge of the soda fountain. Mr. Bundy remains as prescriptionist.

—S. A. WALLACE & Co., Crookston, Minn., in addition to remodeling and improving their drug store, have placed in position a new fountain. Mr. Burde, of Minneapolis, has been placed in charge of the apparatus.

—PLATT & WALKER, State street druggists, Schenectady, N. Y., have had to add a sixth horse and wagon to their equipment, on account of the increase in the ice cream branch of their business.

—GEORGE GABBETTE, of Elgin, Texas, has found business rapidly and steadily improving since installing a new soda fountain, one of the handsomest in the State.

—C. C. SEAWELL, of Asheville, N. C., has installed a handsome new fountain in his new pharmacy in the Swannanoa Hotel Building, South Main and Willow streets.

—IT is now possible to serve 98 people at the same time at the fountain in the Shelley pharmacy in Wichita, Kan., due to improvements recently made by the company.

—THE Watman Pharmacy, Church and Neilson streets, New Brunswick, N. J., has installed an up-to-date fountain.

—R. D. MCDOUGAL, of Main and Adams streets, Peoria, Ill., has added a beautiful iceless apparatus to his store.

—TURNER & PETERS have placed a new and modern fountain in their Tenth street pharmacy in Columbus, Ga.

—ESTORGE DRUG Co., New Iberia, La., has opened a new iceless fountain which is one of the finest in the State.

—ADDITIONAL news regarding fountains in drug stores will be found in the July number of *The Soda Fountain*.

—POPP & RATHER, Green Bay, Wis., have completed the installation of a new fountain of Chicago make.

Purity in Soda Water Promotes Longevity.

Dr. Seneca Egbert, dean of the medical department of the Medico-Chirurgical College, of Philadelphia, paid a strong compliment to the business in soda water on June 15 when, in an address to the delegates attending the twelfth annual conference of the physical directors of Pennsylvania, he declared that pure milk, pure water and pure air increased the average span of life seven and one-half years. He declared that the attention which the authorities of the Keystone State have given during the last five years to the purity of the drinks of the people has decreased the mortality from 53 to 26 persons for every 100,000 inhabitants.

"Claret Phosphate" Causes Arrest of Druggist.

[illegible], June 20.—A complaint was [illegible] sworn to against C. E. Week, the local druggist, charging him with a violation of the recently adopted city ordinance respecting the sale of liquors by druggists. The specific act of Mr. Week is said to be the serving of a drink known as a "claret phosphate," over the soda water counter, a drink which he declares is served even in strictly prohibition towns and does not come within the category of liquor drinks. Mr. Week has [illegible] the [illegible] of serving such a refreshment in his [illegible] not regarding it as in any respect being under the ban of the ordinance.

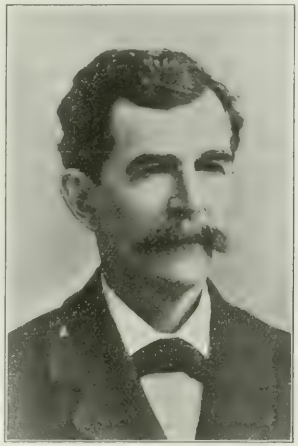
Half Million for Cool Drinks on One Sunday.

Chicago, June 20.—It is estimated that Chicago spent half a million dollars yesterday for "cooling her pipes." A prominent proprietor of ice cream said that on a hot day more than $500,000 is spent for ice cream and ices. More than $300,000 is paid out for beer and other refreshments, and another $100,000 for lemonade and soft drinks.

MOSTLY PERSONAL

Dr. Sappington, Baltimore Veteran, Has Had a Long and Useful Career as Pharmacist and Physician.

BALTIMORE, June 20. One of the most interesting figures among Baltimore druggists is Dr. Richard Sappington, who conducts a pharmacy at the southwest corner of Lexington and Gay streets, and who may be said to represent the period of transition between the time when the drug business was largely in the hands of physicians and when doctors usually dispensed their own medicines. Up to about 50 years ago it was common for the doctor to get his crude drugs from the drug store, which generally carried paints, oils and other substances in addition to medicaments, and to mix them himself. It was quite in order, therefore, that a physician should also engage in the business of druggist, combining the two occupations or professions. The development of modern pharmacy, however, made it necessary that there should be a division between prescribing and dispensing, and in course of time the druggist came to be generally recognized as a person possessing special knowledge of the compounding of formulas, and being trained in pharmaceutical manipulations, thus acquiring an expertness which the doctor could not gain if he had many calls to make on patients. In other words, the branches of pharmacy and medicine became too vast to be followed conjointly by one individual, and the druggist gained a definite and honored place. Since then, another development has tended to bring the dispenser and the doctor quite close together again, this being the manufacture of proprietaries, which are brought to the personal attention of physicians and supplied to the medical profession by the makers, so that not a few doctors carry in the compass of a satchel enough medicines in concentrated form to meet many at least the earlier requirements.



DR. RICHARD SAPPINGTON,
Baltimore's oldest physician and pharmacist. Photo 1882.

Dr. Sappington began his career at the time when physicians still put up many of their formulas and he has adhered to his early acquirements and practices by conducting a pharmacy and at the same time practicing medicine. He is the oldest living pharmacist in Baltimore and perhaps also the oldest practicing physician in Maryland, and, what is hardly less remarkable, his continuance of the capacity of pharmacist and doctor has not lost him the respect either of the medical profession or of his colleagues among the druggists. He has the satisfaction of being able to look back upon a long and honored career, and he enjoys to the fullest extent the esteem of the two professions with which he is identified. He has never gone to limits that might invite the hostile criticism of one side or the other. Though he has put out various proprietary preparations and advertised them in a way, his publicity methods have never involved the making of extravagant claims. He has remained within the limits of ethics in his advertising matter and he is not to be confounded with distributers of nostrums or cure-alls. His compounds are standard articles, put up in accordance with scientific principles, and they are often prescribed by other doctors. In medicine he has been conscientious and painstaking, never resorting to methods that might call forth censure. In order that he might be able to do justice to his drug business, he has confined himself almost entirely to an office practice in medicine, seldom seeing patients away from there, and always observing punctiliously the ethical requirements of the profession.

Of a disposition more retiring than aggressive, Dr. Sappington nevertheless has made many friends, and for years was quite active in movements to advance the interests of pharmacy. He is courteous and sociable, impressing all who meet him as a sincere and high-minded man. To many of his neighbors and friends he has acted as counselor and guide, not merely in matters of health, but in numerous affairs of life, and in this respect also he occupies a rather unique position, holding the confidence of his patrons to an extraordinary degree.

Dr. Sappington is a son of the late Dr. John Sappington and of Lavinia Bagley Sappington. He was born at Darlington, Harford County, Md., in 1827. His grandfather, Dr. Richard Sappington, after whom he was named, served as a surgeon in the Continental Army during the War of the Revolution. Until 1846 the young man attended school in Harford County, getting among other things a classical education at the Darlington Academy, where he read Cæsar, Cicero and Virgil, and acquired some knowledge of Greek. It is mentioned as of historical interest that during the War of the Revolution Maryland contributed a large sum to help the struggling government, in consideration of which aid the United States pledged to the State the sum of $400 a year, forever, for each county in the State, the money to be devoted to schools. The Darlington Academy was one of these beneficiaries. Young Sappington's tuition when he attended the academy was $12 a year.

In 1846 he decided to leave Harford County for Baltimore and wrote to a friend named Thomas Piggot, who had formerly lived opposite his home in Darlington, requesting that he find him a situation, "even if it should be in a drug store." In August of the same year young Sappington reached Baltimore and at once began to study the apothecary's business under Dr. Roundtree. He also served in the stores of Dr. Tyler and George Jones, who bought Dr. Tyler's store at Baltimore and High streets. The Maryland College of Pharmacy was not then open, and the drug business and the dispensing of medicines was largely in the hands of physicians.

On St. Valentine's Day, 1848, Dr. Sappington bought the stock and fixtures of a drug store in Pennsylvania avenue and moved the equipment to Gay and Aisquith streets. While conducting the drug business he attended lectures at the University of Maryland School of Medicine, where he was graduated in March, 1851. Soon after graduation Dr. Sappington applied for admission to the Maryland Medical and Chirurgical Society of Maryland, which would not accept him because he was a druggist, and he was informed that the Maryland College of Pharmacy would not admit him because he was a physician. Dr. Sappington thus hung like Mohammed's coffin, between heaven and earth, as it were, and he forebore applying to the College of Pharmacy for membership. Later, however, this institution changed the requirements for admission and Dr. Sappington tried again, being proposed for membership by Andrews & Thompson, one of the best known firms of druggists in Baltimore in its day. His high standing and eminent qualifications soon won him recognition. For nearly half a century he has been affiliated with the Maryland College, serving for a time as vice-president, and being elected to the board of examiners and to other offices, in all of which his wide experience, excellent judgment and solid information, not less than his practical views, made him a potent factor. Dr. Sappington also became a member of the Maryland Pharmaceutical Association and he has worked quietly but effectively for the good of the profession.

Delicate health at first caused him to confine his medical practice almost entirely to his office, and this policy he has continued throughout his career. He has thus been engaged for 59 years. His drug store he has carried on for 63 years, and continues to do so, with the assistance of his son, Reginald Power Sappington. The pharmacy has been in its present location for about half a century. There surrounds it an old-fashioned flavor that can now be found in few others. The shelving and drawers are of the kind with which patrons of stores long ago were familiar. The store is heated by a stove, instead of a furnace or hot water, as is the case in modern buildings and the touch of the latter days upon the place has been very light, indeed.

Until last Christmas Dr. Sappington was in his store every

day. At that time however he was taken ill and for weeks he was confined to the house. Now, however, he has so far recovered as to be able to get down at his store, though he cannot spend much time there. He enjoys the distinction of being the oldest living graduate of the Maryland University School of Medicine.

—J. J. [illegible], assistant to Prof. Henry Kraemer at the Philadelphia College of Pharmacy, and Henry S. Gebhall, '09, formerly a star athlete at the college but now associated with his uncle, Walter V. Smith, president of Valentine H. Smith & Co., gave a handsome silver cup to the member of the class of 1910 at the college who stood highest in his studies and at the same time had the greatest number of points won in the various athletic contests at the institution during the term just closed. Messrs. Bridgeman and Godshall are ardent believers in outdoor exercises for the pharmacist and will offer a similar cup each year.

—DR. O. W. BETHEA, of Meridian, Miss., for the past seven years secretary of the Mississippi State Pharmaceutical Association, did not accept re-election at the recent annual meeting of the organization since he takes up his residence in New Orleans in the near future. As a token of their admiration and appreciation of his services, the members presented him with a beautifully engraved gold watch fob.

—J. H. MASHOLDER has reopened his pharmacy at Eagle's Mere, Pa., after spending the winter season quietly at his Philadelphia home. Mr. Masholder is a crack athlete and is prominent socially in the Quaker City, but declares that it is business only during the few months, for his store at Eagle's Mere is the Mecca for the thousands of tourists who visit this mountainous section of Pennsylvania.

—SAMUEL W. FAIRCHILD, of Fairchild Bros. & Foster, was a delegate representing the New York Chamber of Commerce, the oldest organization of its kind in the world, at the International Congress of Chambers of Commerce, held in London, June 21 to 23. He also received an appointment from the Department of State at Washington to represent the United States at this convention.

MISS NAOMI RICHARDSON, daughter of Mr. and Mrs. W. C. Richardson, of Washington, D. C., has graduated from the National College of Pharmacy with the highest average ever made by a student of that institution. She was scholarship winner during every year of her course, and is yet lacking a few months of the age necessary to admit her to board examinations.

—PROF. FREDERICK J. WULLING, of Minneapolis, dean of the School of Pharmacy of the University of Minnesota, surprised his friend and fellow educator, Prof. Henry Kraemer, of the Philadelphia College of Pharmacy, by dropping in unannounced recently to talk over the times when both were instructors at the New York College of Pharmacy.

—I. V. S. STANISLAUS, dean of the department of pharmacy of the Medico-Chirurgical College of Philadelphia, is preparing for a good long rest throughout the summer in the heart of the mountains of Pike County, Pennsylvania. Professor Stanislaus spent June at Swarthmore, in the suburbs of Philadelphia, completing literary work.

[illegible] CAMPBELL is as prominent in business affairs as he is in pharmaceutical circles in his own community. In addition to being recently renominated for the Pennsylvania Legislature, Mr. Campbell has been elected a director of the powerful Business Men's Association of the 34th and 44th wards, Philadelphia.

—SIMON L. BREISLER, of Denver, secretary of the Colorado State Board of Pharmacy and a delegate at the U.S.P. Convention, was a recent visitor in this city. He expressed himself as greatly pleased with the New York College of Pharmacy, through which he has already [illegible] Secretary Prentiss P. Mann.

[illegible] J. DOUGLAS, of the H. K. Mulford Co., with headquarters at Providence, R. I., recently married Miss Helen Horton Kurtz. Previous to Mr. Douglas' transfer to his present location, his territory was upper Manhattan and the Bronx, and many friends and [illegible] extend congratulations.

W. L. [illegible], secretary of the Alabama State Ph.A., has completed a year's work in the Louisiana Department of the [illegible] Company, and has succeeded Inspector of the W. A. [illegible] Drug Co. in charge of Tennessee. Mr. Bethea will [illegible] the [illegible] Mississippi territory for [illegible].

W. A. [illegible], formerly of the [illegible] force of H. K. Mulford Co., is now in the Kansas City territory, succeeding [illegible], who has been promoted to the company's Eastern representatives. He is making a tour of the Eastern States.

[illegible] KRAMER, who recently retired from the retail drug business in Philadelphia, has moved from the neighborhood which for 17 years has known him so well and is now comfortably established in a new home at 1832 North 32d street, Philadelphia.

—JOSEPH L. TURNER, head of the research department of the H. K. Mulford Co., of Philadelphia, has returned from an extended business trip through western Canada. He visited the company's branch houses in Chicago and Minneapolis on his way home.

—FRED P. SCHWAEMMLE, druggist, corner 22d and Christian streets, Philadelphia, accompanied by John J. McCullough, one of Eli Lilly & Co.'s salesmen in the Quaker City, made a flying trip to New York and Coney Island very recently.

DR. AND MRS. WM. JAY SCHIEFFELIN and two children recently sailed for Glasgow. Dr. Schieffelin will attend the World's Missionary Conference at Edinburgh and the International Conference of the Business Men's Association at London.

—JOHN REISENMANN, a well known druggist of Franklin, Pa., whose daughter has been seriously ill, has sent her, accompanied by other members of the family, to southern Texas in the hope that the climate there will be beneficial.

—CHARLES E. VANDEERKLEED, chief chemist for the H. K. Mulford Co., of Philadelphia, has turned out to be one of the crack tennis players of the recently organized country club of Collingswood, N. J., where his summer home is located.

—F. E. STAMM, representing the Karith Chemical Co., was a popular visitor at the recent convention of the Illinois Ph.A., at Decatur, where he distributed about 500 samples of Karith among the members of the association.

—MARTIN H. KLEINE, son of Oscar Kleine, the late treasurer of the Kings Co. Ph.S., and who is connected with Eli Lilly & Co., attended the recent meeting of the New York State Ph.A. at Saratoga Springs.

—F. G. MEYER, representative in this city of Meyer Bros.' Drug Co., of St. Louis, recently attended the 50th wedding anniversary of his parents, Mr. and Mrs. J. F. W. Meyer, celebrated at Fort Wayne, Ind.

—HOWARD CASSARD, president of the Stonebraker Chemical Co., Baltimore, was foreman of the grand jury which recently probed the bribery charges in connection with the light and power monopoly in that city.

—WILLIAM SCOTT, president of Daniel Stewart & Co., Indianapolis, sailed recently for England on the Cedric.

—A. C. STEINBUEHLER, 453 Coney Island avenue, Brooklyn, has opened a new store.

—SAMUEL W. FAIRCHILD, Fairchild Bros. & Foster, New York, is a delegate from this city to the International Conference of the Business Men's Association which will be held in London this month.

—DR. M. E. HOUGHTON, pharmacologist for Parke, Davis & Co., Detroit, and chairman of the new committee on pharmacology of the A.Ph.A., was a recent visitor for a short time in this city.

DR. THOMAS E. ECKMAN, president of the Eckman Manufacturing Co., of Philadelphia, is a familiar figure on the Boardwalk at Atlantic City, where he has taken a cottage for the summer.

—HENRY K. MULFORD, vice-president of the H. K. Mulford Co., of Philadelphia, with his family, is enjoying a vacation at his bungalow in the Berkshire Hills of Massachusetts.

MILTON BUSCH, of the [illegible] firm of Schmelzer & Busch, of Philadelphia, is spending the week-ends at Atlantic City. His headquarters are the Traymore.

W. D. DOUGLASS, [illegible] of Rockaway Sound Island, has succeeded [illegible] with Eli Lilly & Co. as special representative calling on the Italian trade.

[illegible] W. CHAPMAN, [illegible] of Chapman & Rodgers, manufacturing perfumers, of Philadelphia, visited the trade in this city a few days ago.

DR. HARVEY W. WILEY was elected president of the American Therapeutic Society at its recent Washington convention.

—NORMAN MCCLOUD, traveling auditor for Parke, Davis & Co., [illegible] a month or more in this city engaged in business.

JOHN KRAMER, of Chalfont, Pa., has recently recovered from a severe attack of the mumps.

More College Commencements—Pioneer Graduates of New Montana Institution.

Reading from left to right: Edgar W. Allen, Charles P. Valentine, Nicholas W. Wilson, Miss Blanche Conard, James Drinville, Earl Young, Harvey Cox. These are members of the first graduating class of the Department of Pharmacy of the Montana State College of Agriculture, at Bozeman, and received their diplomas on June 8. All are natives of Montana and under the ruling of the Montana State Board of Pharmacy will receive their certificates as registered pharmacists without further examination. Prof. Charles E. Mollet, the dean, has received numerous congratulations.

CLASS OF 122 GRADUATES AT PHILADELPHIA C.P.

Governor Stuart Delivers Address, President French Presents Diplomas and Dean Remington the Prizes.

PHILADELPHIA, June 20.—Gov. Edwin S. Stuart, of Pennsylvania, made the address to the graduates at the 89th annual commencement of the Philadelphia College of Pharmacy held at the Academy of Music. The immense building was filled with the relatives and friends of the class, which numbered 122.

Following the formal presentation of the diplomas to the students as they were summoned to the stage by Howard B. French, president of the college, Joseph P. Remington, dean of the institution, presented the prizes, an occasion for more enthusiasm. The recipients of the most honors were Sister Bertha Mueller and Walter Ruch, of Woodbury, N. J. The former is a sister at the German Hospital in Philadelphia and for several years has been assigned to the prescription department of the institution. She was the winner of the Proctor prize for the highest general average of the class.

The exercises were the culmination of a week of events of interest to students and alumni. On Sunday the annual baccalaureate sermon was preached to the graduates by the Rev. David M. Steele, the class, with members of the faculty, marching to the Church of St. Luke and the Epiphany in a body. The Alumni Association elected these new officers:

President, Otto W. Osterlund; first vice-president, John W. Frey; second vice-president, Richard H. Lackey; recording secretary, Joseph W. England; corresponding secretary, W. A. Bright; treasurer, C. Carroll Meyer; new members of the board of directors, J. N. G. Long, F. M. Apple, R. W. Cuthbert and F. E. Morgan, Jr.

In the evening the annual reception by the association to the graduating class took place and the alumni prizes were awarded. On Tuesday evening the annual banquet of the Alumni Association was held at the Hotel Walton with 260 persons present. Dean Joseph P. Remington was toastmaster and among those who responded to toasts were Dr. William Jay Schieffelin, Dr. Henry Beates, Jr., Edward J. Cattell, Mayor John E. Reyburn and Edward P. Gibney.

On Wednesday the annual field day was observed at the athletic grounds. In the evening the members of the faculty acted as hosts at a banquet to the graduating class.

A picture of the graduating class appeared on page 605 of the ERA for June. The names are as follows:

Doctors of Pharmacy—Peter Amsterdam, Samuel Howard Bartholomew, William David Baun, Jay Dana Beck, Joseph Blumberg, Stephen Dwight Bolton, Warren Roland Bornemann, Charles Henry Bose, James Stanley Breen, Merle Stoles Bringman, Jay William Brooks, Luke Thomas Butt, George Fulmer Chapman, Lester Cleveland Connelly, Roy Deck, Henry Vernon DeHaven, Howard Burtis Dilatush, Walter Driver, William Stacey Durbin, Norman Elias Eberly, Maurice Herr Eby, John Matthias Emlet, Miss Anna Feinstein (P.C.), Edward Paul Gibney, James Jeffries Goodwin, Hyman Greenberg, William Robert Greene, Chloe Earl Greiner, Fred Griesemer, Roland Bismarck Grom, Norbert Harrison Grove, Harold Dickinson Guenther, William Clyde Harris, Alfred Martin Harting, Joseph Victor Henkel, Arthur Cecil Henrie, Edward Calvin Hickory, Charles Coy Honsaker, Charles Lewis Horn, George Bercaw Hulick, Ellsworth R. Jones, Erny Cornelius Kehr, Vastine Atkinson Kelster, William Wallace Keys, Eugene Walker Knilley, John Leedom Kooker, Edward Michael Korb, James Kramer, Sylvan Deering Lamb, Charles Nicholas Lang, William Jonas Laros, George B. Levan, Albert Edward Lounds, William Atkinson Lounsbury, Earl Martin Loveless, Harry Elmer McAninch, Raymond Welles McCarty, Thomas Edward McCutcheon, John Aloysius McGonigal, Donald Atlee McMillen, Maurice Louis Mallas, Thomas Carpenter Marshall, Elliott Harrison Metcalf, Robert Metzler, Emory Shinkle Mohn, Miss Lulu A. Morgan (P.C.), Earl Spencer Moser, Sister Bertha Mueller, Joseph Edwin Mutty, Miss Sarah L. Naly (Ph.G.), Evan Richard Owens, Harry Jackson Pettyjohn, Henry William Press, Edward William Raines, George Edgar Ritchey, Jacob C. Lehman Ritchey, Zebulon Harrison Rodes, William George Roof, Charles B. Rothenberger, Walter Edward Ruch, Percy Reginald Russell, William Scargle, Horace Martin Schabacker, Christopher Schuehle, Jr., William Harrison C. Shelly, Roscoe Solomon, Ernest Kenneth Stratton, Louis LeRoy Topper, Frank Albert Treichler, Walter William Turner, Lewis Viner, John Carroll Walton, Paul Carleton Hill Webb, Waller Nardin Webb, Karl Wetzler, Joseph Franklin Wiesner, Philip Shuster Willingmyre, John Herbert Wilson, Lewis Elmer Wilson, Robert James Wilson, Claude Senft Wolfe, Edward Benjamin Workman, David Solomon Zelmanoff, Frank Loomis Ziegler, John Edwin Ziegler.

Pharmaceutical Chemists—William Dale Bost, Wayne Cadwallader, William Ray Calvin, William Benjamin Cooper, Miss Mary O'Dea Costello, Miss Fanny Ferry, Lewis Fleisher, Carl Racine Henry, Wallace Ellwood Klopp, James Petri Lengel, Miss Mary G. Powell, Foster John Sankey, Miss Selma L. Schmidt, Lumir Severa, Philip Siegel.

Pure Food and Drug Course—Harmon M. Sechler, Ralph Thomas Ulrich (P.D.).

RECORD CLASS AT MEDICO-CHIRURGICAL C.P.

Pharmacy Department Makes Splendid Showing at 30th Commencement—Governor and Mayor Speakers.

PHILADELPHIA, June 20.—Fifty-four graduates in pharmacy and seventeen graduates in pharmaceutic chemistry on June 3, received the coveted sheepskin at the 30th annual commencement exercises of the Medico-Chirurgical College, held in the Academy of Music. The orator of the occasion was Congressman David J. Foster, of Vermont. This was one of the largest classes, in these respective departments, which was ever graduated from the institution. At the same time, the exercises of the departments of medicine and dentistry took place. Degrees were conferred by the president, Henry F. Walton and the prizes were awarded by the deans of the respective departments. On the preceding afternoon the annual meeting of the Alumni Association of all departments was held at the college club house and that evening, graduates from all over the United States assembled at the annual banquet at the Bellevue-Stratford Hotel. President H. F. Walton acted as toastmaster, and among the speakers were Governor Stuart, of Pennsylvania; Mayor Reyburn, of Philadelphia; the Rev. J. B. Egan, of Portage, Pa., and Dr. Ernest Laplace.

Pharmacy prizes were awarded by Dean I. V. Stanley Stanislaus as follows: Faculty gold medal for highest average in the senior class to Jay Africa Simpson, with honorable mention to Max Baum, William A. Bentz, Morris W. Brenner, Samuel J. Glick, Philip Hanopolsky, Elias Israelvitz, Charles R. Johnson, Lee A. Ruth, Carl Nicholas Schmitt, Jr., Daniel Stevens and Michael G. Waschke. The graduates are:

Pharmacy—Max Baum, William Albert Bentz, Joseph Henry Bickert, Edwin Brough Blair, William Borgos, Morris William Brenner, Bruno Bronislaw Drapiewski, Francis Erwin Eitnier, George W. Elder, Harry Farber, Louis Freedman, Samuel Harris Freedman, Howard Warren Gardner, Mathew Israel Ginsburg, Samuel Jonah Glick, Alexander Stuart Hall, Philip Hanopolsky, Max Moses Heller, Grover Cleveland Hendricks, Thomas Hoch, Elias Israelvitz, Charles Roy Johnson, Solomon Ignatius Jonkus, Abraham Philip Karsh, Herbert William Kintner, Stuart Lee Kleckner, Joseph Adams Leingang, Edward

James McCormick, Conrad Cornelius Mayer, John Miles, Lester Asher Morgan, Wilbur Lee Morgan, Justus Rentschler, O Peter Morris, Rudolph Carl Jos. Wallis, Lee Parker, John Jerome Quinn, Lee Newman, Leonard Lee Anthony Roth, Clayton Lewis Smeltzer, Carl Nelson Stevens, Jr., Elmer Dysart Seiss, Jr., Joseph Sinnott, Jr., Alfred Sussman, Adam Ignatius Smith, Paul Ray Smith, Alan Stallsmith, Sam Israel Stoller, A. Gomez Frederick, Augustus Stoll, Daniel Edward Sweeney, Joseph Alexander Stone, Benjamin Ray Shoemaker, Miguel George Wardlaw Arbert, Benjamin Wilson, Paul Lewis Stevens.

Pharmaceutical Chemists—Lemuel Spencer Calvin Miller, Howard Cromwell Bell, Howard Wilmer Goodhart, Charles Henry Kline, Jr., Ethel Frazier L. Holmes, Harry A. Moses, David Milton Comstock, Harold Clyde Porter, Paul Stewart Pettegrew, Paul Joseph Rupert, William Roy Stinger, Clarence A. Schaffer, Charles Paul Weidenhagen, Rudolph J. Williams, Joseph J. Murray, John Gerald Eby, Ph.G., Charles H. Kleberly, M.S., Ph.D.

THE REV. DR. HILLIS THE ORATOR AT TEMPLE.

University's Pharmacy Department Turns Out Largest Class—Vice-President Brown Confers Degrees.

PHILADELPHIA, June 20.—Temple University, at its annual commencement exercises on June 4, graduated 27 in the department of pharmacy. It was the largest class in the history of the department of Temple. The orator of the day was the Rev. Dr. Newell Dwight Hillis, his subject being "The New Demands Upon the Scholar in the Republic." Dr. Elmer E. Brown, vice-president, conferred the degrees in the absence of Dr. Russell H. Conwell, the president, who is abroad in search of health.

The prizes in the department were awarded as follows: Dean's gold medal to Rae V. Nicholas, with honorable mention to Amos S. Rutt and Augustus C. Herting. The H. Everett Kendig gold medal to Amos S. Rutt, with honorable mention to Rae V. Nicholas and Albert C. Leininger. The Henry Fisher prize to John Shober, with honorable mention to Rae V. Nicholas. Permanent Alumni membership to Rae V. Nicholas, with honorable mention to Amos S. Rutt. The members of the class and their degrees are as follows:

Doctor of Pharmacy—Nathaniel H. Anthony, John H. Rotwell, Daniel Cubleeroitti, Louis Kinkman, H. Everett Kendig, William V. R. Spencer Charles E. Wenger.

Graduates in Pharmacy—Louis Bell, Joseph L. Capozio, Claude W. Christenson, Joseph D. Donohue, Marie V. Gallagher, Meuer Goldberg, August C. Herting, Albert C. Leininger, Andrew F. Lippl, Joseph S. Lithgow, Mary E. Morgan, Rae V. Nicholas, Amos S. Rutt, John Shober, Otto Strock, Millard F. Troxell and Harris Woorman.

Pharmaceutical Chemists—Esther Breuner, Dora G. Lieberman and Israel H. Thompson.

Forty Seniors Receive Diplomas in Buffalo.

Department of Pharmacy of the University of Buffalo held its 25th commencement exercises at the Teck Theater. The degrees were conferred by Chancellor Charles P. Norton. The graduates in pharmacy were:

Guy W. Alberty, Thomas H. Anglim, Arthur H. Ayrault, Charles W. Balcerkiewicz, Max M. Barken, John F. Bass, William Baumbach, Francis F. Carroll, Matthew E. C. Chemnitz, Leslie D. Condle, Louis R. Connell, Marvin W. Cummings, Paul H. Drown, Darius Esboo, William W. Farnum, Elmer J. Freischling, Charles E. Fuller, Jr., Everett A. Fuller, Clair E. Hadsell, Florence E. Hamburg, Harold P. Hawks, Clayton S. Heinze, Anson F. Hendrickson, Harry W. Hubbard, Arvid W. Johnson, Charles R. Klingsbury, Bruno C. Leembuis, John N. Lockwood, William H. McDonald, Joseph W. McElroy, Chester McLaren, Frank B. Malecki, Hugh S. Mosher, Leslie H. Rice, Ivan H. Rider, Floyd C. Rounds, William P. Webster, Charles F. Weed, Burt M. White, Joseph J. Williams, Charles H. Bullock, Ph.D.

Post Graduate D.Pharm.—Charles W. Bullock.

Peabody prize of $50 for the member of the senior class maintaining the highest standing through the year was won by William W. Farnum. At the Alumni Association banquet L. Russell Blake was toastmaster. The honorary degree Ph. Jesse W. Farnum, Dean Charles C. Allen, Jesse D. Wells, Herbert P. Bissell, Rev. H. Lester Smith and Harry W. Hubbard. The election resulted: E. Bertram Blight, president; H. [illegible], J. P. Mendelsohn and Charles McLaren, vice-presidents; William F. Lasser, secretary; Charles H. Gauger, treasurer, and William C. Achilles, historian. The executive committee consists of Howard J. Morgan, E. D. Wesley and the secretary.

New York C.P. Seniors Receive University Degrees.

In addition to the usual diploma of graduation in pharmacy granted by the New York College of Pharmacy to graduates of the course, the degrees of pharmaceutical chemist and doctor of pharmacy were conferred on the graduates of the respective courses at the annual commencement of Columbia University.

The graduates were presented for their degrees by Dr. H. H. Rusby, dean of the college, and the degrees were conferred by President Nicholas Murray Butler. The following are the graduates:

Pharmaceutical Chemist—Szues Bela, Arthur E. Cole, Harry B. Hyman, [illegible], Walter Roosevelt, Louis Rossi, Morris Tirrell, Sonnenschein, Arthur A. Vois, St. Gottlieb.

Doctors of Pharmacy—Jose Janer, Charles A. McBride, John [illegible].

Dr. Ruddiman Heads Vanderbilt Alumni.

At the recent annual meeting of Vanderbilt Pharmaceutical Alumni Association, held at Nashville, the presidential address by M. E. Hutton was a masterly review of pharmacy for the past year. Reports of the A.Ph.A. meeting at Richmond and the Pharmacopœial Convention at Washington were made by Wm. R. White, who was the Vanderbilt delegate. S. C. Davis presented the report of the legislative committee. Papers were presented by Miss Daisy I. Nickel and E. F. Trolinger. The following officers were elected for the ensuing term of three years:

President, Dr. E. A. Ruddiman; first vice-president, S. C. Davis; second vice-president, Mose Cook; third vice-president, J. W. Coffey; secretary, William R. White; treasurer, Miss Daisy Nickel.

Cleveland College of Pharmacy Holds Commencement.

CLEVELAND, June 20.—At the recent 28th commencement exercises of Western Reserve University, of which the Cleveland School of Pharmacy is a part, the address was delivered by Dr. Andrew Sloan Draper, commissioner of education in New York State and former director of schools in this city. The graduates in pharmacy were presented by Prof. Henry V. Arny, dean of the school, to President Charles F. Thwing, who conferred degrees as follows:

Pharmaceutical chemist, Walter F. Braunlich, Blake E. Hartman, Edward M. Oxley.

Graduate in pharmacy, Harry M. Ackerman, Julius A. Gerlach, Aubrey Goldrick, William N. Nikolaus, William J. Polak, George E. Scanlon and Orric D. Triskn.

Twenty-eight in Louisville C.P. Graduating Class.

One young woman was among the recent graduates of the Louisville College of Pharmacy. Dean Curry presided at the exercises in Masonic Theater. The class was as follows:

W. L. Bader, Joseph B. Bennett, F. Bisig, John Demling, William Frederick, Karl H. Gohmann, Edward Harris, James P. Hefley, Henry C. Herp, Miss Clara C. Huiskamp, George Ph. Kilgus, Charles Joseph Kline, Fred B. Kluth, Luther O. Lee, Frank H. Mahaffey, Arthur P. Markendorf, William G. Murphy, W. O. Poole, Henry D. Richardson, Charles Athal Robertson, Elmer A. Sample, Peter B. Smith, August J. Spanyer, W. Oscar Votteler, Frederick Warns, Jr., Frank B. Willett, O. Maynard Woodburn and Herbert R. Woods.

Dr. Dillon at New Orleans C.P. Commencement.

Dr. D. Harvey Dillon, president of the Louisiana Health Board, was the orator at the recent commencement of the New Orleans College of Pharmacy, and Dean Asher delivered an address. Diplomas were given to the following:

F. Alvarez, J. B. Aucoin, L. L. Balfour, L. J. Bauman, B. S. Beall, Jr., T. A. Chisholm, T. J. Fatherce, J. S. Gary, A. T. Gonzales, J. Hecker, B. F. Huck, Jr., J. S. Keeney, Miss A. B. Kuhn, A. J. Laborde, W. McNeil, G. A. Murphy, H. C. Naylor, G. H. Sehwab, R. Broussard, T. A. Robertson, F. P. Therlot, J. S. Segura, F. M. Stumpf, E. A. Tomb, E. Valdez, L. Valdez, Miss M. L. Witherspoon and J. F. Willis.

Graduates of Kansas City College of Pharmacy.

Dr. L. Barnes, Alfred E. Becker, [illegible] D. Bityen, Frank R. [illegible], Henry F. Bergel, Elmer E. [illegible], Joseph H. Breedman, B. Morton Gray, W. Wallace Harrison, Benjamin F. Hoefle, Harley Kellstadt, Leo J. Levinson, James E. Lynn, Arthur C. McCrum, Russell R. Mellon, Raymond J. Miller, Earnest L. Radley, Walter D. Ratliff, George W. Robinson, Dick E. Rogers, Frank N. Stutz, Floyd R. States, Walter T. Walker, Leroy K. Wood, Frank B. Young.

Eleven Graduates at Barnes C.P.

Prof. H. W. Friedewald, the dean, presided at the recent commencement of Barnes College of Pharmacy, when diplomas were given to the following graduates:

Truman J. Trimble, Charles G. Watson, Leroy Lammers, H. D. Friedewald, Oscar F. Weschmeyer, L. H. Hayes, Otto W. Prepper, W. [illegible], H. H. Vogt, E. F. Maxwell and [illegible].

Two Graduates at College in Oregon.

Diplomas granted to graduates of the North Pacific College of Dentistry and Pharmacy at Portland, Ore., are as follows:

Vance Edmund McElwain, Stanley Stevenson.

Graduating Classes at Cincinnati C.P. and at Marquette Include Seven of Fair Sex.

Thirty-five young men and women were graduated from the Cincinnati College of Pharmacy on the evening of June 7 at the 35th annual graduation exercises of that institution at the Grand Hotel. In the class were four women, including the wife of a well known druggist. Degrees were conferred on the following:

Bachelor of Pharmacy—James Clark Allman, Corwin Frances Barkhurst, George C. Biegler, Herbert Crawford Brown, Harold C. Buchert, Laban Opley Carpenter, Roy Wilson Danbury, George Willie Fallie, George William Feck, John Habib Ganim, Harry W. Haverkamp, Mrs. Eleanora Huenefeld, Nathan Keller, William Clem Knapemeyer, Miss Agnes M. L. Koenig, Roy H. Meinhart, Wm. Phil Meissner, Jos. Rupert Miller, Mitchell Jos. Miller, Fred John Minstermann, Herman August Oelrich, Miss Florence Ross, Lennard Hartley Sears, Robt. Kirtley Stephenson, Carl Geo. Ungericht, Chas. J. Vortkamp, John Christian Weik, George Lewis Weissmann, August B. Westerhelwig, George L. White, Mrs. Ernestine Voss Wiebold, Oscar George Wieteki, Ernest William Wilfert, Robert Lee Wilson and Joseph Wittenberg.

Prizes were conferred on the following:

Materia medica, J. Rupert Miller; alumni, Lennard A. Sears; practical pharmacy, Mrs. William Wiebold; microscopy, George L. White; botany, Roy Meinhart; chemistry, Lee Wilson; college and bacteriology, C. F. Barkhurst.

At the banquet Prof. John Uri Lloyd responded to the toast "Pharmacy"; Dr. Louis Stricker to "Medicine"; Hon. Benton S. Oppenheimer, "Law"; Charles T. P. Fennel, "Our Girls in Pharmacy"; Corwin Francis Barkhurst, "Our Class." Dr. Julius H. Eichberg acted as toastmaster. A dinner was tendered the graduates and faculty after the graduation.

Southwestern Graduates Are Given Their Diplomas.

At Dallas the following five graduates in pharmacy at the Southwestern University Medical College recently received their diplomas:

John S. Wilhelm, Ferdinand P. Olson, E. Emmett Waters, Elbert E. Beall, Otto F. Weise.

Three Young Women in Marquette's Class.

Nineteen diplomas were awarded at the recent commencement exercises of the pharmacy department of Marquette University, Milwaukee, three of which were obtained by young women. The following named received the Ph.G. degree:

G. L. Boundey, Oconomowoc; Miss Mabel Clark, Wild Rose; Miss Pelagia Gruszynski, Thorpe; Sabus Hass, Richland Center; C. J. Jarvis Wautoma; F. F. Kane, Milwaukee; A. A. Krygier, Stevens Point; R. D. Mantz, Merrill; L. E. Martin, Lone Rock; C. J. Ouellette, Rubicon, Mich.; Joseph Polczynski, Milwaukee; J. C. Quixtner, Durand; Miss Lentena Reiser, Edgar; H. Roettgers, Milwaukee; Lin Suits, Medford; F. K. Schmidt, Boscobel; F. C. Vogt, Monroe; A. J. Wolfe, Sheboygan Falls.

Twenty-nine New Pharmacists in Newark.

At the recent commencement of the New Jersey College of Pharmacy in Newark diplomas were given to the following graduates:

Edward Bessman, F. A. Bien, Henry D. Block, Basil B. Bruno, J. J. Coffey, C. J. De Vries, F. F. Fiala, Edward Frothingham, S. Fruchtman, Emanual Gerber, Anna Goldberg, M. R. Gross, C. A. Henke, M. J. Hodes, M. Hoffman, O. A. Johnson, J. H. Kamerling, R. Killenberger, Isadore Levitt, Morris Plymack, Benjamin Seigle, Robert Seiler, W. S. Sigler, Samuel Singer, William Soliveau, William C. Staehle, Charles H. Stuhler, Charles Weiss, Herman Weissman.

Pharmacy Graduates of Fort Worth University.

At the commencement of Fort Worth University, May 13, at Byer's Opera House, the following class in pharmacy was graduated:

Edgar W. Brooks, Alfred M. Burns, Thomas A. Casey, James R. Cassell, Hugh N. Cheatham, Marshal R. Collins, Henry Harper, Wilford Harrison, Harry L. Locker, Gara L. Wren.

C.V.D.A. Elects Officers on Ebert Day.

The Chicago Veteran Druggists' Association on the recent Ebert Day, so-called because just five years previous to this annual meeting the members presented the association's historian at the time, Albert E. Ebert, with a loving cup, elected W. K. Forsyth, president, and Thomas N. Jamieson, vice-president. William Bodemann and John Blocki are the permanent secretaries. Prior to the election, Mr. Bodemann read his annual report, and President Grassly delivered his farewell address, making several recommendations which were referred to a special committee. Insignia in the form of a button has been ordered for each of the members.

MASSACHUSETTS DRUGGISTS HONOR VETERAN.

W. F. Sawyer, Long Secretary of State Board and for Thirty Years a College of Pharmacy Trustee.

BOSTON, June 20.—William F. Sawyer, for many years the secretary of the Massachusetts State Board of Registration in Pharmacy, and one of the oldest druggists in Roxbury, was tendered a complimentary dinner tonight at the Boston City Club, as a mark of esteem in consideration of completing 30 years as trustee of the Massachusetts College of Pharmacy, a position from which he retired at the annual meeting this month. Among those present were representatives of the college, the State Pharmaceutical Association, the Boston Druggists' Association, and the B.A.R.D.

President C. H. Packard, of the college, introduced John G. Godding as toastmaster. Addresses were made by Ernst O. Engstrom, president of the National Association of Boards of Pharmacy; Fred A. Hubbard, Dr. Julian W. Baird, W. W. Bartlet, Frank F. Ernst and John F. Finneran.

Mr. Sawyer was given a handsome coffee percolator as a testimonial from his druggist friends. The dinner was arranged by a committee comprising John G. Godding, Irving P. Gammon and Ernst O. Engstrom. Among others present were William C. Durkee, George A. Roskell, J. Arthur Bean, John A. Gilman, Linus D. Drury, Henry A. Estabrook, Alfred A. Burnham, Thomas Nichols, Charles E. Nixon, George A. Wolfe, William A. Flint, Frank Tucker, Paul C. Klein, W. H. Glover, L. H. Heinrich and George H. Dickson.

William F. Sawyer has been conspicuous in pharmacy in Massachusetts for many years. He was one of the earliest advocates of a college of pharmacy in this State and he was instrumental in securing the establishment of the present college. He has been in business in Roxbury since 1874. He was born in Charlestown, October 30, 1847, a lineal descendant of Pollard, the first private to fall in the battle of Bunker Hill on the provincial side. He entered Goddard's drug store in Charlestown at the age of 17, and after engagement in drug stores in Boston and Hudson, he opened a store of his own in Athol in 1870, which he conducted for four years, leaving there to open his present store in Roxbury at 1152 Tremont street. He has served as president of the College of Pharmacy.

WILLIAM F. SAWYER.
of Boston, Mass.

Employees Given a Day's Outing.

Following a custom inaugurated nearly a generation ago, Parke, Davis & Co., pharmaceutical manufacturers and one of Detroit's largest industrial institutions, gave their employees and families, more than 5000 persons, an excursion and picnic. Two commodious lake steamers were chartered for the day and the excursionists were taken to Tashmoo Park, a picturesque resort on Harsen Island, in the River St. Clair, about thirty miles above Detroit. In addition to the varied amusements and athletic events, such as ball games, races, dancing, etc., held at the grounds, the Twenty-sixth Infantry Military Band, from Fort Wayne, accompanied the party, giving in the afternoon a most delightful concert. The successful contestants in each of the various events were awarded prizes. The big establishment was closed during the entire day so that every one might attend.

Propaganda Work Pushed Successfully in Louisville.

LOUISVILLE, Ky., June 20.—The membership work of the Louisville R.D.A. is progressing in a manner calculated to [illegible] come off and their ranks are increasing daily. Practically all [illegible] of education, and has visited every physician in the city, leaving [illegible]

PRISON FOR DRUGGIST IN COCAINE CRUSADE.

Convicted Man Had Been Candidate for Appointment on Pennsylvania Pharmaceutical Examining Board.

PHILADELPHIA, June 20.—Emil Graff, proprietor of two drug stores in this city and for years actively identified with pharmaceutical organizations, was recently sentenced to serve one year in the county prison and pay a fine of $500 when he plead guilty to the charge of selling cocaine without requiring a physician's prescription. His term of imprisonment commenced at once.

This is the most important of many cases in which retail druggists and their clerks were arrested at the instance of the Pennsylvania Pharmaceutical Examining Board on the charge of selling cocaine and morphine illegally. The crusade was ably conducted by the vice-president of the board, Christopher Koch, of this city, and it is predicted will practically put a stop to the unlawful selling of these habit-forming drugs.

Mr. Graff was close to strong political interests and up to the last day there were many who thought that these friends would in some manner save him from going to prison. But such was not the case. A feature of Mr. Graff's case is that when Mr. Koch was appointed a member of the State board, his strongest opponent was the man who has just gone to prison for violation of the very law, which had he secured the desired appointment, he would have been pledged to enforce.

Several of the convicted druggists' clerks were also punished, one by imprisonment for four months and the others by fines and the payment of costs. Most of the morphine cases were disposed of in this way. Several other cases are pending, including that of B. P. Ashmead, the Government inspector of drugs at this port, who is accused of being identified with the illegal sale of cocaine. Other arrests are expected.

$500 Tax on Trading Stamps.

LOUISVILLE, Ky., June 18.—Local druggists who give trading stamps with cash purchases at their stores are considerably perturbed by a recent ordinance that has passed the lower board of the General Council, imposing a license of $500 on all trading stamp concerns. The original license was $300, but it was raised to $500, and this is considered by many to be exorbitant. However, the measure is yet to be decided upon by the upper board and its fate will probably be determined at the next meeting. T. P. Taylor & Co. give one trading stamp for every 10 cent value in cash purchases at their four stores. This trading stamp policy is considered very beneficial by the firm for three reasons. It promotes cash business to a great extent, for the stamps are given only with purchases of this kind. It gives the customer additional value for his purchase. He not only gets full value for the money he expends at T. P. Taylor & Co.'s but also receives a premium of considerable value from the trading stamp concern when he acquires a certain number of stamps and wishes to redeem them. The fact that green trading stamps are given with every cash purchase is always given a prominent place in the newspaper advertising done by T. P. Taylor & Co. in exploiting their "Saturday Specials" of soap, toilet articles, candy, etc.

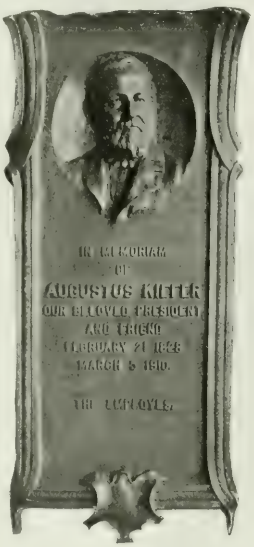
Brooklyn C.P. Presents C. O. Bigelow With Testimonial.

Clarence O. Bigelow, president of the Eastern Branch of the New York State Board of Pharmacy, expects to visit Europe this summer and has arranged to sail on the steamer [illegible] July 2. He will be accompanied by his wife and will spend a portion of his time in Scotland. In appreciation of the work that Mr. Bigelow has done toward the educational [illegible] of pharmacy, the trustees of the Brooklyn College of Pharmacy have presented him with an engrossed testimonial signed by Jacob H. Rehfuss, president; Andrew E. [illegible], secretary; Adrian Parnell, treasurer, and Dr. William Muir, chairman of supervision and examination.

MEMORIAL TO THE LATE AUGUSTUS KIEFER.

Impressive Scene at Unveiling of Bronze Tablet in Drug Establishment by Founder's Daughter.

INDIANAPOLIS, June 20.—A beautiful event, the first of the kind in Indiana, took place recently at the store of the A. Kiefer Drug Co., when a bronze tablet was unveiled to the memory of Augustus Kiefer, the beloved founder of the house. The upper part of the bronze tablet, which was presented by the employees of the house, some of whom were in Mr. Kiefer's service for more than 40 years, shows the bust of Mr. Kiefer, almost of life size, a striking likeness, the work of Rudolph Schwarz, who wrought out the figures that adorn the famous monument to Indiana's soldiers of the War of 1861-'65. Below this bas-relief figure is an inscription which can be read in the accompanying illustration.



The service was simple and impressive, the attendance being confined to the 90 employees of the house, to members of the family and a few old personal friends. Mr. Kiefer's only surviving daughter, Mrs. Charles Mayer, unveiled the tablet, which is placed on a massive column within the entrance of the establishment. G. Barret Moxley, now president of the company, acted as master of ceremonies. Joseph Shipp, a retired merchant and life-long friend of Mr. Kiefer, spoke briefly. J. Edward Stilz delivered an address and Dr. O. W. Sears, who has been the house chemist since 1866, read an appropriate poem.

Josiah Vaughan, Member N.W.D.A., Dead.

RICHMOND, June 20.—Josiah Vaughan, president of the Vaughan-Robertson Drug Co., died suddenly recently, aged 41. He had just returned from the West, where he spent several months in the hope of regaining his health, which was believed to have been but slightly impaired when he left Richmond.

Mr. Vaughan was a native of Keysville, Charlotte County, and when comparatively a boy came to Richmond and entered the employ of the drug firm of Purcell, Ladd & Co., in later years being admitted to the firm. Nine years ago Mr. Vaughan formed a partnership with C. B. Robertson for the conduct of a wholesale drug business, under the firm name of Vaughan & Robertson, which concern was later incorporated as the Vaughan-Robertson Drug Co. He was an active member of the N.W.D.A. and of the Travelers' Protective Association.

Druggist on Vacation is Burned to Death.

BOSTON, June 22.—Henry B. Barrett, proprietor of a drug store at Walnut and Central streets, Peabody, was burned to death yesterday in a camp in Beverly, where he, with four male friends, had gone for a vacation. Fire broke out in the camp shortly after midnight, and Barrett was suffocated before rescue was possible. One of the other four was also burned to death. Mr. Barrett was 28 and unmarried.

Overstudy Proves Fatal to a Woman Pharmacist.

PHILADELPHIA, May 20.—Miss Edith Goodman, for six years druggist at the Samaritan Hospital, and a daughter of Dr. Charlotte Elizabeth Goodman and the late Dr. Lewis S. Goodman, died recently from inflammation of the brain, due, it is believed, to too close application to the scientific studies she had been pursuing. She was a graduate of the Philadelphia C.P. and was deeply interested in all pharmaceutical matters. A year ago she began a scientific course at Temple College, and since then had done little else but devote herself to study and experiments. Her health became undermined, and she developed inflammation of the brain.

Obituary Notes.

—HENRY W. SCHEFFER, veteran pharmaceutical manufacturer, died, aged 75, in St. Louis recently. For 40 years he was a partner in the Larkin & Scheffer Chemical Co. He was born in Germany and came to America when 24. He worked in the United States Laboratory at Philadelphia. He went West after the war and once worked for Enno Sander.

—AL INGELHART, for many years engaged in the drug business at Pardeeville, Wis., died recently following a sudden stroke of paralysis. He is survived by his wife and son.

—NEWELL PAINE, 67, who had been in the drug business in Roxbury at 1181 Tremont street, died June 10 at his home in Cambridge. He was unmarried.

—EDWARD L. HAHN, 26, recently deceased at Raton, N. M., was a Kansas City C.P. prize winning graduate and popular. A widow and infant son survive.

—A. D. MCDONALD, drug clerk, 44, died recently at the City Hospital, St. Louis, of morphine poisoning. His former home was in Washington, D. C.

—E. JOHN BEGGS, 61, retired, is dead in Brooklyn; he was founder and for 35 years president of E. J. Beggs & Co.; a widow and six children survive.

—DR. EDWARD JOHNSON, 88, pioneer druggist of Watertown, Wis., is dead. He had served in numerous public offices.

—M. S. HAMMER, old time California pharmacist, in business 40 years in Sacramento, died recently in San Francisco.

—THOS. BARROWMAN, pioneer pharmacist, Civil War veteran, Mason, etc., is dead in Scranton, aged 70 years.

—ERWIN J. KELLOGG, 65, Cleveland; widow and two daughters; interment was at his former home in Painesville.

—CHAS. E. SCHULTZ, 73, veteran of Civil War, died recently at Green Bay, Wis. He came from Germany when 14.

—RICHARD J. ROGERS, 81, Attica, N. Y., paralysis; had been in business 40 years; wife and daughter survive.

—ALBERT F. LICHTENWALNER, 56, engaged in the drug business at Monroe, Wis., for 35 years, is dead.

—JAMES A. MCWILLIAMS, 30, burgess of North Braddock, Pa., died recently; he is survived by his parents.

—DAVID L. HAWKINS, 50, formerly of Noblesville, Ind., but later of Anderson, Ind., is dead of apoplexy.

—N. W. EDWARDS, 63, pioneer of Fairmount, Ind., is dead; his son succeeds him; a widow also survives.

—OSCAR NEIDHAUS, 56, 136 Utica avenue, Brooklyn, N. Y., is dead, leaving a widow and three children.

—JOHN K. MCMILLAN, 68, Washington, Pa.; prominent Mason; leaves a widow and three children.

—EDWARD F. COVILLE, 73, in business in Cicero, N. Y., for 31 years; paralysis; is survived by widow.

—DR. J. F. DAVIS, 81, Portsmouth, Ohio, died recently at Athens, Ga.; had a long and useful career.

—CHARLES W. BEHREND, 38, Appleton, Wis., died suddenly of heart disease on the Lawrence campus.

—JOS. E. CARMODY, 43, of Carmody Bros., Watervliet, Mich., died recently of Bright's disease.

—WM. A. TAYLOR, Golden, Colo., formerly of Detroit, took carbolic acid; a widow survives him.

—WINFIELD SCOTT, formerly of Salt Lake, died recently in Oakland, Cal., aged 64 years.

—CRAIG MOFFETT, 60, retired, Mount Holly, N. J., is dead.

—J. A. BRISBANE, 52, well-known Oregon druggist, is dead.

—RUFUS W. EASTON, Kansas City; leaves widow and son.

—E. A. POTEET, Somerville, Ala.; wife and three children.

—WM. C. TUCKER, 72, Baltimore; two daughters survive.

—DUDLEY H. TURNER, 63, Towanda, Pa.; three children.

—DR. J. R. GARDINER, 62, Wichita, Kan., recently died.

—GEO. VAN WERDEN, pioneer of Wichita, Kan., is dead.

—KENNEDY F. LANGE, dead in Pittsburg, was aged 65.

—J. H. EIDE, Roland, Iowa, is dead after brief illness.

—SAMUEL W. ROBERTS, Paris, Tenn., is dead, aged 40.

—WM. WENDEL, dead at Murfreesboro, Tenn., was 66.

—CHAS. GRATIOT, Platteville, Wis., dead; appendicitis.

—CLARENCE M. PORTER, 53, Holyoke, died recently.

—DAVID W. ROSS, Philadelphia, 58; was a bachelor.

—CHAS. ABEL, 60, Pittsburg pioneer, died recently.

—ALLEN G. GRIGGS, of Ottawa, Ill., is dead.

NOTE—A, advanced; D, declined; C, corrected; N, new.

See page 744 and following pages for Prices Current.

NEW YORK, June 25.—Fairly seasonable conditions prevail along the general line of drugs and chemicals, the movement into consuming channels being only moderate and chiefly in accordance with actual current requirements. The market, while fairly steady, has a comparatively quiet appearance and fluctuations in prices for the month have been limited to a few articles. Opium, though slightly lower, remains in [illegible] began to arrive, senega is easier and spikenard higher. Angostura and [illegible] quotations for birch and sassafras are somewhat lower.

OPIUM.—The [illegible] quotations being slightly lower than those given in our last report, viz., $6.00@$6.30 per pound for natural, $7.15@$7.25 for granulated and $7.15@$7.25 for U.S.P. powdered. The [illegible] to May 28 [illegible] date (present year) have reached 1953 cases, the number on [illegible] in the opium district has been unsettled and there has been some damage to the crop by hail and rain storms in the lowlands. All experts concede, however, that the outlook for the output of new crop remains favorable.

[illegible] prices since our last report. Cable advices received on June 15 [illegible] 74,100 [illegible] 7850 barrels [illegible]

June 1 to a jobbing house in this city, states that the fishing in Finmarken during the previous week was much hindered by stormy weather. Oil is in good demand, however, but owing to the leanness of the livers and the high prices paid during the season, the oil costs the manufacturers nearly as much as it can now sell for, and, as a consequence, holders are very firm in their prices. In this market the quotations of last month still obtain.

QUININE—Continues to move only in a routine jobbing way with a consequent quiet and uninteresting market, but the undertone is fairly steady and manufacturers continue to quote on the old basis of 14c. in 100-ounce cans. At the Amsterdam auctions on the 10th instant 1400 kilos of quinine sulphate were sold at 10.35 florins per kilo against 10.42 florins at the previous sale.

CUBEB BERRIES—Are again higher owing to extreme scarcity and jobbers' quotations show a further advance for desirable parcels of ordinary and up to 58@63c. per pound for sifted and stemless. Powdered are 5c. per pound higher.

ASAFETIDA—Continues firm under steadily diminishing supplies and the ruling quotation for desirable parcels is $1.20@$1.30 per pound for good, fair, and powdered is held at $1.50@$1.60 per pound. The market is practically bare of tears.

BUCHU LEAVES—Short variety continues firm and jobbers are quoting 95c.@$1.00 per pound. Advices received on the 15th instant were to the effect that recent rumors that considerable quantities are held back in primary markets appear to be unfounded, and according to reliable estimates stocks at the Cape amount to about 70 to 80 bales. In Hamburg 87c. per pound is quoted and the indications are that values will advance and that much higher prices must rule before the next crop is gathered.

BALSAM PERU—Has again advanced in price. Stocks are light both here and in primary markets, and with the short supply steadily diminishing holders are firmer in their views and quotations for true have been advanced to $2.15@$2.25 per pound.

PRICKLY ASH BERRIES—The market is very much unsettled and quotations are more or less nominal, owing to offers of new crop from primary shipping points at comparatively reasonable prices. Jobbers today are quoting $1.00@$1.10 per pound.

BISMUTH SALTS—Owing to an advance in the cost of metallic bismuth, manufacturers of the various preparations have also advanced prices and the new schedule is on the basis of $1.95@$2.05 per pound for subnitrate, $2.50@$2.60 for subcarbonate and $2.00@$2.10 for subgallate.

PAREIRA BRAVA ROOT—Is firmer and higher with quotations at 45@50c. per pound. The demand for this alterative and diuretic has lately considerably improved.

BROMIDES—Are higher, manufacturers having advanced prices 2c. per pound on potassium and sodium and 4c. on ammonium as follows: Potassium, 27@32c.; sodium, 30@35c.; ammonium, 38@42c.

BALSAM OF FIR—Canada is somewhat easier as a result of competition and quotations have been reduced to $4.65 a barrel and $4.75 in cans. For small quantities 75@85c. per pound is asked.

OIL OF ROSE GERANIUM—Turkish is firmer with quotations advanced to $3.50@$3.60 per pound.

OIL PEPPERMINT—Is easier with revised quotations showing reduced prices. Reports from Michigan and Indiana indicate that while about 1000 acres of new mint in excess of last year's settings were planted, a great many acres of the old mint have been ploughed under and the total acreage of 1910 in Michigan and Indiana shows a decrease of 173 acres. At the same time the indications are that the production of oil will be in excess of 1909.

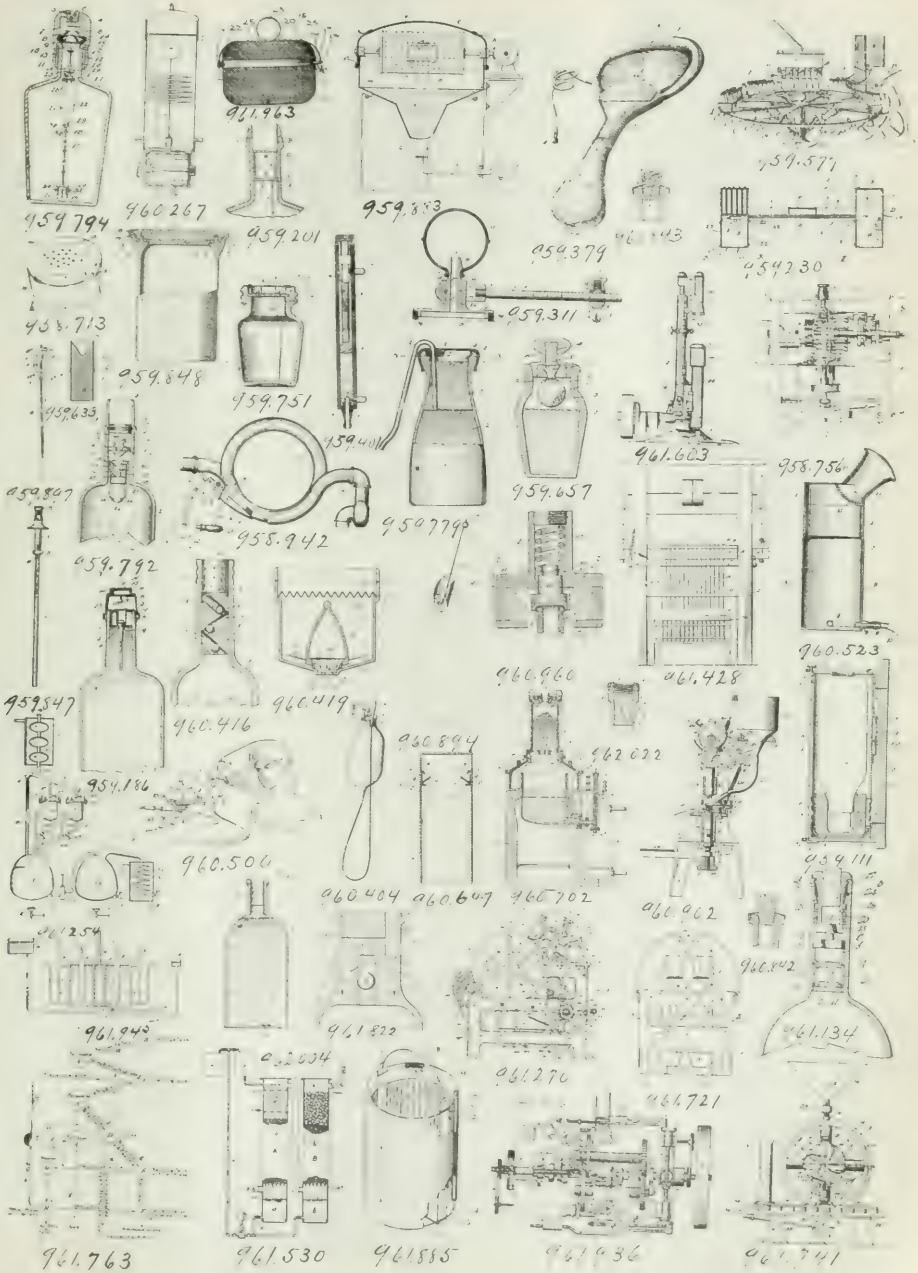
CHAMOMILE FLOWERS—Now [illegible] attention and fairly liberal sales are reported. Jobbers are quoting 32@36c. for usual druggists' quantities.

OIL CUBEBS—Owing to the continued advance in the price of the berries the oil has advanced proportionately and is now quoted at $4.45@$4.60.

HAARLEM OIL—Is offered more freely, with more lots released and prices consequently are easier. It is now quoted at $[illegible] per gross.

PEREIRA BRAVA, ANGOSTURA—Owing to steadily diminishing [illegible] quotations have been materially advanced. Holders of the [illegible] stock have marked up prices to $2.00@$2.75 per pound and offer only sparingly.

PATENTS, TRADE MARKS, ETC.—(See Next Page)



PATENTS.

Granted May 24, 1910.

[illegible]

959,530—Geo. E. Stevens, Lynn, Mass., assignor to General Electric [illegible]

Granted May 31, 1910.

[illegible]

959,751—Sylvanus H. Kollogg, Los Angeles. Poison-bottle.

959,779—Arthur C. Mills, Toledo, assignor to E. G. Lawrence.

959,792—L. M. Packard, Brockton, Mass. Non-refillable bottle.

959,794—A. W. Partrick, Yonkers. Non-refillable bottle.

959,847—Thomas A. DeVilbiss, Toledo, assignor to DeVilbiss Mfg. Co. Dispenser.

959,848—Geo. W. Dungan, Strasburg, Pa. Jar-closure.

959,883—Hermann Resch, Lorrach, Germany, assignor to Hermann Resch, Jr., and Carl Rudolph Otto Gutsch. Apparatus for chemical cleaning.

[illegible]

Granted June 7, 1910.

959,267—Hans Brunner, Spokane, Wash. Filter.

[illegible]

959,404—N. L. Rigby, Los Angeles, assignor to Alice Slaughter. Support for nozzles of fountain-syringes.

[illegible]

959,500—Cora A. Butler, Chicago. Burner and support for vaporizers.

959,523—Henri Edde, Paris, France. Inhaler.

959,671—Martin Mugdan and Willy Herrmann, Nuremberg, Germany, assignors to Consortium fur Elektrochemische Industrie, Gesellschaft mit beschrankter Haftung, Nuremberg, Germany, a corporation of Germany. [illegible]

959,702—Otto Proeless, Kansas City, Mo., and Walter S. Hall, Argentine, Kan. Apparatus for concentrating sulphuric acid.

959,842 and 959,843—William Butler Degan, New York. Sanitary [illegible]

[illegible]

959,914—Arthur Helnemann, London, Eng. Pills for the treatment of [illegible]

959,918—Chas. A. Hervey, Lansing, Mich. Bottle and attachment [illegible]

959,927—Henry Howard, Boston. Method of making formic acid.

[illegible] Taliaferro, Baltimore. Bottle-capping head.

Granted June 14, 1910.

[illegible]

961,254—R. N. Perlee, Long Island City. Rosin-purifying apparatus.

[illegible] Elberfeld, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld. Reduction products of commercial nitrobenzaldehyde.

[illegible]

[illegible] Fitting [illegible] bottle.

961,530—Wm. O. Quayle, Wilmington, Del., assignor to Midland Chemical Co., Midland, Mich. Making sulphur chloride.

[illegible]

[illegible] H. Goodman and Wm. H. Niemeyer, Baltimore, assignors to H. F. Griffith, Phila. Machine for sealing bottles.

[illegible]

[illegible] of formaldehyde.

961,741—Robt. J. Workman, San Francisco, assignor of one-third to Noah W. Workman. Measuring and filling machine.

Granted June 21, 1910.

961,760—Louis Destree, Haren, Belgium. Process of making alkali thiosulphates.

961,765—Frederic J. Falding, New York, assignor of one-half to William R. Cathcart, Maywood, N. J. Process of purifying gas and recovering ammonia, etc., therefrom.

961,764—F. J. Falding, assignor of one-half to W. R. Cathcart. Process of utilizing by-product metallic salts and ammoniacal liquor.

961,822—W. M. Way, Denver. Non-refillable bottle.

961,840—John G. Burgess, San Diego, Cal. Vegetable hair-tonic.

961,885—Henry R. Myers, New York. Container for bottles or receptacles.

961,915—August Vagt, Mulheim-on-the-Rhine, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld. Reduction products of commercial nitrobenzaldehyde.

961,936—Arthur Colton and Burton W. Scott, Detroit, assignors to Arthur Colton Co. Machine for making capsules.

961,945—Robert H. F. Finlay, Belfast, Ireland. Method of manufacture of bicarbonate of soda.

961,963—Raymond E. Hughes, Holbrook, Ontario, Canada, assignor of one-third to Charles H. Harrison. Percolator.

[illegible]

962,022—J. V. Griffin, Toungoo, Burma, India. Bottle-seal.

962,103—Bruno Richard Seifert and Hermann Hahle, Radebeul, near Dresden, Germany, assignors to Chemische Fabrik von Heyden, Aktiengesellschaft. Process of making pure ortho- and para-guaiacol sulphonic salts.

962,396—Robert T. Taylor, Gastonville, Pa., assignor of one-half to Joe Niklis. Bottle-closure and seal.

We Spend Thousands of Dollars

TO INCREASE YOUR SALES OF

DIAMOND DYES

Our advertising campaign this year includes every woman's publication of any prominence in the country.

In these magazines we use valuable space full of good selling arguments and beautiful pictures in colors.

We do this to bring you more customers for Diamond Dyes.

Our appeal is first to a woman's pride, then to her economy. We show her how she and the children can be well dressed on very little money.

What woman can resist buying Diamond Dyes—when we tell her of their many uses *and that each one saves her money?*

Women in your locality see these advertisements and naturally come to you for Diamond Dyes.

So in order to co-operate with us in supplying this demand you should keep a complete assortment of colors on hand.

Now if you are alive to the importance of this great national advertising you will appreciate what we are doing and take advantage of it.

If you don't already carry Diamond Dyes now is the time to put in a supply.

DIAMOND DYES

as you know, are the "Standard of the World" and will back up any claim we make. You are perfectly safe in recommending them and your customers are safe in using them.

Just one thing more. When a lady asks for Diamond Dyes you might offer her

A FEW VALUABLE HINTS

First tell her you have Diamond Dyes for wool and Diamond Dyes for cotton. That no dye in the world works successfully with all kinds of materials.

Explain that wool, silk, alpaca and camel's hair are animal fibres that take up the dye very slowly, so it is necessary for her to use Diamond Dyes for wool.

And that cotton, linen and mixed goods are vegetable fibres that absorb the dyes quickly, so it is necessary for her to use Diamond Dyes for cotton.

Therefore, if she gets the right dye for the material, there is absolutely no chance of failure.

The Diamond Dye direction book will furnish every detail of information and the Diamond Dye Annual will give her the latest styles and many testimonials of the success of others.

There are many convincing arguments in favor of home dyeing and we are presenting them to the women of the country in a clear and forcible manner.

WELLS & RICHARDSON CO.

BURLINGTON, VERMONT

VOTING TO FILL VACANCY ON U.S.P. COMMITTEE

Nine Nominees Submitted to the Members From Which to Make Selection—Summer Headquarters

PHILADELPHIA, June 29.—Nine names have been received as nominees for the office on the Revision Committee of the United States Pharmacopœia made vacant by the resignation of Prof. Lyman F. Kebler, of Madison, Wis., and representatives are now voting for three out of these nominees to the remaining 49 members of the committee to be voted on. The one receiving the greatest number of votes will be declared elected.

The Revision Committee has opened headquarters for the summer at the cottage of the chairman, Joseph P. Remington, at Longport, N. J., where until fall all mail will be received and the preliminary work of starting the ninth revision will be commenced. The summer home of Charles H. LaWall, secretary of the committee, is but a few blocks from Dr. Remington's home and both of these officials will, after July 1, spend the greater portion of their time there.

Solicitor Should be Arrested for False Pretenses.

Smith, Kline & French Co., Philadelphia, warns the public against a certain party who is soliciting subscriptions for an advertisement as its agent and has obtained money on this account. The company announces that no person is authorized to ask for payments to himself for advertisements in the company's behalf and if any party makes request for such payments, he should be arrested for attempting to obtain money under false pretenses.

Paris Perfumers Establish New York Branch.

Roger & Gallet, the well known perfumers of Paris, announce that on July 1 they will open at 25 and 27 West 32d street, New York, a selling branch for the United States and Canada which will be under the management of Charles C. Sargent to whom all communications should be addressed. Roger & Gallet extend a cordial invitation to the trade to inspect their new quarters.

ERA PRICE LIST—1910 EDITION.

We are now working on the 1910 edition of the ERA PRICE LIST, and request our subscribers to notify us of any Additions to this list which they may desire to have made, as well as any items they may have noticed that require correction.

The ERA PRICE LIST is the only one of these general drug lists that gives the Names and Addresses of the Manufacturers of proprietary goods—an original and copyrighted feature. This puts the ERA List in a class by itself, a fact that is appreciated by all careful drug buyers.

Manufacturers of proprietary goods who want to make it convenient for the buyers to consult their price lists and terms, should have their lists printed in PART 4 of the ERA PRICE LIST.

The ERA PRICE LIST is in constant use by all of the best buyers in the drug trade. Practically all of the wholesale druggists order several copies for their buyers, bill clerks and stock clerks. Full descriptive circular on application.

D. O. HAYNES & CO., Publishers,
82 Fulton Street, NEW YORK.

Re Price Protection on SANATOGEN

We wish to reiterate with all emphasis that as the sole licensees of the United States Patent under which Sanatogen is manufactured and sold, we are invested by law with the privilege to insist that retailers strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating this condition renders himself liable to injunction and damages.

Contrary to the usage of the drug trade, this is no mere "gag" or "bluff" to the detriment of fact. We do not wish to embarrass anyone, but merely to give proper notice that we mean to enforce our rights whenever necessary.

This means *true protection*, the kind of protection that gives everybody a square deal and puts the small druggist on an even level with the biggest "chain" organization or department store.

These prices hold for all druggists and jobbers at $0.81⅔ and $2.43 to retail at $1, $1.90 and $3.60 per package.

Write to us [illegible] display matter.

"ALLIGATOR PETE" AT HOME IN NEW YORK.

Reptilian Emblem of Diastase Club Finds Dr. Alper's Display Window as Congenial as Florida.

In the heart of New York City, looking in the sun which filters through a drug store display window, or lying in the shade of a fantastic petrified tree of coral, the passing crowd from a huge tank of pure salt water is "Alligator Pete," transported from his calm and peaceful native Florida to the home of Manhattan. As his name denotes, "Pete" is an alligator. He is possibly nine inches long. He is the emblem of a mighty order, to which all others are subsidiary, so says his owner, Dr. Wm. C. Alpers, of 495 Columbus avenue.

At the recent meeting of the Diastase Club, during the A.Ph.A. convention at Richmond, Va., it was proposed by Ernest Berger that the club have an official emblem. The [illegible] suggested, and as the "complaint" came from Florida, they adopted as their emblem the alligator and laughingly informed Mr. Berger that he should supply the tokens of membership. That the Tampa pharmacist was more than willing to oblige was shown by the receipt by each of the members of a real, live, little *Alligator Mississippiensis*.

"Pete" is the second "gator" Dr. Alpers has received. Pete's predecessor didn't take to the New York atmosphere and perished. Pete's health is good. He dines on flies and minnows. The former he engulfs with one snap of his muscular jaws. To catch the latter he merely lies submerged in a miniature lake over which plays the "Fountain of Youth," so Dr. Alpers explained. "Pete" indolently opens his mouth and his piscatorial prey swims right in. One click of his sharp teeth and all is over with Mr. Fish.

Dr. Alpers made the miniature fountain and lake himself. He has surrounded them with ferns, pebbles and sand, "Pete's" corner of the window having quite a tropical appearance. The illusion is jarred, however, when "Pete" goes on an occasional hunger strike and [illegible] water bottles and cans of talcum powder.

Era Key to the U. S. P.

NEW EDITION—JANUARY, 1910

With Latest Changes in U.S.P. to Date

Every druggist and physician should have a copy of this valuable little book in his vest pocket.

It contains a complete list of the drugs and preparations of the Pharmacopoeia and gives the official titles, common names and synonyms of the drugs, chemicals and preparations, their strength and doses in Apothecaries weights and measures with equivalents in Metric Terms.

As a companion to the U.S. Pharmacopoeia the Era Key gives to the physician and pharmacist an epitome of the contents of the official guide, in convenient shape for every day use and quick reference and in a form that will assist them as prescribers and dispensers.

DECISIONS ADVERSE TO THE GOVERNMENT.

Drug Law Does Not Apply to Goods Shipped by Manufacturer Between Premises, Rules Court.

WASHINGTON, June 20.—The Department of Agriculture has issued notices of judgments 257 to 355, inclusive, rendered by the courts in cases prosecuted by the United States attorneys involving violations of the Food and Drugs Act, most of them relating to misbranding or adulteration.

A libel proceeding, by which it was sought to confiscate 65 casks of liquid extract called "Danderine" brought against the Knowlton Danderine Co., Wheeling, W. Va., it being charged that the product was misbranded in not having a statement on the casks as to quantity or proportion of alcohol present, was decided against the government in the lower courts. The "Danderine" was shipped in bulk by Parke, Davis & Co., Detroit, Mich., to the Knowlton Danderine Co.'s premises in Wheeling, where it was bottled, the bottles being properly labeled. The notice says that decisions of any but the highest court, when adverse to the government, shall not be considered as final until acquiescence shall have been published. This probably means that the government is considering the matter of appealing to the United States Supreme Court.

Dellemand & Co., Chicago, shipped "Essence of Wintergreen," which on analysis was found to contain one-half the requisite amount of wintergreen, to be artificially colored and [illegible] Fined $10.

E. H. Ryno, Wayland, Mich., was fined $100 for shipping "Remedy for Hay Fever and Catarrh of the Nose, Prescribed by E. H. Ryno, Hay Fever Laboratory," which analyzed 99.95 per cent cocaine hydrochloride, this amount not being signified on label.

Make-Man Tablet Co., Chicago, shipped "Make-Man Tablets," misbranded because label bore false, misleading and deceptive statements. Fined $10 for each of two offenses.

Provident Chemical Co., St. Louis, shipped 100 barrels of a product labeled "300 lbs. C.A.P.," so-called calcium acid phosphate, but which consisted of approximately 50 per cent cornstarch. This compound when first manufactured was known as and sold as "Cream Acid Phosphate" and name had been later condensed to the use of the arbitrary letters "C.A.P.," which were adopted as a trade mark. Goods were released to claimant. The case may be appealed.

Murray & Nickell Manufacturing Co., Chicago, shipped "Powdered Colocynth," that did not conform to the U.S.P. standard and misbranded. Fined $10 in each case.

A fine of $25 was imposed on J. L. Lombardo, Buffalo, who shipped "La Tosca Hair Tonic," which was misbranded in that it contained 98.5 per cent methyl alcohol, quantity or proportion not stated on label.

Three different lots of whisky, decreed condemned and forfeited, were released upon bond that product would not be sold contrary to law. They follow: H. A. Thierman & Co., Louisville, Ky., 5 barrels of "Prairie Flower Whisky," falsely represented to be straight whisky; Hannis Distilling Co., Philadelphia, 20 barrels and 2 half-barrels labeled "Superior Monongahela Whisky," "Elkmont Whisky," "Angus Whisky" and "Artemus Whisky," which were misbranded, and Charles H. Ross & Co., Baltimore, 5 barrels wrongly labeled "Old Cabinet Whisky." In each case the product was not a straight whisky but a rectified article combined with grain distillate.

Angelo Grasso, [illegible] Lorenzo Grasso, shipped food product labeled "Prodotti Di Olii, OLIO SOPRAFFINO, La Favorita Braud," misbranded in that words and picture of branches of olive tree indicated product was olive oil, whereas it was most part cottonseed oil. Fined $50. Lange Brothers, New York, were fined $50 on a similar charge, label reading "Prodotti Italiani Olio di Oliva Sopraffino F. Ferrucci Lucca Toscana, Italy," and product containing cottonseed oil.

Two alleged headache cures were adjudged misbranded. The Kohler Manufacturing Co., Baltimore, shipped "Dr. Kohler's Antidote" and "Kohler's Antidote cures headache." These and other statements were proved false. Defendant fined $25. Harry C. Kinne, doing business as Kinne Medicine Co., Hudson, Mich., shipped "Kinne's Sure Headache Cure for Sick, Periodical and Nervous Headaches." Label stated that no morphine or cocaine was present but that preparation "contained a small quantity of acetanilide, two grains to the dose." Same contained three grains acetanilide to dose and statements made as to properties were false. Fine of $10 imposed.

Because it contained 4.8 per cent of mineral oil, did not state its own standard of strength, quality, or purity on the label and was labeled "Strictly Pure Turpentine," a consignment of drug product shipped by the Frank Tea & Spice Co., Cincinnati, was adjudged misbranded and adulterated. Fined $10.

Ranney Drug Co., New York, shipped "Extract of Witch Hazel or Hamamelis." Misbranded in that quantity or proportion of alcohol was not given and properties were falsely claimed. Fined $10.

Victor E. Shields and William H. Shields, trading as the Gin-Seng-Gin Co., Cincinnati, were fined $25 for misbranding "Gin-Seng-Gin Compound. With Phosphate. The Gin with a push! Etc." Misbranded in that words "Gin-Seng-Gin" indicated that product was a compound of gin and Gin Seng, also that amount of phosphate present was infinitesimal and does not justify use of words "With Phosphate." Further misbranded that devices resembling Chinese characters were used on label which led to belief that product was of Chinese origin. Fine of $25 imposed.

Charles C. Reakirt, of the Reakirt Drug Co., Cincinnati, shipped "Laudanum—Poison!—Caution." Same misbranded in that it contained 42.9 per cent of alcohol by volume and 1.2195 grams of morphia per 100 cubic centimeters, corresponding to 46.4 grains of opium, assaying 12 per cent of the fluidounce, and that label failed to bear a statement of the quantity or proportion of alcohol, morphine and opium contained therein. Fined $10.

Frederick Stearns & Co., Detroit, shipped "Nyal's Compound Extract of Damiana," etc. Adjudged misbranded in that there was not enough damiana present to justify use of name "Extract of Damiana," and because label falsely stated: "Useful as an aphrodisiac and for the restoration of virility in debility of the reproductive organs of both sexes." Cocaine was present, of which quantity or proportion was not given. Fined $5.

Formulas.

Just 1311 formulas are given in the new edition of the Dispenser Soda Water Guide. Every fountain operator needs it.

Jewel Sanitary Straw Dispenser

PRICES
No. 1 - $1 50

The TURN-A-MINIT AGITATOR

is one of the greatest labor savers ever offered to the drug trade

—for compounding formulas, prescriptions and emulsions.

It is the most sanitary, most simple and hardy article of this sort that has ever been devised.

Every part of the contents is in constant agitation at the same rate of speed.

It is all in the rib inside of the jar and the patent porcelain dasher.

The rib acts as a breaker, throwing the mass backward and upward, causing a perfect mixture of every particle.

With the TURN-A-MINIT AGITATOR, perfect and lasting emulsification is possible in but a fraction of the time it now takes you.

Unequalled at the soda fountain for numerous purposes.

QUART SIZE (complete) - - $2.50
GALLON SIZE (porcelain jar instead of glass) - - 9.00

Order at once or send for descriptive circular

The Turn-A-Minit Churn Company
2802 Metropolitan Tower, NEW YORK

NEW PLANT IN BOSTON WHICH IS BEING BUILT FOR THE LIQUID CARBONIC CO., OF CHICAGO.

In the accompanying illustration is shown the new plant which has been built in Boston for the use of the Liquid Carbonic Co. and which is now practically completed. It is in many ways a model and in every case embodies the latest and highest type of engineering and building construction of the present day. The main building is 135 x 260 feet, constructed of concrete, steel and brick, three stories in height with a high basement, making it a four-story building. The basement is largely devoted to marble work, and in it is installed a modern marble working plant. The gas factory shown in the rear has a capacity of 40,000 pounds of CO_2 a day, making it one of the largest carbonic acid gas plants in the world. Every detail has been worked out with the one object of supplying to the New England trade an ample quantity of the purest gas with a promptness that will be appreciated by the trade.

A complete stock of soda fountains will be carried, and in addition the equipment will permit the manufacture of fountains on very short notice, so that any type or style of fountain can be furnished from Boston, with the same promptness, as from the plant in Chicago.

New England territory was formerly handled from the New York branch, but the growth of business in the East has been such that the utmost capacity of both New York and Boston plants will be necessary to take care of the company's Eastern business. A. H. Blankenhorn, salesman for nine years in the Chicago branch, has been promoted to the managership of the new Boston plant. He is a man of wide experience, ripe judgment and long business training.

Indispensable to all druggists is THE ERA Price List.

Dr. Murphy Heads A.M.A.—Dr. Simmons Stays.

ST. LOUIS, June 20.—The insurgents were defeated at the recent annual election of officers of the American Medical Association. Dr. John B. Murphy, of Chicago, was elected president and Dr. George H. Simmons was again elected secretary by a unanimous vote despite his previous declination. Dr. Murphy is a celebrated specialist on appendicitis. He is also the inventor of the Murphy abdominal button, which has been a great help to modern surgery. The officers elected were:

Dr. E. E. Montgomery, Philadelphia, first vice-president; Dr. R. C. Caffey, Portland, Ore., second vice-president; Dr. W. D. Moore, St. Louis, third vice-president; Dr. L. E. Johnson, Washington, D. C., fourth vice president, and Dr. Frank Billings, re-elected treasurer.

Heavy Sentence for Cocaine Seller in New York City.

Judge Mulqueen, in General Sessions, imposed the severest sentence recently ever handed out under the Cocaine Act in this city. The prisoner was "Doc" Lewis, an old offender. He got a sentence for two years in the State prison. It was his fourth arrest, and his second conviction.

The ROYAL STANDARD TYPEWRITER

Represents ECONOMY in More Ways Than ONE

¶ It costs less to keep in order, because it STAYS in order.

¶ It does not waste time by breaking down on a busy day.

¶ It turns out more work, because it is easier to understand, easier to operate, and capable of greater speed.

¶ It lasts longer, because it is simpler, has fewer working parts, and they are made of better materials.

COCOA POWDERS

You have not exhausted the possibilities in Cocoa Powder buying, without at least seeing what we can do for you.

We make nearly one hundred varieties, and certainly some one of them should suit your requirements. Our Cocoa plant is one of the finest in the world and we keep abreast with all improvements.

Our machinery enables us to furnish not only a Cocoa more completely freed from the oil than others but also **ANY** degree of dryness desired.

We can give you the Dutch processed Cocoa of highest grade and fully equal to the finest imported, and we can give under the same process, Cocoa that is slightly processed or heavily processed. We can give the same **QUALITY** of Cocoa not Dutch processed.

We can give you a Cocoa Powder that could only be sold at a small profit at $1.00 per lb., and from that absolutely pure Cocoa down to a price that would **SURPRISE YOU**.

If you are a large user we can and will make a blend solely for your purpose. We make only absolutely pure Cocoa powders.

We pack in barrels, half barrels, 50 and 25 lb. drums and 10, 5 and 1 lb. tins.

PLEASE REMEMBER other manufacturers **MAY** be able to please you, **BUT** you should see what we can do before you place your contracts or orders.

PLEASE REMEMBER other manufacturers **MAY** be able to satisfy you, but **WE CAN** and our capacity assures you of prompt deliveries.

NEW CO-OPERATIVE DRUG COMPANY FORMED.

Prominent Druggists Interested in Half-Million Corporation to Operate on the Rexall Plan.

The Consolidated Drug Co., with a capital of $500,000, has been incorporated under the laws of New Jersey by H. Schroeder and John D. Muir, of Grand Rapids, Mich., and H. F. McCormick, of Chicago. Messrs. Schrouder and Muir are well known retail druggists of the Furniture City, the second named being the president of the Michigan Board of Pharmacy. Mr. McCormick was formerly connected with the Rexall company. The company has established an office in the Metropolitan Building, New York, and proposes to sell stock to retail druggists and to manufacture a line of remedies on the co-operative plan.

The name selected for the new company has caused some confusion in the drug trade, many connecting it with that of the New York Consolidated Drug Co., the wholesale drug company operated by members of the German Apothecaries' Society of this city. S. V. B. Swann, manager of the latter company, informed an ERA man that he had already taken steps to prevent further confusion and that General Manager McCormick has promised to select another name for his corporation and one which would not be confused with that of the New York Consolidated Drug Co.

No Judgment Against Denver Mud Manufacturers.

Germicide Co., Denver, Colo., manufacturers of Denver Mud, have not been sued in any form by the Denver Chemical Manufacturing Co., but the latter recently obtained a rule in the Federal court against the Colorado Chemical Co., a bankrupt concern of Chanute, Kan.

Receiver in Bankruptcy for Stein-Gray Co.

CINCINNATI, June 20.—Five creditors of the Stein-Gray Drug Co., 228-232 East Fourth street, have filed a petition in bankruptcy against the company, charging that the company is insolvent and has consented to be adjudged bankrupt. Judge Hollister named Elden R. James as receiver under $25,000 bond, which he gave. The creditors claim the company's assets aggregate $75,000. Vice-President W. T. Gray says the company will not contest the case. He claims the company's liabilities are not as large as its assets. The company is seven years old.

New Wholesale Company for Oklahoma.

The Rankin-Fogle-Francy Drug Co., capitalized at $100,000, has been incorporated under the laws of Oklahoma to engage in the wholesale drug business at Muskogee. Messrs. Fogle and Francy are from Toronto, Ohio, and drug men of experience. Mr. Rankin has been for many years a traveling salesman for a Kansas City drug house and has an extensive acquaintance within the State of which he has been a resident for several years. The company has secured a site in the wholesale district of Muskogee and will at once begin the erection of a suitable building where it expects to be ready for business about September 1.

Straightening Out the J. Jungmann Tangle.

Judge Hough has granted an application made by Receiver Patterson for J. Jungmann, Inc., whereby the three Jungmann stores at 428 Columbus avenue, 50 Church street and 15 East 23d street will be turned over to a new corporation with $150,000 capitalization, after certain conditions have been complied with, subject to the consent of the creditors. It is probable that the bankruptcy will now be adjusted satisfactorily to all interested.

New Rules Regarding Transportaton of Explosives.

Dr. Wm. Jay Schieffelin, chairman of the N.W.D.A. committee on regulations for the transportation of inflammables, has issued in pamphlet form the express companies' regulations for the transportation of explosives, inflammable and other hazardous articles, effective June 15. All but three express companies have adopted these regulations.

Era Publications for Druggists and Soda Dispensers

The Pharmaceutical Era (Established 1887)
Issued on the 1st of each month. The pioneer technical magazine of America, covering all of the important departments of theoretical and practical pharmacy. Original and selected articles of value and importance to the druggist and assistant. Subscription, $1.00 a year in advance.

BUSINESS NOTICES

Maintenance of Prices on Sanatogen.

[illegible] to maintain the prices on their product—Sanatogen. In their advertisement on another [illegible] have the right and will insist that retailers shall strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating the conditions named thereon renders himself liable to injunction and damages. Price [illegible] freely upheld by various court decisions, and while they do not wish to intimidate anybody, they do propose to uphold and enforce their rights. By maintaining their schedule of prices every retailer is in a position to get a square deal and the small druggist is on an even level with chain corporation or department stores so far as best prices are concerned. For further particulars, prices, etc., read the Bauer Chemical Co.'s advertisement on page 633 of this issue.

Make Money by Selling Bath Cabinets.

The Robinson Bath Cabinet Co., 577 Jefferson avenue, Toledo, Ohio, have over 1500 druggists in the United States who are selling the Robinson Bath Cabinet, the record for the past year being more than 10,000 cabinets, the profits amounting to more than $40,000. This cabinet has several features which commend it: It is the only cabinet with four top curtains, the advantage being that the cabinet can be heated up before entering and used for a cooling room after the bath by dropping one curtain at a time, thereby securing four different temperatures. The cabinets retail all the way from $3.50 to $12.50 and the druggist does not have to carry a supply to make sales. Hot baths are especially recommended for the [illegible] and it is easy to [illegible]. Read the Robinson Company's advertisement [illegible] and write for special proposition No. 640.

Offers Three Courses Leading to Degrees.

The New York College of Pharmacy, the department of pharmacy of Columbia University, calls attention in an advertisement in this issue of the ERA to its 81st annual course of instruction which will begin on September 26 next. Two courses are offered, one leading to the degree of Graduate in Pharmacy, and the other leading to the degree of Pharmaceutical Chemist, the latter a university course and preparing students for admission, without examination, to the College of Physicians and Surgeons. A course offered to graduates of this and other institutions of equal grade is that leading to the degree of Doctor of Pharmacy. Students who are contemplating taking up instruction in pharmacy should communicate with the secretary, Thos. F. Main, 115-119 West 68th street, New York, who will send catalogue and other particulars on request.

Tincture Opii Deodorati U.S.P.

This article has largely superseded tincture of opium in prescription use and its increased employment requires the frequent replenishing of the stock bottle. Without criticism of the official process for the preparation of Tincture Opii Deodorati, the operation is one which many druggists would gladly avoid were they acquainted with the method of using the Opium Deodorized for the direct preparation, at a slight increase of cost, of a tincture of standard strength.

The Powers-Weightman-Rosengarten Co. are now offering an Opium Deodorized especially prepared for this purpose, and the convenience and reliability of the process mentioned is one which is likely to grow in popularity, particularly in stores where economy of time is always a consideration. All jobbers are in a position to supply the P-W-R product at lowest market rates.

Indispensable to all druggists is THE ERA Price List.

INSECTICIDES

Are Now In Season

An Insect Powder to be most effective, should be made from closed flowers. The wild flowers growing in Montenegro are considered the best, and they command a much higher price than open insect flowers from which the commercial powder is made. Your customers who want the best and are willing to pay for it should use

Spalato Insect Powder

from closed flowers entirely

Put up in decorated tin canisters, containing 10 lbs.

BUSINESS NOTICES

National Campaign for New Cleanser.

The Karith Jug

Retail druggists everywhere will be interested to know that a satisfactory cleaning fluid is on the market, which they can safely recommend to their customers for use upon kid gloves, fabrics, etc. Its name is Karith. The success of this preparation has been such that the Karith Chemical Co. is perfecting arrangements for a national campaign of advertising, so that the trade in all parts of the country will undoubtedly have calls for it. Druggists handling Karith report that it has a ready introductory sale, and that it is one of the strongest repeaters they have ever carried. It does all that is claimed for it, and therefore every sale wins a constant user, for no other preparation of the kind will accomplish the same results. This, with the added advantage of a novel and attractive container, should make Karith within a short time a staple article with every retail druggist, and one of his most satisfactory sellers. A handsome twisted-wire counter display stand, to contain one dozen trial size jugs, with show-card, of which an illustration is herewith given, is supplied without charge to any druggist who will use it. Attention is directed to the advertisement of the Karith Chemical Co. on the back cover of this issue.

Exclusive Right to Use Name "Liebig."

The Liebig's Extract of Meat Co., of London, makers of the celebrated Liebig's Extract of Meat, has gained an important victory in its suit against the Liebig Extract Co., of Hudson and Thomas streets, New York City, by the decision recently handed down of the United States Circuit Court of Appeals for the Second Circuit.

The principal issue was to the right of the Liebig Company, of London, to exclusive ownership in the name "Liebig," and the Appellate Court has now given a decision, with heavy costs against the Liebig Extract Co., of New York, and enjoins that company from using the word "Liebig" in connection with the sale of extract of meat. Since this decision is final and not subject to further appeal, it should mark the end of infringements on the original and genuine Liebig Extract of Meat made by Liebig's Extract of Meat Co., of London, under rights acquired from the eminent Baron Justus von Liebig, whose facsimile signature "J. v. Liebig," in blue, is a prominent feature of the package.

Alabastine Co.'s Post Cards Showing Color Schemes.

The Alabastine Company, sole manufacturers of Alabastine, Grand Rapids, Mich., have just issued a set of attractive post cards showing interiors arranged in various color schemes by means of stencils and the use of Alabastine in appropriate tint. These cards are put up in sets of ten and they are sure to increase the public interest in Alabastine which dealers sell because it is advertised, affords a good margin of profit, is recognized as a high grade article and brings customers to the store. If you are interested write to the Alabastine Co. for particulars regarding these artistic post cards.

No Quorum for June Meeting of the N.Y.C.P.

Due to lack of quorum the June meeting of the New York College of Pharmacy was not held. At the October meeting Secretary Thomas F. Main will move to change the by-laws so that future spring meetings will be held in May.

BUSINESS NOTICES

Hay Fever and the Adrenalin Campaign.

Parke, Davis & Co.'s summer campaign on Adrenalin manifests itself early this year, the "hay fever" announcements having already begun to appear in the medical journals. One new product—Anesthesia Cream (Adrenalin Chloride, 1-20,000; para-amido-ethyl-benzoate, 10 per cent; in a bland oleaginous base), is described in the company's literature as an astringent, anesthetic ointment, after the formula of Dr. J. E. Alberts, The Hague, Holland. Like Adrenalin Ointment and Adrenalin and Chloretone Ointment, the new preparation is supplied in collapsible tubes with elongated nozzle to facilitate introduction into the nostril. The cream has the endorsement of numerous clinical workers and will doubtless give a good account of itself.

As in former years, it is probable that the older and better known products—the Adrenalin Chloride Solution and Adrenalin Inhalant—will have "first call" with the average practitioner, a fact that the druggist should keep in mind in arranging for his supplies of hay-fever remedies. The ointments and cream have their vogue, of course, and may well be ordered in moderation.

Brooklyn College of Pharmacy's 20th Annual Course.

According to the last report issued by the United States Commissioner of Education, there were 78 schools of pharmacy or departments of pharmacy in the country during the years 1908-9, three more than in the preceding year. Of these, none occupies a more prominent position than the Brooklyn College of Pharmacy which, on another page, calls attention to its 20th annual course of instruction. The B.C.P is registered under the Educational Department of the State as complying with all of the requirements, has an experienced corps of professors and instructors, and its chemical, pharmaceutical, dispensing and pharmacognosy laboratories are thoroughly equipped for practical work. It maintains a Post Graduate Course which is open to all graduates of recognized schools of pharmacy, leading to the degree of Doctor of Pharmacy. The tuition fees are moderate and if you are thinking of attending a college of pharmacy you should certainly send for a Prospectus of this institution. The fall term begins in September next. Address Wm. L. Harloe, clerk of the college.

Record Cigar Sales Without Traveling Salesmen.

A factory that gets orders from dealers in 38 States without sending out a traveling salesman is that of Frank P. Lewis, Peoria, Ill. More than 9,500,000 Lewis' Single Binder straight 5 cent cigars were sold in 1909 with 1910 making a new record. This simply means that the standard of quality maintained by the Lewis factory is appreciated by both dealer and consumer, or this showing would not be possible.

The Lewis factory is one of the very few factories in the United States whose cigars are made entirely by hand, and the tobacco being thoroughly ripe and perfectly cured, shows the very best burning qualities. The cigar is a good one for the dealer, because it is never dead stock, and in selling it, the dealer gives his trade the very best quality that is possible to get in a 5 cent cigar. More than thirty years' experience in manufacturing only high class hand-made cigars has put the Lewis product in a class by itself. The factory, located at Peoria, Ill., is receiving orders from every section of the United States, and from the very best class of dealers.

United States Branch Factories in Canada.

Printers' Ink, in an article on Canada as a good market for American goods, prints the first list of United States concerns that have established branch plants in Toronto. The list mentions some 42 concerns, including the following which are well known to ERA readers:

Dominion Carbonic Co., Ltd., carbonic acid gas; Sanitol Chemical Laboratory Co., Ltd., drugs; Waterbury Chemical Co.; Hurler's; American Chicle Co., gum; Coca-Cola Co., soft drinks; National Cash Register Co., Ltd.

COLUMBIA UNIVERSITY

COLLEGE OF PHARMACY of the CITY OF NEW YORK

THE EIGHTY-FIRST ANNUAL COURSE OF INSTRUCTION

of the College will begin on September 26th, 1910, and continue through the academic year.

The College offers a course of two years, consisting of three days instruction weekly, open to those possessing the Pharmacy Student Certificate of the New York State Education Department, based on fifteen Regents' counts or one year's work in an accredited high school and leading to the degree of Graduate in Pharmacy.

In recognition of the need of other courses providing for advanced work, a Graduate Course of one year in the pharmaceutical and chemical sciences of Junior and Senior is open.

A Department of Chemistry, Physics and Biology, open to students of the College, offers a course of two years, of five days instruction weekly, which includes the Academic Requirements of the State Education Department, leading to the Regents' Counts of Junior grade, and to the successful completion of which is granted a Certificate of Proficiency in Chemistry. This course prepares students for admission to the College of Physicians and Surgeons.

To graduates of this and other Schools of equal rank, our regular Graduate Course of one year is open, leading to the degree Doctor of Pharmacy.

A Summer Pharmacy Course of twelve weeks is conducted during the months of July and August, under special directions for the regular work of the College. Those intending to take this course will please communicate with the Secretary.

THOMAS F. MAIN, Secretary, 115-119 West 68th Street, New York City

MASSACHUSETTS COLLEGE OF PHARMACY, Cor. St. Botolph and Garrison Sts., Boston

The next session will begin the first week in September and ends the third in May.

The course of instruction covers three years, leading to the degree of Doctor of Pharmacy (Pharm.D.), and a Pharmaceutical Chemist (Phar.C.).

A satisfactory preliminary examination of one year in an approved high school is required for entrance. Special students admitted upon the same terms. All courses open to graduates. Laboratories equipped with modern apparatus.

The demand for graduates of this school is in excess of the supply. For further information and catalogue write to

J. W. BAIRD, A.M., Ph. C., M.D., Dean

Pocket Size. Cut shows the Pad removed from Cover, also shows attachment, which is strong and simple to adjust.

The J. B. Burr Co., Inc. Prescription Blank Specialists Established 1856 **Hartford, Ct.**

BUSINESS NOTICES

Rockwood & Co.'s Cocoa and Chocolate Factory.

A recent issue of the Brooklyn *Daily Eagle* devotes nearly a page to illustrations and an article descriptive of Rockwood & Co.'s factory, which when completed will have a frontage of one entire city block, from Washington to Waverly avenue in Park avenue, Brooklyn, N. Y., besides a large area on the two thoroughfares first named. The structure is said to be the largest factory building in New York City and State, and also one of the largest in the country, devoted exclusively to the manufacture of cocoa and chocolate.

The factory extension will be a six-story and basement fireproof building, and is built of yellow terra cotta brick with sandstone trimmings. It will increase the factory floor space to over three acres, or 125,000 square feet. The present factory is equipped with the most modern machinery and power plant, including many labor saving and ingenious devices for the manufacturing and wrapping of chocolates. The machinery for the new extension is already ordered and on the way from Europe.

The Rockwood Company manufacture a complete line of cocoas and chocolates for all purposes. The consumption of cocoa and chocolate is so varied that the line embraces some hundreds of varieties. Some of these lines are: Chocolate coatings, used by manufacturing confectioners; the bitter chocolate used by bakers; cocoa powders, used for the making of soda water syrups, flavorings and extracts; breakfast cocoa, packed in small cans for the householder; also sweet chocolates manufactured for the grocery trade and the retail confectioners. All of these lines in almost endless variety are packed by Rockwood & Co. for the domestic and export trade.

It was only comparatively a few years ago when there was little high grade chocolate made in this country and the Swiss and French chocolates, which were considered the best, were imported in large quantities. This condition is being gradually changed as the domestic manufacturers have been steadily improving their output, both as regards quality and quantity. The American public, long famous as immense eaters of candy, is demanding finer and necessarily more expensive confections and manufacturers are not only meeting this demand, but are doing everything in their power to increase it.

Wholesalers Who Carry an Ample Stock.

Britt, Loeffler & Weil, 255 Canal street, New York, enjoy an enviable reputation as importing and wholesale druggists, the secret of their success being the inducements they have offered to the trade in the way of best quality goods, low prices and prompt shipments. Only last year they added a five story and basement building to their storage facilities to meet the demands of an expanding business. They carry an ample stock from which to make selection and mail orders addressed to them will be given especial attention. Customers may rely on prompt shipments and their orders will be faithfully executed. Give these enterprising jobbers a trial.

New Manager for Liquid's Chicago Branch.

J. B. Olwin has been made manager of the Chicago branch of the Liquid Carbonic Co., of Chicago, with headquarters at Wells and Michigan streets, to succeed J. B. Greiner, who was recently promoted to the position of general sales manager of the company. Mr. Olwin has been with the Liquid Carbonic Co. for nine years and for the last few years had been sales manager of the Chicago branch of the company.

Write for Henry Klein & Co.'s Price List.

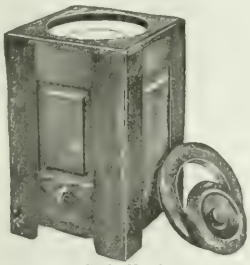
GRAND RAPIDS ICE CREAM CABINETS

SAVE 2/3 ICE SALT LABOR

THROUGH THEIR SUPERIOR INSULATION QUALITIES



Style No. 1
Porcelain Lined

The saving on ice alone will more than pay for a Grand Rapids Cabinet in one season's use, making a clear profit the next and the following seasons, and they will last for ten or fifteen years with ordinary care.

All Grand Rapids Ice Cream Cabinets are **GUARANTEED** not to leak or sweat and to give perfect satisfaction in every respect.

Experience of over fifteen years has demonstrated their **SUPERIORITY** over all others. Your jobber knows, ask him, or the man who has one.

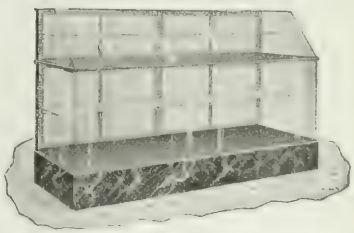
Price, 60 cents, Postpaid

D. O. Haynes & Co., Publishers
New York City



MADE in GRAND RAPIDS

THAT is one reason why our display cases are superior to all others.

Grand Rapids is a "furniture city" the skilled artisans of several generations ago engaged in the production of high-class furniture in Grand Rapids transmitted their peculiar skill to their sons and grandsons, most of whom are engaged in the industry here today.

Grand Rapids Show Cases are the product of experts whose ability is due to training received at the master hands of their fathers and grandfathers.

Our cases represent, therefore, the height of show case attainment

They are simple, artistic and substantial, and every merchant should have our catalog before buying.

Grand Rapids Show Case Co., GRAND RAPIDS MICHIGAN

Branch Factory: Lutke Mfg. Co., Portland, Ore.

Offices and Exhibit: New York, 724 Broadway, St. Louis, 1329-31 Wash. Ave.

"Quick Loader"

INSECT POWDER GUN

LEADS THEM ALL

It Leads in Quick Sales
It Leads in Durability
It Leads in Construction
It Leads in Applying the Powder
It Leads in Price

There is as much profit and much more satisfaction in selling the "Quick Loader" than any other gun made.

If you buy in lots of 25 gross or more we will place your name on the top plate in place of ours, and in addition will furnish you with a reasonable quantity of attractive powder gun circulars, with your imprint.

Advise us the probable quantity of guns you will wish this coming season and we will make you an attractive price and help you to sell them.

American Can Company

New York Chicago San Francisco

Here's the Point:

You proclaim yourself a discriminating buyer—establish your business upon the highest level of professional confidence—by dispensing **'Roche' chemicals** and **alkaloids.** Why? Because physicians have learned, through their acquaintance with Digalen, Thiocol, and other widely used 'Roche' products, to **put their trust in anything** bearing **the 'Roche' symbol.** The other day one of New York's leading ophthalmologists said to us—**"Your Homatropine is the best I have ever used."** The fact is, we specialize in the production of **chemicals, alkaloids, and specialties of rare quality.**

Specify 'ROCHE' when ordering the following:

Aconitine	**Atropine**	**Eserine**	**Hyoscine**
Arecoline	**Colchicine**	**Homatropine**	**Pilocarpine**

(in vials of 1, 2, 5, 10, and 15 grains, and upward.)

Benzo-Naphthol	**Hexamethylenetetramine**
Benzoic Acid	**Iodides**
Bismuth Salts	**Kresapol**
Bromides	**Morphine**
Brucine	**Phenolphthalein**
Caffeine	**Salicylic Acid**
Carbolic Acid, U. S. P.	**Salol**
Cocaine	**Saponin**
Codeine	**Sodium Benzoate**
Creosote (Beechwood)	**Sparteine**
Cumarin	**Strychnine**
Guaiacol (Carbonate)	**Theobromine**
Guaiacol (Liquid)	**Veratrine**

The Hoffmann-La Roche Chemical Works
65 Fulton Street, New York

ERA and S. F. WANT ADS BRING RESULTS

TRY THEM

If you want a Clerk
If you want to Sell your Store
If you want a Position

Hereafter all Want Ads for THE PHARMACEUTICAL ERA or for THE SODA FOUNTAIN will be handled as if the two journals were one publication, and inserted in the next following issue of either journal, unless otherwise requested.

The purpose of this is to give our customers a more prompt service. The circulation and the price are the same for both journals.

COPIES FOR YOUR PHYSICIANS

We have sold many thousands of these books to druggists *with their cards* printed on the front covers, for presentation to their physicians. Doctors are glad to have them and they make a particularly good advertisement for the prescription department. We make a *special price* to *ERA* subscribers for such copies.

In writing state how many copies you require.

ANNOUNCEMENT

The undersigned have acquired from the

Burrough Bros. Mfg. Co.

the Resor-Bisnol business in its entirety, and are sole owners and distributors of

Resor-Bisnol

(BURROUGH)

THE PERFECT INTESTINAL ANTISEPTIC

In addition to the former packages, Resor-Bisnol will also be furnished, for convenience in dispensing on physicians' prescriptions, in 5-grain capsules, in sealed containers of 30 and 75 capsules, respectively.

Price lists, terms and discounts, new scientific literature and samples for physicians only, may be had on application to

RESOR-BISNOL CHEMICAL COMPANY
106 W. Lombard St., Baltimore, Md.

Major's Cement

You don't only make a friend by selling reliable goods, but a customer as well. If you sell a person an inferior cement, to earn a better profit, and it does not give satisfaction to the purchaser, he or she in all probability will condemn all cements and never buy another bottle of any kind—thus you lose in the end any way.

If you always sell the best even at a lesser profit you will gain the good-will of the buyer and consequently sell more. Thus the increase in sales will more than make up for the difference in profit and you will be further ahead than if you sold the less reliable goods, both in reputation and financially.

The above is true with the majority of goods but more so with cement as it is an article that is not a necessity and the demand for it can easily be killed. We do not avoid expense in manufacturing the best article of its kind and give you the best that can be had on the market.

20,000 Circulation Each Issue

Get Our Exclusive Newspaper Advertising QUICK

It Never Fails To Pay

ROOT JUICE can be bought, from any jobber, at $8.00 per doz., but we will do exclusive advertising, over the name of one druggist in every town, which has a weekly newspaper, if the druggist will deal with us, direct, thus enabling us to keep tab on results of the advertising. We will also allow deduction of freight, and liberal discounts, on quantity lots. Write us. Scores of druggists throughout the country are having a wonderful sale on Root Juice.

FORT WAYNE -:- INDIANA

Do You Like Dry Cigars—

The kind you bite off the end and blow the insides out in a cloud of dust.

Dry cigars never made new customers nor held old ones, and there is only one way to prevent dry cigars.

The Andrae Electric Moistener

with its automatic humidity controller is the best little business builder that has ever been offered to the man who sells cigars.

The largest retail cigar firm in the world is buying them in quantities because they increase trade.

If you want to make REAL MONEY out of your cigars install the Andrae Moistener.

TEMPLE UNIVERSITY Philadelphia

Department of Pharmacy

A Co-Educational, Non-Sectarian Institution with 3500 Students in actual attendance

The only University offering Day and Night Courses in Pharmacy.

Day course extends over a period of two years of eight months each, and leads to a degree of Pharmaceutical Graduate (Ph.G.).

Night course extends over a period of three years of eight months each, and leads to a degree of Pharmaceutical Graduate (Ph.G.).

One additional year of eight months is required to obtain the degree of Doctor of Pharmacy (Phar.D.).

Special courses in any branch of Pharmaceutical industry are offered *to those qualified to take them.*

For those who wish to specialize in CHEMISTRY, MANUFACTURING, WHOLESALE PURSUITS and especially for the GOVERNMENT PURE FOOD and DRUG SERVICE, the Temple University offers courses and facilities surpassed by none.

The University Year Begins Thursday, September 15, 1910

For announcement and special information address

DEAN OF DEPARTMENT OF PHARMACY

PROFESSIONAL BUILDING

PRO BONO PUBLICO

We are from, by and for the good of the retail drug public. We do business with such of the public as are engaged in pharmacy.

An Insurance Policy

IN

THE AMERICAN DRUGGISTS' FIRE INSURANCE CO.

IS

WORTH MORE and COSTS LESS

Than in any other equally Reliable Company

Write us and we will prove it to you

The American Druggists' Fire Ins. Co.

1215-1216 Mercantile Library Building

CINCINNATI, OHIO

The true value of an Insurance Policy is found in the loss paying ability of the Company writing it. This is a Capital Stock Company, we have no connection with so called Inter-Insurance Concerns. We have a Surplus as to Policy-holders of over a Quarter Million Dollars.

THE SECRET
OF THE
SUCCESSFUL FOUNTAIN

IN the new edition of this popular and valuable work the "General Information" regarding the operation and care of a soda fountain has been carefully revised and over 500 new formulas added, thereby bringing it right up to the present season.

Following is a summary of the formulas contained in this new edition:

Fancy Beverages	573
Sundaes and Frappes	142
Ice Creams, Ices, Sherbets, Frozen Pudding, etc.	128
Phosphates, Punches; Orange, Lemon and Lime Beverages	161
Chocolate and Egg Drinks	61
Hot Drinks	155
Miscellaneous Syrups, Meads, Salted Almonds, Nuts, etc.	117
TOTAL FORMULAS	1337

This book is indispensable to every soda fountain owner and dispenser. The new *interleaved* copies are particularly convenient as a practical working formula book, with plenty of space for notes and additions.

IN THREE BINDINGS

"The Dispenser Soda Water Guide" is issued in three styles of bindings, as follows:

Flexible cloth	$1.00 a copy
Cloth boards	1.50 a copy
Cloth interleaved	2.00 a copy

MARCHAND'S
MEDICINAL PREPARATIONS

If you, Mr. Pharmacist, had devoted over *a quarter of a century* to the manufacture of five high grade preparations with only one standard of purity and uniformity, wouldn't you feel they were better than those made by a newcomer?

Then, is it any wonder we are proud of *our* preparations?

We were the first to manufacture Peroxide of Hydrogen (Marchand's) for medicinal purposes—that was thirty-one years ago—we are the PIONEERS.

PHYSICIANS KNOW

That MARCHAND'S PEROXIDE OF HYDROGEN (medicinal, 15 Vol.) is superior, because it is 50% *stronger* than the ordinary U.S.P., 10 Vol., and because it contains *NO ACETANILID*, and is absolutely free from any impurities.

That HYDROZONE (30 Vol.) is *THREE TIMES AS STRONG* as the ordinary preparations, and that it is the *most powerful of all germicidal agents*, yet is *absolutely non-poisonous*.

That GLYCOZONE ($C_3H_6O_4+C_8H_8O_8$), because of its remarkable properties is of signal value when applied to inflamed mucous membranes or other tissues. It is especially serviceable in acute and chronic forms of gastritis, intestinal catarrh, gastric ulcer, etc.

HYDROZONE AND MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) are put up in the best quality of flint glass bottles, for the reason that flint glass is not so brittle as amber glass. This, in connection with Marchand's improved process of manufacture, reduces the risk of breakage to a minimum.

When a prescription or a request comes to you for MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal), HYDROZONE, GLYCOZONE, MARCHAND'S EYE BALSAM or the DREVET MFG. CO.'S U.S.P. H_2O_2 Official, see that it is dispensed and no attempt made to urge anything else upon the customer.

Your profit is LARGER than it would be if you urged the sale of an inferior article.

"LIFTING" IS A WINNING WORD.

Next month's convention of the National Association of Retail Druggists in Pittsburg cannot fail, both on the business and the social sides to appreciate the benefit given to the organization by the up-lift tactics of the present president, Charles H. Huhn, as well as the entertainment features which will be provided by a former president, Ben E. Pritchard, with others whom he will have to aid him in his indefatigable efforts to make everybody feel at home in the Smoky City during the second week in September.

The social side of drugdom can never be cultivated too much, but it is only a small factor in the presidential policy pursued by Mr. Huhn. The Minnesota man is strenuous. He likes the social side, but he goes further and believes in "lifting" all the time. He is an ideal optimist and he practices what he preaches. His idea of a general "up-lift" is a mighty good one. The effect of his policy will be shown at the Pittsburg convention. The result ought to be good. There are too many kickers and knockers in the world and the drug trade has more than its fair share of them. With a few more Charley Huhns to get out in their autos or even trolley cars and round up unreasonable competitors the effect would be worth the trouble and the time. "Lifting" is a word that means for betterment of individuals and for advancement socially and professionally, in saying which the business end must not be ignored. If every druggist in America could be induced to adopt the "lifting" principle in his own life and as applied to others, the result would be a great advancement in so many ways that we hesitate to try to itemize them.

THE ERA PRICE LIST.

A notable feature of the new edition of the ERA PRICE LIST, which is now in press, is the large number of items in the drug and chemical list which have advanced in price during the last year. This is no doubt due to the operation of the Pure Food and Drugs Act, for the revision of the tariff had little effect upon drugs and chemicals. Just how this development has worked out up to the present time is shown in figures in the 1910 Edition of the ERA PRICE LIST. To the buyers and sellers of these commodities the list will be of unusual interest, for it will be the first complete presentation of the situation as it now exists. Some idea of the scope may be gathered from a statement of the fact that with

a total of approximately 50,000 items in the list there are more than 3000 changes and additions. The list will soon be ready for distribution.

Unusual efforts have been made to make this edition of the ERA PRICE LIST better than any of its predecessors and therefore more valuable to the buyers of drugs. The old features are retained and the entire work has been carefully corrected and systematically improved. There will be fewer errors —we hope there may be none—than in any previous edition. Perfection is hard to attain in a List of this kind, but with each successive edition we are coming closer to it. The increasing number of representative drug firms who have placed their advance orders for copies of the 1910 LIST is an evidence of appreciation of our efforts in this direction that is most gratifying to the editors and publishers and serves to encourage them in putting forth renewed effort to make each edition of this LIST more complete, more serviceable and in every way better than those that have gone before.

SELECTION OF WORDS AS TRADE MARKS.

An opinion of considerable interest to pharmacists has just been handed down by Assistant Commissioner Billings, of the U. S. Patent Office which confirms the decision of the Examiner of Trade Marks that the words "Lait de Violettes" as applied to perfumery, toilet powders, toilet water, face tints and hair lotions are descriptive of a characteristic or quality of the goods and are therefore not registrable as a trade mark. The Assistant Commissioner in passing upon the registrability of the words, quotes from a recent decision of the Court of Appeals of the District of Columbia (not yet published) refusing the registration of the word "Getwell," as a trade mark for medicine. The Court said:

Section 5 of the Trade Mark Act provides inter alia, that no mark consisting merely of [illegible] or devices which may be descriptive [illegible] of the goods [illegible] or which are used to indicate the character or quality of such goods, shall be registered. . . . The provision of the act . . . prohibits the registration of a mark which is merely descriptive of the goods or quality of the goods, and where it is used [illegible] this provision would permit the registration of a mark primarily intended to suggest [illegible] or generally [illegible] of the goods, or the character or quality [illegible]. But where it is not the case [illegible] the predominant and almost the sole feature of the mark, and, as applied to medicines, is primarily and obviously intended to be descriptive of the quality. In other words, it constitutes an advertisement and not a trade mark. Every other dealer has the right to use [illegible] to suggest the character of his goods without liability of molestation by this applicant. We have previously remarked that the range in the selection of trade marks is as broad as the human imagination. It is manifest, therefore, that one who seeks a monopoly of words in common use and that are primarily descriptive of quality is not entitled to special consideration.

CRIME TO LIE IN ADVERTISEMENTS

That a law should be passed by the New York Legislature making it a statutory offense to print untrue and misleading advertisements and remain unpunished and practically immune for years is the curious condition recently revealed when the New York County District Attorney prosecuted a merchant in Brooklyn for printing an untrue advertisement in which he offered bargains in 9000 rain coats which he claimed to have purchased at a [illegible] from a manufacturer. These had been no such sale. This is the first time public attention has been drawn to this law and as a matter of general interest we quote its provisions:

LAW REGARDING UNTRUE AND MISLEADING ADVERTISEMENTS. Any person, firm, corporation or association, or any employee thereof, who in a newspaper, circular, or other printed matter, published in this State, knowingly makes or disseminates any statement or assertion of fact concerning the quantity, quality, the value, the method of production or manufacture, or the reason for the production of his or their merchandise, or the manner or source of purchase of such merchandise, or in the possession of rewards, prizes or distinctions conferred on account of such merchandise, or the motive or purpose of a sale, intended to give the appearance of a plan advantageous to the purchaser which is untrue or calculated to mislead, shall be guilty of a misdemeanor.

Any person, firm, corporation or association, or any employee thereof, who violates any provision of this section shall be liable to a fine of not less than $25, or more than $100, for each offense.

One reason, perhaps, why there have been no previous prosecutions under this law is the difficulty attending the getting of legal evidence, for mere suspicion is not sufficient to secure conviction. Another reason, undoubtedly, is the fact that the existence of the law has not been generally known to the public. It is a good law and ought to be enforced.

OMISSION OF NAMES FROM TRADE DIRECTORIES.

Most unusual in its character was an action for libel which was tried recently in the High Court of England, in which the plaintiff, a registered dentist, sought to recover damages from the publishers of a directory of dentists because his name was omitted therefrom, the omission implying, in his view, that he was a quack, and not fit to meet medical or other practitioners in consultation. It was shown in proof that the omission was not intentional and the jury promptly decided that the omission was not a libel.

From the arguments in the case and the conclusion of the jury there could be only one obvious deduction: the omission of the name of a man or firm from any list or directory of his profession or business would only be libel if the omission was made intentionally. This is in line with, but on a different plane as compared to commercial black-lists, so far as the courts go.

The question of intent as to an omission is practically an unprovable quantity. It was shown in this litigation the extreme difficulty of keeping the British Medical Register, the registrar having been compelled to make more than 14,000 alterations or additions within one year. Of course the registrar must depend largely upon the volunteer work of persons affected, but in any directory, no matter how carefully the work is done, the omission of a name or the failure to record a change, is invariably due to the neglect of the persons affected. Citing, for instance, the drug trade, no druggist can afford to be omitted from the ERA DRUGGISTS' DIRECTORY, but cases of that sort have sometimes happened. The utmost care is taken in its preparation, yet complaints will occasionally come in from people to whom requests for information were sent, but who neglected to answer. Publishers of all directories are always glad to receive authentic information regarding new enterprises and business or other

changes that affect the contents of their publications. Accuracy is their invariable aim and they welcome every straw that is blown toward them for that purpose.

SAFEGUARDING BUSINESS SECRETS.

Germany has taken another step in advance in the protection of employers from the disloyalty and dishonesty of employees and what may be called general immorality in the conduct of business. In most countries there are ways of punishing commercial misconduct, but unless some crime in the nature of forgery, or some similar offense, is committed, the difficulty of proof and the uncertainty of litigation, with its tediousness and costliness, often render efforts to secure redress impracticable, if not impossible.

The new German law in general provides that any person who commits offenses against good business morals shall be punished criminally and held responsible for pecuniary damages. The following offenses are punished by a fine of not more than 5000 marks (approximately $1200), or one year imprisonment, or both:

Supplying lists of customers, prices and supplies, trade agreements, information about new projects and similar matters of value to a competitor.

Betrayal or communication to interested parties of any plans, models, drawings, samples, recipes, formulas, or manufacturing processes, knowledge of which has been secured through employment in places where the same are used.

Offer or receipt of bribes or bonuses by any person or employee with the object of obtaining an unfair advantage over competitors and to the detriment of free and open competition in the purchase and sale of commodities, the amount of the bonus or bribe being confiscated by the State.

Publication or distribution of any false, misleading or exaggerated statements concerning the composition, construction, source or value of goods, or of any false representations made for the purpose of selling or disposing of the same.

EXPERTS ARE SUCCESSFULLY DEFENDED.

As a result of a notable discussion regarding the prevailing high price of drugs the Maryland Ph.A. passed resolutions of confidence in the Government experts who are closing the doors of America to adulterated and inferior drugs which foreign dealers formerly foisted upon our merchants in shocking manner. While the operation of the Pure Food and Drugs Act has undoubtedly contributed to the advance in price, it is nevertheless true that the goods are now correspondingly better. The complaint, however, has been made that the experts having supervision of the inspection of imports, particularly in New York, have been unduly exacting, with a result that unnecessary hardship has accrued to the importers. This complaint was under serious consideration by the Maryland Ph.A. when Dr. Kebler, of the Bureau of Chemistry, presented the other side of the case and pointed out that the Government experts, if they erred at all, had favored the importers of drugs. The complaint was effectually disproved in an argument which was thoroughly convincing and which we regret we have not the space to print in full. That it satisfied the critical and discriminating Maryland pharmacists is ample evidence of its quality. Brief reference to it will be found on page 791 and on page 785 will be found an interesting article by Dr. Kebler in which he treats of the corelated subject of drug standards.

THE NEW ALCOHOLIC MEDICINES LIST.

Inspection of the newly revised list of alcoholic medicines, issued by the Commissioner of Internal Revenue, reveals the fact that there are now about two hundred preparations of this nature which come within the Government's restrictions, to sell any of which druggists must pay the Federal tax for selling liquor. At the same time the commissioner renews his previous ruling in relation to preparations of beef, wine and iron (unless the same contains at least the proportions of beef and iron given in the formula on page 1821 of the 19th edition of the U.S.D.), as well as the compound commonly called rock, rye and glycerin. On account of the importance of this list to retail druggists it will be printed in full in the next number of The Pharmaceutical Era.

Dr. Wiley's argument in favor of a Federal department of health is weakened by his statement that the measure is a good one because the patent medicine men are opposed to it. The preponderance of public opinion, so far as we have noticed, is against the bill, upon the ground that such a department is not needed and would be a costly and unnecessary addition to the governmental machinery. We understand that President Taft is now opposed to the measure, especially that portion which would make the head of the proposed department a cabinet officer. That would foreshadow a veto.

Ohio's Board of Pharmacy is to be commended for revoking the licenses of four pharmacists who are charged respectively with "using liquor to excess," for "loaning his certificate," for "gross immorality" and for "selling liquor illegally." Drastic action of this nature cannot fail to elevate pharmacy, for the example will deter others who may be tempted to violate both law and reason.

Readers of The Era should not forget that *The Soda Fountain*, which is published midway between the publication dates of The Era, contains considerable news of interest to druggists, in addition to the features which justify the name of this exceedingly bright monthly. One dollar sent to 82 Fulton street, New York, will secure *The Soda Fountain* for a year.

Many State associations have gone on record endorsing the campaign of the W.O.N.A.R.D. against indecent advertisements and obscene medical literature. It is a fight for higher morality that should receive earnest and universal support.

Adoption by Texas of the county organization idea should advance the growth of this prosperous association. On account of its vast area Texas is particularly well suited for an effective demonstration of the value of the plan.

Resolutions have been adopted by several State associations to eliminate the dispensing doctor evil. One particularly good suggestion is to force this class of practitioners to qualify as registered pharmacists.

Wisconsin, in going into the Pure Drug Show field, is presenting a novelty in association work, but its progressive and enterprising members are well able to win success.

Secretary Potts, of the N.A.R.D., displayed rare diplomacy in his address at Buena Vista Springs, never reverting to the ruction between that organization and Philadelphia R.D.A.

Texas Would Regulate Narcotics, Banish Venders and Raise Educational Standards

FORT WORTH, July 20. The 31st annual meeting of the Texas State Pharmaceutical Association was called to order by President R. H. Walker, of Gonzales, there being over 300 prominent pharmacists in attendance. Addresses of welcome were delivered by Mayor W. Davis, C. C. Martin, president of the Tarrant County R.D.A., and vice-president H. C. Jackson, on behalf of local druggists. Professor E. G. Eberle, of Dallas, extended cordial fraternal greetings from the A.Ph.A.

In his annual address, president Walker declared that the public health demanded that immediate action be taken to restrict the peddling of drugs. To this end he recommended that the office of State pharmaceutical inspector be created. Mr. Walker also recommended an extensive raising of educational requirements for registration, he even going so far as to ask that every applicant have a reading knowledge of French and German. The latter suggestion was subsequently shelved and several of his recommendations adjudged too radical in the subsequent report of the committee on the president's address, consisting of H. L. Carleton, Austin; J. J. Thames, Taylor; Jess Bynum, Waco; H. F. Lackey, Fort Worth, and W. C. Burns, San Antonio. This committee, however, put itself on record as favoring the fourteen-unit scale, an increase of two units over the standard now required of candidates for registration in Texas. An attempt will be made to amend the present State pharmacy law at the next session of the legislature so as to require all candidates for registration to show the same elementary qualifications as are required of the matriculants of the University of Texas Department of Pharmacy.

J. C. Graves, of Kaufman, who has worked in conjunction with the committee previously appointed to investigate the itinerant vendor evil, asserted that the legislation necessary to restrict it was about the most difficult that could be asked for. He called attention to the political strength of the organized physicians of the State and said that although the Texas Ph.A. was probably the best state pharmaceutical organization in the country, there were many counties unrepresented in its membership. Pharmacists in the latter must be enrolled before any desired legislation could be hoped for. Following Mr. Grave's remarks, which were heartily concurred in by President Walker and W. I. Bullington, of Poolville, it was unanimously voted that the executive committee be authorized to appoint a county organizer and to expend such sums as the committee deems wise to carry on this work. County organizations thus formed will be subsidiary to the State body.

Aroused by a paper entitled "What Are We Going to Do About It?" read by Prof. E. G. Eberle, the proceedings assumed a decided antinarcotic trend. Prof. Eberle took the newspapers to task for editorials which, he said, exaggerated the conditions and were unjust to the druggist. Prof. J. P. Remington told of the work of the Pennsylvania State Board of Pharmacy against the cocaine and morphine traffic in Philadelphia, and described his interview with President Taft on the subject. Prof. Remington said that just now is the time for the enactment of a Federal law in connection with the State laws, which will prevent not only the purchase of cocaine, but also its importation through the mails from other countries and will bring the traffic under the jurisdiction of the Interstate Commerce Commission. At a recent meeting of the manufacturers and importers of cocaine, he said, they themselves were ready to quit the business so alarmed were they over the growth of the habit. The following resolution was adopted:

In view of the prominence given to the increase of the drug habit by the newspapers and the connection therewith of certain druggists that cater to this trade breaking the law and bringing misery and degradation to many unfortunates as well as disgrace to the profession to which they belong, be it

Resolved, that we as a body take keen interest in putting the anti-cocaine law on the statute book and most emphatically repudiate any action of any individual druggist who breaks this law. We agree with the state of affairs as published in many cases lately, and that many honorable men of our profession [illegible] by men posing as physicians [illegible] for the money there is in it.

Resolutions presented by W. I. Bullington were also adopted heartily endorsing Professor Remington's efforts to have passed a [illegible] prohibiting the manufacture and sale of cocaine, and that Texas representatives in Congress be memorialized to further its passage.

The following officers were elected:

President, J. W. Covey, Fort Worth; first vice-president, H. C. Jackson, Austin; second vice president, Jacob Schradt, Dallas; third vice-president, Thomas J. Snell, Cooper; secretary-treasurer, I. D. Hiner, Dallas; home secretary, H. L. Carleton, Austin; trustee, R. H. Walker, Gonzales; historian, Miss L. Shipe, San Antonio.

Little Miss Etheldra E. Coulson, the three and one-half months' old daughter of Mr. and Mrs. Jack Coulson, of Fort Worth, was elected an honorary member. Two hundred and two regular members were admitted.

At the meeting of the Drug Travelers' Association of Texas, $25 was appropriated to defray expense of incorporating proceedings with regular volume published by the Texas Ph.A. The sum of $200 was turned over to the local entertainment committee towards expenses of present convention. A committee consisting of J. S. McCauley, Milton Hickox, Dallas, and R. T. Gibbs was appointed to investigate the practicability of adopting a death benefit feature, the committee to appoint at the next meeting. The following officers were elected:

President, Jesse Bynum, Waco; first vice-president, Fred Burnett; second vice-president, H. B. Cox, Houston; third vice-president, R. L. Grigsby, Beaumont; secretary-treasurer, E. G. Eberle, Dallas. Committees were appointed: Memorial, H. B. Cox, R. T. Gibbs, Shreveport, La., and Frank A. Ryan, Waxahachie; auditing, T. D. Wilson, Corpus Christi; James Lyons, Dallas, and H. C. Risber, Waco.

WISCONSIN PH.A. FATHERS A PURE DRUG SHOW.

Annual Convention Attended by 700 Members—Legislation Planned for the Good of the Public.

MILWAUKEE, July 20.—Decision to hold a pure drug show at the Milwaukee Auditorium during the second week in November was reached at the thirtieth annual convention of the Wisconsin Pharmaceutical Association held at Elkhart Lake. The show promises to eclipse anything of the kind ever seen in the northwest and will receive the support of wholesale and retail druggists in all parts of the country.

Several other important matters were decided at the Elkhart convention, one of the most important gatherings held in the history of the organization. There were 700 members in attendance, eight of whom were present at the first convention, 30 years ago. The officers elected for 1911 included:

President, O. T. Erhart, La Grosse; first vice-president, M. C. Trayser, New London; second vice president, L. H. Kressin, Milwaukee; secretary, E. B. Helmstreet, Palmyra; treasurer, W. P. Clarke, Milton.

At the annual meeting of the Wisconsin Pharmaceutical Travelers' Association, held at the same time, the following officers were elected:

President, O. A. Rather; vice-president, George W. Stocking; second vice-president H. E. Ferry; third vice-president, H. I. Carnahan; secretary and treasurer, Charles Edwin Wilson, and assistant secretary, M. J. Kaumheimer.

The Ladies' Auxiliary of the Wisconsin Ph.A., 300 members of which were in attendance, elected these officers:

President, Mrs. George H. Kesten, Milwaukee; vice-president, Mrs. N. E. Huber, Fond du Lac; secretary, Mrs. M. C. Trayser, New London.

Resolutions were passed at the convention, denouncing the sale of fake preparations and the association will endeavor to have legislation passed at the next session of the legislature interdicting obnoxious advertising of nostrums, particularly fake cures. Other measures, looking to the protection of the public against fraud will be advocated by the association.

One of the main attractions of the Elkhart meeting was the baseball game between the travelers and the druggists, the score being 8 to 6 in favor of the druggists. Various games and athletic events were participated in as usual. Much credit is due W. H. Barr, of Milwaukee, local secretary of the Wisconsin Ph.A., for the work which he accomplished in preparing the different events under the auspices of the travelers' association.

During the time of the convention a daily paper, *The Morning Pill*, was issued by the traveling men, giving the program of each day, and a running line of good natured jokes on the drug men in attendance.

One of the entertainment features that was much appreciated was a trolley ride to Crystal Lake.

A record number of new members were enrolled in the Wisconsin Ph.A., this year, a total of 172 being taken in.

The Real Chambers.

By Emma Gary Wallace.

ALLEN CHAMBERS reached home so thoroughly tired out that he was not his usual good-natured self. To his wife's anxious inquiry he had replied sarcastically that there would be no need for any one to rock him to sleep on the present occasion and then he wondered audibly and forcefully why on earth he had ever elected to follow the calling of a mixer of medicines anyway.

Being a wise woman in her day and generation the partner of his joys and sorrows retired behind a veil of silence, whereupon Chambers mentally apostrophized himself as a brute and by way of partial apology and explanation grumbled some more about the beastly long hours and endless vexations of his business as he switched off the light and turned in.

Something like an hour later Allen Chambers Junior woke up. The nerves of Chambers Senior were on edge and positively refused to vibrate musically to the howls of the small tyrant, whose infantile sense of wanderlust would be soothed by nothing short of being lugged to and fro in the strong arms of his paternal relative.

Chambers knew that it was a questionable precedent to establish but he felt that it was but another straw anyway and so he acquiesced grimly, even as a martyr might watch an additional fagot piled against the burning stake.

In exactly ninety-seven minutes by the clock the blue eyes of the man-child closed in cherubic slumber. But in spite of his own great need of the oblivion of sleep, it utterly refused to return to him, and as he continued to stare into the misty darkness about him, the bills coming due, the stock renewals and the subject of his store advertising came and perched on the foot of his bed like haunting Things.

Buzz-burr-zip-zip-zip-p-p-pp went something in the very center of his jaw, and like a galloping horse on a long stretch of hard road the sensitive nerve of a big molar swung forward into a maddening ache. Chambers Senior said some things he didn't mean at all, but he said them softly so as not to awaken Chambers Junior.

Morning came, and a wearied and chastened man started storeward. Even Mrs. Chambers' wifely distress over his distorted physiognomy failed to elicit more than a grunt in reply. He was stoically calm when a messenger met him at the door with the word that his head man was indisposed—indisposed to come, Chembers interpreted it—and when the telephone announced tearfully that "Downsy," the errand boy, had been called away to help bury his grandmother.

He glared at Diamond, the fountain man, who pointed out that this was the sixth time "Downsy" had performed a like sad service in as many months and wondered when the ancestral crop would be exhausted.

It didn't tend to soothe his feelings to discover presently through the peep hole of the prescription room that Diamond was doing a pantomime for the benefit of Smith—general factotum—using as a ready-made illustration a toothache gum picture of an individual with a decidedly one-sided face and a restraining head bandage. Smith was doubling up in silent mirth while Diamond continued his vaudeville by making dramatic motions to indicate likewise a condition of badly swelled head.

Chambers flung himself into the office easy chair. If Diamond wasn't such a corking good fountain man he'd fire him on the spot, he decided hotly. The fellow had such an enormous bump of what he was pleased to consider as wit. He was funny, too—sometimes. But not now—certainly not now. He closed his eyes wearily and leaned back his head with a wavy feeling of floating down a sombre stream.

But "surcease of sorrow" or the delicious enjoyment of it was only for a moment. Excited, angry words were heard in the main store and Chambers sprang to his feet and hastened forward.

A country patron stood in the middle of the floor vociferating wildly. At the sight of Chambers he put on the loud pedal still more and rolled his eyes in a threatening manner.

It was with difficulty that the innocent proprietor gathered the information that he had come to town with sixteen dozen eggs, that the mental equilibrium of his staid and respectable steed had been offended by the sight, sound and smell of an "automobull" and had promptly left the street and later the wagon, in the interim churning the eggs into a gigantic uncooked omelet, which at the present moment decorated the vehicle and the adjacent street and pavement.

He declared that the "harness was busted, the wagon wrecked and good for nothing but kindling wood, his stock in trade all smashed but a paltry dozen or so," and demanded instant payment for his loss.

Chambers opened one eye wide in astonishment—the other refused to look surprised except in a slant and sinister fashion. He mildly inquired why he should be expected to assume any responsibility for the wreckage, which inquiry threw his visitor into a choking spasm of rage.

"Aint you a member of the Town Board of this here place?" the man bellowed. "Aint you the President of the Town Corporation? Don't you allow and encourage these devil-wagons to go about scaring honest folkses horses and forcin' 'em to smash up property. Aint you got one yourself?"

Chambers declared that he hadn't, but that fact brought no mellowing influence to bear. In the mind of the injured man it was all a deep laid plot on the part of him—Chambers—to get folks smashed up so he could sell the medicine to patch 'em up with, and as the head Town Official he was the man to settle, anyway.

Diamond idiotically suggested that they turn out as an expression of sympathy and pelt the offending driver of the auto with the remaining eggs, and failing to locate him that they might be used on the runaway horse.

The complainant left in disgust, muttering his determination to obtain restitution forthwith.

Diamond resumed the polishing of the nickel and silver trimmings, remarking that "The paths of glory lead but to the grave," and inquiring incidentally of his employer if he hankered for the honors of re-election?

Chambers went back to his chair. He wondered if anybody else anywhere had so many petty annoyances as he had. Pin-pricks they were to be sure, but even a mouse can make an elephant extremely nervous by hiding in its ears. He wondered if he needed a vacation or *why* he was losing his hold on his ability to keep cool under all circumstances. What if a real emergency should come. How would he meet it! His head throbbed dully. Further introspection was halted by an exclamation from Diamond, announcing the arrival of a grey-white machine which shot down the street at unusual speed and brought up in front of the store with a short-stop.

It was the great doctor from a nearby city, only called upon by the townspeople in serious emergencies.

"I have two patients in Glassville this morning, Mr. Chambers," his caller said with characteristic directness. "In this first case only our combined best efforts will give a fighting chance for life. I want these filled without a moment's delay."

Chambers took the prescriptions and across the top of each he saw written: "For Eben Starks," and Ben Starks had all but ruined him a couple of years ago by misrepresenta-

At the New York Meeting.

Group of leading members of the New York Ph.A., taken at Saratoga Springs. Reading from left to right: Frank L. Wheeler, of Fort Ann, up-state representative of Sharp & Dohme; Mr. and Mrs. George T. Rieffiin and Louis Berger, the latter three of New York City.

[illegible] of the anger that had never died out of Chambers' heart [illegible]

[illegible] with a human life in the balance.

[illegible] Starks home. [illegible] C and E track crossing. The victim is an unknown woman. Only immediate work can save her life, perhaps even that will not do it. They are bringing her here. May we use your manufacturing room, Mr. Chambers? I remember it is well lighted, has a fine table and is always clean—can't say that about every store. Later she can be removed, but the four miles to the hospital is out of the question just now."

Chambers nodded. Through the open door four sturdy men were at that very moment bearing between them upon an improvised stretcher a frail girlish form.

He opened his mouth to speak but closed it again with a strange gasping sound. The great doctor noticed that he had gone deadly white. "Only a fighting chance here, too," he said almost curtly, "we mustn't lose our heads. I'll look after her, if you'll see to that medicine without delay."

Chambers turned mechanically.

"Smith, you and Diamond are at Dr. Barroll's service," he said, and without another word he walked to his desk. Like a man of iron, he measured and weighed and mixed, checking [illegible] all bottled and boxed and labeled and lastly, dispatched by a messenger impressed into immediate service.

"I'll take your place now, Diamond, you may return to the front store," he directed.

Without a single false move the medical man worked swiftly and surely until the last stitch was taken and the last bandage snugly in place.

"Call the ambulance before she recovers consciousness," he said at last. "Pity that she has to be taken so far!"

"She's not going that far," Chambers interrupted almost fiercely, "she'll go to my house two blocks away. She's—it's my only sister, Doc. Evidently her coming was to be a surprise for we knew nothing whatever about it."

Barroll stared at him a moment in admiring silence.

"Chambers," he said, grasping his hand, "you are the stuff soldiers and sailors are made of. Why didn't you tell me before?"

"I couldn't have put up the Starks medicine if I had," he replied simply. "It was a case of each man being Horatius at his own bridge—the bridge of a life."

"I'm proud to know the real Allen Chambers," the doctor said with feeling, "the man who can do his duty under the stress of life and death emergencies. Your sister has an excellent chance to pull through after all, I find. Here is the ambulance. Steady boys—steady. Come along with me, Chambers, we'll go ahead and prepare your wife for her coming."

And out into the morning sunshine, shoulder to shoulder went the two men, whose patent of friendship was sealed for all time to come.

Druggists and Families Spend Day at Glenolden.

[illegible] at the Glenolden farms of the H. K. Mulford Co., far surpassed [illegible] interests. The outing was held under the auspices of the Drug Club with the Philadelphia Association of Retail Druggists and Chapter No. 6, W.O.N.A.R.D. co-operating.

Special trains carried the druggists and their families to Glenolden. There were tennis tournaments, athletic events for men, women and children and a baseball game between teams representing the P.A.R.D. and the Drug Club. The latter won by an overwhelming score. Luncheon was served in the grove which was also the scene of the big family dinner in the evening. At dusk all hands repaired to one of the spacious barns of the company and enjoyed a barn dance.

No Reasonable Offer Refused

[illegible]

CORRESPONDENCE

Sanitol Preparations at Cut Prices.

Editor The Pharmaceutical Era:

Druggists throughout the United States will be pleased to know that their friends The Sanitol Co. have made it easy for them to obtain supplies of these goods at much lower rates than they can be purchased through the regular wholesale druggists.

The following prices are taken from the catalogue of a large wholesale department store in Chicago:

SANITOL Hygienic Toilet Soap	doz	$1.08
" Toilet Talcum Powder	"	1.35
" Tooth Paste (large size tube)	"	1.35
" Face Powder (three tints)	"	1.71
" Face Cream	"	1.71
" Tooth Powder	"	1.35
" Liquid Antiseptic	"	1.35
" Violet Toilet Soap	"	1.71
" Cold Cream	"	1.71
" Tooth Brush	"	1.71
MENNEN'S Borated Talcum Powder	"	1.47
" Violet Talcum Powder	"	1.47
" Face Cream	"	1.47
COLGATE'S Violet Talcum Powder	"	1.58
" Cashmere Bouquet Talc Powder	"	1.58

Now that all of the five and ten cent stores and cheap department stores will be handling these goods, all brother pharmacists should "boost" their sale as much as possible. The wholesale druggists who are forced to obtain regular trade rates for these goods will no doubt be gratified to know that department store jobbers can sell them cheap.

A. DRUGGIST.

"English as She is Written" in Indiana.

Editor The Pharmaceutical Era:

We are inclosing herewith a letter which was addressed to Marshall Field & Co., this city, and which they turned over to us. A verbatim copy probably would interest your readers. Yours truly,

Chicago, July, 1910. SAVOY DRUG & CHEMICAL CO.

The enclosure, omitting the writer's name and address, reads as follows:

Marshel Fields & Co.
Chicago illnois

DEAR SIR. Your Firm has bin recemened to me by one of My new yourk Custmers as Likely to handle Skunk oil i deal in this comody very heavy in the season & have at this tim abot 6. barrels in wood & probly 200. gallons in new 5 gallons Cans if you can use eany part of this oil eigher in cans are barrels kindly give me your Best offer F. O. B. your city & if you dont handle this comody kindly refure me to some in are out of your city that you think i mite get for a customer in this line i put up a good quality of oil pure i all so handle all kind of medical roots and if you are instered in them i wold like you send me prises on what you are mostly instered in are all i buy of large dealers mostly hoping to reseave and early reply i remain your respeckly [.....] Liberty ind

Who Can Tell About the Oldest Metal Ceiling?

Editor The Pharmaceutical Era:

Would you object to asking in your columns for information concerning the first manufacturer and the first use of metal ceilings? Your subscribers may own or know of old metal ceilings. One of them may be the oldest in existence. We would like to know the facts concerning its manufacture, service, erection and present condition as well as the facts concerning ceilings which are quite old even though they [illegible]

"Poor old chap he always was kind to his fellow-men!"
—*The Boy.*

Chick and the Swells.

By Joel Blanc.

It has been more than two years since I have written anything about Chick. In fact, until a few days ago, I had not heard of him since the time when I told you of his migrations between the positions of driver of a coal wagon and drug store porter. Therefore, you can imagine my surprise when a nattily dressed young man stepped up to me, grabbed my hand with a coal-heaver's clutch, and said, "H'do dere sittle baldy! Wotten'r devil yuh doin' in Balty?"

It was Chick, but a soft-handed, creased-trousered Chick, and except in speech, he bore but little resemblance to the rough and ready youth whom I had known and liked.

After the exchange of greetings Chick made his usual proposal, thus: "Let's go an' blow de clouds off one. But we can't go to no dockyard, for me schooner days is past. Bein' one of de swells, I have to sip me amber or bock in a caffy parlor where yuh gets de ghost of a beer in a bit of fancy glassware, an' has to tip de Alphonse to brung it to de table."

When we were seated in one of those glittering palaces where the size and price of the Gambrinusian beverages leads one to either bankruptcy or prohibition, Chick unwound the following tale of sorrow:

"Well, it's dis way (an chee! wotter comfort it is to drop de soft-pedal talk of de swells, an' talk de good old Thoid av'noo to me little fren. Yuh see, after I gets me full-up of dat dere old holy roller in Philly, I didn't fine no porterin' job a chasin' me very rapid. So I hooks up as travellin' prop man with a blonde show, an' stays wit de gran' mudder outfit 'till we strikes Chi. Windville gets me lallapaloosa, so I tinks I'll work a wheat corner wit Jim Patten, an' proceeds to de bucket shops, where I loses evert'ing but me complexion. Den I turns bo, an' rides de cold-storage Pullmans till I gets back to sunrise an' Balty. Den me card come outer de box, an' de foist ting I knowed, I'm squeegeein' de winderglass of de swellest plaster palace of dis suburb of de Naval 'Cad'my.

"Bein' a drug porter by birth an' redheadity, I makes good. Me boss, he's de salt of Atlantic City an' de rest of de eart! De place is as swell as a bloated oyster. Nobody don't never come in dere but de deckle-edged folks—an' de master-man makes me wear de white-wings drapery even when I'm shovelin' de smoke-rocks into de heat box. He says I gotter trim me nails an' me langwidge, an' he makes me a graft of a tool chest wit all de extray blades, soze I can keep me mug weedless. For such a duke as dat I'd change me religion, if I had any.

"After a bunch of pay days, de boss says I have outgrowed me degraded ancestors, an' give de submerged tenth the last go-down. He says he is goin' to create de position of stock-clerk for me speshul benefit, an' I wont have nuttin' to do but keep de creases in me pants honed, keep up de sellin' stock, run de want-book, an', at a pinch, help to avoid de rush by waitin' on de stamp an' order nawstrum customers.

"I gets de first suit I ever had dat was built for me shape, some shirts wit de cuffs welded on, t'ree scarf pins for a dollar, an' de oder necessary calico an' hardware. I t'inks I'm under de eiderdown for fair, but I'm only playin' a mud-skate on a flusty day.

"Yuh see, it's dis way: When I'm porterin', de swell patrons aint nuttin' to me but scenery, an' dey don't pay no more 'tention to me den if I was a blind cat, but when I becomes part of the landscape, it's me to be bottle holder, an' rub against de swells like I'm towelin' one of dem for de champeenship.

"In de oder shops where I done porterin', de folks on de buy was mostly just plain human. Most of dem had to woik harder to get de paper goods den dey did to spend it, an' dey treats us folks in de drug stores like we is of de same kawkashun race as dereselves. But as soon as I gets to pushin' me resemblance around among de swells, I has to look in de glass to see if I aint turned into a chocolate baby, 'cause dese boobs treats me like I'm a tar one. Dat gets me nanny, an' I'm close to buttin' one senator's son-of-a-gun in de hazelnut, when de boss puts de soft halter on me, an' leads me into de back room for a bit of coachin.' De whole of dat talk amounts to just dis: We all got to bend our slats, an' do de joss act to de swells 'cause it's 'business policy,' as de boss calls it. I'm dere yet an' I'm goin' to stick to de boss 'till de Socialists swipes de sudden rich or I loses me affability an' busts one of de swells in de smeller.

"But I tell you what it is, me fren, dem weepers what wants to trade de workin' folks patronage for a swell trade, is askin' for the thoid degree for life—an' de woozy wigwam for a finish. Some nights when we closes up de store, de whole staff an' all de privates goes back in de wash room an' chews holes in de towels. If we went out on de street witout doin' dat, like as not we'd blow off de valves in public an' do matricide, paracide an' arson.

"Dese swells don't know what dey want or dey want sumtin' yuh aint got. Yuh pull out de whole stock, dey mauls it all over, an' den says dey wants it like dey seen in Roosia or Vienna t'ree years ago. Dey don't know nuttin' about it except dat it come in a green box wit a pink label, an' dey tinks its funny yuh don't know what it is.

"Dey has everyt'ing delivered, from a powder shammy to a bunion shield, an' den, after keepin' de boy waitin' for an hour, dey sends back de goods an' says dey has changed dere minds. How folks can change sometin' dey aint got, gets me buzzer goin'."

"But they pay high prices," I remarked.

"T'ell dey does! Missis Millionaire, wit a five hundred dollar flesh reducin' corset, will scrap more to jew yuh down a cent, den a hod-carrier's wife will to get a dime knocked off. Gwendoline Guckins, age nineteen, but wit a concrete mug an' a champagne eye like yuh see at Jack's, will kick like an insurgent about de price on bromo—an' den have everyting 'Chawged to pawpaw.' Bobby Whaterbilk, aged t'irty-eight, an' still finishin' his eddycation, will sample all yer face creams an' den keep one box, an' have it 'chawged to fathuh.' Everyt'ing is 'chawged,' an' geewhing! de t'ings stay 'chawged' for ten years. Dem folks wit money is like a dog wit fleas, dey didn't do nuttin' to get it, but dey'll scratch to keep it.

"Dem swells has got more charged on de books den dere is in de store, an' collections, gee! dem grains of puffed rice is insulted if yuh sends dem a statement. Dey goes off to Europe for a year an' forgets all about dere debts. De boss says he's just gotter wait 'till dey gets ready to square up or he'll give dem de hot flush an' lose dere trade.

"Naw! dey aint nuttin' in dis swell drug joint play. De bo what's doin' de cush biz in a corner store in de cottage ward or near to six-room-an'-bath row aint got no call for workin' de toe motion.

"Yuh can guy 'bout de wash-lady, an' de sales-lady, an' de gent of de ate ward social club; but dere's more real manners an' honesty 'mong de folks wit de red han's an' seven-ninety-eight togs den dere is among dem swell bubble brains dat goes to de divorce court more often den dey goes to mass.

"Yuh tell dem flossy ones what is weepin' for a swell joint dat Chick says to stop dere fool kiddin 'wit dereselves an' keep on livin' an' doin' business in Satisfaction street—stidder dropin' dere self respeck an' dough balls in Peacock av'noo."

A Good Disinfectant For Twins.

Dr. Charles Page, at a dinner in Boston, adverted to his recent attack on the overnumerous operations for appendicitis.

"Too many of these operations are the result of fad," said Dr. Page. "They are as useless and a million times more harmful than the operation that a new resident of Gloucester performed the other day.

"This chap moved into a dilapidated cottage near the beach, and set to work at once to whitewash it inside and out. While he was swinging the wet brush on the exterior a passerby said approvingly:

"'I'm glad to see you making this old place so neat and smart. It's been an eyesore to the neighborhood for years.'

"'It ain't nothin' to me about eyesores,' was the reply. 'The reason why I'm whitewashing is because the last couple wot lived here had twins twice. I understand lime's a good disinfectant. Ye see, we've got ten children already.'"—*Louisville Times.*

Apt to Get Squashed.

"Professor, is kissing at all dangerous?"

"Only to any germs that are silly enough to hang around on the girl's lip."—*Louisville Courier-Journal.*

Influence of Washingtonians on the Revision of the United States Pharmacopoeia

By Martin I. Wilbert, Ph.M., Division of Pharmacology, Hygienic Laboratory, Washington, D.C.

The fact that all of the executive officers of the United States Pharmacopœial Convention and not an inconsiderable number of the newly elected committee of revision are residents of the City of Washington, when compared with the comparative scarcity of local office holders in the convention immediately preceding, would appear to indicate that the resident members of the Pharmacopœial Convention have been aroused to an appreciation of their responsibility and are taking a more active interest in pharmacopœial revision and in the conduct of the affairs of the convention that is directly responsible for it.

It is not generally understood that nominally, at least, "The United States Pharmacopœial Convention," is a local association, incorporated under the laws enacted for the District of Columbia, which require that the majority of the incorporators be residents of said District. This fact is, however, clearly set forth in that portion of the abstract of the proceedings of the National Convention of 1900 for Revising the Pharmacopœia which records the incorporation of the Pharmacopœial Convention (U.S.P. VIII, pp. xxxiv to xxxvi).

While the history of the Pharmacopœia is thoroughly familiar to every reader of that book there are many special features that appeal to us in a more direct way when we have them presented collectively in place of their being isolated in different editions of the book.

Not the least interesting of these several features is the influence that has been exerted on the Pharmacopœia by local associations or combinations, and in this connection the influence that has been exerted by delegates from the District of Columbia, on the evolution of the U.S.P., is of particular interest at this time. Washingtonians have taken an active part in the development of the U.S.P. from its very inception and the local institutions have been regularly represented in each succeeding Pharmacopœial Convention.

The local delegates have frequently been honored by election to responsible offices in connection with the Revision of the Pharmacopœia and, in the following paper, an attempt has been made to present, more or less consecutively, some outline information regarding these several officers.

The Medical Society of the District of Columbia was organized in 1817, the same year that Lyman Spalding first outlined his project for the formation of a National Pharmacopœia. The recently published history of this society points out that:

"The relations of the Medical Society to National and International societies have been many and important. One reason for this is the fact that Washington is so frequently selected as the place of meeting of these societies. As early as April, 1819, soon after its incorporation, a delegation from the society was selected to a 'Convention of the Middle States' that met in Philadelphia, June 1 of that year to frame and publish an 'American Pharmacopœia.' Drs. Shaaf, Sim and Huntt were the delegates."

John Thomas Shaaf, one of the delegates originally selected to attend the district convention for the Middle States, held in Philadelphia, June 1, 1819, was a licentiate of the Medical and Chirurgical Faculty of Maryland, and one of the incorporators of the Medical Society of the District of Columbia. He was born in Frederick County, Maryland, in 1763 and died April 28, 1819.

Thomas Sim, another one of the announced delegates, was born in Frederick County, Maryland, in 1770 and moved to Washington about 1810. Died of epidemic cholera, September 13, 1832, while president of the Medical Society of the District of Columbia.

Henry Huntt, the third delegate to the district convention, was evidently present and was elected one of the delegates to the first National Medical Convention held in the Capitol at Washington, January 1, 1838. He was born in Maryland in 1782, was a licentiate of Medical and Chirurgical Faculty of Maryland, formerly M.D., 1824, of the University of Maryland and took an active part in the founding of the local medical society. He died September 21, 1838.

Thomas Henderson, the secretary of the National Medical Convention and a member of the Committee of Revision in 1830, was born in Dumfries, Va., January 6, 1780, graduated from the University of Pennsylvania in 1800 and died August 11, 1874.

Nicholas William Worthington, a member of Committee of Revision in 1830 and secretary of the National Medical Convention in 1840, was born in what is now the District of Columbia, in 1789, graduated from the University of Pennsylvania in 1815 and died in 1849.

Thomas Sewall, a member of the Committee of Revision, 1840, was born in Augusta, Me., April 16, 1786. He graduated from Harvard in 1812 and came to Washington about 1820. For many years he was affiliated with the medical department of Columbian College and was one of its founders. He died April 10, 1845.

Harvey Lindsly, assistant secretary of the Convention in 1840 and secretary in 1850, was born in Morris County, N. J., January 11, 1804. He was a graduate of the medical department of Columbian College, 1828, and occupied a professorship in that institution from 1839 to 1846. He was president of the American Medical Association in 1850 and died April 28, 1889.

Joshua Riley, a member of the Committee of Revision in 1850, was born in Baltimore, Md., January 19, 1800, and died February 11, 1875. He came to Georgetown, D. C., when 18 years old and served for some time as a drug clerk. Later studied medicine, graduated from the University of Maryland in 1824 and was professor of materia medica in the medical department of Columbian College from 1844 to 1849.

Thomas Miller, secretary of the National Medical Convention in 1860 and vice-president of the Convention in 1870, was born in Port Royal, Va., February 18, 1806. He studied medicine with Dr. Henry Huntt and graduated from the University of Pennsylvania in 1829. He was professor of anatomy in the medical department of Columbian College from 1839 to 1859. Died September 20, 1873.

John Campbell Riley, assistant secretary of the National Medical Convention in 1860, and secretary in 1870, son of Dr. Joshua Riley, was born December 15, 1825. He was graduated from the medical department of Columbian College in 1851, and succeeded his father in the chair of materia medica in 1859. He died February 22, 1879.

James Ethelbert Morgan, assistant secretary of the National Convention for Revising the Pharmacopœia, held at Washington, 1870, was born in St. Mary's County, Md., September 25, 1822, and died June 2, 1889. He graduated from the medical department of Columbian College in 1845, and served as demonstrator of anatomy for several years. In 1858 he was appointed professor of materia medica in Georgetown Medical School, a position he held until 1876.

As the sole surviving officer of the Convention of 1870, Dr. James E. Morgan issued the call for the sixth decennial National Convention for Revising the Pharmacopœia, and at 12 m. on May 5, 1880, called the meeting to order. On motion he was elected temporary chairman and Dr. D. W. Prentiss, of Washington, temporary secretary.

Daniel Webster Prentiss, a delegate from the National Medical College, in addition to serving as secretary at the organization of the Convention in 1880, was elected second vice-president in 1890. From 1879 to 1889 he was professor of materia medica and therapeutics in the National Medical College, the medical department of Columbian University. He was born May 21, 1843, and died November 10, 1899.

Samuel Clagett Busey, elected first vice-president of the Convention in 1880, took a prominent part in the medical annals of the District of Columbia. He was born in Montgomery County, Md., July 23, 1828, and graduated from the medical department of the University of Pennsylvania. He died February 12, 1901.

Carl Hermann Anton Kleinschmidt, elected assistant secretary to the Convention in 1880, was a Civil War veteran, and for some years professor of physiology in Georgetown Medical School. He was born in Petershagan, Prussia, October 12, 1839, and died May 20, 1905.

It was at this sixth decennial Convention for Revising the U.S.P. that the local pharmacists were represented, for the first time, by delegates from the National College of Pharmacy. This delegation included W. S. Thompson, who was perhaps more closely, certainly longer, affiliated with the National Convention in different capacities, than any one of the other local men.

William Scott Thompson was elected a member of the

Members of Travelers' Auxiliary of the New York Ph.A. at Saratoga.

Committee of Revision and Publication of the Pharmacopœia of the United States of America in 1880, was elected vice-president of the Convention in 1890 and chairman of the then newly created board of trustees in 1900. Mr. Thompson was born in Frederick County, Md., February 14, 1838, and died in Washington September 26, 1901. He was one of the originators and founders of the National College of Pharmacy, was a prominent member of the Pharmaceutical Association of the District of Columbia and also of the American Pharmaceutical Association. He was well known to and highly respected by delegates to previous conventions and no one man was missed to quite the same degree, by the older men at least, as William Scott Thompson, whose wide knowledge of men and affairs made his counsel and advice especially valuable.

As intimated in the initial paragraph the United States Pharmacopœial Convention held at Washington did not select many of its officers from the resident membership. In addition to Mr. William S. Thompson, who served as Chairman of the Board of Trustees, the only other local officers were the treasurer and the assistant secretary.

For treasurer Dr. William M. Mew was elected by the convention and on his death the electors selected Dr. G. Wythe Cook to succeed him. Dr. Murray Galt Motter was elected to serve as assistant secretary of the Convention and subsequently he was also selected to act as secretary to the Board of Trustees. His work in the latter capacity will no doubt be appreciated by the future historian of American medico-pharmaceutical affairs when it comes to his recording the history of the eighth decennial revision of the Pharmacopœia of the United States.

At the recently held ninth decennial convention for revising the Pharmacopœia all of the local organizations and departments previously eligible to membership were represented and in addition the U. S. Department of Agriculture was represented by a full complement of three delegates.

Taking a retrospect of the brief outlines herewith presented it is interesting to note that, with perhaps one single exception, no city has been more regularly or more numerously represented in the several National Conventions for Revising the Pharmacopœia and that few sections of the country can compare favorably with Washington in regard to the amount of practical work that has been done.

Of the general officers of the Convention, six of the nine secretaries and seven of the eight assistant secretaries have been residents of the District of Columbia, as have been three vice-presidents, one second vice-president, one third vice-president, and one president. All of the treasurers have been local men and, including the representatives of the United States Government Services, no less than seventeen of the members of the several Committees of Revision have been selected from the resident delegates. Of the representatives of the Government services it is interesting to note that while the several medical services have been represented in all of the conventions for revising the Pharmacopœia it was not until 1870 that they were actively represented on the Committee of Revision. In that year W. S. W. Ruschenberger was elected to represent the "U. S. Army and Navy." Ten years later three Government delegates were elected to assist in revising the Pharmacopœia: David L. Huntington, U. S. Army; Benjamin L. Gibbs, U. S. Navy, and Oscar Oldberg, U.S. Marine-Hospital Service. In 1890, William M. Mew, U.S. Army; James M. Flint, U.S. Navy, and John Godfrey, U.S. Marine-Hospital Service, were elected as members of the Committee of Revision.

While no corresponding selection was made by the United States Pharmacopœial Convention held in 1900, no less than six of the present committee of revision represent government services. As noted above the local men are also well represented as the responsible officers of the convention and a majority at least of the local incorporators are still alive to take an active interest in the conduct of its affairs.

With the increased interest that is being taken in the affairs of the Pharmacopœia of the United States and the growing importance of this book as a representative standard for reliable medicaments, the active part taken by the local members of the Pharmacopœial Convention is destined to be of ever increasing importance and for the continuation of the book along the lines on which it was founded it is to be hoped that the work of the present and of future official representatives from the Capital city will be as commendable as was that of the men who in the decades that have passed assisted in perpetuating the ideals of the founders of our Pharmacopœia.

A Practical Aspect of Standards.*

By L. F. Kebler, Ph.C., M.D., Washington, D.C.

IT has been my duty for the past fifteen years to pass judgement on medicinal agents of various forms, first as analytical and manufacturing chemist of a pharmaceutical manufacturing house and later as Chief of the Drug Division of the Bureau of Chemistry, and during this time I have had many internal struggles with myself between the goods as actually met with in commerce and the prescribed standards which are in many instances ideal but often impracticable. This condition can of course never be completely rectified, but I am sure it can be materially improved upon. Some of these academic standards, as they are called by the trade, have been enacted into law and the responsibilities and difficulties have at the same time been accentuated. The above remarks are applicable more particularly to plant drugs, whole and powdered. In order to clearly set forth the situation, I shall cite a number of concrete representative examples.

The United States Pharmacopoeia, 8th revision, designates buchu as "The dried leaves of Barosma betulina," which statement is followed by a description of ideal leaves. It is a well known fact that the article in commerce always contains greater or smaller quantities of foreign material, such as stems, twigs, old worthless leaves, etc., derived from the plant from which the leaves are gathered. These substances are incidentally introduced at the time of collection. The medicinal value of the leaves is naturally reduced or modified

* Read at the A.Ph.A. Meeting at Richmond, Va.

to the official leaf and occasionally a few entirely unrelated leaves are found. It will be noted that the impurities referred to above are either approximately inert or possess medicinal properties similar to the official leaf itself. No provision is made by the legal standards for the presence of any of these foreign substances, yet it is impossible to meet with a trade sample absolutely free from contamination of the above character, and the question naturally arises how literally shall the standards be interpreted. This is a problem we are confronted with almost daily in our work and those who are conversant with the situation, can readily understand the difficulties. The Food and Drugs Act is a criminal statute and the courts construe such laws literally. If the position should be taken that all buchu leaves must literally conform with the standard laid down in the Pharmacopoeia, the supply would be reduced to a very low ebb indeed and the price enhanced to a prohibitive basis. A rigid adherence to the standard is manifestly impossible. In such an event importers, dealers and manufacturers would be up in arms and properly so. The next question confronting us is how much of these foreign substances indicated above, should be permitted? Shall it be five per cent, ten per cent, more or less? We must of course be guided by the nature of the impurities to a certain extent and for that reason no definite upper limit of the foreign material of the character indicated has been set. A tentative upper limit of ten per cent has served as a guide. It is believed that the Pharmacopoeia should introduce a definite maximum upper limit of impurities of this character, thus giving the trade a working basis and at the same time remove the onus, censure and criticism from the individual. The chief objection to fixing an upper limit in cases of this character is the fact that certain producers and dealers instead of making an effort to reduce the amount of foreign matter to a minimum, make a studied effort to leave present the maximum amount of such material permissible.

Let us now turn our attention to cubeb berries, another crude drug recognized by the Pharmacopoeia. The standard requires this product to consist of "The dried unripe, but fully grown, fruit of Piper Cubeba," which is followed by a definite description of the size and character of the fruit. A careful study of this standard by any one familiar with trade conditions, can readily see that it is vulnerable in several particular points. For example, it limits the character of the fruit to the unripe but fully grown product. In the second place no provision is made for any foreign material such as stems, twigs, etc., naturally introduced during collection. It is well known that almost all consignments contain fruit which is neither fully grown nor sound in every particular. The question confronting us here again, shall the standard laid down in the Pharmacopoeia be adhered to strictly and if not, what latitude is permissible? Would it be safe to permit the presence of five per cent, or ten per cent, of the sum total of fully matured berries, undeveloped berries, stems or twigs? Could such a product be safely used in preparing the various medicinal agents of which cubeb berries represent the sole constituent or a material part? In some instances the amount of foreign material comes well within the five per cent limit, but in other instances it exceeds even fifteen per cent. A tentative upper limit of ten per cent is serving as a working basis. All this difficulty could readily be eliminated by including in the standard a definite upper limit of foreign material of this character.

In the case of belladonna root, additional problems confront us. This commodity is frequently found adulterated with material which undoubtedly has a tendency to materially influence its therapeutic action as well as that of the finished product made from it. [illegible] belladonna root and is frequently mixed with such foreign agents as poke root, scopola root, etc. In the early part of our work that adulterant in a few cases exceeded seventy-five [illegible] of course readily detected at the [illegible] examination, but it [illegible] to permit the presence of any foreign material of this character? If the foreign material possess medicinal properties which would in any way influence the primary action of belladonna root [illegible] the presence should be readily forbidden. It is true as contended, many of these roots are [illegible] and the introduction of small quantities of foreign roots similar physically to belladonna root is naturally to be expected. This undoubtedly deserves consideration, but experience shows that if such sophisticated goods are denied admission into the United States, ways and means appear to be found to eliminate the foreign material. It would seem, therefore, that in cases of this character the proper course to pursue is rigid exclusion.

No product has probably presented more difficulties than saffron. No standard for this product exists in the present edition of the Pharmacopoeia, but in section 7 of the Food and Drugs Act, part 2, it is stated in substance that "if an article falls below the professed standard of strength, quality or purity under which it is sold, it is an adulteration." This is construed to mean, for example, that if an article is sold under the name saffron it must comply in quality, purity and strength to a good grade of saffron and if there is a standard which can be utilized as is the case with saffron, the use of such standard is perfectly proper. On referring to the 7th edition of the U.S. Pharmacopoeia it will be found that saffron is described as "The stigmas of Crocus Sativus." This is further supplemented by a description of the article and with certain chemical and physical tests. On account of the character of the article and the price of the same, it is but natural to encounter difficulties. It is well known that saffron has been most liberally adulterated in the past with various substances, such as artificially dyed ligulate florets of Calendula officinalis, tubular florets of carthamus, yellow filaments obtained from the saffron plant itself, inorganic material such as calcium carbonate, calcium sulphate, barium sulphate, potassium nitrate, etc. Definite limitations are made relative to the amount of moisture and foreign inorganic material that may be present. The yellow plant tissue, etc., can readily be restricted to the styles derived from the saffron flower itself, but the permissible amount is a fruitful source of contention, in that no definite information is available on the subject. For a time saffron containing a goodly portion of this yellow material was permitted entry with the result that numerous complaints were received to the effect that if the admission of adulterated saffron were continued, parties engaged in the handling of the pure product would be driven out of business. An examination of saffron available in the American market at the time of these complaints showed that the complaints were not well founded. It however prominently brought up the question as to the maximum amount of the yellow material that might be permissible. Viewed from a purely monetary consideration, manipulation of saffron to the extent of 5 per cent, would be a lucrative business. An investigation soon showed that such a limit would be too stringent, but it was found, however, that a good grade saffron was available which did not contain to exceed 10 per cent of such material. This is the basis of action at present, but numerous complaints are received to the effect that this standard is still too rigid for existing commercial conditions.

In the above I think I have clearly set forth the conditions obtaining and difficulties encountered relative to standards in vogue for certain commodities. I think it is furthermore clearly evident that it is incumbent on those who are charged with providing these standards to include in the same, definite information as to the amount of certain foreign substances that should or should not be permitted to be present.

An Important Meeting at St. Petersburg.

The Fifth International Congress of Obstetrics and Gynaecology, which occurs at St. Petersburg, Russia, in September, will be held at the Imperial Institute of Midwifery and Gynaecology, 3 University line, Vasilievsky Ostroff. A feature is an exhibition to which the committee is inviting exhibits from all parts of the world. Exhibits should be delivered at their destination not later than September 1, addressed as follows: "For the Exhibition in connection with the Fifth International Congress of Obstetrics and Gynaecology, 3 University line, Vasilievsky Ostroff, St. Petersburg." In addition to [illegible] suggested by the title, there will be exhibits of pharmaceutical preparations.

Short Hours For Doing Business on Sundays.

All of the six drug stores in Concord, N. C., will be open hereafter only between 8 and 10:30 a. m. and 3 to 6 p. m. on Sundays, the proprietors having signed an agreement.

Pennsylvania Will be Next to Have a New State Pharmacy Law.

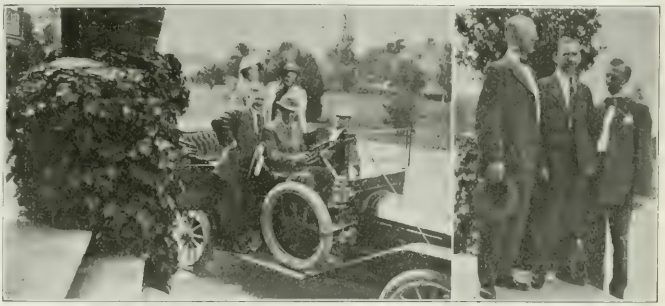
Association Favors More Stringent Anti-Narcotic Legislation—Remains Affiliated With N.A.R.D., but Reduces Representation—Important Topics Discussed.

Buena Vista Springs, July 20.—The endorsement of proposed laws, comprising important changes in the existing pharmacy law of the State and a new anti-narcotic law, intended to throw additional restrictions around the sale as well as the use of habit-forming drugs, were, from a general standpoint, the most important features of the thirty-second annual meeting of the Pennsylvania Pharmaceutical Association recently held here. The recommendation of the retiring president, John C. Wallace, that the association continue its affiliation with the National Association of Retail Druggists, but reducing the representation from six to two delegates, viewed in the light of a compromise, was adopted without opposition from either of the strong factions on that issue in the State. It was this issue which had brought a large delegation from Philadelphia, where the P.A.R.D., early in the present year, had withdrawn from the national body, determined to combat any attempt that might be made to offset this course by strengthening the bonds between the State and the national organizations. But Mr. Wallace, himself a member of the Western Pennsylvania Retail Druggists' Association which had renewed its affiliation with the N.A.R.D., showed his diplomacy in the handling of an issue which was predicted was likely to create a break in the ranks of the State body, by recommending continued affiliation, but one which means the paying into the national treasury of $25.25 instead of $125.25 as was done last year. The association is therefore entitled to one delegate for every $25 or fraction thereof paid into the national treasury.

Of almost equal importance was the election of officers and particularly in the choosing of a president. But in the election of Prof. Charles H. LaWall, it is believed that the body has a man committed to none of the policies on which so many of the retailers are at difference.

The attendance has scarcely been excelled in the history of the association, the number of new members elected reflected a growth of interest in the association. Maryland, Ohio, New Jersey and Delaware delegates conveyed the well wishes of those State organizations. The report of Treasurer Joseph L. Lemberger of Lebanon showed a balance of $629.00 and the number of members 906, while he also called attention to the elimination of those members who by reason of non-payment of dues, had been dropped from the roll. Secretary Edgar F. Heffner of Lock Haven, followed with a review of the most active membership campaign in the history of the association which had been conducted with the assistance of the Traveling Men's Auxiliary and the Membership Committee.

The most important action at the first day's session followed the discussion of a series of resolutions, introduced by Dr. F. E. Stewart of Philadelphia. The resolutions protested against the monopoly of the newer materia medica by commercial introducers and petitioned the American Medical Association, the A.Ph.A., the N.A.R.D., and the N.W.D.A., to co-operate in forming a strong central board of control which would have charge of the introduction of newer materia medica products. This board, it was suggested, would determine the control by patents, use of trade marks and methods of advertising, with a view to protecting inventors, advancing the interests of pharmacy and medicine and protecting the public health from the results of ignorance and greed in pharmacologic practice. The ideas were generally commended and the resolutions referred to the new Committee on Trade Marks and Patents.



Left panel: W. L. Cliffe and Mrs. Cliffe, Philadelphia, with Joseph P. Lemberger and Mrs. Lemberger, Lebanon, starting on an auto ride over the mountains. Right panel: three prominent Western Pennsylvania members: John C. Wallace, New Castle; B. E. Pritchard and Louis Saalbach, both of Pittsburg.

In left panel, ladies prominent at Pa.Ph.A. meeting, standing left to right: Mrs. Edward Wall, Mrs. W. R. Landis, Miss Hunter, Philadelphia; Mrs. L. L. Walton, Williamsport; seated: Mrs. Theodore Drake, Mrs. J. D. McFerren and Mrs. Charles Leedom (on ground), Philadelphia. Right panel, on left: J. P. Lemberger, re-elected treasurer of the association and on right, J. C. Wallace, retiring president, whose administration of that office during the year was notable for efficient and successful service.

Contrary to expectations, the political complications were not referred to by Thomas H. Potts, secretary of the N.A.R.D., who addressed the meeting. He discussed conditions from a broad standpoint which he said showed improvement among pharmacists, particularly on the price-cutting evil. According to Mr. Potts, remarkable have been the propaganda achievements during the past year and a half, principally in bringing to the physicians, a realization of how they had been used by nostrum and specialty manufacturers and of the dangers of self-dispensing. Reference was also made to the short-comings of those druggists who while soliciting prescription work were prone to make displays of patent medicines at ruinously low prices. Organization for the pharmacist and affiliation with local, state and national bodies were strongly endorsed by Secretary Potts.

Conditions in the past as showing the present and future needs of the pharmacist were portrayed in most in-

interesting letters to the reports of Wm. L. Cliffe, chairman of the Committee on Legislation; Richard H. Lackey, chairman of the Committee on Trade Interests; Charles E. Vanderkleed, chairman of the Committee on Adulterations; Dr. C. B. Lowe, chairman of the Procter Memorial Fund Committee; William E. Lee, chairman of the Committee on Membership and by L. L. Walton, chairman of the special committee to draft an anti-narcotic law.

The draft of the law proposed by Mr. Walton which was practically the result of his individual efforts was particularly interesting because of an address on the needs of Pennsylvania for such a law, made by Christopher Koch, of the State Pharmaceutical Examining Board, who is at present at the head of the crusade against the illegal sale of the drug, carried on in Philadelphia. The proposed law regulates the sale, prescribing and possession of opium, morphine, heroin, codeine and their salts and derivatives or any substances or preparations containing them. It makes it necessary that all morphine be sold on a physician's prescription instead of simply registering the sale as now provided.

The provisions as read by Mr. Walton were unanimously endorsed and in this connection resolutions were enthusiastically passed, commending Governor Stuart, Mayor Reyburn of Philadelphia, Samuel M. Clement, Jr., the board's attorney and the police department of Philadelphia for the assistance they had lent the board in the prosecution of the guilty ones and in breaking up of the practice.

A special order of business was the holding of a service in memory of the late Mahlon N. Kline, a former president of the association, who for years had been a prominent figure at the State meetings. Joseph P. Remington, John C. Wallace, Joseph L. Lemberger, Dr. A. W. Miller, D. E. Bransome, Dr. C. B. Lowe, William L. Cliffe and others spoke feelingly of their association with Mr. Kline and most affecting was the singing by Mrs. Howard E. Smith of Philadelphia of "Crossing the Bar," always one of Mr. Kline's favorites.

The principles of the proposed pharmacy law as suggested by Chairman Cliffe of the Legislative Committee as finally adopted increase the per diem remuneration of the board from $5 to $10 a day; confer the right to revoke or refuse a license to practice pharmacy if the applicant is proven to be addicted to the use of drugs or stimulants to a dangerous degree, or if he or she is mentally or physically incapable or if the applicant has been convicted the second time for any statute regulating the practice of pharmacy. The proposed law also provides for the annual registration of all stores and permits that only in communities of less than 1000 inhabitants that do not have a drug store within three miles may a physician compound medicines, fill prescriptions and sell poisons. It was endorsed in amended form and referred to the Legislative Committee and the State Board to incorporate the ideas endorsed for presentation to the coming session this winter of the State Legislature.

Election of officers resulted as follows: President, Charles H. LaWall, Philadelphia; vice-presidents P. Henry Utech, Meadeville, Charles F. Kramer, Harrisburg; secretary, Edgar F. Heffner, Lock Haven; treasurer, Joseph L. Lemberger, Lebanon; executive committee, Louis Saalbach, Pittsburg, chairman; William A. Carpenter, Philadelphia, and P. W. Snyder, Holidaysburg. Recommendations approved provided for the employment of J. H. Barlow of Philadelphia for two months in an effort to collect outstanding dues and secure new members; that Treasurer Lemberger prepare a history of the association; the appointment of a committee to confer with the Traveling Men's Auxiliary to define more conclusively the relations between the two organizations. Other recommendations which received favorable action were those reaffiliating with the N.A.R.D., and the introduction of the bills already described into the Legislature.

Additional resolutions acted upon in the affirmative called upon the physicians of the State to co-operate with the pharmacists in securing the passage of the proposed pharmacy laws and promising the support of the latter in the interests of any medical bills which had as their object matters of public [illegible] against Emil Graff a druggist of Philadelphia, already convicted of selling cocaine illegally; concurring in a resolution of the W.O.N.A.R.D., denouncing the circulation of obscene advertising matter, relating to medical subjects, in drug stores. Bedford Springs was selected as the place of meeting in 1911 and the dates agreed upon were June 20, 21 and 22.

At the closing session a stir was occasioned as the result of a denunciation by Joseph P. Remington of Philadelphia, of the campaigns of abuse which he declared had been so prevalent in pharmaceutical circles during the past few months. None of them, he said, had or would accomplish anything and he advised that they be discontinued. In the course of this address, he mentioned an incident of his recent western trip when at St. Louis he refused an invitation to visit the car of the American Druggists" Syndicate, explaining that he could not afford in his position to take the chance of such a visit being used for advertising purposes.

While the variety of entertainment was very great, the particular bright feature was "Graduation Day Exercises of Miss Matilda's School." Mrs. David McMurtrie of Altoona both in make-up and manner portrayed the country school mistress to the letter. Leaders in the fun-making were C. H. LaWall, Charles Leedom, W. A. Carpenter, Richard H. Lackey, Charles Rehfuss, Howard E. Smith, Frank K. Cope, D. E. Bransome, H. C. Byers, Edward Bransome, B. E. Pritchard, E. T. Hahn, Frank W. Smith, F. P. Stroup and Edward Weaver; while the demure little maidens, before they went on the stage, were Miss Ethel Bransome, Mrs. W. A. Carpenter, Mrs. Charles Leedom, Mrs. Charles Rehfuss, Miss Hunter, Mrs. W. E. Lee, Mrs. L. L. Walton, Mrs. C. M. Pletcher, Mrs. F. K. Cope, Mrs. F. W. Smith, Mrs. Howard E. Smith, Miss Strong, Mrs. John C. Wallace and Mrs. C. H. LaWall. Mrs. McMurtrie was not only the originator of the clever sketch but trained the participants; but she was taken completely by surprise when as the final act of her obstreperous pupils, D. E. Bransome presented to her on behalf of the school, a handsome cut glass water service. She acknowledged the gift in her usual graceful manner. Other features were musical solos, a picnic to Lake Royer, dancing, card parties for the ladies, and a variety of guessing contests in all of which there was a large field of entries. Following the close of the meeting, the majority participated in an excursion to historic Gettysburg and were driven over the famous battlefield.

As usual, the traveling men were much in evidence at the meeting, participating in the various events and in every way contributing to the enjoyment of the association members both as individuals and as members of the Traveling Men's Auxiliary. At the annual meeting of the auxiliary the following officers were elected: President, David McMurtrie, Altoona; vice-president, A. Lincoln Wolcott, Philadelphia; secretary, Edward T. Hahn, Philadelphia; treasurer, Jeremiah D. McFerren, Philadelphia.

CONN. STATE EXPERIMENT STATION ATTACKED.

President P. J. Garvin, of Ph.A., Says Method of Getting Samples Allows No Protection.

NEW HAVEN, July 20.—The 34th annual meeting of the Connecticut State Pharmaceutical Association recently called to order at the Shoreham, Morris Cove, by President P. J. Garvin, of Bethel, was attended by a large proportion of the druggists of the State. In his annual address, Mr. Garvin created a sensation by criticising the State Agricultural Experiment Station for the method employed in taking samples from druggists. Each sample is bought by the proper deputy, unknown to the druggist, and the first knowledge the latter receives of such action comes in a report that his drugs are not up to standard. Mr. Garvin considered that the druggist had no protection. He also took exception to the definition of camphorated oil and camphorated liniment adopted by the station officials. In the subsequent discussion, several pharmacists expressed the opinion that the station was doing good work, protecting both the druggist and the public.

Mr. Garvin also recommended that legislation be secured requiring the dispensing physician to become a registered pharmacist, and preventing proprietors of patent medicines from advertising by circulars distributed from house to house.

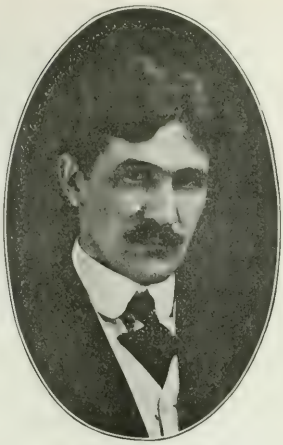
Greetings were received from delegates present representing the N.A.R.D., the N.W.D.A., the New York State Ph.A. and the Massachusetts State Ph.A. It was voted to continue the association's affiliation with the N.A.R.D. and to send delegates to the National body's convention.

A demonstration assaying difficult drugs was given by Martin Meyer, of Bridgeport.

The following officers were elected:

President, C. G. Spaulding, New Haven; first vice-president, H. M. Le Roy, Norwich, second vice president, A. E. Lathroup, Simsbury; secretary, J. B. Ebbs, Waterbury, and treasurer, K. O. Cyrus, Bridgeport.

CHAS. H. LaWALL, Philadelphia, elected president of Pennsylvania State Pharmaceutical Asso.



P. HENRY UTECH, Meadville, elected first vice-president Pennsylvania State Ph.A.

CHAS. F. KRAMER, Harrisburg, elected second vice-president Pennsylvania State Ph.A.

Massachussetts Ph.A. Asks Representation for Pharmacy on State Board of Health

BOSTON, July 20.—The 29th annual convention of the Massachusetts State Pharmaceutical Association came to an end with a gorgeous display of fireworks in front of the convention headquarters, the new Ocean house at Swampscott. Although accompanied by torrid weather, the convention was a signal success in point of attendance, nearly 1400 members registering, a record breaker at a Massachusetts convention. The association for the second time in its history departed from the custom of choosing a new president each year, and honored President James F. Finneran, of Boston, with a unanimous re-election.

Addresses of welcome were made by Selectman C. V. Huntley, of Swampscott, and Councilman Arthur E. Santry, of Lynn, who represented Mayor Rich. President Finneran responded. Among the president's recommendations, which were approved, was that the convention continue the custom of presenting three names to the governor with the request that he select one for the State Board of Pharmacy; that the scholarship at the Massachusetts College of Pharmacy be continued; that the association request the governor to appoint a registered pharmacist on the State Board of Health in order to get a better administration of the drug and poison laws; and to instruct the legislative committee to frame an amendment to the existing law relating to the guarantee of druggists in Massachusetts.

The report of Thomas B. Nichols, the treasurer, showed a balance of cash on hand of $1200. William F. Sawyer presented the report of the trustees of permanent funds, showing assets of $1687. Both reports were greeted with applause. The association voted to apply for membership in the Massachusetts State Board of Trade.

The association went on record, at the request of the W.O.B.A.R.D., as favoring the suppression of certain advertising of nostrums which were declared to be "harmful and immoral."

The names of William H. Glover of Lawrence; Albert H. Brunelle of Fall River, and Frank J. Campbell of Lowell, will be presented to Gov. Draper for the State Board of Pharmacy. The names of John K. Larrabee of Melrose; Charles F. Nixon of Leominster, and Charles F. Ripley of Taunton, three of the best known pharmacists in the State, will be presented to Gov. Draper for the State Board of Health membership.

The election of officers resulted as follows:

James F. Finneran, of Boston, president; H. A. Barnard, of Marlboro, first vice-president; Donald M. Foster, of Lynn, second vice-president; Axro M. Dows, of Lowell, third vice-president; James F. Guerin, of Salem, permanent secretary; Thomas B. Nichols of Salem, treasurer. William F. Sawyer, of Boston, George L. Roskell of Boston, and F. E. Mole of Adams, were elected trustees of the permanent funds.

The social activities exceeded the elaborate preparations of other years, although largely along the same lines. The Traveling Men's Auxiliary; the Woman's organization of the B.A.R.D. and the entertainment committee of the pharmaceutical association, vied with each other in a friendly spirit to make the occasion the greatest in the history of the association. There was something doing every minute, and the splendid weather, notwithstanding the high temperature, made the site of the convention extremely attractive. Whist on the broad piazzas, during the business sessions, with automobile rides by the hundred, kept the ladies pleasantly occupied every day.

On the opening night the traveling men's auxiliary had the right of way and they provided a miscellaneous program and a Dutch supper which was partaken of by 800. The show was given in the hotel garage, and included a one-act play entitled "The Kleptomaniac," which was presented under the direction of Mrs. Jessie F. Waterhouse of Boston. It was a repetition of the surprise presented a few months ago by the W.O.B.A.R.D. Participating in the comedy were Mrs. Frances LaPierre Hayes, Mrs. Lilla Connolly, Mrs. Winifred Bell Woodrow, Mrs. Martha Morey, Dr. Charlotte Farrington, Mrs. Blanche Edwards, and Miss Sally LaPierre. The evening's entertainment was a huge success, and due to the energies of the following committee: J. A. Baader, of Everett and M. E. Murray, of Boston.

At the annual banquet President Finneran was toastmaster, and the speakers included Hon. Charles H. Innes, of Boston, Representative Thomas W. White, of Newton, Ernest O. Engstrom, of the State Board of Pharmacy, and Mrs. Roxa K. Stover, of Cambridge, president of the W.O.B.A.R.D.

The traveling men elected the following officers:

Fred P. Wright, of Boston, president; D. E. Lochman, of Salem, vice-president; Charles H. Thompson, of Somerville, secretary; William H. Henderson, of Malden, treasurer; Milton E. Murray, of Boston, J. A. Baader, of Everett, C. E. M. Harrington, of Waltham, John J. Finnigan, of Providence, A. Sumner, of Wollaston and H. S. Curtis, of Salem, executive committee.

OVER 500 ATTEND CALIFORNIA PH.A. MEETING.

Election of W. R. Dickinson as President Preceded by Reading of Many Very Excellent Papers.

SAN FRANCISCO, July 20.—At the 1910 meeting of the California State Pharmaceutical Association in this city recently, President A. L. Leber presided over the 500 or more members and visitors in attendance. The address of welcome, delivered by Prof. F. T. Green, and responded to by W. B. Dickinson, of Los Angeles, was followed by the address of the

president H. J. Finger; of Santa Barbara, took the place on the program of E. T. Ott, president of the California State Board of Pharmacy, and Ralph A. Gould, government food and drug inspector, the former being delayed and the latter unable to attend. Mr. Finger spoke on "The Scope and Purpose of the Pure Drugs Act," and scientifically scouted the idea that physicians are fitted to have supervision over the manufacture and sale of drugs. He declared they were not fitted for such work either in knowledge or by training and that they ordered the arrest of people without knowing what they were about.

"The proper supervision of the pure drugs law," he said, "requires specialized knowledge such as only pharmacists possess. Druggists are specialists and for that reason the whole thing should be under the supervision of the State Board of Pharmacy." He advised his listeners to get the supervision of the pure drugs law out of the hands of the State Board of Health. Although Mr. Finger's address seemed rather radical in tone, the members nevertheless agreed with him and later adopted a resolution recommending that the State pure food and drugs law be so amended as to give the Board of Pharmacy authority over the section applying to drugs, instead of the Board of Health.

The new president was given power to appoint a committee of seven to confer with members of the Board of Pharmacy on all subjects whereby a better understanding might be had between the two bodies. At the same time the members by a large majority voted not to permit members of the board to be elected to their board of trustees. An effort to amend the constitution to that effect was defeated.

A resolution that the association officially request the legislature for an appropriation to continue the experimental station in Golden Gate park for the cultivation of medicinal plants was adopted.

A number of well-prepared and very instructive papers were read at the convention. Professor F. E. Scotford, of the University of California and manager of all the street car advertising on the Pacific coast, elaborated on the subject of "Drug Store Advertising" and illustrated his remarks by dummy window displays. Mr. Scotford explained in detail the best methods of catching the attention of the public by window dressing and newspaper advertising. Advertising by circulars and booklets, he asserted, was a waste of energy and money. From 2½ to 5 per cent. of the gross receipts of a drug store, he thought, should be expended in advertising. Without advertising, he said, the druggist must take a back seat and allow the man with a chain of stores and big advertising ideas to go ahead of him.

J. S. Pauldey, of Los Angeles, in speaking on "Interinsurance," explained a plan of operation by which the members could insure themselves and save the money to the State instead of sending it outside of its borders. The insurance commissioner in the past few years had opposed mutual insurance plans and favored the big corporations instead of protecting the people in the matter of insurance.

Miss Clarissa M. Roehr, secretary of the Alumni Association of the California College of Pharmacy, read a paper on "The Status of the Woman Pharmacist." She showed that California was the sixth state to graduate a woman pharmacist and that there are now 93 registered women pharmacists in the State, 15 per cent of whom are owners of drug stores.

G. H. P. Lichthardt city chemist of Sacramento, suggested a standard color card for the use of druggists, so that preparations would have uniform colors.

[illegible] M. E. Jaffa in charge of the pure food and drug laboratory at Berkeley, spoke on the State Board of Health's attitude toward the association, asserting that the board was willing to co-operate with the members. Speaking of the [illegible] nature were selected because they were experts, rather than [illegible]

[illegible] Burt C. Ansey, Los Angeles, opposed soda [illegible] E. C. De Pue, Sheldon School of Salesmanship, [illegible] James G. Steele, historian of the California [illegible] Pharmacy; J. T. Ott, President, "The Work of [illegible] State Board of Pharmacy"; Carl L. J. Dyas, "The Pre[illegible]"; Thomas H. Potts, secretary N.A.R.D., "The U.S.P. and N.F. Propaganda"; W. E. Murphy, secretary California Retail Druggists' Association, "Relation of Clerk to Proprietor"; [illegible] San Francisco, "Relation of Proprietor to Clerk"; R. E. Queen, Los Angeles; Ralph A. Gould, chief of food and drug inspection laboratories, "Pure Food and Drugs Act and Its Enforcement"; A. Morse, "The Pacific Pharmacist," and Dr. C. E. [illegible], "Serum Therapy."

Resolutions of respect to the memory of the late Prof. Wm. M. Searby, the first president of the association; J. R. Dunlap, Amador; G. G. Burnell, San Francisco, and W. G. Ayers, Conlinga, were adopted. The following officers were elected:

President, W. R. Dickinson, Los Angeles; first vice-president, G. H. P. Lichthardt, Sacramento; second vice-president, T. Tobriner, Oakland; secretary-treasurer, Albert Schneider, San Francisco; trustees, C. H. Ward, Pasadena; Val Schmidt, San Francisco; J. A. Hughes, Bakersfield; L. G. Blitz, Los Angeles; J. Jesson, Ontario; J. A. Sanford, Stockton; D. C. Hazelrigg, San Diego; local secretary, H. L. Kirk, Sacramento.

O. PH.A. HAS RECORD-BREAKING ATTENDANCE.

Votes to Reaffiliate With the N.A.R.D. and to Oppose the Owen Bill in Its Present Form.

CINCINNATI, July 20.—More than 800 were registered and over 100 members were present at every business session, making the last annual meeting of the Ohio State Pharmaceutical Association, held in Sandusky a record-breaker in the matter of attendance. The total membership is now 1505, 361 new members having been added during the year.

Twelve interesting papers were presented so that it was necessary to call an extra session in order to consider the many interesting reports of the various committees. The chief topics discussed were public vendors of drugs, dispensing doctors, sale of habit-forming drugs, alcohol tax, trade interests, county organization, U.S.P. and N.F. propaganda, publicity, suggestions for improvement of the U.S.P. and N.F., condition of the drug market; pharmacy, poison and cocaine laws; fire and indemnity insurance, ethical principles relating to the pharmacist and the physician, and history.

A very interesting feature of the convention was the gift to the O.S.P.A. for each succeeding president of an ivory gavel by John Weyer. Mr. Weyer when president of the association in 1885, was presented with the gavel by the Cleveland druggists.

The resignation of John Von Stein as treasurer was accepted with regret. After eighteen years of service and continual attendance to duty, he was unable to attend this convention on account of serious illness. When he took charge of the treasury, the association was considerably in debt. His successor Fred L. Fickardt receives the books in splendid condition and a balance of over $1800 in the treasury.

Resolutions adopted were to reaffiliate with the N.A.R.D.; to oppose the Owen Bill in its present form; on the death of Joseph McDonald; in hearty sympathy with the efforts of the W.O.N.A.R.D. to suppress certain objectionable advertisements; votes of thanks for President Ashbrook, McIntire and Shafer, and O.S.P.A. gold buttons to George Reiser and A. W. Kiler for membership increase.

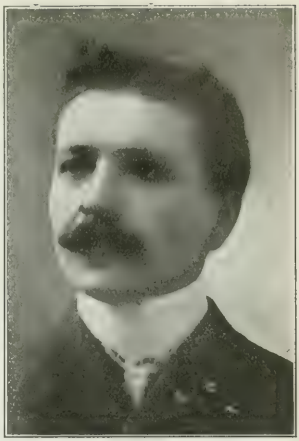
Instructions were given to the Legislative committee to draft a suitable bill making the Poison Law to come under the jurisdiction of the Board of Pharmacy, and to compel all who handle and dispense drugs to conform with the U.S.P. and N.F. standards. Delegates to the N.A.R.D. were also instructed to secure the 1911 convention for Cedar Point.

Hon. R. W. Dunlap, Food and Drug Commissioner, addressed the convention on the work done in his office in reference to the druggist.

The beautiful decorations of the booths of the exhibitors of drug preparations and toilet articles and the grotesque imported paper costumes, flags, parasols and regalia worn by [illegible] in the brilliantly lighted Convention Hall made this event look like a Mardi Gras Carnival and one long to be remembered. The Traveling Men who acted as hosts surely outdid themselves on this occasion. Officers elected were: C. S. Ashbrook, who succeeds himself as president; George Reiser, first vice-president; A. B. Price, second vice-president; F. L. Fickardt, treasurer; Theo. D. Wetterstroem, secretary, and George B. Kauffman for member of the Council.

CHARLES MORGAN, Baltimore, newly elected president Maryland State Pharmaceutical Association.

S. H. WINSTEAD, Paducah, newly elected president Kentucky State Pharmaceutical Association.



JOHN P. JELINEK, of St. Paul, elected president of Minnesota State Pharmaceutical Assc.

Maryland Ph.A. Listens to Timely Discussion on the Prevailing High Price of Drugs

Baltimore, July 20.—The annual meeting of the Maryland Pharmaceutical Association here last week attracted the largest attendance in years and was productive of important results.

John B. Thomas, the retiring president, proved to be an excellent parliamentarian. One of the most interesting topics to be taken up was that of the prevailing high prices of drugs. Dr. A. R. L. Dohme, of Sharp & Dohme, made the charge that the recent increase in price must be laid chiefly at the door of the Agricultural Department experts, who were taking advantage of the Pure Food and Drug law to construe arbitrarily its provisions, and set up higher standards even than those specified in the United States Pharmacopoeia. Dr. Dohme criticised with especial severity the officials at New York, and declared that their excessive zeal had caused exporters in Europe and other countries to look upon the United States as an undesirable market, and prompted them to advance their prices. The shipments had also been curtailed, so that the absence of competition stimulated a further rise. James E. Hancock, of J. F. Hancock & Son, also spoke, and the association had President Thomas appoint a committee consisting of R. E. Lee Williamson, Dr. Dohme, Mr. Hancock and Dr. D. M. R. Culbreth, with instructions to investigate and make a report.

The matter was taken up again two days later, when the committee was asked for a report, and Dr. Dohme stated that owing to the difficulty of getting the average person to differentiate between an effort to secure drugs at moderate prices, and an attempt to have adulterated drugs admitted into the United States the committee had decided not to make a report. Dr. Lyman F. Kebler, of the Bureau of Chemistry, Department of Agriculture, who had come over from Washington, took up the cudgel in defense of the Bureau experts. He declared that there had not been a single case of going beyond the standards of the United States Pharmacopoeia, but that in numerous instances the Pharmacopoeia gave no standards, and that the bureau was compelled to put a limit somewhere or open the door wide to the introduction of all kinds of adulterations.

The experts had found goods mixed with small stones, belladonna leaves with a great excess of stems and other foreign matter, and the question naturally arose where to put the limit. This also applied to saffron and asafoetida. What was the bureau to do, he asked, if a manufacturer who desired to put out a high grade of goods came and complained that the manufacturer of cheap goods was demoralizing the market because he could bring drugs mixed with all kinds of foreign substances into this country?

In every case where no definite limit is fixed or where absolute purity was out of the question, the bureau experts had gone below the Pharmacopoeial standards and had shown the utmost liberality of interpretation, except where wilful adulteration appeared. He asserted that in no instance was the activity of the bureau responsible for the high price of drugs, though some of them had gone up in cost.

Dr. Kebler stated that the only exceptions where standard higher than the Pharmacopoeia had been called for were with regard to importations of drugs which assayed a higher percentage of the active principle than the accepted standard. In such instances the importers were not allowed to have the importation mixed with other substances so as to bring down the standard. The milk dealer, he said, might as well ask to be allowed to put water into his milk if it happens to contain a larger percentage of butter fat than is prescribed as the minimum by the law of some States. The reduction, he said, must in every case be made when the product has been manufactured and becomes a pharmaceutical article.

To illustrate the importance of insisting upon high standards, he said that importers of asafoetida under the standard had always pleaded that the article was intended for a horse or other animal, but that justices, when such cases cames before them, invariably imposed a heavier fine than if the importation was intended for humans. Now, an emulsion of asafoetida was a valuable remedial agent in cases of infantile intestinal troubles, and he thought the Government ought to give as much protection to little children, who are unable to help themselves as to the horse or other dumb animals, for the most potent causes of mortality were intestinal disorders of children.

The Association adopted a resolution declaring its confidence in the bureau and giving assurances of co-operation in its efforts to secure pure drugs for the country.

The committee on trade interests, in a report submitted by E. W. Hodson, the chairman, set down the proposition that higher prices for drugs and medicinal preparations would be a distinct benefit to the trade. It deprecated the efforts of the cut-rate druggists to demoralize prices and expressed the belief that better prices were essential to the business, suggesting that the remedy might come through the Baltimore Retail Druggists' Association.

The annual report of the retiring president contained among other things a recommendation that the drug trade have a representative on the State Board of Health, which, as now constructed, consists of three physicians, a civil engineer and a secretary, who is a physician. The committee on president's report made a recommendation to this effect later, and a committee consisting of Dr. A. R. L. Dohme, R. E. Lee Williamson, E. F. Kelly, James E. Hancock and J. W.

Westcott was appointed to bring the matter to the attention of the proper authorities.

Dr. Charles Caspari, Jr., the commissioner to enforce the new Pure Food and Drug Law for Maryland, gave his views on how the statute ought to be put in operation.

Papers were read by Dr. A. R. L. Dohme on "The United States Pharmacopoeial Convention," by E. W. Hodson, on "Successful Salesmanship," and by Philip I. Heusler on "Vichy—Its Waters and Baths."

C. Lewis Diehl, George M. Beringer, and Dr. Joseph P. Remington were elected honorary members and Martin I. Wilbert, of the Marine Hospital Service at Washington, spoke in highly commendatory terms of the important contributions made by Maryland to the cause of Pharmacy.

Owen C. Smith, J. Fuller Frames and Franz Naylor were selected as the three men from among whom the Governor is to make his selection in filling the next vacancy in the State Board of Pharmacy.

The election of officers resulted as follows:

President, Charles Morgan; first vice-president, D. P. Schlosser; second vice-president, R. E. Lee Williamson; third vice-president, J. P. Keating; secretary, E. F. Kelly; treasurer, J. W. Westcott; executive committee, John B. Thomas, chairman; J. Emory Bond, and George C. Muth.

Mayor Mahool welcomed the visiting delegates and Dr. John F. Hancock made a fitting response. Dr. Hancock also spoke of the importance of Maryland in American Pharmacy, mentioning some noted names. He later made a plea for support in the Proctor monument movement.

The social features included a card party, an excursion down the Bay to Love Point, and a banquet at the Belvedere. Covers were laid at the banquet for about 150. J. Emory Bond, acted as toastmaster, and among the speakers were Dr. Charles Caspari, Jr., and Dr. E. F. Cordell, the latter discussing the relations between pharmacists and physicians.

S. H. WINSTEAD HEADS KENTUCKY PH.A.

Food and Drug Expert Delivers Address and Large Number of Instructive Papers are Presented.

OLYMPIAN SPRINGS, July 20.—The thirty-third annual meeting of the Kentucky State Pharmaceutical Association was called to order by President George L. Penny, of Stanford. Robert M. Allen, head of the pure food experiment station, at Lexington, delivered an address on the pure foods and drug law. The following papers were presented:

"Should the sale of opium and its derivatives be tolerated, and if not how best can it be prohibited?" C. Vade Goode, Smith Mills; "By what method can we best combat our low cost, the present policy of substitution in the drug purse?" C. Gilbert, Paducah; "Should general stores be restricted to sell patent-hold remedies and toilet articles in original packages?" O. B. Gayle, Lillington; "Comment on the new pharmacy laws passed at our last legislative session," O. B. Gayle; "What in your opinion is the best method of bettering the retail drug business? Address Johnson, Louisville and U. S. P. and N. F. propaganda: "To what extent has it been of benefit to the retail pharmacists and how can it be made of greater benefit?" S. N. Jones, Louisville.

The following officers were elected:

President, S. H. Winstead, Paducah; first vice-president, Simon N. Jones; second vice-president, George E. Wilhelmi, Newport; third vice-president, Samuel Meyer, Louisville; secretary, J. W. Gayle, Frankfort; treasurer, John T. Elam, Henderson. Committees appointed: executive chairman, C. Vade Goode, J. W. Gayle, L. D. Gilbert, R. L. Maxwell, Inspectors, C. A. Leathers, C. W. Peters, J. E. Cooper; legislative, J. M. Lang, J. W. Gayle, George E. Wilhelmi, papers and queries, W. H. Martin, Simon N. Jones, C. J. Lordier; entertainment, John C. Kriel, [illegible] T. H. Moore, [illegible] and later chaperones, Mrs. J. Perrin Pettit, F. M. Smith, Lee Meade, publication committee, Martin J. Perrin, W. B. Montgomery, delegates to A. Ph. A., Lewis Diehl, E. A. Brown, G. L. Penny, C. [illegible], Address Johnson, [illegible] and drug representative, J. W. Gayle, [illegible] to N. A. R. D., Simon N. Jones, [illegible], [illegible], [illegible] Council, National Executive, State Medical [illegible], H. K. Mulford, Lee Cooper and E. E. Hirtz, [illegible] Board of Pharmacy, [illegible], C. [illegible], H. R. Mulford, Howard Jett, W. H. Pelham, J. H. [illegible] and J. J. Reynolds. Pan-American Pharmacy Exposition, Patterson, W. H. Tibbetts, Address Johnson, L. D. Gilbert and H. A. Lentz were nominated.

A feature of the meeting was the large number of costly prizes awarded for the literary and various other contests on the program of entertainment. The program was very capably arranged by Jesse G. Kriel, of Louisville.

Druggist Overlook Left $63,028 Estate

CINCINNATI, July 20.—Inventory of the estate of the late B. H. Overlook, Jr., shows he left an estate of $63,028.

MINNESOTA ADVOCATES NEW PURE DRUG LAW.

State Association Favors Following Lines of Federal Law—Prominent Men Take Part in Proceedings.

ST. PAUL, Minn., July 20.—The Minnesota Ph.A., held its annual meeting at Lake Minnetonka June 22-24. The excessively hot weather prevented a large attendance. Seventy new members were admitted—the largest number ever received at one time with one exception, over 100 being obtained on one occasion early in the history of the association. The membership now is 533 out of a possible 908. The following officers were elected:

President, John P. Jelinek, St. Paul; first vice-president, F. W. Barlow, Albert Lea; second vice-president, William A. Abbett, Duluth; third vice-president, Truman Grimm, Minneapolis; secretary, Theodore F. Leeb, Winona (re-elected); treasurer, L. J. Aberwald, St. Paul (re-elected); executive committee, John F. Danek, Minneapolis; A. D. Thompson, Minneapolis; A. C. Leitcheux, Duluth.

The meeting next year will be held at Duluth. A. D. Thompson, the retiring president, in his address recommended that a field secretary be employed, whose duties it will be to travel over the state soliciting members, collecting dues, creating friendliness for the association, explaining its purposes, needs, etc., and bringing about "get together" meetings of druggists and physicians. The association took kindly to the suggestion. The only stumbling block is the matter of financing the proposed new office, which was referred to the executive committee to solve, if possible.

The association recommended that the legislative committee prepare a prerequisite bill for submission to the legislature and also a new peddler law. The committee was also directed to draw up a pure food law following the lines of the national law.

Gustav Bockman of Minneapolis read a paper on adulteration, which was practically the report of a select committee on that subject. The paper argued strongly in favor of purity. Reinold Noyes, son of Charles P. Noyes, of Noyes Bros. & Cutler, St. Paul, read a paper on "Essential Oils for the Market," which was pronounced the best paper read at the convention.

Dean Frederick J. Wulling, of the Minnesota College of Pharmacy, read a historical sketch of that institution. Prof. Joseph P. Remington, of the Philadelphia College of Pharmacy, was the guest of the association. He delivered a most interesting address. Among the other speakers were Charles H. Huhn, president of the N.A.R.D. and Thomas H. Potts, secretary of the same organization. There were the usual social and "sport" features. The entertainment of the association was furnished by the traveling men's auxiliary, in which work it acquitted itself admirably.

GA. WANTS GRADUATION PREREQUISITE.

Members Favor License for Itinerant Venders of Patent Medicine—D. J. Walker Elected President.

ATHENS, July 20.—The 25th annual meeting of the Georgia State Pharmaceutical Association, presided over by President Thad B. Rice, of Greensboro, was attended by almost 200 members. Addresses of welcome were made by Mayor H. J. Rowe, President W. F. Dorsey, of the local chamber of commerce; Dean Snelling, of University of Georgia; Thomas Mell, on behalf of local druggists, and others. W. S. Elkin, Jr., responded for the association.

Several pertinent resolutions were adopted, one seeking State legislation requiring licenses of itinerant patent medicine venders and another favoring the raising of the prerequisite requirements. The members thought that an applicant for a license to practice pharmacy should be graduated from a reputable school of pharmacy, as well as have three years of practical experience. Experience is the only requirement necessary to qualify for examination at the present time. Papers were read as follows:

"What Substitution the Druggist Should Not Take Back," C. D. Jordan, Meadville; "Does the Soda Fountain Pay the Average Druggist?" Jos. P. Walker, Milledgeville; "Where Should the Lines be Drawn in Counter Prescribing?" D. M. Jordan, Wrightsville; "What Kind of Advertising is the Best Paying Medium?" S. J. Bayne, Macon; "To What Extent do Flow Pictures Make Fine Paying Drug Stores?" H. R. Palmer, Athens; "What is the Best Plan to Meet the Aggressive Physician's Criticism to His Patient of Your Prescription Prices?" L. E. Pellew, Macon; "The Best Method of Calling the Attention of Physicians to Pharmacopoeial and National Formulary Preparations," H. C. Shuptrine, Savannah. "What New and Unpublished Incom-

patibilities Have You Observed During the Past Year?" R. C. Wilson, Athens; "What Preparation of Your Own has had the Most Successful Sale and How Did You Advertise It?" H. W. Head, Macon; "Why Should Local Drug Associations Be Encouraged?" T. B. Rice, and "Is There Any Good Reason Why the Druggist More Than Any Other Business Man Should Sell Stamps, Keep a Directory, and Act As a General Information Bureau?" R. H. Land, Augusta.

The following officers were elected for the ensuing year:

President, J. P. Walker; first vice-president, John S. Montgomery, Jr., Thomasville; second vice-president, Thomas H. Brannen, Atlanta; third vice-president, H. R. Palmer; secretary, B. S. Persons, Macon; treasurer, J. T. Shuptrine, Savannah.

The following names of members were recommended to Governor Brown from which to appoint one member of the State board: C. D. Jordan, Monticello; Arthur Palmer, Athens; C. E. Brinson, Wrightsville; W. P. Smith, Atlanta, and Z. D. Hatcher, of Senola.

The entertainment included an old-fashioned Georgia barbecue at which W. S. Elkin, Jr., officiated as toastmaster, an automobile trip for the ladies and a tour of inspection through the University of Georgia and the State College of Agriculture buildings. The program was in the hands of President H. R. Palmer, Secretary R. C. Wilson, Paul Smith, Lloyd Palmer, R. C. Off and Sprague Silver of the local organization.

PROHIBITION SUBJECT BEFORE MICH. PH. A.

Misuse of Liquor Privileges Causes Severe Restrictions. E. E. Calkins is Elected President.

DETROIT, July 20.—Over 300 delegates attended the 28th annual meeting of the Michigan State Pharmaceutical Association held recently at the Hotel Tuller in this city. The members were warmly welcomed by Mayor Breitmeyer, after which President Edward J. Rodgers, of Port Huron, delivered his annual address. Among the recommendations made by the latter were that the present pharmacy law be more strictly enforced, that a new law be enacted more strict than the one now in force, and that alcoholic drugs be sold only by registered pharmacists.

"Means should be employed to bring to justice violators of the Pharmacy law," he said. "There should also be a change in the present educational requirements. The time has passed when young men can work behind the counter for a few years and then come forth full fledged pharmacists. Every registered pharmacist ought to be a graduate of some recognized school of pharmacy."

Mr. Rodgers referred briefly to the Michigan R. D. A., organized in the western part of the State less than a year ago, and suggested that the two associations work in harmony so that the druggists of the State may go before the legislature and get proper recognition.

Much of the time and attention of the members was devoted to the discussion of the present law restricting the sale of liquors by druggists in "dry" counties. The consensus of opinion was that, although a hardship on the trade, the restrictions could not be safely relaxed. In the report of the legislative committee, submitted by its chairman, Alfred L. Walker, of this city, it was recommended that the law be amended so that druggists might sell alcoholic beverages for medicinal purposes without the stringent regulations now in force. The members, however, thought that it would not be wise to do anything which might be wrongly construed and that druggists could not be too careful to avoid the stigma of illicit liquor selling.

This committee also recommended a change in the law prohibiting the retail sale of habit-forming drugs so that inspectors buying to obtain evidence might not lay themselves liable to prosecution, as is now the case. It further recommended that the effort to have the legislature enact a law requiring a State license fee of $300 or more for the privilege of selling drugs and medicines in the street or from house to house be renewed. These recommendations were approved.

E. C. Varnum, of Jonesville, read a paper on "Local Option and the Drug Store." He said that the misuse of liquor privileges in the "so-called drug stores" in the "dry" counties of Michigan had added to the force of the prohibition movement and made restrictions easy to obtain. He said that liquor had always been a general cure in the country from the earliest times. In many cases, owing to the distance from a physician, recourse is made to liquor in case of accident, and in sudden sickness it is about the first thing sought for.

The committee to which the subject of the dispensing physician was referred, reported that: "Great injustice is done to the pharmacists by the dispensing physician and we believe that the public is poorly served by such dispensing and that it should receive the same protection against incompetent and careless dispensing by physicians as against that by pharmacists."

The following papers were read: "Prerequisite Laws," Prof. J. O. Schlotterbeck, Ann Arbor; "Pure Drug Laws from the Dealer's Standpoint," James E. Davis, this city; "Chemistry of Medicine," F. W. Robison, State dairy and food inspector; "The Universal Establishment of the Metric System," Prof. A. B. Stevens, Ann Arbor; and "The A.Ph.A. Convention," Harry B. Mason, Detroit. H. R. MacDonald, Traverse City, secretary of the Michigan R.D.A., delivered a short address in the course of which he discussed the difficulty in obtaining evidence against those who sold cocaine and morphine.

Resolutions of respect for the late Arthur Bird, pure food commissioner, were adopted.

The following new officers were elected:

President, E. E. Calkins, Ann Arbor; first vice-president, F. C. Cahow, Reading; second vice-president, Frank Dullam, Flint; third vice-president, W. A. Hyslop, Boyne City; secretary, M. H. Goodale, Battle Creek; treasurer, Willis Leisenring, Battle; executive committee, E. J. Rodgers, Port Huron; L. A. Seltzer, Detroit; S. C. Bull, Hillsdale; E. W. Austin, Midland; H. G. Spring, Unionville; trade interests committee, H. A. Wagner, Gladwin; W. T. Benedict, Belding; trustee Prescott memorial scholarship fund, A. H. Webster; delegates to N.A.R.D., E. E. Calkins, M. H. Goodale; alternates, J. J. Willis, Athens; P. B. Campbell, Three Rivers.

Eighty-five new members were elected. Battle Creek was chosen as the next place of meeting.

The Michigan Pharmaceutical Travelers' Association had much to do with the entertainment afforded the pharmacists. The travelers elected these officers:

President, C. E. Jamieson, Detroit; vice-president, C. G. Walker, Grand Rapids; secretary-treasurer, C. H. Spencer, Cincinnati.

E. L. SCHOLTZ AGAIN HEADS COLORADO PH.A.

Members Listen to Reading of Several Instructive Papers and Elect Officers for Next Year.

ESTES PARK, July 20.—Fully 200 members attended the annual meeting of the Colorado State Pharmacal Association presided over by President Edmund D. Scholtz, of Denver. F. O. Stanley, a retired pharmacist and proprietor of the Hotel Stanley, the official headquarters, delivered an address of welcome to which Fred C. Shaw, of Denver, responded. Among the papers read were "The Regeneration of the Prescription Department," by Dr. W. A. P. Andrews, and "The Application of the Pure Food and Drug Law," by Wilbur F. Cannon, State food and drug commissioner. Officers were elected as follows:

President, E. L. Scholtz; vice-president, Robert H. McKenzie Denver; secretary, Charles J. Clayton, Denver, and treasurer, H. Reynolds, of Greeley.

The next meeting will be held at Manitou. The inspection of the natural features of Estes Park made up for the most part the program of entertainment enjoyed by the visitors.

IDAHO PH.A. MEMBERS INCREASE 25 PER CENT.

A. N. Sprague Elected to Head the Association for the Ensuing Year and H. H. Whittlesey Retires.

TWIN FALLS, July 20.—President H. H. Whittlesey presided at the annual meeting of the Idaho State Pharmaceutical Association held recently at Elks' Hall in this city. Mayor C. J. Hahn, in his earlier years a druggist, welcomed the members in a short address. R. W. Smith, of Mountainhome, responded to the mayor and was followed by President Whittlesey who, in his annual address, commented favorably on the 25 per cent. increase in the membership. The following officers were elected:

President, A. N. Sprague, Twin Falls; first vice-president, C. O. Ballow, Boise; second vice-president, Dr. W. H. Anderson, Soda Springs; secretary, S. S. Ferguson, Pocatello; treasurer, F. C. Smith, Boise.

The association will next meet at Pocatello, May 10 and 11, 1911. The entertainment consisted of a trip to Blue Lakes and Shoshone Falls, a concert, reception, dance and luncheon.

THE QUIZ MASTER

A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

THREE PRIZES of $5.00, $3.00 and $2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each monthly series of questions. In the event of a tie for any one of the prizes offered, such prize will be equally divided among the successful contestants. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (8x10 in.), one side only, with your Name and Address at the top of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be sent at one time, and must be with us not later than the 15th of the following month.

CORRECT ANSWERS to each series of questions and the names of the three contestants who have been awarded the prizes will be published in the Era, after the close of the respective contests.

WE INVITE our readers to send us their questions for publication in this department, particularly questions related to the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

The Quiz Master

Care of Pharmaceutical Era 82 Fulton St., New York

Questions, August Series, 1910.

1—What two preparations should always be at hand for the rapid preparation of the official antidote for arsenic?

2—What is the appearance of iodol?

3—Why should morphine salts be dissolved without the aid of heat?

4—What U.S.P. preparation is sometimes called tinctura aquæ laurocerasi, or sal amarum?

5—As prepared by the official process 2 cc. of oil of anise are used in making 1000 cc. of anise water, but is it correct to say that anise water contains .2 per cent by volume of oil of anise?

6—After the mass has been made into pills, what change other than that due to oxidation, may occur in pills containing ammoniated ferrous carbonate and extract of gentian?

7—What is the difference between ergot and ergotin?

8—What is a cataplasm?

9—What category is official?

10—What salts of phosphoric acid are official?

11—Which of the phosphates named in the answer to the previous question are soluble in alcohol?

12—In the process of percolation, what is the proper method for adjusting the glass tube which perforates the cork fastened over the neck of the percolator?

13—Why is it objectionable to store crude drugs in wooden boxes or drawers, or to place packages of different crude drugs in the same container?

14—What are four common names for aconite?

15—What are some ointments commonly found in assortment?

16—What are the ingredients in emulsion of cod liver oil?

17—What is the difference in the solubility of potassium bitartrate in water at 25° C. and in boiling water?

18—Why are enamel graniteware pots good vessels in which to prepare glycerites?

19—What are four official oils each of which the Pharmacopœia (1890 and 1900 editions) says may be mixed

20—What is the appearance of the alkaloid strychnine?

21—What is the objection to making a decoction over a naked flame?

22—How can the objection referred to in the previous question, frequently be obviated?

23—Does one cubic centimeter of aromatic fluidextract of cascara sagrada represent one gram each of cascara sagrada and glycyrrhiza?

24—What is the difference in the action of nitric acid upon olive oil and upon cottonseed oil?

25—What occurs when soluble metallic salts are added in small quantities to an aqueous solution of caraphenol?

26—What is the taste of white oak bark? What constituent gives it this taste?

27—If tannic acid costs 70c. a lb. (avoir.) and glycerin 18c. a lb. (avoir.), what will be the cost of preparing 1000 gms. of glycerite of tannic acid, making no allowance for cost of fuel or remuneration of operator? Show work.

28—What is the official average dose of acetanilid, of bismuth subnitrate, of chloral hydrate and of extract of stramonium?

29—Why does yellow mercuric oxide act more energetically upon the system than red mercuric oxide?

30—What are antiperiodics?

31—The odor of oil of pimenta closely resembles that of what other official volatile oil?

32—What is the difference between the U.S.P. compound solution of iodine and caustic solution of iodine, N.F.?

33—What is the solubility of zinc sulphate and lithium salicylate respectively in water and in alcohol?

34—What part of capsicum is official, and what is the botanical name of the plant from which it is obtained?

35—What official tincture is intended to replace compound tincture of catechu?

36—What are some of the advantages claimed for wine as a menstruum?

37—What is the nature of the flocculent deposit sometimes seen in a solution of potassium carbonate, which has been exposed to air?

38—For the preparation of ointments why are ointment tiles made of glass preferable to those of porcelain ware?

39—In the manufacture of what U.S.P. preparations do the following reactions occur (a) $3Hg + 8HNO_3 = 3Hg(NO_3)_2 + 2NO + 4H_2O$; (b) $(C_2H_3O_2)_2 + PbO = Pb_2O(C_2H_3O_2)_2$?

40—What are four official inorganic chemical salts having marked poisonous properties, which when found in prescriptions, should be carefully scrutinized as to dosage?

41—How do you explain the fact that when several different volatile oils or perfumes have been separately and successively inhaled, the sense of smell becomes temporarily unable to distinguish the identity of the respective odors?

42—In the percolation of drugs, is it always necessary to remove all of the color in order to exhaust the drug?

43—How does creosote react with sulphuric acid?

44—If oil of pennyroyal is quoted at $2.40 a pound (avoir.), how many fluidounces of this oil can be purchased for $2? Show work.

45—What is the action of belladonna and of hyoscyamus upon the eyes?

46—In the Pharmacopœia, why is the name of the metric unit of weight spelled "gramme" instead of "gram?"

47—How does exposure to air affect lime?

48—Is volatile oil of mustard obtained from white or black mustard?

49—To what constituent does mezereum owe its medicinal virtues?

50—Briefly, what is the therapeutic action of senna?

Competitors, Please Notice.

The above list of questions is the complete series for August, and all who desire to compete for the prizes should see that their answers are received by the Quiz Master not later than September 15. Do not send your answers in parts, but mail them all at one time, and be sure to follow the instructions given at the head of this department.

The judges of the June contest of the Quiz Master's Department have awarded the prizes as follows:

First prize, $5, to C. M. Morse, Lawrence, Mass.

Second prize, $3, to Howard E. Gerberg, Harrisburg, Pa.

Third prize, $2, to W. R. Wiles, Braman, Okla.

Contestants wishing to know the grades which they have

made in the June contest may obtain this information on request by sending two cents for postage to the Quiz Master

The Quiz Master.

Questions and Answers, June Series, 1910.

1—At ordinary temperatures, is liquid petrolatum soluble in water; in alcohol?

At ordinary temperatures liquid petrolatum is insoluble in water; it is only slightly soluble in alcohol.

2—Why do crystals form in many extracts on standing?

Many extracts contain soluble mineral salts, such as potassium chloride, nitrate, or sulphate, which were present in the drugs, and crystals of these salts are formed as the extracts lose moisture.

3—What are the solubilities in water (25° C.) of the following: (a) codeine sulphate; (b) lithium citrate; (c) potassium citrate; (d) sodium salicylate?

(a) in about 30 parts; (b) in about 2 parts; (c) 0.5 parts; (d) 0.8 parts.

4—In the presence of water, what incompatibility exists between bismuth subnitrate and sodium bicarbonate?

In the presence of water bismuth subnitrate reacts with sodium bicarbonate forming bismuth subcarbonate and liberating some carbon dioxide. This reaction is sometimes slow in developing.

5—Why should ether never be mixed with hot fluids?

Ether is very volatile, and if mixed with hot fluids, would soon be evaporated.

6—Does quinine have a more bitter taste when in solution, or when suspended in a liquid?

A solution of quinine is much more bitter than a liquid containing quinine held in suspension.

7—What is the nature of a white powder frequently found as a coating upon commercial ginger?

The white powder frequently found as a coating upon commercial ginger may consist of calcium oxide, carbonate, or sulphate.

8—Should ginger which is coated with a white powder be used as a medicine or a condiment?

No, ginger so coated should not be used.

9—How many grains of strychnine sulphate must be dissolved in one pint of water in order to make a two percent solution? Show work.

149.026 + grains. Since 2 percent of the finished solution will be strychnine sulphate, then 98 percent will represent the weight of one pint of water or 7302.3 grains; one percent of the finished solution will weigh 74.513 + grains (7302.3 ÷ 98 = 74.513+) and 2 percent, or the amount of strychnine sulphate required, will weigh 149.026 + grains (74.513 × 2 = 149.026).

10—What is meant by a local anesthetic?

A local anesthetic is an anesthetic which applied locally will cause a temporary reduction of the functions of the sensory nerves, and thereby produces an absence of sensation in the organ or tissue so treated.

11—What are the ingredients in powder of ipecac and opium; ointment of potassium iodide?

The ingredients in powder of ipecac and opium are ipecac, powdered opium and sugar of milk; in ointment of potassium iodide are potassium iodide, potassium carbonate, water and benzoinated lard.

12—Why should a metallic percolator not be used in making tincture of nutgall?

The tannin contained in nutgall may attack a metallic percolator.

13—What is the appearance, odor and taste of boric acid?

Boric acid occurs in transparent, colorless scales of a somewhat pearly lustre, or six sided triclinic crystals, or a light, white, very fine powder slightly unctuous to the touch; odorless, having a faintly bitter taste, and permanent in the air.

14—What effect does cold water have upon gelatin?

Gelatin will not dissolve in cold water; when immersed in it however, the gelatin swells and softens and gradually absorbs 5 to 10 times its weight of water.

15—What is the source of expressed oil of almond?

It is a fixed oil expressed from bitter or sweet almond.

16—What is the official English name for (a) $C_{12}H_{22}O_{11}$; (b) $ZnSO_4 + 7\ H_2O$; (c) $Fe(PH_2O_2)_2$; (d) CS_2?

(a) sugar; (b) zinc sulphate (c) ferric hypophosphite; (d) carbon disulphide.

17—Why should sodium bicarbonate not be dissolved in boiling water?

Heat tends to decompose sodium bicarbonate into normal carbonate, water and carbon dioxide.

18—What is posology?

The study of doses is called posology.

19—How would you prepare pills of potassium iodide?

The potassium iodide may be rubbed into a smooth paste with a few drops of water, or be dissolved in a very small quantity of this liquid, and then be made into a mass, either with a little powdered tragacanth and kaolin or talc, or by adding a double weight of starch and massing with glucose.

20—What is the advantage in using graduates which have the same scale marked upon both sides, or which are encircled by the markings?

Liquids can be more accurately measured in graduates which have the same scale marked upon opposite sides, or which are encircled by the markings, because such marks assist in levelling the graduates preparatory to measuring the liquid.

21—What are two official drugs to which the name "Indian hemp" is applied?

Apocynum and Indian cannabis.

22—At a temperature of 25° C., what would be the volume (in fl. oz.) and weight (in avoir. lbs.) of a quantity of chloroform which could be put into a can which is just large enough to contain one pound (avoir.) of ether? Show work.

21.42 + fl. oz. of chloroform, weighing 2.061 + lb. (avoir.). The specific gravity of ether is .716 and the specific volume of ether is 1.3966; (1 ÷ .716 = 1.3966 +), therefore in one lb. (avoir.) of ether there are 21.42 + fl. oz. [15.338 (fl. oz. in 1 lb. water) × 1.3966 = 21.42 +] which is also the volume of the can. In 21.42 + fl. oz. of water there would be 9775.916 + grains [456.392(grains in 1 fl. oz. of water) × 21.42 = 9775.916 +] and in an equal volume of chloroform there would be 14429.252 + grains [9775.916 × 1.476 (sp.gr. of chloroform) = 14429.252 +]. In 14429.252 + grains there are 2.061 + lb. of chloroform [14429.252 ÷ 7000 (gr. in 1 lb. avoir.) = 2.061 +].

23—What U.S.P. liniments contain fluidextracts and what are the fluidextracts?

Only one U.S.P. liniment contains a fluidextract, namely belladonna liniment in which is fluidextract of belladonna root.

24—In liquid preparations and ointments, why is precipitated sulphur preferable to other forms of sulphur?

Precipitated sulphur is lighter than the other forms of sulphur and is therefore preferable in liquid preparations because it can more easily be suspended. Precipitated sulphur occurs in the form of an amorphous powder, and ointments containing it are smoother than ointments in which the coarser powdered and crystalline forms of sulphur are used.

25—What substance is contained in the present U.S.P. tincture of iodine, which was not in the tincture of iodine of the Pharmacopoeia of 1890?

Potassium iodide.

26—Upon exposure to the air, what change do aqueous solutions of salicylates tend to undergo?

Upon exposure to air, aqueous solutions of salicylates tend to assume a reddish brown color.

27—What effect does solution of chlorinated soda have upon red litmus paper?

Solution of chlorinated soda first colors red litmus paper blue, and then bleaches it.

28—What two official volatile oils, found in most drug stores and belonging to the same plant family, are obtained by expression.

Oil of orange peel and oil of lemon; both belong to the Rutaceae family.

29—In preparing lime water, is it proper to add water indefinitely to the undissolved powder in the bottle?

Lime is gradually converted into calcium carbonate due to the absorption of carbon dioxide, and therefore lime water of deficient strength may be produced if water is added indefinitely to the powder remaining in the bottom of the bottle.

30—For internal use, what kind of oil of turpentine should be dispensed?

For internal use, rectified oil of turpentine should always be dispensed.

31—Why is calomel or yellow mercuric oxide incompatible with ointment of rose water?

Calomel or yellow mercuric oxide is incompatible with ointment of rose water because the latter contains borax which tends to react with salts of mercury, thereby causing a dis-

coloration of the ointment?

32—Why is [illegible] and tincture of lavender sometimes called "red lavender"?

The name "red lavender" is sometimes applied to compound tincture of lavender because this preparation has a brilliant red color, due to the red sanders it contains.

33—What are emetics?

Emetics are substances which cause vomiting.

34—What is a good solvent for balsam of tolu when it is used as a coating for pills?

Ether.

35—What are some of the methods used in writing prescriptions for indicating large or unusual doses?

In writing prescriptions the quantities expressing large or unusual doses may be indicated in several ways as follows: they may be underlined; they may be written in both Roman and Arabic characters, or both in the English and Metric systems; they may be followed by an exclamation point or by the letters Q. R. *(quantum rectum)*.

36—In making preparations by maceration, what is one part of the process which should be given careful attention?

Preparations while macerating should be frequently shaken (from one to four times a day) in order to secure the complete extraction of the drugs.

37—What adulterants are sometimes added to absorbent cotton to increase the rate of absorption of water?

Some of the adulterants reported to have been added to absorbent cotton to increase the rate of absorption of water, are chlorides of calcium, magnesium and zinc, glycerin and glucose.

38—What is the action of salicylic acid when applied to the skin?

Applied to the skin, salicylic acid has the effect of softening the epidermis and also of diminishing perspiration.

39—When is alcohol said to be denatured or denaturized?

Denatured alcohol is alcohol rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials.

40—Acetone is largely used in manufacturing what class of U.S.P. preparations?

In the preparations of oleoresins.

41—What is the objection to filling capsules by hand in warm weather?

In hot weather the moisture of the fingers may give the capsule a spoiled appearance, and may cause particles of the powder to adhere to the outside of the capsules, thereby imparting a taste to the capsules.

42—What are the chemical differences between aluminum, alumina and the official alum?

Aluminum is an almost silver-white metal having the chemical symbol Al, the official alum is a double sulphate of potassium and aluminum having the formula $KAl(SO_4)_2 + 12H_2O$, while alumina is an oxide of aluminum having the chemical formula Al_2O_3.

43—What containers are preferably best adapted for holding lard?

The most satisfactory containers for lard are probably well [illegible] tin cans.

44—How would you try to preserve the prescription number on a bottle, when the contents are destructive to the label?

In addition to the regular prescription label, place on the bottom of the bottle a small strong sticker bearing the number of the prescription and name of the druggist.

45—Why is borax frequently used in welding and soldering metals?

In the fused state, borax will dissolve many metallic oxides and it is used in welding and soldering metals, to remove such oxides, or rust, from the surfaces of metals to be united.

46—What is the retail price of a bottle of toilet water [illegible] and sold at a profit of 33⅓ percent? Show work.

[illegible]

47—[illegible]

48—What is meant by balsams, as applied to a class of U.S.P. drugs?

As applied to a class of U.S.P. drugs, balsams are liquid or soft products containing resin, an odorous principle, and benzoic or cinnamic acids, or both.

49—What is the purity rubric for silver nitrate; for sulphurous acid?

Silver nitrate should contain not less than 99.9 percent of pure silver nitrate. Sulphurous acid should contain not less than 6 percent, by weight of sulphur dioxide (SO_2) and about 94 percent of water.

50—How does iodine occur in nature?

Iodine occurs in nature as sodium iodate in Chili saltpetre; it is also found in kelp which is the ashes of seaweeds, and in some mineral waters combined with sodium and potassium.

The Era Course in Pharmacy.

The Era Course in Pharmacy is a home study course in pharmacy which is divided into ten parts with recitations and examinations by mail. Thorough instruction is given in General Chemistry, Theoretical and Practical Pharmacy, Botany and Materia Medica. The cost of the Course is $10.00, and students of average ability can usually complete the work in from ten months to a year. New classes are organized each month and now is an excellent time to enroll. A prospectus will be sent by the publishers of THE PHARMACEUTICAL ERA to any one who applies.

ERA COURSE IN PHARMACY.

Matriculation Number.	Graduates, to July 16, 1910.	*Examination Grade, P. Ct.*
6089.	J. Hiatt Baker, Ensley, Ala.	95
6173.	Roy G. Hunter, Lake City, Fla.	96
6224.	Ira R. Aber, Mound Valley, Kansas	98
6229.	Hughett K. McDaniel, New York City	95
6245.	Albert N. Roy, Collinsville, Conn.	96
6338.	Thomas J. Belew, Yuma, Tenn.	98

The above graduates will receive diplomas within a short time. A large and very handsomely engraved diploma, printed on artificial parchment, with the graduate's name engrossed, especially suited for framing, will be furnished to all those who request it for $2. Those who desire the latter should forward the necessary fee to THE PHARMACEUTICAL ERA.

Commencement of Rhode Island College of Pharmacy.

At the recent class day exercises of the Rhode Island College of Pharmacy, at Providence, the dean, Prof. Edwin E. Calder, officiated and diplomas were bestowed by the president, John O'Hare, Ph.C., on the following:

Graduate in Pharmacy, cum laude Miss Lillian Gertrude Garrett and John J. Pastille.

Graduate in Pharmacy, Owen Edson Barrett, Louis Joseph Cella, Lucien S. Chartier, Ernest Lobar Cudeiro, Benjamin N. Cohen, Arthur Milton Durling, Clarence Payne Peabody, Fred. erick Charles Gilbert, Charles Ernest Grieg, Owen Joseph Horowitz, Morris Max Horowitz, Wilbur Edwin Johnston, Arthur Benjamin Martel, Edward Wilson Messe, William George Morin, Jean Baptiste Hugo Savoie, Louis Albert Simoneau, Walter F. Smith, Earl Orford Swinnerton, Joseph Wesley Trombley and George H. Zoccoli.

Pharmaceutical Chemist, Albert Wilfred Cadik, Ph. B., Sc. M., Ph. D., Albert Humber Jackson, Ph. G., and Leroy Danforth Whitley.

Doctor of Pharmacy—William Leo Garrett, Ph. G., Ph. C.

University of Wisconsin Pharmacy Department.

MADISON, Wis., July 20—At the recent commencement exercises of the University of Wisconsin, degrees and diplomas were conferred upon the following:

[illegible]

Graduates in pharmacy, Walter Lawrence Bowers, Virginia; Walter Clayton Lueck, Ray Elwood Jeffries, Hurley; Guy Orson Hale, Madison; Otto Harold Lueck, Lodi; Medford Isaac Lueck, Stoughton; Arthur Scott Cronkrite, Louis Stephenson, Medford, and Grimm Stordock, Berlin.

Judge Bland Not a Candidate for Congress.

KANSAS CITY, July 20—Judge W. F. Bland, president of the McPike Drug Co. and the Commercial Club, is not a candidate for the Democratic nomination for Congress. "Business interests would absolutely and irretrievably prevent it," Judge Bland said to a committee which called and urged him to be a candidate.

The Soda Fountain and Candy Counter

Some Sample Specials Which are Dispensed at a Successful Louisville Fountain.

Reading from left to right: A. L. Kincheloe, R. N. Wells, head dispenser and R. J. Reynolds, second man.

"A VERY little bit added to what you got, makes just a little bit more," is the policy followed at the soda fountain of the T. P. Taylor Drug Co., Pharmacy Number Four, on the southeast corner of Fourth and Chestnut Sts., Louisville, Ky. But instead of applying to niggardliness on the part of the dispenser, with the customer getting just a little less than his money's worth, and the owner getting a little more profit, the motto applies with force to the practice of giving the customer just a little more than his money's worth, with added volume of business for the owner.

"We supply the finishing touch both in regard to quantity and quality that is seldom found," said C. B. Davis, manager of Pharmacy Number Four, "and we find this policy has swelled our trade until it is one of the largest and most fastidious trades that frequent any soda fountain in Louisville. You will notice that every soda or sundae served at our fountain is topped with whipped cream, and a seasonable fruit, if possible, while every lemonade contains the finishing touch of a scoopful of sherbet of a suitable flavor.

"We attribute our exceptional success in the soda business to the fact that we have adopted an exceedingly liberal policy in dealing with the people of Louisville and they have reciprocated in a very fitting manner."

The accommodations for the soda-drinking public at Pharmacy Number Four are perhaps the most commodious in the city, as they comprise a thirty-six foot fountain, together with ten tables at which trade may be served. The fountain is a big iceless, of marble throughout, with the space behind the counter beautifully finished in mahogany, with ornaments of brilliant mirrors and handsome marble pillars.

At one end of the counter there is a dumb waiter in a mahogany cabinet, which has been found to be a boon to the soda dispenser in that it obviates the necessity of dragging freezers, gas tank and other supplies through the room, creating dirt and turmoil. All supplies are quickly and easily hoisted by means of the dumb waiter from the cellar to the fountain.

A number of Tungsten lamps with colored shades produce a very attractive effect about the fountain with two large Tiffany glass electroliers adding to the general beauty of the scene. There are three skilled dispensers at this Taylor fountain, R. N. Wells, the head dispenser, who has been supplying Louisvillians with delicious and satisfying drinks for years; R. J. Reynolds, the first assistant, who is one of the best in the business, and A. L. Kincheloe, a very capable fizz artist.

Every drink known to the thirsty public may be had at the Taylor fountain, since a wide range of creams and ices enables them to deliver the goods with promptness and skill that satisfies the most exacting customer in the trade and sends him back for "another one of the same kind, in the same place."

Four creams are always on hand. They are strawberry, chocolate, peach and vanilla, with two sherbets, orange and pineapple, as the usual headliners, except when popular taste demands a particularly seasonable ice. Besides an almost endless array of regular drinks and cool eatables, two specials are put on daily by the force of dispensers, as it has been found that a special at a well-established fountain arouses a customer's curiosity as well as appeals to his gastric juices, and big trade always results.

Some of the latest and biggest hits that have been made with the Louisville public in the way of specials concocted at this fountain are:

Puffed Rice Frappe—This appeals especially to the present era of breakfast food lovers and has created quite a sensation in the soda circles of Louisville. It consists of a scoop of vanilla cream, with a scoop of pineapple ice, a handful of puffed rice, with a liberal portion of whipped cream, the whole

being well shaken and blended into one. Finishing touches of whipped cream and cherries are added.

Pulled Rice Sundae—A plain pineapple ice sundae, with additional features of vanilla cream and pulled rice mixed together.

Banana Sundae—Into a long tall glass, place a scoop of vanilla cream at the bottom with strawberry fruit as the filling of the succeeding [illegible]. The top layer of the sundae consists of pineapple sherbet, with whipped cream and a Maraschino cherry to top off the whole.

Nectar—Into one-half ounce of grape juice, two ounces of pineapple fruit syrup, shaved ice in plenty, and carbonated water with a fine stream of soda. The decorations for this dainty consist of a slice of orange and a cherry.

Pineapple Bon Bon—In a sundae cup place a scoop of shaved pineapple sherbet, with a scoop of vanilla cream on the side of the cup opposite the sherbet. Cover with pineapple syrup and fill in with whipped cream and cherries.

Coney Island Sundae—In a sundae dish place scoops of vanilla and chocolate cream on opposite sides of the dish, as in preparing the Bon Bon. Cover the whole with orange fruit and syrup, whipped cream and cherry.

Maraschino Frozen—Chop up a number of red and green Maraschino cherries, adding the juice from one quart of the fruit. Into the drink place one ounce of this mixture, with a scoop of vanilla cream and liberal quantities of whipped cream. Blend the whole thoroughly by steady beating and serve in cocktail glass.

Claret Fizz—One ounce of claret syrup, with the whites of two eggs well beaten. One-half scoop of vanilla cream, blended well into the claret and egg. In mixing, add a fine stream of soda from time to time, and, by tapping the glass gently on the counter from time to time, the drink will settle and foam two or three inches in thickness will rise above the edge of the glass, making a particularly attractive drink for hot weather purposes.

Angel's Dream—Into a sundae glass place a scoop of vanilla cream, with a small wafer or other form of pastry placed in a hollow in the center. Fill the hollow with orange fruit syrup, cover with whipped cream and decorate with slices of orange.

The syrups at Taylor Fountain Number Four are made fresh each day and every possible sanitary precaution is taken to protect the customer. Mr. Wells is one of the best-known soda dispensers in the country and he recognizes in Mr. Reynolds a hustling young aspirant for soda dispensing honors. Mr. Wells has been in charge of a great number of large fountains throughout the Southern States, while Mr. Reynolds is a breezy Western dispenser, having returned to his native State, Kentucky, after extensive operations at well-known fountains in Seattle, San Francisco, Portland, Denver, and Chicago.

Fountain Formulas.

Frou Frou.

On a China plate place a No. 10 disherful of chocolate ice cream. On each of two sides of the cream put a thin frou frou wafer and on the opposite sides put half of a peach previously sliced. Over the slices of peach put a spoonful of whipped cream and pour over all a generous quantity of chocolate syrup. Sells for 15 cents.

John D. Sundae.

Pineapple syrup (or Arcadian) 1 ounce. Add [illegible] ounce of chocolate syrup to the fruit and then add the [illegible] pineapple over the fruit. Between the [illegible] and one [illegible] of whipped cream. Finish dressing the top of the sundae and cover the entire surface with grated cocoanut. Cherry optional and to taste. This makes a very rich sundae and should bring 15 cents.

Honey Dew

Henderson's Triumph flavor, 1 ounce; best strained honey, [illegible] ounce. A [illegible] Sundae Cup, a maraschino cherry. Fill cup [illegible] cream, [illegible] with [illegible] ounce of [illegible] syrup. Serve with [illegible] spoon.

Seltzer Punch

[illegible] ounce of [illegible] syrup, [illegible] ounce [illegible] juice, [illegible] ounces of pineapple syrup, [illegible] ounces of [illegible] syrup, [illegible] ounces of [illegible] ounces of [illegible]. Shake well with cracked ice and strain [illegible]. Toss, serve in a tall straight 12-ounce glass, top off with a ladleful of shaved ice, a cherry and fresh mint leaves. Sells for 15 cents.

Egg Sherbet.

Into a 12-ounce glass break one egg, then add an ounce each of orange and pineapple syrups and a small scoopful of ice cream. Fill the glass ¾ full of milk, add a little cracked ice and shake. Strain and fill the glass with carbonated water (fine stream).

Frosted Fruit.

Into a 12-ounce glass (a straight lemonade glass is the best for the purpose), draw 1 ounce of pineapple syrup, add a spoonful of ice cream, beat them together, then draw the glass ⅔ full of carbonated water, coarse stream. Place a No. 16 disherful of ice cream on top after the contents of the glass have been well mixed, top off with a ladleful of fresh strawberries, and decorate with a whole fresh strawberry and a piece or two cubes of pineapple. A pretty drink and a "combination sundae and ice cream soda." Price, 15 cents.

Lime de Mint.

In an ordinary 12-ounce mixing glass put 4 or 5 sprigs of fresh mint, one teaspoonful of powdered sugar and a little shaved ice. Then with a bar muddler proceed to "muddle" the ingredients well together. When the operation is finished, add ½ ounce of pineapple syrup, ½ ounce of orange syrup, the juice and shell of ½ a lime and a scoopful of shaved ice. Shake well together and add enough carbonated water, coarse stream, to make 12 ounces. Then pour the mixture into a 12-ounce bell glass and decorate with a slice of pineapple, maraschino cherry and a sprig of mint, sprinkling over all a little powdered sugar. Serve with an oyster fork and have straws within reach.

Cubanola Sundae.

Take one-half of a fresh round cantaloupe and cut off the pointed end so that it will stand neatly on a small china plate. Place one or two nabisco wafers on each side; next in order toward the center of the cantaloupe put a few pineapple cubes, or some whole strawberries and on these sprinkle a few shreds of cocoanut; when this operation is completed fill the center space with vanilla ice cream, putting a layer of whipped cream over the top. On the center of the latter place a thin round slice of orange with a white or red whole cherry at the point of convergence. Easily and quickly made.

Marquise Sundae.

Take a decorated china saucer and on it place a disherful of ice cream. Then stand three nabisco wafers on end, pushing them down into the cream. Sprinkle on some freshly grated cocoanut and pour on a little grape juice. Top off with a ladleful of whipped cream, and a maraschino cherry. Sells for 15 cents.

Pineapple Whip Sundae.

Put a dipperful of vanilla ice cream on a saucer with frou frou wafers on the side. Add a ladleful of pineapple and nuts and a green cherry.

Comet Special.

On a decorated china plate (size 6 x 2½ inches preferred) put a disherful (No. 12) of orange ice next to this put a disherful (No. 16) of vanilla cream and then a disherful (No. 20) of strawberry cream. On the first cone of cream put a ladleful of whipped cream and a red cherry, which will represent the head of the comet. Pour over the next cone of cream sliced bananas and over the third or last cone representing the tail of the comet top with a mixture of assorted fruits. Should sell for 25 cents.

Preserving Strawberries for Fountain Use.

[illegible]—Here is a process which has been described and recommended by a contemporary for preserving strawberries and suitable for other small fruits:

Select [illegible] specimens, and [illegible] pounds of the same size, spread them out on a table or on a large piece of cloth, picking out all the bad and bruised ones, and fill them carefully in clean, dry preserving jars. Pour cold syrup over them, [illegible] the syrup as [illegible] and [illegible]. [illegible] are [illegible] to [illegible]. Prepare [illegible] by [illegible] 3 pounds of good [illegible] to [illegible] pint [illegible] to [illegible] the [illegible] on the fire and [illegible] the sugar is dissolved [illegible] and [illegible] [illegible] [illegible]

on the syrup gauge. Let cool, and when the syrup is cold pour it over the strawberries and evaporate or steam them as follows:

Take a large kettle or a large wash boiler, lay a wooden rack in the bottom of the pan, or else a thick layer of hay; then place the jars on the hay, but so that they do not touch each other; fill all the empty spaces between the jars with hay, also pack hay around the sides of the kettle; now fill the boiler up with cold water so it reaches up to the neck of the jar, set the pan on a moderate fire and slowly heat the water until boiling; continue boiling for twelve to fifteen minutes, according to the size of the jars; lift the pan off the fire and let cool. It is best to work with two boilers. When the water is cooled off, lift out the jars, set them on a table, but have doors and windows closed, so that no current of cold air can strike them. When cold, wash the jars off with a damp rag and store them in a dry but cool dark place. When put up carefully they will keep their natural flavor and color for a long time. All the other fruits and vegetables can be preserved in this manner; certainly some have to be blanched first, such as pineapples, apricots, etc., in order to get them soft. You may preserve fruits without syrup also: Fill the jars, screw on the lid and steam fifteen minutes for pint jars and a little longer for quart jars. Never use the rubbers more than once; they are so cheap that it is not worth while running the risk of spoiling your fruits.

Fall Fancies for the Fountain.

It is time to commence to think about the fall fountain business for one should not think of "shutting down for the winter." It is also time to think about stimulating the between-season business and to give it a stimulant that will be productive of returns through all the cold months.

Get Ready to Cool Off.

Get ready for the cool, but not the cold days. Of course, it is time to think of the way you will make and sell hot drinks that will be in demand within the next few months and, time to think of apparatus and supplies. But there is advertising to be done and many dollars to gather before the flakes fly.

First let us consider what we should advertise during the September and October days. So far as temperature is concerned, folks are going to feel about right. But the thirst and pleasures of taste will stay with them, and it is for you to throw out your leaders and keep the thoughts of your patrons attached to the fountain.

Bring Out the Food Features.

By bringing out the food features, we do not necessarily mean lunch features. In your advertising call attention to the deliciousness of fruit and nut sundaes, sundaes which have much of the chewable added to the cream, and tempered with the coldness of the ices. There is no better season to advertise and push "banana splits" and "macaroon" or "lady finger bisques," than from now on during the next three months. Evolve something new in the line of baked dainties, a little ice cream, and a liberal portion of plain or flavored and thickened whipped cream. Beaten eggs and sugar (cake frosting) is a needed fountain supply at this season of the year. It must be made daily, should be made twice a day, and with it you can make dishes that will answer to Charlotte russe marshmallow and many other names.

Advertising Seasonable Drinks.

Nothing will give you a better field for profitable advertising at this time than seasonable drinks. Now, more than at any other time the egg drinks should be pushed, especially the heavier ones of the "egg chocolate" class. Reduce the use of the fine stream and evolve something solid and sweet that can be topped with whipped cream or marshmallow. There is a seasonable and profitable advertising field to be had just now with a semi-sundae to be served in a bell glass. Something with a very little ice cream, plenty of "cake frosting," syrups, and small fruits or nuts. Your wife, if she be a good pastry baker may help you to open an unlimited and almost untilled field of fall and spring dainties.

Development of the Cone Idea.

A New England fountain man originated a number of fall dainties, using the ice cream cone as a base, and filling it with marshmallow, fruits, nuts and tiny confections. You can buy Charlotte russe baked capsules that may be used in a variety of ways.

We believe that the foregoing suggestions may be developed into profitable facts. Here is one that will answer for any of the dainty combinations containing baked goods:

"That's cake and cream to me"
said one who had partaken of a
SEPTEMBER SUNDAE
It is a dainty dish of Ice Cream, Fruit and Lady Fingers. Just cold enough, just heavy enough, just sweet enough for these delicious days.

For a general seasonable advertisement you might use something like this:

OUR FALL FANCIES.
are the dainty dishes and beverages which we have invented for the delightful autumn days. Not quite so cold, not quite so bubbly as the hot weather luxuries. A little less ice cream or carbonated water. A little more fruit and syrup, a little more whipped cream or marshmallow, and perhaps a dainty confection cake added.
TRY ANY ONE OF THESE.
(Name the drinks and dishes.)

For a semi-sundae, something like this might answer:

TRY OUR BELL BELLAIRE.
It's neither sundae nor soda. It's served in a bell glass. It's made of cold, but not of frozen, cream, fruit and syrup. Just the right dainty to satisfy both thirst and appetite, without being either hot or cold.
A FINE THING FOR THE FALL.

For egg and chocolate drinks something a little explanatory is needed. Thus:

EGG AND CHOCOLATE FOR AUTUMN.
In this neither hot nor cold season, your thirst for soda naturally creates an appetite for something a little "foody," something to satisfy both thirst and hunger, and something that is neither very cold nor hot. Our varied egg and chocolate mixes fill the Fall desires perfectly.

Other general seasonal ads.:

DO YOU THINK
it is Too Cool For Cold Drinks; Too Warm For Hot Ones? Then try any one of our several
SPECIAL FALL FAVORITES.
They are all delicious—Egg, Chocolate, Fruit, Cream (not ice cream) Nuts and Cake. Here is the list (follow with names and prices).

You know, or have learned by experience, that in the coldest weather there are many who desire the coldest dishes and beverages. In your Fall advertising, therefore, you should not neglect to push the regular sundaes and sodas, but in doing so you can call attention to something seasonable that will increase the value of the advertisement. Thus:

As the Days Grow Cool

people want a little more body to their beverages and other fountain delicacies. So, we are making our Fruit Sundaes to contain a little more of the Fruit; our Nut Sundaes with more Nuts, and to our beverages (when requested to do so) we are adding syrups or chocolate, and running the drinks a little more "solid." Our patrons want things so, and what our patrons want, we give. Of course, there is no advance in price.

? QUESTION BOX ?

THE OBJECT of this department is to furnish our subscribers and their clerks with practical and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not to be sent and ANONYMOUS COMMUNICATIONS WILL RECEIVE NO ATTENTION, neither do we answer questions by mail. Only such questions will be published in this department as may be of general interest.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Milk of Magnesia, N. F.

(C. H. H.)—"Milk of magnesia made according to the N.F. process forms a thick product which I am unable to pour into a wide mouth bottle. How can the preparation be liquefied without reducing the strength?"

In making milk of magnesia according to the N.F. process the aim is to produce a preparation which shall contain fresh precipitated magnesium hydroxide suspended in water in a finely divided condition. In preparing the magma, the water must be free from organic matter and also free from iron. Unless these particulars be observed a satisfactory preparation will not result, and as far as we know there is no process by which the precipitate once thickened can be liquefied.

Otto Raubenheimer of Brooklyn, N. Y., who has studied this preparation, described his method of manufacture (A.Ph.A. Proceedings, 1907, page 1500) as follows: Instead of filtering the two solutions through paper, filter them through cotton, as the alkali solution is destructive to filter paper. Before mixing the two solutions set them aside in a cool place. The colder and more dilute the solutions are the finer and bulkier is the precipitate. Instead of decanting the liquid and also washings from the magnesium hydrate, siphon them off, because they can be removed more completely and at the same time do not disturb the precipitate. The siphon should not be too large in diameter or it will create too much suction and carry along some of the $Mg(OH)_2$. The National Formulary orders the precipitate transferred to a muslin strainer, then drained and mixed with enough water to make 1000 cc. Mr. Raubenheimer states that this method has the disadvantage of allowing a loss of some of the $Mg(OH)_2$ by passage through the strainer, as well as being retained on it. Furthermore, the magma is liable to become full of dust and also to absorb carbonic dioxide from the air, which is not wanted in this preparation. Now, the more successful and easier method is to pour the precipitate after siphoning off the wash water—two washings will usually remove the saline taste—into a one-half gallon bottle with a mark at the 1000 cc. point. After the precipitate has entirely subsided, again siphon off all the wash water, fill the bottle with distilled water, shake and set aside. When the precipitate has fallen to the 1000 cc. mark siphon off the water to the 1000 cc. mark and the milk of magnesia is finished.

Mr. Raubenheimer adds that he uses distilled water for the last washing of the precipitate because distilled water has a more solvent action on salts and if there is any left in the precipitate the distilled water will take them up. The distilled water should also be free from carbon dioxide to prevent the formation of magnesium carbonate.

Cements for Celluloid, Metal and Glass.

(H. E.)—For the following

[illegible]

Take 2 parts [illegible] 20 parts. Allow [illegible] to remain the action of the [illegible] parts [illegible] and [illegible] shaking to [illegible] 10 parts [illegible] until [illegible] the mixing and use.

To use, [illegible] two pieces [illegible] that will not [illegible] two pieces [illegible] together [illegible] However, one of the strongest kinds of cement for uniting metals [illegible] is the following. Soak 4 parts of Russian isinglass in cold water for 12 hours, or until it has absorbed as much of the water as it will take up; then [illegible] in a strong piece of linen or towel will answer) and squeeze out all surplus water. Upon the thoroughness with which this is done depends, to a considerable extent, the quality of the finished product. Now put the isinglass in a capsule and melt on a water-bath. Have ready a solution of 2 parts of gum mastic and one part gum ammoniac, dissolved in 16 parts of 95 per cent alcohol. Remove the capsule from the bath, add the solution of gums to the glue and stir well together. When properly made this cement has a milky appearance and in hot weather is quite fluid. In cold weather it is solid and before using must be liquefied by placing it in warmer hot water. The pieces to be joined by the cement should be heated up to the temperature of the cement and firmly bound together after applying the cement.

Kidney and Liver Pills.

(W. T. M.)—Here are some typical formulas:

(1)

Powdered compound extract of colocynth	1½ ounces.
Powdered gamboge	2 drams.
Powdered rhubarb	2 drams.
Powdered soap	2 drams.
Powdered scammony	3 drams.
Powdered capsicum	1 dram.
Antimony and potassium tartrate	18 grains.
Mass of mercury	1½ drams.
Oil of caraway	½ dram.

Mix intimately and mass with proof spirit. Divide each 105 grains into 24 pills.

(2)

Extract of dandelion	60 grains.
Bloodroot	60 grains.
Podophyllin	10 grains.
Oil of spearmint	5 minims.

Make into 50 pills.

(3)

Methylene blue	20 grains.
Extract of dandelion	20 grains.
Oil of juniper berries	20 minims.
Powdered nutmeg	20 grains.

Make into 20 pills and enclose in capsules.

(4)

Methylene blue	20 grains.
Oleoresin of cubebs	2 fl. drams.
Extract of dandelion	30 grains.
Pancreatin	1 dram.

Put into 24 capsules. Two 2 hours before meals.

Fluidextract of Polemonium Reptans.

(A.A.B.)—Harrop ("Monograph on Fluid Extracts") gives the following formula for the preparation of fluidextract of polemonium reptans (abscess root, blue bell):

Polemonium reptans, No. 50 powder, 500 grams

Alcohol 2 parts; water, 1 part.

Take 500 grams of abscess root in No. 50 powder; moisten and pack in a percolator. Saturate with menstruum and macerate. Percolate, reserve successive portions and complete 500 cc. of fluidextract.

Reserve the first 400 cc. of the percolate, then reserve [illegible] a second portion of 90 cc., evaporate the remainder to a soft solid, dissolve in the second portion and mix with the first to make 500 cc. of finished fluidextract.

Coloring Kerosene Red.

(H. E. M.)—Alkanet may be used for coloring kerosene by simply tying up the root in a coarse cloth and suspending it in the oil. Oil-soluble aniline of the desired shade has also been recommended.

We are not familiar with the process of improving the brightness of kerosene by the addition of a "suitable" sub- [illegible] However, in 1900 a patent was granted to [illegible] Mathson [illegible] for giving greater brightness to the light from petroleum [illegible] volatile fractions and [illegible] consisting of [illegible] acetate 95 per cent, [illegible] 4 per cent, [illegible] 1 per cent.

Formula Wanted.

(A. H. S.)—A formula for cerveloa, a perfume if possible [illegible] to taste, one are used. Can some reader supply the information?

MOSTLY PERSONAL

C. A. Drefs, Successful Buffalo Pharmacist, Has Two Sons Who Have Taken High Honors at College.

BUFFALO, July 20.—The accompanying picture is that of Charles A. Drefs, a prominent druggist who has a store at 280-282 Broadway, this city. Mr. Drefs was one of the leading Buffalo delegates to the recent convention of the New York State Pharmaceutical Association at Saratoga. He has been in business for himself for almost thirty-five years. His success, as a business man, can best be judged by his record.

Starting as an errand boy, he gradually climbed the ladder of professional and business success until he has won recognition not only among the pharmacists of Buffalo, but those of the State of New York as well. He was requested to submit at the recent Saratoga convention a paper on what he believes is probably the most vital problem affecting pharmacy. The subject was "The evils resulting from the prescribing by physicians of proprietary preparations, and the best methods that the druggists can use in breaking up the habit. On account of the large volume and high character of Mr. Drefs' prescription business, he was considered peculiarly fitted to deal with the subject.

Mr. Drefs has given attention to many things besides his business. He has been actively interested in the affairs of St. John's Lutheran Church in Hickory street. As a citizen he has striven to advance the interests of Buffalo's East Side. He has taken an active part in the agitation for a convention hall in that part of the city. On numerous occasions he has used his influence in obtaining new school buildings and seeing that they were constructed according to the sound principles of public hygiene.

CHARLES A. DREFS,
of Buffalo, N. Y.

Mr. Drefs is the father of Arthur G. Drefs, who was graduated last year and Charles A., Jr., who graduated from the University of Pennsylvania this year. Both took an active part in scholarly activities at Pennsylvania and were awarded Sophomore honors for high scholarship. C. A. Drefs, Jr., materially aided in winning two unanimous victories for Pennsylvania's 'Varsity Debating Team. He was elected valedictorian of the Philomathean Society, which is the third oldest literary society in the United States. Because of his prominence in Pennsylvania's affairs and because of his skill in public speaking he was unanimously elected ivy orator and as such delivered the senior class oration during commencement week at the University of Pennsylvania.

EDWIN LEIGH NEWCOMB, instructor in botany and pharmacognosy at the Philadelphia College of Pharmacy, has accepted the chair of pharmaceutical botany and pharmacognosy in the department of pharmacy of the University of Minnesota and will enter upon his new duties September 1. His successor as assistant to Professor Henry Kraemer at the Philadelphia institution has not yet been named.

Although a young man, Mr. Newcomb for several years has been attracting widespread attention not only by his work at the college, but by special work in bacteriology and as a consulting and constructing engineer in the erection and operation of sewage plants and systems. Most of this work was done in and about Vineland, N. J., his birthplace. The son of Frank S. and Ida R. Newcomb, Mr. Newcomb early manifested a marked interest in the fruit and nursery business of his father, even as a boy, applying scientific principles to the business with marked success. Largely with a view to perfecting his knowledge of botany, he entered the Philadelphia College of Pharmacy where he was graduated in 1905.

EDWIN LEIGH NEWCOMB,
Philadelphia-Minneapolis.

At the beginning of his third year in college, he was selected as an instructor in botany and pharmacognosy, the first undergraduate to be given the position of instructor in the history of the institution. Since then in addition to his duties as a member of the faculty, he has devoted much attention to the cultivation of medicinal plants, particularly at his home in Vineland, and in the roof garden at the college, following up this work with physiological tests and chemical assay for the determination of the actual medicinal value of these plants.

It was the work along these lines which attracted the attention of the University of Minnesota and which partly prompted the authorities to honor the young Easterner with a tender of a professorship. In his new home in Minneapolis, Mr. Newcomb will be associated with many of the alumni of the Philadelphia institution, not a few of whom have been graduated since he was a member of the faculty.

—EDWARD MALLINCKRODT, president of the Mallinckrodt Chemical Works, St. Louis, was a recent visitor to the metropolis and spent several days at the New York office.

—HON. WILLIAM H. GOVE, of Lynn, a member of the governor's council of Massachusetts and the president of the Lydia Pinkham Co., is one of the financial backers of the new Boston & Eastern railroad, which is being projected from Boston to the north shore, including a tunnel under Boston harbor. It is said that the tributary population of the road is the highest in the world drawn on by the type of the proposed railroad.

—W. S. ELKIN, JR., former president of the National Association of Retail Druggists and president of the Elkin-Watson Drug Co., Atlanta, Ga., is confined to his home with a broken collarbone as the result of a peculiar accident. Mr. Elkin was standing on the sidewalk at the curb when a horse shied, hit Mr. Elkin, knocked him down and caused him to break his collarbone. As a result of his injury Mr. Elkin was compelled to cancel two dates he had to deliver addresses, one on July 13 before the Virginia Pharmaceutical Association and the other on July 19 before the Tennessee Pharmaceutical Association. His many friends will wish him a speedy recovery.

—BRENT GOOD, head of the Carter Medicine Co., New York, has gone to Europe for two months. He will spend a short time looking after the company's London office.

—J. K. LILLY, president of Eli Lilly & Co., spent the first two weeks of July at the Lilly cottage on Lake Wawasee in Northern Indiana.

—JOSEPH P. REMINGTON, dean of the Philadelphia College of Pharmacy, continues to be in great demand at pharmaceutical and medical meetings all over the country. He spent the month of June in attending the meeting of the American Medical Association at St. Louis, then proceeding to Fort Worth, Texas, where he participated in the an-

nual meeting of the Texas Pharmaceutical Association. At the annual meeting of the Minnesota Pharmaceutical Association last June was a prominent figure and from there motored to Buena Vista Springs, Pa., where the annual meeting of the Pennsylvania Pharmaceutical Association was held June 28-30. Here he entered upon a rest at his summer home at Longport, N. J., presumably to taking up his work as chairman of the Revision Committee of the United States Pharmacopœia.

—Alphonse Mayer, president of the Mayer Manufacturing Co., New York City, with his family, made an auto trip from city to Maine where they enjoyed the attractions at the Old House, Cape Elizabeth, a suburb of Portland. Mr. Mayer returned to New York, but will rejoin his family later in the season. He is suffering from nervous troubles, for which his physicians have recommended out door life and exercise. This he will take during the Summer by automobile making trips to nearby resorts and at the same giving his attention to advertising work and other business. The Catskills, the White Mountains and Long Island are on his itinerary, and on his journeys he tacks up card posters and distributes attractive enamel signs to druggists.

—Dr. F. E. Stewart, director of the scientific department of the H. K. Mulford Co., of Philadelphia, sailed for Europe on July 20, the guest of Judge James B. Dill, of New Jersey. He planned to spend six weeks in England and Scotland, and to attend the annual meeting of the British Medical Association in London. Dr. Stewart recently returned from the meeting of the Pennsylvania Pharmaceutical Association where his paper on "Patents and Trade-Marks," read at the 1909 meeting of that organization, was awarded first prize of $20 in gold for having been the best paper read at the meeting last year.

—Fullman P. Stroup, since 1899, assistant to Dr. Samuel P. Sadtler, professor of chemistry at the Philadelphia College of Pharmacy, has been made associate professor of chemistry. Professor Stroup was graduated from the institution in 1896 and in addition to his work at the college, has been a prominent figure in American Pharmaceutical Association circles, the Alumni Association of the college of which he was president in 1905-1906, and a well known writer and speaker on pharmaceutical subjects. His advancement is a most popular one with both alumni and the student body.

—Evan T. Ellis, formerly a member of the wholesale drug firm of Charles Ellis Son & Co., of Philadelphia spent July 10 with Joseph P. Remington at the latter's cottage at Longport, N. J. The latter embarked in the drug business in 1867 as an employe of this firm which was one of the first to carry on the wholesale business in drugs in Philadelphia. It relinquished business in 1875. Following an annual custom of long standing, Mr. Ellis twice a year visits Professor Remington at Longport to talk over old times.

—C. A. Faus, for several years buyer for the C. D. Smith Drug Co., St. Joseph, Mo., has been appointed manager of the Smith-Bailey Drug Co., a branch of the St. Joseph house, at Salt Lake City. He will succeed the local partner, Mr. Bailey, who will retire from active business. Mr. Faus has been connected with the St. Joseph house for nearly a dozen years. He will be succeeded in the latter position by C. J. Power, one of the house's traveling salesmen.

—Richard K. Wise has purchased the store of Sidney C. Yeomans at 34th and State streets, Chicago. Mr. Wise was previously clerk in the store for the past four years. Mr. Yeomans will take an extended vacation, visiting his mining interests at Kirkland, Ariz., Los Angeles, San Francisco, Portland, and Western Canadian points, and will also participate in a long canoe trip on the river which flows through [illegible]

—[illegible] Officer of the Legion of Honor) in recognition of the merits [illegible] Exposition, [illegible] Mr. [illegible] Mayer [illegible] Mayer [illegible]

—Dr. Max Herz, of Philadelphia, [illegible] Atlantic City and [illegible] Mayer. Mr. Herz's [illegible] Kantrowitz from St. Petersburg, Russia, that he "has already seen much that is interesting here that is beautiful and much that is less beautiful" in that great country. He also adds, "Dear old New York will stand comparison with any place in the world." Mr. Schleussner sends his felicitations to [illegible]

—William A. Robinson, of the Robinson-Pettet Drug Co., wholesale druggists of Louisville, has been elected a delegate to the general convention of the Episcopal church, which will be held in Cincinnati, in October. The election of delegates was very close, as each nominee received from four to twelve ballots, and the friends of Mr. Robinson are highly elated over the signal honor conferred upon him.

—President E. G. Eberle, of the A.Ph.A., was recently presented by H. L. Carleton, Austin, charter member of the Texas Ph.A., and R. H. Walker, Gonzales, president of the same organization, with a beautiful jewel of a knight commander of the Court of Honor. The gift was made in consideration of their long friendship and intimate pharmaceutical association with the recipient.

—Thomas V. Wooten, former secretary of the N.A.R.D., has resigned his position with the Northwestern University School of Pharmacy, and will soon leave for California where he has purchased a ranch and connected himself with a big land concern, of which he has been elected vice-president and general manager. Mr. and Mrs. Wooten will make their home in Sacramento.

—Ex-Postmaster and Mrs. C. W. Carr, parents of Charles M. Carr, of the N.A.R.D., recently celebrated their golden wedding in Chicago. The celebration of the event was held at the Press Club of Chicago, their five children, their grandchildren and other relatives making up the party. The guests of honor were presented with purses of gold.

—Brig. S. Young, former professor of chemistry at Ohio Northern University, Ada, Ohio, and at one time State chemist, is being boomed as a candidate for dairy and food commissioner. The argument is advanced that a chemist is required in the office, whereas the present commissioner, Renick W. Dunlap, seeking a renomination, is a farmer.

—Miss Florence Yaple, assistant to Henry Kraemer, professor of botany and pharmacognosy at the Philadelphia College of Pharmacy and an active member of the Alumni Association of that institution, has returned from a vacation of three weeks, one of which was spent at Atlantic City and the other in the Pocono Mountains at Cresco, Pa.

—S. C. Dobbs, sales manager of the Coca-Cola Co., Atlanta, Ga., was re-elected president of the associated advertising clubs at the sixth annual convention of that organization recently held in Omaha. In his presidential address Mr. Dobbs urged every advertising and newspaper man to work for clean and honest advertising.

—Cyrus L. Schlabach, surviving member of the firm of C. LaWall's Son & Co., Easton, Pa., has been elected a director of the Northampton National Bank to fill the vacancy caused by the death of his partner, the late Walter S. La Wall. Mr. Schlabach has been identified with the drug business since boyhood.

—W. E. Connell, president of the Kanawha Drug Co., of Charleston, West Virginia, spent a few days in Indianapolis the last week of June as the guest of Eli Lilly & Co. Mr. Connell was accompanied by M. M. Merritt, of Charleston, who is one of the Red Lilly West Virginia sales force.

R. C. Lowell, proprietor of the West End drug store at Appleton, Wis., is planning to take an extensive trip through the west during the next few weeks. Joseph Maurer, formerly with the Berg Brothers' drug store at South Milwaukee, has been engaged as an additional clerk at the Lowell store.

Mr. and Mrs. William E. Lee and Mr. and Mrs. Otto W. Osterlund, represented the retail drug interests of Philadelphia at the Cape May meeting of the New Jersey Ph.A., and were delighted with their reception and the program.

Dr. H. C. Wood, Jr., of Philadelphia, a member of the new Revision Committee, U.S.P., at a lecture in that city recently, denounced patent medicines containing dangerous [illegible]

Frank Honsik, 3235 Twenty-sixth street, Chicago, after a ten months' trip through Europe, has returned to his home [illegible] Mr. Honsik's Arms [illegible] an extensive [illegible] Hilbert Hoeck, a druggist at Lac Du Flambeau, Wis., was recently arrested on an information charging him with violating [illegible]

with a local physician. A ditch filled with weeds deceived the driver and the car was completely demolished.

—EDWARD K. COPE, a well known Philadelphia pharmacist has his family at Sellersville, Pa., for the summer. Both Mr. and Mrs. Cope were prominent figures at the recent meeting of the Pennsylvania Pharmaceutical Association, Mrs. Cope in particular distinguishing herself by carrying off several handsome prizes for her athletic skill at the picnic at Lake Royer.

—GEORGE S. CONKEY, for 27 years proprietor of a popular pharmacy in Canton, N. Y., has sold his interest to E. M. Kirkland, who has been a clerk in the store for 14 years. Mr. Conkey will devote his entire time in the future to his duties as treasurer of St. Lawrence University.

—F. W. THIEMAN, a well known druggist of Sheboygan, Wis., accompanied by his wife and daughter, will leave on September for a six months' sojourn in Europe. During a portion of this time Mr. Thieman will take the baths at Carlsbad in hopes of benefiting his health.

—H. H. WHYTE, general sales manager for the H. K. Mulford Co., of Philadelphia, sailed recently from New York on an extended tour of Great Britain and the continent. In the course of his journey, he will spend some time with his parents in Scotland.

—ROBERT ZAEGEL, of Sheboygan, Wis., captured both prizes offered at the recent convention at Elkhart Lake for aquatic events. This is the second time that he has been successful in carrying off the honors in this branch of the games.

—F. P. STROUP, a member of the faculty of the Philadelphia College of Pharmacy, accompanied by his sister, spent several days in seeing the sights of Washington, following the annual meeting of the Pennsylvania Pharmaceutical Association.

—FRED H. ELSNER, of the Dr. Miles Medical Co., accompanied by his wife, has returned from Elkhart Lake, Wis., where he attended the Wisconsin Ph.A. meeting. The couple also enjoyed a season of fishing and boating.

—W. H. CURTIS, well-known Mississippi representative of the Allen Pfeiffer Chemical Co., St. Louis, is en route on an extended trip through Europe. He is booked for the Oberammergau and will remain abroad until September.

—J. W. JOHNSON, president of Johnson & Johnson, is enjoying his annual trip to Labrador in search of the gamey salmon. He is accompanied by his nephew, Robert Wood Johnson, the son of the late R. W. Johnson.

—EDGAR F. HEFFNER, of Lock Haven, Pa., secretary of the Pennsylvania Pharmaceutical Association is being congratulated by his many friends upon the arrival of James Heffner, weight eight pounds, in the family.

—GEORGE A. GORGAS, a leading spirit in retail drug circles in Harrisburg, Pa., greeted old friends at the Drug Club of Philadelphia, of which he has long been a member, in the course of visit to that city recently.

—MR. AND MRS. MONROE LIND, of Philadelphia, have returned from an extended automobile trip through New England. Mr. Lind is a member of the firm of Schandein & Lind, manufacturing perfumers.

—WAYNE B. EVANS, superintendent of the store of his brother, George B. Evans, 1106 Chestnut street, Philadelphia, is convalescent after a severe illness. George B. Evans is spending the summer abroad.

—MAURICE HANNAN, who for the past year has been employed in the Collyer Pharmacy at Madison, Wis., has resigned to accept a position as traveling salesman for a Kalamazoo, Mich., drug house.

—CHARLES M. PHELPS, who recently resigned his position as department manager of the Horlick's Malted Milk Co., at Racine, Wis., was entertained at a banquet, recently, by the Somerset club of that city.

—DR. C. C. HASKELL, of the scientific department of Eli Lilly & Co., is spending eight weeks, July 15 to September 15, in the special study of infants' diseases at the Seaside Hospital, New York City.

—BERNARD O'CONNOR who for several years was the popular manager of one of the LaDow drug stores in Oak Lane, Philadelphia, has concluded to try his fortune in the West and has started for Seattle.

—W. E. KENYON, sales manager for the Hollister Drug Co., Madison, Wis., recently opened a branch office in Chicago, with Mrs. A. L. Wagner of 3953 Michigan avenue in charge.

—C. W. BROWN, general correspondent for the H. K. Mulford Co., of Philadelphia is spending two weeks with his family and a party of friends, camping along Darby Creek, near Newtown Square, Pa.

WELCOMED HOME UNDER BOWER OF FLOWERS.

Walter V. Smith, former vice-president of the National Wholesale Druggists' Association, president of the wholesale drug firm of Valentine H. Smith & Co., of Philadelphia, and one of the best known representatives of the trade in that city, was greatly surprised on the occasion of his recent return from an extended European tour to find his desk a veritable bower of flowers and the employes of the company drawn up in line to welcome him home. In the accompanying picture, Mr. Smith is shown sitting at his desk and getting in touch with affairs again in the course of a conversation with his brother, Howard E. Smith, secretary of the company. Mr. Smith's trip abroad was in the nature of a much-needed rest and it did him a world of good.

—WEAVER H. SHEARER, one of the best known druggists in Reading, Pa., was a Philadelphia visitor recently and was the guest of his old friend, Edward Weaver, at a luncheon at the Drug Club.

—P. J. LOVE, who for the past fifteen years has been manager of the City Drug store at Peshtigo, Wis., has resigned and after an extended rest, will engage in business for himself.

—W. D. JONES, the East Bay street druggist, of Jacksonville, was one of six prominent men who recently submitted to the first anti-typhoid vaccinations performed in the State of Florida.

—FRANKLIN M. APPLE, represented Pennsylvania at the annual meeting of the Maryland Ph.A., at Baltimore. He declared that it was a treat he would greatly regretted having missed.

—JOHN MCCULLOUGH, of the Philadelphia sales force of Eli Lilly & Co., bids fair to become the champion swimmer of Pitman, N. J., where he has taken a cottage for the summer.

—L. A. DERSE, formerly employed in the Mieding Pharmacy at Milwaukee, has been engaged to accept a position in Wiechmann's Scott street pharmacy at Wausau, Wis.

—WALTER P. MILLER, a member of the board of governors of the Drug Club of Philadelphia, is spending the summer at Chelsea, Atlantic City, where he has taken a cottage.

—F. W. BEAVER, a well known Philadelphia druggist, accompanied by his wife, was a welcome visitor to his old home at Lewisburg, Pa., where his parents reside.

—L. F. W. SEIFERT of City Island, N. Y., is the author of a very interesting illustrated article on "Hunting Moose," which appears in a recent issue of *Rod and Gun*.

—CHARLES W. GRAHAM, veteran druggist of Wheeling, W. Va., was recently reported dying. His son, Pierce L. Graham, of Zanesville, O., was at his bedside.

—J. T. ROACH, of the retail drug firm of Herr & Roach, Philadelphia, has returned from an extended pleasure trip to New Orleans and other southern cities.

—B. A. C. HOLTZE, the Chicago druggist who was re-

[illegible] injured in an automobile accident, has sufficiently recovered to be able to be out of bed.

—F. B. KUEMMER of Johnson & Johnson, New Brunswick, N. J., will sail for Europe early in August to spend a month or two in travel and recreation.

—G. A. GEBERTS, a well known druggist of Columbus, Wis., has just received his new Overland automobile which he ordered some time ago.

—STEWART F. VOSS, a well known pharmacist of Chicago, South Side, has returned from a visit to Assumption, Ill., where his parents reside.

—WM. MCGIBBON, manager of the Chicago branch of Eli Lilly & Co., has returned from a few days' visit to the home office, Indianapolis.

—MR. and MRS. CHARLES REHFUSS, of Philadelphia were the guests of a medical friend on an automobile trip recently to Atlantic City.

—W. C. SIMPSON, of Vienna, Ill., where he enjoys the triple role of farmer, druggist and politician, was a recent Chicago visitor.

—O. L. BIEBINGER, secretary of the Mallinckrodt Chemical Works of St. Louis, visited the trade in Philadelphia and this city, recently.

—MILTON CAMPBELL, of the H. K. Mulford Co., Philadelphia, is rusticating at his country seat "The Anchorage," near Easton, Md.

—L. J. PELIKAN of Pelikan Bros., druggists, Chicago, is spending his summer vacation fishing in Northern Michigan.

—EMIL RASMUSSEN, proprietor of one of the Racine, Wis., drug stores visited his parents at Marshfield, Wis., recently.

—H. K. MULFORD, of the H. K. Mulford Co., Philadelphia, is spending the summer with his family in the Berkshires.

LEONARD ELLIS of Manitowoc, Wis., has accepted a position with the Mooney Pharmacy at Ladysmith, Wis.

—C. G. A. LODER, a Philadelphia pharmacist is enjoying the summer with the aid of a big touring car.

GERMAN APOTHECARIES MAKE MERRY.

With Record-Breaking Attendance Members and Visitors Participate in Bowling and Other Games.

The annual summer outing of the German Apothecaries' Society, held at Witzel's Pavilion, College Point, Long Island, will go down in history as one of the best attended and most enjoyable affairs of the kind that enterprising organization has ever attempted. While the official departure of the members was scheduled for 3 o'clock it was not until later that the last got away and as a result the programme of games was delayed until the participants could arrive. The greatest interest was taken in the bowling contest for gentlemen, all of the 400 tickets being sold. The contest lasted for three hours and was in charge of Geo. T. Riedlin, assisted by Fred H. Plump and Herman Weller. The winners were W. G. Conklyn, Wm. Raebe and Geo. Bruns, all three making a score of 59 out of a possible 60, and being obliged to roll off for the first three prizes.

There were sixty-six entries in the bowling contest for ladies, the first three prize winners being Mrs. Wm. F. Brandt, Mrs. Sutliff and Mrs. S. V. B. Swann. Besides the prizes awarded by the committee in charge many valuable [illegible] Sharp & Dohme, Wm. R. Warner & Co. and the United States Department of Hard Knocks.

The programme also included games and dancing for the young folks, Lederhaus' Orchestra providing the music. At 7 o'clock in the evening the members of the society, their [illegible] repaired to the Hotel Kensington. After dining the prizes won during the afternoon were awarded by Chairman Otto P. Gilbert and then came dancing, S. V. B. Swann acting as floor manager and leading off with the [illegible]

New Chain of Cut Rate Stores in Chicago.

[illegible] Dec. 30. The Consumers Drug Co., a [illegible] has already rented a corner store in the Keebler Building, at [illegible] and [illegible] for the term from May 1, 1911, at a rental of $27,000 for the term. E. F. Keebler [illegible] charge of the [illegible]

MANUFACTURERS POLICY CRITICISED.

Concerns Which Send Advertising Matter Through the Mails Should Pay Their Own Postage.

PHILADELPHIA, July 20.—Unstinted criticism of the policy of a certain manufacturing concern which to all appearances is systematically bringing suit against retail druggists of this city on the charge of substituting its product at the soda fountain was expressed at this month's meeting of the Philadelphia Association of Retail Druggists at the Philadelphia College of Pharmacy. The issue was brought up when a prominent proprietor announced that he had been served with notice of suit on this charge. He claimed that he not only did not handle the product but had always explained when it was called for that he did not sell it. He said he had instructed his clerks to do the same. When he declared that he could not see how evidence could be gathered against him under these circumstances, it was explained that certain men were employed to secure this evidence and, as had already been shown in the case of another member of the association, they insisted before the court that they had been furnished with a substitute no matter what the druggist had to say about never handling the product in question or never substituting something else when it was called for.

When it was declared by some to be a means of driving every proprietor of a soda fountain into using the product of this house, marked exception was taken to the methods of the house and a committee was appointed to visit the management and express their disapproval of the policies being employed.

Another interesting incident of the meeting was a suggestion that the P.A.R.D., renew its affiliation with the N.A.R.D., and be represented at the annual convention of the latter in Pittsburg this fall. But this suggestion was promptly met with by an explanation from President W. T. Burke that this issue had been finally disposed of for the present year and could not be taken up again before the expiration of that time. There was no discussion on the matter.

Interesting reports were received from Messrs. W. E. Lee, F. M. Apple, Charles Leedom and Charles Rehfuss on the recent meeting of the Pennsylvania Pharmaceutical Association. The course of a manufacturing concern in the western part of the State was roundly criticised when it was shown that nearly every druggist in the room had received from it advertising matter through the mails which was short the requisite postage which the druggist was obliged to pay. Secretary N. A. Cozens was requested to write this concern, calling attention to such unbusinesslike methods. A proposed change in the by-laws which will lay over until the next meeting for final action will make it possible for the association in the future to expel immediately any member found guilty of the illegal sale of morphine or cocaine.

Five new members were elected and another cause for congratulation was the turning over by Frank W. Fluck for the retiring Entertainment Committee of a check for $281.18 as a part of the year's proceeds from various functions held under the auspices of this committee. The business was quickly disposed of for it was shown that some of the most active members were away from the city with their families for their summer vacations.

Little Alligators Also Invade Philadelphia.

Samuel B. Davis and Charles Bullock, prominent Philadelphia pharmacists, with their families and friends, are greatly interested in two little alligators which arrived at their homes recently, the gifts of E. Berger, of Tampa, secretary and treasurer of the Florida Board of Pharmacy. All three druggists were fellow members of the Diastas Club, which included all the good fellows at the recent Richmond meeting of the A.Ph.A. The alligator is the club symbol, but its fondness for water, the club members admit, is not indicative of the organization's policies.

Drug Store Floor Submerged by Cloud Burst.

[illegible] July 20. A [illegible] of rain, closely [illegible] a cloudburst, practically submerged the drug store of E. J. Pfeiffer at Twenty-second street and Oakdale avenue. The water was six inches deep on the floor and Mr. Pfeiffer [illegible] goods from shelves or boxes. Ice and other [illegible] floated about the store in chaotic disorder.

Getting Ready for Pittsburg Convention of National Retailers.

President Huhn Declares N.A.R.D. has had Most Prosperous Year—Tells of Stewardship and Forecasts Recommendations—"Lifting" Campaign Proves a Success.

MINNEAPOLIS, Minn., July 20.—Charles H. Huhn, the president of the N.A.R.D., has for several days had his thinking cap on and pulled low down over his brows. He has been formulating the annual address which he is to deliver at the Pittsburg convention; not actually writing it, but cogitating upon the various topics which he is to bring up and just how he shall treat them.

"Here are a few of the subjects which I shall bring before the national body," Mr. Huhn informed the ERA man. "I shall consider several things in the way of federal legislation, including the parcels post bill, which I shall oppose. I shall discuss the status of pharmacists in the army and navy, where they rank low at present. We want for them every recognition that professional men of whatever character should receive. I shall favor interstate narcotic legislation; revision of the patent laws; uniform drug laws by State legislatures, and urge that the national pure food and drug law be adopted by the various States.

"I shall take the ground that dispensing physicians should be amenable to the same laws that pharmacists or any other class of people who handle medicines must obey. I shall favor a model drug-vending bill, like the one now pending in the Montana legislature. The Minnesota legislature at its latest session passed a bill of this kind, but the late Gov. Johnson vetoed it. This legislation is favored strongly by the N.A.R.D., and various commercial bodies are favoring it and opposing existing itinerant vendors' laws.

Druggists Should Not Deal in Liquors.

"I shall bring the question of liquor selling by retail druggists to the attention of the national association and take the ground that liquor has no place in a drug store except where necessary for prescriptions which are not to be refilled.

"These are some of the principal themes to which my address will devote attention. I shall also discuss the matter of telephones in drug stores; the relations with the pharmaceutical press; Sunday closing and better hours for both proprietors and clerks. A number of other minor matters will also be brought to the attention of the association."

Mr. Huhn declares that the results of the past year's efforts on the part of the N.A.R.D., are important and satisfactory to the trade. Speaking in a general way, as well as in particular, of the work accomplished during his presidency, Mr. Huhn said:

"The past year has been one of the most successful in the history of the organization. Soon after assuming the presidency, I issued a call for a thousand 'lifters,' the term being suggested by Ella Wheeler Wilcox's poem on 'those who lift and those who lean.' I got the thousand all right, and considerably more, too. Unfortunately, my time has been too much taken up with unavoidable side issues. For the past three months or so, however, I have 'cut out' these and addressed myself to affairs of the greatest importance to the N.A.R.D.

Great Work Done by the Cncinnati "Lifters."

"It gives me pleasure to say that the 'lifters' of Cincinnati have performed a wonderful piece of work for the organization. They have even invaded Kentucky, and all through their territory have secured a large number of new members and collected a big amount of back dues. For the next six weeks I shall put forth special effort in the way of arousing keener interest in South Dakota, California and a few other localities. At present we are working Montana strongly, and our organizer there sends in glowing reports of his success. The Wisconsin State Association at its recent meeting decided to continue affiliation with the national body and adopted strong resolutions commending the work of the latter. This is only one of many encouraging proofs we have received of the growing success and prosperity of the N.A.R.D.

"I shall urge that all members of the association take more interest in state as well as national legislation. I feel that the time has come when the retail druggist must fight his own battles, without fear or favor; that we as an organization have a power which, if wielded diplomatically, will bring to the retail druggist more favorable conditions than have ever surrounded him heretofore. I feel that every retailer in the trade ought to recognize the fact that however little he may add to the progress of organization, it is required, and that we must have a united body of men to accomplish the vital things for which the national organization was formed.

"It is with infinite satisfaction that I note that the strong efforts which have been made in certain quarters during the past year to destroy the influence of the N.A.R.D. have been combatted so effectually and successfully that we know that this organization is a permanent fixture in the pharmaceutical world; that more enthusiastic members are being enrolled from month to month than ever before, and those who have been lukewarm in the past have become strong advocates of the N.A.R.D. principles.

Collection Bureau Proves an Important Feature.

"One of the important features added to the work of the association the past year is the collection bureau. This was a signal success from the start. Many old and given-up debts have been collected through the bureau, and members have come to realize how little a thing it is to put $5 in such a concern when the benefits resulting are so considerable. This bureau has of itself more than paid for the organization. A series of three letters is sent by our legal department to men owing long-standing accounts, and this generally does the business.

"One afternoon myself and three other Minneapolis pharmacists went out on a 'raid' in our automobiles, and as a result we gained seven new members for the N.A.R.D. and collected $285 in dues. The same afternoon a similar 'stunt' was 'pulled off' in St. Paul with results equally gratifying.

"Retail druggists are more anxious than ever before to get into our national organization, due largely to the fact that we have—it has been demonstrated unjustly—been charged with promoting the sales of nostrums.

U.S.P. and N.F. Propaganda Work is Increasing.

"In spite of our exclusion from representation in the U.S.P. convention, the efforts of the N.A.R.D. toward exploiting the U.S.P. and N.F. propaganda work have not been affected, or if affected at all, we are doing more in this line than ever before. The denial of representation made us a great many more friends than enemies.

"While my work has been perhaps more arduous than that of some of my predecessors, it has nevertheless been pleasant and earnest. I have at all times tried to keep the organization out of side issues and favored a straight, progressive course with a view to bringing to the association everything possible that would be good for it."

SMOKY CITY TO ENTERTAIN N.A.R.D.

Local Reception Committee at Work Announces Programme for Convention Week.

PITTSBURG, July 20.—Already arrangements are under way to entertain visiting delegates and their families who will be in attendance at the forthcoming annual meetings of the N.A.R.D., and the W.O.N.A.R.D., to be held in this city in September. The general plan has been determined and the details are in the hands of the various committees to work out.

Of course, Pittsburg has long been known as one of the greatest industrial centers in the world but the entertainment committee propose to show visitors that it is also a city beautiful and possesses many fine residences. Under the joint chairmanship of R. C. Culhane and Mrs. Louis Emanuel the members of the reception committee will endeavor to greet every individual delegate and visitor on arrival and escort him or her to a hotel. To facilitate this part of the work Secretary Pritchard asks delegates to notify the reception committee, 1211 Bessemer Bldg., this city, in advance of the time of their arrival so that arrangements can be made to meet them. A bureau of information will also be installed by F. W. McCulloch in his pharmacy in the corridor of the Union Station. This will be in charge of Mrs.

L. H. Reppert, assistant secretary of the W. D. R. D. A.

The entertainment programme for convention week, as far as outlined, includes an informal reception at Fort Pitt Hotel on Monday evening, September 12, by Mrs. Lester P. Lenel, president of the Pittsburg Women's Pharmaceutical Association, and Mrs. Louis Lemmon, chairman of the Ladies' Reception Committee, assisted by the members of the organization. On Tuesday afternoon the ladies will be given an auto ride about the city. In the evening the convention hall will be open as an adjunct of Fort Pitt Hotel. On Wednesday there will be a theatre party and a visit to the Western Pennsylvania Exposition. On Thursday, September 15, the ladies will be the guests of the H. J. Heinz Co. at luncheon. In the evening they will be entertained at a card party while the gentlemen participate in a smoker and luncheon. Ample opportunity will be given delegates to visit the Carnegie Technical Schools, Phipps Conservatory and other notable attractions of Pittsburg. In the evening a steamboat trip will be made up the Monongahela river as far as McKeesport, returning after dark, giving the visitors an opportunity to see the immense mills and furnaces for which the region is celebrated.

The committee announces a registration fee of $1 which will entitle the registrant to an official badge, a book of coupons covering all the entertainment features, official programme, etc. The Pittsburg druggists are holding out the glad hand and they want every member of the drug trade in the United States to enjoy their hospitality.

Excursion Proceeds to Defray Expenses of Delegates.

CHICAGO, July 20.—The semi-annual meeting of the Chicago Retail Druggists' Association, held on July 12 in the Northwestern University Building, was well attended, the invasion of the new telephone company, to be called the Chicago Subway Automatic Telephone Company, coming up for much discussion. A bitter war is being waged against the newcomers by certain drug journals, in the belief that the one company now in the field is sufficient, and that two companies will kill the telephone business for the druggist. Competition in the telephone service, it is argued, will not offer a choice of benefits, but compels a choice of evils—either half service or half price. Resolutions were passed at the meeting condemning the cigar coupon scheme.

On July 21 the association chartered the excursion steamer "South Haven" for a day's outing on Lake Michigan, including a trip to South Haven, Mich. A thorough and unique canvass of drugdom and its friends had been made and as a result the big steamer was full from "stem to stern." The proceeds will be devoted toward defraying the expenses of the C. R. D. A. delegates to the Pittsburg convention of the N.A.R.D. in September.

Conscience Stricken Over a 5-Cent Theft.

RACINE, Wis., July 20.—"Dear Sir: Enclosed you will find a nickel which I have taken from you in goods, and will now return it in cash." The note was found by T. W. Thiesen, proprietor of the Red Cross drug stores, when he opened his mail recently. It was unsigned and there was nothing to indicate the identity of the sender. The nickel is being kept by Mr. Thiesen as a souvenir.

Federal Insecticide Law to be Promulgated.

WASHINGTON, July 20.—The law passed at the last session of Congress, providing for preventing the manufacture, sale or transportation of adulterated or misbranded paris green, lead arsenates and other insecticides and fungicides, goes into effect January 1, 1911, and the officials are preparing such regulations as may be necessary for enforcing the act.

Attachment for Elizabethtown Drug Firm.

LOUISVILLE, July 20.—The report comes from Elizabethtown, Ky., that the well known drug firm of Miller & Turner, of that city, has gone to the wall, having been closed by an attachment issued by the First National Bank, who held notes against the firm for some $2,000. The firm was composed of J. T. Miller and D. J. Turner.

Practically a New Pharmacy for Mr. Albers.

R. C. Albers, proprietor of the North Side Drug Store at Sandusky, Ohio, has completed improvements to the interior and exterior, costing $1,000.

U. S. PHARMACOPOEIAL TRUSTEES CONVENE.

Arrange Details for Revision Committee's Work and Then Go on Sailing Trip.

ATLANTIC CITY, N. J., July 16.—Contracts for approximately ten tons of stationery were directed to be let at the meeting now concluded of the Board of Trustees of the United State Pharmacopœia. This material is designed for the use of the Committee of Revision which has already forwarded to the members of that committee, 175 pieces of circular matter while many times that number is expected to be prepared and sent out in the course of the next three years at the end of which time, it is expected the Ninth Revision will be ready for distribution.

The headquarters of the board were the Hotel Dennis and those who were present were, Chairman J. H. Beal, Scio, O.; F. W. Meissner, LaPorte, Ind.; George H. Simmons, Chicago; Dr. Harvey W. Wiley, Washington; Dr. Henry M. Whelpley, St. Louis, and Joseph P. Remington, Philadelphia. The only absentee was Dr. William Jay Schieffelin of New York who was unavoidably detained.

The summer home of the Revision Committee, adjoining the cottage of Professor Remington at Longport, near here, was today visited by the trustees to whom was explained by Professor Remington and his assistant, Prof. E. Fullerton Cook, the character of the committee's work which is now in progress. Later the party was the guest of Chairman Remington on a sailing trip of several hours' duration. Some of the visitors will delay their departure for several days.

The announcement that the Republic of Costa Rica had adopted as its official standard, the United States Pharmacopœia was a matter of interest which was received with expressions of approval at the meeting.

CANADIAN WHOLESALE DRUG ASSOCIATION.

Feature of Annual Meeting is Presentation of $500 Cabinet of Silver to the Retiring Secretary.

OTTAWA, July 20.—The annual meeting of the Canadian Wholesale Drug Assc. last month was attended by wholesale men from Halifax, St. John, Montreal, Ottawa, Toronto, Kingston, Hamilton, London and Winnipeg. Several of them were accompanied by their wives. There was a general discussion on trade conditions, reports concerning which were very optimistic. Malcolm Macpherson, of the National Drug Co. here, had charge of the local arrangements, and came in for compliments upon the manner in which the programme was carried out.

A feature was a presentation of a cabinet of silver costing $500 to Mr. Mattinson, the retiring secretary. Mrs. Malcolm Macpherson was presented by the ladies of the party with a handsome cut glass water pitcher. The officers elected were as follows:

Honorary presidents, H. H. Lymans, Montreal, and D. W. Boyde, Winnipeg; president, James Mattinson, Montreal; vice-presidents, C. McD. Hay, Toronto, and I. J. Mylius, Halifax; secretary, W. S. Elliott, Montreal; treasurer, W. C. Nibbett, Hamilton.

Druggist Rescues Mother and Child From Fire.

PITTSBURG, June 20.—But for the timely arrival of L. W. Liebert, a druggist, of the Southside, Mrs. Mary Caraccio and Tony, her seven-year-old son, would probably have been burned to death recently when her home caught fire. Mrs. Caraccio, who was just recovering from a long illness, was unconscious when taken from the burning building. The fire, which was of unknown origin, was discovered by Mr. Liebert, who rushed into the building and carried both mother and son out.

Italian Pharmaceutical Association.

The Italian Pharmaceutical Association has elected the following officers for the year 1910: President, John D'Anna; secretary, M. DeMersico; treasurer, V. Calcagno. Communications should be sent to the president, Mr. D'Anna, at 108 Bleecker street, New York.

Bankruptcy For a Louisville Druggist.

LOUISVILLE, Ky., July 20.—Joseph Millmeier, druggist of Crescent Hill suburb, has filed a voluntary petition of bankruptcy.

BOARD EXAMINATIONS

Pennsylvania.

WILLIAMSPORT, Pa., July 10.—Results of the examinations held by the Pennsylvania Pharmaceutical Examining Board in Philadelphia and Pittsburg, on May 19 and 20, have been announced by Lucius L. Walton, secretary of the board. The report shows that 224 persons applied for registration as qualified assistant pharmacists, of whom 199 were successful and 25 failed. There were 245 persons examined for registration as pharmacists; 155 passed and 90 failed. The names of the successful applicants follow:

Registered Pharmacists: from Pittsburg.—Harry A. Bearl, Arnold J. Burkett, Louis Boreman, William G. Downing, Fred E. Silveus, Bernard E. Gloekler, Howard I. Miller, Jacob I. Mendelson, Floyd L. Schweitzer, Wm. B. Vollbrecht, John H. Wurdack.

From Philadelphia: Max Baum, Morris W. Brenner, Jennie Block, S. H. Bartholomew, Joseph Blumberg, Stephen D. Bolton, Peter Amsterdam, Henry H. DeHaven, Wm. Egiof, Norman E. Eberly, Louis Freedman, Harry Farber, Anna Feinstein, Earl V. Godfrey, Hymen Greenberg, Matthew L. Ginsburg, Meyer Goldberg, Alex S. Hall, Philip Hanopolski, Edson B. C. Holland, Charles August Herting, W. F. Longendyke, E. H. VanLeer, Albert A. Light, Albert C. Leininger, George B. Levan, Albert E. Lounds, Sister Bertha Mueller, Mary E. Morgan, Robert Metzler, John F. McAnulty, Jr., Rae V. Nicholas, Morris R. Oast, Henry W. Press, Edw. W. Raines, Wm. H. Siemon, Wm. Silverman, Wm. Scargle, Philip S. Willinglyre, John C. Walton, David S. Zelnanoff.

James F. Brantlinger, Norman A. Garver and E. Spencer Moser, Altoona; Grover C. Hendricks, William H. C. Shelly and Edward B. Workman, Allentown; Harold B. Guenther and Fred Griesemer, Reading; J. Stanley Breen and Albert B. Willman, Williamsport; Luke T. Butt and Walter W. Turner, Lebanon; E. D. Jenkins and C. C. Meyer, Scranton; Evan R. Owens and Ellsworth R. James, Edwardsville; E. C. Kehr, Otto Strock and Claude C. Wolfe, New York; William A. Bentz and Merle S. Bringman, of Waynesboro; E. B. Blair and Norbert H. Grove, of Chambersburg; Maurice H. Eby and Amos S. Rutt, of Gap; H. M. Schabacher, Boyerstown; Z. H. Rodes, of Wormleysburg; John H. Wilson, Ashland; William H. Krauser, Milton; Daniel B. Stevens, Kingston; M. E. Trout, McConnelsburg; Albert J. Storm, Cresson; Corbin C. Hutchinson, East Downingtown; Raymond W. Thomas, Kane; Lee H. Lukens, Jenkintown; J. A. Leingang, Hazelton; John J. Shovlin, Freeland; Percy H. Schultz, Danville; Leo N. Reynolds, Nicholson; Charles L. Scheibley, J. A. Simpson, Mill Creek; Joseph H. Bickert, Huntingdon; Lewis E. Wilson, Chester; Earl M. Loveless, Pleasantville; William R. Borneman, Mahanoy City; Edward Paul Gibney, Coatesville; Harry J. Pettyjohn, Milford, Del.; John A. McGonigal, Conshohocken; John M. Emlet, Hanover; Charles C. Hoenner, Manheim; C. E. Harris, West Chester; J. D. Beck and J. W. Lafferty, Sharon; Frank L. Ziegler, Steelton; J. E. Ziegler, Nazareth; George F. Chapman, Mechanicsburg; J. V. Henkel, Lancaster; Charles Bose, Harrisburg; D. A. McMillen, Barnesboro; Charles B. Rotheberger, Leesport; William H. Roof, Johnsonburg; Edward M. Korb, Honesdale; E. W. Kniley, Lykens; A. C. Henri, Millville; Lester C. Connelly, Carlisle; Robert J. Watson, Woodbine; Thomas E. Marshall, West Grove; Ray W. McCarty, Dushore; M. W. Porter and Roy H. Heiser, Washington; Harriett A. Barber and Lawrence J. Roe, Oil City; Michael L. McNally, Chicora; Charles T. Moore, Sharpsville; E. H. Willets, New Kensington; C. A. Stauffer and Mrs. Cecil R. Bloom, Curwensville; J. A. Morgan, Warren; W. C. Arnold, Houtzdale; R. K. Norman, Creighton; J. A. Martin, Emsworth; John L. Jordon, Derry; A. W. Gatt, Verona; H. E. Swallen, Parnassus; Charles R. McLaughlin, Wilkinsburg; Arthur S. Williams, Tyrone; C. R. Maldoon, Ronora; E. H. Mocklem, Rochester; G. B. House, Braddock; Harry L. White, Claysville; George Baird, McKeesport; Theodore F. White, Connelsville; F. I. Sharpnack, Gastonville; A. P. Blayney, Swissvale; F. A. Reeves, Avalon; F. C. Hutchinson, Mt. Holly, N. J.; J. W. Brooks, Middleport, N. Y.; E. Harrison Metcalf, Rockville, Conn.; W. Webb, Anderson, S. C.; Clyde E. Griener, McComb, O.; Joseph F. Wiesher, Neillsville, Wis.; Robert Archibald, Wheeling, W. Va.

These are the assistant pharmacists:

From Pittsburg.—Lorenzo Alvinino, Ernest E. Alvino, Samuel Berman, Albert A. Brackmann, William A. Beighley, Jr., Harry S. Brinkhoff, Charles Bogoreitz, Louis Bender, Jr., James J. Conway, James A. Davis, Richard J. Day, James B. George, Richard Hill, Shiras K. Holmes, Gustave Hirsch, George W. Heer, Samuel R. Kister, Philip Kannin, Peter A. Kuenzig, Abraham Lefkowitz, William T. Phillips, James Neeson, Lewis C. Spaiding, Walter W. Welsh, Edgar G. Woodward.

From Philadelphia.—John J. Armstrong, Walter M. Anderson, William P. Brisgol, J. B. Bonham, Frank E. Boston, Meyer Bloomfield, W. R. Boyer, Jennie Bellitz, John D. Brady, W. W. Clark, Edgar K. Collings, William F. Camp, W. J. Clary, Edward J. Campbell, George W. Carey, George A. Diblin, Jr., David W. Elsman, William Eppstein, Edwin H. Eppler, Arthur E. Bischback, Frank Elikofsky, Louis Feldman, Joseph H. Goodfriend, Beulah R. Given, V. A. Gibney, Theodore I. Goldblum, David H. Gordon, William L. Graeff, Frank H. Hedges, James B. Hewitt, Thomas D. Heginbotham, Frank P. Vanimivegen, George H. Ischler, Clarence S. Jones. Harry A. Kline, C. F. Kahler, J. F. Kratz, E. W. Lynn, Harry Lashinsky, Samuel Lowenberg, Francesco Megaro, Victor Michelotti, Jr., R. H. Machesney, Israel Rosenberg, Fred Rosin, George P. Shepherdson, Samuel Stein, Edward Seides, Gustav Samet, Isador P. Salin, M. L. Snyderman, Abraham Weiner, Harry Woorman, Raiford H. Winchester, H. J. Woolsay, Leon Wolchek, W. Scott Walb.

Herbert J. Brown, George H. Kabler, T. R. Keppler, Elmer G. Keene, H. M. Evans, of Johnstown; Harry C. Yockey, James C. McBride, Matthews S. Clark, Thomas F. Diefenderfer, J. C. Martin, of Butler; E. E. Dierken, Charles G. Campbell, Jacob O. Myers, of Chicora; D. W. Ryall, H. A. Eicher, P. L. Thomas, of Greensburg; Marmaduke Mamaux, D. A. Daugherty, L. G. Fumian, Wilkinsburg, Charles M. Kuhn and Homer R. Rumbaugh of Mt. Pleasant; Carl M. Spragg and Hobert P. Mosca, of Waynesburg; R. K. Pickard and E. W. Lowe, of Scottdale; Russell St. Clair, New Florence; Thomas E. Brown, Carnegie; Venola B. Salisbury, Tyrone; Timothy J. Crowley, Allegheny; Paul J. Downey, Corry; E. J. Kiefer, Charleroi; William P. Caldwell, Saxonburg; Charles H. Blazier, McKee's Rocks; James E. Parks and Lee A. Ruth, of Johnstown; Walter E. Shiffler, Lancaster; William A. Burt, Tamaqua; M. L. Smith, Buckingham; John P. Smith, Bellefonte; John C. Foust, Shippensburg; Allen K. Hartman, Akron; Dora G. Lieberman, Clifton Heights; Clara L. Timm and Edward M. Meehan, of Mahanoy City; J. Leroy Valentine, Mifflintown; Wilmer M. Heberlig, Carlisle; George H. Shearer, York; W. D. Hartman, Pittsburg; Albert W. Pettit, Moorestown, N. J.; Charles E. Roessler, Beverly, N. J.; F. A. Venner, New Brunswick, N. J.; Carl F. Keener, Hagerstown, Md.; Alfred R. Marth, Neillsville, Wis.; Adolph E. Bindel, Brooklyn, N. Y.; Llewellyn J. Watkins, Camden, N. J.

Illinois.

SPRINGFIELD, July 1.—At the last two examinations of the Illinoise Board of Pharmacy the following passed:

Registered Pharmacists.—Hugo F. Beyermann; Chas. R. Crain; Carl F. Ekstam; Edw. G. Fingl; H. F. Isted; Louis P. Jodar; Wm. P. Know; Edwin L. Kadlac; Thos. R. Maloney; Roy H. McVay; Wm. A. Perkins; Rose P. Schmid; T. C. Stiles; Wm. A. Schoen; W. N. Skourup; Abraham Victor, and Benj. C. Waterman, all of Chicago and Francis T. Curtis, San Jose; Jos. D. Ernest, Joliet; Dwight H. Ellison, Iowa City, Ia.; Frank M. Keeley, Elgin; John J. Michalak, Hawthorne; Wm. R. Medlin, Valparaiso, Ind.; Earl E. Sweet, Chicago Heights; Guy E. Sisson, Mattoon; Walter C. Seibert, Tamaroa; Fred E. Schinz, Rockford.

Victor A. Kremer, Joseph Krupicka, John D. Leviton, Solomon Loseff, Joseph E. Maulella, David Quateman, Adolph Rudin and John W. Weihn, Chicago; Thos. L. Cantrall, Athens; H. B. Denton, Beardstown; Robert A. Detrich, Malden, Mo.; Joseph E. Hankey, El Paso; Carl W. Holz, Springfield; Jacob M. Keller, Willisville; F. D. Quinn, LaGrange; S. P. Roush, Danville; Jacob L. Sanford, DuQuoin; Elmer A. Watson, Clayton; Emil F. Woller, Champaign; Arthur P. Zimmer, Monmouth and Miss Cora Miller, Pana.

Assistant Pharmacists.—Luba Arnopol; Edgardo Bellezza; Conrad A. Bickhaus; Gustav Bazner; Samuel Biegel; Isador

POPULAR PENN.PH.A. MEMBER NOW A MAJOR.

Promotion for H. C. Byers Follows 26 Years of Active Service in Pennsylvania National Guard.

Many friends in retail drug circles will be interested to know that H. C. Byers of Pottstown, Pa., formerly commissary in the Sixth Regiment, National Guard of Pennsylvania, with the rank of captain, has been promoted to commissary of the Fourth Brigade, N.G.P., with the rank of major and is now a member of the staff of Brigadier General James B. Coryell. The promotion follows nearly 26 years of service which has been marked with frequent promotions in which his pharmaceutical training has been one of the principal stepping stones to his present enviable position.

H. C. BYERS.

Major Byers was graduated from the Philadelphia College of Pharmacy in 1882 and after spending some years in business, he took up the selling end of the business and is now the Eastern Pennsylvania representative of Hance Bros. & White. He is particularly well known to the pharmacists of Pennsylvania as a member of the famous "Busy Bee" Entertainment Committee of the Pennsylvania Pharmaceutical Association for the past 13 years. At the recent annual meeting, Mr. Byers and the chairman of the committee, D. E. Bransome, of Philadelphia, were reappointed by the new president Charles H. LaWall, after a petition had been circulated among the ladies in attendance, asking them to reconsider their determinations to delegate to others the rather onerous duties attending membership on the committee.

Cloz, Theodore M. Ewing, Roy L. Fesler, Edward D. Griffin, Lorenzo F. Gutekunst, Otto L. Hockstadt, Clarence M. Hood, Lincoln Morris, A. Knapp, Jacob Korff, Hector O. Lefebvre, O. J. Lemmon, Earl Moore, Theodore A. Neuner, Lucius E. Pickett, Edgar Sagebiel, Edward H. Terry, Edward L. Van Vleck, Harry A. Wilbur, Joseph J. Wilfert, Nathan Woodle, and Victor E. Zarp, of Chicago; and Geo. S. Carmichael, Quincy, Illinois; Ben A. Isaacs, Edward W. Gunther, LaSalle, Ill.; D. Mars and Harry L. A. Hesse, Quincy.

Assistant Pharmacists.—Albert C. Barnes, Leon A. Marks, Henry S. Mesirow and David H. Wessel, all of Chicago; Wm. F. Broderick, Quincy; Arthur S. Cain, Fred W. Kelly, Lewis R. Knowlton, Harrison L. Kriegshauser, A. L. Muenchefering, East St. Louis; Dora Hight, Peoria; and A. J. Sweazy, Sabina.

Local Registered Pharmacists.—Allen G. Bates, Versailles; Frank B. Meade, Sheridan; Fred F. Patterson, Franklin; Thos. E. Aiken, Earlington; J. Edward Best, Morrisonville and Wm. L. Roberts, Pleasant Plains.

Indiana.

INDIANAPOLIS, July 1. Secretary T. E. Otto, of the Indiana State Pharmacy Board, has granted certificates to the following who passed the last examinations:

Registered Pharmacists.—Henry V. Alexander, Chicago; Louis S. Bowers, Brownstown; Russell L. Bennett, Indianapolis; Curtis L. Brown, Decatur; Harold Crooks, Bridgetown; James J. Cogswell, Cora Heath, James J. Cogswell, Indianapolis; Boyd H. Cook, Lapaton; Frederick W. Daederich, Indianapolis; Edward M. Depp, Osgood; John R. Gantz, Oden; Clarence R. Gantz, Silverlake; Mathias J. Kolo, Hammond; Grover Cleveland Marley, Bedford; Solomon Mayerson, Chicago; Clark T. McCutchen, Chester, W. Va.; Henry C. Miller, Ft. Wayne; Harry W. Miller, Cross Plains; Albert N. Neurberg, Indianapolis; Charles H. Nicholas, Russiaville; Edgar A. Ridgely, Geary; Samuel P. Rough, Danville, Ill.; James A. Rumbly, Indianapolis; Eugene A. Schott, Ft. Wayne; Ernest Fay Sherry, Newcastle; Clyde R. Shirk, Indianapolis; John D. Shutleworth, Terre Haute; James L. Stamps, Greencastle; Omar E. Stout, Bluffton; Clarence L. Smith, Elkhart; William B. Swazee, Indianapolis; Carl R. Templeton, Morocco; Charles E. Trees, Frankfort; Ray L. Troth, Orleans; Henry O. Weihe, Ft. Wayne; Claude A. Welch, Hackleman; O. W. Weir Wood, Angola; Edward M. Leakman, Farmington, Mo.

Assistant Pharmacists.—Harry I. Beckenholdt, Lawrenceburg; Fred R. Berger, Indianapolis; Frank M. Collender, Logansport; Dee Carr, Fairmont; Theodore G. Cressler, Plymouth; George E. Franke, Terre Haute; Joseph Glatt, Indianapolis; William R. Gross, Scipio; Emil H. Grimm, New Albany; Wm. Ira Fuller Hanaway, Frederick H. Haywood, Indianapolis; Ray Harms, Columbus; Mrs. Kate S. Hopkins, Seymour; Glen W. Irwin, Ronchdale; Conrad E. Langfeld, Indianapolis; Harry W. Ledbetter, Connersville; J. Frank Lowe, Columbus; Victor W. McCord, Auburn; Glen L. Phillips, Lafayette; Carl Reinhold, Seymour; Herman Riebling, Indianapolis; Lyman B. Ritter, Chesterton; Henry J. Shilling, Lafayette; Shelton G. Silverberg, Muncie; Othor H. Stone, Clinton; Walter D. Tinsley, Indianapolis; Hubert J. Turner, Danville, Ill.; Emil C. Wolfram, Indianapolis; Arthur S. Wright, Clinton.

North Dakota.

LISBON, July 20. Secretary W. S. Parker, of the North Dakota Board of Pharmacy, announces that the next meeting will be held in Fargo, Oct. 18. At the June examinations the following were successful:

Registered Pharmacists.—Arnold A. Aal, Rugby; Albert M. Anderson, Fargo; D. L. Burdick, Rochester, Minn.; Guy C. Bugbee, Souris; R. F. Butterfield, Minneapolis, Minn.; Geo. C. Benno, Harvey; Frank Chastek, Grafton; N. W. Cutler, Park River; Max W. Dreyfus, Fargo; B. O. Greenfield, Adams; William Humphrey, Moorhead, Minn.; C. A. Hagberg, Wishek; Miss Grace M. Hearth, Denbigh; A. F. Kurth, Conway; Otto J. Korbel, Crosby; Nelfrid Lalliberte, Fargo; Frank McGurren, Hannaford; A. L. McBride, Rugby; D. B. McDonald, Edmore; O. A. Otteson, Fargo; W. L. Rinehart, Dazey; W. L. Sackett, Turtle Lake; Clyde A. Spellman, Carrington; Tollef Solverud, Deering; Nels Vasaden, Fertile, Minn.

Assistant Pharmacists.—Nesper Mesrobe, St. Paul, Minn.; Wm. L. Playfair, Fargo; Alexander Torkelson, Henning, Minn.; Sidney R. Tout, Valley City; Sister M. Conchessa, Fargo; L. [illegible], Minn.; A. [illegible], Fargo; Chas. Stelner, Mankato, Minn.; G. W. Smart, Fargo; Chas. A. Abbott, Minot; Chas. P. Herbst, Towner; Leo. H. Jekel, Glendive, Minn.; Theo. Orvich, Lakota; Arthur F. Sievert, Great Bend; A. L. [illegible], Minot.

New Jersey.

TRENTON, N. J., July 1. Secretary Henry A. Jordan, of the New Jersey State Board of Pharmacy, announces the following list of successful candidates at the June examinations:

Registered Pharmacists.—[illegible]

Assistant Pharmacists.—[illegible]

Registered Assistants.—[illegible]

Registered Pharmacists.—Frank A. Blen, Newark; Minton D. Bross, Rahway; Ralph J. Davenport, Princeton; Anna Goldberg, Newark; James L. Hamilton, Somerville; Fulton C. Hutchinson, Mount Holly; John Henry Kamerling, Paterson; Ernest E. Kipp, Milford, Pa.; Richard Linehan, Bloomfield; Raymond S. Matthews, Bayonne; William R. McLaughlin, Trenton; Rudolph R. Meyer, Hackensack; Niels Nielsen, Plainfield; Wilberforce S. Sigler, Newark; George E. Stevens, Somerville.

Massachusetts.

BOSTON, July 20. Just 180 candidates took the examinations for registered pharmacists during May and June, and of this number 51 were successful, a trifle over 25 per cent. There were 11 different classes, ranging from 17 to 21, and the successful candidates in each class numbered from 1 to 13. Following is the list of successful candidates:

Registered Pharmacists.—William A. Bowers, of Westfield; Jacob Chertkower, of Boston; William P. Curley, of East Bridgewater; John J. Morrissey, of Lawrence; William F. Waldner, of Brookline; Richard M. Altman, of Dorchester; Henry J. Chenette, of Lynn; James H. Farrell, of Brookline; Aaron Feldman, of Boston; Winslow C. Garrett, of North Cambridge; Ernest G. Lundberg, of Camvello; Robert P. McKeough, of Boston; John J. Murphy, of Holyoke; Clarence J. Norton, of Boston; Julian W. Pollard, of Boston; Winthrop M. Quinlan, of Needham Heights; Julius Simon, of Millis; Joseph V. Smith, of Boston, Charles W. Brown, of New Bedford; Lawrence J. Dugan, of Webster; George H. Freeman, of Waltham; William H. French, of North Adams; Camille J. Godin, of Holyoke; Bartholomew B. Kivlin, of Readville; Gustaf Peterson, of Fitchburg; Charles A. Hall, of Roxbury; John E. Sullivan, of Rockland; Roy S. Bence, of Pittsfield; G. Berardinelli, of Boston; Clarence H. Cougle, of East Boston; Thomas F. Cuddy of Lawrence; Edward T. Arnold, of Rockland; Romeo A. Bouin, of Woonsocket; Ernest O. Cook, of Lynn; Charles W. Freeman, of Somerville; Harold H. Golding, of Stoneham; John Hillery, Jr., of Somerville; Saul Michelson, of Chelsea; Miss Nancy L. Reilly, of New Bedford; Miss Carrie L. Sears, of Newton; S. S. Berardinelli, of Worcester; Joseph Cohen, of Boston; Frederick E. Bell, of Saxonville; Joseph E. Gorman, of Beverly; James E. Joyce, of Boston; Carl Krotki, of Boston; William M. McLaughlin, of Woburn; Joseph Tarr, of Boston; Harry D. Foley, of Westfield; Alfonso Baeta, of Boston; Robert Grimes, of Boston.

Assistant Pharmacists.—Fred L. Burt, of Springfield; John J. Curran, of Haverhill; H. A. Howland, of Cambridge; John Oszajca, of Chicopee; Peter G. Ryan, of Roxbury; Kazimir Sidlauskas, of South Boston; James F. Totten, of Lynn; John J Barry, of Lynn; Henry J. Duffy, of Fall River; Amos C. Goodell, of Boston; Albert E. Lynch, of Cambridge; Joseph E. Mutty, of Melrose; Edward H. Wiggin, of Peabody; Ralph K. Howland, of Boston; Arthur H. Johnson, of Woburn; Chas. I. McCarthy, of Pittsfield; William J. Danforth, of Boston; Fred W. Knudson, of Boston; John F. Mullowney, of Somerville; Darwin D. Patterson, of Waltham; Louis P. Boud, of Chelsea; Albert D. Wilson, of West Newton; John F. Davidson, of Atlantic; Francois X. Demers, of Lawrence; William J. Gilcrease, of Lowell; George R. Maigs, of Newton; William Meisner, of Springfield; John F. Moore, of Dorchester; George F. Rumpont, of Boston; Arthur O. Batson, of Cambridge; H. N. Bourgette, of Boston; Arthur C. Gibbs, of Boston; Archie J. Pratt, of North Adams; Charles P. Webber, of Danvers; Charles A. Wilmarth, of Boston; Edward A. Woodside, of Woburn; Miss Mary D. Lang, of Lowell; Miss Louisa E. C. Lambeth, of Boston; Joseph H. Lamoth, of Boston; Pio Barone, of Boston; Michael J. Callahan, of New Bedford; F. Morton Case, of Melrose; James F. Dorris, of Lowell; Howard F. Gilbride, of Brookline; Fred Toohey, of Lawrence; Edward C. Richard, of Chelsea; Harry L. Bruce, of Groton; William H. McGrath, of Amherst; Leo C. Meehan, of Boston; Eugene J. Murphy, of Fitchburg; John F. O'Brien, of Malden; Lorenzo I. Sousa, of New Bedford; Chester N. Bowman, of Hyannis; Quirino Cichetti, of Boston; Michael F. Crawford, of Boston; James E. Long, of Malden; John M. O'Brien, of Boston; Manuel C. Pontes, of New Bedford; Edwin J. Marsh, of Boston; Frank B. Sullivan, of Lawrence.

Examinations have been suspended for the summer and will be resumed in September.

Missouri.

ST. LOUIS, July 20. The next examinations of the Missouri Board of Pharmacy will be held at Cape Girardeau on August [illegible] following were successful at the June examinations held at Moberly:

Registered Pharmacists.—[illegible]

Assistant Pharmacists.—[illegible]

Assistant Pharmacists.—A. W. Schuman, St. Louis; L. D. Freeman, Fairview; V. S. Irvin, Blackwater; J. A. Kline, Monroe.

North Carolina.

OXFORD, N. C., July 20.—F. W. Hancock, secretary of the North Carolina Board of Pharmacy, announces that the next meeting will be held in Raleigh, Nov. 15. Out of 79 the following have received licenses to practice pharmacy as a result of the last examinations, held in Charlotte:

Lee C. Ashcraft, Mount Airy; Madison W. Brooks, Asheville; William D. Bost, Matthews; Thomas J. Brown, (col.) Charlotte; Jesse Carter, Jr., Aberdeen; William P. Coleman, (col) Raleigh; Grover C. Emerson, Winston-Salem; Hugh L. Gwyn, Mount Airy; Braxton C. Griffin, Concord; Joseph House, Scotland Neck; Robert L. Hart, Henderson; Fabius J. Hunnicutt, Raleigh; James A. Hutchins, Chapel Hill; James B. Hunter, Charlotte; George A. Iseley, Burlington; William L. Johnson, Greensboro; Lloyd M. Jarrett, Asheville; Howell R. Kyser, Rocky Mount; Elbert McLean Matlocks, New Bern; Daniel C. McDonald, Durham; Michael A. Nicholson, Graham; William R. Nowell, Wendell; John B. Perry, Macon; Grier C. Propst, Concord; John B. Polk, Charlotte; Robert L. Reinhardt, Forest City; Elbert G. Robertson, Raleigh; James H. Townsend, Red Springs; Aaron T. Salling, Wilmington; Clarence E. Shaw, (col.) Charlotte; Joseph L. Wilkerson, Durham; George W. Waters, Jr., Goldsboro; Walter R. White, Warrenton; Connie H. Wilson, Greensboro; Richard K. Webb, Charlotte.

New York—Western Branch.

BUFFALO, July 20.—Secretary George Reimann announces that the following were successful at the June examinations of the Western Branch of the New York Board of Pharmacy:

Pharmacists.—Guy W. Alberty, Buffalo; Arthur H. Ayrault, Rochester; Charles W. Balcerkiewicz, Buffalo; Max W. Barker, Buffalo; William Baumbach, Syracuse; Francis F. Carroll, Buffalo; Leslie D. Condie, Niagara Falls; Paul H. Drown, Buffalo; Darius Eshoo, Buffalo; William W. Farnum, Avon; Elmer J. Freischlag, Buffalo; Charles E. Fuller, North Tonawanda; John S. Hart, Hornell; Harold P. Hawks, Buffalo; Clayton S. Helm, Buffalo; Amson F. Hendrickson, Watkins; Harry W. Hubbard, Buffalo; Arvid W. Johnson, Buffalo; Charles R. Kingsbury, Waverly; B. C. Leemhaus, Jamestown; Chester MacLaren, Buffalo; Joseph W. McElroy, Syracuse; Hugh S. Mosher, Buffalo; Ivan H. Rider, Batavia; Floyd G. Rounds, Buffalo; Charles F. Weed, Niagara Falls; Burt M. White, Buffalo; Joseph J. Williams, Buffalo.

Druggists.—Francis H. Coonan, Buffalo; Florence B. Hamburg, Rochester; Mary B. Oberfill, Buffalo: Arthur Payne, Salamanca, and Alphonse B. Weigel of Buffalo.

Georgia.

ATHENS, July 10.—Below are given the results of the last examinations held by the Georgia Board of Pharmacy:

Druggists.—G. J. Austin, of Monticello; J. K. Atwood, of Milledgeville; J. H. Campbell, of Commerce; J. A. Clements, of Macon; E. K. DeLoach, of Daisy; L. D. Fain, of Faceville; C. B. Goldthwaite, of Troy, Ala.; L. S. James, of Decatur, Miss.; P. B. Knox, of Social Circle; James A. Leggett, of Shubertha, Miss.; Malcolm J. Long, of Mount Pleasant, Tenn.; Rufus G. Minick, of Batesburg, S. C.; J. F. Meeks, of Macon; H. B. Montcastle, of Cedartown; A. C. Moore, of Cedartown; L. W. Nelson, of Baxley; J. K. Patrick, of Athens; Percy C. Rossee, of Eatonton; R. H. Sardling, of Atlanta, and L. T. Waters, of Brooklet.

Apothecaries.—E. L. Bridges, of Tennille; R. C. Davis, of La Grange; F. W. Haines, of Atlanta; F. M. King, of Macon; J. R. King, of Shady Dale, and Wallace Parnell, of Bainbridge.

Virginia.

RICHMOND, July 20.—As a result of the last examinations of the Virginia Board of Pharmacy, licenses have been issued to the following persons:

Registered Pharmacists.—H. L. Burrows, Fairfax; Sm. G. Willis, Lynchburg; W. T. Beck, Danville; R. C. Howard, Norfolk; R. C. Brown, Richmond; John C. Parish, Smithfield; S. M. Burch, Richmond; Wade H. Foy, Richmond; N. C. Foscue, Richmond; Wm. H. Baskerville, Richmond; S. S. Bowman, Staunton; M. M. Moore, Richmond· J. A. Thompson, Jr., Abingdon; Jno. T. Doggett, Danville; M. L. Eggleston, Port Norfolk.

Registered Assistant Pharmacists.—Ernest G. Johann, Richmond; E. B. Moncure, Orange; R. M. Thompson, Purceville; L. H. Botts, Richmond; R. L. Mason, Norfolk; L. S. Hollowell, Selwin, N. C.; Miss Louisa M. Shield, Richmond; Jas. M. Long, Lynchburg; Jas. H. Patterson, Jr., Washington, D. C.; H. B. Grigg, Greensboro, N. C.; Robert L. Clanton, Danville.

Next examinations will be held in Richmond, on Oct. 3.

Texas.

GONZALES, July 1.—Secretary R. H. Walker announces that the following candidates passed the Waco examinations of the Texas State Board of Pharmacy:

Elbert F. Beall, Rusk; Alfred M. Burns, Tenaha; Ewing R. Cock, Marshall; Marshall R. Collins, Arlington; Clifford Davison, Rosenberg; Fred D. Glover, Chillicothe; R. C. Grananberry, Waco; Wm. H. Grothaus, San Antonio; Daniel G. Guy, Denton; Herman E. Hielscher, Giddings; R. E. Johnson, Giddings; Geo. M. Kearney, Ballinger; H. W. Landrum, Bertram; Henry B. Littlepage, Ft. Worth; Wm. T. Matlage, Rosenberg; T. B. McClary, Bronson; J. D. McMahon, Center; Alden M. Moon, San Antonio; E. C. Moore, Brownwood; Isaac Mintz, Nacogdoches; Marion F. McKinney, Malone; Ferd. P. Olson, Dallas; Geo. H. Schwab, Jonesboro, La.; M. S. Seely, Wortham; C. R. Stone, Jasper; Otto F. Weise, Giddings; Lucion I. White, Coleman; Edgar I. Wood, Brady; Harris Zeve, Nacogdoches; M. C. Hodges, Georgetown; Frank Paxton, North Ft. Worth; C. F. Watts, Gainesville; C. Richard Hill, Decatur; J. Ben Harris, Talpa; A. R. Carroll, Ft. Worth.

These officers were elected: Tom J. Snell, president, Cooper; W. F. Robertson, treasurer, Gonzales; R. H. Walker, secretary, Gonzales. The board will meet again at Galveston, Sept. 20.

Manitoba.

ST. PAUL, Minn., July 20.—The examiners of the Pharmaceutical Association of Manitoba, E. Nesbitt and C. W. Campbell of Winnipeg and M. Westaway of Miama, have thus reported on recent major examinations:

Passed with Honors in Order of Merit.—H. E. Thompson, C. B. Nichol, C. L. Copeland, W. Harrison.

Pass List Alphabetically Arranged.—H. Armetaige, W. A. H. Anderson, B. H. Bartlett, J. C. Bright, G. N. Crawford, W. S. Dunlop, C. L. Dutton, R. J. Dawson, A. S. Doherty, Roy Duff, N. G. Gray, W. Hutchings, C. W. Lyttle, F. A. Masterman, G. R. Corquodale, W. H. Ringer, E. R. Simpson, A. M. Sanders.

Supplementals Allowed.—W. J. Hogge and J. Shoin in theoretical chemistry and theoretical pharmacy.

Minnesota.

ST. PAUL, July 1.—Secretary Charles T. Heller, of the Minnesota State Board of Pharmacy, announces that the following have passed the Board's examinations:

Registered Pharmacists.—Delbert E. Bersing, August H. Boehm, Chester E. Harding, Edward L. Hoffman, Frederick J. McCann, Claude M. Stanley.

Assistant Pharmacists.—Oscar E. Baer, Burt B. Bosen, Wyatt A. Cable, Joseph E. Dahl, Wm. H. Ebeltoft, Anthony V. Engel, Carl A. Erickson, Silas W. Graben, John B. Grones, Wm. F. Hoppe, Arthur W. Neujahr, Victor R. Noer, Carl A. Ringdahl, Cyrus P. Wesley, Wm. J. Appel, Naomi F. Holden, Richard C. Johnson, Thomas T. Klovstad, Charles J. McWold, Irving L. Smith, Nels Vasenden, Arthur J. Yackel.

Kansas.

ELLSWORTH, July 20.—Secretary W. E. Sherriff, of the Kansas State Board of Pharmacy, announces that the next examinations will be held at Beloit, August 24. At the Salina examinations of 40 applicants only these 15 passed:

S. C. Arnold, Hudson; Ina F. Bechard, Clyde; Raymond Davis, Howard; Harley S. Martin, Clay Center; A. T. Meyers, Leavenworth; Frank Rowland, Mulvane; William Shellhaas, Abilene; R. H. Wigner, Gridley; J. E. Balling, Wichita; E. E. Berglund, Salina; Chester A. Evans, Marion; Will H. Musil, Ellinwood; Blaine Miller, Clay Center; Cleve Satterfield, Emporia; J. G. Thew, Conway Springs.

Colorado.

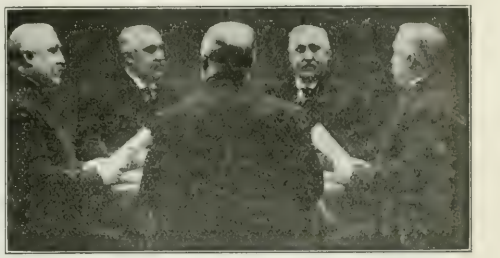
DENVER, July 20.—At the last examinations of the Colorado Board of Pharmacy the following were successful:

Registered Pharmacists.—Earl B. Barnaby, Greeley; Ralph H. Crawford, Denver; E. P. Halloway, Littleton; H. Clay Kienzle, Denver; Thomas H. McCabe, Denver; Harry W. Smith, Denver; T. F. Shuler, Colorado Springs; Arval Sarles, Denver; Mattie M. Wilson, Boulder; Harry Spiceley, Denver; Frank A. Wittenberg, Colorado Springs; Harry Dent, Denver.

Wisconsin.

MADISON, July 20.—Edward Williams, secretary of the Wisconsin State Board of Pharmacy has established an office in his drug store at West Main street and Monona avenue, this city. It has been decided by the board that in the future all examinations for certificates as pharmacists will be held in Madison.

DO YOU RECOGNIZE THE MEN IN THIS PICTURE?



No? Well they are really only one man, William F. McConnell, the genial, faithful and efficient secretary of the Drug Trade Section of the New York Board of Trade and Transportation, recently re-elected, after long service. The illustration typifies Mr. McConnell's ubiquitousness, for he is credited with being able to do the work of almost any five men in his particular line of usefulness.

NOTE: A, *advanced*; D, *declined*; C, *correction*; N, *New*.

See page 840 and following pages for Prices Current.

NEW YORK, July 24.—Dealers in drugs and chemicals continue to report the general market quiet with the movement into consuming channels only moderate and the demand chiefly for jobbing quantities. Seasonable conditions prevail, however, and the undertone continues fairly steady. There have been a number of changes during the month, but none of them of a spectacular nature. Opium is inactive and easy at the reduced quotations. Quinine is quiet but steady. Angostura tonka beans are scarce and much higher. Spanish saffron is firmer with most holders quoting a further advance in values. Quotations on morphine have been reduced while balsam of peru, true, is quiet, although prices are well maintained. Both varieties of buchu leaves are higher and the spot market has been cleaned up of all supplies. Asafetida is selling at full prices and cassia buds are firmer both [illegible].

OPIUM.—Remains dull and the market has a decided inactive appearance, with the undertone easy, jobbers asking [illegible] and $4.10 @ $4.30 per pound for both granulated and U.S.P. powdered. Advices under date of June 11 state that arrivals in Smyrna this year [illegible] against [illegible] at the corresponding date last year. The stock in Smyrna is about [illegible]. There has been considerable [illegible] of the weather and the excessive rains have tended to lower the quality of the opium.

QUININE.—Continues to move slowly and chiefly in a routine jobbing way, with manufacturers' prices unchanged [illegible] tins. At the regular monthly bark auction in London on July 19 the unit value was 5½d, which is the same as that [illegible]

MORPHINE.—Is [illegible] with business [illegible] and manufacturers have made [illegible] prices. For the [illegible] jobbers are asking $3.45 @ $3.50 [illegible] ½ ounce vials, per ounce, $3.65 @ $3.70 [illegible].

ASAFETIDA.—Shows increasing firmness and prices of grades testing 50 percent. have been materially advanced. For extra [illegible] $1.30 @ 1.40 per pound; powdered, $1.60 @ $1.70.

COD LIVER OIL.—Cable advices received from Norway last month report the official final catch for the season as follows: 55,750,000 fish yielding 35,360 barrels of oil against 56,500,000 fish and 43,500 barrels of oil for the corresponding date of last year, showing that the total catch this year is 8140 barrels less than last year. The price of oil is somewhat firmer owing to the good demand, the inquiry being chiefly for 5 and 10 barrel lots and quotations for desirable brands are firmly maintained at $32 @ $34 per barrel as to brand and quantity.

TONKA BEANS.—Angostura are again higher owing to steadily diminishing supplies and for the small stock available, quotations have been advanced to $3 @ $3.25 per pound and only small quantities are offered.

BALSAM PERU.—Continues extremely scarce and quotations for true are firmly maintained at the recent advance to $2.15 @ $2.25 per pound. For inferior descriptions the figures can be considerably shaded.

BUCHU LEAVES.—Short variety is attracting increased attention and reports of dealers are conflicting. The demand is reported good, however, with sales at $1.25 @ $1.30 per pound.

CASSIA BUDS.—Are cabled higher abroad and local dealers have advanced quotations to 30c. @ 35c. per pound.

OIL STAR ANISE.—Nothwithstanding star anise seed is again cabled higher in producing markets, a revision of quotations on the oil shows a lower range, jobbers now asking $1.35 @ $1.45 per pound.

HAARLEM OIL.—Dutch has an easy tone and in most quarters jobbers are asking $4 @ $4.25 per gross. Stocks however are not large and importers are still having some trouble in getting through their goods.

GUAIAC.—Resin is firmer under the influence of cable advices of much higher markets abroad, and the quotation for select U.S.P. has been advanced to 28c @ 38c. per pound. Powdered, 42c. @ 50c. per pound. The spot stock is reported light and closely concentrated.

LYCOPODIUM.—Is again firmer, owing to stronger markets abroad and reports that the crop will not be an average one. Quotations remain as in our last report, viz. 50c @ 60c. per pound.

SAFFRON, SPANISH.—Is higher in producing markets and would be higher here in sympathy, except for competition among local dealers.

GLYCERIN.—Refined is again higher under the influence of continued strong primary markets for crude abroad and manufacturer's price show an advance of 1½c. per pound.

CELERY SEED.—Is firm under an increased consuming demand and the trend of values continues upward.

New $90,000 Home for Philadelphia Co-operative Co.

PHILADELPHIA, July 20.—One of the most important recent transactions in drug circles in this city was the purchase by the Philadelphia Wholesale Drug Co. of the building of Thomas Potter Sons & Co., 522 Arch street. The building will be remodeled and about January 1, 1911, the company will move into it. The company's new home is four-stories in height, is of brick, 30 x 200 feet and is particularly well fitted to meet the demands of the new owners. The price paid was $90,000. The significant part of the deal is the steady development of the company, which is composed of nearly 300 retail druggists. Sixteen years ago the company leased the first floor and basement of 610 Arch street and since then they have acquired the remaining floors as well as the building next door. But even these accommodations proved inadequate. Frank R. Rohrman, the president and general manager, as well as the other officers and directors, are being complimented upon the progress made.

MR. Tafel Honored by the A.S.T.A.

LOUISVILLE, July 20.—At the tenth annual convention of the American Surgical Trade Association at St. Louis, Theo[illegible], of this city, was elected first vice-president. He [illegible] and is one of the most widely known surgical instrument men in the country.

It Costs Us $150,000

TO TELL THE WOMEN THAT *YOU* SELL

DIAMOND DYES

Every year we spend $150,000, and more, in advertising Diamond Dyes through the medium of the great women's publications.

These magazines, carrying our advertisements, reach every nook and corner of the country. Women read them and are influenced by the sound convincing arguments, and beautiful style pictures in color.

To the women in *your* immediate vicinity we tell an intimate story of the countless superiorities, the many uses and the wonderful economy of

DIAMOND DYES

So you see this $150,000 in advertising greatly increases your sales.

Now in order not to disappoint customers it is necessary to keep a complete assortment of colors always on hand.

If you do not already carry Diamond Dyes be sure to write at once. Don't miss the handsome profits from the best selling 10 cent article in your store.

Diamond Dyes are and always have been the "Standard of the World" because they are perfect in formula, positive in action, certain in result.

A FEW VALUABLE HINTS

When a lady asks for Diamond Dyes first tell her you have Diamond Dyes for wool and Diamond Dyes for cotton. That no dye in the world works successfully with all kinds of materials.

Explain that wool, silk, alpaca and camel's hair are animal fibres that take up the dye very slowly, so it is necessary for her to use Diamond Dyes for wool.

And that cotton, linen and mixed goods are vegetable fibres that absorb the dyes quickly, so it is necessary for her to use Diamond Dyes for cotton.

Therefore, if she gets the right dye for the material, there is absolutely no chance of failure.

The Diamond Dye direction book will furnish every detail of information and the Diamond Dye Annual will give her the latest styles and many testimonials of the success of others.

There are many convincing arguments in favor of home dyeing and we are presenting them to the women of the country in a clear and forcible manner.

WELLS & RICHARDSON CO.

BURLINGTON, VERMONT

LEGITIMATE SHIPMENT OF COCAINE LAWFUL.

Manufacturers and Lawful Dealers Can Send It by Mail to Physicians, Pharmacists and Dentists.

WASHINGTON, July 20.—Recently published statements that just before adjourning Congress passed a bill concerning the shipment by mail of cocaine and other habit forming drugs are incorrect. In January, 1910, as an amendment to the Criminal Code, Congress passed the following:

"All kinds of poison and all articles or compositions containing poison are hereby declared to be non-mailable matter —*but* the Postmaster-General may permit the transmission in the mails under such rules and regulations as he shall prescribe as to the preparation and packing of any articles hereinbefore described which are not outwardly or of their own force dangerous to life, health or property."

In connection with the above the Postmaster-General prescribed the following regulation:

"Medicines composed in part or wholly of poison or poisons, and anaesthetic agents which are not outwardly or of their own force dangerous to life, health, or property, and not in themselves unmailable, may be admitted to the mails for transmission in the domestic mails *from the manufacturer thereof or dealer therein to licensed physicians, surgeons, pharmacists and dentists and not otherwise* when inclosed in packages as prescribed in section 496 (That is, so that the contents may be readily examined while in transit in the mails) "Provided, that the package bears the label or superscription of the manufacturer or dealer in the article mailed."

Thus it will be seen that the law as it is at present prohibits the mailing of cocaine, etc., *except* by a manufacturer or legitimate dealers, to a physician, pharmacist or dentist.

Paint, Oil and Varnish Association Meets Earlier.

The board of control of the National Paint, Oil and Varnish Association has authorized a change of date for the association's annual convention from October 11, 12 and 13, to September 27, 28 and 29. The railroads refuse to accord special rates after October 1 and by meeting earlier about $3000 may be saved to the members.

Your **Profits**

ATTRACTIVE WINDOWS IN LOUISVILLE STORE.

Woman's Figure Centers Elaborate Display Suitable for Going Away Season—Prizes for Decorator.

LOUISVILLE, July 20.—A novel window scheme was recently displayed at Pharmacy No. 3, of T. P. Taylor & Co. The south window was used for the sole purpose of making a big display of all articles for use during the summer trip to the seaside or to the mountains. The main figure was that of a woman, garbed in true get-away-day style, carrying a suitcase adorned with labels of foreign hotels and express companies. In her other hand she carried a sign, reading, "How many of these articles will you need when you go away this summer?" and the remainder of the display consisted of articles conducive to the comfort of the summer traveler.

Thermos bottles, talcum powder, bath sponges of all sorts, manicure sets, traveling medicine chests and brushes in every possible style were distributed over the floor of the window. The sides were attractively decorated with fancy washrag bags and bath mats. Catchy windows, such as the above, have proved a very paying proposition in advertising for T. P. Taylor & Co., and it has been noticed by the Louisville public that this firm is right up to the minute in decorating their windows in a manner appropriate to whatever season or holidy approaches.

C. B. Hutsengiller, who is one of the most expert window dressers in druggists' lines in this section of the country, has been engaged for some time by the company, and has delivered the goods on several occasions, having won two or three prizes that were offered by various papers and clubs in Louisville for attractive windows.

Fraud Order Stands Against Cora B. Miller Co.

KOKOMO, Ind., July 20.—The Cora B. Miller Medicine Co., against which a fraud order was recently issued by the post-office department, will be reorganized and resume business under a different name. The government held that Cora B. Miller is not a physician and had no active part in the conduct of the company's affairs, and that the company advertised that it had remedies that would cure cancer and other maladies commonly considered incurable. The concern will do business, it is understood, under the name of the Miller Medicine Co., and will eliminate from its advertising all statements objected to by the postal authorities in the investigation recently made.

New Quarters for United Cigar Stores Co.

The entire stock of the United Cigar Stores Co. has been moved from the headquarters of the corporation at 44 West 18th street, Manhattan, to one of the model loft buildings of the Bush Terminal Co., South Brooklyn. The 225 Manhattan and the 28 Brooklyn stores, as well as a large number located out of town are now supplied with stock from the new quarters, and nearly all the manufactured goods carried are now shipped direct from the various factories of the American Tobacco Co., to the Bush lofts, which are situated within a stone's throw of a series of steamship piers and a union freight station.

Balcony Used For Optical Goods and Prescriptions.

LOUISVILLE, July 20.—One of the most up-to-date prescription departments in this city may be found at Pharmacy No. 2, of T. P. Taylor & Co., in Fourth avenue. Some new ideas have been incorporated in this department at its removal to larger and newer quarters in the store last August. The department occupies considerable floor space on a balcony in the rear, the front part being devoted to the optical department. The first advantage of the balcony location is that this affords the prescription clerks opportunity to work without being discommoded by any passing to and fro, and they are above the noise and bustle of the store.

Employees Make Merry at Glen Island.

On July 12 the employees of the Hoffmann La Roche Chemical Works, 65 Fulton St., New York, held their first annual outing as guests of the house, spending the day at Glen Island. The amusement programme included a clam bake, baseball, various games for both ladies and gentlemen, winding up with dancing.

MARCHAND'S
MEDICINAL PREPARATIONS

If you, Mr. Pharmacist, had devoted over *a quarter of a century* to the manufacture of five high grade preparations with only one standard of purity and uniformity, wouldn't you feel they were better than those made by a newcomer?

Then, is it any wonder we are proud of *our* preparations?

We were the first to manufacture Peroxide of Hydrogen (Marchand's) for medicinal purposes—that was thirty-one years ago—we are the PIONEERS.

PHYSICIANS KNOW

That MARCHAND'S PEROXIDE OF HYDROGEN (medicinal, 15 Vol.) is superior, because it is 50% *stronger* than the ordinary U.S.P., 10 Vol., and because it contains *NO ACETANILID*, and is absolutely free from any impurities.

That HYDROZONE (30 Vol.) is *THREE TIMES AS STRONG* as the ordinary preparations, and that it is the *most powerful of all germicidal agents*, yet is *absolutely non-poisonous*.

That GLYCOZONE ($C_3H_6O_4+C_8H_8O_3$), because of its remarkable properties is of signal value when applied to inflamed mucous membranes or other tissues. It is especially serviceable in acute and chronic forms of gastritis, intestinal catarrh, gastric ulcer, etc.

HYDROZONE AND MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) are put up in the best quality of flint glass bottles, for the reason that flint glass is not so brittle as amber glass. This, in connection with Marchand's improved process of manufacture, reduces the risk of breakage to a minimum.

When a prescription or a request comes to you for MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal), HYDROZONE, GLYCOZONE, MARCHAND'S EYE BALSAM or the DREVET MFG. CO.'S U.S.P. H_2O_2 Official, see that it is dispensed and no attempt made to urge anything else upon the customer.

Your profit is LARGER than it would be if you urged the sale of an inferior article.

Major's Cement

You don't only make a friend by selling reliable goods, but a customer as well. If you sell a person an inferior cement, to earn a better profit, and it does not give satisfaction to the purchaser, he or she in all probability will condemn all cements and never buy another bottle of any kind—thus you lose in the end any way.

If you always sell the best even at a lesser profit you will gain the good-will of the buyer and consequently sell more. Thus the increase in sales will more than make up for the difference in profit and you will be further ahead than if you sold the less reliable goods, both in reputation and financially.

The above is true with the majority of goods but more so with cement as it is an article that is not a necessity and the demand for it can easily be killed. We do not avoid expense in manufacturing the best article of its kind and give you the best that can be had on the market.

MAJOR MANUFACTURING COMPANY
461 Pearl Street, NEW YORK CITY

THE NEW PACKAGES—CAPSULES 5 GRAINS

New packages thoroughly advertised to physicians only—in strict accordance with medical ethics.

Sealed containers. Contents perfect in all seasons—in all climates.

BUSINESS NOTICES

Two Courses in Pharmacy Offered at Illinois.

On another page the University of Illinois School of Pharmacy, Chicago College of Pharmacy, announces that its fifty-first annual course of instruction will begin on Tuesday, September 20. The shorter course, leading to the degree of Graduate in Pharmacy, will continue for thirty-one weeks, closing Thursday, April 27, 1911, and the longer course, leading to the degree of Pharmaceutical Chemist, which also begins on the date first mentioned, but does not close until June 9, 1911, the course comprising two annual sessions of thirty-seven weeks each, with instruction on five days each week, and amounting to about thirty-three hours weekly or a total of 2300 hours in the entire course.

The Illinois University School of Pharmacy is thoroughly equipped with all the necessary means of imparting to young men and young women the technical training necessary for the successful practice of pharmacy. Owing to the increased requirements for the practice of pharmacy throughout the country it is necessary that the young man or young woman should be properly qualified and it is the aim of those in charge of this school to supply this information. The well-equipped laboratories afford the best of opportunity for acquiring the technical skill employed in identifying, preparing, testing and dispensing drugs and medicines.

The course leading to the degree of Graduate in Pharmacy is so arranged as to require the attendance of each student on three days of each week and from twenty to twenty-one hours weekly during two annual sessions of thirty weeks each. This arrangement is advantageous to drug clerks who desire to spend a part of their time in drug stores while attending school, thereby adding to their practical experience and at the same time earning a part or all of their living expenses. Send for an announcement of the Illinois University School of Pharmacy and learn what it has to offer.

Druggists Now Carry Salvar in Stock.

The Salvar Medicine Co., St. Louis, Mo., in an advertisement in this issue of the ERA call attention to the merits of Salvar, a proprietary specialty which they say is recognized by the public and profession as a permanent remedy for blood-poison acquired or hereditary, such as rheumatism, paralysis, locomotor ataxia, necrosis, catarrh, malaria and all worst forms of blood disease. The manufacturers also state that Salvar is carried by the better class of druggists in every state and territory, and the trade need have no hesitancy in pushing this preparation which pays a good profit and that with little trouble. The Salvar Medicine Co., supply signs and novelty advertising to dealers. Write for full information to the Salvar Medicine Co.

Practical Tests for Mothersill's Seasick Remedy.

As most of the ERA's readers know Mothersill's Seasick Remedy has been recently tested by a series of demonstrations in the English channel, Irish and Baltic Seas with great [illegible] In the London Daily Express and the press of Great Britain and Scandinavia generally. To further add to these commendatory testimonials of the effectiveness of this remedy the manufacturers inform us that the Hamburg-American Line, after thorough tests by their doctors, have [illegible] Read the [illegible] in the ERA and write for [illegible]

BUSINESS NOTICES

Bensonhurst Pharmacy Changes Hands.

The Bensonhurst Pharmacy, shown in the above illustration, is located in Brooklyn, N. Y., and has the name of being one of the busiest drug stores on Long Island. It was formerly owned by Julius F. Schirott, but has just been purchased by Wilmot E. Fanning, N.Y.C.P. '91, Herman Henry Breuer, N.Y.C.P. '92, being the broker who brought about the sale. Mr. Schirott will travel in Europe. Mr. Fanning, the new owner, is also well known in Metropolitan drug circles as proprietor of the store at the corner of Seventh avenue and Union street, Brooklyn. The gentlemen shown in the picture are (left to right) Herman H. Breuer, Harry Miller, August Eberhardt and Wilmot E. Fanning. Commendatory of his part in the transaction and of his Affidavit System of selling drug stores Mr. Breuer received a written testimonial from both Mr. Schirott and Mr. Fanning.

Lithographed Posters for Billboard Advertising.

The Great Western Printing Co. of St. Louis, is placing before up-to-date, wide awake druggists a new and practical method of advertising, in a new four-color Lithographed Poster, 7x9 feet, to be posted in good prominent locations by the local billposter of each city. But one order of these posters will be sold to a town.

There is no better nor cheaper method of publicity than the billboards for keeping your name and location before the public. The cost is about 5c. a day for printing and displaying an advertisement that should interest the progressive druggist of each city. The Great Western Printing Co. furnish the posters in quantities as desired, with name, location, etc., printed and nicely displayed in the panel of the poster, occupying about one quarter of the design which is shown in their "ad" on another page of this issue of the ERA. Write them for particulars.

Some Advantages of the "All at Once."

The "All at Once" Ice Cream Machines, manufactured by the Stover Manufacturing Co., Marietta, Ga., and advertised on page 843 of this issue of the ERA, have many features which will commend them to manufacturers of ice cream. From one to three cans of cream can be frozen at once in the two gallon freezers, and from one to six cans can be frozen at once in the five gallon freezers, as best suits the user. In place of anyone or all of the freezers can be put a shaving machine, meat chopper, Stover coffee mill, egg beater, cream whip, coffee mill or any machine of the nature, thus having all your cooking and kitchen machines at one time by the same power. It is also claimed that the steady, easy motion of the "All at Once" gives a far superior cream or ice than by the old way of hand turning each freezer. For the dealer who has to prepare several flavors of cream or ice this freezer is just the machine. Its use means a great economy in time and a great saving in ice, and salt. So confident are the manufacturers of the merits of the "All at Once" Ice Cream Freezer that they offer you fifteen days' free use of the machine with the understanding that if you do not find it satisfactory and will so notify them you will be under no obligation to keep it. Read the advertisement of the manufacturers on page 843 and write for particulars.

Exploiting Anesthone Cream to Physicians.

Reference was made in these pages last month to the new preparation for hay fever which is being marketed by Parke, Davis & Co., the suggestion being offered at that time that pharmacists carry at least a limited supply of the product in anticipation of a probable demand upon the advent of the hay fever season. That the advice was timely is now apparent. So highly does the company regard the new preparation, with respect to both its therapeutic and commercial possibilities, that a campaign is now in progress the manifest purpose of which is to make Anesthone Cream known to physicians from one end of the country to the other. The promotion plans in this instance are in line with those usually adopted by the company when it desires to exploit a new and meritorious preparation, embracing extensive medical journal advertising, circularizing, and systematic "detail" work by traveling representatives.

Anesthone Cream, it may be mentioned incidentally, is the formula of Dr. J. E. Alberts, The Hague, Holland, and contains 1:20,000 of adrenalin chloride and ten per cent of para-amidoethyl-benzoate, in a bland oleaginous base. In the treatment of hay fever it is applied to the nares three or four times a day, a piece the size of a pea being snuffed well into the nostrils. It is said to afford immediate relief in a great majority of cases, producing a prolonged anesthetic effect. It is marketed in a collapsible tube with an elongated nozzle to facilitate its application.

Yale Special Automatic Clock Sales Machine.

On another page will be found the advertisement of the Loheide Mfg. Co., St. Louis, Mo., manufacturers of the Yale Special Automatic Clock Sales Machine. This device is an automatic Eight-Day Mantel Clock to which is attached in the back of the case a patented coin operating check delivering device. The clock is automatically arranged to make sales on the basis of a trifle less than six for a quarter or 6 checks for 25 cents. As a booster for selling cigars, chewing gum and similar goods it beats almost any salesman. It is not a gambling device as there are no blanks and every nickel deposited in the clock delivers a check. See Loheide Mfg. Co.'s advertisement on page 805 and write for particulars.

Headquarters for Homeopathic Vials and Glass Tubing.

The Chesapeake Glass Co., 424-426 Conway St., Baltimore, Md., are well known in the trade as manufacturers and jobbers of Homeopathic Vials, Bottles, Corks, Druggists' Sundries and many miscellaneous articles sold in the drug trade. They can supply all goods of this character at the lowest prices. Read their advertisement on another page and write for samples and quotations. Please mention the ERA when you write.

New Paracamph Co. Elects Officers.

LOUISVILLE, Ky., July 20.—Directors of the new Paracamph Manufacturing Co., recently met in Jeffersonville, Ind., and elected these officers: Walter McCullough, president; Capt. Henry O. Hoffman, vice-president; Thomas B. Bohon, secretary; Willacy J. Schwaninger, treasurer and general manager. The capitalization is $35,000. The company will do business in Louisville.

Base Ball Team and Glee Club Visit N. Y. Drug Club.

The members of the 24 Karat Club base ball team of New York City, and the University of California Glee Club, Berkeley, Cal., were recent visitors at the New York Drug and Chemical Club.

$30.00 FREE!

Largest Manufacturers of Store Fixtures in the World

BUSINESS NOTICES

High Grade Show Cases and Store Furniture.

The John Hoffman Co., 302-8 South Washington Square, N. Y. City, are issued their new catalogue illustrating the Hoffman High Grade Show Cases and Store Furniture, and the manufacturers and the necessity for protection of goods and Hoffman High Grade Wardrobes, copies of which every person who desires to advertise his store should obtain. The special merits of this company in show cases, store hydraulic and interiors are fully illustrated and the designs are characteristic of grace, elegance and usefulness, and built with a full knowledge of the different businesses for which store furniture is wanted. As a druggist you will be interested in these store fixtures and it will pay you to look over the designs of Prescription Counters, Druggists' Wall Cases and various Store Fittings offered by the John Hoffman Co. Read their advertisement on another page and send for catalogues.

Zemo, the Story of a Successful Proprietary.

A new advertisement on page 828 of this issue of the ERA is that of Zemo, manufactured by the E. W. Rose Medicine Co., of St. Louis, Mo. This remedy has had a phenomenal growth in popularity and its constantly increasing sale has been the subject of much favorable comment among proprietary manufacturers and retail druggists. The originator of Zemo, Mr. E. W. Rose, a pharmacist and graduate of the Chicago College of Pharmacy, early realized that there was a public need for a truly efficient, reliable and clean eczema remedy and set about to evolve such a preparation. In this work he had the assistance of his uncle, Dr. J. H. Rose, a medical man and highly esteemed physician of Harrisburg. The results of their investigations were most satisfactory and in 1904 a corporation to manufacture the remedy was organized with a capital of $125,000, the business being located at St. Louis. Since that time there has been a steadily increased demand for Zemo throughout the country, a demand that from the very first has been energetically furthered by vigorous advertising, the advertisements of Zemo today being run in over 2000 carefully selected newspapers. This campaign of publicity is sure to create a still further demand for Zemo and druggists will do well to carefully read the advertisement of the E. W. Rose Co.

Besides being a remedy for eczema and other skin diseases the preparation has a wide range of usefulness as an antiseptic and germicide and is also recommended in the treatment of prickly heat, rash, hives, cuts, bites, sores, etc., as well as for general toilet purposes. Zemo, with Zemotone and Zemo Soap, are claimed by the manufacturers to constitute perfect treatment for all affections of the skin and scalp. The agency for the sale of these proprietaries is held by leading druggists throughout the country, and you can make no mistake in looking into a proposition that will net you 100 per cent on your investment.

University of Maryland School of Pharmacy

(The Maryland College of Pharmacy, 1841-1904)

The Sixty-seventh Annual Session will begin September 27, 1910. Catalogue giving full information in regard to requirements for admission, courses of instruction, expenses, etc., will be mailed upon application. Address,

CHARLES CASPARI, Jr., Dean
University of Maryland BALTIMORE, MD.

PHILADELPHIA COLLEGE of PHARMACY

The oldest, largest and best College of Pharmacy in the United States.

COLUMBIA UNIVERSITY

COLLEGE OF PHARMACY of the CITY OF NEW YORK

THE EIGHTY-FIRST ANNUAL COURSE OF INSTRUCTION

of this College will begin on September 26th next, and continue through the academic year.

The College offers a course of two years, consisting of three days instruction weekly, open to those possessing the Pharmacy Student Certificate of the New York State Education Department, based on fifteen Regents' counts or one year's work in an accredited high school, and leading to the degree of Graduate in Pharmacy.

To graduates of this and of other courses properly qualifying for advanced work, a Graduate Course of one year in the microscopical and chemical analysis of foods and drugs is open.

As a department of Columbia University, the College also offers a course of two years, of four days instruction weekly, open to those presenting the Academic Equivalent Certificate of the State Education Department, based on 60 Regents' counts or four years' work in an accredited high school and leading to the degree of Pharmaceutical Chemist. This course prepares students for admission, without examination, to the College of Physicians and Surgeons.

To graduates of this and other courses of equal grade, our regular Graduate Course of one year is open, leading to the degree of Doctor of Pharmacy.

A Summer Preparatory Course of twelve weeks prepares students in special directions for the regular work of the term.

Those intending to take either course will please communicate with

THOMAS F. MAIN, Secretary, 115-119 West 68th Street, New York City

Prices Current *of* Drugs *and* Chemicals

TO SUBSCRIBERS—In comparing your invoice with the prices in this Price Current, remember that the prices here given are those ruling in the New York market, and are the average prices charged to retail druggists. For larger quantities and orginal packages lower prices should be secured. Quality should always be taken into consideration.

ALLAIRE, WOODWARD & CO. - - PEORIA, Illinois

NEW-SKIN

Trade-Mark

Instead of Court Plaster

New-Skin is the first and only liquid court plaster ever put on the market. It forms a tough, elastic protective coating which makes it stay on. It will not wash off. It will not rub off. It will not peel off. It is the best remedy for chapped hands, chilblains, cracked lips, and all skin troubles. Just paint it on. Dries instantly. Contains no poisons. Absolutely harmless. Full directions in each package. Try it for that cut or scratch. Keep it handy for emergencies. Ask your druggist for New-Skin.

10c, 25c, 50c packages

NEW-SKIN CO., Dept. S.

98 Grand Ave. Brooklyn, N. Y.

Druggists' and Dispensers' Coats

We have a large variety of stock and style to choose from. Our cloths are No. 1's grade to measure and shrunk from any material desired.

Write for our swatch card showing styles, materials and prices. Free upon request. We can fit you properly by mail. Free delivery to all parts of the country.

HOLIDAY PERFUMES

FINER THAN EVER

If we were to try to describe the attractiveness of our new package perfumes for holiday trade, it might appear like exaggeration.

This, however, is beyond question—that our designers have produced a line so richly worthy of your attention that you owe it to yourself to examine it carefully.

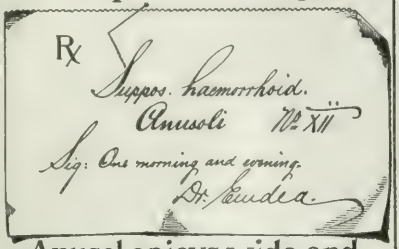
Our salesmen are on their way—why not see what they are offering?

You want goods that will delight your trade both in beauty of package and quality of contents. The more exacting you are about these points, the better we shall be pleased and the stronger the reason why you should see the Stearns perfume line this year.

STEARNS, Perfumer

DETROIT, MICH., U.S.A.

A Frequent Prescription!



Anusol enjoys wide and increasing professional favor. Please keep a supply to meet the demand.

Schering & Glatz, New York.

SALVAR MEDICINE CO.
ST. LOUIS, MO.

$5.50 PROFIT
on a
$6.00 ORDER

Would you spend 50c. to make $5.50 and at the same time insure the future regular patronage of twenty-five people? You can do it if you co-operate with us in the sale of

KRANK'S
PINK BLUSH
MASSAGE CREAM

A quality article, a toilet necessity so near perfection that in the short time it has been on the market the sales are wonderful.

Thousands of Dollars for Advertising

To tell the people of its merits and direct them to the druggists.

To make our plan a complete success, we wish your co-operation in selling an article of merit, under the *protected price selling plan*, which pays you a profit of 50 per cent. You have the same opportunity as your competitor, you buy and sell at just as low a price as he can

If you are interested in our proposition send for our booklet which explains all about our advertising campaign. How Pink Blush is marketed, and how to make $5.50 profit on a $6.00 order. Write us today.

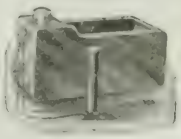
FORT WAYNE -:- INDIANA



Do You Like Dry Cigars—

The kind you bite off the end and blow the insides out in a cloud of dust.

Dry cigars never made new customers nor held old ones, and there is only one way to prevent dry cigars.

The Andrae Electric Moistener

with its automatic humidity controller is the best little business [illegible] that has ever been offered to the man who sells cigars.

The largest retail cigar [illegible] in the world is buying them in quantities because they increase trade.

If you want to make REAL MONEY out of your cigars install the Andrae Moistener.

COCOA POWDERS

You have not exhausted the possibilities in Cocoa Powder buying, without at least seeing what we can do for you.

We make nearly one hundred varieties, and certainly some one of them should suit your requirements. Our Cocoa plant is one of the finest in the world and we keep abreast with all improvements.

Our machinery enables us to furnish not only a Cocoa more completely freed from the oil than others but also **ANY** degree of dryness desired.

We can give you the Dutch processed Cocoa of highest grade and fully equal to the finest imported, and we can give under the same process, Cocoa that is slightly processed or heavily processed. We can give the same **QUALITY** of Cocoa not Dutch processed.

We can give you a Cocoa Powder that could only be sold at a small profit at $1.00 per lb., and from that absolutely pure Cocoa down to a price that would **SURPRISE YOU.**

If you are a large user we can and will make a blend solely for your purpose. We make only absolutely pure Cocoa powders.

We pack in barrels, half barrels, 50 and 25 lb drums and 10, 5 and 1 lb. tins.

PLEASE REMEMBER other manufacturers **MAY** be able to please you, **BUT** you should see what we can do before you place your contracts or orders.

PLEASE REMEMBER other manufacturers **MAY** be able to satisfy you, but **WE CAN** and our capacity assures you of prompt deliveries.

YOU SIMPLY DON'T KNOW UNTIL YOU TRY

Re Price Protection on SANATOGEN

We wish to reiterate with all emphasis that as the sole licensees of the United States Patent under which Sanatogen is manufactured and sold, we are invested by law with the privilege to insist that retailers strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating this condition renders himself liable to injunction and damages.

Gentlemen of the drug trade, this is no mere "say-so," but a true statement of fact. We do not wish to intimidate anyone, but merely to give proper notice that we mean to enforce our rights wherever necessary.

This means *true protection*, the kind of protection that gives everybody a square deal and puts the small druggist on an even level with the biggest "chain corporation" or department store.

Three sizes, sold by all wholesalers and jobbers, at $9, $17.25 and $33; to retail at $1, $1.90 and $3.60, and *no less*.

Write to us today for effective display matter.

THE RIKER-HEGEMAN COMBINATION.

Our news story in this issue on the Riker-Hegeman combination is sure to be read by all druggists with unusual interest. It is the only authentic story that has been printed in regard to the consolidation of these big retailers.

The growth of this business reads like a story from the Arabian Nights. Its larger development has been within the past ten years and the active head of this great concern did not graduate from the N. Y. College of Pharmacy until 1896, only 14 years ago, Its capital stock of $15,000,000 has doubtless been fixed on its earning capacity, with a reasonable excess for further extensions. Its annual sales of some $9,000,000, for 58 stores, makes an average of some $150,000 sales for each store. To further appreciate the significance of these figures one should know that there is but one wholesale drug concern in the country that is credited with such large sales, and it includes paints and oils, alcohol and other heavy items to make up its total sales. There is but one manufacturing pharmacist who does a business approaching ten million dollars a year.

That there are such possibilities in the retail drug business is a surprise to most of us. In no other locality could such results have been accomplished, and the department stores are entitled to credit for the methods pursued. The growth of these drug stores has without doubt, as the manager says, done much to keep the sundry business with the druggists and for this let us be thankful.

One point of importance is the attitude of the big chain towards other druggists. The Riker-Hegeman idea is to "mind our own business" and let rivals take care of themselves. If some of the druggists who are fighting the corporation would adopt that policy and devote the time to adopting modern methods, brightening their stores, improving their service and getting up-to-date, they would be able to hold their own and the big chain would cease to be a "menace." It must be remembered that the chain holds no copyright on cleanliness, fresh paint, attractive fixtures, first-class stock and polite and efficient service. Many retailers now realize this fact and have no fear of the chain stores.

We all sympathize with the man who suffers from these innovations in business, but they cannot be prevented so long as there is open competition and the spirit of progress prevails. Personality counts for a great deal in the retail drug trade. The success of a drug store depends more largely upon the

man at the head of it than is the case in any other branch of retailing. There is consolation in this fact for the protection it gives to every druggist, particularly when he is called upon to meet the competition of chain stores and these great combinations.

Manager Cosden generously states, that if the Riker stores have done anything worth copying the retail druggists are perfectly welcome to utilize such ideas in their own way. We have confidence in the business sagacity of the retail druggists to act on this suggestion, and we have given so much space to the story of this great corporation with the hope that it will be a stimulus to every other retail druggist.

There are many live, up-to-date druggists in the prosperous cities and towns of this country, but there is room for many more, and the ERA proposes to be a factor in their development.

AN OUTSIDE VIEW OF CHAIN STORES.

In a thoughtful address, President E. M. Allen, of the New Hampshire State Ph.A., anent chain stores and price cutting, says:

The secret of the success seems to be one of the chief longboxes of the big druggist at the present time, and it behooves me a regularly devoted to make suggestions regarding the matter. Such a disinterested observer can sometimes see things in a clearer light than the man who thinks he is going to be hit, and I offer this idea which is not new, i. e., to business conducted always carried on at a fixed and definite percentage of profit, and if any article or class of goods is sold below a reasonable profit, it follows that some other article or class of goods must be sold unreasonably high to bring up the average. To illustrate: I recently saw in the window of a cut-rate store a bottle of well advertised patent medicine, tagged at 38 cents, which was 12 cents less than the legitimate profit which such goods should yield. In the same window was a hot water bottle marked 89c which might have been sold at 79 cents and yielded a fair and living profit.

The public will not be forever fooled, and I believe the druggist who does an honorable business at legitimate prices need not worry, and in the end will win the confidence of the people. There is this comforting assurance: That, while the opportunities for great financial success in the drug business are not large, the failures are surprisingly few and far between.

Chains or no chains, city or country, what President Allen says seems to hit the target right where the bull's eye is located.

DOPE-FIENDS AND THE DOCTORS.

Prof. W. A. Puckner, in a lengthy letter, quotes the following from an ERA editorial:

"If the physician does not desire to have it known that he writes prescriptions for dope-fiends he has his remedy in refusing to continue that branch of his practice."

Overlooking the fact that this applies only to the less conscientious members of the medical profession, the professor proceeds to read the ERA a lecture upon what the physicians generally desire in the matter of anti-cocaine legislation, in doing which he misrepresents our position, no doubt thoughtlessly. But when he tries to torture the quoted paragraph into "a deliberate misrepresentation" of the entire medical profession he is going to an extreme which is absolutely without justification. There was no "insult," either real, or implied.

The ERA fully appreciates the attitude of high-minded physicians with respect to the New York Anti-Cocaine Law and agrees with them that some measure ought to be devised to conceal the use of the drug in legitimate cases of medical treatment, but the problem is, how to do it without throwing down the bars to illegitimate traffic in this much misused and dangerous commodity. This menace to civilization must be cured and the drastic New York law making unauthorized possession a crime seems to be the only effective remedy. Until some feasible amendment can be devised it is likely to do a great deal more good than harm, much as it is to be regretted that there are possibilities in the latter direction. Prof. Puckner should remember that the medical profession has its sprinkling of black sheep, just like the ministerial, the legal, the pharmaceutical and other professions and we confess surprise that he should mix the good with the bad in such an indiscriminate manner.

N.A.R.D. CONVENTION AT PITTSBURG.

Despite the defection of the Philadelphia association, there promises to be a large attendance at the convention of the N.A.R.D., at Pittsburg, beginning on Sept. 12. In a previous issue of the ERA President Huhn gave an outline of the subjects which he will present and consideration will also be given to other matters. The action of the members in relation to dealing with dispensing doctors will be awaited with interest. This is certainly a very delicate proposition and the N.A.R.D. will be open for congratulations if it can be deposed of with the necessary degree of diplomacy. The entertainment provided will be generous and the druggists who attend will have no reason for regret.

THE NEW ALCOHOLIC MEDICINES LIST.

A curious feature about the new Government alcoholic medicines list, which is printed on pages 910 and 912, is that so many of the preparations are of comparatively local existence. Of the 200 or more named, one of the largest wholesale houses in New York carries only ten items, while many large jobbers do not deal in more than half a dozen. As the ERA is National in scope, all of the items will interest at least a few of our subscribers in some section of the country, no matter how remote. Some druggists, perhaps, have never heard of any of the remedies, in which case they will have no reason for worry.

New York *Times* must have plenty of space to burn when it can give up half a column to favoring the elimination of druggists and the dispensing of medicine exclusively by doctors. As the correspondent, "Paul Norwood," seems to be better posted about the physician who "knows who manufactured his preparation" than about other features of professions of medicine and pharmacy the force of his argument will be lost upon members of the professions affected, while the public will continue to regard the situation from its own point of view.

Ingenuity in violating the anti-opium laws is shown in the recent discovery at Washington that the banned drug is being concealed in ointments, which are said to affect the dope-fiends in the same way as does the unadulterated drug. A bill in the last Congress, meant to deal with precisely such evasions, was defeated as unnecessary.

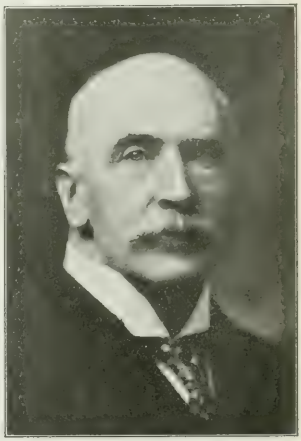
Montreal druggists evidently do not know a good thing when they see it. They are fighting hard against a new law compelling them to close their stores on Sunday. So far they have secured liberal fines for keeping open, but they threaten to close on Sundays as a remonstrance unless the law is repealed. This, they believe, will force the repeal.

Riker-Hegeman Will Be the Biggest Retail Drug Co. in United States.

Merger of Two Great Chain Store Systems Makes Corporation of Enormous Buying and Selling Power—Figures in the Millions—Evolution and Growth of the Two Properties—Policy Not to Fight Smaller Retailers, Nor to Establish New Stores Everywhere and Indiscriminately—Prevented the Department Stores from Monopolizing Retail Drug Trade.

EDWARD D. CAHOON,
treasurer of the Riker Co.

ALFRED H. COSDEN,
general manager Riker Co.



GEORGE RAMSEY,
general manager Hegeman Co.

With the coming of October the merger of the two great Riker and Hegeman chains of retail drug stores will become effective and the Riker-Hegeman Co. will take over the 58 drug stores now operated by the two corporations, conducting the business through the medium of a new corporation incorporated under the laws of the State of New York, with a capitalization of $15,000,000, divided as follows: preferred stock, $5,000,000; common stock, $10,000,000. In the merger the allotment of stock in the new corporation will be based approximately as follows: for Riker stock, 60 per cent; for Hegeman stock, 40 per cent. At the time of closing this issue of the ERA the exact figures had not been determined, the auditors and accountants being still at work.

In these days of enormous capitalizations, $15,000,000 does not mean much and in fact is very conservative when the property interests and business involved are considered. The new concern will have an approximate buying power of $6,000,000 and its sales for the year are estimated at $9,000,000. Besides the 58 retail stores, there are large warehouses and manufacturing plants, while the investments in fixtures, etc., including the best soda fountains obtainable, aside from stock, are enormous. The two corporations employ about 2500 people, including a large number of registered pharmacists.

This event, which is one of the most important in the history of retail drugdom, has created the greatest interest throughout the country and has caused the publication in many newspapers of most sensational statements, with the natural result that many retail druggists have been driven into a state of fright bordering on collapse.

In some localities there is a disposition to fight the new chain and the American Druggists' Syndicate has announced its intention of taking up the cudgels for the small dealers who are members of that association and who may be affected by the competition of the new chain corporation. The situation is an intensified revival of the scare of last Spring, when rumors of the merger were freely circulated and promptly denied.

The Parties to the Merger.

William B. Riker & Son Co. is capitalized at $2,500,000, and its directors are: Alfred H. Cosden, William C. Bolton, Edward D. Cahoon, Joseph H. Marshall, John B. Cobb, Wilbur J. Rash and William P. Gilmour.

The firm of Hegeman & Co. is capitalized at $6,000,000, and its directors are: John H. Flagler, George Ramsey, R. Bleecker Rathbone and Frederick H. Pouch.

John H. Flagler, president of the Hegeman Co. will be president of the new organization; Alfred H. Cosden, now president of the Wm. B. Riker & Son Co., will be first vice-president, and George Ramsey, vice-president of Hegeman & Co., will be selected second vice-president. Frederick H. Pouch, who is treasurer of Hegeman & Co., will be treasurer of the new corporation, and Edward D. Cahoon, treasurer of the Riker concern, is to be secretary. It is understood that the general manager will be Mr. Cosden, who has been so phenomenally successful in perfecting the organization of the Riker chain of stores.

Friendly Rivals Get Together.

"The merger simply means a combination of the interests of two friendly rivals," said Mr. Cosden recently. "Both companies have had a habit of attending to their own affairs and all talk of prospective war between them was mere vaporing. Speaking for the Riker interests, we have simply taken advantage of the opportunities offered in New York and a few other places that were not appreciated by others.

"In merging the two corporations there will be the economies due to vastly increased buying power and to a single system of administration. I am a great believer in the value of newspaper advertising and both corporations have been liberal advertisers. Under the new deal the advertising for one will do for both. The space can be doubled, if we so desire, without increased cost, or the total can be reduced with a saving and yet produce much larger results.

"The merger is primarily a matter of business, but many of the stockholders have long been on friendly terms and they can work better pulling together than they can separately. The advantages ought to be obvious to anybody."

"It is to be presumed that economies will be effected through closing either Riker or Hegeman stores where they are closely in competition, is it not?"

"That is a matter of detail. There are probably not more

[illegible]

Future Plans of the Corporation.

"But both corporations have been opening new stores right along," said the ERA man.

"Headed Off the Department Stores.

"We are not trying or did we ever try to exterminate the [illegible]. We have great respect for him. Many of the unkind things some of them have said about us were not warranted. If the Riker Co., the Jaynes Co., or the Hegeman Co. had not been aggressive the drug business in New York and Boston would be in the hands of the department stores today, and that would be the meanest kind of competition they could possibly have. It would not only be bad for the smaller druggist, but worse for the drug clerks.

"As now conducted I consider our stores a help to pharmacy. We have elevated the standards and have shown how success can be attained. Speaking of the department stores, I wonder if the small dealers have ever thought of where their trade in toilet articles and numerous other sundries would have gone had not our companies taken hold of that branch of the drug business and by extensive advertising and specialization kept these lines within the drug trade, where they naturally belong.

"But for our efforts the department stores would have taken over these lines long before now and people afflicted with the department store habit would have ceased going to drug stores for anything except drugs. In this respect we have been of decided benefit to all retail druggists in our field, including our immediate competitors. I wonder if they have ever thought of that.

Of Benefit to the Drug Clerks.

"[illegible] fairly well paid, and we give employment to many. If the drug business was in the hands of the department stores, they would employ very few registered men, the balance would be boys and girls, mostly girls, at $5 or $7 per week.

"[illegible] right, knows that a Riker store is as straight, clean, and honorable toward the public, the profession, and its employees, as we know how to make it, and that cannot be anything but helpful to the greatest number.

"There will be times when another druggist may feel our [illegible] Noah's Ark first lit on Mount Ararat, and will continue."

Reports of Plans of Invasion Denied.

"The newspapers say that you are planning the invasion of Philadelphia, Washington and Baltimore, as well as other [illegible]

"There is no truth in the reports; we have nothing in view in the cities you name. We are confining our efforts to the New York metropolitan district and to New England. We have opened stores in Brockton, Lowell, Lawrence and Salem. We will open in Worcester, Springfield, Haverhill, Lynn, New Haven and other New England towns when we find what we [illegible]

Not Looking to Get the Liggett Stores.

"[illegible] by the United Drug Co., and later transferred to the Louis K. Liggett Co. Is that true?"

"[illegible]

"[illegible]

men we would consider any good proposition which might be submitted, but I do not see any probability in connection with the Liggett stores."

"Do you [illegible] buy or take over old stores or install entirely new ones?" was asked.

"That is a matter of expediency. If we take over an old store as a rule we have to make extensive alterations and improvements to bring it up to our standard. The Goldthwaite store in Brockton was practically cleaned out. We don't want any junk shops."

"You have noticed the statement to the effect that your new corporation might take over the American Druggists' Syndicate, have you not?"

"It is a little brokerage concern for small druggists."

"I suppose you have noticed the reports of druggists combining to oppose you?"

"No, we know nothing about other druggists combining to fight us. We are too busy trying to attend to our own business. If we do get a day off, we would rather go fishing or play with the children.

"We do, however, think there are at least two promoters around this part of the country, who are putting their hands into the smaller druggists' pockets and trying to hold us in front of their eyes so they will not see what the promoters are doing."

Some of the Ingredients of Success.

"To what do you attribute the success of the Riker chain of stores? Can you tell me something about your methods?"

"I am a very ordinary specimen to undertake to tell business men how to conduct a business," said Mr. Cosden, "and if you will excuse me, I will not try. None of my efforts have been trade-marked, and if anything I have done is worth copying or considering, everybody is free to help themselves. Please do not think our present business is a work of my hand or head. We have with us the best lot of hard working, clear thinking young men that ever lived. Most of the credit is due them.

"I may say that our features and methods are everlastingly simple. Everything is systematized and we depend on system. System tells us every day, every week, every month just what we are doing. The trade is carefully watched by capable men, whom we hire for that purpose and adjustments are made to meet conditions. We must have capable men. If a man is not capable, he is replaced by another. We have our local managers, our store managers and our department managers, all of whom must be attentive to their duties, while the clerks are expected to do their share in the general uplift.

"The department heads are expected to thoroughly exploit their own branches. The advertising man, for instance, takes care of the newspaper advertising, the window dressing and does it all, whether it be contracting for a whole page of space in a newspaper, or the purchase of a tack for the window-dresser. He is responsible for everything. Newspaper advertising is the best form of publicity in the world, if you [illegible]

In a Nutshell: Good Policy, Good System, Good Men.

"But will you not tell us what you consider the three most important things in a business?"

"Well, I will venture an opinion on that. The whole proposition, as I see it, is: Have a good policy, get a good system and get good men, the system to include a first-class auditing department. System will tell you if the men are good. At the end of the month you have the results to show. To my mind it is a toss up, outside of good policy, which is the more important, good men or good system. It is easier, however, to get the system than the men.

"Hard work is not the sole criterion of usefulness. A man can work awfully hard in trying to do well and yet do a lot of mischief, losing money for the concern. Efforts must be put forth in the right direction.

"As an incentive to future efforts and a reward for past endeavors, a profit-sharing plan was put in effect in the Riker company about three years ago, whereby certain employes who had shown themselves to be deserving were given an opportunity to acquire stock in the corporation. The plan of payment was ten per cent each year for five years, the company crediting an equal amount to that paid by the employe on each installment.

"[illegible]

necessary. We have to depend upon it and it is unfailing in keeping us informed.

Keeping in Sympathy With Public Demand.

"We ascertain what the public wants and promptly supply the demand. People want new fads and fashions and we are always on the lookout for something new. Drug store fashions cannot quite be compared with other lines, in which big bonnets, or pink shirts, or something of the sort may be popular, but new things are being constantly introduced.

"We do not, however, take up an article simply because it is new. As a matter of fact, about 90 per cent of the new things should not come out at all. A druggist could not do anything worse than sell to a customer some new thing that would prove disappointing. Still some of them do it. If a man signs a 21-year lease he must treat his customers right. He must not milk his customers dry at the start, or at any other time. This is realized by the better class of retail druggists."

The Property Affected by the Merger.

No complete or accurate list of the property involved has been published in any paper, but the ERA furnishes the same herewith. The property of both corporations, under the agreement recently signed, will be turned over to the new corporation, all of the parties affected having "put everything in the same pot," as one of them expressed it.

The Riker interests, in addition to the big warehouse and laboratory at 109 West 27th street, will put in no fewer than 38 drug stores. The Hegeman contingent, in addition to its warehouse and laboratory at 66 West 132d street, contributes 20 stores to the combination. These stores are located in various cities and this is a complete list:

RIKER'S.

Origin and Growth of the Hegeman Co.

The name of Hegeman has been prominent in New York drug circles for many years. The father, William Hegeman, was with Rushton & Aspinwall, which became successively Hegeman & Co., with the son, J. Niven Hegeman as partner, in 1875, then J. N. Hegeman & Co., to 1895, with J. N. as head of the concern. In the latter year J. N. Hegeman died, after a business career of 40 years. At the time of his death the Hegeman chain consisted of stores at Broadway and 9th street, Broadway and 30th street, 450 Third avenue and Fifth avenue and 59th street. In 1904 the Broadway stores were consolidated, but within a short time all of the four mentioned were closed, there remaining only an additional store, in the Park Row Building, which, as the last of the original J. N. chain, was acquired in 1906 by the present Hegeman corporation, together with all right and title to the J. N. corporation.

There were formerly two corporations of similar names, one being the Hegeman Co., which bought a J. N. Hegeman store at 213 Broadway, in 1875, afterwards moving to 196 Broadway and being controlled by H. T. Cutter, Mrs. Cutter and George Ramsey. In April, 1899, this Hegeman Co. was sold in part for $200,000, the Cutter interest going to Mr. Ramsey and two friends whom he brought into the business. On the reorganization, W. H. Flagler was chosen president, Mr. Ramsey was made vice-president and R. B. Rathbone secretary. Then began the development of the new chain of stores under the Hegeman name. Additional land was acquired in Broadway and plans were made for the splendid building at 200 Broadway now occupied by the corporation and which was opened in 1903.

Expansion was not delayed while the new store was being built, for within the first year the first branch was opened in 125th street, at Seventh avenue. A year later the 155th street branch was opened and then followed an interval in which the three stores mentioned required time and attention. In 1903, the 149th street store was opened, but it was not until 1905 that expansion was again resumed. In the latter year the corporation acquired the A. C. Searles store at Broadway and 101st street and added a branch in Lenox avenue. In 1906 the organizers were active and three branches were added, a new one in Times Square, another at 644 Fulton street, Brooklyn, and the J. N. Hegeman pharmacy in the Park Row Building.

In 1907 the Knickerbocker Pharmacy at Broadway and Bleecker street, became a Hegeman branch and in 1908 two more were listed. One was the Griffen-Wray drug store in Yonkers and the other a new store at Third avenue and 112th street. No fewer than seven branches materialized in 1909. These included the Jersey City store, the 1095 Broadway (Brooklyn) branch, one at the corner of Tremont and Washington avenues, Eighth avenue and 125th street, Broadway and 80th street, 180th street, Broadway and 86th street. In January of this year the 136th street branch was established.

Development of the Riker Chain of Stores.

The Riker stores date back to 1846, when William B. Riker, (who died in 1906, aged 85,) started the first store in Sixth avenue, one store removed from 22d street. His son, William H., later entered the business and the firm became Wm. B. Riker & Son. The son was extravagant in his business ideas. He rented the next store and enlarged to take in the corner, at the same time installing one of the largest and most costly fountains obtainable. This of itself was not the sole cause of his financial troubles, for he gave attention to other matters that interfered with his business. It was about 1892 that the Wm. B. Riker & Son Co. was purchased by practically the present owners, including W. C. Bolton, E. D. Cahoon, D. J. Runyon and J. H. Marshall. Others have since come in and additional capital has been invested.

The new owners moved the store to the present location at Sixth avenue and 23d street. Expansion first began in 1899, when the Broadway and 9th street branch was established. The success of both propositions was gratifying, but development was slow and conservative. It was not until June, 1904, that the company acquired the five Bolton stores in Brooklyn, same having been established beginning in 1875 and being in successful operation. Thereafter expansion proceeded more rapidly. A couple of new branches were opened in New York as a starter and since then the company has continued that policy until the number in New York has grown during the last six years to 18 stores.

Meanwhile expansion went on in other directions. In March, 1907, the Riker interests bought the five stores of Charles P. Jaynes & Co., in Boston, later buying the two Lewis stores in the same city. The company now controls

[illegible] stores in Boston. In May, 1909, one of the finest of these was opened in Tremont Street.

Speaking [illegible] in New England began about two years ago and [illegible] Riker stores in Lawrence, Lowell, Brockton and Salem. Locations for stores in several other New England [illegible] have been selected. Branches have been established [illegible] in Newark, N. J., and in Mt. Vernon, N. Y.

The Men Who Have Done the Organizing.

The [illegible] men in the two merging corporations include George Ramsey, of Hegeman's, Alfred H. Cosden and L. H. [illegible] of Riker's. As vice-president and general manager of Hegeman's Mr. Ramsey has been active and has [illegible] for the expansion of that corporation.

Mr. Ramsey was born in Mountmellick, Queens County, Ireland, in 1853 and was educated in a private school of which his father was the principal. It was the expectation that he would become a physician, but he became a pharmacist. In 1872 he went to Canada and became an apprentice in the drug store of Thomas G. Poyntz, at Orangeville, Ontario. Two years later he went to Toronto and entered the employ of Shapter & Owens, taking a position with college privileges to enable him to study at the Ontario College of Pharmacy, from which he graduated in 1875, capturing the first prize. In 1879 Mr. Ramsey came to New York and started with Hegeman & Co., as a prescription clerk. His abilities were quickly recognized and promotion followed.

Mr. Cosden, as president and general manager of Riker's, has been able to produce extraordinary results. Mr. Cosden is only 38 years old and has been in the drug business from the ground up, for 18 years of that time in the Riker stores. He was graduated from the New York College of Pharmacy in the class of 1896.

Mr. Cahoon, treasurer of Riker's, is a graduate of the Philadelphia College of Pharmacy of the class of 1885. He has been a stockholder in the Riker corporation since it came into its present control and preceded Mr. Cosden as general manager. He also has been active in the work of pushing the corporation's expansion and increasing its business.

TIME TO PHOTOGRAPH GODDARD EXPERIMENT.

His A.D.S. Chain Store Model is Being Renovated and His Nearest Competitor Leaves Open Field.

It will soon be time for C. H. Goddard, secretary of the A.D.S., to photograph his drug store at 70th street and Broadway as the much-talked-of improvements are finally under way and will soon be completed. The display windows are being built several feet further out over the sidewalk on the Broadway and Amsterdam avenue sides and several doors will be blocked in. In the rear, the store will be enlarged by cutting entrance into a florist's shop which has been recently vacated and a new 25-foot soda fountain will be placed in this addition. The sum expended on these improvements, it is rumored, will amount to $10,000. The business is at present being conducted under the name of Pond, Bowes & Cartwright and checks signed Le Bar & Bailey. The latter name as published in a previous ERA is serving similar purposes for a small drug store situated in Second avenue, between 70th and 71st streets, in which Mr. Goddard is [illegible] said to be interested.

H. A. Willmott, 220 Amsterdam avenue, whose drug store is [illegible] from Goddard's Broadway [illegible] and who is an A.D.S. member, will [illegible] to the corner of West End avenue and 70th street, because of increased rent and not, as was asserted, from any strenuous competition. Mr. Goddard's nearest competitor now is Riker's 71st street store, against which he will have a clear field to show "a net earning on capitalization after renovation of 25 [illegible]

RETAILERS WILL OPPOSE NEW CORPORATION.

All Pharmaceutical Organizations in New York City and State Will Unite Against Chain Stores.

The [illegible] of the [illegible]," said Peter Diamond, ex-president of the N.Y.S.Ph.A., in a recent interview, "will attempt to oppose the merged interests of the Riker Co. and the Hegeman [illegible] [illegible] [illegible]

Interesting Features of the Meetings of 24 State Associations.

Missouri Meets in a Tent City, Discusses Important Subjects and Starts Endowment Fund—Supports W.O.N.A.R.D. Crusade Against Obscene Advertisements.

MARYVILLE, Aug. 20.—The 32d annual meeting of the Missouri State Pharmaceutical Association was held recently in a tent village erected for the purpose on the campus of the State Normal School. Dr. James H. Beal, chairman of the board of trustees of the U.S.P. Convention, was the guest of honor and delivered a very comprehensive and interesting address on pharmaceutical, trade, legislative and educational matters. He was later elected an honorary member. The J. H. Beal Endowment Prize Fund was started by Dr. Beal with a contribution of $100. The interest will be used in paying the first year's dues in the association for the applicant for registration making the highest general average in a Missouri board examination during any year.

Missouri Ph.A. guest and officers: (reading from left to right) standing, guest, James H. Beal; secretary council, Otto F. Claus; president, Walter C. Bender; second vice-president, Mrs. D. V. Whitney; permanent secretary, Henry M. Whelpley; assistant secretary, Louis Lieberstein. Seated —third vice-president; C. Liersch; first vice-president, C. E. Meyer; vice-president council, D. V. Whitney; chairman council, W. K. Ilhardt; councilman, C. L. Wright; Councilman, E. G. Schroers.

Treasurer William Mittelbach, of Boonville, reported a net membership of 491 and a cash balance of $418. Delinquents to the number of 39 were dropped from the roll. The association reaffirmed its affiliation with the N.A.R.D. by voting the usual financial support.

The suppression of obscene advertisements, which was brought to the attention of the association by the W.O.N.A.R.D., was unanimously endorsed.

The "Pharmacopœia" was the subject of a report submitted by William Mittelbach and Mrs. D. V. Whitney read a paper on "The National Formulary." The restriction of itinerant vendors constituted a subject for considerable discussion and it was decided to make an effort this winter to secure the legislation necessary in this direction. A resolution was adopted, seeking the proper recognition of pharmacy in the bill for the establishment of a government health department. The members of the Mo.Ph.A. and the Mo.Ph.T.A. seriously considered the abandonment of the plan for soliciting goods or money from the manufacturers and jobbers with which to conduct their meetings. In the future, they will probably look to the towns wanting the convention to provide the entertainment funds. The officers elected are:

President, W. C. Bender, St. Joseph; first vice-president, Chas. E. Meyer, St. Charles; second vice-president, Mrs. D. V. Whitney, Kansas City; third vice-president, C. Liersch, Kansas City; permanent secretary, H. M. Whelpley, St. Louis; assistant secretary, Louis Lieberstein, St. Louis; treasurer, William Mittelbach, Boonville; local secretary, will be elected by council which consists of Wm. K. Ilhardt, chairman, St. Louis; Otto F. Claus, secretary, St. Louis; D. V. Whitney, Kansas City; Ed. C. Schroers, St. Joseph.

The next meeting will be held the second Tuesday in June, 1911, at a place to be decided upon by a committee of which Mr. Mittelbach is chairman.

Fireworks on the Normal athletic grounds, a ball at the Elks' Club and a baseball game between the pharmacists and the travelers were enjoyed by the visitors. The chairmen of the various entertainment committees were: Ladies', Mrs. H. M. Whelpley; pharmacists', A. S. Ludwig, and travelers', Wm. H. Lamont.

The Missouri Pharmaceutical Travelers' Association elected as officers for the ensuing year:

President, W. F. Kahre, St. Louis; first vice-president, Claude Coon, Kansas City; second vice-president, Oscar Smith, St. Joseph; third vice-president, D. C. Durland, Kansas City; secretary, Roy Walker, Kansas City; assistant treasurer, Charles Schall, St. Louis; assistant secretary, C. W. Tritschler, St. Louis.

IOWA PHARMACISTS OPPOSED TO VENDORS.

W. R. Beck Heads Ph.A. for Ensuing Year and W. A. Harper is Elected Travelers' President.

DES MOINES, Aug. 20.—The 250 pharmacists who attended the recent 31st annual meeting of the Iowa State Pharmaceutical Association were welcomed by Mayor James R. Hanna, the response being made by Professor W. J. Teeters, dean of the State University School of Pharmacy. In his annual address, President Frank B. Clark, Ottumwa, advocated the enactment of a State law prohibiting itinerant drug vendors from operating in Iowa. He declared that more than 300 vendors of drugs have licenses to sell in the State and their operations not only interfered with the "legitimate" retailer's business, but lowered the standard of the profession. Some of the corporations, he said, would make an effort at the next session of the legislature to reduce the vendors' tax from $100 a wagon to $100 for the concern. "Iowa is one of but seven states in the Union where itinerant drug vendors are permitted to do business, and the Government prohibits them in all of its possessions," he said. Mr. Clark discussed the advisability of having the law changed so that pharmacists would not handle liquor at all. He also urged that the pure drug law be altered so as to permit changes in labels.

President Clark's remarks on the itinerant vendor situation met the entire approval of the members and he was ably seconded by Thomas H. Potts, secretary of the N.A.R.D., who declared that in many cases itinerant vendors were diagnosing and prescribing and in this way violating the State law by practicing medicine without licenses.

Ex-president Edwin Franken, of Sigourney, chairman of

the trade committee, expressed himself as opposed to the present United States law providing that no drug that can be used to a detrimental extension shall be sold in Iowa. It should be repealed. There is no sane reason for its existing on the statutes. He said: "The law prevents these drugs from being sold in preparations of 10 per cent strength. It would be impossible for it to be used to bring about a criminal operation."

Subjects coming up for considerable discussion were the need of a law compelling physicians dispensing their own medicines to state the ingredients on bottle, the poisoning of advertising containing immoral literature and pictures, by pharmacists, and the desirability of inter-state exchange of registration certificates with Iowa. Resolutions incorporating the two latter points were adopted. The proposal of a syndicate to establish a chain of drug stores was condemned as a hindrance to trade, and in the report of the committee on pharmacy, Chairman, Miss Zada M. Cooper, Red Oak, the sale of soft drinks to children and of narcotics and alcohol were censured.

Auditor of State, J. L. Bleakly, spoke shortly on mutual insurance companies in Iowa, dwelling, in particular, on the Iowa Druggists' Mutual Insurance Association, which now carries risks amounting to $291,000, and which paid out last year $1,081 for losses. The association returned a dividend of 5 per cent in 1909 as excess paid in premiums.

These officers were elected:

President, W. R. Beck, Des Moines; vice-presidents, M. L. Hartwig, Radcliff; M. G. Heilberger, Grundy Center; George Judd, Algona; secretary, J. M. Liddy, Whitfield, treasurer, J. B. Webb, Des Moines; executive committee, E. M. Burns, Mason City, N. E. Reed, Ottumwa, A. C. Wilson, Oelwein.

The next meeting will be held at Davenport. An automobile tour of Des Moines, a card party for the ladies and a smoker for the men, a theater party, a baseball game and a banquet were the features of the entertainment gotten up for the visitors.

The Iowa Travelers' Association elected these officers:

President, W. A. Harper, Ottumwa; vice-presidents, W. G. Hagy, Des Moines; C. T. Clark, Des Moines; A. N. Harris, Ottumwa; secretary-treasurer, F. V. McGraw, Ottumwa; executive committee, Geo. W. J. Williams, Oskaloosa; Bess Campbell, Ottumwa; Edgar Hertford, Omaha; A. W. Rader, Des Moines; Roy Cooke, Des Moines.

"TEMPERATE REFORMERS ARE INCONSISTENT."

Utah Ph.A. Member Says Prohibition Office Holders are First to Ask Druggist to Break Law.

LOGAN CITY, Aug. 20.—At the recent 10th annual meeting of the Utah State Ph.A., T. R. Kelly, Springville, discussed the prohibition question from the standpoint of the retail druggist. He called attention to the lack of consistency among those who put in effect temperance reforms, asserting that the men who are elected on prohibition platforms are usually the first to ask the druggist to break the law. "The view of the ultraprohibitionists seems to be that they should be permitted to secure what liquor they may need for legitimate purposes but that all others should be made to obey the letter of the law." Mr. Kelly's opinion was that the law should permit any good citizen to obtain all the liquor he might need for legitimate uses and that it should be made a felony to secure liquor for illegal purposes.

Other matters to receive the consideration of the association were the non-enforcement of the State law relating to the sale of morphine and cocaine, the failure of the police to act meeting with the disapproval of the members, and a proposition to endorse the Owens national health bill which fell through.

The report of the Board of Pharmacy showed a total of 285 registered pharmacists and 36 assistants practising in the State. The following officers were elected:

[illegible] Dr. W. A. Wilson, Dr. [illegible] Dr. W. A. Wilson, Salt Lake; Dr. G. H. Fennemore, Beaver; Dr. J. A. Roberts and Dr. A. [illegible]

[illegible] The feature of the meeting was the banquet at the Eagle Hotel, at which F. C. [illegible] acted as toastmaster. Among those responding to toasts were B. F. Riter, F. A. Druehl and Dr. A. C. Smith. The Logan Boosters supervised the entertainment of the visitors which included an eight-mile ride through Logan [illegible]

DELAWARE PHARMACEUTICAL SOCIETY ACTIVE

Prominent Pharmacists Discuss the U.S.P. Convention and Eighteen New Members are Elected.

BRANDYWINE SPRINGS, Aug. 20.—At the 24th annual meeting of the Delaware Pharmaceutical Society, President B. H. Matthews having found it impossible to be present, the members were called to order by Chairman J. M. Harvey. Among the delegates from other associations were Dr. I. V. S. Stanislaus, Dr. Adolph W. Miller and John F. Hancock.

Reports from the various committees showed the society to be flourishing and active, 18 new members being elected. Of special interest was the report of the delegates to the U.S.P. Convention, it being entertainingly enlarged upon by both Dr. Miller and Dr. Stanislaus.

A lengthy communication from N.A.R.D. secretary, Thos. H. Potts, was presented and the society directed that a vote of thanks be conveyed to him.

The following officers were elected:

President, F. E. Gallagher, Wilmington; vice-presidents, New Castle County, W. A. Grant, Wilmington; Kent County, Ezekiel L. Clark, Dover; Sussex County, R. M. Kaufman, Seaford; executive committee, Wm. Poole, chairman; Miss S. V. Reynolds, T. H. Cappeau, all of Wilmington; treasurer, J. O. Bosley, Wilmington; secretary, F. H. Gray, Wilmington; nominees for State board vacancy, J. O. Bosley, Wilmington; W. B. Keyes, Clayton; O. C. Draper and N. [illegible] Downes, both of Wilmington, and Levi Scott, of Dover.

KANSAS PRESIDENT DENOUNCES ATTACKS.

City Handsomely Decorated in Honor of Visitors and Business Suspended While Prof. Hallberg Speaks.

SALINA, Aug. 20.—During the recent convention of the Kansas State Ph.A. the city was splendidly decorated in honor of the members and during an address by Prof. C. S. N. Hallberg, of Chicago, business was suspended in the local pharmacies. President A. E. Topping, of Overbrook, made an attack on the newspapers of the yellow type, claiming that they are doing an injustice to the druggists by conveying the impression that a majority of the products of the drug stores are below standard and leaving the impression that the druggists are trying to defraud the public and are opposed to standard products and the pure food and drug laws. He declared that the people put too much confidence in the family newspaper and suffered thereby.

Topeka won the honor of being the next place of meeting and the election of officers resulted as follows:

President, George W. Kyle, Newton; vice-president, Henry Dick Lawrence; second vice-president, Clarence Reed, Salina; treasurer, Matt Wood, Topeka; secretary, Jacob Lowman, Pittsburg; corresponding secretary, Frank Smith, Herington; delegate, Prof. L. E. Sayre, Lawrence; executive committee, Andrew Hutchison, C. C. Holmes, Parsons; W. F. Boggs, Madison; R. B. Bird, Westmoreland; Charles Seitz, Sedan.

JURISDICTION OF STATE FOR MONTANA BOARD.

State Ph.A. Members Think Towns of Limited Population Should be Controlled Same as Cities.

ANACONDA, Aug. 20.—[illegible] the American Pharmaceutical Association was suggested by President Frederick A. Woodbury, of Great Falls, in his address presented at the recent 20th annual meeting of the Montana State Pharmaceutical Association. In advancing this union he elaborated on the professional benefits that would thus be derived. That it was time that the State pharmacy law, which has been untouched on the statute books for twenty years, be [illegible] to fit the present was also expressed by Mr. Woodbury and he further recommended that the legislature enact a law to curb the itinerant medicine vendor, and that the jurisdiction of the Board of Pharmacy be extended to towns of less than 500 population. The [illegible] was referred to a committee consisting of J. L. Kraker, Louis Dreibelbis, G. W. Sample, T. M. Kehoe and C. F. [illegible]

The formation of a women's auxiliary was the subject of much discussion and such a contingent to take place at

the next annual meeting at Hunter's Hot Springs. The following officers were elected:

President, C. R. Fuller, Anaconda; first vice-president, G. F. Peterson, Missoula; second vice-president, A. C. Roecher, Bozeman; third vice-president, Louis Dreibelbis, Butte; secretary, J. M. Seaman, Livingston; treasurer, A. D. Rose, Bozeman; board of trustees; J. F. Davies, Buttee; Albert Doull, Centerville; Alfred Whitworth, Deer Lodge, and Howard Rockefeller, Butte. Following names will be submitted to governor from which one will be selected as member of board: G. F. Peterson, Missoula; C. R. Fuller, Anaconda; A. D. Rose, Bozeman; J. A. Kelly, Forsyth, and A. C. Roecher, of Bozeman.

A trip through the Washoe smelter, the world's greatest smelter, and an informal reception and banquet at Dewey Hall were thoroughly enjoyed by the visitors.

VERMONT DRUGGISTS DRIVE IN THEIR AUTOS.

Prosperity in State Where 96 Per Cent of Registered Druggists Belong to Their State Association.

BARRE, Aug. 20.—That the druggists of this State are prosperous was in evidence when a majority of them traveled in their own automobiles to attend the 17th annual convention of the Vermont State Pharmaceutical Association at Lake Bomoseen, near Fair Haven. There were about 100 present, including the Traveling Men's Auxiliary and many ladies. A reception was given to members and guests by President and Mrs. Arthur L. Cheney, assisted by the officers of the association. Later the party enjoyed a moonlight excursion on the lake on the Steamer Arthur B. Cook. Dr. C. S. Caverly of Rutland gave the address of welcome, which was responded to by President Cheney, whose annual address was vigorous and to the point, containing several good recommendations. The following papers were read: "Harmony and Co-operation," by Mason G. Beebe, Burlington; "Effervescent Salts," by Frank L. Cheney, St. Johnsbury; "Bacterial Vaccines," by Clifford G. Maynard, Brattleboro; "How to Conduct a Successful Retail Store," by W. H. Hoyt, Burlington. The papers were exceptionally good and were discussed with considerable interest.

Excursion boat used by members of Vermont Ph. A. on Lake Bomoseen.

Secretary Terrill's report showed that 96% of the registered druggists in the State were members of the association, 21 new members being made at this meeting. The following officers were elected for the ensuing year:

President, Welcome B. Eastman, St. Johnsbury; first vice-president, Miss Agnes Quinlan, Bennington; second vice-president, Mrs. A. L. Cheney, Morrisville; third vice-president, Miss Elizabeth Gregg, Bennington; secretary, Willis E. Terrill, Montpelier; treasurer and assistant secretary, John M. Taylor, Bradford.

There were several athletic events and a game of baseball between the Druggists and Traveling Men, which was won by the latter. A ball was given by the Traveling Auxiliary at the pavilion. This was a most enjoyable affair and was attended by over a hundred couples. A picnic lunch was furnished in an adjoining pavilion.

TENNESSEE PH.A. CELEBRATES SILVER JUBILEE.

Itinerant Vendor, Sunday Closing and Liquor Sales by Pharmacists Discussed by the Members.

MEMPHIS, August 20.—Anti-itinerant vendor legislation, Sunday closing and liquor sales by pharmacists were some of the subjects hotly discussed at the 25th annual meeting of the Tennessee State Pharmaceutical Association recently called to order at the Gayoso Hotel by President W. I. Gates, of Whiteville. The 200 or more assembled members were welcomed on behalf of the Memphis R.D.A., by T. A. Robinson. Jesse L. Nelson, of Jackson, and D. H. Neil, of Nashville, responded.

In his annual address, President Gates urged the members to go on record against handling liquor for any other than strictly medicinal purposes. He said: "I believe that we druggists, as practical, honorable business men, should wash our hands clean of the liquor taint in connection with our stores." Mr. Gates also assailed cut rates and bargain days in drugs, which he asserted demoralized the trade. He further urged that an attorney or some competent person be employed by the association to work with the legislative committee and superintend desired legislation.

Many of the members were very bitter against operating drug stores on Sunday and resolutions were adopted which may result in very stringent legislation. The next Legislature will also be asked to enact a law requiring medicine vendors to pay an annual tax of $1000 to the State. The following officers were elected:

President, Carl M. Renkert, Memphis; vice-presidents, R. L. Coley, Milan; Ernest Finch, Nashville, and J. J. Ingle, South Pittsburg; secretary, E. F. Trolinger, Nashville; treasurer, M. E. Hutton, Nashville; nominated for State board vacancy, W. J. Cox, Bolivar; W. A. McBath, Knoxville; F. L. Stevenson, Columbia; J. A. Loyd, Pulaski, and R. L. Thompson, Nashville.

Over a hundred new members were admitted. Next meeting will be held at Nashville.

Features of the entertainment were theater parties, a steamboat ride on the Mississippi, an automobile ride about the city for the ladies, and a banquet at the Hotel Gayoso, the last in celebration of the association's silver jubilee. The banquet was also the occasion of the presentation of a beautiful gold Masonic emblem to Secretary E. F. Trolinger by a number of his fellow members. The presentation speech was made by Frank W. Ward, who presided as toastmaster. The testimonial was in recognition of Mr. Trolinger's eight years of service as secretary of the association.

DRUG STORE IS NOT THE PLACE FOR A WOMAN.

Washington Ph.A. Members Think Women Clerks as Competent as Men, but Can't Stand Long Hours.

TACOMA, Aug. 20.—Possibly 100 members attended the 21st annual meeting of the Washington State Pharmaceutical Association recently presided over by President Dr. William M. Beach, of Shelton. The payment of a fee of $25 to the Federal government and the same amount to the State government for the privilege of selling liquor only on the prescription of a physician aroused considerable indignation. Dr. Beach voiced the members' opinions when he said:

"The safest thing to do is to throw the stuff out altogether and save the $50. There is no use taking chances with the government to accommodate a few persons who want us to make criminals of ourselves by granting them special favors. If we do not have a license at all, it is easier to explain to them that we cannot furnish them with liquor."

Others opined that it was not worth while to handle liquor in any form under present conditions since in addition to allowing sales only on prescription, the prescription could not be refilled. After much discussion, it was decided that the pharmacists of the State should agree not to handle liquor except when mixed with other ingredients for medicinal use. The same action taken as to the use of narcotics.

The employment of women as drug clerks was another matter thoroughly threshed out and the consensus of opinion

[illegible] for a woman to work. Secretary J. W. McArthur, of Spokane, said that although the percentage of [illegible] was just as high, if not higher, among the women clerks than among the men, it has been shown that the long hours of work alone bar her from the drug business. He concluded: "The fact that many clerks work from 12 to 15 hours a day and are on their feet the greater part of the time, makes it impossible for a woman to stand up under the strain."

The committee on legislation reported that the new law prohibiting the sale of medicines by storekeepers was working very successfully. Few storekeepers were complaining and many abuses had been stopped.

Peder Jensen the association's representative at the Pharmacopoial Convention, urged that the U.S.P. be kept up-to-date and more accurate.

Albert H. Dewey, of the University of Washington pharmacy department, Seattle, read an excellent paper on "Toxins and Antitoxins." The following officers were elected:

President, H. M. Arnold, Bellingham; first vice-president, W. R. Scott, Puyallup; second vice-president, J. C. Wyatt, Vancouver; third vice-president, Ole B. Lien, Tacoma; secretary, James W. McArthur, Spokane; and treasurer, George D. Fitzmorre, Chehalis. Executive committee elected: W. R. Scott, F. V. Lembar, Shelton; C. I. Carr, Seattle; E. P. Offerman, Bellingham; P. Jelsema, Tacoma; O. B. Lien, I. Korth, Tacoma; L. L. Tallman, Tacoma, and J. J. Yuill, Tacoma. Names recommended to Gov. M. E. Hay for vacancy on board: E. P. Offerman; H. M. Arnold; P. C. West, Bickleton; C. I. Carr; E. E. Fisher, Port Angeles.

Next meeting will be held at Bellingham. A cruise around the Sound on the steamer Tyrus, dinner at Delano Beach and a baseball game were features of the entertainment incidental to the meeting.

W. D. JONES ELECTED PRESIDENT FLORIDA PH.A.

Visiting Delegates are Royally Entertained by Local Members and Wholesale Druggists of State.

JACKSONVILLE, Sept. 1.—The seventh annual meeting of the Florida State Pharmaceutical Association was called to order recently by President James S. Bodiford, of Gainesville. Addresses of welcome were delivered by F. P. Couray, president of the local board of trade, and Mayor William S. Jordan. Among the other speakers were W. O. Richtmann, Satsuma Heights, who spoke on the "A.Ph.A." and Ernest Berger, of Tampa, president of the State board, whose subject was the "N.A.R.D."

The following officers were elected for the ensuing year:

President, W. D. Jones, Jacksonville; first vice-president, Le Roy Cotter, Tampa; second vice-president, D. G. Smith, Madison; third vice-president, N. J. Merck, Orlando, secretary, J. H. Houghton, Palatka and treasurer, W. M. Johnson, Gainesville. Executive committee: James S. Bodford, J. M. Stansfield, Reddertown, and D. W. Ramsaur, Palatka.

Tampa was chosen as the next meeting place. Local druggists tendered the visitors a banquet at the Aragon Hotel, 125 guests being present. Other features of the entertainment were a river party at which A. N. O'Keiffe, this city, on behalf of the Southern Drug Company, entertained the members, and a steamboat ride, under the auspices of the wholesale druggists of the State, on the St. John river to the jetties, the later including fishing at Mayport.

"DROP SALE OF LIQUOR, IF IN EARNEST."

President Watson, of North Carolina, Ph. A., Puts Matter Squarely Before Members at Meeting.

CHARLOTTE, Aug. 20.—President G. Y. Watson of South [illegible] called to order the 31st annual meeting of the North Carolina State Pharmaceutical Association held here recently. In his address to the members, he touched on many matters of local pharmaceutical import, dwelling in particular on the liquor situation and the need of a closer affiliation with the State Medical Association. Regarding the sale of liquor by [illegible] the president said: "It is only through the drug [illegible] and then in regularly prescribed order by a licensed [illegible] that liquor can now be sold in this State. I regret to say that in some places the law has been violated greatly [illegible] and the [illegible] have come to the duty of [illegible] and [illegible] corrections. I have shown in my town that the drug business is as honorable as any other, and in no [illegible] with the whiskey business. Let the druggists of the State drop the sale of liquor and show that they are in earnest about [illegible] matter." He further advised the members to become politicians in so far as securing better pharmaceutical legislation was concerned, but in electing members to the board he thought politics should be an unknown quantity.

Business of importance transacted was the changing after a hot discussion, of the election of officers to the second day of the meeting instead of the third as heretofore, the result being a slim attendance on the final day. Resolutions were adopted approving the agitation, started by the W.O.N.A.R.D., against obscene and immoral advertising, approving Sunday and early closing, and endorsing the Pure Food and Drugs Act. These officers were elected:

President, Max T. Payne, Greensboro; first vice-president, G. A. McDonald, High Point; second vice-president, J. P. Woodall, Charlotte; secretary, P. W. Vaughan, Durham; treasurer, G. E. Burwell, Charlotte. J. P. Stowe, Charlotte, was elected to the State board.

Next meeting will be held at Morehead City.

L. D. BRUNK NEW PRESIDENT OKLAHOMA PH. A.

Travelers Have Day Set Aside as Their Own at Convention and Install "Order of Royal Turks."

SHAWNEE, Sept. 1.—The following officers were elected at the third annual meeting of the Oklahoma State Pharmaceutical Association:

President, L. D. Brunk, Nowata; first vice-president, C. A. Dow, Pond Creek; second vice-president, Wallace A. Mann, Shawnee; secretary, W. H. McCutcheon, Luther; local secretary, J. C. Johnson; treasurer, C. P. Bruce, Pauls Valley; executive committee, Claude Powell, Stillwater.

The association will meet next year at McAlester. Features of the entertainment were field events at Benson Park and a ball at Chrisney Hall.

The Oklahoma Pharmaceutical Travelers' Association had a day set aside at the convention as its own. Business dispensed with, a recital was given for the visiting travelers by the Synthetic Music Club, and a chapter of "The Ancient Order of Royal Turks" was organized at the Norwood Hotel, the following officers being installed:

High potentate, Andrew E. Holmes; master, W. E. Sublet; exchequer, B. N. Harris; chief conductor, W. R. Patterson.

W. VA. PH. A. OPPOSES COUNTY AUTHORITIES.

Druggists Report at Convention that Licenses are Refused but Tax and Penalty are Collected.

HUNTINGTON, Sept. 1.—The annual meeting of the West Virginia State Pharmaceutical Association was called to order by President W. W. Irwin, of Wheeling, who introduced Julian M. Park, president of the Cabell County Druggists' Association, who extended greetings. Mayor Rufus W. Switzer delivered the address of welcome. In his annual address, President Irwin urged the necessity of a law requiring that drugs be sold only by registered pharmacists, and that the association seek the election of its own members to the State legislature. He also touched upon the State liquor license question, which has been agitating the druggists of several counties for some time.

The following officers were elected:

President, W. S. Vinson, Huntington; vice-president, W. E. Dittmeyer, Harpers Ferry; secretary, G. O. Young, Buckhannon re-elected; treasurer, W. A. Ross, Morgantown; member executive committee, F. B. Haymaker, Point Pleasant.

Twenty-four new members were voted in and eight delinquents were given sixty days of grace in which to settle up. Webster Springs will be the next place of meeting. The following committees had in charge the business of this meeting.

Credentials and resolutions, W. S. Vinson; Walter Myers, Morgantown; Steven Tierney, Weston; R. F. Davis, Welch; H. V. Reece, Parkersburg; nominations, Arch Krieg, Charleston; E. E. Dewees, Wheeling; P. A. Haymaker, Charleston; J. M. Park, Huntington; Alfred Waller, Sutton, and president's address, Wallace Procter, Wheeling; W. E. Peabody, Moundsville; E. W. Harrison, Wheeling; A. M. Whittaker, Huntington; W. A. Ross, Morgantown. President J. M. Park, of the Cabell Co. R.D.A., appointed the following committees which arranged for the meeting: Reception, J. M. Park, W. S. Vinson, A. D. Sowers, Mat Miser, L. N. Boggess, J. A. Washington, C. N. Hussey and C. W. Harrison; advertising, H. O. Boette, H. R. Wild and Willard Snodry; entertainment, C. W. Taylor, J. M. Lowry and C. W. Keller; registration and badges, C. A. Yates, James Murray, B. Ney Williams, Fred Allen and A. M. Whittaker, and music and dance, J. M. Park, W. Drummond and Ben Vinson.

Features of the entertainment were an automobile ride

through Huntington, a theater party, baseball game, a ball at the Frederick Hotel, luncheon for the ladies at the Elks' Club, an excursion to Clyffeside and a banquet.

VIRGINIA PH.A. WILL NOT BAR TRAVELERS AND WHOLESALERS FROM ITS MEMBERSHIP.

Report of C. B. Fleet, Delegate to U.S.P. Convention, Returned to Committee for Redrafting as Members Object to His Attitude Towards Dr. Wiley and the "Germans."

VIRGINIA BEACH, Aug. 20.—Over 200 members attended the 29th annual meeting of the Virginia State Pharmaceutical Association. Rev. Dr. Richards greeted the visitors. Response was made by Charles D. Fox, of Roanoke. President George A. Van Lear, of Roanoke, in his annual address, urged the enforcing of uniform prices, that the colleges of pharmacy give more attention to the teaching of the commercial end of pharmacy and that a committee be appointed to draw up a code of ethics for the guidance of pharmacists.

Two hours were consumed in debate upon a proposed amendment to the constitution which would render eligible for membership only registered pharmacists, thus barring all wholesalers and traveling men not now members. The amendment was overwhelmingly defeated.

The report of Charles B. Fleet, of Lynchburg, the association's delegate to the U.S.P. Convention, was strenuously objected to by various of the members and was referred to a committee consisting of Ernest L. Brandis, Richmond; James L. Avis, Harrisonburg, and J. E. Jackson, Richmond, for reconstruction. Mr. Fleet expressed himself as sorry that Dr. H. W. Wiley was elected president of the convention and that he had been unfavorably impressed by the actions of the German delegates at the convention, as they seemed to have something to say on every matter brought up.

The following officers were chosen:

President, H. R. McKay, Luray; first vice-president, W. L. Lyle, Bedford City; second vice-president, C. D. Fox, Roanoke; secretary, Charles B. Fleet, Lynchburg; treasurer, Henry S. Eley, Suffolk; local secretary, J. Warren Barnett, Roanoke, executive committee, E. L. Brandis, C. J. Owens, Wytheville, and H. C. Barnes, Roanoke; entertainment, W. M. Stokes, Lynchburg; E. L. Robey, Herndon, and George A. Van Lear, Roanoke; ways and means, W. G. Williams, Thomas N. Curd, Richmond, and R. C. Littlejohn; queries and papers, E. L. Brandis, Chas. H. Goldsborough, Culpeper, and C. P. Kearfoot; nominees for State board vacancy, C. P. Kearfoot, Martinsville; H. C. Littlejohn, Leesburg; A. H. Jordan, Pulaski; George A. Van Lear, Roanoke, and W. H. Lawson, South Boston.

Seventy new members were voted in and Roanoke was selected as the next place of meeting. A feature was the toast drunk by the members to the Rhode Island State Ph.A., of which they were the guests two years ago. Polk Miller, well known druggist and entertainer, gave a concert at the Virginia Beach Hotel which was thoroughly enjoyed.

LA.PH.A. WANTS EXPOSITION IN NEW ORLEANS.

Association May Reaffiliate With N.A.R.D.—Members Enthusiastic for New College of Pharmacy.

NEW ORLEANS, Sept. 1.—The 28th annual meeting of the Louisiana State Pharmaceutical Association held recently at the New Orleans College of Pharmacy, was called by President E. L. McClung, of Natchitoches. Prayer was offered by Rev. Father Edward Mattingly and the address of welcome delivered by Mayor Martin Behrman. The latter struck the popular chord by prophesying to the 100 or more assembled members that the Panama Canal Exposition in 1915, if held in New Orleans, would mean a greater New Orleans and a greater Louisiana Pharmaceutical Association. This prognostication was received very enthusiastically and the association placed itself on record as heartily in favor of the plan.

Perhaps the reform of most immediate importance advocated was the enactment of a law to compel drug clerks to attend a college of pharmacy in order to be eligible for examination by the State Board. Philip Asher explained that a bill on these lines passed both houses of the State legislature recently, but had been pocketed because no authorized representatives of the association were present. He said that Governor Sanders, Speaker H. Garland Dupre and Dr. Harvey Dillon, president of the State Board of Health, favored the measure and would support it. F. L. Simon bitterly opposed the proposed legislation, asserting that it would be a hardship on the country boys who studied in drug stores. The measure was referred to the legislative committee for immediate action. The association may reaffiliate with the N.A.R.D.

A movement to erect a college of pharmacy in New Orleans, at a cost of $50,000 to $60,000, was started and enough stock was subscribed to insure success. These officers were elected:

President, John E. Scott, New Orleans; first vice-president, A. Di Trabini, New Orleans; second vice-president, W. E. Allen, Monroe; treasurer, George S. Brown, New Orleans; secretary, George W. McDuff, New Orleans; corresponding secretary, Edward Dannenmann, New Orleans; executive committee, George V. Claren, Chas. D. Sauvinet, J. N. W. Otto, Michael Stolzenthaler, all of New Orleans, and W. E. Harter. Delegates were appointed as follows: A.Ph.A. convention, Philip Asher, F. C. Godbold and J. A. Legendre, all of New Orleans, and N.W.D.A., F. A. Dicks, J. W. Phillips and A. D. Parker; legislative committee, P. A. Capdau, T. J. Labbe, Fred A. Earhart, C. D. Sauvinet, F. A. Dicks, A. D. Parker and John W. Phillips.

GEORGE W. EVANS NEW PRESIDENT OF S.C.PH.A.

Members of Southern Organization Listen to Several Good Papers, Banquet and Elect Officers.

SPARTANBURG, Aug. 20.—At the recent 34th annual meeting of the South Carolina State Pharmaceutical Association, papers were read by F. M. Ellerbe, Jonesville; A. A. Coleman, Greenwood; W. H. Carrigan, Charleston, and R. C. Todd, Spartanburg. These officers were elected:

President, George W. Evans, Anderson; first vice-president, O. Frank Hart, Columbia; second vice-president, Arthur Irwin, Spartanburg; secretary-treasurer, Frank Smith, Charleston; board of examiners, J. M. Oliver, Orangeburg.

Next meeting will be held at Chick Springs. For securing the fifty new members voted in, prizes were awarded to C. E. Andrews, Charleston; D. C. Todd, Spartanburg; John Sibil, traveling representative of Mulford & Co.

At the annual banquet, C. A. Milford, of Abbeville, officiated as toastmaster. Those responding to toasts were: A. J. Geer, Charleston; M. H. Sandifer, Rock Hill; Geo. W. Evans; D. P. Frierson, Charleston; O. A. Matthews, Bennettsville; H. E. Heinitsh, Spartanburg.

I.P.A. ENDORSES NEW STATE PHARMACY BILL.

Huge and Striking Entertainment Features Attract Largest Attendance in History to Meeting.

DECATUR, Aug. 20.—Possibly 1500 people, members, pharmaceutical traveling men and their respective ladies, honored this city with their presence during the recent 31st annual meeting of the Illinois State Pharmaceutical Association. Rev. R. W. Gammon delivered the address of welcome to which G. C. Lescher, vice-president, responded on behalf of the association, and F. W. Dudley on behalf of the Illinois Pharmaceutical Travelers' Association. In his presidential address, W. D. Duncan, of La Salle, strongly advocated that action be taken on the proposed new State pharmacy law. This and other recommendations made by Mr. Duncan were approved by the proper committee and the draft of the proposed law, as presented by the legislative committee, was later endorsed after several slight changes.

Reports were presented by William Bodemann and E. H. Ladish, respectively, delegates of the association to the U.S.P. Convention and the recent annual meeting of the A.Ph.A. Other reports were received as follows: Committee on trade interests, Charles E. Robertson, Carthage; committee on Board of Pharmacy records, G. Henry Sohrbeck, Moline, and State Board of Pharmacy, President H. C. Christensen, Chicago.

The annual dues were raised from $1 to $2 and the election resulted as follows:

President, G. S. Lescher, Galesburg; first vice-president, C. H. Achelpohl, Quincy; second vice-president, J. H. Wells, Chicago; third vice-president, Ralph Dorland, Decatur; secretary, W. B. Day, Chicago; treasurer, G. C. Bartells, Camp Point; nominees for the State board: H. C. Christensen, James P. Crowley, Chicago; W. P. Knoche, Chicago; Carl Metzger, East St. Louis; W. F. Baum, Danville; advisory board of University of Illinois School of Pharmacy: Fritz Lueder, Peoria; Joe Ottlinger, Otto J. Hartwig, L. P. Larson and J. H. Wells, all of Chicago.

Other incidents were the raising of a fund to erect a monument over the grave of Joseph McDonald, buried in Forest Park Cemetery, Chicago, who was practically the founder of the Chicago Social Drug Club; the general regret

[illegible] E. A. C. Hynson, president of the same organization, [illegible] of the theories received in as a result [illegible] the prosecution of a free peddler in Meridian, [illegible] to R. E. Dressel on behalf of the I. P. T. A.

[illegible] were elected by the travelers:

President, [illegible] Hess, Chicago; first vice-president, A. G. [illegible]; second vice-president, R. D. Kesler, Cincinnati; third vice-president, Louis F. Hart, Montgomery; secretary, A. E. [illegible], Chicago; assistant secretary, F. W. Dreier, Jr., Chicago; treasurer, A. C. Kessler, Freeport; M. L. Bergen, [illegible] A. C. Engelke, Chicago.

[illegible] organized as a "Zobo" band, the [illegible] themselves by serenading the Chicago members, 400 of whom arrived by special train. Clad in Turkish [illegible] and wore [illegible] on a paper mache instrument. [illegible] made beautiful compositions to the great delectation of the citizens of Decatur. The musicians were J. E. Mees, Decatur; F. L. Bertram, Elkhart, Ind.; W. O. Parsons, Indianapolis; L. L. Smith, Mclean[illegible]; W. H. Rohe, Chicago; M. R. Stewart, New York City; G. P. Watson, St. Paul; E. C. McCune, Decatur; John F. Holt, and Stewart Parsons, Indianapolis.

CLOSER AFFILIATION URGED IN MISSISSIPPI.

Dr. Ullman Says Pharmacists Not Professional Enough. Physician Too Little of the Business Man.

NATCHEZ, Sept. 1.—The 27th annual meeting of the Mississippi State Pharmaceutical Association was called to order by President A. S. Coody, and after the invocation by the Rev. J. J. Chisolm, Mayor W. G. Benbrook extended the freedom of the city to the visitors in a short, happy address of welcome. Other speakers at the opening exercises were Dr. O. W. Bethea, who spoke in the absence of C. W. Whitney, and Hon. E. E. Brown.

F. A. Dicks, of New Orleans, read a paper on "Ancient and Modern Pharmacy," which was very interesting and much appreciated. The man who engages in pharmacy solely as a means of accumulating wealth, he said in conclusion, may attain his object, but it would be at the sacrifice of the true spirit of his profession.

The proposed National health department was endorsed.

The following officers were elected:

President, W. P. Craig, Indianola; first vice-president, R. Lee Ritter, Natchez; second vice-president, L. H. Bradstreet, Summit; secretary, H. M. Lowe, Oxford; treasurer, J. W. McCorkle, Meridian (re-elected); executive committee, S. C. Ray, Brookhaven; P. D. Whitney, Natchez, and R. W. Simmons, Utica.

Greenville was chosen as the next place of meeting. Features of the programme of entertainment were a boat ride on the Mississippi River, a banquet at the Hotel Natchez [illegible] at the auditorium.

MAINE PH.A. ELECTS C. H. DAVIS PRESIDENT.

Professor Virgil Coblentz Delivers Interesting and Instructive Address on the Silk Industry.

OGUNQUIT, Aug. 20.—Addresses were delivered at the 43d annual meeting of the Maine State Pharmaceutical Association by Prof. Virgil Coblentz, New York, subject "The Silk Industry;" F. A. Hubbard, J. G. Godding, J. A. Bean, J. F. Finneran, and Prof. E. H. LaPierre, all of Massachusetts. [illegible]

President, C. H. Davis, Bangor; vice-presidents, G. O. Tuttle, [illegible]; secretary, [illegible]; treasurer, [illegible]; executive committee, [illegible]; delegates to the National Association, [illegible]; alternates, [illegible]. Village.

"ELEGANT PHARMACEUTICALS" CONDEMNED.

Nebraska Ph.A. President Compares Them With Patents. C. S. N. Hallberg is the Guest of Honor.

[illegible] Association was held at the Chamberlain Club, Minneapolis, [illegible] the guest of honor. Dean C. S. N. Hallberg, of the Chicago College of Pharmacy, delivered an address on the National Pure Food and Drug Law. He endeavored to show that the law was defective because of the exception allowed at the demand of manufacturers that drugs "intended for mechanical uses" need not be chemically pure. Officers elected:

President, George B. Crestogh, Norfolk; first vice-president, [illegible]; second vice-president, J. G. Meier, Wausau; third vice-president, D. C. Weber, Appleton; fourth vice-president, Dr. E. A. Lyman, Lacrosse; fifth vice-president, G. S. Florey, Pawnee; treasurer, D. D. Adams, Nehawka; secretary, J. G. McBride, Stella.

A. H. BELL NEW PRES. NORTH DAKOTA PH.A.

Burt Finney Recommends State Aid for Department of Pharmacy in the Agricultural College.

FARGO, Aug. 20.—President Burt Finney, of Bismarck, called to order the 25th annual meeting of the North Dakota State Pharmaceutical Association, which was well attended. In his annual address, Mr. Finney recommended that the legislative committee be instructed to procure such appropriations at the next meeting of the association as may be necessary for the maintenance of the department of pharmacy at the Agricultural College.

It was decided that measures be taken by the association to secure the repeal of the present liquor permit law. The next meeting will be at Grand Forks. Officers elected:

President, A. H. Bell, Devils Lake; first vice-president, H. R. Streeter, Casselton; second vice-president, A. S. Sagebraat, Valley City; secretary-treasurer, W. S. Parker, Lisbon; nominated for State board, Burt Finney.

F. D. Kriebs Heads South Dakota Ph.A.

YANKTON, Aug. 20.—The 25th annual meeting of the South Dakota State Pharmaceutical Association was called to order by President J. Deetken, of Deadwood. Addresses were made by the following: Mrs. Wallbaum, S. H. Scallin, Mitchell; D. F. Jones, Watertown; John Kennedy, Minneapolis; Wilhelm Bodemann, Chicago; Senator Gamble, Yankton; I. A. Keith, Lake Preston; A. A. Woodward, Aberdeen; James Lewis, Canton. The following officers were elected:

President, F. D. Kriebs, Beresford; first vice-president, C. H. Douglas, Elk Point; second vice-president, Henry Mann, Brookings; secretary, E. C. Bent, Dell Rapids; treasurer, A. A. Woodward, Aberdeen; local secretary, H. A. Perriton, Huron; nominees to the board, D. F. Jones, Watertown; S. H. Scallin, Mitchell; J. E. Helsler, Centerville; legislative committee, H. A. Sasse, Henry; E. C. Bent, Dell Rapids; K. G. Phillips, Deadwood; A. A. Woodward, Aberdeen; P. G. Schloss, Mellette.

F. Byerley is the New President of the Oregon Ph.A.

GEARHART, Aug. 20.—The legislative committee was instructed at the recent 21st annual meeting of the Oregon State Pharmaceutical Association to work for the passage of a pure drug law at the next session of the State legislature. Resolutions were also adopted urging the advisability of placing any drug law which shall be passed under the supervision of the State board. The following officers were elected:

President, Fabrian Byerley, Portland; first vice-president, T. J. [illegible], Astoria; second vice-president, H. M. Hunt, Baker; third vice-president, [illegible]; secretary, A. W. [illegible], Portland; treasurer, E. [illegible], Portland.

C. J. Whiting New Hampshire's President.

MANCHESTER, Aug. 20.—New Hampshire Ph.A.'s 37th annual convention was held at the Rockingham Inn, Rockingham. The president Edgar M. Adams, of Canaan recommended legislation to regulate or prevent the itinerant vending of medicines and to better safeguard the sale of poisons.

The following officers were elected:

President, C. J. Whiting, Farmington; vice-president, C. G. Sawtell, Keene; second vice-president, [illegible]; secretary, H. F. Eby, Nashua; treasurer, H. H. Bell, Dover; auditor, J. H. Mathes, Manchester; executive committee, [illegible]; Manchester; L. W. Lincoln, Milton Mills; H. F. Eby, Nashua.

DEATH OF COLONEL EDWARD WRIGHT FITCH.

One-time Traveling Representative and Manager of Parke, Davis & Company's New York Branch.

Colonel Edward Wright Fitch, for eight years in charge of the affairs of Parke, Davis & Co.'s New York Branch, not only in the Eastern section of the country, but in Mexico, Cuba, Porto Rico, Central and South America and the Philippines, died recently at his home in Jeffersonville, Ind., where he had spent the last four or five years in retirement. Although in poor health for some time, his death was due directly to Bright's disease.

Colonel Fitch was born at Jackson, Mich., July 10, 1843. His father, Rev. C. W. Fitch, D.D., was the first president of the University of Michigan, and earlier the rector of St. Stephen's Episcopal Church, Terre Haute, Ind. In this latter city young Fitch was apprenticed to G. W. Patrick & Co., druggists, and in this position he remained, thereby acquiring his pharmaceutical training, until the outbreak of the Civil War, at which time he enlisted in the 97th Regiment of Indiana Volunteers. As a commissary sergeant, he proceeded with his regiment down the Mississippi to Memphis, was present at the burning of Holly Springs and participated in the march to relieve Vicksburg. Near Jackson, Miss., he was attacked with typhoid fever and was compelled to return home. Dr. Patrick, his former employer, welcomed him back to the drug store and here he remained until he began his connection, lasting for many years, with Wilson & Peter, Louisville, Ky.

The late EDWARD W. FITCH, of Jeffersonville, Ind.

In 1894, Col. Fitch was persuaded to become the traveling jobbing representative for Parke, Davis & Co., on the occasion of this firm's establishment of a crude drug importing house in New York City. For three years, engaged in this capacity, he visited all the important trade centers throughout the country. He finally undertook the management of the New York branch, including in his jurisdiction all the territory noted above.

Colonel Fitch made many friends among his business associates. He was a man of extensive experience, much culture and possessed a fine literary education. He was a member of the New York Yacht Club, the New York Drug and Chemical Club, the New York College of Pharmacy, the Metropolitan Museum of Art, and other similar organizations. In 1866, Colonel Fitch married Miss Clara Heaton, of Louisville, and by this union was blessed with three sons and a daughter, Jefferson H. Fitch, Jeffersonville; Allen C. Fitch, Boston; Benjamin H. Fitch, New York, and Mrs. Ellice Hall, Louisville. The Colonel is survived by these children and his widow.

Obituary Notes.

—DR. RUDOLPH MIELKE, died on the steamship Celtic, while returning from Europe and was buried at sea. Born in Germany in 1847, came to America in 1861, served in the Civil War and had several drug stores in this vicinity.

—ANNA M. GORDON, widow of Wm. J. M. Gordon, ex-president A.Ph.A., died recently at Mt. Airy, Cincinnati.

—DR. IRVIN BAIRD BRITTINGHAM, 85, formerly of Hannibal, Mo., died recently at his son's home, Madison, Wis.

—BENJ. M. EBY, 70, Lewiston, Pa., is dead. He served in the Union Army and was a leading citizen.

—JAS. B. COLTON, 78, retired, is dead in Roxbury. For 35 years he conducted a drug store in Boston.

—SAMUEL L. RUMSEY, veteran Denver wholesaler, is dead.

—ABRAHAM QUICK, 68, died recently at Nashville, Tenn.

—DR. HENRY F. KOESTER, 47, died recently in Manhattan.

—DR. JOS. B. CRANDALL, 92, is dead at Clinton, Wis.

—ALBERT LAUER, 35, Brooklyn, cyanide of potassium.

—D. E. RAY, 52, Denver, is dead. A family survives.

—HENRY J. BECKWITH, 72, Chicago, leaves a widow.

—ALEX. D. MALLINSON, 63, Plainfield, N. J., is dead.

—JOHN D. GAULD, 62, Indianapolis, died recently.

—AUGUSTUS BOWERS, 60, Prospect, Pa., is dead.

HYDROX DECISION WILL NOT DETER BOARD

Unlicensed Dealers Selling U.S.P. Preparations Under Fanciful Names Will be Prosecuted.

The decision involving the sale by unlicensed dealers of U.S.P. preparations under proprietary names, recently rendered in the Fifth District Municipal Court of New York City will not deter the State Board of Pharmacy from proceeding against such dealers, and the board's counsel, Steiner & Petersen, will appeal the case, which will probably come up next October.

The defendants were the F. W. Woolworth Co., who were charged with having sold, in violation of the Pharmacy Law, a preparation labeled: "Hydrox, Peroxide of Hydrogen, with acetanilid 3-10 grains to the ounce, as an additional antiseptic and preservative, antiseptic, disinfectant, etc." Defendants admitted the article differed in no way, except for the name Hydrox, from U.S.P. peroxide of hydrogen.

According to the general construction of Justice Seaman's decision, any pharmacopœial preparation may be renamed and sold by the department stores, a licensed druggist not being necessary to the transaction. Pending appeal the board will continue to prosecute persons who may violate the law. Robert S. Conklin defended the company.

PENNSYLVANIA BOARD ACTIVE.

Is Investigating Regular System of Evading State Pharmacy Law.

PHILADELPHIA, Aug. 20.—Vice-President Christopher Koch, of the Pennsylvania Pharmaceutical Examining Board, is investigating what is declared to be a regular system of evasion of the State pharmacy law. It is claimed that certain proprietors of small stores arranged with an old man who is the possessor of the State certificate of a registered pharmacist, to hang this certificate up in their stores and then sit around for an hour or so a day in the belief that this satisfies the provision of the law which requires that no store be more than 24 hours without a registered pharmacist in charge. While a clerk does the work, the veteran sits idly about and the proprietor is away looking after a branch store or engaged in profitable relief work or other employment. It is said the old pharmacist in question does no work but that he makes a living and incidentally has thus far satisfied the proprietors of several stores that they are not violating the law. But Mr. Koch is inclined to hold opposite views and is preparing to act accordingly.

Veteran Druggist in Impressive Incident.

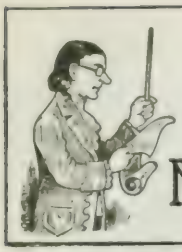
The venerable Major Ormand F. Nims, oldest druggist in Massachusetts, and possibly in America, figured in an impressive incident at the Massachusetts State House recently, when he headed a delegation of civil war veterans who called upon Governor Eben S. Draper and turned over to the custody of the state a guidon of the famous Nims' Battery, which the major commanded during the war. The guidon had been presented to the battery in 1865 when it left New Orleans for home.

Chemicals Explode—Druggist Badly Burned.

LOUISVILLE, Sept. 1.—At Munfordville, Ky., recently O. F. King, a prominent druggist, was painfully burned about the face and hands while mixing some chemicals, which exploded. Mr. King's recovery has been rapid, owing to the fact that he did not inhale any of the flames.

Death of John B. Ladd.

John B. Ladd of Ladd & Coffin, perfumery manufacturers at 24 Barclay street, New York, died recently after a long illness, at his home, 246 Henry street, Brooklyn, in his 71st year. He is survived by his wife.



THE QUIZ MASTER

A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

THREE PRIZES of $5.00, $3.00 and $2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each monthly series of questions. In the event of a tie for any one of the prizes offered, such prize will be equally divided among the successful contestants. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (8x10 in.), one side only, with your Name and Address at the top of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be sent at one time, and must be with us not later than the 15th of the following month.

CORRECT ANSWERS to each series of questions and the names of the three contestants who have been awarded the prizes will be published in the Era, after the close of the respective contests.

WE INVITE our readers to send us their questions for publication in this department, particularly questions related to the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

The Quiz Master

Care of Pharmaceutical Era 82 Fulton St., New York

Questions, September Series, 1910.

1—Cantharides is used in preparing what U.S.P. preparations?

2—Which of the preparations mentioned in the answer to the previous question are intended for internal use?

3—What is the difference between a solution of hydrogen dioxide and a solution of hydrogen peroxide?

4—What property is imparted to water in which soap bark is permitted to macerate?

5—What are rhubarb fingers?

6—What are some of the purposes for which a compound [illegible] can be used in a drug store?

7—How may ammonium chloride be prepared commercially?

8—At what temperature does lard oil solidify? What is the appearance of this oil in the solid form?

9—To the presence of what substance is the green color of plants chiefly due?

10—What are some excipients suitable for making pills containing creosote?

11—What is the appearance, odor and taste of potassium [illegible]?

12—Why should oils not be used in the treatment of [illegible] poisoning?

13—What is the advantage in using ointment boxes having [illegible]?

14—Why will a piece of wood, placed upon the surface of water, sink much deeper than it will when placed upon the surface of mercury?

15—How much of a 1.5 per cent solution of potassium iodide [illegible] gm. of a 20 per cent solution? Show work.

16—What U.S.P. acid will readily dissolve gold leaf?

17—What is the usual average dose of antipyrin, compound tincture of senna, U.S.P. effervescent sodium phosphate, syrup of calcium hypophosphite, N.F.?

18—What are the English equivalents for the following Latin [illegible]: (a) ft. mist.; (b) frig.; (c) mist. rep.; (d) pulv. subt.?

19—Which of the U.S.P. spirits are not precipitated by water?

20—Unless carefully made, what may cause cerates to be lumpy?

21—The physiological action of stramonium closely resembles that of what other U.S.P. vegetable drug?

22—What is the narcotic or soporific ingredient in compound syrup of white pine, N.F.?

23—What official compound results from the action of hydrochloric acid upon marble?

24—What should occur, when a test tube half filled with ether and containing some broken glass, is held for some time closely grasped in the hand?

25—As a rule what is the color of ferric salts? What U.S.P. ferric salt has a white color?

26—How test oil of theobroma for the absence of wax, stearin or tallow?

27—Why should hot water not be used in preparing a mustard plaster?

28—What is (a) chemical food; (b) cinnabar; (c) French white; (d) phenic acid?

29—Briefly what are the two principal methods for marking the graduations on graduates?

30—What are the ingredients used in preparing (a) lead and opium wash; (b) milk of magnesia?

31—What are two metals, the oxalates of which are usually present in cerium oxalate?

32—Why must amyl nitrite be kept absolutely dry?

33—What is meant by enteric pills?

34—Why should the ordinary wooden cup-shaped measure, used in dividing seidlitz powders, be frequently standardized?

35—What are four liquids in which phenol is very soluble?

36—What should be the color and reaction to litmus paper of a freshly prepared aqueous solution of sodium salicylate?

37—How would you prepare 100 cc. of a 2 per cent solution of apomorphine hydrochloride? Briefly explain.

38—What color changes occur when acetanilide is added to spirit of nitrous ether?

39—Why are bottles having the bottoms rounded to be preferred as containers for effervescing solutions?

40—What is the most important alkaloid found in physostigma and what salts of this alkaloid are recognized by the Pharmacopœia?

41—What is the source of camphoric acid?

42—What are diaphoretics?

43—What occurs if veratrum is applied to the mucous membrane of the nose and throat?

44—Briefly what is the internal medicinal action of castor oil?

45—As used in pharmacy what is meant by the term "crystal"?

46—How does purified animal charcoal differ from crude bone-black?

47—Why cannot aqueous solutions of tartar emetic be mixed with strongly alcoholic liquids?

48—As applied to a class of plant principles what is meant by "neutral principles"?

49—What are three neutral principles recognized by the Pharmacopœia?

50—What is a urinometer?

Competitors, Please Notice.

The above list of questions is the complete series for September, and all who desire to compete for the prizes should see that their answers are received by the Quiz Master, not later than October 15. Do not send your answers in parts, but mail them all at one time, and be sure to follow the instructions given at the head of this department.

The judges in the July contest of the Quiz Master's Department have awarded the prizes as follows:

First prize, $5, to Carl H. Flatau, Cleveland, Ohio.
Second prize, $3, to E. W. Lynn, Philadelphia, Pa.
Third prize, $2, to C. M. Morse, Lawrence, Mass.

Contestants wishing to know the grades which they have made in the July contest may obtain this information on request by sending two cents for postage to the Quiz Master.

THE QUIZ MASTER.

Questions and Answers, July Series, 1910.

1—Lead acetate is used in preparing what U.S.P. preparations?

Lead plaster, and solution of lead subacetate.

2—What effect does exposure to light and air have upon resorcin?

Resorcin acquires a pinkish tint upon exposure to light and air.

3—How may resorcin be protected from the action of light and air?

By keeping the resorcin in tightly stoppered dark amber colored vials.

4—Which of the following are lighter and which are heavier than water: acetic acid, oil of cloves, paraffin and thymol?

Paraffin is lighter than water; acetic acid and oil of cloves are heavier than water; thymol as a solid is heavier than water, but liquefied by fusion it is lighter than water.

5—What free acid is found in lemon juice?

Citric acid.

6—How is asafetida obtained from the root of Ferula foetida?

The root of Ferula foetida, is laid bare for about two inches, a slice is cut from the top, and the surface so exposed is immediately covered with twigs and clay to exclude the sun. The milky juice, consisting of asafetida, which exudes from this surface, is scraped off. A new surface is then exposed by cutting off another slice of the root, and the process just described is repeated until the root is exhausted.

7—Which thermometer is given preference by the Pharmacopœia?

The centigrade mercurial thermometer is preferred, but when not accessible the Fahrenheit thermometer should be used.

8—What official liquid is obtained as a by-product in the manufacture of soap?

Glycerin.

9—What official preparation is known as "neutral mixture?" What are the ingredients used in making it?

Neutral mixture is solution of potassium citrate. The ingredients used in preparing it are potassium bicarbonate, citric acid and water.

10—What is meant by the phrase "deprived of the periderm," as employed in the pharmacopœial description of althaea?

The periderm is the outer layer of bark, and therefore this layer has been removed from the official althaea.

11—What N.F. solutions contain hydrochloric acid?

Liquid pepsin and aromatic liquid pepsin. Solution of ferric oxychloride and solution of ferrous chloride also probably contain some free hydrochloric acid.

12—What is the appearance of balsam of Peru?

A viscid liquid of a dark brown color free from stickiness and stringiness; transparent and in thin layers reddish-brown.

13—What effect does basic lead acetate test solution have upon acacia?

Acacia yields a gelatinous precipitate with basic lead acetate.

14—What is the official Latin name for saw palmetto, and what is the botanical name of the plant from which it is obtained?

The official Latin name for saw palmetto is Sabal, and the drug is the partially dried ripe fruit of Serenoa serrulata.

15—When a "shake label" is placed upon a bottle, why is it preferable to put it above the regular label instead of below it?

A "shake label" placed above is much more conspicuous than if put below the regular label, because in the latter position it may be overlooked, especially if only the upper part of the wrapper is removed from the bottle. Moreover, when placed at the bottom the hand holding the bottle is liable to cover the label.

16—What is meant by "mechanical antidotes" as used in works on toxicology?

Mechanical antidotes are such mechanical processes as tend to remove poisons from the stomach, without chemical change in the poison.

17—What are the U.S.P. preparations which contain both salts of quinine and of strychnine?

Elixir of the phosphates of iron, quinine and strychnine, glycerite of the phosphates of iron, quinine and strychnine; compound syrup of hypophosphites; and syrup of the phosphates of iron, quinine and strychnine.

18—What U.S.P. liniment is of such consistency that it is best dispensed in an ointment jar?

Turpentine liniment.

19—How would you determine if a drug containing an alkaloid had been completely exhausted by a menstruum?

The presence of an alkaloid may be usually determined by testing the last menstruum used in exhausting the drug with some of the general alkaloidal reagents such as Mayer's Solution or Wagner's reagent. The better method, however, is to concentrate the menstruum and apply the characteristic tests for those alkaloids which may be present.

20—What U.S.P. drug contains physostigmine? What is another name for physostigmine?

Physostigma is the U.S.P. drug containing physostigmine. Eserine.

21—What is "os sepiae" and from what is it obtained?

Os sepiae commonly called cuttle fish bone, is a calcareous body found underneath the skin in the back of the Sepia officinalis or cuttle fish.

22—What is the objection to using "os sepiae" in tooth powders?

Os sepiae is abrasive and gritty and therefore if used in tooth powders may injure the teeth by scratching them.

23—For what purposes is "os sepiae" most commonly used, as bought by people in a drug store?

People usually buy os sepiae in drug stores to put into bird cages that birds may rub their bills against it; it is also employed for polishing.

24—As applied to a class of official preparations, what are waters?

As applied to a class of official preparations, with the exception of common and distilled water, waters are aqueous solutions of volatile substances.

25—What are three substances, other than acacia, which are frequently employed in making label pastes?

Flour, dextrine and tragacanth.

26—What are some of the reasons for coating pills?

Pills are coated to mask the taste of drugs, to prevent the air from affecting certain constituents and to render the pills more slowly soluble or even insoluble in the stomach.

27—What is the difference between oil of camphor and camphorated oil?

Oil of camphor is an oil obtained from camphor and several other plants, while camphorated oil is a common name for camphor liniment.

28—Why should broken packages of seidlitz powders be kept in tightly closed containers?

Seidlitz powders should be kept in closely stoppered containers, because if not so protected, the tartaric acid may absorb moisture and thereby produce changes in the composition of the powders.

29—A druggist wishes to prepare five pounds (avoir.) of ointment of potassium iodide: if the wholesale price of potassium iodide is $2.15 a pound (avoir.); of potassium carbonate, 50c. a pound (avoir.), and of benzoinated lard, 30c. a pound (avoir.), what quantity of each of these ingredients will be required, and at the prices quoted what will be the cost respectively of these quantities?

Potassium iodide ½ pound (avoir.) costing $1.08, potassium carbonate 210 grains costing 1.5 cents, and benzoinated lard 4 pounds (avoir.) costing $1.20.

30—In preparing chalk mixture, why is the cinnamon water diluted with water?

In preparing chalk mixture the cinnamon water is diluted because chalk mixture is often administered to infants, and a sufficient amount of oil of cinnamon may be present in the cinnamon water to cause an irritation of the mouth.

31—What is the difference in the action of cocaine upon the unbroken skin and upon mucous membranes or the subcutaneous tissue?

Cocaine has little or no action on the unbroken skin, but upon mucous membranes or the subcutaneous tissue it produces complete local anesthesia.

32—What are four common names for sanguinaria?

Blood root, red Indian paint, coon root and tetterwort.

33—For which of the official pills does the Pharmacopœia state the dose to be two pills?

Pills of aloes; aloes and iron; aloes and mastic; aloes and myrrh; asafetida; compound cathartic; vegetable cathartic; ferrous carbonate; ferrous iodide; compound laxative; compound rhubarb.

34—When urine undergoes decomposition, why does it develop an ammoniacal odor?

The ammoniacal odor developed in decomposing urine is

due to the action of certain microorganisms upon urea $(CO(NH_2)_2)$ a constituent of urine, forming carbon dioxide and ammonium carbonate. $(CO(NH_2)_2 + 2H_2O = CO_3(NH_4)_2)$.

35—Why are spatulas having balanced handles to be preferred?

Spatulas having balanced handles are to be preferred because the blades of such spatulas will not touch the table, when the spatulas are lying down.

36—What is meant by saying that a drug has a cumulative effect?

A drug is said to have a cumulative effect when administered in small doses at considerable intervals, it seems to accumulate in the system until a certain point is reached when it suddenly manifests itself with an intensity similar to that produced by a single large dose.

37—What are four U.S.P. drugs which are likely to produce a cumulative effect?

Arsenic, digitalis, mercury and strychnine.

38—What is briefly the method for preparing medicated gauze?

Medicated gauze is prepared as follows: The cotton gauze is saturated with a solution of the medicinal substance dissolved in some volatile solvent, which contains a little glycerin or fixed oil to prevent the finished product from becoming too dry. The gauze is then expressed to a given weight and the volatile liquid permitted to evaporate.

39—Which of the following are fixed and which are volatile oils: lard oil, oil of anise, oil of cloves, cottonseed oil, cod liver oil, oil of turpentine, oil of theobroma and oil of thyme?

The fixed oils are cod liver oil, cottonseed oil, lard oil, and oil of theobroma; the volatile oils are oil of anise, oil of cloves, oil of thyme and oil of turpentine.

40—What occurs when citric acid is added to a saturated solution of Rochelle salt?

When citric acid is added to a strong solution of Rochelle salt, sodium citrate and potassium bitartrate are formed and the latter is precipitated.

41—In the manufacture of what official preparations do the following reactions occur: $HgCl + 2NH_4OH = NH_2Cl + NH_4Cl + 2H_2O$. $As_2O_3 + 3H_2O + 2H_3AsO_3$?

The first reaction occurs in the manufacture of ammoniated mercury and the second in preparing solution of arsenous acid.

42—To [illegible] what are aromatics?

Aromatics are remedies characterized by a fragrant, spicy taste and odor, and chiefly used as stimulants to the gastro-intestinal mucous membrane.

43—What action does solution of hydrogen dioxide have upon phenol?

Hydrogen dioxide oxidizes phenol to pyrocatechin, quinone and hydroquinone.

44—What are eight official solids which are soluble in glycerin?

Boric, gallic and tannic acids, ammonium chloride, phenol, resorcinol, sodium borate and zinc sulphate.

45—What change will slowly occur in an aqueous solution of chloral hydrate?

An aqueous solution chloral hydrate is slowly decomposed. [illegible] and formic acids being formed. Low organisms are also gradually developed.

46—How would you prepare suppositories containing extract of belladonna leaves as the medicinal ingredient, and oil of theobroma as the suppository base?

If the suppositories are to be made by fused method, the extract of belladonna by triturating it in a warm mortar with a little diluted alcohol or water, add about an equal weight of grated oil of theobroma, mix thoroughly, then gradually incorporate the remainder of the oil of theobroma. When a plastic mass has been formed, remove it from the mortar, roll [illegible] on a cold tile and divide into the required number [illegible] parts. Form the parts to the shape desired.

If the suppositories are to be made by fusion method, the extract of belladonna leaves may be triturated with an equal weight of oil of theobroma, then thoroughly incorporate the [illegible] remainder of the oil of theobroma previously melted and [illegible] cooled to 100° F. and pour into molds which have been previously chilled in cool water. The proportions are practically those given in the Pharmacopoeia under the suppositories.

47—What is the result when a portion of tincture of ferric chloride is added to a [illegible] test solution of silver nitrate test solution?

Tincture of ferric chloride yields a brownish-red precipitate with ammonia water, a blue one with potassium ferrocyanide test solution and a white one, insoluble in nitric acid, with silver nitrate test solution.

48—What are the solubilities in water and alcohol respectively of 25 [illegible] of the following: (a) benzoic acid, (b) sodium citrate?

Benzoic acid is soluble in 281 parts of water and 1.8 parts of alcohol; sodium citrate in 1.1 parts of water and slightly soluble in alcohol.

49—What test does the Pharmacopoeia give for distinguishing citric acid from tartaric acid?

When slowly ignited, citric acid is gradually decomposed without emitting an odor resembling sugar, while tartaric acid similarly treated will emit such an odor.

50—How many doses can be obtained from the following prescription, and how much of each of the first three substances will be given in each dose?

R Tinct. digitalis	3i
Spt. aetheris nitrosi	5iii
Liq. ammon. acetatis	3ss
Aquae q. s. ad.	3vi

M. Sig. One-sixth every 3 hours to re-establish the renal secretion.

Six doses can be administered from this prescription, and the amount of each ingredient to the dose is as follows: Tincture of digitalis 10 minims, spirit of nitrous ether 30 minims and solution of ammonium acetate 5 minims.

ERA COURSE IN PHARMACY.

Graduates, to Aug. 16, 1910.

Number.		Examination Grade, P. Ct.
6365.	John H. Steele, Philadelphia, Pa.	98
6518.	Rudolph Mach, Omaha, Neb.	95
6369.	J. A. Mallinin, Pittsburg, Tex.	98
6397.	Edwin W. Barnes, Kings Mountain, N. C.	96
6562.	Mrs. L. M. Turek, Rockwall, Tex.	98

The above graduates will receive diplomas within a short time. A large and very handsomely engraved diploma, printed on artificial parchment, with the graduate's name engrossed, especially suited for framing, will be furnished to all those who request it for $2. Those who desire the latter should forward the necessary fee to THE PHARMACEUTICAL ERA.

The Era Course in Pharmacy.

The ERA COURSE IN PHARMACY is a home study course in pharmacy which is divided into ten parts with recitations and examinations by mail. Thorough instruction is given in General Chemistry, Theoretical and Practical Pharmacy, Botany and Materia Medica. The cost of the COURSE is $10, and students of average ability can usually complete the work in from ten months to a year. New classes are organized each month and now is an excellent time to enroll. A Prospectus will be sent by the publishers of THE PHARMACEUTICAL ERA to any one who applies.

Plans for Awarding N.Y.Ph.A. Free Scholarships.

ALBANY, N. Y., Aug. 20. More thought is being given to the matter of helping young men and women through the colleges of pharmacy in this State and several scholarships for the junior year have been given through the New York State Pharmaceutical Association to the Buffalo, Albany, New York, and Brooklyn Colleges. The committee on scholarships in the State association met in Albany recently and decided upon a course of action in awarding these scholarships. Applicants must be at least 17 years old, must have had at least two years experience in the drug business in New York State, must be entitled to a pharmacy students' certificate and must present evidence of good moral character. There are two junior year scholarships available for the coming term in the Albany college and one in the Buffalo college. There is a possibility of a similar scholarship in the New York and Brooklyn colleges. Application blanks may be secured from the secretary, Arthur S. Wardle, Hudson, N. Y. Those who are interested should apply at once. The committee passed a resolution favoring a campaign of education in the high schools of the State calling attention to the practice of pharmacy and its possibilities.

Indispensable to all druggists is THE ERA PRICE LIST.

MOSTLY PERSONAL

Mitchell Bernstein, Gold Medal Winner of '09, is New Librarian of Philadelphia College of Pharmacy.

PHILADELPHIA, Aug. 20.—Mitchell Bernstein of the Class of '09, has been appointed by the board of trustees of the Philadelphia College of Pharmacy to the office of librarian at that institution. He succeeds the late Thomas S. Wiegand who filled that office for many years. The honor is a merited one for Mr. Bernstein is one of the most distinguished students from the standpoint of excellency that has ever received the coveted diploma of the college. In addition to being at the head of the honor roll of his class, Mr. Bernstein at the close of his studies last year was awarded the Proctor prize, a gold medal and a certificate, for the highest general average of the class with a meritorious thesis: the Kappa Psi Fraternity prize, a gold medal, for the highest general average during the senior year, as well as receiving honorable mention in nearly all of the educational contests, existing at the college. Mr. Bernstein is a Philadelphian and since graduation has been employed in the South Broad street store of George W. Fehr, treasurer of the Philadelphia Association of Retail Druggists. He assumed the duties of the office on Friday last, entirely realizing the responsibility of caring for what is probably the most extensive as well as the most valuable pharmaceutical library in the world.

MITCHELL BERNSTEIN, of Philadelphia, Pa.

—JOHN R. MUTZ, the new president of the Indiana State Pharmaceutical Association, whose portrait was presented on page 677 of the July ERA, is a resident of Edinburg, in that State, where he was born on June 12, 1867, and was educated at Edinburg High School and Indiana University. He received his degree of Ph.G. from Purdue School of Pharmacy in 1892. He is a 32° Scottish Rite Mason and the drug store of which he is owner is one of the oldest in Indiana, it having been founded some years before the civil war by the late Augustus Kiefer, who sold it to Mr. Mutz's father and Martin Lynch in 1860. President Mutz took his father's interest in this very successful store in 1898.

—FRANK E. HOLLIDAY, vice-chairman of the proprietary committee of the National Wholesale Druggists' Association, contrives occasionally to drop a line in pleasant places. That he does this with substantial results is indicated in the picture printed on this page. Recently Mr. Holliday was one of an annual fishing party at the cottage of J. K. Lilly on the banks of Lake Wawasee situated near the Michigan line in Northern Indiana. The fine string of gamey black bass being proudly exhibited by Mr. Holliday bears testimony to his patience and skill.

F. E. HOLLIDAY, Disciple of Walton.

—JOHN P. JELINEK, the new president of the Minnesota State Pharmaceutical Association, whose picture appeared on page 791 of the August ERA, is one of the most progressive and public-spirited citizens of St. Paul. Born in Austria, he came to the United States, and went directly to St. Paul, at the age of seven years, and has resided continuously in that city ever since. He began the drug business in the store of A. P. Wilkes. Mr. Jelinek never attended a college of pharmacy, but received so good an education as practical pharmacist that he passed the examination of the State board. This was in 1890. After serving various St. Paul druggists as clerk, Mr. Jelinek entered business on his own account, in 1898, and was successful from the start. He now owns and operates two stores, both in West Seventh street. He has been treasurer and president of the St. Paul R.D.A. and first vice-president of the Minnesota Ph.A. He has been a member of several committees of the latter body, being for one year chairman of the executive committee. Mr. Jelinek has done excellent work in preventing legislation injurious to druggists, and may be depended upon to acquit himself most creditably as head of the State association. Mr. Jelinek is a leading Republican worker and has filed for nomination as member of the house of representatives for the Thirty-fifth district. He is married, but has no children.

—EDGAR D. TAYLOR, former president of the N.W.D.A., and president of the Powers-Taylor Drug Co., Richmond, was a visitor to New York and to the New Jersey Coast last month. Mrs. Taylor accompanied him on the tour.

—O. W. SMITH, manager of the New York branch of Parke, Davis & Co., returned to his desk on the 15th inst., after an absence of a month. Mr. Smith spent a very enjoyable vacation motoring, with a party of friends, through New Hampshire and the Berkshires.

—WILLIAM F. ELMENDORF, aged 81 years, one of the oldest druggists in New York State, was in charge of the Naumoff Pharmacy at 920 State street, Schenectady, last month in the absence of Mr. Naumoff, the proprietor, who was taking a few days' vacation. Mr. Elmendorf is from Menands and has been in the drug business, or as he calls it, the "drudge business," for 66 years. The aged druggist has been a Mason since 1847 and an Odd Fellow since 1850. He is an enthusiastic churchman, having founded an Episcopal parish in Ottumwa, Iowa, in 1857. He has been licensed as a lay reader by four bishops of the Episcopal Church, in New York City, Iowa, New Jersey and Albany. Despite his age he is still keenly alert and active, and takes a younger man's delight in getting back into harness for a few days.

DR. A. T. POLLARD, a prominent Philadelphia pharmacist, who left for Europe in July accompanied by his bride of a few weeks, is now touring the continent and in corresponding with his friends, makes no reference to his return. He was among those who witnessed the Passion Play at Oberammergau, Switzerland.

—P. S. ROHN, proprietor of two drug stores in Philadelphia, spent the latter part of August with his family at Ocean City, N. J.

—OTTO KRAUS, secretary of the Philadelphia Wholesale Drug Co., accompanied by his wife and niece, Miss Ray Rauser, was the life of a party of retail druggists who enjoyed the delights of Wildwood, N. J. Mr. and Mrs. W. A. Carpenter and Mr. and Mrs. David J. Reese of Philadelphia were members of this jolly company.

—VACATION season has been enjoyed by many of the members of the New York German Apothecaries' Society. Among them were: Secretary Otto P. Gilbert, Kenoza Lake, Sullivan County, N. Y.; Dr. Gustav Drobegg and Henry Buch, Catskill

Mountains; Paul L. [illegible], Lake Hopatcong, N. J.; William F. Rieger, Brighton Beach, New York; Henry F. Ahlers, Lake Huntington, Sullivan County, N. Y.; George Bruns and George F. Riedlin, Mattituck, Long Island; Emil Roller, Ellenville, N. Y.; and F. T. Schmidt, Buffalo and Niagara Falls.

—ROBERT NOLL, son of M. Noll of Atchison, Kansas, and Edward Fritsche, Jr., of Leavenworth, Kansas, were recent callers at the EXPONENT office. Both are graduates of the Pharmacy Department of the University of Kansas and have been spending their vacation by taking a trip around the Great Lakes and visiting New York and other Eastern cities, and expected to return to their regular duties about the first of September. They have inspected many of the important drug establishments and express themselves as much pleased with what they have seen. They report the drug trade in good condition here in Atchison and Leavenworth.

—DR. J. A. CONKEY, of Richmond, Ind., has been appointed the Indiana delegate to the National Conservation Congress to be held at St. Paul, Sept. 5 to 9. Dr. Conkey until recently conducted drug stores in Indianapolis and Richmond, but has disposed of his Indianapolis interests. He is a graduate both of pharmacy and medicine but practices pharmacy exclusively. He is a 32d° Scottish Rite Mason and Mystic Shriner, besides being a member of the Richmond Young Men's Business Club, Commercial Club, Y. M. C. A. and N.A.R.D.

—DR. JOHN R. MINEHART, dean of the Department of Pharmacy, Temple University, Philadelphia, is making a record as a deep sea fisherman among the lovers of that sport who sail from Anglesea, N. J., where the well known physician and educator is a weekly visitor. Early in the spring, Dr. Minehart moved to a handsome home at 4821 Germantown avenue where he enjoys facilities for tennis and croquet in both of which he is an acknowledged expert.

—LOUIS SPENCER LEVY, president and treasurer, and Jos. S. Menline, secretary of the Perfumer Publishing Co., New York, sailed for Hamburg on the Steamship Amerika Aug. 13. Mr. Levy is the editor of the *American Perfumer and Essential Oil Review*, and intends to visit manufacturers of perfumers' and soapmakers' raw materials in Germany, France and England.

—P. A. DAKIN, veteran salesman, known to druggists throughout the Middle Atlantic and New England States, as the representative of the Major Manufacturing Co., while on a vacation trip recently from New York to Portland, Maine, by water, was taken so seriously ill that he was compelled to return home. At last advices he was very much better.

—H. L. TROXEL, Ph. D., formerly with the Burrough Bros. Manufacturing Co., and Sharp & Dohme, of Baltimore, has become superintendent and chemist of Masengill Bros. Co., Bristol, Tenn. The company will discontinue jobbing the medical products of other houses and will manufacture and sell its own goods exclusively.

—MRS. STALEY, wife of the proprietor of the Hartwell Pharmacy, Cincinnati, who was confined to the Good Samaritan Hospital for several weeks by a severe illness, has returned to her home, and is slowly improving. She is a prominent member of Cincinnati Charter of W.O.N.A.R.D.

—S. A. ECKSTEIN, prominent in Milwaukee retail drug circles and president of the Milwaukee Druggists' Association, is a delegate to the convention of the N.A.R.D. at Pittsburg this month. He bears an invitation to the national organization to hold its next annual meeting in Milwaukee.

—MISS M. C. DOW, the Cincinnati druggist, a prominent worker in the Ohio Humane Society of that city, is contemplating having 50,000,000 copies of various pleas for animals printed at her own expense, to be distributed by her and the society.

—JOHN B. THOMAS, of the Thomas & Thompson Drug Company, and president of the Baltimore Retail Druggists' Association, has been spending a vacation of nearly one month in Maine. He states that he had an excellent time.

—M. L. SHAFFNER, '08, has been elected president of the Pharmacy Alumni Association of Temple University. The other officers are Amos S. Rutt, '10, vice-president; John C. Cassy, '10, secretary, and Daniel Cartwright, '10, treasurer.

—WM. M. COOPER, Ph. G., 2386 Washington street, Boston, and wife are passing [illegible] weeks' vacation period on his farm at Wolfeboro, N. H. [illegible] M. Sheddon was in charge of the pharmacy during the absence of Mr. Cooper.

—J. C. COOPER, Robert S. Lehman and George Thum, of the New York German Apothecaries' Society, started on August 20 on a three weeks' trip to Yellowstone Park. They were accompanied by Miss Elsa Thum.

—JOHN S. MUTH, of Muth Bros. & Co., Baltimore, is having a handsome frame cottage built for his own use at Walbrook, a suburb. He expects to occupy the place before the winter sets in.

—HARRY FREKING, of Cincinnati, attorney of the Ohio Valley Druggists' Association, has the smile that won't come off. It's a fine baby boy—the first one. Mother and son are doing fine.

—ED. MOULIC, of Percy, Ill., recently returned home after making an extensive trip through the south. He enjoyed trips on the Gulf, and came up the Mississippi to St. Louis, from Memphis.

—HENRY H. BOOM of Philadelphia, professor of physiology and hygiene at Temple University, is enjoying an extended canoe trip through the inland waterway of the Atlantic Coast.

—R. N. MCKNIGHT, vice-president and general manager of the Behrens Drug Co., of Waco, Texas, spent a few days in Indianapolis the latter part of July as guest of Eli Lilly & Co.

—FERDINAND T. SCHMIDT, of 1502 Cortelyou Road, Flatbush, Brooklyn, spent his vacation last month with friends in Buffalo, N. Y., where he had a very enjoyable visit.

—GEO. L. DOUGLASS, counsel for the Proprietary Association of America, recently paid a brief visit to New York friends on his way from Chicago to the seashore.

—E. E. HORRALL, of Decatur, and Mrs. Horrall, recently spent several days in St. Louis, which was their first visit to the city since their wedding trip six years ago.

—HENRY FISHER and H. EVERETT KENDIG, members of the faculty of the department of Pharmacy, Temple University, Philadelphia, are summering at Atlantic City.

—W. J. FRAZIER, druggist of Wichita, Kan., attended the Knights Templars conclave at Chicago, stopping over in St. Louis to buy goods before returning home.

—FRANK SCHEUBER, who formerly conducted a drug store at Jefferson, Wis., but who is now located in Livingston, Mont., is visiting at his old home.

—GEORGE RAMSEY, manager of the Hegeman Corporation, New York City, was expected home Sept. 1, from a vacation of several weeks spent in Canada.

—HENRY M. CAMPBELL, of Detroit, member of the board of directors of Parke, Davis & Co., was a recent visitor at the company's New York office.

—W. D. ROWLES, of Parke, Davis & Co.'s special preparation department, New York City, recently visited Boston and Canada on his vacation.

—EARL DONOVAN, Portage, Wis., has resumed his position in the Klenert Drug store after a vacation of several weeks spent at Appleton, Wis.

—DR. E. K. BOLTZ, a well known physician and pharmacist of Philadelphia, spent a portion of his vacation at his old home at Lebanon, Pa.

—EDWARD PENSCHUCK of New York, has accepted a position as prescription clerk in the Woodhead Pharmacy at Ashland, Wis.

—COL. JOHN W. LOWE, Boston representative of Eli Lilly & Co., spent his vacation during August with friends on Long Island Sound.

—JOHN BURNSIDE, connected with Parke, Davis & Co.'s New York office, spent the last two weeks of August vacationing.

—PAUL SCHUETTE, of Reedsburg, Wis., has accepted a position in the Prideaux & Bliss drug store at Mineral Point, Wis.

—WILLIAM MCKAY, connected with Parke, Davis & Co.'s New York office, spent several weeks of August out of town.

—L. H. WIKOFF, for 12 years postmaster at Emington, Ill., has resigned and will also retire from the drug business.

—GEORGE MOEHLE, secretary of the Milwaukee Drug Co., spent his vacation at Fish Creek, near Green Bay, Wis.

—EDWARD KIPP, druggist at Colerain avenue and Hopple street, Cincinnati, is the father of a fine new daughter.

—DR. WILLIAM MUIR, of Brooklyn, N. Y., has been enjoying the Summer at Prospect Point, Lake Bomoseen, Vt.

—HENRY S. LIVINGSTON, secretary for Schieffelin & Co., enjoyed several weeks' vacation during last month.

—DR. WILLIAM SCHIEFFELIN, of this city, spent the latter part of August at Bar Harbor, with his family.

—W. A. SENTON, of Marshfield, Wis., is spending the summer at Wampeen Lake with his family.

MERGER MADE BY WHOLESALERS IN CHICAGO.

Olney & Jerman Co. Unites with Peter Van Schaack & Sons, Mr. Jerman Continuing as Vice-President.

CHICAGO, Aug. 20.—In the interests of an economical administration of affairs in line with the 20th Century methods, and to serve their customers more satisfactorily, the Olney & Jerman Co. have completed arrangements to merge their business with that of their old-time neighbors and competitors, Peter Van Schaack & Sons, and the business will be carried on in the future under this latter title, at 138 and 140 East Lake street. With increased capital and with exceptionally good facilities for handling the combined business they feel certain that they can serve their trade to better advantage than in the past.

President A. R. Olney, after 40 years continuous work as head of Olney & McDaid and the Olney & Jerman Co., retires from active service in the drug trade, although he will be connected with the new organization as an interested stockholder. C. A. Jerman, also a stockholder, becomes vice-president of Peter Van Schaack & Sons and as the active head of the Sales Department will give his special attention to the customers of O. & J. Co. Practically all of the O. & J. sales force, as well as house employees, are connected with P. Van Schaack & Sons,

Eastern Drug Co. Absorbs Hoagland-Curtis Co.

BOSTON, Aug. 20.—The Hoagland-Curtis Drug Co., one of five wholesale drug houses of Boston, was absorbed last month by the Eastern Drug Co., which secured the entire stock of merchandise of the Hoagland-Curtis Co., together with their good will. The traveling salesmen of the Hoagland-Curtis Co. were also taken over by the Eastern Drug Co., and they have continued in their same territories.

Ralph P. Hoagland, president of the Hoagland-Curtis Drug Co., when seen by a representative of the ERA, said: "The move has been under consideration for some time, and only the completion of the details delayed it. We go out of the retail and wholesale drug business. We retain the shellac and varnish part of the business, which has been the chief feature of our business. We are importers of shellac and carnauba wax and we will continue that line, and be an exclusively importing house."

Charles L. West, vice-president of the Eastern Drug Co., who arranged for the purchase of the business of the Hoagland-Curtis Co., said: "The circulars sent out by the Hoagland-Curtis Co. and by us, tell the whole story. Our company has bought their business and good will."

PLUCKY DRUGGIST CATCHES NEGRO SHARPER.

Was Earning Several Dollars a Day by Defrauding Retailers in Various Parts of Philadelphia.

PHILADELPHIA, August 20.—A sharper who had been victimizing the druggists of this city, came to grief here recently. This fellow, who is a well educated negro, would enter a drug store, order a lot of goods for a family in the neighborhood for which he said he worked and direct that they be sent C. O. D., the next morning. Just before leaving he would decide to take one or two of the articles with him for immediate use. Next day the messenger would find that this family had placed no such order and did not know the negro.

Then the fellow would go to some other store and declare that he had purchased certain articles there recently and would ask for his money back, turning over to the accommodating druggist, the articles he had secured from the other store. He tried this game on Oliver Lamody, the manager of the S. B. Davis store at Thirteenth and Ritner streets, explaining that he had purchased an eighty-cent article a few days before from Mr. Davis himself. He received the money, but when the manager mentioned the incident to Mr. Davis a day or so after, the latter declared he had made no such sale to a colored man.

Although it was Mr. Lamody's day off he happened to be at the store today when who should come in but the same negro. The plucky manager immediately grabbed him and with the assistance of the proprietor subdued him and then sent for another druggist or two who had been victims of the fellow's work. The negro had been working the game all over the city and had been realizing several dollars a day.

The U. S. P. Board of Trustees.

This excellent photograph is of six of the seven members of the board of trustees of the U.S.P. who attended the recent meeting at Atlantic City. Dr. William J. Schieffelin, owing to a trip to Europe, was unable to be present. Top row (left to right), Dr. J. H. Beal, Dr. George H. Simmons, Prof. Joseph P. Remington. Sitting (left to right), F. W. Meissner, Dr. Henry M. Whelpley, Dr. Harvey W. Wiley.

CLERK FAILS TO GET DRUGS ON FORGED ORDER.

Discharged Employe of Bronx Pharmacists Arrested When Trying to Steal From Lehn & Fink.

James Berg, a drug clerk, recently presented an order at Lehn & Fink's city order department from Kantor & Co., druggists, who have two stores in the Bronx, for assorted merchandise. The liberal quantities of high priced goods ordered, among which were five ounces cocaine, aroused the suspicion of the order clerk. Berg, who wanted to take the goods with him, was told to wait until the order had been completed. Meanwhile Kantor & Co. were communicated with and gave the information that Berg had been discharged from their service several days previously for stealing and that the order was forged. He had taken Kantor & Co.'s order-book, which he showed to Lehn & Fink's clerk when he placed his order, but the mental suggestion of this trick failed to produce hypnosis in the order clerk, as events proved. Berg was promptly arrested and was held in $1000 bail before Judge Cornell for the action of General Sessions.

Northern Ohio Druggists Enjoy an Outing.

CLEVELAND, Aug. 20.—Annual outing of the Northern Ohio Druggists' Association, held on the 17th at Avon Park Beach, was enjoyable and successful. E. Petersilge, E. R. Selzer and Wm. Ruess will represent the association at the N.A.R.D. convention at Pittsburg. The following officers have been elected for the year 1910-1911:

President, E. Petersilge; first vice-president, W. M. Fox; second vice-president, O. E. Mouhlhan; treasurer, George J. Hoehn; secretary, H. V. Arny.

NOTE: A, advanced; D, declined; C, correction. A new

see page 920 and following pages for Prices Current

NEW YORK, Aug. 25. Although the general drug and chemical market continues to present a quiet appearance, with business chiefly in jobbing quantities, the aggregate volume of transactions of reasonable proportions and a healthy tone is manifested on the part of sellers. Price fluctuations are few and comparatively unimportant, interest being largely confined to the new crop items, some of which are now arriving, while others are expected to arrive in the near future. Opinion is without material change. Advices from primary markets continue to indicate a firm situation. Cables received from abroad within the past week report a further hardening tendency in some instances. Reports from primary markets in this country also indicate a firm situation. Jobbers are doing a fair business in small lots for immediate delivery.

Acetanilid—Is in good demand and prices are firm.

Acid, Acetic—Is in good demand and prices are firm.

Acid, Boric—Is in good demand and prices are firm.

Acid, Carbolic—Is in good demand and prices are firm.

Acid, Citric—Is in good demand and prices are firm.

Acid, Gallic—Is in good demand and prices are firm.

Acid, Levulic—Is in good demand and prices are firm.

Acid, Nitric—Is in good demand and prices are firm.

Acid, Tartaric—Is in good demand and prices are firm.

Aconite Root—Is in good demand and prices are firm.

Alcohol—Is in good demand and prices are firm.

Alkanet Root—Is in good demand and prices are firm.

Almonds—Are in good demand and prices are firm.

Aloes—Are in good demand and prices are firm.

Alum—Is in good demand and prices are firm.

Ammonia Water—Is in good demand and prices are firm.

Anise Seed—Is in good demand and prices are firm.

Antimony—Is in good demand and prices are firm.

Arrowroot—Is in good demand and prices are firm.

Asafetida—Is in good demand and prices are firm.

Balsam Peru—Is in good demand and prices are firm.

Balsam Tolu—Is in good demand and prices are firm.

Belladonna Root—Is in good demand and prices are firm.

Benzoin—Is in good demand and prices are firm.

Camphor—Is in good demand and prices are firm.

Canada Snakeroot—Is in good demand and prices are firm.

Cantharides—Are in good demand and prices are firm.

Capsicum—Is in good demand and prices are firm.

Cardamom—Is in good demand and prices are firm.

Cascara Sagrada—Is in good demand and prices are firm.

Castor Oil—Is in good demand and prices are firm.

Catechu—Is in good demand and prices are firm.

Cinchona—Is in good demand and prices are firm.

Cinnamon—Is in good demand and prices are firm.

Cloves—Are in good demand and prices are firm.

Cocaine—Is in good demand and prices are firm.

Cochineal—Is in good demand and prices are firm.

Cod Liver Oil—Is in good demand and prices are firm.

Colchicum Root—Is in good demand and prices are firm.

Colchicum Seed—Is in good demand and prices are firm.

Coriander—Is in good demand and prices are firm.

Cubeb—Is in good demand and prices are firm.

Dandelion Root—Is in good demand and prices are firm.

Digitalis—Is in good demand and prices are firm.

Ergot—Is in good demand and prices are firm.

Ether—Is in good demand and prices are firm.

Euonymus—Is in good demand and prices are firm.

Fennel Seed—Is in good demand and prices are firm.

Gelsemium—Is in good demand and prices are firm.

Gentian Root—Is in good demand and prices are firm.

Ginger—Is in good demand and prices are firm.

Ginseng—Is in good demand and prices are firm.

Glycerin—Is in good demand and prices are firm.

Golden Seal—Is in good demand and prices are firm.

Guaiac—Is in good demand and prices are firm.

Hellebore—Is in good demand and prices are firm.

Hemlock—Is in good demand and prices are firm.

Henbane—Is in good demand and prices are firm.

Hops—Are in good demand and prices are firm.

Hydrastis—Is in good demand and prices are firm.

Ipecac—Is in good demand and prices are firm.

Iron—Is in good demand and prices are firm.

Jalap—Is in good demand and prices are firm.

Juniper Berries—Are in good demand and prices are firm.

Lavender—Is in good demand and prices are firm.

Lemon Oil—Is in good demand and prices are firm.

Licorice—Is in good demand and prices are firm.

Linseed Oil—Is in good demand and prices are firm.

Lobelia—Is in good demand and prices are firm.

Logwood—Is in good demand and prices are firm.

Lupulin—Is in good demand and prices are firm.

Manganese—Is in good demand and prices are firm.

Menthol—Is in good demand and prices are firm.

Mercury—Is in good demand and prices are firm.

Morphine—Is in good demand and prices are firm.

Mustard—Is in good demand and prices are firm.

Nux Vomica—Is in good demand and prices are firm.

Oil Anise—Is in good demand and prices are firm.

Oil Bergamot—Is in good demand and prices are firm.

Oil Bitter Almond—Is in good demand and prices are firm.

Oil Cajeput—Is in good demand and prices are firm.

Oil Cassia—Is in good demand and prices are firm.

Oil Cinnamon—Is in good demand and prices are firm.

Oil Citronella—Is in good demand and prices are firm.

Oil Cloves—Is in good demand and prices are firm.

Oil Eucalyptus—Is in good demand and prices are firm.

Oil Geranium—Is in good demand and prices are firm.

Oil Lavender—Is in good demand and prices are firm.

Oil Lemon—Is in good demand and prices are firm.

Oil Orange—Is in good demand and prices are firm.

Oil Peppermint—Is in good demand and prices are firm.

Oil Rose—Is materially higher in sympathy with corresponding conditions in producing markets, and quotations have been sharply advanced, jobbers asking $7.00@$7.25 per ounce for Kissaulik. Recent advices from Constantinople indicate that there is an actual shortage of about 30 per cent against the output of last year and the average of the two years 1908 and 1907 is not even reached. These facts account for the advance in price.

Buchu Leaves—Prices for both long and short varieties have been advanced and offerings continue limited to small parcels. The prevailing opinion is that manufacturing consumers are short of supplies, and that any important demand will result in a further material advance in values. There are some who profess to believe that a $2.00 market will be reached.

Glycerin—Refined is decidedly firmer owing to continued scarcity and higher values of crude abroad and manufacturers have advanced their prices nearly two cents per pound. Jobbers are quoting 26c.@30c. and the tendency of values is still upward.

Balsam Peru—Remains very firm with supplies scarce in this market. Some holders are asking $1.85 per pound by the case, while dealers are quoting smaller parcels at $2.20@$2.30 per pound.

Prickly Ash Berries—Are easier under freer offerings and lack of important demand. New crop has begun to arrive and quotations have been reduced to 35c.@40c. per pound, but no business is reported.

Star Anise Seed—Is again called higher in producing markets and quotations have been advanced to 28c.@33c. as to quantity and quality.

Lupulin—Is higher owing to scarcity together with firmer markets abroad. The import cost is said to be about 80 cents and jobbers are asking 85c.@90c. per pound.

Menthol—Is higher abroad and spot stocks report an important advance. Jobbers quote $3.50@$3.75 per pound for crystals.

Pareira Brava Root—Supplies are light with here and there recent advices being to the effect that the stock in London is reduced to forty packages. Prices in this market have been advanced to 50c.@60c. per pound.

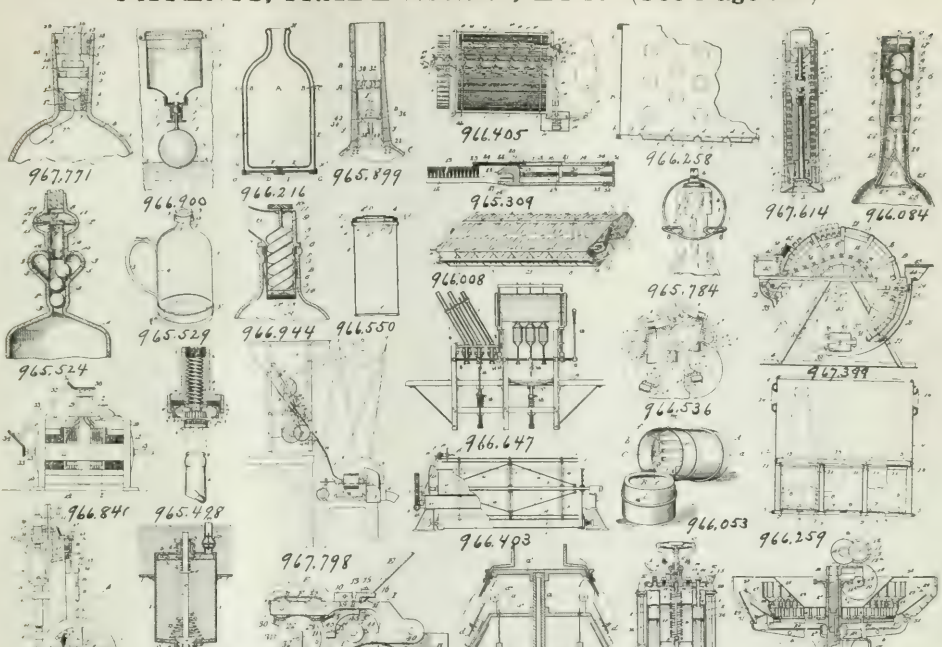
Santonine—The present advanced scale of prices, which came into force on July 1 is firmly maintained at $12.00@$12.50 per pound. Reports from abroad indicate that the syndicate controlling the Turkestan factories not only hold, but are likely to continue to hold the complete command of the market for santonine and it is believed that if any change in price does come, it will again be in an upward direction.

Linseed Oil—Jobbers are quoting $1.03@$1.08 per gallon for raw and $1.05@$1.10 per gallon boiled. Stocks of oil all over the country are about exhausted and the leading oil interests here seem to think that no lower prices will obtain in the near future. New crop seed is beginning to arrive in the Northwest, but in this market prices have been advanced to $9.25 per barrel for sifted and cleaned seed.

Name and Address of Manufacturer Wanted

An ERA subscriber writes: "Can you oblige me with the name and address of Brown's Root Remedy? Can you kindly supply the information?

PATENTS, TRADE MARKS, ETC.—(See Page 910)



PATENTS.

Granted July 26, 1910.

965,170—Karl Elbel, Biebrich, Germany, assignor to Kalle & Co., Aktiengesellschaft. Process of condensing reduction products of meta-phthalene-quinone, etc.

965,275—Henry Bernstein, Philadelphia. Process of making cuprammonium solution.

965,309—Frederick L. MacDonald, Waltham, Mass., assignor, by direct and mesne assignments, to Domenic Conte. Fountain tooth-brush.

965,498—Benjamin Adriance and Amos Culleson, Brooklyn; said Culleson assignor to said Adriance. Method of sealing bottles.

965,524—Jabez Humphrey, Philadelphia. Non-refillable bottle.

965,535—Georg M. C. Nielsen, Millis, Mass., assignor, by mesne assignments, to United Cork & Seal Co. Bottle-sealing apparatus.

965,629—Theodor Holz, Cleveland, assignor to The Holz Manufacturing Co. Bottle-handling device.

965,765—John C. Taliaferro, Baltimore. Sealing composition.

965,784—Sydney J. C. Wilkinson, Johannesburg, Transvaal. Means for attaching bottle-closures.

965,823—Hans Lebach, Ludwigshafen-on-the-Rhine, Germany, assignor to Knoll & Co. Process for hardening condensation products from phenols and aldehydes.

Granted August 2, 1910.

965,899—Fred W. Herbert, Pelham, N. H. Non-refillable bottle.

965,903—Fritz Hofmann and Carl Gentelle, Elberfeld, Germany, assignors to Farbenfabriken vorm. Friedr. Bayer & Co. Process of making tetramethylendiamin.

965,966—Jean Jacques Van Dandaigne, Montreal, Quebec. Formalin vaporizer.

966,008—Sigmund L. Goldman, Chicago. Bottle-rack.

966,053—Meyer L. Rhein, New York. Powder holding and dispensing container.

966,084—Homer V. Colvin, St. Louis. Non-refillable bottle.

966,092—Richard Herz, Frankfort-on-the-Main, Germany, assignor to Cassella Color Co., New York. Indophenolic compound and process of making same.

966,196—Henry M. Goodman, Louisville, Ky. Method of separating organic materials from aqueous liquids.

966,216—Konrad Kather, San Francisco, and George P. Schild, Vallejo, Cal. Vacuum-bottle.

966,258—Frank Sochurek, Sr., Milwaukee. Bottle-tray.

966,259—Louis Sochurek, Milwaukee. Bottle-case.

966,270—Henry W. Van Leir, Philadelphia, assignor to S. S. Wenzell Machine Co., Charlestown, W. Va. Bottle filling machine.

966,403 and 966,405—Walter L. Bodman, Cincinnati, assignor to Isaac Rheinstrom. Bottle-soaking machine.

966,404—W. L. Bodman, assignor to I. Rheinstrom. Bottle washing machine.

Granted August 9, 1910.

966,463—Edgar S. Miller, Atchison, Kans., assignor to Industrial Engineering Co. Labeling-machine.

966,536—Edward Ermold, New York. Wiper for bottle-labeling machines.

966,538—Dudley T. Fisher, Columbus, O. Illuminated sign.

966,542—Herman L. Hartenstein, Constantine, Mich., assignor to Continental Investment Co., Duluth, Minn. Method of making calcium carbide.

966,550—John M. Hothersall, New York, assignor to American Can Co. Sifter-top can or box.

966,642 and 966,643—Albert D. Barr, Batesville, Ark. Medicament and process of producing the same.

966,647—Joseph H. Brandt, Philadelphia. Bottle-stoppering mechanism.

966,820—Albert Friedlaender, Berlin-Halensee, Germany, assignor to Arthur Horowitz. Process of rendering hydroxyl derivatives of aromatic hydrocarbons soluble in water.

966,838—Hermann Jaffee, Hoboken, and Edward M. Dorstewitz, New York. Antiseptic body germ protector.

966,840—Ernest C. Ketchum, Boston. Automatic mercury-dropper.

966,900—George H. Garnet, Allentown, Pa. Disinfector.

966,944—Wm. R. McDonald, Dallas, Oreg. Non-refillable bottle.

967,001—Auguste Deiss, St. Barnabe, Marseille, France. Process of manufacturing cellulose.

967,049 and 967,050—Anders A. Pindstofte, Copenhagen, Denmark. Bottling-machines.

Granted August 16, 1910.

967,399—William Lipps, Chattanooga. Bottle-washer.

967,413—Ellsworth L. McCain, Detroit. Tooth-brush.

(Continued on Page 910.)

PATENTS.

(Continued from page 909.)

965,784—Emil F [illegible] Leverkusen-on-the-Rhine, Germany, assignor to Kalle & Co., Actien-Gesellschaft, [illegible] and process of making same.

965,794—Edward L. Wright, New York. Bottle-cap.

965,814—Charles P. Morosh, Brooklyn, N. Y., assignor to Charles P. Morosh Manufacturing Company, same place. [illegible]

965,888—Charles F. L. Hitchens, Formby, Eng. Topical medicated pad.

965,910—W. E. [illegible] and E. P. Hoy, Avonmore, Pa. Non-refillable bottle.

965,965—John Lyons, New Cross, London, Eng., assignor to Arrowsmith & Co., Limited, Bristol, Eng. Cork-grinder and presser.

965,985—Walther Schoeller and Walther Schmidt, Berlin, Germany, assignors to Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld. A salt consisting of orthooxymercuric salicylic anhydride and one of the same parties, secondary alkali salts of orthooxymercuric salicylic acid. 965,840, same parties, medicinal soaps.

TRADE MARKS.

Published July 26, 1910.

[illegible]—National Chemical Co., Memphis. Remedy for local application and internal in the treatment of headache, neuralgia, faceache, catarrh, and hay-fever.

41,878—Max Dienstfertig, Fraustadt, Germany. Remedy for diseases of [illegible].

45,906—Serum-Laboratorium, Ruete-Enoch, Hamburg, Germany. Antiseptic serum.

46,857—Hoffmann-La Roche Chemical Works, New York. Bismuth oxyiodogallate, a powder for use in healing and [illegible] wounds.

46,875—Frank R. Carter, Anaconda, Mont. A hair tonic.

49,031—Miro-Dena Co., Syracuse. Perfume.

49,062—Joseph Housewerker, Albany. Remedy for headaches, neuralgia, and heartburn.

49,307—Davis & Lawrence Co., New York. A vegetable remedy for malaria.

49,870—Zymace Co., New York. Laxatives and purgatives.

[illegible]—[illegible] M. Lyons, Zanesville, O. Insecticides.

50,[illegible]—[illegible] Mfg. Co., New York. Cancer remedy.

REVISED SCHEDULE OF ALCOHOLIC MEDICINALS

Held by Internal Revenue Commissioner to be Liable for Special Tax, Even if Dispensed as Medicine.

Royal E. Cabell, Commissioner of Internal Revenue, has issued (T. D. 1643) a list of alcoholic medicinal preparations which have been examined by his office and held to be insufficiently medicated to render them unfit for use as a beverage is published for the information of all concerned.

Special tax will be required for the sale of any of the preparations named, even though such sales are for medicinal use.

The names of most of the preparations heretofore given on the various lists which have been published will be found included in this list, the only exceptions being those the manufacturers of which have revised their formulas to meet the government requirements or which are no longer on the market.

Special tax will not be required for the sale for medicinal use of any alleged medicinal compound not on this list until the department has been communicated with and specific instructions received.

The preceding paragraph does not, however, apply to the class of compounds usually described by the term "Cocktail bitters," which are suitable for and usually used as beverages.

It having been found in various instances that there are several preparations of the same name on the market, the names of the manufacturers of the preparations examined are given, and it should be understood that only the preparation as compounded by the manufacturer whose name is given is embraced in this list.

Special tax will be required for the manufacture and sale of Beef, Wine, and Iron, unless it contains at least the percentages of beef and iron given in the formula on page 1821 of the nineteenth edition of the United States Dispensatory or is otherwise sufficiently medicated to be unsuitable for use as a beverage. Special tax will also be required for the sale of the compound ordinarily sold under the name of Rock, Rye and Glycerine.

Collectors and revenue agents will continue to secure and forward to the Internal Revenue Commissioner samples of preparations which they have reason to believe are, or may be, used as beverages. The list in full is as follows:

Ale and Beef, Ale & Beef Co., Dayton Ohio.
Allen's Restorative Tonic, Faxon & Gallagher Drug Co., Kansas City, Mo.
American Alimentary Elixir, American Drug Store, 1115 Canal street, New Orleans, La.
American Elixir, Beggs Mfg. Co., Chicago, Ill.
American Stomach Bitters, Amer. Drug Store, New Orleans, La.
Amer Prem. Co. Prem compounded.
Angostura Aromatic Tincture Bitters, E. R. Behlers, St. Louis.
Arbaugh's Newport Bitters, Dan'l Stewart Co., Indianapolis, Ind.
Arome Bitters, A. Gaines, 285 Hudson street, New York.
Aromatic Bitters, Hanigan Bros., Denver, Colo.
Aromatic Stomach Bitters, Pfeiffer Chemical Co., St. Louis, Mo.
Aroma Stomach Bitters, J. S. Smith & Co., Burlington, Iowa.
Atwood's La Grippe Specific, Excelsior Medicine Co., Chicago, Ill.
Augauer Bitters, Augauer Bitters Co., Chicago, Ill.
Augauer Kidney-Aid, Augauer Bitters Co., Chicago, Ill.
Augustiner Health and Stomach Bitters, A. M. August, Milwaukee, Wis.
Beef, Wine and Iron, Waudby, Son & Co., Pittsburg, Pa.
Berg's Hawkeye Bitters, Berg Medicine Co., Des Moines, Iowa.
Belvedere Stomach Bitters, Loewy Drug Co., Baltimore, Md.
Bismark Laxative Bitters, C. Lange & Co., Chicago, Ill.
Bismark's Royal Nerve Tonic, R. A. Smith & Co., Pana, Ill.
Bitters, The Atlantic Vineyard & Wine Co., Philadelphia, Pa.
Blackberry, Karlee Medicine Co., Aberdeen, S. Dak.
Blackberry Cordial, International Extract Co., Philadelphia, Pa.
Blackberry Cordial, Irondequoit Wine Co., Rochester, N. Y.
Blackberry Cordial, Strother Drug Co., Lynchburg, Va.
Blackberry and Ginger Cordial, Standard Chemical Co., Fort Smith, Ark.
Black Tonic, Albert Niggemann, St. Louis, Mo.
Boneknamp Stomach Bitters, Geo. J. Flixner, Springfield, Ill.
Boneknamp Bitters, J. S. Smith & Co., Burlington, Wis.
Botanic Bitters, F. E. Mayhew & Co., San Francisco, Cal.
Bradenberger's Colocynthis, Standard Chem. Co., Ft. Smith, Ark.
Brod's Celery Pepsin Bitters, Jno. Brod. Chemical Co., Chicago.
Brown's Iron Bitters, Light, A. E. & E. V. Brown Co., Mobile, Ala.
Brown's Aromatic Cordial Bitters, Chas. Leich & Co., sole agents, Evansville, Ind.
Brown's Vin Nerva Tonic, Brown Chemical Co., Nashville, Tenn.
Buckeye Bitters, Geo. Albert, Milwaukee, Wis.

(Continued on page 912.)

Let's Co-operate to Our Mutual Profit in the Sale of

DIAMOND DYES

We, as the manufacturers, have made Diamond Dyes so long that we are positive that they are the best. We claim they are "The Standard of the World" and millions of satisfied customers will bear us out.

Our outlet for sales is naturally through you, the druggist, so we provide you with an attractive display and selling cabinet and allow you a good margin of profit.

But vastly more important than this—we spend over $200,000 a year for advertising space in all the leading women's publications.

This advertising tells the wife, the mother, the maid, of the countless superiorities and wonderful economy of Diamond Dyes. Then it directs customers to your store to purchase them.

No other 10c. article in your place gets the advertising stimulus that we give Diamond Dyes.

And all we ask you to do is to keep a complete assortment of colors on hand to supply the demand.

If you don't already carry them, now is the time to put in a supply and get the benefit of our greatest advertising campaign.

DIAMOND DYES

are the best, the safest and most reliable dyes in the world. There are no risks or failures with Diamond Dyes and every use they are put to saves money.

When a lady asks you for Diamond Dyes it might be well to offer her

A FEW VALUABLE HINTS

First tell her you have Diamond Dyes for wool and Diamond Dyes for cotton. That no dye in the world works successfully with all kinds of materials.

Explain that wool, silk, alpaca and camel's hair are animal fibres that take up the dye very slowly, so it is necessary for her to use Diamond Dyes for wool.

And that cotton, linen and mixed goods are vegetable fibres that absorb the dyes quickly, so it is necessary for her to use Diamond Dyes for cotton.

Therefore, if she gets the right dye for the material, there is absolutely no chance of failure.

The Diamond Dye direction book will furnish every detail of information and the Diamond Dye Annual will give her the latest styles and many testimonials of the success of others.

There are many convincing arguments in favor of home dyeing and we are presenting them to the women of the country in a clear and forcible manner.

T. P. Taylor Buys Building Containing Drug Store.

Lawrenceburg, Aug. 20.—The property on the southeast corner of Second and Chestnut streets has been bought by T. P. Taylor of T. P. Taylor & Co. The former owner, Dr. S. [illegible], disposed of the building preparatory to moving to California with his family. His drug business will be continued at least for a time by Peter Schuman, a brother.

In Bankruptcy—Assets Exceed Liabilities.

Louisville, Aug. 20.—S. W. Gaulin, a druggist at Hartford, Ky., has filed a petition in bankruptcy. He lists a number of local firms as creditors. His liabilities are $1,083.30, while his assets are $16,914.80, with several claims of $10,000.

MARCHAND'S
MEDICINAL PREPARATIONS

If you, Mr. Pharmacist, had devoted over *a quarter of a century* to the manufacture of five high grade preparations with only one standard of purity and uniformity, wouldn't you feel they were better than those made by a newcomer?

Then, is it any wonder we are proud of *our* preparations?

We were the first to manufacture Peroxide of Hydrogen (Marchand's) for medicinal purposes—that was thirty-one years ago—we are the PIONEERS.

PHYSICIANS KNOW

That MARCHAND'S PEROXIDE OF HYDROGEN (medicinal, 15 Vol.) is superior, because it is 50% *stronger* than the ordinary U.S.P., 10 Vol., and because it contains *NO ACETANILID*, and is absolutely free from any impurities.

That HYDROZONE (30 Vol.) is *THREE TIMES AS STRONG* as the ordinary preparations, and that it is the *most powerful of all germicidal agents*, yet is *absolutely non-poisonous.*

That GLYCOZONE ($C_3H_6O_4+C_5H_8O_3$), because of its remarkable properties is of signal value when applied to inflamed mucous membranes or other tissues. It is especially serviceable in acute and chronic forms of gastritis, intestinal catarrh, gastric ulcer, etc.

HYDROZONE AND MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) are put up in the best quality of flint glass bottles, for the reason that flint glass is not so brittle as amber glass. This, in connection with Marchand's improved process of manufacture, reduces the risk of breakage to a minimum.

When a prescription or a request comes to you for **MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal), HYDROZONE, GLYCOZONE, MARCHAND'S EYE BALSAM** or the **DREVET MFG. CO.'S U.S.P. H_2O_2 Official**, see that it is dispensed and no attempt made to urge anything else upon the customer.

Your profit is **LARGER** than it would be if you urged the sale of an inferior article.

GROUP OF PORTION OF PARTICIPANTS IN CONVENTION OF LIQUID MANAGERS AND SALESMEN.

The last week in July was a most memorable week in every way connected with the Liquid Carbonic Co. Salesmen and branch managers from all over the country spent that week in conference at Chicago Headquarters. About 125 were in attendance. J. B. Greene, general sales manager, took personal charge of the meetings and conducted them with a zest and a "go" that made every minute count. The convention was in the nature of a school of instruction and both mechanical and selling forces at Chicago made it their business to demonstrate all the various things that the company makes. One forenoon was devoted to a trip to and through the new factory which is now nearing completion. The photograph shows a portion of the party lined up in front of the fine new plant. The spirit of "business" was in evidence every moment during the session.

GOVERNMENT HITS AT HEADACHE CURES.

Acetanilide Contents are Generally Misstated. "Mother's Friend" and "Cancerine" Misbranded.

WASHINGTON, August 20. The Department of Agriculture has given public notices of judgment 355 to 457, imposed by the courts in cases reported by the United States involving violations of the Food and Drugs Act, most of them relating to misbranding and adulteration.

Four headache remedies were found to be misbranded and their manufacturers prosecuted. The Celery Cracker Medicine Co., Manchester, N. H., shipped in inter-state commerce a quantity of drug product labeled "Dr. Wm. M. Eames' Tonic Headache Wafers. (Formerly called Celery Crackers)" and stating same did not contain any "dangerous drugs," whereas it contained acetanilide. Court imposed fined of $25 and costs of prosecution were limited to $25. The Fulton-Richardson Chemical Co., St. Louis, shipped a drug product labeled "Knox's Head-ake Powders." False claims were made for product and quantity of acetanilide present was misstated. Fined $10 and costs. Will H. Carslake, trading as the John A [illegible] Co., Bordentown, N. J., made several shipments of "Falck's One Minute Headache Cure," label on which did not state quantity or proportion of acetanilide present. Defendant entered plea of non vult and court suspended sentence in both cases. C. W. Horn, Slatington, Pa. shipped a consignment of "Telephone Headache Tablets," for which various claims for its harmlessness and remedial properties were advanced and a certain quantity of acetanilide stated on label to be present. On analysis, all of these statements were shown to be mis[illegible] and defendant was fined $25.

The Egg Cord Manufacturing Co., Detroit, shipped a consignment of "Eppo-stone, skin food for beautifying the complexion." Product consisted essentially of magnesium sulphate, colored with a pink dye, and was not a skin food in [illegible] claimed on the label. Defendant fined $10.

[illegible] Benson, 10 Sloane and Herbert Sloane, doing business as [illegible] & Sloane, St. Louis, shipped quantity of drug product [illegible] "Dandy Dixie Inhalator," on bottles which [illegible] and [illegible] amount of alcohol present. Fined $50 and costs.

A quantity of a [illegible] "Herbert's Cure Soothing Syrup," was [illegible] at Avonmore, by Herbert Yeagy, Pa., the labels on which bore false and misleading statements as to presence of morphine and quantity of alcohol contained therein. Fined $10 and costs.

The Bradfield Regulator Co., Atlanta, Ga., shipped two consignments consisting of 57 cases and 30 cases, respectively, of a drug labeled "Mother's Friend." Libels were filed against the cases, each one of the cartons containing the unit package being labeled: "The Mother's Friend, for the relief of the suffering incident to child bearing, etc." Such labeling was false, misleading, and deceptive. Product consisted essentially of an oil, together with a small amount of soap. Cases were condemned and forfeited but released to owner upon payment of costs and filing of bonds to dispose of goods in accordance with law.

C. Henry Wilson, Shelton, Conn., shipped a consignment of "Cancerine," same misbranded in that statement "this extract contains 2% alcohol," was stamped on carton with type smaller than 8-point (brevier) capitals, and also in that the word "Cancerine" falsely implied product would cure cancer. In pamphlet accompanying drug other false statements as to cancer curative properties were made. Fined $100.

Because a quantity of a drug product, "Eau Sublime Hair Coloring," shipped by Hippolyte Guilmard, was misbranded so as to indicate product was a vegetable substance which would color the hair, remove dandruff, prevent the hair from falling out and was harmless, defendant was fined $5.

A. Robinson McIlvaine, trading under the firm name of McIlvaine Brothers, Philadelphia, shipped a consignment of a drug, each package labeled "Powd. Colocynth, Trieste, 5 lbs., etc." Product was adulterated in that it was sold under a name recognized in the U.S.P. and differed from the official standard of strength, quality and purity. Misbranded "Powd. Colocynth" as whole colocynth apple was used in manufacture of product. Fined $10.

Mrs. Gervaise Graham, Chicago, shipped in inter-state traffic a quantity of a drug product, "Mrs. Graham's Dandruff Cure," misbranded "pure and harmless" and "a permanent cure for dandruff." Fined $25.

Aged Doctor Fined in Anti-Cocaine Crusade.

CINCINNATI, Sept. 1. The war of city officials and druggists' organizations against the illegal sale of cocaine here provided a sensational feature a few days ago when Police Judge Bode fined Dr. Allen Mullendore, an old physician, $250 and costs for having unlawfully sold cocaine.

MALLINCKRODT CHEMICAL WORKS

ST. LOUIS **NEW YORK**

BUSINESS NOTICES

Hohner's Harmonica Selling Device.

M. [illegible] is [illegible] harmonicas and as practically a [illegible] of these goods must [illegible] in stock, it is good [illegible] to [illegible] to [illegible].

The Hohner Harmonica is a favorite throughout the world and the manufacturer, M. Hohner, 455 Broadway, New York, has created a demand for [illegible] which is really the greatest selling device ever put before the dealer for this purpose. Owing to its novel arrangement and [illegible], as shown in the accompanying illustration, it can be thrown open and closed in a moment's time. When the cabinet is open the Harmonica display is exceptionally attractive, exhibiting the entire contents of 38 Harmonicas at one time and to great advantage. When closed, the complete cabinet occupies a [illegible] of space much less than a foot square. It is an ideal selling proposition, [illegible] and also enables him to make a gain of over 50 per cent on an investment of $8.75. Read the advertisement on another page in this issue and write to M. Hohner at the above address for further particulars.

Aikin-Lambert Co.'s Combination Novelty.

Shown herewith is an illustration representing the new Combination Pencil Holder, Cigar Cutter and Ear Wax Orderer, a popular novelty made by the Aikin-Lambert Co., the well known manufacturers and exporters of gold pens and pencils, 15-19 Maiden Lane, New York. Pencil holders, separately, are very popular and in great demand as gifts. Users of pencils find them to be not only convenient but economical, [illegible] and [illegible] to the extreme

[illegible] Pencil Holder, however, combining, as it does, an [illegible] pencil holder and cigar cutter all in one, has many claims for usefulness and as such it has already met with exceptional favor in the trade. These Holders are made in nickel, silver, gold plate and solid gold, and dealers may receive full information concerning them by writing to the Aikin-Lambert Co., at the above address.

Place Your Order—The Serum Season is Again Here.

If any doubt arises in the mind of the provident pharmacist that now is the time to order his early fall supplies of antidiphtheric serum, that doubt will be quickly dispelled upon examination of the advertising section of any one of a hundred and odd medical journals of the current month's issue. In other words, Parke, Davis & Co. have inaugurated their 1910 campaign [illegible] of [illegible] and [illegible] the last named product being a concentrated form of the [illegible] in the same style of [illegible] syringe and sold at the same price. As there is certain to be [illegible] and as [illegible] [illegible] [illegible]

Dept. P. E. **9-15 PARK PLACE, NEW YORK**

THIS EXCLUSIVE PRESCRIPTION PHARMACY IN TACOMA IS MODEL OF PACIFIC COAST ENTERPRISE.

Prescription Department—E. A. Friend & Co.

Last spring E. A. Friend & Co. of Tacoma, opened one of the most interesting and [illegible] pharmacies on the Pacific Coast. The establishment is [illegible] pharmacy [illegible] Division and Commerce streets. Mr. Friend is a man of wide [illegible] and an accomplished pharmacist. And after thorough [illegible] of the situation in Tacoma he decided that an ethical pharmacy appealing strictly to the medical profession for sales of a most [illegible] for [illegible] biologicals, chemicals, pharmaceutics and supplies for the sick room. As an illustration of the thoroughness with which he prepared to meet the demands of a large and exacting prescription business he purchased a complete line of Red Lilly pharmaceuticals, chemicals and other classes of goods in proportion. The views herewith are of the interior. The waiting room contains wall shelves for sundries and miscellaneous supplies. The prescription department and laboratory is a model of convenience and neatness.

Waiting Room—E. A. Friend & Co.

Manufacturers Issue New Price List.

Daggett & Ramsdell, manufacturers of Perfect Cold Cream and other well known toilet articles, 314 W. 14th St., New York, have just issued their 1910-1911 Price List, a copy of which we have received. It is in booklet form, with fawn colored covers and beautifully printed and illustrated. Besides containing prices it gives to dealers some good reasons why it pays to handle reliable products made in a "perfect way."

Your **Profits**

of 100%—consider that on an article retailing for $1.00 a bottle.

E. W. ROE MEDICINE CO.

3032 OLIVE ST. ST. LOUIS, MO.

Medicinal Peroxides and Peroxide Salts.

Pharmacists, as well as members of the medical profession and manufacturers of pharmaceutical and toilet specialties, will be interested in the list of peroxides or active-oxygen preparations manufactured by patented processes under letters of patent by the Roessler & Hasslacher Chemical Co., of New York. These preparations find an extensive use in medicine and sanitary work, as the following notes will show:

Perborate of sodium, a white powder readily soluble in water, claimed to be most convenient form of [illegible] preparing the best substitute for the more or less unstable solution of peroxide of hydrogen, of any desired strength.

Peroxide of calcium, a powerful [illegible] and germicide.

Peroxide of magnesium, a non-toxic, tasteless powder, replacing bismuth salts as intestinal disinfectants, etc.

Peroxide of strontium, a [illegible] agent, used as a dressing powder in ointments, etc.

Peroxide of zinc, an odorless, fine powder, used extensively in surgery, gynecology, dermatology, etc., and recommended as a superior substitute for iodoform.

Peroxide zinc soap containing 10 per cent of peroxide of zinc, and liberating, when used, about 85 times its own value of active oxygen.

Perborate of magnesium, for similar uses to those of peroxide of strontium and peroxide of zinc.

Perborate of zinc, used as a dressing powder by some in place of the peroxide and sodium perborate.

Oxone, for the instantaneous production of pure oxygen for medicinal and laboratory purposes.

The Roessler & Hasslacher Chemical Co., also handle an oxone generator, a portable, handy outfit for quick supply of pure oxygen at any time or place and Hydrone, for producing pure hydrogen, 100 per cent.

Pape Co.'s Million Dollar Advertising Campaign.

Pape's Diapepsin and Pape's Diuretic are certain to be two heavy and constant sellers after the beginning of the "million dollar advertising campaign" in the Fall. These preparations should have the support and good will of every druggist because only clean, honest advertising will be used—and the formula is plainly printed on each package.

The manufacturers state that whenever a diuretic is indicated no mistake can be made in recommending Pape's Diuretic and every pharmacist should read and consider the formula. It is a safe and harmless diuretic. The Pape, Thompson & Pape Co. do not try to load druggists up or even ask them to put in a big stock, but merely suggest the advisability of getting the best discounts which wholesalers allow—as these two preparations are known to be absolutely staple and there is no danger of "dead goods" for many years to come. Pape, Thompson & Pape Co. have always made good and have never been known to "play unfair." Such firms should have the cordial support of the drug trade.

[illegible] to all druggists in [illegible] Price List.

$30.00 FREE!

ALPHOZONE

PRICE REDUCED

Our facilities for the manufacture of Alphozone are so improved since the completion of our new chemical building that we are enabled to announce a reduction in the price of that article amounting to about 33 per cent.

Powdered Alphozone is now listed at $3 per oz.; $1.60 per ½-oz., and 85c. per ¼ oz.

Alphozone 1 gr. tablets are put up only in bottles of 60 (instead of 90 as formerly) and the price per bottle is 50 cents net.

The great superiority of Alphozone as a germicide, and the constantly widening field of usefulness that is being developed through clinical experiment, point to a largely increased demand. We shall be pleased to send literature to any pharmacist or physician requesting it.

"Quick Loader"

INSECT POWDER GUN

LEADS THEM ALL

It Leads in Quick Sales
It Leads in Durability
It Leads in Construction
It Leads in Applying the Powder
It Leads in Price

There is as much profit and much more satisfaction in selling the "Quick Loader" than any other gun made.

If you buy in lots of 25 gross or more we will place your name on the top plate in place of ours, and in addition will furnish you with a reasonable quantity of attractive powder gun circulars, with your imprint.

Advise us the probable quantity of guns you will wish this coming season and we will make you an attractive price and help you to sell them.

American Can Company

New York Chicago San Francisco

Here's the Point:

You proclaim yourself a discriminating buyer—establish your business upon the highest level of professional confidence—by dispensing **'Roche' chemicals** and **alkaloids.** Why? Because physicians have learned, through their acquaintance with Digalen, Thiocol, and other widely used 'Roche' products, **to put their trust in anything bearing the 'Roche' symbol.** The other day one of New York's leading ophthalmologists said to us—**"Your Homatropine is the best I have ever used."** The fact is, we specialize in the production of **chemicals, alkaloids, and specialties of rare quality.**

Specify 'ROCHE' when ordering the following:

Aconitine	**Atropine**	**Eserine**	**Hyoscine**
Arecoline	**Colchicine**	**Homatropine**	**Pilocarpine**

(in vials of 1, 2, 5, 10, and 15 grains, and upward.)

Benzo-Naphthol	**Hexamethylenetetramine**
Benzoic Acid	**Iodides**
Bismuth Salts	**Kresapol**
Bromides	**Morphine**
Brucine	**Phenolphthalein**
Caffeine	**Salicylic Acid**
Carbolic Acid, U. S. P.	**Salol**
Cocaine	**Saponin**
Codeine	**Sodium Benzoate**
Creosote (Beechwood)	**Sparteine**
Cumarin	**Strychnine**
Guaiacol (Carbonate)	**Theobromine**
Guaiacol (Liquid)	**Veratrine**

BAYER PRODUCTS IN TABLETS

OF OUR OWN MANUFACTURE

In addition to tablets of Iodothyrine, Isopral and Piperazine, we are now prepared to furnish the following Bayer Preparations in tablet form:

THYRESOL
5 gr. tablets, cartons of 30

ALYPIN
1-3 gr., 3-4 gr., 1 1-8 gr. and 3 1-3 gr. tablets, tubes of 10

DIASPIRIN
5 gr. tablets, bottles of 25 and 100

HEDONAL
8 gr. tablets, tubes of 10

SAJODIN
8 gr. tablets, tubes of 20

SABROMIN
8 gr. tablets, tubes of 20

CITARIN
15 gr. tablets, tubes of 20

AGURIN
5 gr. tablets, bottles of 25 and 100

HELMITOL
5 gr. tablets, bottles of 25 and 100

NOVASPIRIN
5 gr. tablets, bottles of 25 and 100

VERONAL AND VERONAL-SODIUM
5 gr. tablets, tubes of 10 and bottles of 100

These tablets are most carefully prepared. They can be easily crushed and will disintegrate quickly on the tongue or in water. You will have call for them. Order a supply from your jobber.

$5.50 PROFIT
on a
$6.00 ORDER

Would you spend 50c. to make $5.50 and at the same time insure the future regular patronage of twenty-five people? You can do it if you co-operate with us in the sale of

KRANK'S
PINK BLUSH
MASSAGE CREAM

A quality article, a toilet necessity so near perfection that in the short time it has been on the market the sales are wonderful.

Thousands of Dollars for Advertising

To tell the people of its merits and direct them to the druggists.

To make our plan a complete success, we wish your co-operation in selling an article of merit, under the *protected price selling plan*, which pays you a profit of 50 per cent. You have the same opportunity as your competitor, you buy and sell at just as low a price as he can

If you are interested in our proposition send for our booklet which explains all about our advertising campaign. How Pink Blush is marketed, and how to make $5.50 profit on a $6.00 order. Write us today.

Get Our Exclusive Newspaper Advertising QUICK

It Never Fails To Pay

ROOT JUICE can be bought, from any jobber, at $8.00 per doz., but we will do exclusive advertising, over the name of one druggist in every town, which has a weekly newspaper, if the druggist will deal with us, direct, thus enabling us to keep tab on results of the advertising. We will also allow deduction of freight, and liberal discounts, on quantity lots. Write us. Scores of druggists throughout the country are having a wonderful sale on Root Juice.

W. P. CABLER ROOT JUICE MEDICINE CO.

FORT WAYNE -:- INDIANA

THIS MEANS YOU!

INCREASE YOUR INCOME WITHOUT INVESTING A DOLLAR

We have no goods to sell you or to send you on consignment.

Our proposition is square and strictly within your line.

Druggists who have availed themselves of our plan are enthusiastic about it and are deriving a good income without the expenditure of a single dollar.

Limited space precludes full details. Fill out coupon and mail it to us today and we will fully explain.

THE PANTER REMEDY CO.

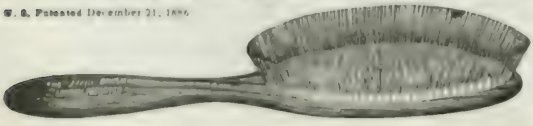
Pepto-Mangan (Gude)
(Reg. U.S. Pat. Off.)
is *the one and only* absolutely uniform and unalterable solution of iron and manganese in the form of true organic peptonates. It is also *the one and only* preparation lawfully entitled to be known as "Pepto-Mangan," a valid trademark, which is our exclusive property. We respectfully request the trade to take due notice of these facts.
M. J. Breitenbach Co., New York, U. S. A.

AIR CUSHION.
The Ideal Hair Brush.
U. S. Patented December 21, 1886



SIBERIAN BRISTLES.
Nothing Like it on the Market.
Do not confound this brush with the rubber back wire brushes. It is entirely different. The "Ideal" has an Air-Cushioned Back and Genuine Siberian Bristles. It is the best selling brush on the market. Order through your jobber, wholesale drug or dry goods.
HENRY L. HUGHES, Exclusive Licensee and Importer
Room 439, 78 Monroe St., American Express Bldg., CHICAGO, ILL.

NEW AND ATTRACTIVE

Advertising signs and novelties will be cheerfully supplied on receipt of a line from you, with your card or label, that we may be certain to get your name and address correct. If you write to us we will send you customers, not only for our remedy, but for all you sell. Your customers will be pleased, your business will be enlarged and your profits thereby increased to our mutual advantage as a result of our outlay and enterprise and your co-operation.

PLEASE REMEMBER *the VERY LIBERAL DISCOUNT OF* **EIGHT PER CENT**

which all wholesale druggists allow on our remedy on one gross lots or over from the list price of $48.00 per gross, and of five per cent on half gross lots and over, and send in your orders direct to your wholesaler, but write to us for the advertising matter. It pays to sell SYRUP OF FIGS AND ELIXIR OF SENNA, and we wish to increase your sales. Thanking you most cordially, we are, yours very truly,

CALIFORNIA FIG SYRUP CO.

Louisville, Ky. SAN FRANCISCO, CAL. New York, N. Y.

COCOA POWDERS

You have not exhausted the possibilities in Cocoa Powder buying, without at least seeing what we can do for you.

We make nearly one hundred varieties, and certainly some one of them should suit your requirements. Our Cocoa plant is one of the finest in the world and we keep abreast with all improvements.

Our machinery enables us to furnish not only a Cocoa more completely freed from the oil than others but also **ANY** degree of dryness desired.

We can give you the Dutch processed Cocoa of highest grade and fully equal to the finest imported, and we can give under the same process, Cocoa that is slightly processed or heavily processed. We can give the same **QUALITY** of Cocoa not Dutch processed.

We can give you a Cocoa Powder that could only be sold at a small profit at $1.00 per lb., and from that absolutely pure Cocoa down to a price that would **SURPRISE YOU.**

If you are a large user we can and will make a blend solely for your purpose. We make only absolutely pure Cocoa powders.

We pack in barrels, half barrels, 50 and 25 lb drums and 10, 5 and 1 lb. tins.

PLEASE REMEMBER other manufacturers **MAY** be able to please you, **BUT** you should see what we can do before you place your contracts or orders.

PLEASE REMEMBER other manufacturers **MAY** be able to satisfy you, but **WE CAN** and our capacity assures you of prompt deliveries.

YOU SIMPLY DON'T KNOW UNTIL YOU TRY

Re Price Protection on SANATOGEN

We wish to reiterate with all emphasis that as the sole licensees of the United States Patent under which Sanatogen is manufactured and sold, we are invested by law with the privilege to insist that retailers strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating this condition renders himself liable to injunction and damages.

Gentlemen of the drug trade, this is no mere "say-so," but a true statement of fact. We do not wish to intimidate anyone, but merely to give proper notice that we mean to enforce our rights wherever necessary.

This means *true protection*, the kind of protection that gives everybody a square deal and puts the small druggist on an even level with the biggest "chain corporation" or department store.

Three sizes, sold by all wholesalers and jobbers, at $9, $17.25 and $33; to retail at $1, $1.90 and $3.60, and *no less*.

Write to us today for effective display matter.

ness and a lower loss, but it was not until 1905 that the profits began to appear. Since then the growth in trade and profits has been marvelous, the total business last year reaching $2,115,842 and the profits being $365,000, additional to large expenditures for permanent improvements. For this year the total business is conservatively estimated at $3,500,000 and the profits at $550,000.

Under such successful methods can there be any wonder that so many of the satisfied stockholders place their complete confidence in the man who has fought for the last eight years, or more, to bring about these phenomenal results?

THE SALE OF PROPRIETARIES.

Pharmacists generally will agree regarding the wisdom of restricting the sale of proprietary remedies to drug stores, which was advocated in resolutions passed by the International Congress of Pharmacy at Brussels, as reported elsewhere by our special correspondent. The subject is a good one for agitation, but unfortunately under present business conditions in this and other countries it is difficult to see how this very desirable object can be accomplished, except through the thorough co-operation of the proprietors and the enactment of restrictive legislation which would be difficult of attainment.

It would be exceedingly hard to get all of the proprietors to agree to confine their sales to druggists and even with their favorable co-operation the non-professional sellers of these remedies (department stores, etc. would have to be reckoned with and no doubt would put up a stiff fight against being forced to relinquish this branch of their business. Nevertheless, the topic is one which pharmacists should take up and discuss with a view to possible action. This line of trade unquestionably and rightly belongs to the retail druggists and they ought to have it.

NEW YORK HEALTH BOARD'S ACTIVITY.

Pending a conference with Health Commissioner Lederle, the druggists of this city are greatly concerned over changes in the Sanitary Code, affecting the sale of preparations containing morphine, cocaine, etc. The changes are arbitrary and were made without giving the druggists of the city an opportunity to be heard, although as noted on page 997, a post-facto conference will be held. Two contentions made by the druggists are obviously meritorious: that the more common N.F. and U.S.P. preparations used as household remedies should not be affected and that if a law of this nature is to go on the statute books it ought to be enacted by the Legislature for the entire State, without singling out the druggists of New York City.

The action of the Kings County Ph.S. and other societies in undertaking to defend their members who may be accused of violations is perfectly natural. It is doubtful if the code could be enforced in its present form, so far as it relates to the matters under discussion.

Rumors of activity of the so-called "Doctors' Trust" in this connection probably are not well founded, but the unusual activity of the city health authorities in harassing druggists, without previous notice or consultation, must inevitably open the doors to suspicion. Would similar radical laws affecting doctors have been put in force without due notice to them? In fact, would such changes have been put into effect at all?

NO CORPORATION STORES IN QUEBEC.

One of the most interesting of recent court decisions is that of a high court in the Province of Quebec which establishes the principle that corporations cannot own and operate drug stores. The Quebec Ph.A. sued the Modern Drug Store, Ltd., for $10,000 in penalties for conducting two drug stores unlawfully. The defendant had a Dominion charter empowering it to sell drugs and each store was provided with a registered pharmacist, which, it argued, was sufficient compliance with the law.

Mr. Justice Carroll, in his opinion, declares that a drug store in the province can only be operated by a natural person, who must previously qualify as a licensed physician or druggist. Obviously a corporation could not pass the necessary examinations, nor could it comply with the Pharmacy Act. The presence of the licensed pharmacists in the two stores, he held, did not by any means offset the fact that the ownership was held by a corporation. The chartered permission to sell drugs was set aside on the ground that it was well within the police power of the province to limit the character of the ownership of stores for the sale of poisons. In view of the decision the Quebec Ph.A. will proceed to eliminate the corporation owned pharmacies in the province.

PRIZE COMPETITIONS NOT LOTTERIES.

Druggists who have been unable to secure the publication in newspapers of advertisements containing offers of prizes to their patrons, on account of a ruling of the Postoffice Department barring such publications from the mails under the Anti-Lottery Law, will be interested in a test case which has just been tried in Brooklyn, N. Y. The *Eagle* took up the cudgels in a case where the postmaster excluded copies of that newspaper from the mails because it contained the advertisement of Francis H. Leggett & Co. offering a prize to the writer of the best essay on the merits of a breakfast food, which, the postmaster held, was a lottery because the contestants were required to send three wrappers from food packages with their literary effort, in addition to which it was contended that the offer was "vague."

Mr. Justice Chatfield, in deciding in favor of the *Eagle*, made the following comments:

> "The wording of any advertisement, or the precise application of this decision, cannot be determined in anticipation of every possible change which may be made in the language of the advertisement itself. The defendant will not be precluded from showing at a trial that the scheme or plan as worked out, or as advertised through the mails, is really a lottery; but on this record and good faith admitted and a bona fide contest being planned for a competition in essay writing, the mere fact that it is an advertising scheme does not make the plan a lottery."

Whether the Postoffice Department will modify this rule to agree with the decision of the Federal

Court is not known, but that would seem to be the proper thing to do. The intention of the legislators who enacted the Anti-Lottery Law was unquestionably to prevent the use of the mails by concerns like the Louisiana and the Havana lottery companies and not to bar out reports of competitions in which the merits of foods or other articles might be the subjects of prize essays. Following Mr. Justice Chatfield's decision as to the scope of the law no doubt the postal authorities will take a more liberal view of the situation.

A VICTORY AGAINST SUBSTITUTION.

One of the most persistent and consistent opponents of substitution has won a signal victory against the evil in a way which shows the utility of aggressive combat and the value of organization in the drug trade. As told in the September issue of *The Soda Fountain*, page 792, several Philadelphia druggists were being prosecuted, or about to be proceeded against, for selling something else when Hires rootbeer was called for, the manufacturer believing that the purchasers should in all fairness get what they ask and pay for.

In this emergency the Philadelphia Association of Retail Druggists appointed a committee to confer with the manufacturer and as a result the latter withdrew the old charges, with the understanding that if the offenses were repeated the offenders would be prosecuted. In this way, by mutual agreement, the atmosphere has been cleared. It would be a good thing if all local associations would take up the substitution evil and discuss it in a way that would place its unfairness and undesirability prominently before their members. Such a course would be good for everybody, retail druggists, manufacturers and the public.

INTERNATIONAL ACTIVITIES.

Theoretically the proposition to establish an International Pharmaceutical Association, which was favorably acted upon by the International Congress of Pharmacy at its recent Brussels convention, is attractive in many ways, but the difficulties to be overcome in effecting a useful and representative organization are so great that the project comes close to inclusion in impracticable class, where, no doubt, the sponsors of previous futile attempts to establish a similar society will feel inclined to place it.

The question naturally arises: Cannot the International Congress of Pharmacy, which has just held its tenth session and is apparently in good working order, serve every purpose which would come under the scope of the proposed new association? It may be that the projectors have in mind a merger of the two societies, in which case it would be merely a matter of name, but if the intention is to have two separate organizations there is danger that the workers in the field of international pharmacy may divide their time and efforts, thereby weakening their influence and diminishing their achievements, for it must be taken into consideration that the number of pharmacists who have the inclination, the time and the financial resources to engage in international activities is extremely limited and very few of them would find it possible to devote their attention to more than one body of this description.

PRICE LIST CHANGES—IMPORTANT NOTICE.

On pages 1008 and 1010 of this issue will be found a list of changes, additions and corrections for the benefit of users of the Era Price List for 1910. Most of the items are in shape so that they can be cut out and easily transferred to the proper places in the Price List, being arranged alphabetically and page numbers given of either part 1, or part 2, as the case may be, or the lists may be used as supplements to these parts of the Price List. Every user of this valuable reference volume should at once make the necessary alterations and thereby bring the entire contents right up to the minute.

Pennsylvania Ph.A.'s Proceedings for 1910 is a model one in many ways and reflects credit upon the efficient secretary, Edgar F. Heffner, who has issued this book of 420 pages in excellent style and with commendable promptness. It is the largest and most complete proceedings of any State association, so far as we can recall, and in it are given in full a draft of the proposed pharmacy law and 38 original papers, some of which are of considerable value and all worth reading, in addition to the usual information of interest.

In reorganizing the new Board of Pharmacy in New York State the members administered a severe rebuke to some Brooklyn druggists who made a remarkable protest against the appointment of Dr. Diekman by promptly electing him president. The objection to Dr. Diekman seems to have been chiefly that he was a prominent member of the old board and participated in its activities in enforcing the laws relating to the practice of pharmacy. An account of the new board's first session appears on page 1001.

Attention has been called lately to the danger of using similar names for both harmless and harmful preparations, two deaths having followed the dispensing of Lysol in place of Laxol. In one case careless writing by the physician was the cause, the other being in doubt. Had the druggists taken the precaution to assure themselves that they fully understood the character of the prescriptions two lives would have been saved and much trouble avoided.

Death of J. F. W. Meyer, reported on page 999, brings to an end a long and useful life, which, in the success achieved, may well form a bright example for the young men of today. The same perseverance, attention to business and honesty of purpose can win as well in the future as it has done in the past, perhaps not always so conspicuously as in the case of Mr. Meyer, but inevitably with satisfactory results to those who practice these principles.

N.A.R.D.'s stand that druggists should only sell liquor medicinally and that the Internal Revenue characterization of a druggist so selling should no longer be "retail liquor dealer" is the proper and logical one. There should be no objection at Washington to the change of designation.

So there came near being a Liggett-Riker-Hegeman consolidation! President Liggett tells the story of negotiations on page 996 of this issue of the Era. His address to his stockholders throws a new and interesting side light on the tendency towards big combinations in retail drugdom.

Secretary Taylor's report that Indiana and Missouri have adopted the Pharmaceutical Syllabus is welcome news to advocates of better preparation and higher education for the practitioners of professional pharmacy.

That price cutting is unethical is the recorded verdict of the International Congress of Pharmacy, whose members report that the evil is existent in other countries as well as in the United States.

CORRESPONDENCE

Missouri, Indiana and The Pharmaceutical Syllabus.

Editor The Pharmaceutical Era:

Your attention is called to the action of the Indiana Board of Pharmacy with a view to its publication in the interests of pharmaceutical education. The influence of the Pharmaceutical Syllabus is apparent and its bringing of the schools and boards together is not one of the least of its purposes.

The criticism that the amount of work should require more than 1000 hours is one that is uniformly made by those that give close consideration to the subject, but the fact should be recalled that the campaign for even 1000 hours was long and arduous and that many have not fully recovered from the effects of this standard.

"The Indiana Board of Pharmacy at its July meeting called a conference of all the schools of pharmacy in the State, each of which sent a representative. After a lengthy discussion the schools with the Board of Pharmacy adopted the syllabus as the standard. The criticism of all was that the standard was rather low and that the amount of work should require more than 1000 hours."

It may be noted, in this connection, that the Regents, on the recommendation of the New York State Board of Pharmacy, have advanced the requirements in New York State to 1100 hours, 500 recitation and 600 laboratory.

The Missouri State Board of Pharmacy also has adopted the Pharmaceutical Syllabus, used it for the past three examinations, reporting that the members are pleased with it and will continue to use it in the preparation of the question papers of the future examinations.

H. L. TAYLOR,
Albany, N. Y. Sec. National Executive Committee.

The Price of Santonin.

Editor The Pharmaceutical Era:

In your August issue, you quote Santonin at 11 @ 11.50 lb. My jobber in Council Bluffs charges me $13.50, and when I object he writes me as follows:

"Replying to your favor Aug. 6th, we have to advise you that our price on Santonin at $13.50 as invoiced is correct and you will doubtless find that this is the price which both our competitors in the local field are billing this item at. It is true as you state that THE PHARMACEUTICAL ERA, August, quotes the item for $11.00 @ $11.50, but you will understand that this is a New York quotation and that our prices are regulated by the New York markets according to the weekly records which we receive from our brokers and agents there. As an instance showing the reliability of this price list we find that Merck's Report of Aug., 1910, quotes Santonin in pound lots at $14.00 per lb. container extra f.o.b. New York. When it is understood that Merck & Co. are the largest importers of this item in the United States and that their official price list quotes this item at $2.50 to $3.00 per lb. above the ERA's quoted list, it is safe to say which is the authority in the matter."

What good are your quotations to us? Very truly yours,
Arcadia, Iowa, Aug. 13, 1910. MOHR & MAHER.

Messrs. Mohr & Maher, Arcadia, Iowa.

GENTLEMEN:—Replying to your recent favor, relating to the quotations on Santonin, we beg to submit the following:

First, please note at the head of our prices current, the following standing notice, which explicitly declares that these are the *average* prices charged to retail druggists in the New York market:

[illegible]

authorities in the New York market. Note the following:

New York *Commercial*: (July 25 to August 15, wholesale, quantities,)

crystals .....$10.25 @ $11.00
powdered .....$10.45 @ $11.20

New York *Journal of Commerce*: (practically same period,)

crystals .....$10.00 @ $11.00
powdered .....$10.20 @ $11.20

Druggists' Circular, August: $11 per pound.
Practical Druggist, August: $12 per pound.
American Druggist, August: $12 @ $12.25 per pound.
Oil, Paint and Drug Reporter: (first two weeks, August, wholesale,)

crystals, bulk .....$10.00 @ $10.75
powdered .....$10.20 @ $10.95

This range covers the New York market pretty well and our average for the quantities ordinarily bought by the average retailer appears to be justified.

In the Chicago market, which is closer to you, *N.A.R.D. Notes* for early August quotes Santonin at $10.50 a pound.

Now as to actual selling prices in the New York market: Among others the following firms, quote these prices on Santonin:

	crystals	powdered
Schieffelin & Co.	$11.30	$11.60
Lehn & Fink	11.00	11.20
McKesson & Robbins	11.25	11.45

Without going into the subject further, we trust that you will agree with us that our quotations fairly represent what you would have paid in the New York market for the goods in question.

Prices vary for all commodities, as you know, for various reasons, but we aim to give the general prevailing prices, which we have done in this case.

We beg to thank you for calling our attention to this matter and for giving us the opportunity to show you that our Prices Current agree with conditions as mentioned in the "Note to Subscribers." Yours very truly,
New York, Aug. 15, 1910. D. O. HAYNES & Co.

[Since the above was written the price of Santonin has advanced and as will be noticed by consulting the ERA.S Prices Current, beginning on page 1016 of this issue, it is now quoted in the New York market at $12.00@$12.50 per opund. This advance was reported in the regular market report in the September ERA.—ED.]

Bebees or California Bees.

Editor The Pharmaceutical Era:

Some time ago you published an article on Bebeés or California Bees. At that time no known source of supply was available. Since that time we have found a number of sources and I wish you would advise your readers that the Bees can be procured of Mrs. Truman Davis, 50 Atkinson St., Dover, N. H. L. F. KEBLER,
Washington, Aug. 9. *Chief Division of Drugs.*

Out of Hospital and Out of Work.

Editor The Pharmaceutical Era:

Brother Pharmacist: Today Brother E. Hartung, Ph.G., and R.P., aged 50, with 30 years' experience as drug-clerk and 6 years' experience as traveling salesman, left the hospital, his broken arm cured. He lost everything July 4 at midnight, by fire. He is out of work now and desires position as salesman. Address:
2035 Fifth ave., Pittsburg, Pa E. HARTUNG.

Soda Fountain Full of Good Things.

D. O. Haynes & Co., New York City:

Please find enclosed money order for $1 to renew my subscription to *The Soda Fountain*. I find your magazine full of good things every issue. Yours respectfully,
Stafford, Kansas. W. N. MAHER.

Price Cutting.

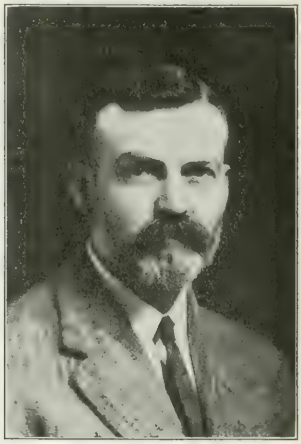
The price-cutter on advertised goods always reminds me of the man cleaning out a well who, becoming impatient at delay, called up the shaft, "If yes don't haul me up I'll cut th' rope."
—*American Grocer*

Pittsburg Convention of N.A.R.D. Proves to be Big Success.

Harmony Prevails. Attendance Large. Price Protection, Propaganda and Legislation for Retail Druggists Chief Issues—Many Important Topics Acted On.

H. B. GUILFORD, Rochester, N. Y.
elected president of the N.A.R.D.

CHAS H. HUHN, Minneapolis,
retiring president, executive committee.



CHARLES F. MANN, Detroit,
re elected chairman exc. com. N.A.R.D.

PITTSBURG, with its many mills and its numerous manufacturing plants, its countless wheels and numberless pulleys and ovens, its tall chimneys belching black smoke and its beautiful environs following in panoramic picturesqueness the Monongehela, Allegheny and Ohio rivers—this was the strategic point at which was held the 12th annual convention of the N.A.R.D. Throughout this notable gathering of the retail drug clans, harmony, goodfellowship and a spirit of fairness was noticeably present. With such a feeling predominating the meeting there was apparent an absence of factions or friction and general satisfaction was evinced over the new roster of officers—a condition which augers well for the coming year both officially and in point of co-operation throughout the various sections of the country. The officers elected are:

President, H. B. Guilford, Rochester, N. Y.; first vice-president, P. C. Gladding, Hartford; second vice-president, Peter G. Walter, Pittsburg; third vice-president, E. A. Bernius, St. Louis; treasurer, Harvey I. Leith, Providence, R. I.; secretary, Thos. H. Potts, Chicago; executive committee, Charles F. Mann, (chairman), Detroit; Chas. H. Huhn, Minneapolis; Henry W. Merritt, Plains, Pa.; H. C. Shuptrine, Savannah; A. E. Zuber, Chicago; E. H. Thiesing, Cincinnati.

In selecting the new officers the nominating committee considered for president the retiring first vice-president, Mr. Guilford and Thos. S. Armstrong, of Plainfield, president of the New Jersey State Ph.A. The vote was very close, Mr. Guilford winning. Theo. F. Hagenow, of St. Louis, nominated for the executive committee, was replaced by Mr. Thiesing, as St. Louis had been given a vice-presidency. At the installation on the last day President-elect Guilford and other officers made stirring addresses and Mr. Armstrong spoke eloquently in presenting the new president to the convention.

The second week of September, which was devoted to the convention, was fully occupied with business and with the enjoyment of the bounteous hospitality of Pittsburg's citizens. The large attendance and the excellent entertainment gave justification to the selection of the city for the meeting. The total registration was about 1200. There were 91 associations represented and the delegate vote was reported as 231.

The formal opening of the convention took place in the English Room of the Fort Pitt Hotel at 8:30 p.m. with President Huhn in the chair. The Rev. Clayton F. Smucker offered a suitable invocation of divine aid. Dr. E. R. Walters, director of the Department of Health, Pittsburg, tendered heartiest greetings. Peter G. Walter, president of the Western Pennsylvania R.D.A., extended the welcome of local and State druggists to the "Smoky City." He called attention to the fact that during the year of strife and accusation on many sides, the W.P.R.D.A. with its 375 members, had stood faithful and true to the National organization.

Mrs. Lester I. Lorah extended greetings from the Women's Auxiliary of the W.P.R.D.A., and welcomed the wives, daughters and mothers of the N.A.R.D. W. S. Elkin of Atlanta, responded in his usual happy manner.

Mrs. Nellie Florence Lee, president of the W.O.N.A.R.D., made an address, which, while in a humorous vein, contained a deal of historical fact. She aptly compared the N.A.R.D.'s beginning to the birth of a child and each convention as a birthday.

Fraternal greetings were brought from the A.Ph.A. by Prof. Julius F. Koch, of Pittsburg, who said he trusted the time would come when the N.A.R.D. and the A.Ph.A. would show greater community of action.

The credential committee was announced as consisting of Thos. S. Armstrong (chairman), N. J.; P. F. Moriarity, Mass.; M. B. Craig, Florida; B. A. C. Hoelzer, Ill.; Theo. F. Hagenow, Miss. The assistant secretaries were: W. E. Bingham, Alabama, and Walter Rothwell, Penn.

With Vice-President Guilford in the chair, President Huhn read his address in which he traced the history and growth of the N.A.R.D. leading up to its present efficiency. He justified his dual positions in the N.A.R.D. and A.D.S. and spoke of necessity of intelligent support of good legislation and of united opposition to harmful statutes. He urged an expansion of the work of the legal department in the way of expert legal protection to the members. He went on record against the sale of liquor in drug stores except for medicinal purposes. The mail-order house was considered in its destructive relation to the business of the retail druggist and the unfair and far-reaching competition deplored.

President Huhn ventured the opinion that "the chain-store disease would annihilate neither jobber nor manufacturer, but that the tendency would be to reduce the number and handicap business progress for the remaining to an extent hitherto unknown." He recommended that in order to avoid confusion that the name "Wood Naphtha" be used instead of "Wood Alcohol." He commended the work of each of the various departments. He regretted what he calls the "ill

[illegible] of the L. S. T. Revision Committee toward N. A. R. D. [illegible] to believe that in the end the aggressive of the position would work ultimate good rather than harm to the [illegible]

President Huhn discussed a variety of subjects and made [illegible] recommendations, most of which were later acted upon favorably. His address was broad, clean-cut and vigorous. It had a "lift"ing effect.

The chairman of the executive committee, Charles F. Mann, gave a resumé of the year's work. He said:

[illegible] the Association has grown extended on important trouble issues and policies of the past has shown us the truer light and more than ever the conviction that our success lies in the independent stand for principles and for higher ideals, professionally and commercially. This policy must be the bracing of our sound constitutional rights rather than begging for their indulgence.

Unjust and Unwarranted Accusations.

The past year has been one of considerable turbulence. Censorship and accusations have run rampant. The N. A. R. D. has been accused of a [illegible] with a commercial co-operative organization. Unjust charges have been indulged in that have [illegible] the ranks of [illegible] in the medical and pharmaceutical professions. It is charged that the N. A. R. D. has been most frankly discriminated against. Almost from the beginning of this Association there have been those who have aimed to bring discredit on the N. A. R. D. through charges of undue influence of the others. We have been charged in the past with being influenced by the proprietary manufacturers and the jobbers and now by the A. D. S.

To the credit and glory of the N. A. R. D., we assert most emphatically that none of these charges have ever been substantiated, nor have they been founded upon facts. They have emanated mostly from evil or misguided minds, but let us be charitable and credit some with attempting an analysis that finally left them with an unknown quantity whose easiest elimination led to conviction of the N. A. R. D.

The importance of the Propaganda work was emphasized and the executive committee had been impressed with the progress of the work and strongly recommended its continuance. Mr. Mann spoke of price protection and the danger of not [illegible] it. He said:

Price protection is still a very live issue, and the manufacturer and selling agent who makes no effort to insure the retailer a reasonable profit finds it harder each year to successfully market his products. Were it possible to attain authentic statistics on this question, we believe the revelations would be astounding. The N. A. R. D. has educated the retailer to be as passive as possible in stocking and furthering the sale of commodities that offer little or no profit and careful observation, especially in the larger centers, reveal the fact that the **sales of non-price protected articles are decreasing.**

Should Help Those Who Help the Retailers.

The bitterness with which co-operative organizations are attacked is good evidence of the inroads being made on non-price protected proprietaries. It is not only the duty but the salvation of the retailer to lend his support to those who help make his business remunerative.

It is the N. A. R. D. doctrine to be as passive as possible in lending support to the manufacturer who does not make a legitimate effort to insure the retailer a profit. Likewise it is N. A. R. D. doctrine to avoid the manufacturer who sells direct to the physician and mail order houses.

The retailer has but one weapon to protect the profits of his business and that is discrimination. The N. A. R. D. loses no opportunity to show the way and it is for the individual to embrace it.

Secretary Potts gave a detailed account of the associations which at present constitute the membership 1630 in all a net gain of 16. The sales department, advertising stores for sale, association pins and buttons, organization, publicity, prosecution and legal departments all had been conducted with the sole idea in view of giving the best service possible.

Treasurer John W. Coleman's report showed receipts and disbursements of $66,080.66 during the past year. A balance of $7,177.23 had been left over and to this was added new receipts of $88,823.43—of which $41,459.33 was taken in for advertising in *Notes*. After disbursing the expenses a balance remained of $10,507.55. The total number of members in good standing, at the time the treasurer's report was prepared, was 14,292.

Chas. M. Carr gave an account of the publicity department. The advertising had been carefully selected and the receipts therefrom were satisfactory. F. C. Ulrich, the general organizer, gave an interesting account of the work of his Department. In addition to himself, seven organizers were employed and the amount expended was $21,517.59, of which $7,316.40 went for traveling expenses. The force is to be increased to [illegible]

James W. Evans reviewed the work of the legal department. Many [illegible] and [illegible] decisions [illegible] mailed to members and assistance given in relation to proposed legislation. The judge's report showed a year of activity.

W. S. Richardson, of Washington, D. C., whose work was highly praised by President Huhn, gave an account of the tireless and painstaking effort necessary in the legislative department. So vitally does this work affect the druggist everywhere, he said, and so very necessary is it as a means of protection against unfair and thoughtless legislation, as well as to aid the passage of commendable measures, that every person interested in the drug business should keep in close touch with all proposed measures to lend aid wherever possible. Mr. Richardson gave a list of the measures affecting druggists which have recently been pending in Congress.

H. C. Shuptrine, of Savannah, reported on pharmacy laws and his recommendations were referred to the committee on resolutions for consideration.

Fighting Against the Free Lunch 'Phones.

Wilhelm Bodemann of Chicago reported on telephones, pointing out that in this connection "Vigilance is the price of liberty and perseverance is the price of success." He spoke of the difficulty of making people in widely separated localities think alike. It had taken time to accomplish results but they were well worth the effort. The very people in Chicago who had opposed the new idea were now its warmest supporters, thus proving its practicability. He told of the discouragements frequently met by reformers and declared that it was the intention of this committee "to fight for the emancipation from the Free Lunch telephone to the last ditch."

Dr. Wm. Muir, of Brooklyn, made an appeal for funds for the Procter Memorial and reported receipts to the amount of $69.50.

Secretary Potts reported on an effort made to ascertain the feeling concerning casualty insurance. Out of 804 letters sent out, 45 per cent replied; 163 said they could be interested in such a proposition, 99 had answered in the negative and 100 were doubtful.

Invitations were received for next year's Convention to be held in Washington, D. C., Milwaukee, Cedar Point, Ohio, and Rochester, N. Y.

A "Pure Food" banquet, attended by about 400 of the druggists, was an interesting feature. The menu was excellent and the best of good humor prevailed. Around the speakers' table were gathered all the officers, both past and present, and some who are in a receptive mood. Each was given an opportunity to make a speech and most of them took advantage of the opportunity.

Toastmaster B. E. Pritchard introduced Assistant City Solicitor H. M. Irons as the first speaker. He responded briefly in a happy and witty vein. Interesting talks were made by Charles H. Huhn, the retiring president, and H. B. Guilford, the president-elect. The Rev. Clayton Smucker, very capably responded to the toast, "Our Times and Troubles."

It was a "dry" banquet, but the dryness did not deter the diners from joining in "The Stein Song," led by one of their number, with glasses filled with clear, crystal water.

Fine Display Made by Exhibitors.

Exhibits made in connection with the N. A. R. D. convention at Pittsburg were particularly fine. Lack of space prevents extended mention but among the many deserving special attention were Morgan Drug Co., Purity Drug Co., Horlick's Malted Milk Co. (W. A. Greene), Welch Grape Juice Co. (A. L. Wolcott), New-Skin Co. (Wm. Luke), Miles Medical Co., W. B. McLean Mfg. Co., Major Mfg. Co., American Druggists' Syndicate, J. Hungerford Smith Co., Borden's Malted Milk Co., Geo. A. Kelly Co., Bromo-Lithia Chemical Co., E. R. Squibb & Sons, Pennsylvania Chocolate Co., De Villbiss Mfg. Co., Torsion Balance Co., A. J. Krank Laboratories, Colgan's Gum Co., L. B. Worcel Co., Liquid Carbonic Co. Other exhibits were satisfactory and the display was probably better than any of its predecessors.

The Pittsburg entertainment committees certainly did themselves proud. B. E. Pritchard was in charge. Edward Kretz was chairman of general arrangements. L. B. Hughes and Mr. Schweitzer had charge of the entertainment of the men's contingent and Clarence M. Dorsey and Louis Emanuel of registration. Mrs. L. H. Buttner was chairman of general arrangements for the women. Entertainment: Mrs. L. B. Hughes, Mrs. J. J. Keil; reception, Mrs. Louis Emanuel and Mrs. W. H. Altman.

HENRY W. MERRITT, Plains, Pa.
member executive committee, N.A.R.D

P. C. GLADDING, Hartford, Ct.,
first vice-president N.A.R.D.

H. C. SHUPTRINE, Savannah, Ga.,
member executive committee, N.A.R.D.

Louisville Action on Buying Clubs Reaffirmed—Resolutions on Many Subjects.

AN interesting feature of the N.A.R.D. convention was an opening session of the resolutions committee, at which the chairman, Dr. Wm. Anderson, of Brooklyn, presided. Many prominent members took part in the discussions and the sentiment expressed served as a guide for the committee in the preparation of its conclusions.

The gist of the report of the committee on resolutions, which is given below, shows the concrete sentiment of the convention, which adopted it:

Resolved, that price protection, propaganda work and legislation continue to be the prominent issues of this association.

Whereas, price protection has always been one of the most important objects of this association;

Resolved, that we commend the action of proprietors and manufacturers who have honestly and effectively supported this principle.

We deprecate the fact that some proprietors and manufacturers disregard the interest of the retail drug trade by making direct sales to physicians and mail order houses.

Reaffirms Louisville Action On Buying Clubs.

A long preamble is devoted to relations with the N.W.D.A. and the P.A. of A. in reference to the tripartite plan, which "failed of its purpose for lack of proper support by the parties interested," as well as the direct contract plan, which also, did not receive expected support. The following action is thereupon taken:

Whereas, this failure upon the part of the organizations interested to properly co-operate made it necessary for the N.A.R.D. in self-protection for its members, to adopt at its Louisville Convention the following preamble and resolution, viz.:

"Whereas, the evident success of a number of co-operative buying clubs and manufacturing companies, owned and controlled by retail druggists, has made this subject of vital importance to all retail druggists, be it

"Resolved, that while the Association reaffirms its previous declaration that the N.A.R.D. as an organization should not enter this field of work or become directly connected with any organization engaged in the same, we approve of co-operative organizations of retail druggists, the object of which is to carry out one of the principles of this organization to improve the business conditions of the retail drug trade, and that we co-operate with such organizations as far as practicable"; and,

Whereas, the adoption of this resolution has during the current convention year of the N.A.R.D. been seized upon by its enemies and its bearing distorted out of all proportion to its real meaning in a malicious manner; and,

Whereas, all of these conditions have militated against the welfare of the N.A.R.D. and its membership, and have injured both in the estimation of misinformed physicians; and,

Whereas, the situation demands that the N.A.R.D. express more completely its attitude towards co-operative organizations of retail druggists; therefore, be it

Resolved, that believing it to be right and proper, and in conformity with the policies of this Association the N.A.R.D. reaffirms its declaration made at the Louisville convention on co-operating buying clubs and manufacturing companies.

Resolved, that in thus approving of business enterprises that are of such unquestionable value to pharmacists this association does not in any way endorse or encourage the manufacture and sale of harmful nostrums, fake preparations, remedies in general that contain habit-forming drugs or tend to increase harmful self medication.

Will Not Engage in Commercial Enterprises.

Whereas, it having become an established policy of the N.A.R.D. to refrain from engaging as an association in any commercial enterprise, it must not be regarded as impolitic for it to encourage to as great a degree as possible any and all co-operative movements prompted and conducted independently by its members, when it shall be shown that the advantages and opportunities of such co-operative movements are open to all N.A.R.D. members alike, and that any such co-operative movements shall prove to be founded on substantial business lines affording safe investment and conducting its affairs lawfully and legitimately, be it

Resolved, that while it may be the policy of the N.A.R.D. to lend helpful aid, it should ever be established that the N.A.R.D. shall in no sense be regarded as endorsing or guaranteeing the reputability or standing of any commercial enterprise whatsoever; and, be it further—

Resolved, that the executive board of the N.A.R.D. should at all times be empowered to, so far as is in its power and judicial functions lie, safeguard the interests of its members, by sounding a note of warning whenever it shall become satisfied upon investigation that its members are in danger of having their financial holdings imperiled, or their confidence misplaced through fraudulent claims or evidence of mismanagement of enterprises built or established through the co-operation of its members.

Liability Insurance Plan is Rejected.

As the N.A.R.D. has gone on record as absolutely opposed to entering any commercial field or affiliating with any commercial organization, therefore this association shall not attempt any form of liability insurance.

Resolved, that this association shall not approve, endorse or recommend any enterprise along the lines of liability insurance, whether the same be by co-operation among druggists or otherwise, unless it be by a regularly incorporated casualty company, possessing ample capitalization to place it upon a substantial basis, enabling the company to comply with legal requirements and provide for its safety and permanency.

Resolved, that as affiliated associations have secured considerable advantage by reduction in rates for liability insurance from existing companies, through local agreements, that we recommend to our affiliated associations that they endeavor to secure similar advantages for their membership in their respective communities and that this association lend all possible aid to that end where and whenever requested.

Would Enforce Medical and Pharmacy Laws.

Whereas, medicine and pharmacy are two distinct professions, requiring several years of preparation, in most instances a college course of from two to four years, and in all cases a State board examination before a practitioner is allowed to enter upon his important duties as a full fledged licentiate; and,

Whereas, the two professions have entered upon an era of reform in "getting back to first principles" in medicine and pharmacy and in establishing closer relations in the interests of the physician, pharmacist and patient, the basis of which is mutual concessions and good will; therefore, be it

Resolved, that the laws of our statute books which prohibit under penalties the diagnosing and prescribing for the sick

by pharmacists, hereby receive our fullest commendation and the reasonable and proper enforcement of them our unqualified support.

Resolved, that this Association is also opposed to the general compounding and dispensing of medicines by physicians and hereby calls upon physicians to reciprocate by preventing as far as practicable the compounding, dispensing, distribution and sale of medicines by physicians.

Resolved, that it is the sense of this convention that the State boards of health and pharmacy should co-operate in the enforcement of the medical practice act and pharmacy law to the extent that the rights and privileges of each profession are preserved and the interests of the public safeguarded.

Joins in War on Habit-Forming Drugs.

Whereas, recent publicity of the dangerous character of a class of proprietary remedies sold for administration to children have awakened a larger knowledge on the part of the public to the evils attending the indiscriminate sale of preparations containing habit-forming drugs; and,

Whereas, the effect of pure drug legislation requiring special labeling of preparations containing narcotic, habit-forming and heart-depressing drugs has been to warn the public against the former free use of preparations of these classes; and,

Whereas, the general adoption of State pharmacy laws now provides for higher qualifications and a fitness on the part of the registered pharmacist, and the establishment of this class of public servants into whose hands should be placed the sale of all drugs and medicines possessing possibilities of public harm; therefore, be it

Resolved, that this association recommends to its members that they discourage as far as possible, the sale and use of patent medicines that contain habit-forming drugs, particularly those which are intended for administration to infants.

Resolved, that the legal department of the N.A.R.D. be empowered to actively engage in co-operative measures with legislative committees of State pharmaceutical associations, advocating necessary amendments to the State pharmacy laws requiring the restricting of all sales of drugs, medicines and poisons, including proprietary remedies, to registered pharmacists exclusively.

Co-operate on Legislation With Physicians.

Resolved, that this association favors consultation and co-operation, with the medical profession looking to the formation of sane, honest and practical legislation.

We heartily favor National legislation that will prevent the indiscriminate sale, distribution and use of habit-forming drugs.

Legislative committee directed to secure change in Internal Revenue laws so retail druggists will not be classified as retail liquor dealers.

That we reaffirm our oft repeated declaration that we are opposed to the sale in retail drug stores of intoxicating liquors for other than medicinal purposes.

Whereas, pharmacists are unalterably opposed to the sale, distribution and use of habit-forming drugs to an extent that injury to many unsuspecting persons may result; and,

Whereas, pharmacists have aided in the enacting and have earnestly supported laws tending to prevent drug habituation; and,

Whereas, existing laws do not prevent the public from obtaining habit-forming drugs in such condition and quantity as to cause them to become drug slaves;

Resolved, that this association favors legislation that will safeguard the public by preventing any person, even a licensed physician, from dispensing, distributing, or selling habit-forming drugs, except under proper restrictions.

That the legislative committee seek an amendment to the Federal Pure Drugs Act requiring "wood alcohol" to be labeled as "wood naphtha."

Political Activity and Proposed Legislation.

We urge upon our members the necessity of taking an active interest in political affairs and of having representation in our legislative halls.

Uniformity of State drug laws favored; State boards of pharmacy should be empowered to enforce same and have power to control the character of all drugs sold or distributed to the public.

That the association use its efforts to have passed an interstate anti-narcotic law, the terms of which will prohibit all illegitimate traffic in narcotics and habit-forming drugs and confine their sales and uses to proper channels and strictly medicinal purposes.

That we favor an amendment to the Sherman Anti-Trust Law so that this act will not interfere with the small merchant who seeks protection and not destruction from large monopolies.

That the work for the bill raising the status and increasing the pay of pharmacists in the government's employ be continued.

That all parcels post bills continue to receive the vigorous opposition of the retail drug trades.

That the patent laws be amended in accordance with the well established principles of equity.

With many retail druggists having postoffice substations, [illegible] to secure satisfactory compensation in conformity with services rendered.

Regarding the proposed Federal department of public health, [illegible] life committee is instructed to carefully consider [illegible] legislation and offer amendments to the end that pharmacy may be properly recognized and represented in such department.

Action of U.S.P. Trustees is Disapproved.

Whereas the N.A.R.D. at the specialized time and at the proper place did make formal application to the U.S.P. board of trustees for admission of the N.A.R.D. delegates to the U.S.P. convention, held in Washington, D. C., and,

Whereas the N.A.R.D. feeling it was acting clearly within its prerogative in formally requesting the admission of its delegates, and,

Whereas, the U.S.P. board of trustees declined to recommend to the U.S.P. Convention, the admission of N.A.R.D. delegates; therefore, be it

Resolved, that the N.A.R.D. in annual convention assembled views with alarm the tremendous power exercised by this board of trustees under sanction of law; and be it further

Resolved, that this action of the U.S.P. board of trustees in refusing to recommend the admission of the N.A.R.D. delegates to the U.S.P. Convention meets with our severe disapprobation, and that we are forced to consider the act as a very unfriendly one, and an unwarranted reflection upon our National association.

Status of the Propaganda Movement.

Resolved, that it is the sense of this Convention that no injury to the propaganda movement can ever come from the acts of true position taken by this association, but that unwarranted, untrue and misleading attacks, one upon the other issuing from an humble individual or one high in official ranks, tends to wreck every effort for more cordial relations and concerted actions between physicians and pharmacists.

That propaganda work be continued in a most general and aggressive way; that we earnestly impress upon our members the value of holding frequent local association meetings and get-together meetings with physicians.

That educational standards for pharmacists be raised in conformity with the demands of the profession. National Pharmaceutical Syllabus commended.

That pharmacy be given representation on the various State and local boards of health.

W.O.N.A.R.D. Endorsed—Other Resolutions.

We give our undivided approval to the splendid work of the W.O.N.A.R.D.

Employment bureau and advertising department to be continued.

Encourage cordial relations among all associations; National Boards of Pharmacy especially commended.

Secretaries of affiliated associations requested to furnish chairman of telephone committee full information as to satisfactory or unsatisfactory conditions.

Legal department continued under direction of the executive committee; counsel's services to be given to legislative committee as latter may desire.

Panama Exposition endorsed. New Orleans favored as site.

Sunday rest resolutions of previous years reaffirmed.

Procter Memorial heartily approved.

California fund made a permanent relief fund.

Resolutions of regret and of tribute to Joseph F. MacDonald, whose life efforts were devoted to improving the telephone situation for druggists.

Heartily endorsed sentiment of executive committee "that we stand to enforce our sound convictions, rather than begging indulgence from anyone."

Work of the Women's Organization.

W.O.N.A.R.D.'s fifth annual convention, held at the Fort Pitt Hotel, Pittsburg, during N.A.R.D. week, will go down in the annals of the organization as one of good-fellowship, harmony and profit to all fortunate enough to attend, and these included a large number of members and delegates. Addresses of welcome were given by Mrs. Lester I. Lorah and B. E. Pritchard, of the local association.

The president, Mrs. Nellie Florence Lee, read her annual address and was listened to with great attention. She reported excellent progress in the year's work, much having been accomplished at State pharmaceutical meetings. There are 921 members with 13 chapters and 26 States represented, a gain of 139 members, 3 chapters and 3 States. The resolution against obscene medical advertising adopted at Louisville had resulted in a systematic campaign. The subject of Sunday rest and shorter hours had received careful attention. Mrs. Lee quoted an acrostic on the letters W.O.N.A.R.D. offered by the Boston Chapter and suggested some additions: W—for Work, O—for Opportunity, N—for Nobility, A—for Achievement, R—for Responsibilities and Reputation, D—Durability to insure Devotion.

The report of the secretary, Mrs. Jos. F. Forbrich of Chicago, spoke of the necessity for active work to insure growth. She told of the means which had been employed to secure the co-operation of club women in the indecent medical advertising work and stated that the endorsement of no less than 30,000 women had been received.

The treasurer, Mrs. W. S. Richardson, reported the cash on hand September 12, 1910, as $1135.77. This included dues paid to Sept. 1911. The receipts for the year had been $885.75, the disbursements, $783.40.

Mrs. C. A. Eckles, of Philadelphia, was chosen chairman of the committee on resolutions and Mrs. Emma Gary Wallace was made chairman of the nominations committee.

Reports were read from Boston Chapter, president, Mrs. Roxa K. Stover; Chicago Chapter, president, Mrs. George

This fine group picture of the N.A.R.D. was taken in front of the administration building of the H. J. Heinz Co., in Pittsburg, preparatory to a trip through the Heinz factory and inspection of kitchens. Luncheon followed later.

Lenz; Washington Chapter, president, Mrs. R. K. Duffy; Cincinnati Chapter, president, Mrs. Otto E. Kistner; Philadelphia Chapter, president, Mrs. Wm. E. Lee; St. Louis Chapter, president, Mrs. W. F. Ittner; Mobile Chapter, president, Mrs. J. S. Archibald; Pennsylvania State Chapter, president, Mrs. Louis Emanuel; Louisville Chapter, Mrs. John G. Krull; Wilmington Chapter, Mrs. J. O. Bosley. The baby chapter of all—Decatur—was not heard from. Every one of the reports told of splendid work and good progress with a most encouraging outlook. Cincinnati proved to be the banner Chapter for increasing its membership.

Mrs. Wallace, chairman of the educational committee, read a report calling attention to the growing and reprehensible habit of cigarette smoking among women and young girls. Members were urged to discourage the use of infant narcotics and habit-forming drugs by disseminating reliable information among their acquaintances and sister clubs as to the evil effects upon body and brain. It was also suggested that if a woman inspector of pharmacy could be appointed in every State, it might materially aid in the enforcement of existing laws, as the fact that she would have no political axe to grind would make her impartial in the discharge of her duty. The following resolutions were among those adopted:

Resolved, that the influence of the organization be used against the sale and use of habit-forming drugs, and infant narcotics and every opportunity seized to disseminate information concerning the evil effects thereof.

Resolved, that we discourage in every way in our power the growing and deplorable habit of cigarette smoking among women and young girls.

Resolved, that our campaign against obscene medical advertising be pushed with vigor.

Resolved, that we continue our efforts to obtain partial Sunday rest and shorter hours.

Resolved, that our motto be "To live and help Live."

These officers were elected for the coming year:

President, Mrs. Nellie Florence Lee, Philadelphia; first vice-president, Mrs. Adelaide M. Godding, Boston; second vice-president, Mrs. Otto Groenland, Cincinnati; third vice-president, Mrs. W. F. Ittner, Washington, D. C.; fourth vice-president, Mrs. J. O. Bosley, Wilmington, Del.; fifth vice-president, Mrs. R. G. Rutherford, Brooklyn; secretary, Mrs. Jos. F. Forbrich, Chicago; treasurer, Mrs. W. S. Richardson, Washington, D. C.; board of management: Mrs. Leslie O. Wallace, Canton, N. Y.; Mrs. N. D. Streeter, Philadelphia; Mrs. A. C. Taylor, Washington; Mrs. George Lenz, Chicago; Mrs. Roxa K. Stover, Boston; Mrs. John T. Rowe, Mobile; Mrs. E. Staley, Cincinnati; Mrs. Louis Emanuel, Pittsburg.

The entertainment features were numerous and enjoyable, including an automobile ride, reception and ball, visit to the Pittsburg Exposition, card party and musical entertainment, all-day trolley and sight-seeing trip, with a trip through the H. J. Heinz plant, where, after a delicious lunch, a moving picture series told in pictorial sequence the evolution of the company's "57" varieties of food from soil to consumer.

Sentiment in Business.

By Emma Gary Wallace.

IT is an oft-quoted saying that "there is no sentiment in business" and the quotation is usually made either to justify some hard-fisted proceeding or else to close the door in the face of objectionable sentimentality. There is a wide gulf of difference between sentiment and sentimentality. Sentiment is thought, opinion, sensibility, feeling or intellectual judgment, from which it would appear that in spite of the hoary proverb that sentiment in business is not only entirely possible but a good thing to have.

Sentimentality on the other hand is the quality of being romantic or artificially tender and is frequently used in a decidedly reproachful sense.

An Old Pharmacist's Advice.

An old pharmacist, now gathered to the bosom of his fathers, was advising his daughter about to enter the study of his own chosen profession concerning the guide posts to follow on the rocky road to Success and in the course of his admonitions touched upon the subject of sentimentality with the brief warning "to cut it out," but he urged her to cultivate sentiment as she valued her business and womanly success, even as he had done in the upbuilding of his large business and his reputation for kindliness.

The years have come and gone since then, some joyous, some overcast with cloud and others beautifully checkered with sun and shadow, but with the passing of time, the meaning of the distinction has become distinct and clear-cut to her and some of her business friends.

The person who is here today and gone tomorrow has little opportunity to make his thoughts and opinions felt upon the community. He has small chance of gaining the confidence and good-will of the people, but not so with the druggist and his family. They become part of the business and social structure through long residence in one place and their opportunities are accordingly great for the right sort of influence and the gaining of good-will.

To feel a real interest in one's customers, to be unobstrusively sympathetic when trouble or illness touches them and genuinely glad when fortune smiles upon them is a winning card in the sentiment of business.

Human nature is pretty much the same the world over in spite of the variety of exteriors and human nature is indeed warped when it does not respond to friendly interest.

Between the Lines.

In one of the high-class literary monthlies of current issue

appears a recent [illegible] by a prominent woman writer. This story contains a beautiful tribute to some druggist who has [illegible] and most kindly thought the druggist as a type of the [illegible] generous man of business affairs. It is [illegible] from the frequent uncomplimentary remarks indulged in by the daily press.

Here is the sentence:

> Grandfather Bixby had taken a covered jelly-glass from a tin pail of ice on the window-sill, and held it up for the youngster's eyes to feast on.
>
> "Ice cream!" he exclaimed, looking around over his glasses for a spoon. "A present from the drug store man at the corner. He said he missed his best customer." He pulled a chair beside the bed and slipped a pillow under Dicky's head. "I reckon your mother and the doctor wouldn't object to a little ice cream."
>
> The first spoonful, guided by his shaking old hand missed the boy's open mouth and slid into the hollow of his neck, to be mopped up by Grandfather Bixby's pipe-scented handkerchief. The next half-dozen reached their proper destination in short order; then Dicky turned away his head.
>
> "I can't chew it," he explained in a thin but polite voice. "When I shut my teeth it isn't there." . . . . . The old man scraped down the cream from the sides of the glass, and his corded fingers were tremulous."

Can't you see that picture of the sturdy little fellow grown thin by long illness? Can't you see the drug store man and *his wife*—else there never would have been a jelly-tumbler used—fixing up that little treat for their convalescent small customer, packing it daintily with crushed ice in the shiny new tin pail?

Do you suppose that the mother and the dear old Grandfather with the corded tremulous fingers appreciated the thoughtfulness displayed? Do you suppose they did? Well, I guess, yes, and that touch of sentiment would cement that entire family to that store and act as a lasting antidote for the trade-getting wiles of all competitors.

It was but a bit of July fiction to be sure, but then all fiction is founded on fact and my heart warmed to the writer who held this pleasant picture of "the drug store man at the corner," for somewhere in her own experience he is very sure to be a living reality.

Sentiment in business is all right, if it does not border on sentimentality. It is an excellent string to give place upon the bow, this one of human interest.

Music from a Single String.

A story is told of a great violinist who appeared upon the stage before an immense and expectant audience. He began to tune his instrument. A string broke. The audience was displeased. They liked not the delay nor the possibility of not hearing him at all. He deliberately tightened another until it snapped. There was a hiss. He paid no heed but calmly continued his work of adjustment until but a single string remained. The audience felt itself defied. It expressed its displeasure as angry audiences can. The violinist arose and walking to the center of the stage placed his instrument in place and began to play and silence fell upon the people. Such music, they had never heard. They were spellbound with the haunting elusive melody which quivered, plaintively and vibrated triumphantly from the single string.

Any one trained to it, may bring forth splendid harmonies from an instrument fully equipped but it took the master hand of one of the world's greatest musicians to play upon a single string.

Too many people are ready to grumble with dissatisfaction if everything does not come their way and that too, without much effort. Suppose one considers sentiment as the only string left, what sort of business-music would most people be able to make?

A Case of Just that Kind.

This is a very real case, the man lives today and although the [illegible] is not yet completed, yet the keynote, the marching rhythm and the time are long-since accomplished facts.

He began life as a boy, for his brother at that, and as sometimes unfortunately proves true, relatives are not always easy to deal with, so it was in this case. The brother was gruff, bluff and sour-visaged. But he made money, plenty of it, by shrewd dealing. The brother—our brother—was quite the opposite, genial, kindly and with a heart big enough to include everybody in its interest. Middle life saw him, the owner of the business, prosperous and beloved by everybody who knew him. If any one was in trouble, they knew where to seek sympathy and advice. If sickness came and distress they knew where to go. But wider fields of usefulness looked alluring and he sold his business and went away, placing his life savings in a single investment made upon the advice of a trusted and life-long friend. No, the friend did not play him false, he simply was mistaken, that was all, and he lost too. Everything was swept away in a few weeks' time. It was a crushing blow, but he did not allow it to crush him along. He had pledged himself not to enter the same line of business in the same place from which he had not as yet moved his family. He knew no other business nor had he money to seek another location.

Ah, but there were the friends of years! A hardware store was needed in the place, one more up-to-date than those already in operation. The discouraged man was approached by substantial backers and told to go ahead.

"But," he said, "Gentlemen, you do not understand, I have no money left at all, it is gone!"

"That is true," the leading spirit of the proferred help said, "but we have *that*, and *you* have friends and the right good-will of every man, woman and child for miles around. That's string enough for your bow. Go ahead, Alec, (for that was his name,) and we're with you to the finish."

Prosperity has long since smiled upon him and there is every reason to believe that it will long continue to do so. Had the brother for whom he clerked as a young fellow been the one to lose, he could have gone to the county house for all the public would have cared. He had no string of kindly sentiment to his bow, either at home or abroad.

The Store Welcome.

The perfunctory greeting—given grudgingly as if it were a disagreeable duty to be as speedily accomplished as possible, is never an invitation to come again.

A great-hearted man, a banker of nearly seventy years, recently died in this vicinity, and although his casket was draped with the silken flag of his country and fraternity and business comrades were proud to pay him their last respects, no tributes were more beautiful than that of an old woman of humble circumstances and a little boy of the street, both of whom said with misty eyes, "He was always glad to see me!"

He was a financier. His institution had just paid every stock-holder a dividend of fifty per cent and yet with all his weightier matters of business, he had time for a cordial welcome for every one who came in contact with him.

It is a great soul that can readily see the noble, the existant good or even the germ of promise of better things in every one. The touch of friendliness, the heart interest is a mighty factor in holding business, society, organizations and even nations themselves together.

Our Own Annual Gathering.

Is not the cordial hand clasp, the spirit of good fellowship and the "I'm *glad* to see you" element which bridges the year of separation between our own annual get-together meetings, one of the very things which make them a never-failing source of real joy?

Is not the fraternal sentiment of the whole affair the magnet which draws many an otherwise indifferent member thitherward, finally leading to a deeper interest? A successful druggist of one of our largest cities said the other day, "Why, if I were to lose my interest in the organization work itself, I don't believe I would want to miss the friendship-pleasures of a single convention."

As we travel onward through the world, calling for this or that kind of goods, this or that kind of service or cheer, we come pretty near getting what we call for by our manner and real purpose. There are disagreeable people everywhere, but if they can endure themselves for a constant companion we ought to be able to bear with them cheerfully for a few minutes occasionally.

There are a good many strings to the successful business instrument but as long as human hearts long for the touch of sympathy, for understanding and appreciation, the string labeled "sentiment in business" will continue to be a most important one and to hold an honored place.

Would Restrict Sale of Proprietary Remedies to Pharmacists.

Brussels Pharmacy Congress Launches International Ph. A.—Price Cutting Denounced as Unethical—Unification of Standardization Methods—Other Topics.

A. DERNEVILLE.
President of Congress.

(Special Correspondence.)

BRUSSELS, Sept. 7.—The tenth International Congress of Pharmacy, which has just terminated has been quite as great a success as was anticipated. From the point of view of members it was well attended, over 600 members having taken part in the meetings. It goes without saying that by far the largest contingency consisted of Belgian pharmacists, but France was also well represented in point of numbers. Dr. Reid Hunt, of the Hygienic Laboratory, represented the United States Government and Edmund White and E. S. Peck (secretary of the British Pharmaceutical Conference) were the delegates of the Pharmaceutical Society of Great Britain. Other countries which sent representatives were: Denmark, Sweden, Norway, Holland, Italy, Venezuela, Greece, Russia, Hungary, Argentine Republic, San Salvador, China, Guatemala, the Ottoman Empire, Japan, Spain, Haiti and Chili.

On the first day at the commencement of the proceedings the delegates were welcomed by A. Derneville, the president of the Congress, and by M. Bèco, Governor of Brabant, the meeting place being the Palais des Academies. After this meeting of welcome, the members proceeded to the Brussels Exhibition. Real work began on September 2, when the Congress divided itself into two sections, scientific and commercial. It was clearly demonstrated that the commercial element was the stronger, for at the first meeting of this section 150 members were present, while the attendance at the science section was only a third as large.

In the commercial section the first subject taken was the sale of proprietary remedies and it was evident that this question is an important one for Belgian, French and Italian pharmacists, for the representatives from these countries joined vigorously in the discussion. The main question before the meeting was a consideration of ways and means of preventing the "cutting" of prices, and Messrs. Breuglemans, Daminet and Staes, all pharmacists in business in Brussels, contributed some interesting details which they had collected with reference to the regulations governing the sale of proprietaries in various countries and the systems employed to ensure a profit to the seller. After a long discussion the meeting passed a number of resolutions of which the following were the most important.

1—It is desirable that in all countries the sale of proprietary remedies should be restricted to pharmacists.

2—Price "cutting" is an unethical practice and should be combatted by pharmacists in all countries.

3—Proprietary remedies manufactured in one country for export to another, should be specially packed for that country.

4—An international committee should be appointed with a view to affording an opportunity for an exchange of views.

5—In each country efforts should be made to bring as many specialties as possible under the regulations.

A subject of a similar character was discussed in the scientific section a motion being brought forward by Louis Delaye, of Liège, to the effect that the sale of proprietary disinfectants should be regulated by a public authority. After considerable discussion it was decided that the Congress should recommend that manufacturers of proprietary disinfectants should obtain a license before being allowed to place their products on the market and that all such disinfectants should be examined, both chemically and bacteriologically, before being certified. It was further agreed that all proprietary disinfectants should be sold in packages bearing the name and address of the manufacturer and the seller and should have a label stating the quantity of actual principle contained or the bactericidal strength. All such disinfectants containing poisonous substances should be sold only by pharmacists and in all cases the retail sellers should be responsible for the quality of the products and for their preservation. One of the most important of the questions brought forward in the scientific section was that of the international unification of methods of standardization. Dr. A. Schamelhout, the general secretary, pointed out that the work of the Congress for the unification of potent drugs could not be complete unless the methods of estimating drugs and galenical preparations was unified. As an instance he pointed out that the powdered opium of the Brussels Conference should contain 10 per cent of morphine, but that if such an opium was standardized according to the method of the third edition of the German Pharmacopœia it gave a percentage of 12. If, therefore, the method of standardization is not uniform it is hardly possible to have a uniform preparation. Dr. Schamelhout submitted that the Congress of Pharmacy should recommend that (1) The methods by which physical constants are determined should be indicated in Pharmacopœias, (2) In the case of chemical assays such terms as cloudiness, opalescence, turbidity, etc., should not be used and reactions should not allow of any difference of interpretation, (3) for estimations normal solutions should be used whenever possible, (4) In the estimation of alkaloids gravimetric methods should have the preference, (5) All the methods prescribed in Pharmacopœias should be such as could be performed by pharmacists in business. After some discussion these recommendations were adopted, and on the motion of Professor Bourquelot, of France, the following resolution was unanimously carried:

DR. A. SCHAMELHOUT.
Secretary of Congress.

"The Congress calls upon the Belgian Government to convene an international assembly, composed largely of practicing pharmacists, for the purpose of unifying the methods of estimating potent drugs and recommends to the proposed assembly that for the estimation of alkaloidal preparations preference should be given to gravimetric methods."

A kindred subject was introduced by Dr. P. Erculisse, who brought forward a proposal for the unification of analytical reagents, and after discussion it was resolved to recommend that Pharmacopœial authorities should adopt as far as possible normal reagents or some multiple of the normal.

The formation of an international association of pharmacists was brought forward by two delegates from Holland, Messrs. Hofman and Schoepp, and from the observations made it would appear that European pharmacy is by no means in a flourishing condition. They pointed out that the chemist's shop has become a place for the sale of all kinds of sundries, whereas it was formerly a place for the sale of medicines and surgical requisites and for analytical practice and that the social status of the pharmacist had declined. The speakers said that the object of an international pharmaceutical association would be to consider the question of pharmaceutical organization in all countries and to collect information and place it at the disposal of different governments. Another object would be to suppress quackery and to submit to international control the production of new remedies.

After some discussion it was decided to form such an association and a provisional committee was appointed to consider the preliminary details. On behalf of the Dutch government, Mr. Van Ledden-Hulsenbosch expressed the hope that the headquarters of the association would be at the Hague.

Pharmacopœial revision, with especial reference to the

position of pharmacists on revision committees was a subject introduced by Mr. Collard of Paris, who gave some interesting details concerning pharmacopœial revision in France. The Minister of Public Instruction has recently appointed the president and secretary of the French Pharmaceutical Association as members of the Codex Revision Committee and the tendency in France is to include more practicing pharmacists on the committee. A paper on the same subject by Otto Raubenheimer, of Brooklyn, N. Y., was also read and the Congress expressed approval of the principles enunciated by Mr. Collard.

Mr. Duliere, chief inspector of Belgian pharmacies, recommended pharmacists to make their own galenical preparations. He said that apart from preparations which owe their activity to well defined principles, preparations obtained from plants, had a composition which was not properly established and consequently could not be estimated. Such being the case Mr. Duliere thought it was desirable that where possible and convenient the pharmacist should make his own preparations. In the course of the discussion it was pointed out that in the case of many products it was preferable that these should be made by manufacturers possessing special apparatus and experienced in manufacturing processes. There was, however, general agreement with Mr. Duliere's observations and it was voted that with the exception of certain special preparations it was desirable for a pharmacist to make his own galenical preparations.

"The Limitation of Pharmacies" was a subject introduced by A. Langrand, of France, who claimed that the pharmacist was far better off in those countries where the number of pharmacies was limited, than in those countries where there was unfettered competition. The countries in which the limitation system existed were Italy, Germany, Austria, Hungary, Russia, Switzerland, Norway, Denmark, Greece and Bulgaria. The principles on which the limitation of pharmacies should be based were in his view, as follows:

1—No new pharmacy should be opened without permission of the public authority; 2, the number of pharmacies should be limited according to the number of inhabitants; 3, a tariff of prices should be fixed by the pharmaceutical authorities; 4, superfluous pharmacies should be closed either by repurchase on the death of the owner, if the son is not a pharmacist, or by voluntary sale; 5, a fund for such purchase should be established; 6, right to open new pharmacies should be accorded by competitive rules.

These principles were adopted by the Congress.

In addition to the above subjects several original communications of a scientific character were contributed. One of these dealt with "The Assay of Pepsin," the authors being Thomas Maben and E. Hercod, and the work on which the paper was based had been carried out in the laboratories of Parke, Davis & Co. The authors considered it advisable that certain definite tests should be adopted to ensure the purity and activity of pepsin, just as are now demanded of the various official chemical products. They suggested that the whole question be remitted to a committee appointed by the Congress to consider and recommend an international standard and method of assay. In their opinion this standard ought to be as follows:

"Take coagulated white of eggs (obtained by boiling fresh eggs for ten minutes), pass through a No. 40 sieve, and press between two sheets of filter-paper to remove surplus moisture; weigh 10 grams, and place it in a flask of 200 cc. capacity, containing 100 cc. of distilled water previously heated to 52° C., 0.25 per cent absolute HCl, and 5 cc. of a 0.1 per cent solution of pepsin. Place the flask in a water bath at 52° C., and digest at that temperature for two hours, stirring gently every fifteen minutes with a rotatory movement by means of a glass rod. At the expiration of two hours the albumin should be dissolved, the solution having an opalescent appearance."

After a discussion a resolution was adopted in favor of referring the question to an international committee.

Numerous successful social functions took place during the days of the Congress and visits were paid to Antwerp and Ostend.

As Deserving as the Doctors.

Veterinary surgeons want commissions. With M D's commanding warships don't see why the pharmacists are not entitled to recognition. In course of time there will, no doubt, be dentists commanding dreadnaughts and chiropodists directing brass bands.—*New York Evening Telegram*

? QUESTION BOX ?

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties etc. Requests for information are not answered by mail, and ANONYMOUS COMMUNICATIONS WILL RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Essence of Opoponax.

(F. A. L.)—We are unable to locate the formula. However, here are some formulas taken from an English authority, one of which may answer your purpose:

(1)

Grain musk	1 ounce
Vanilla	8 ounces
Tonka beans	4 ounces
Cologne spirit	10 pints

Macerate for a month, filter and add to the filtrate:

Tincture of orris	4 pints
Millefleurs extract	8 pints
"Citron zeste"	2 ounces
Oil of bergamot	2 ounces
Oil of rose	½ ounce
Oil of opoponax	½ ounce

(2)

Grain musk	½ dram
Vanilla	½ ounce
Tonka beans	2 drams
Spirit	25 ounces

Macerate for a month and add:

Oil of citron	1 dram
Oil of bergamot	1 dram
Oil of citronella	15 minims
Oil of lemon	15 minims
Otto of rose	50 minims
Oil of patchouli	½ dram
Violet extract	16 ounces
Rose extract	10 ounces
Tincture of orris	10 ounces
Cassie extract	5 ounces
Orange-flower extract	5 ounces

(3)

Extract of cassia	8 parts
Extract of tuberose	8 parts
Extract of jasmin	4 parts
Extract of orris root	4 parts
Tincture of benzoin	2 parts
Tincture of tolu	2 parts
Tincture of musk-seed	2 parts
Essence of musk	1 part
Rose water	2 parts

According to Deite ("Manufacture of Perfumery"), musk-seed are the seeds of a plant (*Hebimoschus moschatus Moench*; *Hebiscus abelmoschus, L.*) indigenous to Central Africa, Arabia and India. They are reddish-gray, kidney-shaped, slightly corrugated on the surface, and of an agreeable musk-like odor. The substance producing the musk odor lies in the seed coat. The odor becomes very pronounced on rubbing the seeds between the hands.

Creme de Menthe.

(W.F.C.)—The true "creme de menthe" is a liqueur or cordial, and various formulas have been published of its fabrication. One of these, from a foreign publication, directs "fresh leaves of crisped mint (Mentha crispus) 200 grams; peppermint leaves, 2 kg., and the rind of four lemons. These are macerated with three liters each of alcohol and water and four liters distilled off. To the distillate 2 kg. of sugar in 2 kg. of distilled water is added and the liqueur colored green. The preparation of such a product brings the manu-

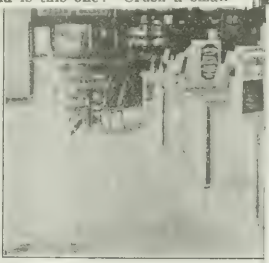
facturer within the category of "distillers," and as such he comes under the regulations of the Internal Revenue Department. However, a "creme de mint" syrup for dispensing may be made, according to Lippincott's Book of Instruction as follows:

Peppermint water (U.S.P.), freshly made..4 pints.
Granulated sugar .....6 pounds.
Vegetable green, sufficient to color.

Prepare by agitation or percolation.

To dispense place one ounce of the syrup in a glass, add 3 ounces of plain carbonated water, mix carefully with a twist bar spoon and pour into a small goblet filled with finely cracked ice.

Another soda fountain formula is this one: Crush a small



A corner of the Via

paper, is profusely illustrated and within its 128 pages is an interesting fund of information about the regeneration and progress of the archipelago, much of it being of especial value to persons desiring to move to the Philippines, or make investments there. In a half page advertisement appears a picture of the "Only American Drug Store in Manila," of which Seth P. Mobley is the managing director. Announcement is made that the store does both a wholesale and retail business and trade relations with American manufacturers are solicited. Mr. Mobley's picture is printed in a group of the representative business men of Manila.

A page is given to the Visayan Drug Co. of Iloilo. A view of the interior of this pharmacy is herewith reproduced. The *Times* also prints a picture of David A. Eberly, the manager and one of the owners, who has been in the drug business in the Philippines for eight years. He is a graduate of Philadelphia C.P. Two or three years ago, H. F. Schuldt, also a Philadelphia C.P. graduate, was taken into the concern and important improvements were made, including the intallation of a soda fountain and ice cream department. The establishment has grown so that it now requires the services of 17 persons, among whom are

How to Keep Chamois Skins.

(O. H.)—"Please advise the best way to keep chamois skins for selling which range from 5 cents to $2 in price. The present system of keeping the skins all in one bunch [illegible] as desired.

Green Sweeping Compound.

(W. L. B.)—For some general information on the composition of these compounds, see the March 11 and October 7 issues of the Era last year, pages 232 and 376, respectively

Here is a general formula given by Cummings in "Modern Formulary":

Dry sawdust	10 pounds
Paraffin oil	2 quarts
Paraffin wax	2 ounces
Coarse salt	½ pound
Oil of eucalyptus	2 ounces
Sea sand	4 pounds
Anilin color	sufficient.

Warm the oil and mix it with the melted wax; dissolve the anilin color in the mixture, add the oil of eucalyptus and saturate the sawdust with the mixture. Then mix this thoroughly with the salt and sand. This gives the compound for rough wood floors. For use on polished floors and carpets, the oil may be reduced to one quart or even one pint, the quantities of the other ingredients remaining as above.

Prepared versus French Chalk.

(H. E. T.)—"Please state the difference between 'prepared' and 'French' chalk?"

Almost any work on pharmacy will give you this information. "Prepared chalk" is the English name for the "creta preparata" of the Pharmacopœia, which is native soft calcium carbonate, freed by elutriation from most impurities. Chemically, it does not differ from the precipitated calcium carbonate (precipitated chalk), but, on account of its greater

Four Veterans of the N. A. R. D.

Arthur S. Evans, new president of the New York State Pharmaceutical Association, photographed at Lake George, during trip there of the association. Mr. Evans is a successful pharmacist of Utica, has been an active member of the State association since 1897 and has served as its vice-president.

the bundle of the size skin demanded is handed out for inspection. There is no way, it was said, to keep the customer from handling the skins, especially if the prospective purchaser be a woman. She feels it over to find irregularities and insists on the privilege. Two devices were tried here. One was a bar with a prong on either end on which the skins were caught and jerked off as sold. This device proved a nuisance and did not protect the skins. It was discarded as impracticable. The other method consisted in a drawer for each size, somewhat as above outlined. It took too much time and its use was also abandoned. The best way, was the consensus of opinion, is the old way: put the stock where the customers can look it over, and turn it over as fast as possible.

Million Dollar Broadway Lease for Riker-Hegeman.

In working out the plans for the consolidation of the Riker and Hegeman interests, the Wm. B. Riker & Son Co. has [illegible] a lease for a store at Broadway and

Olive oil	[illegible]
Ammonia water	1 fl. ounce
Oil turpentine	30 minims
Tincture of opium	30 minims

Mix and apply.

Rhubarb or Pieplant Wine.

(H. B. H.)—Chase's "Receipt Book" (1st ed.) gives these formulas:

(1)

To each gallon of juice add 1 gallon of soft water in which 7 pounds of brown sugar have been dissolved; fill a keg or a barrel with this proportion, leaving the bung out, and keep it filled with sweetened water as it works over, until clear; then bung down or bottle as desired.

According to the author, rhubarb stalks (pieplant) will

furnish about one-fourth their weight in juice, or from 1000 to 2000 gallons of wine to each acre of well cultivated plants. Fill the barrels and let them stand until spring then bottle, as any wine will be better in glass or stone.

(2)

For every 4 pounds of the stalks cut fine, pour on 1 gallon of boiling water, adding 4 pounds of brown sugar; let stand covered 24 hours, having also added a little cinnamon, allspice, cloves, and nutmeg, bruised, as may be desired for flavoring; then strain and let work a few days and bottle.

This formula is said to make a very nice pieplant wine, but more applicable for present use than for keeping.

activity to well defined principles, preparations obtained from plants, had a composition which was not properly established and consequently could not be estimated. Such being the case Mr. Duliere thought it was desirable that where possible and convenient the pharmacist should make his own preparations. In the course of the discussion it was pointed out that in the case of many products it was preferable that these should be made by manufacturers possessing special apparatus and experienced in manufacturing processes. There was, however, general agreement with Mr. Duliere's observations and it was voted that with the exception of certain special preparations it was desirable for a pharmacist to make his own galenical preparations.

"The Limitation of Pharmacies" was a subject introduced by A. Langrand, of France, who claimed that the pharmacist was far better off in those countries where the number of pharmacies was limited, than in those countries where there was unfettered competition. The countries in which the limitation system existed were Italy, Germany, Austria, Hungary, Russia, Switzerland, Norway, Denmark, Greece and Bulgaria. The principles on which the limitation of pharmacies should be based were in his view, as follows:

1—No new pharmacy should be opened without permission of the public authority; 2, the number of pharmacies should be limited according to the number of inhabitants; 3, a tariff of prices should be fixed by the pharmaceutical authorities; 4, superfluous pharmacies should be closed either by repurchase on the death of the owner, if the son is not a pharmacist, or by voluntary sale; 5, a fund for such purchase should be established; 6, right to open new pharmacies should be accorded by competitive rules.

These principles were adopted by the Congress.

In addition to the above subjects several original communications of a scientific character were contributed. One of these dealt with "The Assay of Pepsin," the authors being Thomas Maben and E. Hercod, and the work on which the paper was based had been carried out in the laboratories of Parke, Davis & Co. The authors considered it advisable that certain definite tests should be adopted to ensure the purity and activity of pepsin, just as are now demanded of the various official chemical products. They suggested that the whole question be remitted to a committee appointed by the Congress to consider and recommend an international standard and method of assay. In their opinion this standard ought to be as follows:

Place the flask in a water bath at 52° C., and digest at that temperature for two hours, shaking gently

Solubility of Quinine Sulphate.

(W. H. C.)—"In the following prescription what is the proper amount of hydrochloric acid to add to make a solution as directed

Quinine sulphate	10 grains
Water	120 cc
Hydrochloric acid, q.s. to dissolve	

One teaspoonful three times a day.

"Would it be necessary for patient's life by a prior enemia and to excite a fear reaction? Most authorities direct the addition of a few drops more acid and heat gently the product on solution."

Answering the question, the proper amount of hydrochloric acid necessary is just enough to dissolve the quinine sulphate. This can only be determined by experiment, the difference in temperature and other conditions slightly modifying in each individual experiment the quantity of acid used. MacEwan ("Art of Dispensing") states as a general rule, however, that the amount of any pharmacopoial acid required to dissolve quinine sulphate is reckoned as a minim for each grain of sulphate. On this basis about 150 minims of dilute hydrochloric acid are required, but at ordinary room temperature and in the quantity of water ordered, much less acid will suffice. As the dose of hydrochloric acid is from 5 to 10 minims, it is not probable that the patient would particularly endanger his life by taking the quantity of acid he would necessarily get in a dose as prescribed in the above mixture.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Essence of Opoponax.

(F. A. L.)—We are unable to locate the formula However, here are some formulas taken from an English authority, one of which may answer your purpose:

(1)

Grain musk	1 ounce
Vanilla	8 ounces
Tonka beans	4 ounces
Cologne spirit	10 pints

Macerate for a month, filter and add to the filtrate:

Tincture of orris	4 pints
Millefleurs extract	8 pints
"Citron zeste"	2 ounces
Oil of bergamot	2 ounces
Oil of rose	½ ounce
Oil of opoponax	½ ounce

(2)

Grain musk	½ dram
Vanilla	½ ounce
Tonka beans	2 drams
Spirit	25 ounces

Macerate for a month and add:

Oil of citron	1 dram
Oil of bergamot	1 dram
Oil of citronella	15 minims
Oil of lemon	15 minims
Otto of rose	30 minims
Oil of patchouli	½ dram
Violet extract	16 ounces
Rose extract	10 ounces
Tincture of orris	10 ounces

Elixir of Lactated Pepsin.

(J. L. W.)—The formula given by the National Formulary for compound elixir of pepsin is typical of the preparations sold under the above title, although but 75 grains of pepsin to the pint are employed in its manufacture. However, the Standard Formulary gives the following, which it states more nearly conforms to many of the commercial preparations:

Pepsin, pure	80 grains.
Pancreatin	20 grains.
Diastase or ptyalin	8 grains.
Carbear, powder	30 grains
Dilute hydrochloric acid	1 fl. dram.
Lactic acid	5 drops
Spirit of orange	2 fl. drams.
Alcohol	5 fl. ounces.
Water	7 fl. ounces.
Simple syrup	4 fl. ounces.

Mix all the above but the syrup, macerate for three days, agitating frequently; filter, to the filtrate add the syrup, and then through the filter add, if necessary, enough of a mixture of alcohol and water, in the proportion of 5 to 7 by measure, to make the liquid measure 16 fluidounces. For comment on elixirs containing pepsin, pancreatin and diastase, see the ERA of October 14, 1909, page 329.

Medium Used in China Painting.

(H.H.W.)—The medium generally used for mixing dry colors for use in china painting is oil of lavender. Sometimes Venice turpentine is added as a dryer. Balsam of copaiba, camphor 2 ounces, Hungarian oil 16 ounces, boiled together, thinned with oil of lavender and oil of turpentine, is

also employed. The Techno-Chemical Receipt Book gives the following as Brianchon's process for painting on porcelain, etc. Preparing the flux: Melt in a saucer 30 parts of rosin and add, during the melting, 10 parts of basic nitrate of bismuth in small quantities with constant stirring. When the mixture begins to assume a brown color pour 40 parts of oil of lavender into the saucer and stir until the ingredients are intimately combined. Now take the saucer from the sand bath, allow the contents to cool, and then add 35 parts of oil of lavender, when the flux is ready for use. The salts of oxides of antimony, chromium, cobalt, copper, iron, iridium, palladium, rhodium, silver, uranium, zinc, etc., are used as coloring substances; and gold, if the colors of mother-of-pearl or a prismatic play of colors is to be produced.

How to Keep Chamois Skins.

(O. H.)—"Please advise the best way to keep chamois skins for selling which range from 5 cents to $2 in price. The present system of keeping the skins all in one bunch causes them to become dirty and unsalable. It seems that there should be some device to get at any size at once."

To secure a practical reply to the above query an Era representative interrogated several successful retail pharmacists in this city on the subject. It developed that the sale and display of skins was in fact a question of, and depended greatly on, the psychology of a woman's mind, for no matter how arranged, women customers insist on "pawing" over all the chamois stock carried. Mere man deposits his money, seizes his purchase and without question departs. A woman customer desiring, for instance, a chamois skin for a vest, feels every square inch of its surface to be sure the thickness is uniform. One of the pharmacists visited tried the experiment of sorting his skins as to sizes and placing each size in the tray of a chest. His experience with this method was not satisfactory, for almost every skin was handled before a sale was consummated. The chest was abandoned and the old system resumed. Another pharmacist reported that the only practical way was to keep the skins in a roll in a dustproof case. His only departure from this method was when he displayed them hanging from a rack for special sale. Both the above pharmacists sold skins in sealed boxes which the customers insisted on opening and examining before handing over their money. These boxes, moreover, it was reported, did not keep the contents from hardening.

The system employed in the drug stores of a large, local corporation is to arrange the skins per size and cost on glass shelves of a glass-enclosed cabinet. Dust and dirt are thus kept out and the exhibit is continually on view. The customer is restricted as much as possible to specifications and the bundle of the size skin demanded is handed out for inspection. There is no way, it was said, to keep the customer from handling the skins, especially if the prospective purchaser be a woman. She feels it over to find irregularities and insists on the privilege. Two devices were tried here. One was a bar with a prong on either end on which the skins were caught and jerked off as sold. This device proved a nuisance and did not protect the skins. It was discarded as impracticable. The other method consisted in a drawer for each size, somewhat as above outlined. It took too much time and its use was also abandoned. The best way, was the consensus of opinion, is the old way: put the stock where the customers can look it over, and turn it over as fast as possible.

On Crutches, But Is a Hustler.

Arthur S. Evans, new president of the New York State Pharmaceutical Association, photographed at Lake George, during trip there of the association. Mr. Evans is a successful pharmacist of Utica, has been an active member of the State association since 1897 and has served as its vice-president.

Million Dollar Broadway Lease for Riker-Hegeman.

In working out the plans for the consolidation of the Riker and Hegeman interests, the Wm. B. Riker & Son Co. last month negotiated a lease for a store at Broadway and Dey street, Manhattan, New York, which represents probably $1,000,000 rental for a period of 21 years, the lease being conditional. By the agreement a minimum of $30,000 a year is to be paid, a total of $630,000 for 21 years.

The owners, the City Investment Co., however, will receive much more than that sum. The rent really is based on the gross income of the business, with the $30,000 as the minimum. The terms are 7 per cent of the income for the first 5 years, 6 per cent for the next 5 years and 5½ per cent for the remaining 11 years. This is likely to yield much more than $1,000,000 to the landlord.

Provision is made to turn the store over to the new Riker-Hegeman Co. It is located within a block of the present largest Hegeman store at 200 Broadway.

In the Mirror Before Us.

By Joel Blanc.

The Kicker.

AFTER the regular order of business, a tabled motion was taken up and debate upon it commenced. During the debate, one of the men read a letter from an absent member. The letter commenced:

"I was ill at the time of our last meeting, and I am in worse condition now than I was then, but I have heard of Gillmore's motion and feel that duty demands that I oppose it by letter, as I shall be unable to be with you." The letter then continued with an intelligent and vigorous criticism of the motion.

Hardly had the reader finished the letter than a dozen men were on their feet, clamoring for recognition. "Kicker! Crank! Knocker!" and words of similar meaning were heard. The chair recognized one of the most vociferous individuals, who immediately started a tirade against the writer of the letter. The speaker seemed to have utterly forgotten the motion which was before the house and none interrupted his flow of invective against him who had dared oppose popular opinion.

While the speaker was in the heat of his passion, a tardy member entered. The late arrival soon caught the purport of the speaker's words and, rising, said in a clear and penetrating voice: "I have just come from the home of the writer of the letter. He died a few hours ago!"

Instantly a hush came over all within the room. Some faces grew pale, while others were suffused with blushes of shame and regret. Then he who had announced the passing of a brother, spoke again:

"I would repeat to you the favorite lines of our dead friend:

"'Out of the night that covers me,
Black as the pit from pole to pole,
I thank whatever gods there be
For my unconquerable soul.

"'In the strong stress of circumstance
I have not winced nor cried aloud;
Under the bludgeonings of chance
My head is bloody, but unbowed.

"'Beyond this vale of wrath and tears
Looms a bright vista through the shade,
So that the menace of the years
Joyfully finds me unafraid.

"'It matters not how straight the gate,
How charged with punishment the goal,
I am the master of my fate,
I am the captain of my soul.'"

The motion was lost.

A Really Truly Coat.

It was his eighth birthday. When he awoke, he saw beside his bed a new suit of clothes, with a Norfolk jacket, a white shirt-waist, and a collar, four-in-hand and scarf-pin "just like papa's." These, his parents had given to him. Dear friends had sent "a watch that really tells time" and a chain.

He jumped from his bed and danced with joy. He was lavish with his words and kisses of thanks. A few moments more and he was dressed and stood posing before the mirror. He viewed his every curve from every angle. He asked if he did not "look a foot taller." He wondered if his teacher would notice his suit, and what his school-mates would say when they saw him. He looked at his blouse of yesterday and remarked that he would "have to give it to some little boy." He decided that he would have to choose new and older playmates, that he would have to study harder in order to be promoted. After a pretense at breakfasting, he marched off to school, with a military tread and head held high. His face was wreathed in smiles and throughout the day an expression of supreme satisfaction was evident.

After he was tucked into bed he assured his father and mother that "the really truly coat and the other big boy things" had given him "the very most happiest day" of his life. His parents kissed him good night, and left him alone.

The man turned to his wife, and asked: "What's the matter?" She was crying. "I—I can't—can't help it!" He was never so truly happy before, and—I'm so happy!"

The man kissed his wife, and then went to his den, and—well—he was just as happy as his wife was—in the same way.

After a while the man put on his glasses again, and he wondered why he had brought so few perfectly happy days into the lives of others. He wondered why he had deprived himself of so much true happiness by failing to realize that happiness is only the reflection of the joy one may bring to others. He wondered why so many druggists fail to realize it in dealing with their wives and children, their clerks and fellowmen. He thought he would write something about his feelings, but somehow, his emotions were enshrined so deep within him that he could not bring them to his finger tips.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Essence of Opoponax.

(F. A. L.)—We are unable to locate the formula. However, here are some formulas taken from an English authority, one of which may answer your purpose:

(1)

Grain musk	1 ounce
Vanilla	8 ounces
Tonka beans	4 ounces
Cologne spirit	10 pints

Macerate for a month, filter and add to the filtrate:

Tincture of orris	4 pints
Millefleurs extract	8 pints
"Citron zeste"	2 ounces
Oil of bergamot	2 ounces
Oil of rose	½ ounce
Oil of opoponax	½ ounce

(2)

Grain musk	½ dram
Vanilla	½ ounce
Tonka beans	2 drams
Spirit	25 ounces

Macerate for a month and add:

Oil of citron	1 dram
Oil of bergamot	1 dram
Oil of citronella	15 minims
Oil of lemon	15 minims

Many a man has grown in height,
With but little change of head.

Hamilton Co. Ph.A. Enlarges Formulary Committee.

CINCINNATI, Sept. 20.—Much interest was displayed by members at a recent meeting of the Hamilton County branch of the Ohio State Ph.A., held in the Lloyd library building. The U.S.P. and N.F. propaganda work was discussed by F. W. Kisker. The following members were added to the formulary committee: John M. Fallon, Harry Sentker, H. I. Igler, J. E. Flannery, George F. Stier, Joseph Schneider, Otto E. Kistner, William L. B. Brittain, Alfred DeLang, H. P. Walterman, E. L. Barton, Fred Schanzel, S. Strauss, Joseph Brand and Mathew Mangold. The original members of the committee are Theodore D. Wetterstroem, F. W. Kisker and H. J. Dusterberg.

Why Not Sell Soda Water?

CLINTON, Wis., Sept. 1.—At a recent meeting of the village board all of the applications from local druggists for permits to sell liquor were refused. It is thought, however, that the druggists will make further efforts to obtain licenses.

Druggist Installs Electric Piano in His Store.

SILVIS, Ill., Sept. 10.—V. H. Dumbeck has installed a fine new electric piano in his drug store. Customers may now listen to the strains of a Wagnerian production or a lively ragtime while waiting for the cars.

Will Soon Move Into His Own Building.

Fred H. Gasby, Eau Claire, Wis., proprietor of the South Barstow street drug store, recently purchased a business block in the same street, which he will have remodeled and will then move from his present location into his new store.

American Druggists Find a Good Field in Philippine Islands.

FRESH from the far away Philippines, giving evidence of American enterprise, intelligence and push comes a copy of the investors' and settlers' edition of the Manila *Times*, of which Martin Egan, formerly of New York, is the managing director. The edition is printed on fine paper, is profusely illustrated and within its 128 pages is an interesting fund of information about the regeneration and progress of the archipelago, much of it being of especial value to persons desiring to move to the Philippines, or make investments there. In a half page advertisement appears a picture of the "Only American Drug Store in Manila," of which Seth P. Mobley is the managing director. Announcement is made that the store does both a wholesale and retail business and trade relations with American manufacturers are solicited. Mr. Mobley's picture is printed in a group of the representative business men of Manila.

A corner of the Visayan Drug Store, Iloilo, Philippine Islands.

A page is given to the Visayan Drug Co. of Iloilo. A view of the interior of this pharmacy is herewith reproduced. The *Times* also prints a picture of David A. Eberly, the manager and one of the owners, who has been in the drug business in the Philippines for eight years. He is a graduate of Philadelphia C.P. Two or three years ago, H. F. Schuldt, also a Philadelphia C.P. graduate, was taken into the concern and important improvements were made, including the intallation of a soda fountain and ice cream department. The establishment has grown so that it now requires the services of 17 persons, among whom are Americans, Filipinos, Germans and other nationalities. The building is of ample size and is of modern fire-proof construction. Dr. S. K. Carson is president of the company and Mr. Eberly is secretary and treasurer.

TRUNKS A SIDE LINE: SODA "TOO SLOPPY."

Western Drug Firm Doesn't Operate Fountain Nor Carry Cigars, But Carries Strange Side Lines.

Members of the American Druggists' Syndicate party which traveled by private car from this city to the Pacific Coast and return during last summer, visited the drug stores of nearly all the large cities and towns en route. They picked up many valuable pointers and discovered many idiosyncrasies of the soda dispensing business while on their trip. Especially so was this true in the Middle and Far West.

In Portland, Ore., the Clarke Woodward Co., has perhaps the best appointed drug store and it is probably the only one the management of which believes in Sunday closing, as the store is open for only two hours on that day. Many departments are carried, trunks being one of the company's side lines. Strange to say, however, there is no soda fountain and cigars are not handled. Soda water, the manager said, was "too sloppy." The prescription department was a model of efficiency and cleanliness.

Buys Ice Cream Soda and Robs Druggist.

"Fork over that stuff," was the gruff command that startled E. E. Parrish, proprietor of the Walla Walla Pharmacy, Twenty-first avenue and East Jefferson street, Seattle, late at night recently, as he was counting his cash. Turning, he gazed into the black muzzle of a revolver. He handed over $55 without a word, and the robber disappeared into the night.

The thief had previously ordered an ice cream soda. Parrish served him, and then, while he was finishing the soda, turned to the register and started to count his cash.

Jobbers' Views of Co-Operation

SUCCESS DEPENDS LARGELY ON MAN AT HEAD.

Wisconsin Wholesaler Believes in "Live and Let Live" Policy in Relations of Jobbers and Retailers.

By L. A. Lange,

of the Yahr & Lange Drug Co., wholesale druggists, Milwaukee, Wis.

The question of "chain stores" in the retail drug line, is a complex one, at least, on the surface, it so appears to me. In this section we have not had much experience with organizations of this kind. It a near-by city in this State there are two such chains of stores. From personal knowledge of the workings of one of these organizations, I can say that with a man at the head of six stores, that man an exceptional one in executive ability, in a thorough knowledge of the drug business, in energy, push and in all that goes to make up a first-class business man, this chain of stores is a complete success. But how many such men are there? In the case I have in mind the manager, because of the close proximity of the stores, can and most likely does visit all of them daily. He is the head, the front, the soul of the organization. He does the buying, the advertising for all—and is in complete touch with all. But again, how many such men are there? If this man could not keep personal watch over the affairs of this chain of stores and was obliged to delegate supervision of one or more to others, to my mind the chance of success would be materially lessened. How much greater then would be the danger of a successful outcome if these stores were scattered through several cities, when of necessity the management and supervision would be divided? From this viewpoint it seems to me that the best chance of success lies in a man managing his own affairs, in giving strict attention to his business, studying the wants of his patrons and catering to them with all of the ability he possesses. If lacking in business ability, success is not likely to follow any man.

My experience, covering nearly 40 years in the wholesale drug business, leads me to believe that a large majority of the retail druggists with whom I have had business relations can and do manage their business successfully and are content to "let well enough alone."

The attempt by some persons to create friction or antagonism between the wholesale and retail dealer, will, to my mind, fail of its purpose. if the wholesaler takes an interest in and considers the welfare of his retail patrons as he

should, and, as I believe in most cases, he does. Confidence between the two branches of trade will not be easily undermined if established on a "live and let live" basis, as it should be.

A.D.S. HAS NOT YET ELIMINATED THE JOBBER.

Likewise Doubtful if A.D.S. Chain Would Eliminate "Chains" Established Under Other Auspices.

By SAMUEL R. KELLY,

vice-president and treasurer of the George A. Kelly Co., wholesale druggists, Pittsburg, Pa.

Treating the question in a general way, there is no doubt whatever that a chain of a thousand drug stores under one management can be made successful. The large chain of stores will be subject to the same laws that determine the destiny of a small chain, or a single store. If the management is competent, the business will be made to produce a profit; if incompetent, the business will be apt to suffer the misfortunes that overtake an enterprise, launched under unwise policies.

Your request, therefore, for our impression as to whether a large chain of stores is practical under the management of the American Druggists' Syndicate, is one that requires us to express an opinion of that organization, in order to give the matter specific treatment, and since the A.D.S. openly claims to be a benevolent institution, working entirely in the interest of the retail druggists, we do not hesitate to express our opinion.

When the A.D.S. was beginning its career, its claim was that with ten thousand members, it would "absolutely control" the drug situation. It also declared that the jobber was a parasite and should be eliminated from the field. Its claim now is, that with a chain of stores it will "absolutely control" the situation, and we believe it will come as near to controlling things with its chain of stores as it does with its very large membership.

Each time the A.D.S. starts out to "control" things it offers the trade some more shares of stock for good money, and the trade, so far, have bought with extreme liberality. It looks simple enough to us that any enterprise launched to "curb the career" of others is doomed to disappointment. The A.D.S. seems to think it must check the growth of other chains of stores, just as it thought it must "eliminate" the jobber. Time alone will tell, but we cannot help believing that an enterprise which bases its hopes of success on putting other men out of business, is building on a frail foundation. As to the effect of chains of stores on the wholesale druggists, we are not so clear. We are filled with optimism, however, since the very largest chains of drug stores and most stupendous department stores all over the country patronize the jobbers in all lines quite liberally and find them very convenient.

DENIES ANY REAL BENEFIT IN CO-OPERATION.

Cheap Buying Means Cheap Selling—Manufacturers Can Aid by Selling Only Through the Jobbers.

By JACOB WEIL,

of Bratt, Loeffler & Weil, importers and wholesale druggists, New York City.

The old saying, "I would rather be a king among dogs, than a dog among kings," holds good in considering the present revolutionary idea of conducting chain drug stores. The ambition of every drug clerk is that at some future day he may become the proprietor of a store. Nothing appeals more to the young man after graduating from college than the desire of seeing his name over the door of a pharmacy, not as manager, but as proprietor. I feel that the future is bright for the professional pharmacist as the professional role is the only one that can be maintained by the independent pharmacist. Those who will desire to conduct a department store or commercial pharmacy in the time to come will certainly be numbered among the less good. It should be the ambition of every clerk and proprietor to change his method, and to decide which line he will conduct, whether he will conduct a commercial or professional pharmacy. Chain or co-operative stores conducted under the auspices of an association will be a failure, for many generals without privates cannot win a battle.

I would advise proprietors of the small retail stores who are at present doing business with insufficient capital to form a copartnership with some of their other small competitors and to make one good, well-stocked and successful pharmacy out of the two or three stores which under present conditions are barely existing. The future of pharmacy depends almost entirely upon the men who are engaged in it. I have not seen anybody so far who has been benefited by these association or buying clubs. From observation I have noticed that when the average pharmacist buys his goods a few per cent cheaper, he will again sell them cheaper, so that in the end he is not financially benefited but forces his competitors also to sell at cut-rates, thereby demoralizing prices in districts where such conditions did not before exist. The only correct principle for the pharmacist to remember is that he must make his success by trying to get all he can for his goods and professional services.

To the average pharmacist, cheap buying means cheap selling. If a pharmacist should buy all his goods 5 per cent cheaper than he does now, his profit at the end of the year will not be any more, in fact, it will be less than it is at present. There is only one hope for success in the future and that is in a rule that will compel the manufacturers to sell all their goods through the jobber, with no provisions for intermediate quantity lots and no preferred list, so that large and small buyers would all stand on an equal footing.

NO CO-OPERATION BEYOND CASH BUYING BASIS.

In a Chain of Mutual Liability the Incompetents and Dishonest Ones Would Likely Swamp the Good.

By CHARLES COONLEY,

of Charles Coonley & Co., South Bend, Ind.

In regard to a chain of co-operative drug stores, I think every A.D.S. store should be a co-operative store so far as buying is concerned, and that this association and its branches should be as the A.D.S. is now, independent in its management and liability and that each branch should pay cash with orders for such articles as they purchase from the association. This policy, as I understand it, is the one now followed by the A.D.S., and it shuts out the sluggards, the dead-beats and the man who has not judgment enough to keep his business ahead, pay cash, and take advantage of discounts.

I believe that a co-operative chain of stores of mutual liability and under mutual management would not succeed from the fact that some incompetent or dishonest ones would creep in and they would swamp the good ones. Co-operative organizations have always been a failure throughout the world and particularly in the United States.

MANY HAVE FALSE IDEAS OF JOBBING IN DRUGS

Prominent Southern Wholesaler Advises Keeping Out of the Discussion of the Chain Store Systems.

By D. D. PHILIPS,

Berry, Demoville & Co., Nashville, Tenn.

The subject of chain stores is a triangular affair, and we jobbers should avoid making it four-sided or causing bad bullying bickering. At the same time, it is peculiar that so many should have such a false idea of the many phases of the jobbing distribution of the multiplied list of drugs, etc.

Hard Shot at the Price Cutters.

Before us is an editorial sent from the West, but from what journal we cannot determine. It refers to the price cutter and says: "As a matter of fact, manufacturer, jobber and retailer ought to alike join the work of exterminating and skinning this animal." Why? Is it not because he ignores fellowship? Does he not endeavor to build up a business by tearing down that of others; robbing competitors of a just reward for a needed service rendered the community?—*American Grocer.*

Homeopaths and Allopaths.

If on doctors you should be a caller,
You will find there's not much in a name;
Though the dose of the one is much smaller,
The size of their bills is just the same.
Lippincott's.

BOARD EXAMINATIONS

Ohio.

SANDUSKY, Sept. 1.—The Ohio State Board of Pharmacy has announced the result of the June examination, conducted at Columbus under its auspices. Licenses were granted to the following:

Pharmacists—J. N. Martin, L. H. Sears, George W. Feek, A. M. Clander, Walter Fallon, Edward Ebing, G. C. Brigler, L. F. Werner and M. J. Miller, of Cincinnati; A. M. Gehring, G. H. Voerg, O. D. Friska, W. F. Braunlich, W. J. Polak, J. A. Gerlach, G. W. Fay, M. D. Musa, O. R. Wrahse and G. E. Scanlon, of Cleveland; W. A. Hughes, W. E. Duffey, John W. Lee, Irwin Arnold and B. O. Schreiber, Columbus; G. H. Kuhn and Leo S. Truxell, Shelby; G. W. Pike, R. E. Russell and H. F. Hosfeld, Akron; Guy Flickinger, Toledo; Etta Dew, Summerfield; P. M. Fry, F. Ryan, Binghamton, N. Y.; H. D. Matthews, Mt. Gilead; A. G. Puerson, Bellaire; P. J. Rauck, Sycamore; Henry Ettinger, Youngstown; E. C. Austin, Hamilton; C. Fechtel, Orrville; M. O. Pontius, Smithville; H. C. Buchert, Portsmouth; C. F. Baskhurst, McConnellsville; F. H. Williams, Carthage; John E. Stout, Bethel; E. M. Oxley, Troy; B. E. Hartman, Medina; C. W. Ebert, Circleville; A. G. Stephenson, Jackson; W. K. McAllister, Belmont; Herbert Lucas, Circleville; M. O. Roth, Lorain; O. W. Howser, Steubenville; H. H. Reineke, Defiance; O. M. Welsh, Parkman; D. E. Evans, Ada; C. Feller, Troy; C. F. McCutchen, Chester, W. Va.; G. C. Butler, Lima; M. M. Bishop, Barnesville; M. H. Stanbarger, Strasburg; H. B. Smith, Pomeroy; R. P. White, Youngstown; N. A. Graney, Altoona, Pa.; J. C. Byrne, Wellsburg, W. Va.; L. N. Beck, Newark, Ohio; W. Dewitt Hicks, Fostoria; T. C. Christopherson, Zanesville, and Louis A. Bandy, Homestead, Pa.

Assistants—Frank A. Smith, O. E. Owens, B. B. Blorser, L. A. Dailey, W. H. Ford, J. H. Joseph, R. C. Miller, A. P. Krouse, Louis D. Harp, Lewis W. Bitzi, E. W. Wilfert, John Kelso, H. H. Hord, A. Crandall, W. E. Foertmeyer, W. P. Meissner, Florence Ross, D. L. Griffin, F. J. Ministermann, O. G. Watterstrom, Herman Schuler, C. B. Jameson, C. E. Kiesling, K. E. Bradley, H. M. Ackerman, J. P. Kopency, E. D. Engel, W. F. Miller, C. J. Vorkamp, C. S. Roberts, H. Haverkampf, Harry Tucker, C. J. Kampf, H. L. Sierwait and R. C. Murr, S. J. Bestwic, R. F. Tifton, May E. Straw, V. C. Masseran, G. A. Kurlander, Feril Hart, E. A. Humefeld, Bruno Rafs, J. E. Messenger, G. H. Fickhardt, E. G. Moolack, C. M. Brown, J. J. Efbel, H. W. Lehrer, J. J. Wittenberg, E. V. Wiebold, R. K. Stephens, G. B. Hicks, G. H. Neil, A. G. Walch, W. W. Harrington, R. G. Bluhm, W. G. Gaessler, E. E. Geyer, S. M. Jones, R. D. Russell, C. V. Busch, Robert Hendess, M. C. Crandall, T. D. Phelps, Ed. Davey, G. B. Newton, A. E. Tryon, Clyde Martin, B. E. Holland, H. W. Brewer, J. E. Kerschner, L. V. Bates, O. E. Taylor, Otto Ebnot and J. L. Duffey

Illinois.

SPRINGFIELD, Sept. 1.—At the July examination of the Illinois State Board of Pharmacy in Chicago 32 of the 50 applicants for assistant pharmacists, 26 of the 69 candidates for registered pharmacist and the only applicant for local registered pharmacist were successful. Their names follow:

Assistant Pharmacists—B. D. Burley, Philip Deitch, Alfred E. Dahlberg, Martin Fox, Morris Fox, Jas. C. Graham, Julius T. Goreche, Robt. L. Ironside, Raphael Jacobson, Jacob Kohn, Rupert L. King, Louis C. Kvitck, Joseph Langerman, Benedict G. Levinson, Urban J. Lewis, John McNulty, Erwin J. Mark, French B. Reid, Louis Rosenfield, Herman Schlachet, A. M. Serritella and Louis R. Wernecke, all of Chicago; Perley Burritt, Evanston; John F. Kelley, Highwood; Lester R. Mason, Peoria; Harry S. Miller, Palatine; Henry O. Peterson, Peoria; Thomas Ross, Coal City; Arthur H. Schroeder, Mt. Olive; Benj. S. Schildberg, Mendota; Geo. H. Stoutin, Springfield, and Clarence A. Tay, Bloomington.

Registered Pharmacists—Joseph J. Barrash, Samuel Barback, C. Clifford Cummings, E. Arthur Edlund, Benj. Feldman, Jos. Halpert, Geo. C. Hansen, Herbert E. Jago, David S. Katz, Chris W. Lee, Emil E. Lehmann, John J. Liska, Carl W. Lutz, Frank W. Martin, Edwin S. Matson, Martin Niggeling, Frank T. Piper, Frank A. Rosenbaum, Leo C. Solomon, Stanley B. Webster, all of Chicago; C. J. Bottom, East St. Louis; Bruno B. Brunke, Redgranite, Wis.; Lynn T. Coley, Pittsfield; Esther Davis, Toronto, Canada; Samuel Fox, Highland Park; Oscar A. Marton, Bloomington.

Local Registered Pharmacist—Miss Mary A. Hobart, Ashmore.

New Jersey.

BRIDGETON, Sept. 1.—Henry A. Jorden, secretary of the New Jers y State Board of Pharmacy, announces that the next examinations will be held in Trenton, Oct. 20-21. The following passed at the July examinations:

Registered Pharmacists—Morris H. Albach, Roselle Park; David C. Anderson, Newark; William D. Baun, Philadelphia; Charles P. Baum, New York; Henry D. Block, Jersey City; John G. Boyttm, Newark; Walter G. Brown, Philadelphia; Minton D. Bross, Rahway; Charles F. Cartwright, Somerville; David I. Cohen, Jersey City; Lester C. Connelly, Ocean Grove; Ralph J. Davenport, Princeton; Casper J. De Vries, Paterson; Felix A. Del Vecchio, Newark; Anthony Di Bella, New York; Robert Epstein, Elizabeth; Harold Feuereisen, New York; Frederick F. Fiala, West Orange; J. C. Fitch, Philadelphia; Louis Freedman, Philadelphia; George Freshell, Wyncote, Pa.; Vincenzo Giacalone, New York; Edward P. Gibneym, Atlantic Highlands; Robert E. Giles, Washington; James L. Hamilton, Somerville; Martin Hoffman, Keyport; William F. Holzer, Arlington; Samuel Kaufman, New York; Harold I. Kessler, New York; George W. Kraeuter, Newark; Federico La Piana, Hoboken; Meyer A. Levinson, Harrison; Martin Malkin, Brooklyn; Abraham Markoff, New York; Frederick W. McClung, Perth Amboy; Emil A. Mundaro, New York; John J. Parentini, West Hoboken; Garrett J. Powers, Belleville; Fritz L. Reusch, Newark; Stephen H. Rostkowski, Perth Amboy; William Rowlan, Highlands; Benjamin Seigl Newark; James P. Smith, Newark; William Soliveau, West Hoboken; Julius Taub, Jersey City, Zsigmond Tegze, Passaic; Nathan Watman, Bayonne; Albert C. Wester, Newark; Arthur W. Williams, Newark; George H. Williams, Camden.

Registered Assistants—Edward Bessman, Newark; William J. Buss, Newark; Samuel B. Greenwood, Newark; Abraham Goldin, Newark; Samuel Hailperin, Newark; Ollington C. Hayes, Newark; Walter A. Penrose, Trenton; William C. Staehle, Newark; Frank Walkenberg, Newark.

Texas.

FORT WORTH, Sept. 1.—Secretary R. H. Walker, of the Texas State Board of Pharmacy, announces that the next meeting will be held at Galveston, Sept. 20. Under no circumstances will any applicant be permitted to enroll for examination unless he shall have had four years' experience, credit being allowed for time expended at college. Applicants for assistants' certificates must have two years' experience, before being allowed to apply for examination, and one who holds an assistant's certificate must have two years' additional experience before he can apply for full registration by examination. No variation from this rule will be tolerated in the future.

The following passed the recent examinations and were awarded certificates, either as registered pharmacist or assistant, as per section 3 of the Pharmacy Law:

R. O. Carroll, Fort Worth; J. R. Man, Decatur; W. B. Johnson, Dallas; S. A. Lundy, Fort Worth; J. A. McNutt, Dallas; L. F. Mallow, McKinney; Fred Heineke, Brenham; W. M. Butler, Florence; W. L. Taylor, Fort Worth; C. L. Wilder, Whitt; J. R. Atkinson, Florence; J. E. Keith, Porth Arthur; Miss M. McCarley, Galveston; J. M. Gawling, San Augustine; Robt. A. Jones, Whitewright; J. Q. Baldridge, Rockdale; J. G. Voelcker, New Bruansfel; B. Barnett, Kemp; D. M. Howard, Devine; Carl Sterling, Sulphur Springs; T. J. Miles, Rockland; K. E. Krug, Brenham; A. A. Chernosky, Rosebud; H. S. Widney, Dallas, assistant; S. L. Lightfoot, Bridgeport; C. A. Eiland, Munday; L. A. Mitchell, Palestine; E. S. Lawrence, Des Moines, Iowa; E. T. Summett, Fort Worth; W. F. Albert, Galveston; P. L. Crain, Moore; O. O. Taylor, Linden; E. W. Brooks, Fort Worth; Edward Russell, San Antonio; T. M. North, Jr., Yoakum; A. B. Von Dohlen, Hitchcock; John T. Sparkman, Alvord; Miss F. L. Little, Hughes Springs; Miss Ida Pfeiffer, Kerrville; T. M. Gentry, Big Springs; J. E. Waters, Bridgeport; T. H. Alexander, Humble; L. E. Locke, Bryan; M. A. Donaldson, Austin; J. P. Hennessy, Madisonville; W. E. Rogers, Bremond; F. C. Mothershead, Everman; G. S. Blankinship, Tourpe, assistant.

Wisconsin.

MADISON, Sept. 1.—As a result of the recent examinations the Wisconsin Board of Pharmacy has granted certificates to the following:

Registered Pharmacists—Francis F. Kane, Milwaukee; Sabus N. Haas, Richland Center; Herman Roettgers, Milwaukee; Joseph F. Wiesner, Neillsville; Walter A. Winkel, Fond du Lac; Eugene O. Vogel, Oshkosh; Alfred G. Peterson, Waupaca; L. E. Martin, Lone Rock; Otto M. Hester, Milwaukee; Harry Oliver Gray, Madison; Lentena G. Reiser, Edgar; Sigismund Krawczak, Milwaukee; Herman F. A. Krueger, Milwaukee; Stanley M. Gorski, Milwaukee; Charles E. Trakel, Oshkosh; John F. Zoesch, Butternut.

Assistant Pharmacists—Alfred Axt, Milwaukee; Isaac N. Lovejoy, Stoughton; J. Moore Rutledge, Milwaukee; James G. Sharp, Milwaukee; M. J. McGovern, Waterloo; H. W. Leonard, Madison; Arthur R. Schmidt, Gresham; Fred W. Marquardt, Milwaukee; Alfred T. Hafemann, Milwaukee; Christ Johnson, Chippewa Falls; Walter C. Burns, Oakfield; Herman P. Reif, Madison; Le Roy Sweet, Roberts; Mabel D. Clark, Wild Rose.

Minnesota.

ST. PAUL, Sept. 1.—Charles T. Heller, secretary of the Minnesota State Board of Pharmacy, announces that 52 candidates appeared for examination before the board at Minneapolis July 18. The following were granted certificates:

Pharmacists—Herbert W. Cutler, Park Rapids; Charles O. Diessner, St. Paul; E. L. Kallner, Minneapolis; Theodore J. Le Vine, St. Paul; Anastasia M. Remes, Minneapolis; F. A. U. Smith, St. Paul; Harold A. Tyrholm, New Richland; Nels Vasenden, Fertile.

Assistant Pharmacists—Arthur T. Blomquist, Milaca; Leo C. Cycmanick, Minneapolis; William Humphreys, Moorhead; A. R. E. Johnson, Minneapolis; Ernest S. Kaplan, Owatonna; Elmer J. Peterson, Red Wing; Edwin Shirley, Eau Claire, Wis.

The next meeting will be held at the College of Pharmacy Building, State University, Minneapolis, beginning Oct. 17. Applications must be in the secretary's hands at least one week prior.

Oklahoma.

STROUD, Sept. 1.—Secretary J. C. Burton announces that at the July meeting of the Oklahoma State Board of Pharmacy the following persons were successful in passing the examination, all being residents of Oklahoma, except one:

Registered Pharmacists—Hattie Bryant, Taft; H. C. Chope, Newkirk; L. P. Carpenter, Hugo; Irwin Dalton, Porter; L. E.

Ellison, Apadaca; C. Y. Garrison, Denton Texas; C. A. Gault, Quinlan; James I. Hendinger, Lindsay; E. L. Hayes, Pawhuska; M. H. Lessing, Alva; J. D. Nance, Bochita; G. J. Peterson, Wagoner; W. J. Reesma, Oklahoma City; W. E. Severs, Nowata; J. C. Thompson, Muskogee; L. A. Winans, Oklahoma City; J. P. Wikerham, Oklahoma City.

Registered Assistants—M. G. Kreul, Dill; J. R. Presley, Chickasha.

Kentucky.

Winchester, Sept. 10.—At the July meeting of the Kentucky Board of Pharmacy held at Dawson Springs, a class of 20 was examined for registered pharmacist, and a class of 25 was examined for assistant. The following qualified:

Registered Pharmacists—Frank M. Crump, Smiths Grove; Geo. E. Fisher, Russellville; Jas. L. Hathaway, Richmond; Frank B. Willett, Spencer.

Assistant—Arthur W. Allen, Somerset; Edwin P. Curry, Danville; Lyman S. Estes, Corbin; Henry C. Herp, Louisville; H. E. Katterjohn, Paducah; H. F. Cohn, Louisville; Fred B. Kluth, Louisville; L. K. Sykes, Hendersville, Harding Thurman, Lexington; C. A. Sneduker, Covington; J. C. Allman, Richmond; J. T. Cheatham, Woodburn; L. W. List, Paducah; Roy McConnell, Memphis; J. E. Meacham, Sturgis; C. P. Morehead, Bowling Green; E. D. Mullins, Wingo; C. Passmore, Louisville; W. M. Perry, Earlington; J. L. Venable, Woodburn; O. G. Withers, Eddyville; I. B. Crowe, Graham; J. W. Head, Lebanon, Tenn.

The next meeting will be held at Winchester, Oct. 11—12. Applications should be filed with the secretary at least ten days before that time.

District of Columbia.

Washington, Sept. 1.—At the regular quarterly examinations of the Board of Pharmacy of the District of Columbia, held July 14-15, the following were listed as the successful candidates and were duly licensed:

John Harold Morgan, Columbus Washington Henry, Thomas Jefferson Tate, Douglass Tschiffely, Harry Patton Jones, Harry Joseph Paul Senay, Homer Kirk Butler, Melville Brainard Tewksbury, Daniel Locher Grove, Banjaiman Alvin Betts, Charles Thomas Conrad, Jr.

The next examination will be held Oct. 13-14, 1910. C. J. Fehrmann has been appointed a member of the board, vice Lewis Flemer, term expired.

Missouri.

St. Louis, Sept. 1.—The Missouri State Board of Pharmacy announces that 20 of the 43 applicants for registration at the Cape Girardeau examination were successful, as follows: J. R. Morehead, Milan; Price R. Glenn, Harrisonville; W. E. Sturgis, Kennett; Joseph A. Furlong, St. Louis; A. S. McCorkle, Carrollton; O. A. Dodson, Milan; J. R. Flynn, Kirksville; Paul Rigg, Weatherby; O. A. Cope, Kennett; F. B. Young, Kansas City; H. C. Wasem, Cape Girardeau; W. H. Ayres, Miami; Charles Strapp, Hardin; E. L. Wells, St. Joseph; J. W. Rea, Milan; J. F. Farrell, St. Louis; D. E. Latta, Kansas City; J. F. Singer, St. Louis. Assistant pharmacists: A. B. Grier, Strafford; G. Lena Hawkins, East Prairie.

Southern Association of Boards of Pharmacy.

Memphis, Sept. 1.—Pharmacists and licensed prescription clerks moving from one of the Southern States to another hereafter need not undergo re-examination if the purposes of the Southern Association of Boards of Pharmacy organized here recently are put into successful operation. The new organization was formed at the conclusion of the annual convention of Tennessee Ph.A. Representatives of practically every State in the South attended and the following officers were chosen: President, E. Berger, Tampa, Fla.; vice-president, Frank W. Ward, Memphis; secretary-treasurer, C. D. Jordan, Monticello, Ga.

New York—Western Branch.

Buffalo, Sept. 1.—As a result of the July examinations of the Western Branch of the New York State Board of Pharmacy, licenses were granted as follows:

Pharmacists—L. R. Jacobs, Rochester; Lester H. Rice, Buffalo.

Druggists—Julius Becker, Buffalo; Edward J. Oyer, Buffalo; Peter F. Webber, Middleport; Theodore H. Weider, Rochester.

Louisiana.

New Orleans, Sept. 1.—The Louisiana State Board of Pharmacy held examinations Aug. 5 and 6 at Tulane University. Twenty-six applicants were examined. The following were successful: J. B. Aucoin, R. U. Barrois, J. J. Bussy, S. A. Deporte, C. E. Jameson, A. J. Laborde, P. J. Lacassin, W. Long, A. M. Notter, J. E. Scott, Mrs. F. Stewart, N. Voelcker, G. L. Walsdorf, C. Western and L. D. Ishael.

Utah.

Salt Lake City, Sept. 1.—At a recent meeting of the Utah Board of Pharmacy the following applicants passed examinations and are now registered as pharmacists: H. B. Lyman, Paul Lyon, L. D. Charlier, Rodney Verrill, Frank C. Nash, Salt Lake; Wilford W. Reeve, Salt Lake; Ralph Hougaard, Ephraim; Walter Dittler, Ogden.

California.

Next examinations of the California State Board of Pharmacy will be held in Los Angeles the week of Oct. 10, and in San Francisco the week of Oct. 17.

BOOK REVIEWS

THE THEORY OF PHARMACEUTICAL CHEMISTRY. By Charles H. Daggett, Ph.G., Ph.C., Professor of Theoretical Pharmacy and Organic Chemistry in the Rhode Island College of Pharmacy. Pamphlet. 12 x 8½ inches. 340 pages. Illustrated. Cloth, $2.75, net. Philadelphia and New York: Lea & Febiger.

With the idea of presenting the essential facts of pharmacy to the student in a systematized and easily-assimilated manner, the author has divided his text-book into three distinct sections. Section I is devoted to tables of weights and measures; the definition of specific gravity and methods of determining same; an explanation of alligation; short, concise treatises on heat, calcination, deflagration, etc., incompatibilities, volumetric analysis, solution, etc., etc., in fact, all that rudimentary part of science necessary to advanced work.

Sections II and III treat, respectively, of inorganic and organic chemistry. The graphic formulae and constitutions of a large number of the compounds of the two branches of chemistry are given, together with explanatory matter regarding their derivation, origin and preparation, and requisite purity. Considerable attention is devoted to alkaloids of unknown constitution; glucosides and neutral principles; resins, gum resins, and oleoresins, and drugs containing volatile oil. The language and style of the book are simple and its contents are simply arranged. Nothing new, however, is presented, the author's purpose being as above stated.

THE MODERN PHARMACIST. A series of articles, somewhat modified, that originally appeared in N.A.R.D. Notes, with some miscellaneous additions. By Otto E. Bruder, Ph.G., assistant editor. 8vo., 336 pages. Cloth, $2. Chicago: the National Association of Retail Druggists.

The author has endeavored in The Modern Pharmacist to supply a guide to the practical pharmacist for the acquisition of useful knowledge pertaining to his profession. He elaborates on the practical and commercial value of the drug store laboratory, the need of harmonious relations between the professions of pharmacy and medicine, goes into the details of advertising and salesmanship as applied to the exploitation of the pharmacist's stock and presents a number of chapters devoted to prescription pricing and drug store arithmetic. If one were to believe the author, "the entire contents of the book are so important and are written in such readable style, that it would appear that every pharmacist will read the book from cover to cover." It is possible, however, that not all individuals who attempt to read this book from cover to cover will arrive at the same conclusion.

National Association of Pharmacologists Formed.

Columbus, O., Sept. 20.—The National Association of Pharmacologists is the name of a new society organized by the drug clerks of Columbus on Sept. 1. Among the objects of the organization, which has been incorporated under the laws of Ohio, will be the effort "to form closer relations, establish justice and provide for the common good, to foster fraternal charity and fellowship and improve the educational, mental, moral and social conditions and welfare of its members. To co-operate with employer with zeal and energy with an honesty and purpose and intent for the mutual advancement and interest of all concerned." The membership is to consist of active and associate members, licensed or registered drug clerks holding certificates, graduates in pharmacy having not less than five years practical experience in a retail drug store, chemical or pharmaceutical laboratory being eligible. Associate membership will be granted to persons, firms or corporations making a donation to the association. The officers chosen for the ensuing year are:

Thos. L. Collins, president; Chas. H. Bawersox and Wm. H. Wilson, vice-presidents; P. A. Mandabach, secretary-treasurer; J. C. Mandabach, national organizer; executive committee, Wm. H. Wilson, Arthur T. Thrall and F. M. Blank. The permanent offices of the society will be in this city.

Symptoms.

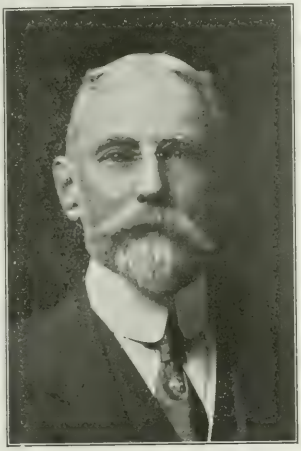
The Widow—Yes; his was a fruitful life.

Doctor—Humph! Died of cholera morbus, did he?

MOSTLY PERSONAL

Prominent Boston Wholesale Druggist, for 30 Years in N.W.D.A., Chairman of Legislative Committee.

CHARLES A. WEST, who succeeded the late Mahlon N. Kline as chairman of the committee on legislation, of the National Wholesale Druggists Association, one of the most important in that organization, is one of the best-informed druggists on trade matters in New England. He has spent his whole business career in the wholesale trade, including every station from errand boy to the manager of the drug department of the largest wholesale drug firm in this part of the country. He is vice-president of the Eastern Drug Co. of Boston, and ever since the organization of that company ten years ago, he has had charge of the drug department of the corporation. Mr. West's membership in the N.W.D.A. covers a period of 30 years, and he has been a regular attendant at the annual conventions of that body. His former committee work in that association includes the chairmanship of the committee on credits and collections and the committee on commercial travelers. Mr. West is a native of Boston, and his ancestry runs away back to the colonial days. He was born April 4, 1850, so that he has just passed his 60th birthday. He attended a Boston public school and graduated from the English High School at the age of 17. He at once entered the employ of Reed, Cutler & Co., wholesale druggists in Broad street, as office boy. He was with that firm for just 20 years, of which time, 16 years were spent on the road as a commercial traveler, his territory covering at various times all parts of New England and New York State. In 1887, with Bernard Jenney, Jr., he formed the wholesale drug firm of West & Jenney, a firm which 13 years later was one of the four wholesale houses in Boston which merged in the Eastern Drug Co. Upon the organization of the new corporation Mr. West was made vice-president, and was given charge of the drug department, positions which he has since held.



CHARLES A. WEST,
Boston, Mass.

Apart from his position in the Eastern Drug Co., Mr. West is the president of the American Camphor Refining Co., of which he was one of the organizers, and which is one of the largest companies in that line in the country, with two refining plants. Mr. West was one of the charter members of the Massachusetts State Pharmaceutical Association, and he has served as a trustee of the Massachusetts College of Pharmacy. In 1892 he was a president of the Boston Druggists' Association. Other affiliations are with the Masonic fraternity, the Algonquin club of Boston, the Eastern Yacht Club of Marblehead, the Exchange club of Boston, the Country club of Brookline and the Society of Colonial Wars in Massachusetts. For twelve years Mr. West served as one of the trustees of the Somerville Public Library and for five years as the president of the board. He is married, and makes his home at the Hotel Somerset in Boston.

GEORGE T. RIEFFLIN, representative for Sharp & Dohme, New York, sailed on Sept. 17 on the steamship George Washington for Germany where he will visit his aged mother. Shortly before his departure he was presented by Ernest Stauffen, the treasurer of Sharp & Dohme, with a beautiful gold stop watch bearing the following inscription engraved on the case: "1885-1910. Presented to George T. Riefflin as a token of appreciation of twenty-five years' unwavering loyalty and effort." Among those present to see him safely aboard the steamship, besides members of his family, were Rudolph Schoenfeld, New Jersey representative of Sharp & Dohme, accompanied by several gentlemen from the company's New York offices, Herman Walter, and Hugo Kantrowitz and daughter, Miss Claire Kantrowitz. As a further proof of the esteem in which Mr. Riefflin is held by his associates in the trade he has just been honored by election to the presidency of the Wholesale Drug Trade Bowling Association for the third consecutive term.

GEORGE T. RIEFFLIN, New York.
boarding steamship bound for Europe

—CHARLES F. SCHLEUSSNER, former president of the New York German Apothecaries' Society, has returned from an extended European trip. During his absence he spent considerable time visiting his daughter who lives in St. Petersburg, and she returned with him.

—DR. A. R. L. DOHME, of Sharp & Dohme, Baltimore, is taking a prominent part in the movement to raise a guarantee fund in order that the city may have grand opera performances next winter. Dr. Dohme is an enthusiast on the subject of high class music.

—HENRY B. GILPIN, of Gilpin, Langdon & Co., and the H. B. Gilpin Co., of Baltimore, has returned home from Europe after an extended foreign trip and is spending some weeks on his estate in Virginia prior to reoccupying his Baltimore residence.

—W. C. SIMPSON, Vienna druggist and present mayor of that place, has purchased a drug store in Evanston, near Chicago, and took charge of same recently. He retains his citizenship in Vienna for the present, but expects to move his family to Evanston soon.

—J. D. GIRVIN, assistant sales manager for the H. K. Mulford Co., has returned from a trip to the Pacific Coast where he arranged for the opening of a branch office of the Mulford Co., at Seattle. It will be in charge of H. D. Pitchard, formerly of Philadelphia.

—CHRISTIAN WIDULF, president of the Wisconsin Pure Drug Show Association and a prominent druggist of Milwaukee, observed his sixty-fifth birthday anniversary recently. Mr. Widule was born in 1845 at Taruorvitz, Silesia, but came to this country when a child of four years.

—H. C. SMITH, one of the old-time druggists of Manchester, Iowa, having been in business 36 years, has sold a controlling interest in his business to Wm. Amsden of Garner, and he will retire from active work to look after outside investments.

—CHARLES STEVENSON, of Robert Stevenson & Co., Chicago, witnessed the Passion Play at Oberammergau, Sunday, Sept. 11. From there he planned to travel through Switzerland and Italy, reaching home about Nov. 1. Since his departure he has covered most of the Continent.

—MARTIN I. WILBEET of Washington, D. C., and Joseph W. England of Philadelphia, both members of the Revision Committee of the United States Pharmacopœia, were recent visitors at the summer home of Chairman Joseph P. Remington, at Longport, N. J.

—J. F. E. HICKS of Goldsboro, N. C., recently assumed the duties of assistant to Charles H. LaWall, the well known Philadelphia chemist and educator. Mr. Hicks was graduated from the Philadelphia College of Pharmacy in 1909 and since then had been in the laboratory of Joseph Jacobs at Atlanta, Ga.

—W. A. CARPENTER, F. H. Eberly, George Ochse, Professor Frank X. Moerk, Otto Kraus and Philip Goll, prominent representatives of the retail drug trade

of Philadelphia, accompanied by their wives spent a delightful September day on a trolley tour from Philadelphia to East Texas, Lehigh County, Pa., where a sumptuous dinner was one of the features of the outing.

—ST. LOUISANS, in the drug trade, "vacationed" as follows: J. W. New, Eleventh street and Russell avenue, fished in the Ozarks. J. Cooper, Cora Pharmacy, spent ten days at Monroe, Mich. Lester Stormont, same store, went to Springfield, Mo., on a camping trip. H. C. Kalbfleisch went on a camping trip on the Meramec. E. T. Heidman of the Taylor-Easton Pharmacy, spent a few days near New Haven, Mo. E. H. Graul, Graul-Rudi Pharmacy, made an automobile trip east. O. F. Bausch spent ten days with his invalid wife at Lake Chautauqua, N. Y. Richard Kring and Mrs. Kring, Thirteenth and Lynch streets, took a month's trip to the Pacific Coast. Leo M. Saul, manager Academy Pharmacy, fished in the Ozark mountains. J. Lieberstein, went to Eagle river for fishing. Sidney R. Kieffer, Delmar-Union Pharmacy, went to Cole Camp. Chas. V. Eckert visited Niagara Falls. Herman Guelker, manager for Eckert, went to Fish Lake, Ill. I. O. Goedde went to Murdock Lake, Ill. Otto Kring went to Florida. J. W. Lee and Mrs. Lee, Raymond Place Pharmacy, went to Bunker Hill, Ill. Merrell P. Walbridge, Merrell Drug Co., went to Estes Park, Col. H. S. Merrell spent the summer at Sylvan Beach, Mich. H. S. M., Jr., also went north. Col. Walbridge spent a month at Mudlavia. E. W. Grove, Westminster Pharmacy, toured Yellowstone Park. Sol Boehm, treasurer, St. Louis College of Pharmacy, found recreation at Atlantic City. Otto Baepler, Theresa Pharmacy, went to Sedalia and Concordia, Mo. Emil Bernius, Easton avenue, took a trip on the Gasconade River. C. W. Wall, treasurer of Meyer Bros. Drug Co., and his family were on the coast of Massachusetts. E. J. Habeggar fished near Lebanon, Mo. Carl Meyer took his family to Northern Michigan. A. E. Fohrell was at Eastern resorts. W. W. Urquhart fished in Colorado. Chas. Passmore visited his native State of Ohio. Henry Boardman boated on the streams of Southwest Missouri. H. F. A. Spiker and wife traveled in Colorado. C. E. Cochrane sojourned in beautiful Arcadia Valley with his family.

—R. E. MILLER, manager of the Owl Drug Co., San Francisco, has been appointed a member of the Congressional Committee of the Panama Pacific International Exposition which consists of twelve members from the entire State who have been selected to secure a favorable consideration for California from the congressmen and senators of the United States as a place to hold the proposed exposition. Mr. Miller presents many reasons why San Francisco should be chosen and he is asking his friends in the drug trade to personally see their congressmen and senators and exact from them the promise to vote for that city when the subject comes up for disposition at the next session of Congress.

—J. H. WRIGHT, B. S., Ithaca, N. Y., recently visited his friends in this city and vicinity. His trip also included tours through the laboratories of E. R. Squibb & Sons, Brooklyn, and Merck & Co., Rahway, N. J. Mr. Wright returns shortly to the University of Michigan where he is studying for a higher degree and acting as assistant to Dr. Vaughan, dean of the medical department.

—JAMES W. PEBSE, who has been a representative of the H. K. Mulford Co., of Philadelphia, for some time, has resigned to take the management of the Frank & Barber drug store in East Market street, Wilkes-Barre. He was formerly connected with W. D. White & Co., and has had many years' experience in the drug trade.

—A. N. O'KEEFFE, vice-president and manager of the Southern Drug Manufacturing Co., Jacksonville, Fla., stopped in Baltimore on his way back from Montreal, Canada, where he attended the annual convention of the Knights of Columbus. He renewed acquaintance in the Monumental City with some of the wholesale houses.

—THOMAS W. FAY, in the drug supply business, St. Louis, has been elected chairman of the Democratic City Committee. He was a compromise between the "silk stockings" and the "rough-and-ready" faction. Mr. Fay represented his ward in the House of Delegates, and gained fame as a reformer and as a fighter.

—LOUIS SPENCER LEVY, president of the Perfumer Publishing Co., New York, has returned from a trip through Germany, France and England, in which business and pleasure were [illegible] Samuel S. Mendine accompanied him. Mrs. Moses Kahn of Allentown, Pa., celebrated her 89th birthday anniversary last month. She is still clerking in the drug store of her son, Charles C. Klump, as she has done in the same place for 70 years, doing it more as a labor of love than of necessity. She retains all her faculties to a remarkable degree.

—WILLIAM C. NEILLY, advertising manager of the United Drug Co., and Carl A. Dudley, of Walter Baker & Co., Ltd., chocolate manufacturers, were both elected to membership in the Pilgrim Publicity Association, the organization of advertising men whose purpose is to boom New England.

—WILLIAM H. RICKER, a member of the Executive Committee of the Philadelphia Association of Retail Druggists spent a late summer vacation at Ocean City, N. J. Later in the fall Mr. Ricker will spend a couple of weeks in the wilds of Pennsylvania, in search of big game.

—FRANK KRADWELL of Racine, Wis., a member of the firm controlling the Kradwell drug stores, was chosen as one of the five men who represented the Wisconsin affiliation of the Knights Templar during their recent national encampment at Chicago.

—S. H. CARRAGAN, assistant manager of the New York branch of Parke, Davis & Co., recently spent a portion of his vacation in the Berkshires. More recently he visited with Dr. J. Takamine at Merrinoel Park, Sullivan County, N. Y.

—P. MAGABEY, of Birks Chemists, Adelaide, S. Australia, is combining business and pleasure by spending his honeymoon on a trip around the world. En route he will visit drug stores and laboratories in the large cities to get pointers.

—HAROLD BALBIRNIE, a prominent Philadelphia druggist, had an exciting encounter with a pickpocket while waiting for a night car recently but he pluckily collared his man and turned him over to a policeman.

—EUGENE JOHNSTON, B. S., '09 University of Michigan School of Pharmacy, returned recently from a short vacation spent at his old home in Vermont. Mr. Johnston is a chemist with E. R. Squibb & Sons.

—J. L. BUELL, previously a New England representative of Parke, Davis & Co., has proceeded to the company's headquarters at Detroit where he will assist John C. Spratt as head of the travelling force.

—DANIEL CUBICCOITTI of Philadelphia, was the guest of a number of friends at a banquet in recognition of his having received the degree of Doctor of Pharmacy from Temple University.

—GEORGE W. WEIGLE, a druggist at Twenty-first and Wells streets, Milwaukee, has announced his candidacy for the republican nomination for State Senate in the Fifth district.

—W. H. GANO, one of Philadelphia's best known retail druggists and an enthusiastic motorist, toured more than 8000 miles in the course of the summer just closed.

—CHARLES G. NEELY, well known Philadelphia druggist, accompanied by his daughter, enjoyed an extensive automobile tour to his old home in Adams County, Pa.

—R. L. JUSTICE, treasurer and manager of the Justice Drug Co., Greensboro, N. C., recently visited this city and called on his friends in the jobbing trade.

—J. M. VREELAND, Gibson City, Ill., has sold his drug business to J. A. Dillow and will hereafter devote his attention to his music and automobile trade.

—JOHN MEGRAW of Philadelphia, president of the American Cork and Seal Co., visited Milwaukee and points en route in the interest of his company.

—A. W. FRAME, B. S., '10 University of Michigan School of Pharmacy, recently accepted a position as chemist with Merck & Co., at Rahway, N. J.

—F. W. WEBB, of Jacksonville, Fla., salesman for the Groover-Stewart Drug Co., recently spent his vacation in and around New York City.

—J. CAREY, of the C. W. Whittlesey Co., New Haven, Conn., spent a part of his vacation recently visiting friends in New York City.

—DAVID LOW, of Columbus, O., has been engaged by Eli Lilly & Co. to call on part of the company's retail trade in New York City.

—L. A. HILL, a registered pharmacist of Arcadia, Wis., now has a position in the Priest Pharmacy at Superior, Wis.

—D. H. POLLOCK, of Beloit, Wis., recently purchased a handsome $10,000 residence from Dr. D. R. Connell.

—C. R. COSBY, manager of the New York branch of Eli Lilly & Co., was a recent visitor in Boston.

—A. J. MENGES, Madison, Wis., has been elected president of the board of water commissioners.

United Drug Co. is Now Doing a Business of $3,500,000 Annually.

President Liggett, in Address at Big Meeting of Stockholders, Describes Enormous Growth of Co-operative Enterprise and Tells of Negotiations for Consolidations of the Liggett, Hegeman and Riker Drug Companies.

BOSTON, Sept. 27.—For more than two hours today, President Louis K. Liggett, of the United Drug Co., stood upon the platform in the Boston Arena and told the stockholders of the company, who were there gathered in eighth annual convention, the year's results.

It was an intensely interesting statement, and the members hung upon his words with an eagerness that would not permit a single syllable to escape them. The convention hall was crowded with stockholders and their partners and friends. Probably there were nearly 1000 in the company, who after the formal opening of the convention, which included an invocation by Rev. A. A. Berle of the Shawmut Congregational Church of Boston, and an address of welcome by Mayor John F. Fitzgerald, with a response by Vice-President L. K. Schultz of Denver, gave to President Liggett their undivided attention. He reviewed the growth of the company, told of the volume of business year by year, and the increasing profits and list of stockholders. Then he came down to the particular troubles of the past year, in which he and the United Drug Co., through its allied organizations, were involved in litigation. The hour of adjournment came and went, and still the stockholders appealed to President Liggett to go on and tell the wondrously interesting story of the negotiations with the Liggett Co., the Cobb-Liggett litigations, the conferences with representatives of the Hegeman corporation and the Riker interests for consolidation, and the intricate course through which all came to nought, so far as the Liggett and the United Drug companies were concerned, but which resulted in the formation of the Riker-Hegeman consolidation. Mr. Liggett said the year had been one of unprecedented prosperity for the United Drug Co., yet the year had also brought its share of troubles, but if the same degree of prosperity might be permitted in another year he would not object to a similar amount of trouble and litigation with it. "Since 1905 success has been on our side," he said, "and to a degree beyond the anticipations I believe of any of the 30 or 40 men who met with me at the hotel Brunswick eight years ago, when I laid before them the plan for co-operation in the retail sale of drugs. Through all that period you and I have stuck together. You have been loyal to me and I have tried to be loyal to the trust put in me. During that time the number of stockholders has increased from 30 or 40 to 3516. Through the loyalty and enthusiasm of the stockholders who came in the first two years you have been able to bring in others to the present number. Our difficulty is not now to get new stockholders, it is to dodge the application of those who want to become stockholders, but whom we do not want.

LOUIS K. LIGGETT,
president United Drug Co.

"In 1903 our gross business amounted to $61,677; in 1904 to $324,000; in 1905 to $418,000; in 1906 to $605,000; in 1907 to $1,014,000; in 1908, comprising only 10 months and part of those months a panic year, $913,000; in 1909 $1,389,000 and in 1910 to $2,115,842. These figures do not include the business of the subsidiary companies such as the Ballardvale water or the Liggett Co., for if we added all the business of the allied company the total would be about $7,000,000.

"In 1903 we lost approximately $95.000 in cash; in 1904 we lost $78,000; in 1905 our profits were $28,543; in 1906, $13,139; in 1907, $19,645; in 1908, $109,000; in 1910, $365,000. Next Friday night we shall close the first quarter of the year 1910-11 and we have system enough in our office to know what we are doing and the indications now are that on a basis of last year our business will amount to $3,500,000 and our profits to $550,000.

"What is making such large profits? and what has built the new building? It is confidence, confidence and co-operation. It is the co-operative organization of the leading retail druggists in many cities working with the leading druggists in other cities. It has been done through the confidence placed by you in me. During the year we have been attacked."

During all this time Mr. Liggett had been sticking closely to his manuscript but at this point as he approached the subject of his personal relations to the company's litigation there were calls from the floor for him to tell the story. Mr. Liggett explained that he wanted to tell everything and that he must stick to his prepared statement. Continuing, he explained the financial condition of the company and the critical stage of development which had been reached. The volume of business had reached $2,115,000 which showed an increase over the year before of 52 per cent. All bills and claims against the company, including the cost of erecting the new buildings, had been paid out of the profits. There had also been charged to expense one per cent per month for depreciation. The bad bills for the year amounted to $1826 which was $102 less than in the year before and on a business 52 per cent greater. The advertising expense for the year was $150,000 greater than the year before, the total being $310,000. The increased product, however, had taken care of this item and had shown a profit of $5000. It was intended, he said, to increase the advertising appropriation for the current year to half a million dollars. The new buildings for the year cost $200,000 on which there were neither mortgage liens, nor unpaid bills. The equipment of the perfumery plant, he said, was the finest in this country and finer than anything abroad. The perfumery business had so increased that the building devoted to it which had been occupied less than one year was now too small. Then, discussing the affect of increased business in its financial aspect, he said, that for every $100,000 worth of new business the sum of $40,000 must be permanently invested in the plant of which half would go for stock and labor and the other half to finance the sale of the goods until the stockholders made payment in 45 days for the goods. The great increase in business had come without the moral support of the retail drug business in the metropolitan centers of New York and Boston.

"During the year we have been in litigation with our agents in New York," he said, "and we have no reason to expect any further support for the present. You have all heard a great deal about the ins and outs of the United Drug Co. during this time. I have not believed that the stockholders cared to hear of every case of dissatisfaction that occurs during the year and I have not troubled you with those details. But I am ready now and during the days that we shall be together to tell you fully and honestly all the details of the litigation and the negogiations of the year. If any stockholder has any questions about the company and its officers, I hope he will ask them. I promise him an honest answer.

"You have got in the United Drug Co. the most valuable commercial aspect in America. You don't want to let into it any individual who may be selfish in his desire to stand between you and the company. The company has been brought to its present state through confidence. I ask you for your sakes do not let suspicion come between us. I do not say this because of any lack of confidence in the United Drug Co. You have given me your confidence and during

all the litigation when stockholders were circularized for proxies neither I nor the board of directors asked anyone for his proxy. Many of you know me better than I know myself. You remember me when I came among you ten or twelve years ago to sell goods. You know as I know that there are two parties to a trade. You know that there are two kinds of trades, one honest and one dishonest. You know whether in the years we have been together I have been anything else than honest and loyal to the United Drug Co."

Then taking up the question of the purchase of the retail stores of the United Drug Co. by the Liggett Co., he said that the former company had reached the point where it must, through lack of capital, either abandon its retail stores or call upon its stockholders for additional money. It was decided to sell the stores. He offered the directors to take the stores and to pay therefore $105 a share which would give the United Drug Co. a profit of $75,000 on its investment, while at the same time the United Drug Co. retained a voting control of the Liggett Co., holding 51 per cent of the stock. "I placed myself in the hands of the directors of the United Drug Co. controlled by you, when I did that," said Mr. Liggett.

The litigation with Mr. Cobb, one of the largest stockholders in the United Drug Co., and likewise in the Riker Co., was related in fascinating detail. One of the stockholders said that the story was a liberal education in modern finance.

Liggett Conferences With Riker and Hegeman Men.

From this point onward Mr. Liggett's story concerned the prolonged negotiations with Mr. Cobb of the Riker Co., and with a representative of the Hegeman Co., both of New York, in which the representatives of those two companies at separate times broached the matter of consolidation with the Liggett Co.

Mr. Liggett began at the very beginning of things and told of meetings, conferences, letters, conditions, refusals, and the law-suits. After the offer had been accepted by the directors of the United Drug Co., and Mr. Liggett had secured for the Liggett Co. the chain of retail stores controlled by the United Drug Co., Mr. Liggett said he received a letter from Mr. Cobb, a large stockholder in the United Drug Co., and also a large stockholder in the Riker Co., asking for the terms of the sale. Knowing Mr. Cobb's relations with the Riker Co., I wrote an evasive letter, in which I said that the price paid was above par and that it netted the company a profit. Mr. Cobb then requested an interview, and I met him at the Hotel Imperial. I told him frankly that I did not want to give him the information because I did not believe he was asking for it for the benefit of the United Drug Co.

"I told him I did not believe I was required to give him the information, but that I would consult a lawyer, which as yet I had not done, and that if I was in the wrong I would give the information. I did consult a lawyer and he advised me I was wrong, and I gave Mr. Cobb all the information he asked for. I told him the terms of the sale, what the prospects were and what the object was—to protect the retail drug interests of the company. The United Drug Co., was up against the fine proposition of either financing the retail stores or of financing the manufacturing business. It could not do both.

Would Divide Only With Stockholders.

"At the end of the conference Mr. Cobb said that if the deal was to go through he wanted me to divvy up. My reply was that whatever I divided would be divided equally with every stockholder of the United Drug Co. To do anything else would be to admit that what I had done was not honest. I had paid a fair honest price for the stock and it was a legitimate business transaction. Then Mr. Cobb said I misunderstood him about the divvy, that what he meant was that I should turn back part of the stock into the company, and he finally named 51 per cent as the proper amount in his opinion to be turned back. I offered to do this on one condition that he bring the Riker Co., into line. For a long time [illegible] had had a fair show in New York.

We had an agreement with the Riker Company to take $75,000 worth of goods each year. It was then in the middle of November, and their bill for the year had amounted to about $40,000. They had thrown out Rexall goods. They had omitted the Rexall agreement, particularly in a straw hat season when they had never before handled. I asked him if he could not see that in the Riker stores our goods had an equal display with theirs, and if not, then I felt we should have the agency surrendered by them. Mr. Cobb informed me that if I expected to dictate to the Riker Co. I had made a mistake.

"The result of these conferences was the law-suit to make me surrender the stock of the Liggett Co. The directors called a special meeting of the stockholders to approve the sale of the retail stores. Mr. Cobb was invited to be present with counsel. By an almost unanimous vote the stockholders voted to ratify the sale, and then Mr. Cobb charged the directors with being the minions of Liggett. I want to say, however, that that was not the real Mr. Cobb. Mr. Cobb is a gentleman. Down in my heart I have a fine regard for Mr. Cobb, but unfortunately for Mr. Cobb he has an insane desire for a chain of stores that will dominate this country.

Won't Let Minority Dictate to Majority.

"Mr. Cobb investigated the accounts of the company. I do not know what he found, but I rather feel that if he had found anything that was not all right we would have heard from him on it. While I am president of the company there is one thing that I will not do. I will not allow a minority to dictate to a majority of the stockholders.

"As a result of these conferences three things became known. One was that the U.D.C. was the strongest rival of the Riker Co., and that no other company than the Riker and Hegeman companies could do any such manufacturing business. He recognized the serious kind of competition that threatened, and he undertook to prevent the financing of the Liggett stores. It seemed to be the policy to destroy confidence in Liggett and then he could prevent the financing of the stores. From the day of the instituting of the litigation not a move has been made to float the Liggett notes. The stores are the same today as when I bought them, except that they are much stronger.

"In the spring of 1909 I entertained the vice-president and the treasurer of the Hegeman Co. in Boston. We discussed consolidation, although I did not bring up the question. We discussed the whole question freely. The Hegeman people advised me to go ahead and arrange a consolidation, but I declined to do so while any suits were pending and I did not have a clean bill of health.

"Four months later I met Mr. Cobb again. He promised to quit the suits if I would give up 51 per cent of the Liggett Co. stock. I said that was all right, but if I gave up that what would he give up? He said he would stop the suits! I asked him if he was willing to clean up the Riker Co., and he said that that was a matter for the Riker Co. to settle, and not I. Then he proposed to stop all suits provided I would pay all the legal bills both of the U.D.C. and his and my own. I referred him and his lawyer to my lawyer and nothing more was heard of that.

Terms for a Liggett-Riker-Hegeman Consolidation.

"But the question of consolidation again came up with Mr. Cobb, and this time the question was on consolidating the Riker, the Hegeman and the Liggett companies. Mr. Cobb said he did not think it could be brought about. All the time I had the Hegeman contracts in my pocket. I told him I believe it could be done, and he asked the terms. I named three conditions: That the U.D.C. should do all the manufacturing for the new company on a 10 per cent profit basis; that the goods of the U.D.C. should have equal representation and treatment; that the new company should protect the agents of the U.D.C. and should not compete with a Rexall store nor adopt a policy of forcing a Rexall agent to sell. Any company that will do business on those terms can have the Liggett company any time it wants it.

"Mr. Cobb agreed to the proposition. He asked what the U.D.C. would give for the sake of getting a million dollar's worth of new business, and I offered an amount of common stock equal to the profit on the new business. The next morning I told Mr. Cobb that if he could get the Riker Co. to go into the combination the deal could be put through.

"I did not question his honesty or his desire for consolidation. I went to New York and met the representatives of the Hegeman and Riker companies. I told them in the presence of each other everything that I had told either one of them, and then asked if there was anything or promise that had been made to one that was not made to both. The conditions seemed agreeable. Apparently the negotiations had come to a satisfactory conclusion. We were to meet the next morn-

ing, and when that time came Mr. Cobb said he could not get his company to see things in the light that we did, and within a week his company had repudiated every agreement. The outcome of the negotiations was that the Riker and Hegeman companies consolidated."

Largest Convention in U.D.C.'s History.

The convention of the U.D.C. was the largest in its history. An attendance of 1500 was registered. The program was the most elaborate. Automobile and trolley rides for the ladies were planned for each day, and on the second afternoon everybody went to Riverside park where there was a clambake and an aerial ascension by Charles F. Willard in a Curtiss biplane. Thursday evening the annual banquet will be held in the arena, with the lieutenant governor among the speakers.

What Some Folks Are Doing.

—MRS. ANNIE HINZ, wife of Richard C. Hinz, a well known druggist of Milwaukee, is one of the few women of that city who took out a hunting license before the opening of the duck season. Mrs. Hinz, each year on Sept. 1, shoulders her Winchester and travels to Fox Lake where ducks abound. "She shoots better than I do," said Mr. Hinz. "When ducks are not too far away, she is almost sure of her bird every shot."

—SAMUEL B. DAVIS, Otto Kraus and Charles Rehfuss, prominently identified with the retail drug trade of Philadelphia, accompanied by their wives, were members of a jolly party which enjoyed several days of house-boat life at Beach Haven, N. J.

—BERNARD COLLE, 1470 Second avenue, New York, on his return from Montreal where he attended the Eucharistic Congress, announced his engagement to a young lady he met while in that city, and is now receiving the congratulations of his friends.

—ALLOYS GRIMM, proprietor of a drug store at Cassville, Wis., narrowly escaped being seriously burned recently when some chemicals, with which he was working, exploded.

—T. P. TAYLOR, Sr., president of T. P. Taylor & Co., was recently elected as a member of the Louisville Automobile Club. Mr. Taylor has a handsome Stearns demi-tonneau.

—DR. JOHN H. HAMMOND, a prominent druggist and physician of Georgetown, Del., is a strong candidate for the Legislature of that State.

—DRUGGIST O'QUINN, prominent in the retail business of Mayo, Fla., was in this city recently making purchases for next season's trade.

Matrimonial Notes.

—DR. JOHN C. FALK, vice-president of the St. Louis College of Pharmacy and a well-known physician of St. Louis, Mo., was married on Sept. 8 to Miss Ida Curtman, youngest daughter of the late Prof. Chas. O. Curtman who, until his death in 1896, was well known in German scientific circles and the author of several text-books on chemistry. Early in October on their return from a wedding trip to the East they will be at home to their friends at 4568 Page avenue, St. Louis.

—CHARLES PASSMORE, salesman for Meyer Bros. Drug Co., St. Louis, and Miss Bertha Knobtock of Hamburg, Germany, were married at the Marion Hotel, Little Rock, Ark., recently after a romance which began during the World's Fair when Miss Knobtock was a visitor from Germany. She came from Germany for the marriage.

St. Louis Drug Clerk Bride of a Japanese.

Miss Freda Gast, who was until recently a clerk in a wholesale drug house in St. Louis, went to Springfield, Ill., and became the bride of Yukinube Yamamoto, a concessionaire at Delmar Garden in St. Louis. The Japanese went to St. Louis for the World's Fair in 1904. After the fair he bought several concessions at summer gardens.

Falls Dead While Planning His Wedding.

STEUBENVILLE, Sept. 20.—While in the parlor of his fiancee, Miss Bessie Black, recently, Ford Laughlin, a prominent young druggist, fell dead from neuralgia of the heart. The couple were discussing sending out invitations for their wedding.

PROMINENT GERMAN PHARMACIST RESTING.

Otto Frohwein, 91st street and Third avenue, Manhattan Borough, on the porch of the mansion of Dr. A. R. Starr, M.D., D.D.S., at Norwalk, Conn., enjoying a warm weather respite. He is a prominent and active member of the New York German Apothecaries' Society and New York Ph.A.

Oppose Health Board Innovation.

New York City Druggists Object to Change in Sanitary Code Which Restricts Sale of Preparations Containing Morphine, Etc.—Will Confer With Commissioner Lederle.

REPRESENTATIVES of the various pharmaceutical organizations of Greater New York assembled recently at the College of Pharmacy of the City of New York to discuss and act upon article 182 of the Sanitary Code of the Department of Health, which has been amended so as to include morphine and salts of morphine. The section now reads:

> No cocaine or salt of cocaine and no morphine or salt of morphine, either alone or in combination with other substances, shall be sold at retail by any person in the City of New York, except upon the prescription of a physician.

The consensus of opinion was that if the section applied only to the direct sale of morphine or salt of morphine as such, it would be a good and desirable measure, but that it bars the sale, except on prescription, of such well known preparations as paregoric, syrup of white pine comp., brown mixture, Dover powder, Tully's powder, etc., was considered ill-judged and unnecessary, to say the least.

Among the speakers against the section as amended were Dr. Joseph Weinstein, representing the N.Y.R.D.A., Dr. William C. Anderson, dean of the Brooklyn College of Pharmacy, and Dr. William Muir, of the New York Board of Pharmacy. They touched on the hearty endorsement by pharmacists of the carbolic clause inaugurated by Dr. Darlington, ex-Commissioner of Health; the too sweeping conditions of the section under discussion; the benefits derived from the various household remedies now to be sold only on prescription and compared these benefits with the dire results of the unrestricted sale of whisky; the unrestricted sale of codeine and heroin, and the ineffectiveness of the section because of the unrestricted sale of the preparations legislated against in Yonkers, New Jersey towns, and other nearby territory.

It was said to be understood that the Department of Health would like to include alcohol in section 182. On the other hand, some of the pharmacists present at the meeting were of the opinion that the department regarded the inclusion of morphine and morphine salts as an experiment to gather the general opinion on such a move and that the section would be amended as need be.

The following committee was appointed by Dr. Muir, temporary chairman; Dr. William C. Anderson, representing the Kings County Pharmaceutical Society; Peter Diamond, New York Retail Druggists' Association; Jacob Diner, Metropolitan Association of Retail Druggists; S. V. B. Swann, German Apothecaries' Society; M. S. Cohn, Brooklyn Pharmaceutical Association; A. F. Myhr, Brooklyn Retail Druggists' Protective Association; Vito Calcagno, Italian Pharmaceutical Association, and Thomas Latham, Manhat-

tan Pharmaceutical Association. The committee was instructed to draft resolutions expressing the position of New York pharmacists towards the section and to confer with the Department of Health. This duty was turned over to a sub-committee consisting of Peter Diamond, Thomas Latham and Dr. Anderson, which prepared the following resolutions.

Whereas, The amendment to section 182 of the Sanitary Code prohibits the sale of cocaine or salts of cocaine and of morphine or salts of morphine, either alone or in combination with other substances, thus affecting the sale of numerous useful household remedies; and

Whereas, such prohibition will interfere with the immediate administration of useful and necessary remedies in cases of slight ailment and distress; and

Whereas, the intent of the amendment is to prevent the sale of habit-forming drugs, and which intent the druggists of this city heartily indorse; and

Whereas, this can be best accomplished by the enactment of a state law; and

Whereas, it is our aim, as our past activity in legislation will convincingly prove, to administer pharmacy in a manner that will best conserve the interest of the people; and

Whereas, the sale of cocaine and salts of cocaine is already regulated by a state law, now, therefore be it

Resolved, That we, the pharmacists of the City of New York, request the Health Department of said city to modify the amendment to section 182 of the Sanitary Code, enacted by them on August 26, 1910, so as to read:

> "No morphine or salts of morphine, either alone or in combination with other substances, shall be sold by any person in the City of New York, except upon the prescription of a duly registered physician, dentist or veterinary surgeon, or by wholesale drug dealers and manufacturers to retail druggists actively engaged in the drug business, provided that nothing in this section shall prohibit the sale by a licensed pharmacist of any U.S.P. or N.F. preparation."

Second Conference Decides to Await Lederle's Return.

At a second conference held at the College of Pharmacy, the chairman, Dr. William Muir, called for objections to the resolutions previously adopted. Objections were not forthcoming and the meeting took the form of an argument as to whether counsel should be retained at once to fight cases brought against New York City pharmacists charged with selling U.S.P. and N.F. preparations containing morphine or salt of morphine, or whether the recovery of Dr. Lederle from lumbago should be awaited. Dr. Lederle up to the time of meeting had been absent from the city for a week or more, but had promised the pharmacists a hearing immediately upon his return. Meanwhile the inspectors, under the instruction, it was said, of Dr. Bensal, have been collecting samples of preparations affected by article 182 of the Sanitary Code. Several of those present reassured the others by asserting that when phenacetin was "on the carpet," 400 samples were collected by the inspectors, but not one arrest made.

Dr. Muir was of the opinion that if the sale of U.S.P. and N.F. preparations containing morphine or its salt was to be restricted, the enforcement should be by State law and not by local ordinance. Several present favored securing an injunction against the enforcement of the ordinance, but the fact that New York pharmacists approve of the restriction of morphine and salt of morphine sales and object only to that part of the article applying to U.S.P. and N.F. preparations brought up a legal situation that phased its advocates and no action was taken. The remark by Dr. Muir that the Kings County Ph.S. would defend the first three cases brought against its members, caused Peter Diamond to demand that the defense should come from the pharmacists of Greater New York as a whole and should not be sectional. It developed that only two representatives present were prepared to pledge their association's financial support to retain joint counsel, and that the consensus of opinion was to meet Dr. Lederle half way and not become so aggressive as to prejudice the case. Dr. Anderson expressed this sentiment by stating that the conference should be diplomatic [illegible]

Mr. Diamond inquired what the sentiment of the conference was relative to abiding by the ordinance. He said that many of the retail druggists looked to the conference for instructions. Dr. Anderson said he intended to follow the ordinance to the letter, adding: "Not to do so would be [illegible] Others agreed with him.

Associations represented at this conference for which delegates did not appear at the previous one, were the A.D.S. Association of the State of New York and the National Pharmaceutical Society. A near-association was represented by Henry Berger, of the Bronx, who asserted that the druggists of that borough were organizing with the immediate purpose of taking some action relative to the new ordinance. The N.P.S. according to its representative, G. Kobreck, were recently granted an audience with Dr. Lederle but due to his illness had to content themselves with the assurance by his secretary that no action would be taken by the Board of Health until the commissioner's return.

Another meeting will be called after Dr. Lederle has recovered and the committee has discussed the ordinance with him. Meanwhile, each pharmacist will interpret the ordinance as he sees fit.

FAKE "CURES" SOLD AT DRUGGISTS' PERIL.

New York City Health Board Rules Against Drug Adulteration or Misbranding—No Guaranty Clause.

The New York City Board of Health recently adopted an ordinance prohibiting the manufacture, production, sale or offering for sale in this city of adulterated or misbranded drugs. The new regulation is in the form of an amendment to section 69 of the sanitary code and will be included in a revised edition of the code which will be shortly forthcoming.

The regulation is similar to the Federal law except that the manufacturers' guaranty clause is omitted and the responsibility for adulteration or misbranding falls directly upon the retailer. This action has been taken, it is understood, for two reasons, namely, the board has not the time nor the requisite appropriations to analyze every preparation that enters the city, an it wishes to prevent the retail sale of "consumption cures," "cure-alls," and other preparations for which ridiculous and extravagant claims are made.

Kings Co. Ph. S. Will Fight Cases For Members.

The September meeting of the Kings County Pharmaceutical Society was devoted to the discussion of amended article 182 of the Sanitary Code of the Board of Health of New York City. The members while in favor of the restriction of the sale of habit-forming drugs, strenuously objected to a physician's prescription being required for every sale of paregoric or other household remedy. This they considered an injustice to the public as well as the pharmacist and it was voted that the society defend members charged with dispensing U.S.P. or N.F. preparations containing morphine or salt of morphine. This resolution does not apply to the sale of morphine or salt of morphine as such, the members being unanimous in the opinion that such transactions should be restricted. One speaker asserted that members should be careful to comply with the ordinance as the board intended to strictly enforce it. He also said that the board was busy day and night making regulations for pharmacists and that it was about time the pharmacists "got busy" and were represented before that body.

Brooklyn Protective Ass'n Objects To New Ordinance.

At the September meeting of the Brooklyn Protective Association held at the Kaiser Haus, it was unanimously decided to support the association's representatives, A. F. Myhr and S. L. Neier, in such action as they might take in conjunction with the Sanitary Code conference at the New York College of Pharmacy. It was voted that the organization bear its pro rata share of any expense incurred by the conference in its protest against the Board of Health. Considerable discussion arose as to the protection of clerks prosecuted for violating the new ordinance, and it was decided that members should be defended against what was considered by some to be persecution by the board. At a future meeting, the subject for consideration will be the custom of manufacturing houses of supplying physicians with pills, etc.

Druggist-Banker Makes Fine Exhibit.

ST. LOUIS, Sept. 20.—At the Industrial Show in the Coliseum held by the North St. Louis Business Men's Association, one of the largest and most complete displays among the exhibits was that of Alf W. Pauley, druggist and banker, with stores at Grand avenue and Herbert street and at Fourteenth and Madison streets.

Turn right now to page 959 of this issue. You surely should know this.

P.A.R.D. ADOPTS INDEMNITY INSURANCE PLAN.

Will Expel Members Unlawfully Selling Morphine or Cocaine—Will Throw Out Infant Cordials.

PHILADELPHIA, Sept. 20.—The feature of the September meeting of the Philadelphia Assc. of Retail Druggists was the debate on a resolution which took exception to the action of certain members of the association who had formed the Philadelphia County Association of Retail Druggists and elected one delegate to represent them at the convention of the N.A.R.D. at Pittsburg. The resolution held that such a course was likely to discredit the action of the P.A.R.D., which early this year withdrew from the national organization and that the similarity in the names of the two organizations would cause confusion, but later the motion was withdrawn.

Frank W. Fluck called the attention to an editorial in a newspaper commending the P.A.R.D., for its declaration on the question of discouraging the sale and use of so-called "soothing syrups." He declared that now it was up to the individual members to throw out these infant cordials which he said was really the vital part of this crusade. A motion to this effect was unanimously carried. D. J. Reese, chairman of the Telephone Committee made a report of exceptional interest, showing how members of the association were receiving larger commissions from their telephones than those who were not affiliated with the association. He urged the members to watch free calls and make note of every instance where employes of large corporations by an arrangement with the telephone company, were permitted to get the party they desired without dropping a coin in the box. He said that while this was in itself a small matter, this practice seemed to be on the increase and that if the druggists were not on their guard, in the aggregate it would mean the loss of a considerable sum in their commissions annually. He asked that he be notified when such free calls were made as it should be the stand of the P.A.R.D. that its members be entitled to a commission on each call whether or not there was a coin dropped in the box. An appropriation was made to the entertainment committee which has several plans under consideration. D. E. Bransome discussed the plaster situation and the malt extract conditions in Philadelphia and also had something to say on the chain store bugaboo. In his opinion, Philadelphia is not seriously threatened by an invasion of this menace to the small proprietor.

The late JOHN F. W. MEYER, of Fort Wayne, Ind.

An additional incentive to join the organization was created at the August meeting of the association when a proposition to provide indemnity insurance for retail drug stores was adopted. This action followed the recommendation of a special committee of which David J. Reese was chairman and permits of members only securing this form of insurance against liability for damages through errors which might occur in their stores, to the amount of $5000 at a saving to the member of more than his annual dues of $8.00. The issue promises to be a very attractive one.

Another feature was the adoption of a series of resolutions endorsing the stand of the city's Department of Public Health and Charities against the indiscriminate use and sale of soothing syrups and so-called "comforters" which contain habit-forming drugs. The resolutions called upon the members to co-operate in discouraging the sale of such medicines for children except when ordered by a physician's prescription.

This action followed addresses by Dr. S. W. Newmayer of the Department of Health and Charities and Christopher Koch, vice-president of the Pennsylvania Pharmaceutical Examining Board.

Changes in the by-laws which were adopted permit of the immediate expulsion of a member who is convicted of selling morphine or cocaine illegally. The association's affairs are in the best condition in its history.

PIONEER DRUGGIST HELPED FOUND BIG HOUSE.

J. F. W. Meyer, Who Had a Notable Career Both in Retail and Wholesale Drug Trade, is Dead, Aged 85.

ST. LOUIS, Sept. 20.—John Frederick William Meyer, who died Sept. 6, at Fort Wayne, Ind., was one of the founders of the great Meyer Brothers Drug Co., which has become famous throughout the world and has helped to advertise St. Louis. He was born Dec. 19, 1824, at the village of Haddem, Westphalia, in the kingdom of Prussia. His parents were Johann Heinrich and Louise Margaretha (nee Holt). His father was a farmer and raiser of live stock. His father died when William was nine years old and his mother when he was 23. His Christian name was Johann or John but he always went by the name of Wilhelm or William.

Soon after the death of his mother in 1847 William and a younger brother Frederick came to America, where a sister had come eight years before. They left Bremen on the sailing vessel Swanton and after seven weeks and three days arrived at New Orleans. They went by boat to Cincinnati, arriving there Dec. 1. They took a canal boat for Fort Wayne, in the vicinity of which their sister lived, but the boat became icebound and the brothers had to walk two days and a night, carrying little effects and thin purses, to their destination, where they assisted their brother-in-law in clearing land and doing other pioneer work. In March William went to Fort Wayne and became driver of a canal boat. Two years later he went into a drug store owned by H. B. Reed as porter and general do-whatever-is-handy. His brother Frederick also held a position with the same firm. In 1857 Mr. Meyer became a partner with his brother Frederick or C. F. G. Meyer, in the retail drug business, in which the latter had been established since 1852. The style of the firm was Meyer & Brother. They prospered, and drifted into the jobbing business. In 1865 they took in F. F. A. Fischer and E. P. Williams as partners and started jobbing exclusively, C. F. G. Meyer and Mr. Fischer going to St. Louis while J. F. W. Meyer and E. P. Williams remained at Fort Wayne, both houses being carried on under the name of Meyer Brothers & Co. Some years ago the retail business in Fort Wayne was entirely divorced from the western interests of the firm and was incorporated as Meyer Bros. & Co., admitting as stockholders many of the men who had long been with the firm as employes. Mr. Meyer was elected president of the company, and the business has grown to such an extent that the company is now operating four handsome retail drug stores in Fort Wayne.

Mr. Meyer married in May 23, 1851, Miss Caroline Schroeder. There were four children by this union, three sons and one daughter, of whom three are living. Mrs. G. J. Burkhardt of Boston, and two sons, married, Frederick G. Meyer of New York City and Wm. L. Meyer of St. Louis. On May 22, 1860, Mr. Meyer married his present wife, Miss Julia Gerke, born and raised in territory now a part of Fort Wayne. There were five children as the result of this union, four living, three daughters and one son. These are all married, and the son George T. Meyer has had charge of the legal department of Meyer Brothers Drug Co. for a number of years.

One close to him in St. Louis described him as a man whose life had been a monument of character morally and religiously. He was generally looked up to as a high class of American citizen and was most highly esteemed. He was actively identified with the German Evangelical Lutheran Church. He was an alderman and a commissioner of waterworks in his Indiana home.

Death Ends Long Partnership of Brothers.

Wayne L. Straight, one of the leading druggists of St. Paul, died recently of typhoid fever complicated with pleuropneumonia, after an illness of six weeks. Practically every

member of the profession in the city attended the funeral, for he was a universal favorite. He and his brother, Clair A., had been in partnership for 20 years, owning two drug stores. Mr. Straight was 40 years of age and unmarried. A pathetic feature of the premature close of this useful life is the fact that the Straight brothers had always lived with their parents, who, in their old age, feel their bereavement most keenly.

DR. C. H. SHAW LOSES LIFE ON RESEARCH TRIP.

Drowned While Camping With His Family and Party of Scientists and Students in British Columbia.

PHILADELPHIA, Sept. 20.—News has reached here of the death by drowning of Dr. Charles H. Shaw, assistant professor of biology at the University of Pennsylvania, at Kinbasket Lake, near Ravelstoke, British Columbia. Dr. Shaw, with his wife, two children and a party of scientists and students, about 30 in all, were camping in Canada, as was his yearly custom, and was engaged in botanical research work in that section.

Dr. Shaw formerly occupied the chair of biology in the Department of Pharmacy of the Medico-Chirurgical College of this city. He had occupied the same office at Temple University and at Ursinus College and for several years, he headed a party of explorers and scientists which spent the summers in remote sections of Canada and the west. These expeditions were financed partly by the Government and partly by various institutions which received the benefit of this research. He was about 38 years of age.

Medicine Manufacturer Kills His Rival.

CHICAGO, Sept. 20.—Long-standing business rivalry between two men was brought to a climax last week when Dr. James M. Rainey, a patent medicine manufacturer, shot and killed Louen V. Atkins, president of the Dr. Rainey Medicine Co., in his office, 154 Lake street. Dr. Rainey was arrested. Atkins died while being carried to the operating table in a hospital.

Atkins and Rainey were formerly business partners in the Dr. Rainey Medicine Co. About a month ago, after much dissension, Atkins secured control of the stock of the company, and Dr. Rainey resigned his office as secretary and quit the concern. On the floor below the Dr. Rainey Medicine Co., Dr. Rainey started to manufacture similar medicines under the name of Dr. James M. Rainey, Inc. In this way the mail to the two concerns got mixed.

It was this trouble over the mail, Dr. Rainey told the police, that caused him to go to Atkins' office. An argument resulted, in which Atkins, Dr. Rainey declares, reached for a revolver.

"It was a case of my life or his, and I was the quicker," said Dr. Rainey. "When he reached for his revolver, which I knew he had in his desk drawer, I drew my pistol and fired."

Daughter's Tragic Death Enlists Sympathy.

PHILADELPHIA, Sept. 20.—Wide sympathy is felt for Clayton F. Shoemaker, head of Shoemaker & Busch, on account of the sudden death of his daughter, Miss Jane Cushing Shoemaker. While bathing with friends she was overcome by the undertow in the surf and a resulting attack of heart disease proved fatal. Miss Shoemaker was 26 years of age and was exceptionally accomplished. She was a graduate of the Girls' High School and of Bryn Mawr College.

Protracted Headache Cause of Suicide.

LOUISVILLE, Ky., Sept. 20.—Dressing and leaving a sick bed where he had been confined with a nervous headache for nearly three weeks, August Wallner, aged 47, committed suicide recently by taking a large dose of morphine. He was a clerk in the store of Peter H. Wallner, a brother, at Jefferson and Wenzel streets.

Obituary Notes.

—JAMES GOOD, 939 N. Front street, Philadelphia, died recently at the ripe age of 82. He was first engaged in the manufacture of medicinal soaps and devoted his entire life to the development of that trade. He was a member of the Philadelphia Drug Exchange and of the Trades League. In early life he took part in Masonic activities. Five sons and five daughters survive. The hours in announcing the death of their father, thank the many life-long friends for their years of kind interest and patronage and state that the business will be carried on by the estate under the same managements as heretofore.

—FREDERICK AUGUSTUS GENTH, Jr., professor of mineralogy and assaying in the Medico-Chirurgical College, Philadelphia, and widely known as an expert chemist died on Sept. 2, at his home in Lansdowne. He was 55. For several years he was the chemist for the Pennsylvania Pharmaceutical Examining Board and for the Pennsylvania Dairy and Pure Food Department.

—JAMES P. REYMOND, until a short time ago manager of the Kansas City Branch of Parke, Davis & Co., died recently in Detroit. He first represented Parke, Davis & Co. in New England and devoted the best years of his life to the company. He was a charter member of the Kansas City Paint, Oil, Varnish and Drug Club.

—HERMANN KREHBIEL who conducted a pharmacy at Madison avenue and 87th street, New York City, died recently. He was licensed to practice pharmacy by the first board in the State. He leaves three daughters and two sons.

—GEORGE N. STODDARD, who was in the drug business for several years in Buffalo, died recently at his home at Wilson, N. Y. For some time he also was a manufacturer of proprietary mediicnes.

—DR. TOBIAS L. LOUGARDE, prominent New Orleans physician and druggist, is dead. He was born in France 72 years ago. A widow, three sons and a daughter survive.

—A. R. FORBES, widely known Colorado druggist, owner of stores at Denver, Leadville and other places, is dead, aged 68, of apoplexy. A widow and daughter survive him.

—FREDERICK LEONARD KRAMER, Baltimore, is dead, aged 47, leaving a widow and three daughters. He was a graduate of Maryland C.P., and was an artist as well as druggist.

—MAX SCHNEIDER, aged 54, of Brooklyn, N. Y., recently ended his life with cyanide of potassium, following failure in business. A widow and daughter survive.

—RUDOLPH H. LANE, aged 65, is dead in Minneapolis, leaving a widow and daughter. He was a Knight Templar.

—JOS. ROBB, Jr., secretary of the H. B. Gilpin Co., Baltimore, died recently at Saranac Lake of consumption.

—GEO. BEBG, Dale, Wiss., is dead, aged 55, of pneumonia. He was prominent in the Wisconsin State Ph.A.

—A. J. KUPKA, Chelsea, Io., is dead as the result of injuries sustained in an automobile accident.

—E. HARRY CLEGG, Gloucester, Mass., died Sept. 14 of cancer of the stomach. He was 55 years.

—A. J. HUMPHREY, for 35 years a leading druggist of La Crosse, Wis., is dead, aged 79.

—C. E. ROSE, Holton, Ks., leaves a widow and four children.

—JOHN N. LAUDENSLAGER, Macungie, Pa., is dead, aged 35.

—M. H. GLENN, Wichita, Ks., died recently. He was 65.

—WM. E. POTTS, North Dayton, O., passed away recently.

—CHAS. RENTSCHLER, Jr., Reading, Pa., is dead, aged 47.

—CHAS. GREEN, Brookfield, Mo., died recently, aged 42.

—ROBT. WORKMAN, of Seattle, died recently in Tacoma.

—J. B. SHACKELFORD, 45, is dead at Columbus, Ga.

—WALTER H. WOODWARD, of Denver, Col., is dead.

—THOS. S. HODGES, of Sevierville, Tenn., is dead.

Druggists Fighting Anti-Liquor Ordinance.

MILWAUKEE, Sept. 20.—The Milwaukee Druggists' Association is waging an active campaign against an ordinance which the retail liquor men are attempting to get through the city council, which prohibits drug stores from selling liquor except on a physician's prescription.

Improvements in People's Drug Store.

People's Drug Store at Black River Falls, Wis., has been undergoing many improvements. The entire interior has been redecorated and rearranged and now presents a very attractive appearance.

Rubberset Co. Suffers Fire Loss.

Fire recently destroyed one set of the buildings of the Rubberset Co., Newark, N. J., but the plant was soon again running at its normal capacity of production.

Every druggist in the United States ought to read page 949 of this issue.

A.D.S. Members to Fight Chains.

New Yorkers Form An Association—Manager Goddard In Telling of Experimental Store Outlines Ideas of Good Service—Legislation to Curb "Trusts."

At a meeting of New York members of the American Druggists' Syndicate held recently at Teutonia Assembly Hall, this city, the "A.D.S. Association of the State of New York" was organized to better combat or compete with the chain stores. Peter Diamond was elected president and W. A. Guthrie, 92 Eighth avenue, temporary secretary. It is Mr. Diamond's plan to divide the city into small sections of ten stores each. A committeeman will be responsible for each section and Mr. Diamond figures that with this arrangement every pharmacist in the city can be communicated with inside of one-half hour. The organization includes the entire State because it is thought it will thus be easier to secure legislation than through a purely local association. It has not yet been decided whether members outside the city will be organized as branches or independent local associations. In fact, nothing definite in this direction has been arranged as yet.

The meeting was opened by secretary C. H. Goddard who stated that the members were assembled to present their ideas on the best way to compete with the Riker-Hegeman chain of drug stores. Incidental to mentioning the merger of the Riker and Hegeman interests, Mr. Goddard said he understood that the Hegeman management, the stronger of the two, would eventually be eliminated, which was a good thing for the retail pharmacist. Mr. Goddard's scheme to meet "chain" competition was the establishment of an "A.D.S. Drug Store Service Department" which would at a minimum cost dress the windows of members and perform other services which could be expected to attract trade. If enough members were in favor of the idea an expert window dresser would be secured and Mr. Goddard mentioned such a man in the employ of Hegeman & Co., who might see fit to undertake this work.

Mr. Goddard referred often to his experiment at 70th street and Broadway and outlined his idea of good service. He said that everyone from the manager down wore white coats and that he even contemplated having the employees wear white caps; every doctor in the vicinity had been visited and interviewed with the object of getting him interested in the store; people in the neighborhood had been sent letters elaborating on the store's service, etc., etc. Mr. Goddard condemned the slovenly practices which he said were the custom in some stores in New York City and his remarks to this effect aroused one member to say that "white coats were all right at 70th street and Broadway, where Tuxedos wouldn't be out of place," but that his trade wanted to see him in his shirt sleeves or they wouldn't think he was "on the job."

On account of the "kicks" made by nearby druggists, Mr. Goddard said that the store he had been interested in at 2d avenue and 70th street was closed some time ago. The store, a failure, was bought for $350 and business continued under the firm name of Pond, Bowes & Cartwright. Sales were run up from $1.50 and $2.50 to $10 per day. The rent was $40 per month. The remaining stock was moved to the Broadway store.

Mr. Diamond spoke in favor of legislation as the only direct way to fight the "trust." He didn't believe that the State assemblymen would ignore 95 per cent of all their constituents and advanced the gigantic petition which he proposed that every man and woman in the State should sign. "Secretary Goddard's plan," he said, "might also be followed." When Mr. Diamond had concluded, Mr. Goddard asserted that such a petition as the speaker had proposed would require a more perfect organization than he ever expected the A.D.S. to be.

Dr. William Muir, of the New York Board of Pharmacy, said that the members needed a central buying department where they could get everything from corks up and asserted that from his own experience he found that every $10 put into advertising brought back $25.

(Continued on Page 1010.)

If you haven't read page 949 of this issue of The Era, do it now.

Dr. Diekman Elected President.

New N. Y. State Board of Pharmacy Organizes—Rules Adopted to be Submitted to the Regents—Examination Dates Unchanged—No more at Syracuse.

Albany, Sept. 28.—Under the law passed last winter reducing the State Board of Pharmacy from 15 to nine the State Board of Regents held a meeting last Thursday and made the following appointments as the new board:

For a term of three years: Clarence O. Bigelow, New York City; George C. Diekman, New York City; Byron M. Hyde, Rochester.

For two years: Judson B. Todd, Ithaca; Alfred B. Huested, Albany; George Reimann, Buffalo.

For one year: Otto Raubenheimer, New York City; John Hurley, Little Falls; J. Leon Lascoff, New York City.

Messrs. Bigelow, Diekman, Hyde, Reimann, Todd, and Hurley were members of the old board, and all of the appointees, except Mr. Raubenheimer, were on the list of 25 names submitted by the New York State Pharmaceutical Association.

Mr. Raubenheimer is the only resident of the Brooklyn part of New York City on the new board. He is a member of the Kings County Ph.S., of the American Ph.A. It is a curious fact that in the balloting at the New York Ph.A. meeting at Saratoga Mr. Raubenheimer received 36 votes and would have been No. 29 on the list had the names not been limited to 25. The 25th man received only four votes more than Mr. Raubenheimer. The remainder of New York City has three representatives on the new board. The Regents revoked the license of Dr. Hugo Schmidt, of Buffalo, on the recommendation of a committee of the State Board of Medical Examiners. Schmidt was charged by the Erie County Medical Society with issuing prescriptions for the traffic in cocaine with the intent of evading the law.

At a meeting of the new board held today Dr. Diekman, was elected president; Mr. Hyde, vice-president, and Warren L. Bradt, Albany, secretary. Three committees on violations and prosecutions consisting of three members each, were appointed by President Diekman, the New York City committee consisting of Messrs. Raubenheimer, Lascoff and Bigelow. The board will grant hearings on the first Wednesday of each month.

Rules and regulations were adopted to be submitted for approval to the Board of Regents. Schedule of examinations for license to practice pharmacy will remain as previously drawn up except that examinations will no longer be held at Syracuse. The next examination will be held Jan. 31 to Feb. 3, 1911. The paragraph in the present regulations relating to prescriptions of opium, morphine and chloral, will be adopted practically as it now stands.

Protest From Brooklyn Against Dr. Diekman.

Thos. Lamb, secretary of the Brooklyn R.D.A., recently sent a telegram to the Regents protesting against Dr. Diekman's selection. The association had met and objected to Dr. Diekman as not having practiced pharmacy for ten years and being a professor in a college which prepared students for examination. It was decided to employ counsel to unseat the doctor.

Mr. Lamb based his real objection, however, on the fact that Dr. Diekman had been a member of the old board and the consensus of opinion of the members was that their fight against the old board availed nothing if such a prominent member of that body should be reappointed on the new board, after being legislated out of office.

Charles F. Kramer on Pennsylvania Board.

Harrisburg, Pa., Sept. 20.—Governor Stuart has appointed Charles F. Kramer of this city, a member of the Pennsylvania Pharmaceutical Examining Board to succeed Dr. Chas. T. George of this city whose term expired in July. Dr. George was a member of the board for more than a score of years and was not a candidate for reappointment.

The new member was graduated from the Philadelphia College of Pharmacy in 1882 and after spending ten years in the drug store of Henry C. Blair of Philadelphia, entered business here. At the 1910 meeting of the Pennsylvania Ph.A., Mr. Kramer was the unanimous choice for second vice-president. He is president of the Dauphin County Ph.A. and is a member of the A.Ph.A.

The Greatest and Most Far Reaching Post Card Campaign Ever Inaugurated

A Prediction: New Thought Aphorisms Judiciously taught the rising generation of both sexes will secure for Woman the right of Equal Suffrage in every State of the Union not later than 1916

30 SUBJECTS NEW AND ORIGINAL

ENDORSED AND APPROVED BY THE

National American Woman Suffrage Association

These post cards are published by us on a PROFIT SHARING PLAN whereby every dollar's worth sold boosts money in the treasury of the National Association. They have been especially written and designed to "wake up" and create an interest in the minds of all women and men who have never given the matter any serious consideration. Terse sayings right to the point—every one of which drives a nail home.

Silent Advocates of the Cause of Justice and Freedom

These cards are beautifully printed in five colors and gold and retail at two for 5 cents.

Price to you—$1.25 per 100.

WINDOW DISPLAY, beautifully printed in five colors and gold, packed with all orders of 500.

Sample orders of 100 mailed to any address, subject to U. S. postal rates, upon receipt of $1.35.

More Than Half a Million "Dyed in the Wool" Suffragists in the United States Today Let's Make it a Million

Also wrapped in sealed packages of 15 cards to the set. Wrapper printed in five colors and gold—beautiful and attractive—and retail at 30 cents the set.

Price to you—21½ cents the set.

WINDOW DISPLAY packed with all orders of one dozen sets one-half dozen Series A, one-half dozen Series B.

Single sample sets mailed to any address, subject to U. S. postal rates, upon receipt of 25 cents.

WE ARE OUT TO WIN—ARE YOU WITH US?

Suffragist Stationery

Printed with the emblem of "The blot on the escutcheon" in four colors and gold on high grade bond correspondence paper, size 5¾ x 7⅝ folded.

Packed one quire in box with envelopes, and retail at $1.00 the box.

Price to you—75 cents the box.

For sample box add 10 cents postage.

Under our agreement with the National Association, it will be necessary to maintain these prices. There is a nice margin of profit for all and absolutely no reason to cut prices, as the line is exclusively ours, not only by virtue of copyright protection, but also by our agreement with the National Association.

DISCOUNTS TO JOBBERS

Suffragist Stationery—De Luxe

Steel Die embossed with the emblem of "The blot on the escutcheon" in four colors and gold on highest grade Waldorf No. 3 correspondence paper, size 5¾ x 7⅝.

Packed one quire in box, with envelopes, and retail at $2.50 the box.

Price to you—$1.75 the box.

For sample box add 10 cents postage.

EXQUISITE CHRISTMAS GIFTS

REMEMBER THE DATE

On Monday, October 31st, and continuing until after election day, November 8th, every retailer of post cards, stationery and jewelry, is requested to make a full window display of

Suffrage Post Cards, Suffrage Stationery and Suffrage Jewelry

By special arrangements with The Woman's Journal (a weekly), which is the official organ of the National American Woman's Suffrage Association, due notice will be given its readers each week, that this period is to be known as

EQUAL SUFFRAGE WEEK

and we request all Suffragists and sympathizers to patronize such stores as comply with this request. THERE ARE MORE THAN HALF A MILLION SUFFRAGISTS IN THE UNITED STATES TODAY—LET'S MAKE IT A MILLION. *"A Word to the wise is sufficient."*

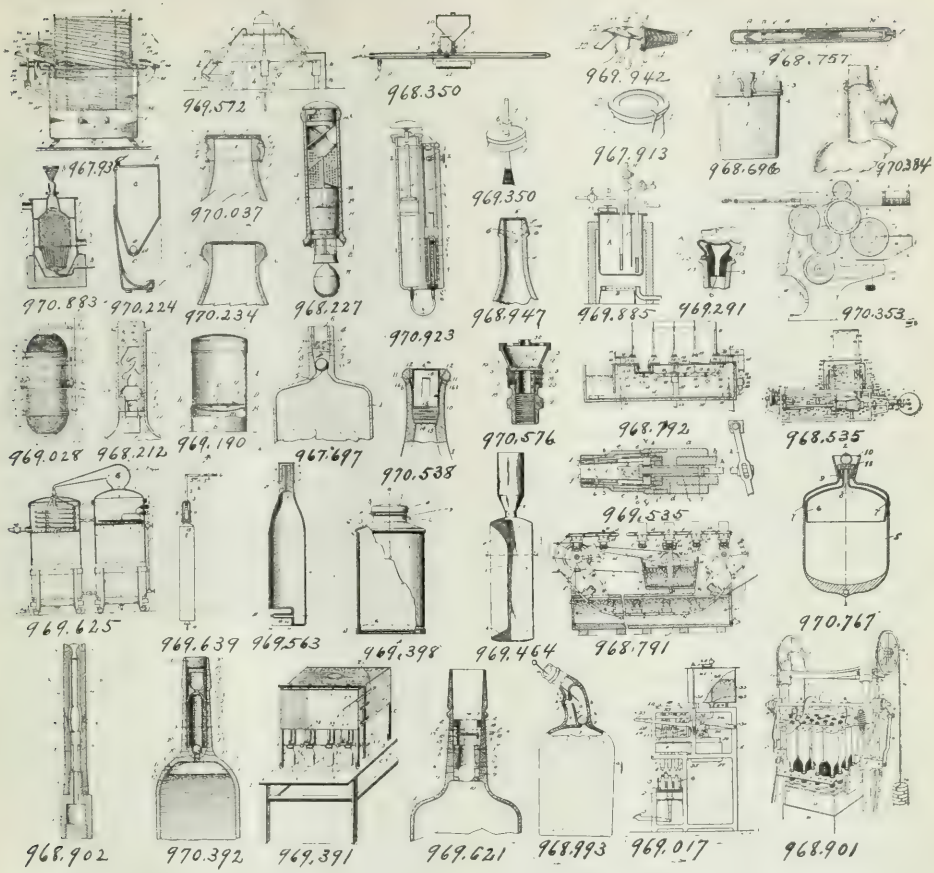
PATENTS, TRADE MARKS, ETC.—(See Next Page)



PATENTS.

Granted August 23, 1910.

967,938—Ferdinand Herb, Superior, Wis. Nursing-bottle.
967,938—Hermann Krause, St. Louis, assignor to Henry Scarborough, Sr., Chicago. Bottle-washer.
967,943—Otto Liebknecht, Frankfort-on-the-Main, Germany, assignor to Roessler & Hasslacher Chem. Co., New York. Process of making hydroxyanic acid.
967,990—Elmer A. Sperry, Brooklyn, assignor to Goldschmidt Detinning Co., New York. Process of producing clear stannic-chloride solutions.
968,212—James O. Walsh, Bayonne. Non-refillable bottle.
968,227—John B. Zorn, Wisdom, Mont., assignor of one-fourth to Emerson M. Smith. Non-refillable bottle.
968,350—Herbert C. Harrison, Lockport, N. Y., assignor to Electro Metallurgical Co. Blowpipe and method of operating same.

Granted August 30, 1910.

968,528—Andre Beltzer, Bridgeport, Conn. Method of generating oxygen.
968,535—Luther P. Brown, Brooklyn, assignor to Mono Service Bottling Co. Bottle-making machine.
968,696—John C. Schleicher, Mount Vernon, N. Y. Closure for vessels.
968,757—George O. Ferguson, Denver. Inhaler.
968,791 and 968,792—Albert Olsson, Brooklyn, assignor to Multi-Seal Mfg. Co. Bottle-capper.
968,901—Henry W. VanLear, Philadelphia, assignor to S. S. Wenzell Machine Co., Charleston, W. Va. Bottle-washer.
968,902—H. W. VanLear, assigned as above. Bottle-washer brush.
968,947—James W. Hughes and Daniel T. Borden, Millville, N. J. Bottle-closure.
968,993—Rocco Siena, Paterson. Non-refillable bottle.
969,017—Joseph Willmann, Derby, Conn. Bottle-filler.
969,028—John Berg, Chicago. Reversible percolator.

Granted September 6, 1910.

969,159—Samuel H. Fleming, Camden, N. J., assignor to E. I. du Pont of Nemours Powder Co., Wilmington, Del. Method of treating glycerin.
969,190—Meyer L. Rhein, New York, and Marcus O. Anthony, Englewood, N. J. Powder holder and dispenser.
969,291—R. L. Larson, Minneapolis. Stopper and dropper.
969,350—George M. Donaldson, Boston. Bottle-closure.
969,391—Harry D. Naum, Newburg, N. Y. Bottle filling and capping apparatus.
969,398—Walter H. Perkins, Cheshire, Conn., assigner to Waterbury Mfg. Co., Waterbury. Powder-box.
969,420—Nathan Sulzberger, New York. Oleic-acid derivative of bodies of the terpene group.
969,464—George D. Farnam, Akron, O., assignor to Star Rubber Co. Apparatus for forming hot-water bags and other hollow rubber articles.
969,474—Albert Hileman, Hollidaysburg, Pa., assignor to Harrison Bros. & Co., Inc., Philadelphia. Process for making basic sulphate of lead.
969,535—John Howe, New York, assignor of one-half to James Bilhuber. Cork and bung cutter.
969,563—R. J. Potter, Tuxedo Park, N. Y. Non-refillable bottle.
969,572—Frants C. Stockel and Jonas L. T. Popp, Copenhagen, Denmark. Bottle-filling machine.
969,621—Charles J. Henry, Perth Amboy, assignor of one-third

to Jacob Gerlach and one-third to Martin J. Olsen, Perth Amboy, N. J. Fly-exclosure

969,635—J. de Haën and Norman F. Harriman, Omaha, Still, assignors to Knoll & Hoffman, N. J. Perfume.

969,652—Leopold Landau, Vienna, Austria. Tooth brush.

969,661—Hans Schwechel, Hamburg, Germany. Process of generating formaldehyde.

969,697—C. D. Heist & Anderson S. C. Non-refillable bottle.

Granted September 13, 1910.

969,8—Alexis de Brevs, Trieste. Production of ferric salts.

969,852—Emil Hochstadt, Frankfort-on-the-Main, assignor to Roessler & Hasslacher Chem. Co., New York. Process of making sodium cyanide.

969,941—A. B. Greenlaw, Red Wing, Minn. Thumb sucking preventer.

970,029—Oscar Lachman, Tirlemont, Sweden. Grape sugar process.

970,037—Leopold N. Oblath, Syracuse, assignor of one-half to Jacob Hyman, Fulton, N. Y. Closure for receptacles.

970,061—Wilhelm Ortmann, Vohwinkel, near Elberfeld, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer & Co. Anesthetically-prepared film and process of making same.

970,142—Baptist Rossler, Hoechst-on-the-Main, Germany, assignor to H. A. Metz & Co., New York. Process of making compounds of the active substance of suprarenal glands and said compounds.

970,215—Oscar Gross, Leipzig, Germany. Preparation imparting flavor to liquor. Ref. No. 12,501.

970,224—Hermann Hoelzer, Osterholz-Scharmbeck, near Bremen, Germany. Tooth-powder distributer.

970,244—Frank E. Joslin, Toronto. Bottle-closure.

970,256—Wm. Rose and Henry Rose, Gainsborough, Eng. Apparatus for applying labels or wrappers to blocks, packages or tins or other containers.

970,284—John F. Mygrant, Pittsburg, assignor of one-half to John M. Morris. Non-refillable bottle.

970,292—J. H. Quinn, Stoyestown, Pa. Antirefillable bottle.

Granted September 20, 1910.

970,538—Patrick J. O'Brien, Torris Cove, Newfoundland. Bottle and jar closure.

970,576—Martha von Trautmann, New York. Atomizer.

970,662—Nathan Sulzberger, New York. Oleic-acid derivatives containing a phenyl group.

970,765—Angeline L. Swingle, Putney, S. D. Water-bottle.

970,825—Henry Heward, Brookline, Mass. Method of making formates and formic acid.

970,883—Nikodem Caro, Berlin, Germany. Process of obtaining ammonia.

970,898—August Eklund, Spokane. Chemical compound.

970,900—Francis A. Freeth, Great Crosby, and Herbert E. Cocksedge, London, Eng. Process of making ammonium chloride.

970,923—Bertrand C. Hinman, London, Eng. Means for measuring or analyzing gaseous mixtures.

Just 1311 formulas are given in the new edition of the Dispenser's Soda Water Guide. Every fountain operator needs it.

VIOLATIONS STILL KEEP COURTS BUSY.

Laudanum is Adulterated and Misbranded—Alcoholic Contents Forgotten—Usual Cases the Order.

WASHINGTON, Sept. 20.—The Department of Agriculture has given public notice of judgments 457 to 569, imposed by the courts in cases brought by the United States involving violations of the Foods and Drugs Act, most of them relating to misbranding or adulteration.

Four cases of misbranding of drug products consisted in the following: H. Rosenthal & Son, Cincinnati, shipped a consignment of "Rock Candy Drips and Whisky," labels on which failed to state quantity and proportion of alcohol present, and were fined $10 and costs; the Brown Manufacturing Co., Greeneville, Tenn., shipped consignment of "Ramon's Pepsin Headache Cure," and because product did not contain pepsin as a constituent element, was not a headache cure and for other reasons, was adjudged misbranded and company ordered to pay $10 and costs; Steinhardt Bros. & Co., New York City, paid a fine of $200 for shipping consignment of "Damiana Royal Brand Celebrated Nerve Invigorator," labels of which did not give requisite information concerning alcohol content and because damiana was not an ingredient, and the Flag Salt Remedy Co., Savannah, N. Y., shipped "Flag Salt," and received a suspended sentence, the product being misbranded as a cure for headache and neuralgia, and that it "did away with use of morphine, opium, chloral, etc., etc."

Other cases of misbranding were as follows: F. J. Stuart, doing business as Stuart Plaster-Pad Co., St. Louis, shipped an article consisting of an adhesive pad with a cone containing a drug compound thereto attached, sold as "Stuart's Adhesive Plaster-Pad," which, it was charged, was misbranded, inasmuch as label stated that drug possessed qualities which would cure or tend to cure hernia or rupture, whereas the drug did not possess such qualities. Charges of further misbranding were also made. Defendant filed a demurrer which was sustained by court and information was dismissed.

Bloomingdale Brothers, New York City, shipped "Vermouth Excelsior M. van Doorninck Mahler & Cie Bordeaux, M. B. & Cie," misbranded in that alcoholic content was not stated and label claimed falsely that product "would strengthen the mind," "increase the organic energy," and "was a safe preventive of fever and cholera." Defendant fined $100. The Imperial Distilling & Cordial Co., Chicago, shipped 25 boxes of bitters, each of which boxes was labeled "12 Bottles Bitters," and each bottle being labeled so as to lead purchaser to believe product to be imported from Italy, whereas it was manufactured in Chicago. Same was condemned, forfeited and ordered destroyed.

The National Spice Co., New York City, paid $50 for shipping a consignment of "The National Brand Laudanum, Alcohol 45 per cent, opium 45.6 per cent gr. per oz., U.S.P., Etc., etc." Same was adulterated in that it differed from U.S.P. standards and that actual strength of preparation was not plainly and correctly stated on container. It was also misbranded in that opium and alcohol contents were not correctly stated.

J. F. Gearan, Boston, made two shipments of "Headache Powders. Each Powder contains Acetphenetidin 5 grains with other Pure and Efficient Ingredients, Etc." Shipments were misbranded, none containing 5 grains of acetphenetidin and one containing acetanilid of which no statement was made on label. Defendant was fined $25. A shipment of "Rexall Headache Wafers," made by the United Drug Co., Chicago, was found to be misbranded and fine of $50 imposed. Label stated preparation to be a headache remedy "which is not only effective and harmless, but very easy to take and is guaranteed by us," whereas same contained caffein and acet phenetidin, well known harmful and habit-forming ingredients. Label also stated 228 grains of acetphenetidin to be present, there being really 339 grains. A fine of $25 was imposed on the J. Maro Harriman Drug Co., Lynn, Mass., for shipping a quantity of a drug product labeled: "Funny-how-quick Headache and Neuralgia Cure a Sure and Quick Relief for all Headaches and Neuralgia, etc." Preparation was misbranded because it was not as claimed on label and contained acetanilid, a habit-forming product, amount and proportion of same not being given.

The Dr. Curry Cancer Cure Co., Lebanon, O., shipped a consignment of 14 drug products, each of which was designated on the label by its name, and all of which purported to constitute a treatment for the cure of cancer. These 14 drug products were misbranded inasmuch as they did not constitute a cure for cancer, and various of them were further misbranded, one not containing enough opium to justify the name, "Liquid Poppy," another, "White Solution, contains 4 per cent cocaine," contained 3 per cent cocaine, etc. Defendant fined $50 and costs.

Two cases of adulteration and misbranding consisted in the following: The Dow & Snell Co., Inc., Toledo, shipped consignment of "Triumph Brand, Pure Spirits of Camphor, etc.," not up to U.S.P. standard and label of which bore no statement as to alcohol content, company fined $25 and costs; and the Gulf Manufacturing Co., Ltd., New Orleans, shipped consignment of turpentine, packages of which were labeled "Crescent brand spirits of turpentine, etc.," same not being in accordance with U.S.P. standard as it consisted of a mixture of spirits of turpentine and mineral oil, etc. Latter defendant was fined $10 and costs.

N.W.D.A. MEETS IN DALLAS IN NOVEMBER.

Fine Programme Provided and Members Also Will Visit the Cotton Palace Exposition at Waco.

DALLAS, Tex., Sept. 20.—Arrangements for the thirty-sixth annual meeting of the National Wholesale Druggists' Association, to be held at the Southland Hotel, this city, Nov. 14 to 18, are completed and the committee on entertainment and arrangements has issued the program for the important gathering. Luncheons, receptions, theater parties, a golf tournament and a banquet, at which Gov. Campbell and Mayor Hay are to be speakers, are among the events planned in addition to the regular sessions of the association.

Waco plans to have a large delegation from the convention to go to that city for the Cotton Palace Exposition that will be in progress there at that time. Invitations are accordingly being sent out to members inviting them to visit Waco either Nov. 18 or 19, when they will be the guests of the city and the Cotton Palace management for a series of entertainments.

Wisconsin's Pure Drug Show Oct. 24-30.

MILWAUKEE, Wis., Sept. 20.—The pure drug show will be held in the large Auditorium building, Oct. 24 to 30. The Wisconsin Pure Drug Show Association has been incorporated with a capital stock of $6000. Officers are as follows: President, Christian Widule; vice-president, S. A. Eckstein; secretary, Joseph H. Schmitt; treasurer, E. G. Raeuber; directors, S. A. Eckstein, A. J. Jones, George H. Keston, Jos. H. Schmitt, E. G. Raeuber and Theodore Bakke. Bart Ruddle will act as press agent.

S. W. Fairchild Heads Taft & Sherman Organization.

The Taft & Sherman Drug, Paint, Oil, Chemical and Allied Trades, Campaign Organization, at a recent meeting at the office of R. Hillier's Son Co., elected Samuel W. Fairchild president in place of George J. Seabury, deceased, and G. Clinton McKesson was elected to succeed Mr. Fairchild as chairman of the executive committee.

W. H. Phillips President of New York Paint Club.

At the recent 23d annual meeting of the Paint, Oil and Varnish Club of New York these officers were elected:

President, W. H. Phillips; vice-president, A. Schumann; secretary, W. B. Templeton; treasurer, F. P. Cheesman; executive committee: George S. Knapp, chairman; Eugene Meez, R. O. Walker, C. L. Watter, H. W. Pearson, A. H. Golden, and officers ex-officio.

Address Wanted of Traveling Opticians.

Editor of the Hamilton (Ohio) *Republican-News* desires the address of Rolfes & Arnz, traveling opticians, who arrange for special sales of spectacles in drug stores, the firm having forgotten to pay its last advertising bill.

Mr. Howard Continues as President.

At South Paris, Me., Chas. H. Howard Co. has succeeded F. A. Shurtleff & Co. Mr. Howard remains president.

Stock Decrease by Sanitol Co.

Sanitol Chemical Laboratory Co. of St. Louis, has decreased its capital stock from $1,510,000 to $1,310,000.

NOTE—A, advanced; D, declined; C, correction; N, new.

See page 1016 and following pages for Prices Current.

NEW YORK, Sept. 24—Routine business in drugs and chemicals during the past four weeks has been fairly good but chiefly in jobbing quantities. But few new features have developed. Offers [illegible] have been quite numerous and largely in favor of the seller. Opium is inactive but steady at slightly changed quotations. Quinine is without [illegible] Menthol is more active and has [illegible] Jalap root is firmly [illegible] Cantharides are in better demand at advanced prices, and [illegible] and cocoa oil has gone up. Levant wormseed and spearmint oil are firmly [illegible] and oils of peppermint, spearmint, rose and lemon are all higher.

OPIUM—For immediate delivery is fairly steady at slightly advanced quotations. Under date of August 27 the arrivals reported in Smyrna amounted to 2553 cases against 1144 cases on the same date last year. Sales during the week ending on the date just mentioned in Smyrna were 200 cases, the arrivals being of a like amount and more than double those of last year. It is said here that if buyers should keep out of the market for a few weeks the price would get back once more in accordance with the large crop. In the local market jobbers are quoting $5.35@$5.50 per pound for natural, and $7.10@$7.35 for granulated and U.S.P. Powdered.

QUININE—Continues fairly steady, but the movement is wholly routine, and manufacturers' prices are unchanged on the old basis of 14c for bulk in 100 ounce tins. Cables to hand report the bark shipments from Java during August as 1,860,000 pounds, 1,420,000 pounds being the quantity reported for the corresponding period last year.

MENTHOL—Is again stronger and the market is practically cleared up, the prices ranging from $3.25@$3.50 as to quantity and holder.

BAY RUM—Continues to be in good seasonable request and supplies are getting more difficult to obtain. As a result prices have been advanced to $1.75 per gallon by the barrel and $2@$2.10 for less quantities.

JALAP ROOT—Is holding the attention of bottle dealers and consumers. High grade is reported in active demand and firmer with the range of quotations from 50c@55c per pound. The available stock is in few hands and the tendency of prices is still strongly upward.

CHAMOMILE FLOWERS—Both German and Roman are slightly lower, although there is a fairly good demand for better grades. The first named variety is quoted at 28c@33c per pound; Roman, 30c@35c.

GLYCERIN—Refined is again firmer in sympathy with the strong position of the crude abroad, and manufacturers have advanced their quotations to 24c for C.P. in drums or barrels and 25c in cans. Smaller quantities are proportionately higher, but manufacturers apparently are not anxious sellers even at the present advanced figures.

CODEINE—Is easier in sympathy with the recent lower prices on opium and manufacturers have reduced their quotations 20c per ounce, as follows. Alkaloid, $4.25@$4.40 per ounce; phosphate and sulphate, $4.10@$4.25 per ounce.

CACAO BUTTER—Bulk in boxes is cabled higher abroad, with an advance in the lay down cost to 33c per pound. The tendency is upward and jobbers are quoting 33c@36c.

BUCHU—Short leaves continue in light supply both here and in European markets and local dealers are offering cautiously at the quoted range of $1.75@$1.85. Long leaves are nominally lower, the quotations being $1.25@$1.35 per pound.

COD LIVER OIL—Norwegian continues active and firm at $34@$36 per barrel as to brand, and the outlook continues favorable to higher prices.

MANNA—Is higher, $1@$1.10 per pound being asked for larger flake. Quotations on small flake are unchanged, but advices received from Italy are to the effect that, at best, only a fair crop may be expected this year, as weather conditions have been unfavorable thus far.

OIL CLOVES—Is firmer in sympathy with a stronger position of the spice and quotations have been advanced to $1@$1.20 according to quantity and container.

OILS, ESSENTIAL—Star aniseed is steady and higher at $1.45@$1.55 per pound. Peppermint is developing firmness; as a result, prices have been advanced and the demand is active considering the higher levels. The regular brands are quoted as follows: New York, $2.40@$2.70; H.G.H., $2.75@$2.85; Western, $2.40@$2.60. Spearmint is temporarily in such short supply that consumers express difficulty in getting supplies. Stocks are concentrated and prices have been advanced to $3.65@$3.75 per pound.

CANTHARIDES—Russian are again cabled higher abroad and the local market is firmer with quotations advanced to 85c@$1.00 per pound for whole and 95c@$1.20 for powdered, as to grade and quantity.

SEEDS—A general revision of quotations shows fractionally higher ranges for poppy, rape and domestic sunflower, and cables received a few days ago report rapidly advancing primary markets for Levant wormseed, the stock there being concentrated in few hands, with the bulk under control of the Russian Government. Celery seed is lower, 25c@28c per pound being quoted.

It Pays
To Stand By the "Stand By's"

Some dealers spend most of their time in pushing every *new* thing that comes along.

Stock up with a new article if it seems to be a seller. But don't forget the old "Stand By's" that *have* paid you and *are* paying you and *will* pay you—if you watch them.

Wise dealers keep their eyes on the real, live articles that are already *established*—the articles that they *know* will *sell*.

Keep these steady sellers—and keep them *moving*. Stand by the "Stand By's" and they will stand by you.

One of the best "Stand By's" in your store is

DIAMOND DYES

Diamond Dyes have paid you more profits than any other dye you ever handled—more profits than any other 10 cent article.

And, if you do *your* share, these profits will keep right on growing each year.

Other dyes come and other dyes go. But Diamond Dyes are *steady*. Their sales go right on forever.

Keep Up Your Stock

All you have to do is to keep on hand a *complete* assortment of all the Diamond Dye colors for both *Wool* and *Cotton*, keep the Cabinet in a prominent place in your store and *do your share* toward helping and cultivating the big demand for Diamond Dyes.

$200,000 to Help You

Surely you should be willing to *do your share* when we are actually spending over $200,000 *each year* to help build up *your* sales.

We are sending the women into your store. Are *you* doing *your* share to sell the goods when the women call for them?

Back up Diamond Dyes. Link up your store with the pages and pages of advertising that we are using.

Remember, this advertising money has got to *pay you* before it can possibly *pay us*.

Do your share.

How to Build Up Sales

When a lady asks for Diamond Dyes, first, tell her you have Diamond Dyes for wool and Diamond Dyes for cotton. That no dye in the world works successfully with all kinds of materials.

Explain that wool, silk, alpaca, and camel's hair are **animal** fibres that take up the dye very **slowly**, so it is necessary for her to use **Diamond Dyes for Wool**,

And that cotton, linen, and mixed goods are **vegetable** fibres that absorb the dyes **quickly**, so it is necessary for her to use **Diamond Dyes for Cotton.**

Therefore, if she gets the right dye for the material, there is absolutely no chance of failure.

The Diamond Dye Direction Book will furnish every detail of information and the Diamond Dye Annual will give her the latest styles and many testimonials of the success of others.

There are many convincing arguments in favor of home dyeing and we are presenting them to the women of the country in a clear and forceful manner.

WELLS & RICHARDSON CO.
BURLINGTON, VERMONT

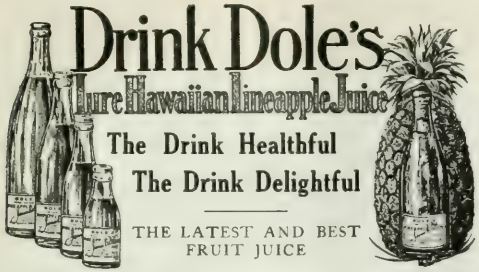
Stein-Gray Co's Sale.

CINCINNATI, Sept. 24—The sale of the Stein Gray Co's stock and store fixtures has been completed. Attorney Peters says the sale total will about $20,000, which is about 60 to 70 per cent. of the appraised value. The statement was made by bondsmills that the stock was appraised at $50,000 and appraised at less than $30,000. Attorney Peters says that he will pay the creditors about 10 or 15 cents to the dollar; that the first dividend will be paid in two or three weeks but that the final dividend will not be paid for some time yet, and that the case will not be entirely disposed of in the Federal courts for five or six months, as the examination of the bankrupts is still under way. Most of the stock was bought by out of town men.

Drink Dole's

Pure Hawaiian Pineapple Juice



The Drink Healthful

The Drink Delightful

THE LATEST AND BEST FRUIT JUICE

"Wholesome?" Ask physicians. "Delightful?" Try it and see. Drink as much as you please—you'll enjoy every drop. Serve it straight and very cold over cracked ice, or use it instead of lemon in hot Russian tea or 3-5 Juice and 2-5 boiling water over a little sugar in place of hot lemonade. It is pressed from "Picked Ripe" Hawaiian Pineapples and is refined and bottled in Honolulu.

It's Pure—nothing whatever has been added. Drink it pure.
It's Hawaiian—grown and bottled in a Tropical Paradise—and tastes it. The Drink Delightful.
It's Pineapple—the most healthful and refreshing of all juicy fruits.

When grocers and druggists haven't Dole's Pure Hawaiian Pineapple Juice write us for booklet.

Profit in Handling D & S Corn Plasters.

The Doctors & Druggists' Co., recently incorporated under the laws of New York with a capital of $250,000 have a new advertisement in this issue of the Era in which attention is called to the D & S Corn Plasters at $5 per gross. Each dozen packages of the Corn Plasters is mounted on an attractive display card and each package is claimed to remove twelve corns. Ten per cent discount is allowed if cash accompanies the order and the price at which the plasters are sold enables the dealer to make $10 clear profit. This is a good investment for the druggist who wants to make money and to satisfy customers. The company also make a line of [illegible] and tablet preparations which is worth looking into. Read their advertisement on page 1015 and [illegible] a postal card, and they will send you some very interesting reading matter about money making and [illegible].

A. D. S. Members to Fight Chains.

(Continued from Page 1001.)

Other speakers developed the facts that co-operative or central buying was a great thing for the retail druggist; that every pharmacist distrusts his colleagues to such an extent that it would be foolish to consider any scheme by which the members should turn in their stores and receive proportionate shares of stock in any sort of buying organization, and that legislation to keep corporations out of the drug business could be secured only through the semi-professional end of the business, which would result in separating the prescription department from the other departments of the drug stores.

It was announced that the rapid growth of the syndicate had rendered necessary the erection of a new building in Long Island City. It will be five stories high and 95 x 100 feet in dimensions.

New Association Holds Its First Meeting.

The A.D.S. Association of the State of New York held its first meeting recently at Teutonia Assembly Hall, President Peter Diamond presiding. The resolutions adopted at the conference at the New York College of Pharmacy relating to amended article 182 of the sanitary code were unanimously endorsed. It was also decided that the fight for legislation to curb the corporation "chains" be taken up as soon as practicable. The annual fee was made $1 and 100 or more members were taken in at this meeting. The plan of dividing the city into districts was further discussed and developed. A. Gardner and Benjamin Taub were appointed to represent the society at the second conference relative to article 182 of the code. Mr. Gardner was also elected treasurer. The following executive committee was appointed:

Manhattan Borough, Henry E. Otis, Peter Diamond, Abraham Dorb, George H. Hassell, Thomas H. Hetherington, Joseph Culp, Mr. Erroshaw, G. W. Hackert-server, B. Farb and W. A. Guthrie; Brooklyn Borough, A. Parsells, H. E. Hall, D. Westheimer, C. E. Heimerzheim and A. Gardner; Queens Borough, A. Schmitzler and E. W. Steindeke; Bronx Borough, George E. Huether, Charles A. Stecher, John Goldwater, T. A. Smith, and Richmond Borough, U. W. Becker.

Clear Counter Service—Something New.

The whole soda water trade will be interested in an announcement made on another page of this issue by the Liquid Carbonic Company, of a radically new type of fountain that that Company has just perfected and is now placing on the market. Explicit details as to the mechanical construction of this outfit, other than the important fact that it does away with the draft stand are not given.

But according to the manufacturers this accomplishes an important saving in ice because it avoids the loss of refrigeration that is inevitable in any draft stand, owing to the fact that a draft stand is above the counter where it is constantly played upon by air-currents, and where it is impossible to refrigerate the pipes in the interior. From a dispenser's standpoint, also, the new type of fountain will be welcome, because, it is claimed, it means a short waist-high reach to the faucet instead of the slower, more tiring, shoulder-high reach to the faucet of an elevated draft stand. There is also an advantage in having a clear serving counter, free of all obstructions.

Dispensers Must Keep Straws at Fountains Covered.

In the belief that the exposure of straws used at soda fountains to handling by all classes of people tends to spread disease, State Food and Dairy Commissioner, W. B. Barney of Iowa, has notified proprietors of soda fountains and other dispensers of drinks in that State to keep their straws covered. For this purpose the Patented Straw Dispensing machine, formerly manufactured by the Hander Vending Machine Co. of Chicago, is just the device to protect the straws and also the user. The Mosteller Mfg. Co., also of Chicago, has recently acquired ownership of this machine which, among other desirable features, dispenses but one straw at a time. If your jobber cannot supply you, order of the Mosteller Mfg. Co., 322 West Indiana street, Chicago, Ill.

MALLINCKRODT CHEMICAL WORKS

ST. LOUIS **NEW YORK**

BUSINESS NOTICES

Smokers' Novelties Appreciated by the Trade.

One of the strong features of the Perfect Cigar Box Lid Holder, shown in the accompanying illustration and introduced by the Milwaukee Novelty Co., Milwaukee, Wis., is the firm manner in which it holds the cover at any angle without taking up any room in the show case, at the same time holding in position the price tag. That the cigar trade appreciates this device is evidenced by the many unsolicited testimonials the manufacturers have received from dealers who have used the Holders. The Perfect Cigar Box Lid Holder, as stated above, not only holds the box cover, but also the Cigar Price Tags, which the Milwaukee Novelty Co. furnish in thirty-one different designs printed in two colors and sell at very reasonable prices. The company also makes a specialty of smokers' novelties and they invite dealers to make a practical test of the same by sending for free samples. See advertisement on page 1015 in this issue of the ERA.

Druggists' and Miscellaneous Rubber Sundries.

The B. F. Goodrich Co., Akron, Ohio, have just issued a new Druggists' and Surgical Rubber Sundries Catalogue which is a superb example of the printers' art, all the work being done by the so-called "offset" process. As a desk companion and reference book the average druggist will find this catalogue of the greatest service for it describes and illustrates what is probably the most comprehensive and up-to-date line of druggists' and surgeons' rubber sundries ever offered to the trade. The illustrations show many new additions to the line and with the text tell how the old standards have been thoroughly gone over and improvements made wherever possible. Particularly worthy of notice are the combination Syringe Bags described and illustrated in the catalogue, the three styles being the "Regular," "Fountlet" and "Jockey," white, slate and red being the predominating colors. In addition the company states that any of its regular water bottles may be utilized as top outlet combination bags, as the thread of the nozzles will take the standard hard rubber combination cap. Besides all varieties of syringes, there are rubber bulbs, atomizers, breast pumps, nursing bottle fittings, nipples, finger cots, gloves, pessaries, sponge bags, sheeting, catheters, surgical tubes, bandages, tourniquets, aprons, erasers, rubber bands, etc., etc. If you have not already received a copy of this catalogue we presume that one will be sent on request to the B. F. Goodrich Co., Akron, Ohio.

Scott & Bowne's Bonus Goods Proposition.

Although the price of Cod Liver Oil is higher this year than for several years past, we learn from our advertising columns that there is no change in the price of Scott's Emulsion. In fact, the bonus goods proposition ($25 worth, with ½ doz. free) brings the cost of this staple article down much below the $8 and $4 mark. The prices given appear to make the large size the more profitable to handle, but there is perhaps some justice in the statement of the manufacturer that the small or half-dollar size costs proportionately more to put up. It is a well-established fact that an 8 oz. bottle does cost more than half as much as a 16 oz. one, and probably it costs about as much to handle the one as the other. However, Scott & Bowne, with their bonus goods proposition, bring their prices down on both sizes to a figure that should receive the hearty support of the entire trade.

Unusual Offer on O-Cedar Polish.

The Channell Chemical Company of Chicago are making a great [illegible] for Fall business. Instead of the usual plan of giving a dozen or so packages free with each gross order, they have evolved a novel plan that should bring good [illegible] to merchants who accept the proposition. Briefly, the plan is this: upon receipt of an order for six dozen of the 10c. size O-Cedar Polish, six dozen of the 25c. size and one dozen of the 50c. size, making a total of $20.80, the Channell Chemical Company will write a personal letter to 100 customers of the store sending the order, and enclose with the letter a coupon good for 5c. on the purchase of O-Cedar at that store only. The Channell Chemical Company in return accepts these coupons at their face value from the merchant when paying his bill.

This plan almost doubles the profits for the retailer and brings customers to his store without any expense or effort on his part. Indeed, the wholesaler practically gives the retailer all the profit and in addition gives a guarantee bond with every bottle of O-Cedar agreeing to refund the purchase price in full if the customer is not fully satisfied. O-Cedar is a staple article, and full details of the proposition will be found on another page of this issue. Druggists should avail themselves of this unusual offer for it gives them a chance to make extra profits.

Beginning of the Antitoxin Season.

Pharmacists who have not already done so will be wise to order now their fall supplies of diphtheria antitoxin. With the opening of the schools and the consequent intermingling of large numbers of children there is always more or less demand for the serum, particularly as the product is used extensively as a prophylactic as well as curative agent. There is an advantage, too, in being early in the field, thus prolonging the antitoxin season, which is ordinarily very profitable. The druggist is in business primarily for profit. He should therefore choose a serum that is commercially staple, that has standing with physicians, that is liberally advertised and detailed to the medical profession. Parke, Davis & Co.'s antitoxin meets all these requirements, is well exploited in the medical journals, and is a brand that comes first into the mind of the average American physician when he has occasion to place an order. In this connection it is perhaps pertinent to remind the pharmacist that the Globulins of this company's manufacture are coming into extensive use, and a few packages might well be included with his order.

How to Obtain One Dozen Camphorzone Free.

The Camphorzone Company, Chicago, Ill., have a new advertisement in this issue of the ERA in which they call attention to Camphorzone which, they say, is extensively advertised to physicians and dentists and prescribed by them when an ideal Antiseptic and Emollient Lotion is indicated. Camphorzone is particularly recommended for the use of dentists in the treatment of gingivitis, as a gargle and mouth-wash, and for local congestions and irritations. The manufacturers have a plan, described in their advertisement, by which, if you co-operate with them, they will send you free of all cost, one dozen bottles of Camphorzone, 25c size, for distribution to your physicians and dentists. So confident are The Camphorzone Co. of the merits of their product that they say they will guarantee satisfaction or return your money. But read their advertisement on page 1009 and take advantage of what would appear to be a very generous offer.

High Grade Match Vending Machines.

The International Vending Co., of Chicago, whose ad appears on another page of this paper, is one of the few vending machine firms doing their own manufacturing. Consequently, their products have nearly approached perfection in workmanship, materials, etc. The Company make several different types of match machines, all of which vend peanuts or other articles in cartons as well. Druggists should read the ad and take advantage of the Company's offer to send a catalogue free. The mechanism of the machine is guaranteed by the manufacturers for ten years.

Dr. J. H. Schenck & Son's Special Free Goods Offer.

In ordering Schenck's Mandrake Pills dealers should not forget to send to the manufacturers, Dr. J. H. Schenck & Son, Philadelphia, for a Special Free Goods Offer blank. The blank may be also obtained through local jobbers and by taking advantage of the offer, which is open for a limited time only, you will be able to make greater profits and also to get a handsome counter card and window signs to help sell the goods. Read the manufacturers' advertisement on page 980 of this issue of the ERA and get the particulars of this Special Free Goods Offer.

Here is Something New That will Draw a Crowd

The "Attracto" Swinging Ball Motion Window Display Outfit will do it better than a highly paid living demonstrator. Interests and puzzles everybody. Looks like perpetual motion. Practical. Well Made. Lasts a lifetime. This display is 20 inches high, 21 inches wide, 6 inches deep, built of beautiful quartered Oak with Black Antique scroll work, nail heads and wires. Card-board signs in center 14 inches in diameter. Every few seconds the sign makes a half turn, showing opposite side. Balls at top swing full circuit, one attached to cord winding and unwinding about post at left of frame. Thus, two signs are alternated every few seconds, making a display sure to attract passers-by. Let ball trap window and **everybody** stops. Light merchandise may be placed on cards if you wish.

This outfit consists of mechanical frame, run by 8 hour clock. 10 cards with beautiful lithographed borders, each printed with a different, catchy, business slogan. 10 bordered cards with plain centers which you can letter yourself. Price, boxed for shipment, $7.50. If not satisfied, money back. We build **all** motion displays used by big national advertisers. Have helped them make money can help you. Be first to have one in your window.

THE EDDY COMPANY
WORCESTER, MASS.

"View Cards Like They Make in Germany."

A large advertisement in this issue of the ERA is that of the Cargill Co., whose general offices and works at Grand Rapids, Mich., are illustrated in the accompanying cut. This Com-

pany, which maintains one of the best plants in existence doing die cutting, engraving, printing and binding, under one roof and management, is the successor to the Grand Rapids Engraving Co., established many years ago, the officers being C. C. Cargill, president; C. N. Jaqua, secretary and F. J. Smith, formerly president of the Simplicity Co. of Chicago, manager of its post card department.

The great specialty of the Cargill Co., however, is the manufacture of "View Cards like they make in Germany." Three grades of cards are made, Mono-Chromes, Tri-Chromes and Auto-Chromes, each representing the highest type of artistic workmanship and capable of bringing out every detail of any view. Druggists will find these cards, which cost but a trifle more than the poorer grades, to be profitable sellers the year round. They should also read the advertisement of The Cargill Co., and take advantage of the opportunities offered. Unlike most other ways and means of making money, the post card fad costs but little to install, not much to operate, and it is an attraction that draws trade. If your jobber does not handle the Cargill line, write direct to the Company for samples, which will enable you to judge for yourself of their quality.

Sales of Pinex Follow Advertising Campaign.

The start of the cough remedy season is announced by the reappearance of Pinex advertisements, and the annual appeal to druggists to get their stock ready. The advertising campaign, now conducted by the Pinex Company extends over the entire United States and Canada, and shows perhaps better than anything else, the growth of sale since the appearance of a few small announcements in one state four years ago.

The manufacturers say this remedy was designed by a pharmaceutical chemist to take the place of the thousand and one home-made remedies used by housewives to cure coughs. Pinex particularly appeals to those people who take pleasure in compounding at least a part of their own remedies and, as a result, they buy Pinex and dilute it with sugar syrup or a strained honey. Instead of selling a nickel's worth of horehound, licorice or something else, the druggist sells a bottle of Pinex for which he gets 50 cents, thereby making a better profit. In this way sales are made to a class of people who are not buyers of ordinary manufactured cough remedies, people who have cough recipes of their own and who seem to enjoy the trouble of preparing them. Pinex is sold by all jobbers and the manufacturers protect the druggist by agreeing to take back all unsold bottles at any time and guaranteeing to refund the purchase price to any dissatisfied user. Read their advertisement on another page.

Remarkable Free Offer on Diamond Dyes.

Three dozen packages of Diamond Dyes free with each one gross order, is the unusual offer now being made to retailers by Wells & Richardson Co. Together with the regular discounts, this allotment of free goods with each gross brings the dealer's cost to a point that leaves him something over 110% profit on each sale of this world-renowned 10-cent article. This margin is so liberal that the Wells & Richardson Co. feels little doubt but that practically every dealer in the country will make even redoubled efforts toward pushing Diamond Dyes.

Good, straight-from-the-shoulder, convincing, telling advertisements are appearing in 46 publications in this country and Canada. Full-page space in black and some in two, three and four colors are frequently seen, while smaller advertisements are carried through other insertions. This publicity will cost the Wells & Richardson Co. $200,000 for the coming year, and the plan of advertising Diamond Dyes is worthy of commendation. The story that Diamond Dyes tells will be read by over twelve million women and is bound to increase the sales of their product. Surely no dealer can do better than carry Diamond Dyes and reap his share of the profits from this great advertising campaign.

Fifty Years in Electrical Supply Business.

Julius Andrae & Sons Co., manufacturers and distributors of electrical supplies, dynamos, motors, etc., Milwaukee, Wis., have just issued a finely printed and illustrated bulletin commemorative of the establishment of their business fifty years ago by Julius Andrae. A perusal of this bulletin will convince anyone that the growth of this company has kept pace with the wonderful progress of the application of electricity to modern industrial requirements. For instance, when the company started their stock consisted of one spool of annunciator wire, six bells and batteries and a few push buttons. Today they have one of the largest and most complete stock of electrical supplies in the country. As manufacturers of the Andrae Grand Telephones they have made their name known in almost every State in the Union, their instruments and switchboards being awarded first place in many competitive tests. The officers of the company are Julius A. Andrae, president; J. C. Schmidthauer, vice-president; F. T. Andrae, secretary, and H. P. Andrae, treasurer. In addition to a large force of experienced men in the regular departments of the business the company also maintain an engineering corps to lay out plans for customers and to give advice in cases requiring technical knowledge and training.

READY-TO-SELL

CASCARA AROMATIC

Registered Trade Mark

The Original and Genuine

The new 2-oz. Cascara Aromatic, dressed in pharmaceutical style, ready for dispensing, will please your trade.

We originated Cascara Aromatic over 20 years ago. It has always been the leading preparation of the kind, and here you have it in the most convenient form for general use.

No extra expense for bottles and labels—no time lost in filling—no waste—but a 25-cent sale every time and a sure repeater.

This is the ideal way to sell Cascara Aromatic, and this is the original and genuine product—sure to please.

The Oskamp-Nolting Co.

411-417 Elm Street, Cincinnati, Ohio

This is SCOTT'S EMULSION'S 35th Year

Every day we hear of wonderful cures it has made. ¶ Every day we have more and more faith in it. ¶ We make it every day, and every day we try to make it better. It ought to be the best. It has stood a long test.

We are sure you, too, have faith in Scott's Emulsion, and we are sure you have no trouble with it. It is only a question of our customer going to you or going somewhere else. When he comes in, will you please give it to him? That is all we ask—just give him **SCOTT'S EMULSION.**

THE BONUS PROPOSITION

This proposition is made to those who retail only, and is as follows:

Orders amounting to $25.00 worth (either size or assorted), are subject to a 5% discount, allowed by the wholesaler, and ⅓ dozen Scott's Emulsion, Small, as a bonus for window display. The four bottles of Emulsion will be sent **by us direct, charges prepaid,** upon receipt of acceptance of order by wholesaler.

Make up the amount any way you like, this is the way it figures out:

3 Doz. Large Emulsion, @ $8.00	$24.00	6 Doz. Small Emulsion, @ $4.25	$25.50
Less 5%	1.20	Less 5%	1.27½
	$22.80		$24.22½
Less 4 Bottles, Small	1.42	Less 4 Bottles, Small	1.42
	$21.38		$22.80½
or $7.13 per dozen, net.		or $3.80 per dozen, net.	

Your advantage is in the large size, so is ours, as the small size costs proportionately more to put up. Send your orders direct to us on any wholesaler, and if you would like advertising matter, please request it.

SCOTT & BOWNE - - Bloomfield, N. J.

Make a note of the brand—Y & S—on our Pepsin Gum. This brand—Y & S—has been used by us and our antecedents for forty years on the best known stick licorice in this country.

It means just as high quality when used on our chewing gum.

Four flavors: LICORICE, PEPPERMINT, WINTERGREEN, SPEARMINT. Each piece wrapped singly, 5 pieces to package, 20 packages to box. Order a trial box, assorted if required, from your jobber.

SPECIAL OFFER

You can get this high grade Match Vending Machine entirely free of charge by buying 1500 boxes of matches at only 1c. each. When the matches are sold, the machine is paid for. The match boxes are made of light wood (not paper) and contain about six dozen matches each. The machine is made of quarter sawed weathered oak with copper base and a plate glass globe. The mechanism is guaranteed for 10 years.

Matches for Nothing

We have told you how to get the machine free, and we're going to tell you how to make the matches pay for themselves. We will furnish 1500 assorted kinds, bearing your ad, free with your order. Your ad is necessary as this ad costs time to keep a match 60 or 70 times to sell. Before long your store is going to be identified in his mind with certain goods and you're going to get his trade in that line.

Send your order for a machine with 1500 boxes of matches and labels today. This machine will sell the matches every time, and save you a whole lot of annoyance and expense. It is very attractive and will be an ornament to your store. After your matches are paid for you can purchase more at 50 cents a gross and 1500 labels for only 50 cents more, or 3c each.

Get Our Exclusive Newspaper Advertising QUICK

It Never Fails To Pay

ROOT JUICE can be bought, from any jobber, at $8.00 per doz., but we will do exclusive advertising, over the name of one druggist in every town, which has a weekly newspaper, if the druggist will deal with us, direct, thus enabling us to keep tab on results of the advertising. We will also allow deduction of freight, and liberal discounts, on quantity lots. Write us. Scores of druggists throughout the country are having a wonderful sale on Root Juice.

W. P. CABLER ROOT JUICE MEDICINE CO.

FORT WAYNE -:- INDIANA

THIS MEANS YOU!

INCREASE YOUR INCOME

WITHOUT

INVESTING A DOLLAR

We have no goods to sell you or to send you on consignment.

Our proposition is square and strictly within your line.

Druggists who have availed themselves of our plan are enthusiastic about it and it [illegible] a good income without the expenditure of a [illegible]

Limited space precludes [illegible] Fill out coupon and mail it to us today and we will fully explain.

Gentlemen: We are interested in your proposition and desire [illegible]

Name .....

Address .....

"Quick Loader"

INSECT POWDER GUN

LEADS THEM ALL

It Leads in Quick Sales
It Leads in Durability
It Leads in Construction
It Leads in Applying the Powder
It Leads in Price

There is as much profit and much more satisfaction in selling the "Quick Loader" than any other gun made.

If you buy in lots of 25 gross or more we will place your name on the top plate in place of ours, and in addition will furnish you with a reasonable quantity of attractive powder gun circulars, with your imprint.

Advise us the probable quantity of guns you will wish this coming season and we will make you an attractive price and help you to sell them.

American Can Company

New York Chicago San Francisco

Be Able to Fill Orders for

PINEX

The Big Selling

COUGH REMEDY

This remedy was designed by a pharmaceutical chemist to take the place of a thousand and one home-made remedies used by housewives to cure coughs.

People that used to come to the druggist for five cents worth of glycerine and a nickel's worth of Horehound tea, licorice or something else, are now buying 50 cents worth of Pinex.

They get a better remedy and they pay the druggist a better profit.

Pinex has created a lot of brand new, profitable cough medicine sales to a class of people who would not buy an ordinary cough syrup.

If you're not selling it you should.

WE GUARANTEE THE SALE. Unsold bottles returnable at any time.

Any jobber will supply you.

$4.00 per dozen. Retails at 50c. the Bottle

NEW AND ATTRACTIVE

Advertising signs and novelties will be cheerfully supplied on receipt of a line from you, with your card or label, that we may be certain to get your name and address correct. If you write to us we will send you customers, not only for our remedy, but for all you sell. Your customers will be pleased, your business will be enlarged and your profits thereby increased to our mutual advantage as a result of our outlay and enterprise and your co-operation.

PLEASE REMEMBER *the* ***VERY LIBERAL DISCOUNT OF*** **EIGHT PER CENT**

which all wholesale druggists allow on our remedy on one gross lots or over from the list price of $48.00 per gross, and of five per cent on half gross lots and over, and send in your orders direct to your wholesaler, but write to us for the advertising matter. It pays to sell SYRUP OF FIGS AND ELIXIR OF SENNA, and we wish to increase your sales. Thanking you most cordially, we are, yours very truly,

CALIFORNIA FIG SYRUP CO.

Louisville, Ky. **SAN FRANCISCO, CAL.** **New York, N. Y.**

COCOA POWDERS

You have not exhausted the possibilities in Cocoa Powder buying, without at least seeing what we can do for you.

We make nearly one hundred varieties, and certainly some one of them should suit your requirements. Our Cocoa plant is one of the finest in the world and we keep abreast with all improvements.

Our machinery enables us to furnish not only a Cocoa more completely freed from the oil than others but also **ANY** degree of dryness desired.

We can give you the Dutch processed Cocoa of highest grade and fully equal to the finest imported, and we can give under the same process, Cocoa that is slightly processed or heavily processed. We can give the same **QUALITY** of Cocoa not Dutch processed.

We can give you a Cocoa Powder that could only be sold at a small profit at $1.00 per lb., and from that absolutely pure Cocoa down to a price that would **SURPRISE YOU.**

If you are a large user we can and will make a blend solely for your purpose. We make only absolutely pure Cocoa powders.

We pack in barrels, half barrels, 50 and 25 lb. drums and 10, 5 and 1 lb. tins.

PLEASE REMEMBER other manufacturers **MAY** be able to please you, **BUT** you should see what we can do before you place your contracts or orders.

PLEASE REMEMBER other manufacturers **MAY** be able to satisfy you, but **WE CAN** and our capacity assures you of prompt deliveries.

YOU SIMPLY DON'T KNOW UNTIL YOU TRY

ROCKWOOD & CO.

Re Price Protection on SANATOGEN

We wish to reiterate with all emphasis that as the sole licensees of the United States Patent under which Sanatogen is manufactured and sold, we are invested by law with the privilege to insist that retailers strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating this condition renders himself liable to injunction and damages.

Gentlemen of the drug trade, this is no mere "say-so," but a true statement of fact. We do not wish to intimidate anyone, but merely to give proper notice that we mean to enforce our rights wherever necessary.

This means *true protection*, the kind of protection that gives everybody a square deal and puts the small druggist on an even level with the biggest "chain corporation" or department store.

Three sizes, sold by all wholesalers and jobbers, at $9, $17.25 and $33; to retail at $1, $1.90 and $3.60, and *no less*.

Write to us today for effective display matter.

The Bauer Chemical Co.

JUDGE by DEEDS not by WORDS

The true measure of business stability and integrity is exactness in all transactions. In settling fire losses we pay quickly every cent which in justice we should pay—no more—no less.

Morgantown, West Va., July 20, 1910.
The American Druggists' Fire Ins. Co.
Cincinnati, Ohio.

Gentlemen:

I wish to thank you for the prompt settlement of my claim against your Company for fire loss, for which I have your check for $518.22. I will say that I must congratulate your Company for being the first on the job to settle adjustment and also the first to make payment of same. I wish also to thank you for the fair and business-like adjustment which was made by your Agent, Mr. C. O. Young. I would not hesitate to carry my entire insurance with your Company if I could get it, but this is impossible as I have the maximum which I can carry in Morgantown. I would not hesitate to recommend your Company as being the best insurance Company that a druggist can carry liabilities with. I want to thank you again for the courtesies rendered me throughout the adjustment. Trusting that your business will improve from time to time, as I am sure it will, I remain,

Enthusiastically yours,
Walter H. Myers.

Insure with the Druggists' Insurance Company at lowest premium rates, consistent with conservative management.

The Strongest Company. Surplus over a Quarter Million Dollars. We have a licensed representative in every state where we solicit business.

"WHAT IS WHISKY?" WILL NOT DOWN.

Once more there is commotion in the whisky camp. With arguments and rulings in plenty in the past there comes a new one, handed down last month by Attorney-General Wickersham, who holds, contrary to the view of his predecessor, Mr. Bonaparte, and Chief Chemist Wiley, that any grain distillate put on the market under a distinctive name is "whisky," and, being such, there are only rare instances in which the stuff must be marked "blend," "compound" or "imitation." Thus practically everything sold as whisky before the Pure Food Law was enacted will regain its privilege.

The decision followed arguments made to the Attorney-General by former Ambassador Choate, who had been retained by a Canadian distillery the product of which under the Roosevelt rules would have had to be called a compound or an imitation of whisky.

While "What is Whisky?" daily and weekly concerns fewer druggists than before, it is desirable to keep informed of the status of this product, for label requirements, if for no other reason.

RIGHT TIME TO PURCHASE SODA FOUNTAINS.

There is a big point in achieving success in knowing how to buy goods and when to purchase. This is as true of soda fountain apparatus and supplies as it is of anything else used by the druggist. Most druggists who operate soda fountains are readers of THE SODA FOUNTAIN, which is especially devoted to that branch of their interests. Always on the lookout for practical ways and means to benefit fountain owners and prospective purchasers, much space was devoted in the October issue to the important problem of buying new apparatus. It was a chapter on wise financing that should be read extensively.

Still imbued with the old idea that Spring is the time to install new fountains (an idea, however, that is fast becoming obsolete), many intending buyers put off action until close to that season of the year, this being the case occasionally even with operators who never close their apparatus. It develops that when orders for fountains are placed in November and prior to the first of the year the big manufacturers offer better terms than they do later on.

Early ordering means that it is really cheaper to buy a new fountain in November than it would be in

January, February or March. That is an opportunity no business man can afford to overlook. It was fully exploited in the October SODA FOUNTAIN, but if the reader did not happen to see the article, the proposition will be explained by any of the manufacturers whose announcements are to be found in this issue of the ERA.

PROTECTING CARELESS SIGNERS.

North Dakota's law in relation to so-called "lightning rod notes," which limits the negotiable value of paper given in payment for patent rights, patent medicines, etc., as promulgated by Prof. Ladd and printed on page 1101 of this ERA, will be interesting to druggists in other States not possessing such a law as showing that protection can be extended to merchants and others who sign notes under misapprehension, or with a careless lack of appreciation of the effect of signing documents which later become contracts, notes or other instruments for extorting money.

Prof. Ladd quotes the law with a view to the relief of druggists in North Dakota who have been victimized by the promoters of fake remedies. The ERA reprints it for the benefit of the pharmaceutical associations generally, that their legislative committees may consider the advisability of endeavoring to obtain the enactment of similar laws. Movements in this direction ought not to entail much difficulty, for opposition could hardly be expected except from persons whose methods would not stand the scrutiny of honest merchants.

PROGRESS OF U.S.P. REVISION.

Superstitious persons will no doubt comment on the fact, in connection with the death of the lamented Prof. Hallberg, that this unfortunate event for pharmacy and for his family occurred soon after his appointment as chairman of Sub-Committee No. 13 for the revision of the United States Pharmacopœia, but the only signficance will be a slight delay, perhaps, in that branch of the work. Prof. Hallberg will be greatly missed and sincerely mourned by his confreres.

On page 1056 will be found the list of sub-committees as announced by Chairman Remington and it will be observed that the distribution of subjects has been excellently well made. With this display of promptness, there is good reason to reiterate the belief that the IXth Revision will be accomplished with due diligence in every respect.

N.W.D.A. TO SEE TEXAS.

In holding at Dallas this month its 37th annual meeting the National Wholesale Druggists' Association has wisely honored one of the largest States in the Union and at the same time will afford its members and their guests opportunities to become acquainted with the growth, development and commercial importance of Texas. Both Dallas and Waco are to entertain the visitors and the hospitality surely will be both edifying and generous, for in Texas the druggists are believers in enjoying the good things of life and in cementing business acquaintance with a liberal application of the social side, as any one can testify after partaking of one of the famous "oyster roasts" which are frequent concomitants of gatherings of Lone Star pharmacists.

In a business way the N.W.D.A. will have important matters to discuss affecting the conduct of trade, but without there being any conspicuous disturbance of conditions to cause anxiety or much more than the ordinary routine. Nevertheless the attendance will be large, for while no member can afford to miss the proceedings, the lure of Texas sightseeing and entertainment will have their effect upon the inclinations of those tempted by lesser considerations to remain at home.

THE NEXT NEW YORK EXAMINATIONS.

In carrying out the policy of conforming with the requirements of the Pharmaceutical Syllabus the New York State Board of Pharmacy has assigned special subjects to each of the nine examiners and in the preparation of questions it is the intention to hold each examiner responsible for his division of the work. The list, as printed on page 1058 of this issue of the ERA, will be found especially interesting to retail druggists. It would show the advisability of proceeding carefully and cautiously in bringing the examinations around to the P.S. standards, for, assuming that the subjects are apportioned with the idea of giving them to experts in the various topics, together with the fact that the colleges have not had time to prepare all of their students for examinations based entirely upon the P.S. plan, there is danger that the results will be unsatisfactory both to students and educators.

The object of the P.S. is praiseworthy in the highest degree, but undue haste in forcing compliance with new standards, unless ample time be given for preparation on the part of those concerned, is invariably the source of confusion and negative effects. The questions propounded and the percentages of applicants at the next examination of the New York Board will be awaited with interest.

INCREASING LIABILITY OF EMPLOYERS.

Several changes in the New York laws relating to the liability of employers for injuries to their employes, which went into effect on September 1, are of much importance and druggists who have liability insurance policies should ascertain if they are now fully protected under the new laws. The fellow servant rule is greatly modified and the burden of proof of contributory negligence is transferred to the employer as against the employe. Another amendment makes the employer liable for many accidents for which he could not previously be held liable for damages. Most of the policies cover these changes, but there are two additional laws creating a new kind of liability for employers that is not covered by the old policies.

A new doctrine of law is created providing for "compensation" to injured employes, irrespective of the question of negligence, as distinguished from the old doctrine of "damages" to employes because

of the negligence of the employers. The policies in force protect the assured against "damages," but *not* against "compensation," unless so stipulated by endorsement or otherwise. If you are an employer, how does your policy read?

OF PRACTICAL BENEFIT TO MEMBERS.

Kings County Ph.S., which has won such success in detail work with physicians for the benefit of its members, again made a big strike in practical organization work when it offered to pay the expenses of its members in test cases which might grow out of the enforcement of the New York Health Board's new morphine regulation. Kings Ph.S. incurred a possible obligation in the latter emergency of hundreds and perhaps thousands of dollars, but in the protection of its members when threatened with a curtailment of their rights there was no thought of anything more than performing a legitimate service of the organization. One beauty about this offer was that there was no talk of assessments, nor calls for anything except regular dues, following the same policy which has prevailed with the propaganda work, the cost of which is borne by the society. In this respect it sets a praiseworthy example for all similar associations.

COPYRIGHT GIVES PRICE PROTECTION.

A notable decision just handed down by the New York State Court of Appeals, in the litigation between the R. H. Macy Co. and the American Publishers' Association, affirms the principle of protection of ownership and maintenance of prices in selling copyrighted books. In the suit the Macy concern sought damages because its supplies of books were restricted by the publishers on account of the cutting of prices. Macy won as to noncopyrighted books and secured a verdict of $2700 for restrictions in relation thereto, but the courts held that there could be no recovery as to copyrighted books. The litigation, which has been in progress for six years, would now seem to be finally settled.

President Guilford, of the N.A.R.D., like his predecessor, is a strong A.D.S. man, but, unlike Mr. Huhn, he holds no office in the syndicate. Mr. Guilford is a firm believer in co-operation and has been very successful in his business through applying its principles wherever possible. For instance, in 1889, when he reorganized and incorporated his business he arranged for his oldest, best and most loyal employes to become stockholders, refusing to dispose of any stock to outsiders. With a progressive, enterprising man at the helm, aided by active, clever and devoted assistants in the persons of part owners, can any one wonder why H. B. Guilford's two pharmacies in Rochester, N. Y., are models of their kind and so popular with their patrons?

Some idea of the relative growth and importance of Texas in a pharmaceutical way may be obtained by contemplating the fact that during the three years of existence of the present State Board of Pharmacy it has issued more than 6000 certificates. In the ERA DRUGGISTS' DIRECTORY for 1910 there were 2367 drug stores credited to Texas, which number has increased since this standard work was compiled. Allowing an average of two druggists to each store the number of pharmacies now is probably well towards 3000. In the old settled States of New York and Pennsylvania, in which new stores are not so often established, the totals were respectively 4168 and 3405. The members of the Texas board are entitled to congratulations not only upon their splendid show of activity in actual work, but also upon the steady, consistent and effective efforts which they have put forth to place Pharmacy in Texas upon a par with the best standards in other States.

Switzerland has passed a law prohibiting the use of the red cross of the Geneva Society in trade-marks and for commercial purposes generally. Existing trade-marks, in which the cross appears, may be used until October, 1912. The movement to confine the use of the emblem to the purposes with which it is associated in the popular mind seems to be gathering continued headway, which will cause no regret to anybody, except, perhaps, persons who have traded upon this symbol of succor for the victims of strife, accident and cataclysms.

Kansas has come to the conclusion that the serial number guaranty does not accomplish its purpose, a fact which the ERA predicted years ago when the subject was first agitated in connection with the Federal Pure Food and Drugs Act. The interesting information that Kansas has eliminated the serial number guaranty, so far as that State is concerned, was given in the October SODA FOUNTAIN, which contained much other news relating to pure foods.

Dr. Reid Hunt's report of the Brussels Congress, which appears in the *Public Health Reports*, is a concise and comprehensive review of the activities at the international conference and confirms the impression that the delegates proceeded in their deliberations with due regard for the further benefit of pharmacy in its scientific and professional ramifications throughout the civilized world.

How many medical men do you suppose there are in New York City? There are 7169 registered physicians in the city, just 864 more than in all the remainder of the State, the total for which is 13,474, an increase of 451 over last year. In New Jersey there are 2558 registered physicians, an increase of 100, and in Connecticut there are 1384, a gain of 80

That Paris drug clerks lack nothing in strenuosity is evidenced by recent riots in which they engaged to intimidate druggists who refused to join in the general closing of pharmacies at 9 p.m. That the early closing sentiment is deep-seated is shown by the fact that only half a dozen of the 1800 proprietors refused to agree to close.

"Pharmasisters" is the coinage of a fertile Colorado brain bent on inventing a new word to characterize the wives, sisters, daughters, as well as others of the fair sex, in attendance at pharmaceutical functions. As all good pharmacists are brothers, why not accept "pharmasisters" to describe their feminine relatives and friends?

Shorter hours for drug clerks in Great Britain continue to be agitated and a bill is pending in Parliament which provides a maximum of 60 hours per week, with a provision that on three evenings a week the clerk shall not be worked after 8 p.m. The outlook for the measure is said to be good.

Iowa's Pharmacy Commission seems determined to preserve a high standard for new pharmacists in that State, judging by the failure of all but three applicants in a recent class of 26, although some of the rejected 23 may ascribe their misfortunes to that luckless numeral.

Pure jewelry is the latest fad in New York. A Maiden Lane jeweler was arrested the other day for selling a bracelet of gold marked as 14 karats fine, when it was only 9.8 karats fine. Section 431 of the Penal Code makes the offense a misdemeanor.

Druggists who possess soda fountains and do not operate them during the Winter season are making a serious mistake. Hot soda sells well, while there are many calls for cold beverages even on chilly days. Both are profitable.

Pathos permeates the "Thanksgiving Experience" which Mrs. Wallace gracefully recounts on page 1053 and it should be read by druggists who offend against the laws governing the sale of narcotics.

CORRESPONDENCE

Making the Telephone an Income Getter.

Editor The Pharmaceutical Era:

A great deal has been printed about the telephone as a nuisance to drug store owners and various ways have been suggested for making it pay for the trouble. Some time ago I took the bull by the horns and determined to get something back for my trouble. I will tell you how I did it. First I had some blanks printed like the following:

TELEPHONE MESSAGE.

From the ..... Pharmacy.

You are requested to come to telephone ..... where a friend wishes to speak to you.

Please call up .....
at.....o'clock.

(This space blank for mem. or message.)

With this blank, filled out as required, I sent by the messenger to neighbors receiving messages a card printed as follows:

TELEPHONE MESSAGE.

From the ..... Pharmacy.

A charge of five cents is made for delivering this message.

This arrangement met with instant favor. I did not hear a single complaint and on the other hand several persons spoke to me of being satisfied with it, because they felt that they were not imposing on me. There have been even more of these calls under the five cent charge than there were under the old arrangement and while I am under no extra expense my cash receipts from this source are now averaging $2 a day. DRUGGIST.

Why Not Have One Powerful Organization?

Editor The Pharmaceutical Era:

The attitude of the Board of Health towards the local pharmacists relative to the enactment of the morphine ordinance is to my mind a reflection of the inactivity and passiveness of condition into which the pharmaceutical organizations of this city have drifted. Whether the honorable board anticipated any objection on the part of these associations is a question: that it never entered its members' minds to fear or respect any forthcoming objections is patent, inasmuch as no association of retail druggists was consulted.

Aside from the direct damage done us by the ordinance the autocratic bearing of the Board of Health is in itself exceedingly irritating. The pharmacist-delegates were informed the first time they waited upon Commissioner Lederle that the board's time would be limited as it was about to go into executive session. The representatives had waited a very considerable time after their appointed hour, but acquiesced to the commissioner's promise of an unlimited interview a week later. After another long wait on the latter date and during which all but a lucky few stood up, the delegates were ushered before the board. Here they again, including one lady present, had the pleasure of standing through the interview. The Commissioner practically opened the hearing by announcing that no reasons would be given for the enactment of the ordinance, as the board would only hear objections. This in itself constituted a stab in the dark. The committee over, he requested that a smaller committee meet with him at a date to be made known later.

Do you think the ordinance would have been passed in its present form if all the pharmacists in New York City were united in one, powerful organization? And with such an organization don't you think the retail pharmacist would receive much more consideration?

New York, Oct. 19, 1910. DISCONTENTED.

Druggists and Tobacco.

Editor of the Pharmaceutical Era:

I have noticed an article in the October number of your publication, page 976, regarding policy of Geo. W. Flynn, a druggist. If all the druggists had followed his plan there would not be so many in their graves today and those that are not dead would not die quite so young. Long hours are a bad thing, but I notice the druggists that sell cigars and tobacco smoke to excess and do so during most of their leisure time.

The lungs are very busy members of the body, purifying and heating the blood and where people give them smoke instead of pure air, they fail to purify the blood as they would if the person inhaled only pure air. The blood becomes so loaded with impurity that it is difficult for the heart to pump it through the system and when it stops they call it failure of the heart. It reminds me of the boy who filled the pump with sand and gravel and broke the pump and then went to his father and said "father the pump is broke." One who indulges in alcoholic liquor also affects the heart and that is doubly bad because a person usually uses tobacco for several years before he uses liquor to excess. Yours very truly,

New York, Oct. 6. A. MAJOR.

Trade in Edibles as a Drug Store Side Line.

Editor The Pharmaceutical Era:

I am sending you herewith the bill of fare of a drug store which conducts a coffee room. As you will notice, it is very complete and would do credit to a restaurant, but can you wonder why some people refuse to recognize pharmacy as a profession when you can get almost anything edible from green onions and radishes to a seven course Spanish dinner or spaghetti a la Italienne at a pharmacy?

Albany, N. Y., Oct. 10. OLD SCHOOL.

[The enclosure shows the ultimate development of the luncheon in drug stores. Opinions will naturally differ as to how far a druggist ought to go in the matter of providing articles of food at soda fountains and in some sections of the country the limit is constantly being extended. Strictly ethical pharmacists will continue to deplore the luncheon side line and will confine themselves to drugs and pharmaceuticals, while others will expand in any way that seems calculated to be of benefit to themselves and to their patrons. The question propounded is one that requires some thought pending an answer.—ED.]

To Prevent Publicity Regarding Private Remedies.

MADISON, Oct. 20.—Preparations are being made by members of the Wisconsin Ph.A. for drafting a bill to be presented at the next session of the State legislature to suppress the publication of advertisements of remedies for certain private diseases. It is proposed to make the penalty a fine of from $25 to $300. Advertisements published in medical papers and trade journals will be excepted. The druggists are also using their influence to have all remedies and related articles, for use by women, placed in packages without detailed descriptions on the outside, and to have all booklets, etc., of private medical nature prohibited from distribution by any person, and to use every means possible to keep such literature from the hands of children and young people.

Mo.Ph.A. to Meet in Southeastern Missouri.

Secretary Whelpley announces that the Missouri Pharmaceutical Association will hold its 33d annual meeting at Cape Girardeau, June 13, 1911, and continue four days. I. Ben Miller has been elected local secretary. Missouri Pharmaceutical Travelers' Association will convene at the same time and place. William F. Kahre, of St. Louis, is president. Missouri Board of Pharmacy will examine candidates for registration, June 12. Those desiring to take the examination should notify the secretary, Charles E. Zinn, 300 W. 9th street, Kansas City, Mo., at least five days in advance.

Alimony.

Many a druggist who goes out for his competitor's scalp is "snatched bald-headed" before he returns.

Face To Face.

A Thanksgiving Experience.

By Emma Gary Wallace.

THE wind howled fitfully past. It raced up the avenue and tore down the side streets in angry fury. The woman drew her thin shawl closely about her shrunken old form and hurried along the deserted street—a mere leaf on the gale.

She paused in front of the brilliantly lighted drug store. It was all glitter and warmth and color. She knew better than to make her appeal for the "stuff" here. She shivered and turned away clasping in her cold hand the coin she held—the last in the world, and then—

The very brightness of the store had answered her, casting long, dark mocking shadows athwart her brain. If—oh, Father of the Storm-Tossed, *if* she could but kill the unholy desire for the brain and soul destroying poison. The love and hate and lure of it were implanted—entwined with the vitals of life itself.

In quick phantom like procession the forms of mother, father, husband, children—little soft clinging children—trooped past. Baby Jamsey, the dearest, sweetest of them all, stretched up appealing arms.

A fury of rage swept over her. Why was the hateful "stuff" made—sold! If there were a God above, an omnipotent being, why did he permit such infamous traffic! Why did he not strike its very existence off the earth by the lightning of his wrath!

Her tortured heart cried out in agonized longing for her woman's birthright—home and love, but bundle of contradictions that the demon-appetite had made of her, only her own harsh, discordant laugh rang forth. The mirthless sound and the sob with which it ended smote upon the ear of an exquisitely gowned woman, who like herself had paused before the brilliantly lighted store. They stood face to face.

The first comer laughed again. This time defiantly. The jarring sound vibrated through and through the suffering heart of the wearer of costly furs and found an answering echo.

"So *you* are unhappy, too," the younger woman asserted bitterly with lips set in a straight, hard line. "You, too, have drunk of life's cup and found nothing but dregs!"

"Yes," the other replied with a strange mixture of eagerness and sadness, "but I know where I can get what will make me forget all. They will not sell it here. I can show you too."

The newcomer looked at her in startled inquiry.

"You mean—"

"I mean this," the first one replied dully, and slipping her hand into her bodice she brought out a small slender instrument.

The other shrank back as if struck by an unseen hand.

"Not that," she entreated, "it has been the curse of my life. It has driven me to despair—to—to a step that will end, not prolong the misery of it all. Let me beg of you as you value your own happiness and that of those near to you to leave the 'stuff' alone."

"You don't look like a dope," the other said bluntly.

"No—no, but what is the use of the struggle, the humiliation, the knowledge that the fingers of scorn and pity are ever directed toward you! I could even stand that, but I cannot bear His utter debasement of himself any longer. It is Thanksgiving night and I have nothing to be thankful for—nothing."

"Come along with me," the older woman returned with firmness. "I have thought the same way, many a time, but when I came to think it over—this is bad enough here—*that* may be a million times worse. I must have it, come, it is just a little way to where you can buy if you have the coin."

Her voice trailed off huskily. She had forgotten her companion's presence. Like a wraith she glided through the eddying gusts.

The younger woman could not have told why, maybe it was to get away from herself—her own temptation, but she hurried after the retreating form.

"Please stop—stop—" she called faintly. The wind made speech difficult.

The pursued turned her head. The glassy stare and pallid face told of consuming desire.

"I can't stop, I can't if I would!" she answered hoarsely.

Something urged the woman from the marble house on Millionaire's Row to go with her. Side by side they hurried down the dark streets and across littered alleys. Not a word was spoken.

Ahead colored globes beckoned through the night and the sign of a mortar and pestle stood honorable guard over the door.

Another moment and they were inside.

"I—I must see the tall, peaked-faced man," the woman began hollowly. "He—he knows me, and always gives me the kind of medicine I want."

The honest-eyed young fellow behind the counter observed her pityingly. He glanced at her companion in something akin to surprise.

"I—I must see the tall peaked-faced man," complained the husky voice—"He knows."

"This business has changed hands," the man replied. "I took possession last night, Madam. The tall, peaked-faced man for whom you inquire thought best to make a hurried trip abroad for his health. I had not expected regular customers of this kind, but I am sorry to say you are not the first to be disappointed today, for I must tell you as I have told them that my business will be a legitimate one if I do not make enough to pay the rent and the sheriff takes it and me."

The woman from the "Row" impulsively reached out her hand, but suddenly became as motionless as if frozen.

She was listening with head erect, flashing eyes and dilated nostrils. Again came that peculiar, familiar hack, followed by the rasping clearing of the throat. The sharp quick sounds were unmistakable.

"Who is inside?" she demanded haughtily.

"I do not know," the proprietor said, regarding her earnestly. "He is another 'regular.' Came in here awhile ago and was in such a condition, that I took him in. I was afraid to let him go. He was in a mood to do himself harm. Sometime he has been a gentleman, he is dressed like one now."

"It is my husband," the woman answered in a voice that trembled in spite of her efforts to control it. "May I go to him?"

Silently the drug store man led the way. There he sat, the benumbed half-dead creature that he was, a mental and physical derelict becalmed after the nerve-storm through which he had passed.

Ah, and she had meditated a worse crime than this! Had deliberately planned its detail with self-pity, even joy. Her whole nature revolted against herself rather than against him.

He had never known a mother—she had been blessed with the best in the world. His mentality was less brilliant than hers except that he had an unusual gift for making money. And putting all that aside his crime had been against himself alone—hers against herself and another for the crown of motherhood had been placed above her brow.

Two hours—an hour before, and she would have spurned him with bitter contempt. Now she sank to her knees at his side in an abandon of grief—forgetting the dingy back-store and the publicity.

He was no longer a debased fallen man but an erring child. The mother-instinct awoke. He was hers to save.

A shrill cry startled them. The forgotten woman had followed. Like a hungry tigress she flung herself upon the half-stupified man.

"And you too. You too—Jamsey, my baby! Where is the cursed thing. I say where is it. You shall not have it any more. I went away like a thief in the night when you were three years old to save you from the disgrace of a mother unfit to be by your side. But it was too late. I should have stayed and shielded you from the appetite I had given you. I have sunk down to the depths, but you must be a man. Hear me, Jamsey, do you know who I am?"

The man stared at her stolidly.

"Are you very, very sure that you are his mother?"

The question came from the kneeling woman. Her face was like chiseled marble against her black furs.

"Sure?" Why child, I've watched him from a distance for years. I knew he had a wife, but I paid no heed to her—he alone was my flesh and blood."

The wife sprang to her feet. Hope shone in her eyes like a star.

"You watched him and loved him and yet to save him dis-

grace you remained in unknown poverty? The courage of such self denial is beyond ordinary comprehension. You—he, can give up the dreadful habit and be happy yet. Say you will—for his sake, for your own sake—mother of his and you shall be mother of mine as well."

"And you do not despise, loathe us?"

"'Let him who is without sin cast the first stone,'" the young woman answered contritely.

The man in the chair arose stiffly.

"There seems to be a blamed fuss over nothin' so far as I can make out," he said speaking for the first time. "Let's go home, Marcia."

The elderly woman gripped the corners of her shawl. Hope struggled with fear. Perhaps—yes most likely, she would be forgotten.

The younger woman reached out her muff.

"Please, carry it for me," she said, taking her husband's arm.

The old woman's face lighted up like one who has received a life reprieve. Slowly the strange procession filed out from behind the crowded cases. The wife paused in the front store to place the warm boa from her own neck about that of the erring woman. She turned to the proprietor.

"A life and death struggle awaits us all," she said with a catch in her voice. "How strange that any man can be willing to lose his own soul and that of his neighbor for a few easily-spent dollars. Surely they are not worth such a harvest as this! God bless you for the stand you have taken this Thanksgiving day."

"I'm thankful for the courage to do my duty," the man returned with far away eyes, which in that moment's retrospect saw the temptations met and resisted that had made a man of him.

The woman old and haggard and broken, the woman young and beautiful and well-nigh heart-broken, the man of steel and even the man of clay in that brief moment felt the brooding presence of All-prevading Help—and from each heart went forth a silent petition for courage to meet the coming days like soldiers, face to face.

U.S.P. Sub-Committees Appointed.

WITH the announcement last month of the sub-committees for the ninth revision of the United States Pharmacopœia (except for appointing another member in place of Prof. Hallberg, who died after the announcement was made), the way has been cleared for actual, active work on the new volume. The announcement was made by the chairman of the committee of revision, Prof. Joseph P. Remington, directly after the list had been approved by the board of trustees. It is probable that a meeting of the full committee will soon be held in Philadelphia.

In addition to electing the members of the executive committee, the general committee has chosen a new member, Dr. S. Solis Cohen, of Philadelphia, who fills the vacancy caused by the resignation of Dr. Edward Kremers, of Wisconsin University. Dr. Cohen has also been elected a member of the Executive Committee and is chairman of the Sub-Committee on Scope. For years he has been an able contributor to Pharmacopœial literature. He has been professor of clinical medicine at Jefferson Medical College since 1902, and is professor in clinical medicine and therapeutics in the Philadelphia Polyclinic for Graduates in Medicine.

The members of the executive committee, the sub-committees of which they are the chairmen and the members of these sub-committees, as well as the scope of the work which each will do, are as follows:

NO. 1—ADMISSIONS AND DELETIONS—Dr. S. Solis Cohen, chairman; A. R. L. Dohme, Prof. C. S. N. Hallberg, Dr. Reid Hunt, Dr. P. Marvel, Dr. O. T. Osborne, Albert Plaut, Prof. H. H. Rusby, Dr. Torald Sollman, Dr. H. C. Wood, Jr.

NO. 2—THERAPEUTICS AND PHARMACODYNAMICS—Dr. Torald Sollman, chairman; Dr. S. Solis Cohen, Dr. N. S. Davis, Dr. C. W. Edmunds, Dr. W. S. Haines, Dr. R. A. Hatcher, Dr. O. T. Osborne, Dr. H. C. Wood, Jr.

NO. 3—BIOLOGICAL PRODUCTS, DIAGNOSTICAL TESTS—Dr. John F. Anderson, chairman; Dr. R. A. Hatcher, Dr. Reid Hunt, Dr. Eli H. Long, Dr. Torald Sollman.

NO. 4—BOTANY AND PHARMACOGNOSY—Dr. Henry Kraemer, chairman; Dr. Lyman F. Kebler, Albert Plaut, Prof. H. H. Rusby, Prof. L. E. Sayre, Prof. J. O. Schlotterbeck, Dr. Rodney H. True.

NO. 5—GENERAL AND INORGANIC CHEMISTRY—Dr. C. H. La Wall, chairman; Prof. H. V. Arny, Dr. E. H. Bartley, Prof. C. E. Caspari, Prof. Virgil Coblentz, Dr. L. F. Kebler, Dr. E. H. Long, Prof. W. A. Puckner, Dr. Geo. D. Rosengarten, Prof. S. P. Sadtler.

NO. 6—INORGANIC CHEMISTRY—Dr. G. D. Rosengarten, chairman; Prof. C. E. Caspari, Prof. V. Coblentz, A. R. L. Dohme, Dr. L. F. Kebler, Prof. J. A. Koch, Dr. C. H. La Wall, Dr. A. B. Lyons, Prof. W. A. Puckner, Prof. S. T. Sadtler, C. E. Vanderkleed.

NO. 7—PROXIMATE ASSAYS—Dr. A. B. Stevens, chairman; Prof. C. E. Caspari, A. R. L. Dohme, J. M. Francis, Prof. H. M. Gordin, Dr. L. F. Kebler, Prof. J. A. Koch, Dr. C. H. La Wall, Dr. A. B. Lyons, Prof. W. A. Puckner, C. E. Vanderkleed.

NO. 8—VOLATILE OILS—Dr. H. Wiley, chairman; G. M. Beringer, Prof. C. E. Caspari, A. R. L. Dohme, J. M. Francis, Prof. J. A. Koch, Dr. C. H. La Wall, Prof. S. P. Sadtler, Dr. L. F. Kebler.

NO. 9—FLUID AND SOLID EXTRACTS—Dr. G. M. Beringer, chairman; Prof. Chas. Caspari, Jr., Prof. C. L. Diehl, Prof. George C. Diekman, J. M. Francis, Prof. E. G. Eberle, Prof. J. M. Good, Otto Raubenheimer.

NO. 10—AROMATIC WATERS, SPIRITS, LIQUORS—Prof. L. C. Diehl, chairman; Prof. H. V. Arny, Dr. G. M. Beringer, Wilhelm Bodemann, Prof. E. G. Eberle, J. W. England, Prof. J. M. Good, Prof. W. G. Gregory, Otto Raubenheimer.

NO. 11—SYRUPS AND ELIXIRS—W. C. Alpers, chairman; Dr. G. M. Beringer, Prof. C. L. Diehl, Prof. George C. Diekman, Prof. E. G. Eberle, J. W. England, J. M. Francis, C. F. Nixon.

NO. 12—CERATES AND OINTMENTS—Otto Raubenheimer, chairman; W. C. Alpers, Prof. George C. Diekman, Prof. E. G. Eberle, J. W. England, Prof. J. M. Good, L. C. Hopp.

NO. 13—MISCELLANEOUS GALENICALS—Prof. C. S. N. Hallberg, chairman; Prof. H. V. Arny, W. Bodemann, L. C. Hopp, C. F. Nixon, Otto Raubenheimer, Prof. L. E. Sayre, M. I. Wilbert.

NO. 14—TABLETS, WEIGHTS, MEASURES—Dr. A. B. Lyons, chairman; Dr. L. F. Kebler, Dr. C. H. La Wall, Prof. A. B. Stevens, M. I. Wilbert.

NO. 15—NOMENCLATURE—Prof. Charles Caspari, Jr., chairman; Dr. S. Solis Cohen, Prof. C. S. N. Hallberg, Dr. O. T. Osborne, Albert Plaut, Prof. H. H. Rusby, M. I. Wilbert.

EXECUTIVE COMMITTEE—Prof. Joseph P. Remington, chairman; the executive committee is composed of the chairmen of the various sub-committees named above.

Canada Ph.A. Would Meet Jointly With A.Ph.A.

HALIFAX, Oct. 20.—The Canadian Pharmaceutical Association at its meeting here last month decided to meet in Montreal next year. A resolution was passed favoring a joint meeting of the American and Canadian Pharmaceutical Associations. Officers were elected as follows:

President, Robert Martin, Regina; vice-president, J. B. Tremble, Montreal; secretary-treasurer, J. F. Gibbard, Toronto. Chairmen of committees were named as follows: Legislation, Hon. G. E. Hughes, Prince Edward Island; Canadian Representatives, John Hargreaves, Toronto; Pharmaceutical Education, Henry Wakelin, Ottawa; Progress of Pharmacy, R. C. Fuller, Amherst; Commercial Interests, R. R. Burns, Vancouver.

State Association Formed in New Mexico.

ALBUQUERQUE, Oct. 20.—At a meeting held here recently the New Mexico State Pharmaceutical Association was formed with the following officers: President, B. Ruppe of Albuquerque; vice-president, J. T. Russell of Tucumcari; secretary, R. H. Daniels, Roswell; treasurer, S. Vann of Albuquerque. The next meeting will be held at Roswell, subject to the call of the president.

H. C. Jackson Named for Texas Board.

AUSTIN, Oct. 20.—Gov. Campbell has appointed H. C. Jackson of Austin a member of the Texas State Board of Pharmacy, to succeed Bruce Vredenburgh of Beaumont, resigned, as he has moved to New Mexico.

Test Suit on Morphine Refill.

Six Cent Verdict Against New York Druggist Accused by Woman's Husband of Destroying Her Health by Supplying Her With Drug, but There May be a Retrial of the Action.

The first civil damage suit brought in New York County over the sale of opiates was tried last month before Supreme Court Justice Gavegan and a jury. The suit was based on the public health law forbidding the filling of such a prescription more than twice without a physician's order. Ernest C. Bilton of 68 East Seventy-seventh street sued Norman M. Littell, a druggist, of 731 Second avenue, for $5000 for the loss of the services of his wife because the druggist sold her morphine.

Mr. Bilton testified that his business took him away from home between October, 1907, and June, 1908, and that when he got back his wife's health was completely shattered, although she had been in the best of health when he went away. His wife begged him to get a prescription filled and he sent a neighbor's child to Mr. Littell's store, and when the child came out with a bottle filled he asked the druggist what it was. The druggist replied that it was "Mrs. Bilton's morphia," the witness said. Bilton asked how the druggist dared give morphine to a child, and Littell replied that it was given on a prescription.

Mrs. Bilton testified that she first got the medicine to relieve a pain in her side, and that it relieved her so much that she took two and three bottles a week. She said that Mr. Littell always waited on her and that she didn't know what was in the medicine.

Mr. Littell declared that he was not responsible for Mrs. Bilton's condition, and denied all the allegations made by the plaintiff.

The verdict of the jury was for 6 cents damages for the plaintiff, which is understood not to be satisfactory to either side. Gillette & Clark, attorneys for the plaintiff, are considering the matter of applying for a retrial, on the ground that if the plaintiff was entitled to any damages at all the award should have been for a substantial sum.

May Ask Federal Aid in Narcotic Fight.

NEW ORLEANS, Oct. 20.—There is being waged in this city a fight against the cocaine traffic in which the Federal government may be asked to take a hand, if the present plans of the city and parish officials are carried out.

District Attorney Adams assisted by the police and detective force has recently been vigorously prosecuting offenders both in the city and State courts. The stumbling block has come in the absence of a law which will reach the wholesale merchant who sells the drug without any idea of helping the cause. It is expected that a new law will be framed for passage when the legislature meets two years from now.

The retail druggists' organization here recently passed resolutions denouncing the traffic in cocaine and pledging itself to aid the authorities in every possible manner. The fight is on in earnest and as it appeals to men and women who want to help the uplift of humanity, it follows that the clergy and lodges are helping in every possible manner.

Chapter No. 1 Realized Good Sum on Play.

BOSTON, Oct. 20.—At the October meeting of the Boston Chapter, W.O.N.A.R.D., held at the Vendome Hotel, the sum of $289 was reported as having been realized from the play given earlier in the year and of which Mrs. Jessie F. Waterhouse was in charge. Vacation papers were read as follows: "Richmond," Mrs. I. P. Gammon; "Bermuda," Mrs. Blanche Edmands; "The White Mountains," Mrs. Martha Morey, and "An Auto Trip Through Canada and New Hampshire," Mrs. A. M. Godding. Several piano solos were rendered by Miss Wagner. Under the supervision of Mrs. J. F. Finneran, chairman of the hospitality committee, refreshments were served. Eleven new members were taken in.

Dr. Crampton Retires From Government Service.

Dr. Charles A. Crampton, for 20 years chief chemist of the Internal Revenue Bureau of the United States Treasury Department, has retired from the Government service to engage in private practice as a consulting and analytical chemist, with headquarters in Washington.

Jobbing Companies to Merge.

Gibson & Co., Rochester, N. Y., Arranges to Purchase Entire Stock of the Blauw & Barnum Co., of the Same City—Both Active Members National Wholesale Druggists' Association.

Advices from Rochester, N. Y., are to the effect that early this month there will be an important change in the wholesale drug trade in that city. Under date of Oct. 26 notices were sent to the proper parties, pursuant to the requirements of Section 44 of the Personal Property Law of the State of New York, notifying them that on Nov. 3 the Blauw & Barnum Co. proposes to transfer to the Gibson Drug Co., for cash, the entire stock of merchandise of the said Blauw & Barnum Co.

Both drug corporations are active members of the National Wholesale Druggists' Association. The officers of the selling company are: Charles Blauw, president; W. R. Barnum, secretary and treasurer.

The Gibson Drug Co., established about three years ago, is an offshot of Walker & Gibson, Inc., Albany, N. Y. Charles Gibson, for six years a member of the board of control of the N.W.D.A., and prominent in its activities for a long time, is the president of both the Rochester and Albany corporations. Of the Rochester concern, the late George P. Smith was a vice-president. James Lucy is secretary and treasurer.

Big Suit Against United Cigar Stores Co.

United Cigar Stores Co. has been made defendant in the United States Circuit Court at New York in a suit instituted by the Sargent Cigar & Plantation Co. to recover $1,100,000 damages for alleged infringement of its patents. The complaint alleges that Alston Sargent, president of plaintiff company, is the inventor of a patented humidor for keeping cigars moist and retaining the original flavor of the tobacco that has been imitated by the defendant company and that the patent protecting it has been infringed upon.

Few Druggists in Baltimore Handle Intoxicants.

BALTIMORE, Oct. 20.—In accordance with the law regulating the sale of intoxicants by retail druggists in this city, the Board of Liquor License Commissioners has just completed an investigation into the manner in which druggists dispense alcoholic liquors. According to the investigator's report only a small percentage of the pharmacists handle intoxicants at all, and most of those who do have taken out an internal revenue license for the dispensing of alcoholic liquids for medicinal use.

Substitution Criminal, Says St. Louis Druggist.

ST. LOUIS, Oct. 20.—At the monthly meeting of the Retail Druggists' Association of St. Louis, held yesterday at the Southern Hotel, a number of impromptu talks were made. The matter of substitution of drugs was taken up and discussed, a number expressing themselves against the practice, one speaker declaring that it was absolutely criminal. He said that so far as he could ascertain, St. Louis was practically free of such druggists. A luncheon was served at noon.

What Was the Matter With Moses?

Percy—"Miss Jane, did Moses have the same after-dinner complaint my papa's got?"

Miss Jane—"Gracious me, Percy? Whatever do you mean, my dear?"

Percy—"Well, it says here the Lord gave Moses two tablets."—*November Lippincott's.*

New Pharmacy Rules Approved by the Regents.

The State Regents have approved the new rules prepared by the New York State Board of Pharmacy, as submitted.

PROPAGANDA WORK DISCUSSED FROM BOTH VIEW-POINTS BY DOCTORS AND DRUGGISTS.

Dr. DeLorme Thinks the American Druggists' Syndicate Should Manufacture N.F. Preparations—Not Enough Pharmacy is Taught to Medical Students—Some Rock Bottom Facts.

DR. M. F. DELORME, professor of pharmacy and materia medica, of the Long Island College Hospital, read a paper on "U.S.P. and N.F. Propaganda Work," at a meeting of the Kings County Pharmaceutical Society. He said in part: The average medical schools today are teaching more or less superficial pharmacy, they are teaching pharmacy in order to cover up their past insufficiencies. At the Long Island College Hospital, three hours of pharmacy per week are given for 40 weeks. Every student prepares one of each class of preparations. This degree of teaching pharmacy in medical colleges is not generally known, it having been undertaken only in the past ten years. The physician should be taught pharmacy as he will thus become more interested in official preparations. The physician used to be an easy prey to the glib-tongued detail man, but the A.M.A. now publishes more literature on the N.F. and U.S.P. than does any pharmaceutical organization and the influence thus created is very great.

Dr. DeLorme undertook to discuss the proprietary preparation from the physician's, pharmacist's and his own point of view. He said that in earlier days physicians were willing to be shown by the detail man, being ignorant of the U.S.P. Constant effort on the part of manufacturers to keep their preparations before the physicians and the lethargy of the pharmacists to keep official preparations before them, were the real causes of such a condition. Proprietaries, moreover, were more uniform than U.S.P. and N.F. preparations. But the younger physicians are not as susceptible as were the older.

Many Proprietaries Are Excellent.

Dr. DeLorme said that the physician prescribed proprietaries so much because many of them were excellent. According to the A.M.A., two-thirds of 1000 proprietaries were found on examination to be worthy of use. Why don't physicians write prescriptions calling for the individual drugs in a proprietary instead of prescribing the patent preparation? Because the doctor is not a pharmacist, he couldn't make such a good preparation. He gets results and is satisfied. If he has the opportunity and prescribes a duplicate official N.F. preparation, instead of the proprietary, the N.F. product doesn't look the same and tastes different. On second trial, he gets the same results. The patient thinks something is wrong and the doctor gets discouraged and goes back to the proprietary. Dr. DeLorme again reiterated that a large number of such preparations are efficacious and are effectively combined.

The average pharmacist today, continued the doctor, is the subject of more or less suspicion to the average physician. This statement is strong, but you can't treat a disease until it is properly diagnosed. Reasons for this startling condition are the superiority argument of the manufacturing pharmaceutical houses, the disclosures of the pure food and drug laws, the relegation of the prescription department for other departments in the average drug store, etc. There are probably too many drug stores in this country and especially so is this true of mediocre stores. The physician looks forward to the day when he must dispense as well as prescribe. However, there will always be a place for good drug stores in the larger cities. The physician has confidence in a large number of proprietaries and the utmost confidence in a small number of them. In fact, the physician has more suspicion of some pharmacists than of some proprietaries. The whole question really resolves itself into the personal integrity equation.

Thinks A.D.S. Should Make N.F. Preparations.

When the American Druggists' Syndicate was organized, Dr. DeLorme said he thought the question was solved. He thought he would see the A.D.S. detail man on his grounds with N.F. preparations. But in the list of A.D.S. products, all official preparations are missing. It is a blunder to associate the N.F. with the A.D.S. To his mind, the A.D.S. should devote itself to producing nothing but official preparations and should guarantee these. The A.D.S. factories should be placed where the small pharmacist and the physician could delve into its innermost parts and by prescribing the official preparations which it manufactured, the physician could meet the proprietary man on his own ground and with his own weapons. Dr. DeLorme considered the A.D.S. very good as an investment, and in fighting patents with the same weapons it was a success. But it wasn't what he thought it would be and he admonished the members of the society to all forms of agitations to keep N.F. preparations in view as such was their best weapon to fight patent medicines. At the present time the impression prevails among physicians that quality is not to be obtained in every drug store.

Dr. Anderson Replies to Dr. DeLorme.

To some of the points brought out by the speaker, Dr. William C. Anderson, dean of the Brooklyn of Pharmacy and vice-president of the A.D.S. made reply. The physicians of today, he said, should not be taught to make pills, etc., as such instruction will teach him to dispense. Such procedure is equivalent to teaching pharmacy students the therapeutic effects of drugs in order to have them counter-prescribe. It would be far better to teach the prospective physician incompatibilities in prescriptions so that he could better prescribe. The universal appearance of pharmaceutical preparations, he considered an excellent idea; there shouldn't be any difference no matter where purchased. The prejudice and suspicion which physicians have for pharmacists, he said, was due to the detail man. Recent improvements, however, have increased confidence in pharmacists and this attitude is growing.

The doctor's dream concerning the A.D.S. and its relation to physicians and pharmacists will come true, continued Dr. Anderson. The A.D.S. label will mean absolute purity and at the present time the A.D.S. management is looking for a man who will be responsible for such in their factories.

A.D.S. Preparations are not Nostrums.

U.S.P. and N.F. preparations, he thought, should be made by the retail pharmacist and not be a manufacturing organization. For the A.D.S. to manufacture them, would be to take from the young graduates in pharmacy the very preparations they have been taught to manufacture. It would be taking away from the pharmacist his true practice, the main-stay of his business. The A.D.S. would never have received the support it has if it hadn't taken up the manufacture of household remedies. The retail druggist must handle household remedies. Shall he handle patent medicines for which no profits are forthcoming? No! He, through the A.D.S., can sell his own, A.D.S., preparations when they are called for and get a just profit. The A.D.S. preparations are open formula products, not nostrums; anyone can can get their formulas.

Dr. Anderson said he hoped to see the day when A.D.S. household remedies, no longer necessary because the public have gradually got away from self-medication, would be eliminated. To hasten this the co-operation of the physician and the pharmacist is needed.

Not Enough Pharmacy for Medical Students.

Dr. DeLorme in reply to the criticism of Dr. Anderson relative to teaching the prospective physician pharmacy, said that the medical student didn't get enough in his 80 hours of laboratory work more than to understand the different processes. As to the study of prescription incompatibilities, he said that the student was given forty such prescriptions and was shown what not to do by demonstrations of what occurred when the various ingredients were mixed.

Dr. Muir commended Dr. DeLorme's paper as one of the most valuable ever presented before the society and complimented the doctor upon the very interesting and instructive manner in which he presented his subject. Mr. Heimerzheim said that Dr. DeLorme didn't complain in his paper, he told rock-bottom facts. Upon the motion of Adrain Paradis, a vote of thanks was extended to Dr. DeLorme.

Quite Different as to Painless Guaranty.

"Will it hurt?" asked the precise person, as he sat down in the big chair, says the Washington *Post*.

"Don't you know that I advertise myself as the painless dentist?"

"Yes. But what I want to know is whether you can guarantee me as a painless patient?"

Wide Range of Topics at Recent A. Ph. A. Branch Meetings.

Dr. Rice's Neglected Grave, International Pharmacy, Educational Matters and Scientific Research are Discussed—Preparing Programs for Winter.

THE neglected condition of the grave of Dr. Charles Rice was the subject of considerable discussion on the part of the members of the New York Branch of the American Pharmaceutical Association at the October meeting of that organization. Several thought a committee to care for the same should be appointed, but Dr. Diekman said that a fund existed for such purpose which could be drawn upon at any time.

The owner of the plot, Charles Fountain, for many years the assistant and private secretary of Dr. Rice, however, Dr. Diekman said, would neither fix up the plot himself nor allow anyone else this privilege. It was understood that Mr. Fountain bought the plot for an inconsiderable sum but when approached by representatives of the pharmaceutical organizations with an offer to purchase it, the former set the price at three or four thousand dollars.

A member of Mr. Fountain's family is buried in a grave next to that of Dr. Rice's, and the latter's friends sought to make some arrangement, either for moving Dr. Rice's body to another plot where the grave could be given better care, or to move the other body to another plot where such care could be given to this grave as the owner might deem proper. All overtures, however, were futile of accomplishing any changes in conditions.

An Era representative visited Dr. Rice's grave which is located at the extreme end of Ravine avenue, Woodlawn cemetery. The large tombstone at the head of the two graves bears the inscription:

CHARLES RICE, Ph.D.
Born October 4, 1841.
Died May 13, 1901.
Erected by his friends in grateful appreciation of his eminent services to medicine and pharmacy.

Below the above inscription is the name "Rice" in larger letters. The two graves in the plot, which are side by side, are sunk about two inches below the level of the well-kept lawn. They are covered with weeds, wild grass and fallen leaves. A few violet plants, the only evident attempt at decoration, are crowded by a thriving clump of dandelions.

Beautiful flowers and frost-tinted shrubbery decorated all the surrounding graves leaving in pitiful contrast that of Dr. Rice. As if to remedy appearances a little, a rose bush in a nearby plot extends a long branch laden with several blossoms in full bloom, towards the doctor's grave. The other graves, too, are well built up, another contrast immediately noticeable.

Nature, in her own way, however, has made all Woodlawn equal in a sense. No one can keep the birds from singing over any grave. No one can keep the squirrels from scampering where they will. No one can keep the sun from shining on the grave of Dr. Rice, or of the others who sleep peacefully beneath the sod in this beautiful home of the dead.

The representative of the Era was informed by the management of the cemetery that plot-owners could decorate the graves in any reasonable manner, there being no objection to anything in that direction which would be in harmony with the general surroundings.

Keep Everlastingly At It.

Each Fall shows many new converts to the all-the-year fountain business. If you have not been converted, you had better quickly adopt the method. Run your fountain fifty-two weeks and advertise it twelve months.

BRUSSELS CONGRESS—BOTANY—ASPIRIN.

Telephone Commissions "Too Local," However, for Discussion at October Meeting of New York Branch.

President Otto Raubenheimer, at the recent October meeting of the New York Branch of the American Pharmaceutical Association, held at the New York College of Pharmacy, presented a report on the International Congress of Pharmacy at Brussels and discussed resolutions there adopted relating to the establishment of physical constants, the elimination of such terms as "cloudiness," "opalescence," etc.; the normality of solutions and use of distinct indicators, and the necessity of official methods being tested by pharmacists in pharmacies. Mr. Raubenheimer prepared a paper which was read at the Congress and in honorary consideration thereof he has since been presented with a badge and a silver medal.

E. N. E. Klein, of College Point, L. I., presented a very interesting address on "Botanizing on Long Island." Mr. Klein is one of the very few pharmacists who specialize to any extent in this branch of pharmacy and the information he divulged on the flora of Long Island was all first hand. His various expeditions he traced on a map of the island which was suspended at the front of the room. He passed around neatly-mounted specimens of the plants he discussed.

Dr. George Diekman reported on the annual meeting of the New York State Ph.A. meeting held several months ago at Saratoga Springs. The National Pharmaceutical Society made quite a "hit," being represented by a considerable number of delegates. Dr. Diekman thought too much time was devoted to entertainment.

A number of matters brought before the branch were declared too far beyond its jurisdiction for action. Hugh Craig, secretary, presented a synopsis of a 17-page letter from the Farbenfabriken of Elberfeld Co., to the effect that if members would sign an agreement to refrain from selling acetyl salicylic acid other than Aspirin and would turn over all such preparation now in their possession, etc., the company would not prosecute them.

A communication from Wm. C. Alpers, chairman of the 'phone committee of the German Apothecaries' Society, was read in which he discussed the telephone situation in New York City and quoted the commissions received in other cities. He concluded that local druggists should not be deprived of their present 20 per cent commission, and that the branch should appoint a telephone committee to confer with such committees of other pharmaceutical organizations. This matter was classed as "too local."

Miscellaneous business consisted in treasurer Weinstein's report that the sum of $44 was on hand; Thomas P. Cook, chairman legislative committee, reported no National or State

bills pending; Dr. Dickman promised a full report on Board of Pharmacy work to be presented at November meeting, and George H. Hitchcock announced another joint meeting to be held this Winter.

DR. HALLBERG'S ILLNESS CAUSE OF SORROW.

Richmond Meeting and Pharmacopoeial Convention Discussed at October Meeting of Chicago Branch.

CHICAGO, Oct. 20.—The Chicago Branch of the American Pharmaceutical Association held its first meeting of the season at Northwestern University Building, last Tuesday evening. The meeting was informal and the program consisted of reviews and impressions of the national meeting and the pharmacopœial convention. The news of the very serious illness of Professor Hallberg saddened the members, for his efforts have been largely responsible for the establishment of the branch and his constant guidance has done much to maintain interest in its work.

In reply to many questions Secretary Day told briefly of Professor Hallberg's illness. While his condition had been such that his life was despaired of, there was now a change for the better and his recovery was looked for.

Mr. Meissner spoke of Professor Hallberg's many fields of activity and the members present adopted a resolution expressing their sorrow at the serious illness of Professor Hallberg and their sympathy for him and his family. [NOTE:—Prof. Hallberg died on Oct. 22. An account of his death will be found on page 1101 of the ERA.—ED.]

President Storer then asked those members who had attended the Richmond meeting of the Pharmacopœial Convention to give their less fortunate colleagues the benefit of their observations and impressions. A series of interesting talks followed which were participated in by Messrs. Meissner, Eliel, Patterson, Day and Clark. Mr. Meissner complimented the branch upon the selection of so many of its members for high offices in the association and on the Committee of Revision. He believed that the revision of the Pharmacopœia would be completed within a shorter time than was the case with the U.S.P. VIII.

Professor Clark reviewed the proceedings of the scientific section saying that it had been the best meeting the section had ever held, thanks to the energy and foresight of Chairman Wilbert.

A program for the coming winter was then discussed. Mr. Eliel urged that a meeting of the branch be held in South Bend, Ind. This novel proposition met with considerable favor and after some discussion was referred to a committee on program, consisting of Messrs. Patterson, Day and Eliel, who are to draw up a program for the winter meetings.

Information was asked concerning the solubility of the various commercial brands of Theobromine-sodium-salicylate. It was suggested that the addition of sodium bicarbonate aids in its solution. One of the hospital pharmacists present stated that at his institution as much as five pounds a year of this double salt is used.

The branch will meet again Tuesday evening, Nov. 15.

ACTIVITIES AND INFLUENCES OF THE A.PH.A.

Prof. Kalusowski Contributes an Illuminating Paper to Washington Branch—Letter From Dr. Wiley.

WASHINGTON, Oct. 20.—City of Washington Branch of the A.Ph.A., at its October meeting at the National College of Pharmacy, listened to an interesting review by Prof. Henry E. Kalusowski of the various activities of the A.Ph.A., particular attention being given to the influence that it has exerted on pharmaceutical education and the development of the sciences of pharmacy. He pointed out that the A.Ph.A. had always taken a leading part in solving the problems that are involved in the every-day work of the drug store. One noteworthy act was the adoption, in 1875, of the report of the committee on formulas for elixirs in response to the general and urgent demand of pharmacists for relief from a condition which threatened the very existence of the retail druggist as the [illegible] of medicines.

Dr. J. A. Le Clerc reviewed the summer meeting of the American Chemical Society, Dr. Murray Galt Motter reviewed the San Francisco meeting of the American Medical Association, and the Pittsburg meeting of the N.A.R.D. was commented on by Willard S. Richardson who expressed the opinion that it was the most important and most harmonious meeting ever held by the N.A.R.D. The financial condition of the association was thought to be unusually satisfactory and the outlook for the future particularly bright.

The following tentative program has been adopted: November, The Pharmacopœia of the United States; December, The National Formulary and the *Journal of the A.Ph.A.*; January, 1911, Unofficial Standards, National and International; February, Some new Formulas that are worth developing; March, Some proposed N.F. Changes; April, Standards for drugs and assay processes; May, The proposed standards for N.F. articles.

At the branch meeting on Nov. 11, Dr. Harvey W. Wiley will present a communication on the U.S.P. Convention and the future of the Pharmacopœia.

EXAMINERS ASSIGNED TO SUBJECTS BY BOARDS

In New York and Texas Action is Taken to Comply With Provisions of the National Syllabus.

ALBANY, Oct. 20.—The New York State Board of Pharmacy at its meeting in September, assigned each of its nine members specific subjects of the Pharmaceutical Syllabus for which each is to be responsible in the preparation of question papers. There were three members assigned to each of the three principal branches of pharmacology. The assignment of each examiner follows:

First examiner, materia medica, botany and microscopy; second examiner, pharmacognosy, general facts and principles, histological and commercial pharmacognosy; third examiner, physiology, toxicology posology, and pharmacotherapy dynamics; fourth examiner, elementary, general inorganic and qualitative chemistry; fifth examiner, pharmaceutical, inorganic and quantitative chemistry, and drug assaying; sixth examiner, elementary physics, manufacturing chemistry, general organic chemistry; seventh examiner, theory of pharmacy, practice of pharmacy; eighth examiner, commercial, manufacturing and dispensing pharmacy; ninth examiner, pharmaceutical arithmetic, Latin and jurisprudence.

Dr. Henry L. Taylor, secretary of the executive committee of the National committee on Pharmaceutical Syllabus, has also been notified that at a meeting of the Texas State Board of Pharmacy held in Galveston in September, it was unanimously agreed that the suggestions outlined in the Syllabus should be adopted. It was held that the Syllabus was a wonderful step in the right direction toward unanimity of opinion as to what should be considered essential to be taught those seeking an education in pharmacy.

It was agreed that some examiners have hobbies on some subjects but that the Syllabus seems to have given all specialists a fair and friendly consideration. There were nine sections in the last examinations of the Texas board and others are contemplated, such as, bacteriology, physiology and hygiene.

MANHATTAN PH.A. MAY MEET IN AFTERNOON.

Old Guard Thinks Change in Time of Meeting and Reduction of Dues May Bring Out Members.

In the absence of President C. H. Lowe, Thomas Latham presided at the October meeting of the Manhattan Pharmaceutical Association held at the New York College of Pharmacy. The principal subject of discussion was the revised ordinance of the sanitary code which restricts the sale of morphine and preparations containing morphine. No action was taken awaiting the outcome of objections recently made before the Board of Health by the conference delegates.

Another matter which those present considered must be remedied in the near future was the chronic lack of attendance. The plan which seemed the most feasible was a reduction of dues and the holding of meetings in the afternoon. If this is decided upon it will mean a change in the by-laws and according to the association's constitution three or four months would elapse before such a change could be effected.

Three Years For Violating Ohio Liquor Law.

WELLSTON, O., Oct. 20.—Frank Heinel, South Wellston druggist, who was found guilty of illegal liquor selling on two occasions, and assessed fines and costs aggregating $672, has been taken to the workhouse to work out his fine, the time required being nearly three years. Heinel was arrested three times, but raised the money to pay his first fine.

Health Board Likely to Modify Anti-Morphine Section 182 for N. Y. City Druggists.

As a result of conferences with the New York Board of Health the pharmacists of this city are very hopeful that the board will amend Section 182 of the Sanitary Code so that it will be less objectionable. The subject has stirred the pharmacists to a considerable degree. The section as objected to and a substitute, which it is hoped the board will adopt, at least so far as N.F. and U.S.P. preparations are concerned, are as follows:

SECTION 182 AS IT STANDS.

"No cocaine or salt of cocaine and no morphine or salt of morphine, either alone or in combination with other substances, shall be sold at retail by any person in the City of New York, except upon the prescription of a physician."

SUGGESTED FOR NEW SECTION 182.

"No morphine or salts of morphine, either alone or in combination with other substances, shall be sold by any person in the City of New York, except upon the prescription of a duly registered physician, dentist or veterinary surgeon, or by wholesale drug dealers and manufacturers to retail druggists actively engaged in the drug business, provided that nothing in this section shall prohibit the sale by a licensed pharmacist of any U.S.P. or N.F. preparation."

The last word up to press time of this issue of the ERA was a conference held with the Board of Health officials on the 27th by a committee composed of the following druggists: Dr. Wm. Muir, Thos. F. Main, Wm. F. McConnell and C. A. Mayo. The session was not public but it is understood that the objections to Section 182 were discussed and while no action was taken the impression was created that the board would very likely recognize the justice of the suggested changes shown in the substitute as printed above. In relation to narcotics in patent or proprietary medicines there is no expectancy that the board will change its position of opposition.

Earlier in the month the Board of Health gave a hearing on Section 182 to a committee of about 30 representative pharmacists, representing all of the pharmaceutical organizations of the city. Dr. William Muir, representing the Kings County Ph.S. and acting as chairman of the committee, opened the argument by asserting that the absolute restriction of morphine sales, except by prescription, was too drastic and interfered to a certain extent with the rights of the public. He asked why the ordinance had been amended, in reply to which question Dr. Lederle, Commissioner of Health, replied that the members of the board would hear objections, but did not care to state their reasons for the action.

Dr. Muir concluded by stating that the entire pharmaceutical bodies of New York City had met in conference and drawn up resolutions objecting to the revised article, but they were willing to have a State law covering the matter.

Dr. Muir introduced Peter Diamond, ex-president of the New York State Ph.A. and representing the New York Retail Druggists' Association. Mr. Diamond said his organization had a membership of 800 retail druggists. He based his objections on the ordinance being "local:" it only affected New York City druggists. The regulation should be State-wide, so that people in the immediate neighborhood of this city can't get all they want of the preparations ruled against.

Moreover, it was not right to make sales of such remedies a misdemeanor. Mr. Diamond concluded that the druggists were sincere in wishing to restrict the sale of habit-forming drugs and declared that they stood ready to introduce a State bill to prohibit the sale of morphine. If the board would modify the present ordinance they would introduce such a bill. He added: "The household preparations affected are almost a necessity."

Dr. Lederle challenged this assertion and asked for an example. Mr. Diamond said that for brown mixture alone he had 15 or more calls a day. The question arose as to the narcotic, and quantity of such, present in this preparation, information which was given by the committee, the board seeming to be very doubtful as to whether opium, morphine or cocaine was the alkaloidal constituent.

On behalf of the German Apothecaries' Society, S. V. B. Swann said that the question lay between the Department of Health and the public, not between the former body and the druggists. He asserted that it was doubtful if morphine itself could be purchased from a druggist in New York City.

Robert S. Conklin, counsel for the Retail Druggists' Protective Association of Brooklyn, asserted that the amended ordinance was directly inconsistent with the spirit of the State law applying to narcotics. In fact, the Board of Health encroached on the domain of the State Pharmacy Law.

Caswell A. Mayo, for the New York Branch of the A.Ph.A., recited the early history of anti-narcotic legislation, stating that the first efforts to eliminate narcotic sales by retail druggists was made by the A.Ph.A.

Jacob Weil, of Britt, Loeffler & Weil, asserted that the wholesalers had done more to restrict sales of narcotics than the retailers and that the former wanted uniform State laws.

Dr. Muir summed up for the committee. He read a telegram from Arthur S. Evans, president of the New York State Ph.A., which favored the passage of a State law obviating the ordinance. Dr. Muir recalled the publication, at the instigation of the Board of Health, in the New York *Sun*, in 1833, of formula for the sun cholera mixture. The wholesalers, he said, should be denied the right to sell if retailers are and declared that morphine should be placed in the penal code. After stating that he favored the inclusion of morphine in the State law, Dr. Muir concluded by thanking the board for the opportunity afforded the committee of presenting its objections and for the close attention with which the members followed the same. Among others present were the following:

George C. Diekman, New York Branch A.Ph.A.; Dr. Joseph Weinstein, New York R.D.A.; Hugo Kantrowitz, German Apothecaries' Society; W. F. McConnell, Drug Trade Section of the New York Board of Trade and Transportation; E. H. Gane, Metropolitan Drug Club; Thomas J. Latham and J. Leon Lascoff, Manhattan Ph.A.; Victor Calcagno, Italian Ph.A.; O. T. Berger, Retail Druggists of the Bronx; G. Kobrich, National Ph.S.; S. L. Neier and S. Shoenfeld, Brooklyn Ph.A.; T. S. Lamb and Dr. R. D. Eccles, Retail Druggists' Protective Association of Brooklyn; Alexander Gardner, Greater New York Ph.A.; Benjamin Taub, A.D.S. Association of New York; Joseph Kahn, Williamsburg R.D.A.

National Ph.S. Opposed to Section 182.

At a recent meeting of the National Pharmaceutical Society held at the New York College of Pharmacy the revised amendment of the Sanitary Code relating to morphine sales was the principal subject of discussion. Among the speakers were Dr. George C. Diekman, Caswell A. Mayo, Peter Diamond, Dr. William Muir, George H. Hitchcock, Dr. Philip J. O'Hanlon, coroner's physician; Dr. John B. Huber, professor of pulmonary diseases at Fordham University, and Dr. Lester L. Roos, of the Department of Health.

"The drug clerk is the man above all others who has it in his power to uplift and uphold the medical profession," said Dr. Roos, who added that all the spirit had been taken out of the medical profession and that the "Doctors' Trust" was a myth. Both Dr. Roos and Dr. Huber spoke strongly of the narcotic evil in this country, especially as to the use of narcotics in the care of infants.

Dr. Diekman said that the ordinance was not as effective as it might be made and that the pharmacists questioned its feasibility and the possibility of enforcing it, although 99 per cent of them had no desire to traffic in morphine or cocaine. When it came, however, to excluding household preparations containing narcotics which have been in use for many generations he thought the Board of Health had gone too far.

Dr. Diekman condoned the rubbing of paregoric on the gums of children and was supported in this contention by Dr. Muir. The latter said that the previous statements relative to the extensive narcotic poisoning of children did not jibe with the Department of Health's annual report for 1909 which stated that fewer children die under the age of one year in New York City than in any other city in the world.

N. Y. Branch Conference Delegates Uninstructed.

At the October meeting of the New York Branch of the American Pharmaceutical Association held at the New York College of Pharmacy, a general discussion of the work of the recent conference called to act on the morphine amendment of the Sanitary Code followed Thomas P. Cook's report that the legislative committee considered the revised ordinance out of its province. Dr. Diekman at first favored the adoption of a general resolution approving the work of the conference in order that any representatives appointed to confer with the Board of Health might really represent the branch. Dr. Joseph Weinstein and others also opined that

such a resolution would lend prestige to the cause, but another member argued that the branch was not a separate association and any direct action would tend to give the impression that the parent body was behind the move. Two uninstructed delegates were finally appointed to attend the second hearing before the Board of Health.

Dr. Muir Favors State-Wide Morphine Legislation.

At the October meeting of the Kings County Ph.S., Dr. William Muir reported on the hearing by the Board of Health of objections to amended article 182 of the Sanitary Code and commented upon the fact that no advance notice had been given to the pharmaceutical journals of the intention to enact the amendment. He asserted that any legislation to prohibit morphine sales should include the entire State, the same as with cocaine. He favored placing in the penal code such regulations as might be made. Several cases have been brought into court under the new amendment, he said, but it was understood that none of the druggists concerned were Kings Ph.S. members.

Suggested perhaps by Dr. Lederle's request that the next committee to confer with the Board of Health be smaller than the first one, Dr. Muir stated that for the good of pharmacy there were too many pharmaceutical associations in New York City, there being 14 altogether, a condition not met with in any other city. If there were only three associations, pharmaceutical power would be greater and more centralized. At the present, 3 organizations exist in Brooklyn and 11 or 12 in Manhattan and the local profession is divided accordingly. The more leaders, the more chaos. At the hearing, it was fortunate that everybody present as delegates agreed.

W.C.P.A. Not Affected but Commends Allied Action.

At the October meeting of the Westchester County Pharmaceutical Association held at Tarrytown, N. Y., a resolution was adopted commending the allied pharmaceutical bodies of New York City in their attempt to remedy the injustice to pharmacy done by the ordinance recently passed by the Board of Health. The members do not practice in New York City and are of course not affected by the ordinance.

WESTCHESTER CO. PH.A. COMMENDS STATE LAW

After Organizer's Arguments Members Vote to Reaffiliate with N.A.R.D., Each to Pay Own Fees.

The October meeting of the Westchester County Pharmaceutical Association, held at the Hotel Tarry, Tarrytown, N. Y., and presided over by president J. H. Thomas, of Yonkers, was well attended. Among the speakers were Dr. William Muir, of Brooklyn, Hugh Craig, New York City, and organizer Adams of the N.A.R.D., who were present as visitors. The latter succeeded in persuading the members to reaffiliate with the N.A.R.D., they as individuals and not the association, to pay the fees.

The propaganda committee was instructed to proceed with its work which includes planning the association's annual joint meeting of physicians and pharmacists. The telephone committee will work for an increase in commissions on slot machine calls. J. Roemer, of the legislative committee, expressed satisfaction with the new State Pharmacy Law.

The transaction of business was followed by a banquet. A feature at the table was the centerpiece composed of N.F. preparations.

Kentucky's Anti-Morphine Law is Sustained.

LOUISVILLE, Oct. 20.—A big victory was recently gained for the Kentucky State Board of Pharmacy at Frankfort, Ky., when the Kentucky Court of Appeals affirmed the case of H. Katzmann, a Louisville druggist vs. the Commonwealth. Mr. Katzmann was convicted of having sold morphine to a purchaser who did not present a physician's certificate and who was known to be a habitual morphine eater. His license was immediately revoked and he received a severe penalty in Judge Gregory's court in Louisville. The case was carried to the court of the last resort on the plea that the Kentucky statute does not precisely define "retail sales" and "legitimate purposes," but the Court of Appeals decided that the statute is specific enough and is entirely constitutional.

KINGS COUNTY PH.S. FAVORS BUYING CLUBS.

Instructs Dr. Muir to Oppose Rescinding of N.A.R.D. Resolutions—Opposes Similarity of Names.

The September and October meetings of the Kings County Pharmaceutical Society, were largely attended. At the former, Otto Raubenheimer, chairman committee on pharmacy, reported that the National Formulary would probably be out within a year and called attention to the International Congress of Pharmacy held recently at Brussels. He condemned as dangerous the similarity of names of pharmaceutical preparations and cited the recent instance where Lysol was taken with fatal results instead of Laxol. The French "external use" label of a bright orange color, he considered a great improvement over that usually employed in this country, and passed around labels of a red color which would attract attention instantly to the printed directions as to how preparation should be taken.

Society Decides in Favor of Buying Clubs.

As a delegate to the N.A.R.D. convention at Pittsburg, Dr. William Muir was instructed to oppose the rescinding of the resolutions adopted at Louisville in 1909 which favored buying clubs and the co-operation of retailers to secure better market conditions. Dr. Muir elaborated on the advantages of co-operative buying and pointed out the drawing power of the big, attractive, up-to-date drug stores. He said it was good advertising, not always the best pharmacist, that got the trade and advised the members to put all their money in their stores. These committees were appointed:

Legislative, Dr. Wm. Muir, T. J. France, A. E. Hegeman and Henry Kempf; trade matters, Charles E. Heimerzheim, W. H. Bussenschutt, G. R. Christ, W. F. Morgan, H. B. Smith; affairs pertaining to pharmacy, Otto Raubenheimer, J. H. Droge, Joseph Kahn, J. L. Mayer, T. J. Keenan; U.S.P. Revision, W. C. Anderson, D. C. Maugan, F. P. Tuthill, A. P. Lobuess, and library, T. F. Raymow, F. W. Cable, J. J. Vetter, and C. L. Gesell.

Two Hundred Dollars for Propaganda Work.

Charles Heimerzheim and Dr. Van Horne, the former conducting the society's propaganda work and the latter detail man, reported at the October meeting that new samples were being exploited to the doctors in addition to those previously used. The sum of $100 was voted at each meeting to continue the work.

W. F. Morgan read a very interesting and highly instructive paper on "Practical Hints for the Prescription Counter." Otto Raubenheimer criticized the same in a friendly manner and agreed with many of the points Mr. Morgan made. Treasurer Paradis reported a balance of $414.00 in the society's treasury and $10,845.00 in that of the college. The college now has 280 students.

NEW YORK 'PHONE CO. WILL HEAR ARGUMENTS

Kings Co. Ph.S. is Assured by Adrian Paradis of Telephone Officials' Receptive Attitude.

At the October meeting of the Kings County Pharmaceutical Society, held at the Brooklyn College of Pharmacy, the telephone question was the subject demanding the greatest amount of attention. That all arguments to secure the increased commission of 20 per cent on all calls will be heard by the New York Telephone Co.'s officials was averred by Adrian Paradis, member of the special committee having this matter in hand.

Mr. Paradis said that druggists and their clerks must often act as messengers in order to accommodate persons at the other end of the wire, asking that a relative or friend be called to the 'phone, and users of 'phones often kept druggists from retiring after 16 or 17 hours' work, because proprietors of the stores will not put them out at closing time, but wait until they are through talking.

New Peppermint Industry in Louisiana.

Peppermint growing is a new industry on the reclaimed lands of Louisiana. A distillation plant is also in operation. A party of expert agriculturists recently inspecting the region "were convinced that this crop can be grown in limited quantities at a good profit." Peppermint oil was imported into the United States during the fiscal year 1909 to the extent of 1238 pounds, worth $6416, while the exports of American peppermint oil amounted to 161,811 pounds, worth $288,318.

Drug Trade Conditions in Alaska.

By Felix J. Koch.

"President Taft, on the occasion of his forthcoming tour of Alaska, will have an opportunity to gain an interesting idea of drug trade conditions on the Peninsula and he will find them quite different from what he might expect," a recently returned traveler remarked to the writer. "At Ketchikan, first port of call, for example, a drug store occupies the first floor. Then there is a nice large drug store, with patent medicines occupying the window. Among local herbs the devil's club

Street in Juneau—Two Drugs Stores Are Included.

is somewhat different from what pharmacists use in the States. A certain Dr. Devine, of Douglass, has experimented with this, finding it particularly good in female troubles. It is prepared as are specifics. Then, too, Cincinnati preparations are in use away up there. Patent medicines are sold at the market prices.

"Indian basketry and the like is sold in trade, and there are innumerable other side lines. Newspapers, leather goods, knick-knacks, canes with turkey-claw clutching a snake of wood, which on closer examination turns to fish—and then again a wooden spoon with a frog on the handle, are remarked.

"In a grocery at Treadwell, the great mining camp, per-

Two Drug Clerks Off Duty in Alaska.

fumes and baking powder are specialties, with mustard another item in prominence. At Douglass, the nearest town, druggists sell graphophones. Juneau, capital of Alaska, is the home of a soda company. In Juneau there are a number of druggists and these do well with quantities of post cards, retailing them at 50 cents a dozen. Tourists are liberal patrons, after long ship voyages, of various relieving remedies.

"Indian girls in Alaska blacken their faces to preserve the complexion and for this a curious unction is used. Up at Cordova quantities of oil of sandalwood are used against the gnats. Oddities, too, figure in the druggists' stocks. There are paper cutters of walrus-ivory, baskets, spoons of gold and copper, and curious pottery.

"Round about Miles Glacier the horehound grows, awaiting only the picking. At Valdez, the *entre pôt* of Alaska, the druggists again specialize in Indian baskets and Satsuma-ware. There are great pipes, in form of crabs, and there are slippers. Inside the store other pipes, magazines and newspapers, wall paper and novelties make up the array. Still another drug store has the bed of the window wearing a brown bearskin, and on this razors are laid.

"Candy stores compete in the sale of wintergreen, licorice and old-time cough drops. They and the saloons alone are open on Sundays. In Alaska a license fee of $50 is required to sell patent medicines.

"At Seward the pharmacists sell not alone the photos, but picture and art goods, totems and cheap jewelry.

"It is interesting to note along lines pharmaceutical that nothing poisonous grows in Alaska. On Mt. Olga the Solomon's seal, on the other hand, is every climber's delight.

"Sometimes curious remedies are made use of in Alaska. In the lone cabins, covered with tar paper, out on the A. C. Railroad, where the trail turns to Sunrise, one wonders what

View of a Drugless Section of Alaska.

they do for drugs. Up in the North the young teachers sent out by the Government to work among the Indians, carry surgical kits and drugs along. Round Ellamar the colts-foot grows and this, too, may be put to use, before so very long, in Alaska."

Something About Fish That Walk in India.

A walking fish formed the subject of a recent address delivered before the Linnean Society of Sydney, New South Wales, by D. G. Stead. He showed a living specimen of the Anabas scandens, or climbing perch, of Singapore. This extraordinary amphibious fish, though not a true perch, is very perch-like, but it possesses a wonderful leaf-like, laminated organ, situated near the true gills, by which it is enabled to breathe atmospheric air direct. It has the power of leaving the water and creeping about on shore among damp vegetation, the gills and the special breathing organ keeping moist for a long period, says a writer in the London *Standard*. In India the climbing perch quits the water and wanders afield. In many popular illustrations the fish is figured in all sorts of impossible positions up trees. This is the first record of the introduction of this queer fish alive into Australia.

Has Air on the Brain.

"No." remarked the man from Eel Creek, as he tossed a quarter on the counter, and pocketed a bottle of cough syrup, "this dope isn't for me, why man alive, I've as good a pair of lungs as ever were put in a man's head."

Loisette's Bonnet.

By Joel Blanc.

I STROLLED into the store just as Loisette was about to leave. She stood in her cashier's cage adjusting her head gear.

"How do, little man. Is your car ready? I am?"

"Yes," I replied. "My trolley car is ready. Where to?"

"Well, if you ain't got no rubber-tired rumble rig I s'pose I'll have to let you pole me out to the lake. It's me night off, and I've got to give this bonnet an outing. What do you think of it? Don't I look like a peach sundae?"

Loisette certainly did resemble that type of femininity known familiarly as "a peach." Despite her sharp tongue and repeated references to my very modest stature and lack of hirsute adornment, I am forced to confess that Loisette is a very attractive young woman. The head covering which the young lady had just donned was, to my masculine eyes, a cross between a Quaker bonnet and a remnant counter at a ribbon sale. It snugly covered all her head except the face and was tied under her chin, thus making an artistic frame for her regular and deftly rouged and whitened features.

Without waiting for my compliments, Loisette took up the thread of conversation and kept unwinding it until we reached the lake.

"This confection what I have over me own and otherwise hair is a motor bonnet. It's supposed to be worn exclusive by them swells what is rich enough to elope with their own chuffers. You don't have to use no spears to hold it on and the wind can't expose the Chink hair what your Grecian crown is made of. Realizing that the mode was particularly adapted for me own classic profile, and thinking that some country cousin might take me for a round on the gaze chariot with the megaphone menagerie, I had Madame Lucille O'Brien build one for me. Other business ladies beside meself are finding that the wind blows just as hard through a suburban trolley as it does through a pathfinder with steen license tags, and it looks mighty much better around plump cheeks a strolling through the park than it does on a wedge face in a red leather runabout. These here lip enticers is a fad. You'll see them worn for all occasions within a year, because they are sensible, comfortable, and if you're the proper looker, they're Cupid traps.

"Now, I says these bonnets are a fad. That's the same thing as a side-line; but there's fads and fads and then more coming. Seeing as your small mind's too masculine to grasp the straight bonnet talk, I'll tell you how this little love what I have on me peroxide aureole reminds me of side-lines.

"I've noticed that the minute that one of you druggists gets stuck on a side-line, he gets bit deep by the ethics bug. When a man abuses side-lines he always specifies things what is gathering dust on his own shelves. With most of you, a thing ceases to be a side-line as soon as there is a regular demand for it. When your ethics strikes a line what pays you don't fall over the chute; but you walks around the coal wagon without seeing it.

"The truth is that lots of things what's called fads, ain't. They're simply novelties, like me bonnet. If you fellows would just use a little bargain-buyer's sense in buying new side-lines; if you'd just examine the weave of the goods before you sign the order, you'd save yourselves a whole lot of them tearful ethicals. If you'd stop being such a goose in buying novelties you wouldn't become a lame duck by trying to be a U.S.P. proper gander.

"Of course when folks calls for fool things like them 'I love my wife; but O you kid' buttons, it's well to let a little profit come out of the pockets of the woozy ones, and buy a few dozen of the idiotic ideas. But when you come to considering discount offers or gratis goods, it's up to you to look for fast colors in the goods.

"If the novelty ain't useful or sensible; generally both, you'd better take a few samples and tell the drummer to come around after you try them out. You can't take your customers' opinions in buying new lines. There's some folks will guy every new idea what is put before them, and yet be among the first to buy the things. There's others what will gush over anything they ain't never seen before, and say they'll take a gross, and then when you get the goods they'll walk on the other side of the street to keep from making good.

"What you want to do when you're buying side lines is to take out all the pins; put down all the basting threads, try the duds on your own self, and then examine the price ticket.

"First you want to think what folks is going to do with it. If it's something the buyer is going to use on herself, put one big red mark in favor of it. If it's something she is just going to buy to give away, make the favorable mark about one-quarter as long. That is to say make the favorable mark about one-quarter as long. That is to say, even if the thing is useful, is it one of them things that no one would use unless they got it for nothing?

"Next you want to think how often it is going to be used, and how soon it is going to be used up. If the first one bought can be used until lost or swallowed by the baby, then go slow on the quantity.

"If it's an Oliver Twister; that is, if it's something what is going to be et, or what one will want more of often and for a long time, then there's another red mark for it. But if its something what is going to be used up quick and often, but don't really fill an entirely new demand; if it's something what has got to take the place of something what is already doing the work, then go slow on the buy.

"Next, you want to consider the retail price. You may decide that it's something what everybody will want; but you want to think how many of the people what will want it can afford it. Every woman prefers silk to cotton; but all of them can't afford silk. So, when you're considering a new side line, you want to put average means before average desire.

"The question of profit has to be considered in lots of different ways, and of them, the last consideration is net cost. If the thing is something what ain't got no patent or trade-mark protection; if it's something made by unskilled labor without the use of expensive machines, it's sure to have dozens of cheap imitations of it, and the price will be cut clear down to the shoe-buttons.

"Another point is, showing for sales. Is the line something that's got to be spread out and shown in order to sell it? Is it something that demands a show in a certain sort of light or space what you ain't got or can't use? Is it something what is going to take protection from flies and dust; or take care what you and your clerks are too shiftless to give? If it's any of them things, then go slow or cut it out.

"Next you want to think if the thing will appeal to the people what already patronizes you? If it will, it's a good buy; but if you've got to get a new sort of folks to buy it, then, think it over a whole lot before you buy. A man what's got a big trade among swells, ain't got no right to put in goods what will draw mill-hands, and vicey versey.

"My, my! I've just commenced giving you pointers on side-lines and here we are at the lake. But it's such a comfort that I don't have to ask you if me hat's on straight. Let's go over and hear the band."

Wouldn't Telephone Prescription to a Rival.

Time was valuable to the dyspeptic who had moved to the suburbs and wanted an old prescription filled in a hurry, says the New York *Sun*, so he telephoned to the New York druggist to telephone back the prescription that had set him up early in the summer. Very politely the New York druggist regretted that he could not accommodate him.

"Why not?" said the dyspeptic. "I have given you the number, the date and the name of the doctor, and the druggist in this store is right at my elbow to take down whatever you say, so there cannot possibly be any mistake."

"That may be very true," was the reply, "but I cannot telephone the prescription. I will mail you a copy or put up the medicine and send it to you; I'll do anything to help you out except to telephone the prescription. That is out of the question."

The dyspeptic said he would be blessed and turned to the village druggist for sympathy. But he got no sympathy.

"I knew he wouldn't do it," said the druggist. "No druggist on earth will telephone a prescription to another. I wouldn't myself."

Few Colored Globes in Windows in the West.

Recent New York visitors to the Western part of the country declare that in many of the towns colored show globes are not used in the windows. Chinaware and cut glass are much used, but one accustomed to the regulation colored globes has to look twice to locate a drug store.

Louisville Druggist Finds Pony and Cart a Convenience and a Good Advertisement

"RURAL Free Delivery Service As Applied to the Drug Business" is the title of a new chapter in the history of up-to-date drug methods, as practiced at the pharmacy of Leon Abraham, a prominent Louisville druggist whose establishment is at First street and Broadway. With a view to rapid and efficient service in the delivery of prescriptions, Mr. Abraham recently purchased a wagon of the Rural Free Delivery type and equipped it with a sturdy pony, to traverse the streets of Louisville and serve as a big advertisement to the drug house of Abraham. The wagon is especially adapted for use in all kinds of weather, as it may be made open in summer and may be practically sealed from winter blasts. It is painted a dull black with the various mottoes of the Abraham drug store inscribed on the sides.

For some years it has been the practice of Louisville druggists to deliver or call for prescriptions free of charge to the customer, but the usual method of transportation for the messenger was the bicycle. In providing a horse and wagon for the delivery service at his establishment, Mr. Abraham believes that he is setting a new standard for local pharmacists, as his outfit is the only one of its kind in the city. In addition to the wagon, Mr. Abraham also maintains a bicycle delivery system, but the horse is claimed to be far more advantageous.

The uses to which the delivery wagon of the drug establishment are put are many and varied, for the wagon travels over the entire city and serves as one of the best advertisements for the house that could be obtained. Every morning the Abraham pony makes a trip downtown to the wholesale drug establishments and transports supplies from the Main street district to the Broadway retailer. In addition to delivering prescriptions and drugs to customers in any part of the city during the day, the wagon is sent to various infirmaries and doctors' offices where there are patrons of Mr. Abraham, and the sight of the black delivery wagon with the Abraham motto, "Prompt, Polite and Efficient Service," has become one of the familiar views of the town.

"I find that the cost of maintenance of my so-called Rural Free Delivery Service is insignificant in comparison with the results that I obtain from its use," said Mr. Abraham to a PHARMACEUTICAL ERA representative. "The initial cost of the wagon, with its accoutrements and the mottoes painted on the sides, was only $75, while the pony is an animal of ordinary pedigree and has no especial attributes save that of endurance and did not cost a large amount. In comparing the cost of this sort of delivery with that of a bicycle, I find that the horse costs approximately $5 per month to feed, while wagon repairs are so small as to be negligible. When I was running a bike delivery service alone, the monthly repairs on the machine cost very nearly $5 and the comparatively small usage to which a bicycle may be put entirely offset any additional cost of wagon service. The wagon has not only given me very efficient service but has also relieved me of additional expenditure for newspaper advertising, which I formerly went in for rather liberally. As an experiment I cut out the newspaper ads when I introduced the pony to my customers, and I find that the Abraham wagon, as it travels the highways and by-ways of the town, has brought me more business that ever accrued from the ads in the dailies."

Mr. Abraham does not confine his activities to the locality immediately surrounding his store but has delivered orders to customers in some of the most distant residence portions of Louisville. No journey is too long or too brief for the Abraham delivery wagon to attempt, and it has delivered the goods to customers in Portland, South Louisville and the Highlands, making trips to the aggregate of 20 miles daily.

Mr. Abraham is a director of the Gentlemen's Riding Club, an organization of local enthusiasts who go in for the old Kentucky sport of horse-racing for the pure sport of the thing. The club holds weekly riding contests and tours, with Mr. Abraham's delivery wagon furnishing the means of transportation for ginger-ale and other wet goods used as refreshments. Mr. Abraham has acquired considerable fame in local equine circles because of the exploits of his four-year-old pacer, "Man," a handsome bay, which has carried off the blue ribbon for pacing during five consecutive sessions of the Gentlemen's Riding Club during Kentucky State Fair Week.

The pony that furnishes the motive power for the Abraham delivery wagon has proved as much of an advertisement for

the drug store as the wagon. The animal is of a decidedly friendly turn of mind and has a number of sworn comrades among the children of Louisville, who feed him apples and other delicacies, thereby considerably reducing the amount of the monthly feed bill. On numerous occasions, Mr. Abraham has been requested by customers over the 'phone to send the pony cart in delivering the order, as the children of the family took a great deal of interest in the beast.

The delivery wagon is equipped with a number of sleigh bells, which serve to attract additional attention to the turnout. Thereby hangs a tale. One of Mr. Abraham's customers was seriously ill at a local infirmary and an order was sent on a bleak winter day for a prescription to be delivered at the infirmary. With the order there came a request from the patient, who had not seen the delivery service but could only judge by sound, that Mr. Abraham would send his "sleigh" to deliver the prescription, on account of the cheering influence of the tinkle of sleigh bells.

The ingenuity that Mr. Abraham used in introducing the Rural Free Delivery Service into his drug business certainly merits the statement of a prominent Louisville physician to the effect that "When it comes to a question of ingenuity, Leon Abraham surely is a genuine Yankee."

Improvement of the U.S.P. Method for Assays of Hydriatic Drugs.*

By L. Henry Bernegau, Chief Chemist, Analytical Laboratory, H. K. Mulford Co., Philadelphia, Pa.

The U.S. Pharmacopœia requires the assay of the following mydriatic drugs and preparations made therefrom:

Belladonna leaves, drug, solid extract and tincture.

Belladonna root, drug, fluidextract.

Hyoscyamus leaves, drug, fluidextract, solid extract and tincture.

Scopola root, drug, fluidextract, solid extract and tincture.

Stramonium leaves, drug, fluidextract, solid extract and tincture.

Or altogether, 17 assays for mydriatic alkaloids are required by the U.S.P.

We have four standards for hyoscyamus, scopola and stramonium but only three for belladonna leaves, where the fluidextract is omitted, and only two for belladonna root, where no assays for solid extract and tincture are specified.

Fluidextract of belladonna leaves, as is well known to all of us, is very much used and I think it advisable to include this in the new Pharmacopœia. I cannot see any reason why fluidextracts of belladonna root, fluidextract of hyoscyamus, scopola and stramonium, should have preference over fluidextract of belladonna leaves.

The same is the case with solid extract of belladonna root which is extensively used, in fact, far more often than solid extract of scopola. There is no great need to include tincture of belladonna root because it is not very often employed.

The amounts of mydriatic drugs and preparations made therefrom to be used in making the assays, as given in the U.S.P. are, in my opinion, satisfactory, except that of a tincture of hyoscyamus of which at least 200 c.c.'s should be employed instead of 100 c.c.'s, the percentage of 0.007 being

* Read before the Scientific Section of the Philadelphia Branch of the A.Ph.A.

too small for making a nearly correct assay. The amount of solvent recommended for extract of hyoscyamus is far too small.

Agreeing with Pearsons & Roberts, Fromme, Enoch, and many others, we prefer Keller's short method to the U.S.P. percolation process and recommend the use of the latter method in the new Pharmacopœia.

Fromme repeats in *Pharm. Ztg.*, Sept. 19, 1909, his former statement that ether alone is sufficient to bring mydriatic alkaloids into solution and points out that chloroform is easily decomposed, more so if coming into contact with alkaline substances. Fromme does not condemn an ether-chloroform mixture, if the assay is made rapidly, but thinks it advisable to go the safer way by using only ether.

I do not see any reason for any change of the solvents for comparative tests made with both solvents did not show any advantage of the ether method if the assays were made quickly. In the ether chloroform mixture we possess, further, a solvent which we can depend on under all circumstances in assaying mydriatic drugs. Many writers disagree on the different indicators to be used for mydriatic drug assays, some giving preference to haematoxylin others to iodeosin.

Rupp and Zinnius prefer the haematoxylin to the iodeosin for the reason that they found that iodeosin colors the smallest particles of dissolved or undissolved foreign matter, which either produce often an emulsion or leaves after separation of the water and ether, a red-colored zone making sometimes the end reaction very difficult to observe. We always use iodeosin for indicator in the assay of mydriatic drugs, etc., and never have any trouble to get a sharp end reaction. The reason for this is perhaps found in our method of observing the color change of the end reaction. As recommended by Vanderkleed. we observe the final color change in the well-shaken and temporarily admixed or emulsified ether and water layers which afford a sort of milky medium in which the delicate color change may readily be observed.

I sometimes found only a red zone with belladonna root, but this zone did not in any way interfere with the observation of a sharp end reaction.

The U.S.P. in my opinion is right in giving the direct equivalents of the different volumetric solutions and direct methods of calculations to determine the alkaloidal strength of drugs, to enable every pharmacist to make his own assays.

I met, recently, a pharmacist who did not know what a factor meant and who was unable to calculate with a given factor.

The professional analyst certainly will not use these given figures. It does not matter if we use N/10, N/20, N/100 acids or alkalies so long as we know how to ascertain their right factor and use the latter properly. We use in our laboratory N/20 H_2SO_4 and N/50 KOH. Any one not used to analytic work will say that this is a difficult proposition for calculation. It certainly is *not*. We make approximately an N/20 H_2SO_4 solution and standardize it with barium chloride gravimetrically and also volumetrically against a fresh KOH solution whose factor was found by titrating against a strictly N/10 oxalic acid solution made from freshly recrystallized oxalic acid.

Suppose we found the N/20 acid to have a factor of 1.05; that would mean that the factor for an N/10 acid would be one-half of 1.05 or 0.525. We titrate then against an approximately N/50 KOH solution.

If 8 c.c. of the acid required 14.7 c.c. of KOH solution the factor of the KOH solution would be 14.7 : 8 :: 1 : X, or about 0.544. This last factor is, of course, *not* the *real* factor of the KOH volumetric solution, but is only a *relative* one, reducing its strength to correspond to that of the acid used.

As these two solutions are used only for alkaloidal work, we titrate one against the other, using iodeosin for an indicator in the regular way. Provided 8 c.c. of N/10 acid, with a factor of 0.525[0] + alkaloid, required 11.2 c.c. KOH (with a relative factor of 0.545) then the calculation would be:

11.2 c.c. KOH × 0.545 = 6.104 c.c. KOH

8 c.c. of acid = 6.104 c.c. KOH = 1.896 c.c. acid

As this acid was found to have a factor of 0.525, the real amount of acid taken up by the alkaloid would be:

1.896 × 0.525 = 1.0154 c.c. of strictly N/10 acid.

I would like to make a few remarks on the report of the Committee of the U.S. Pharmacopœia as found in the Bulletin of American Pharmaceutical Association, November 1909, in regard to assays of mydriatic drugs.

I agree with Mr. Beringer that acids and alkaline volumetric solutions should be standardized against each other, using the same indicator as in the alkaloidal titration. Mr. Beringer prefers N/50 volumetric solution for both acid and alkali. The strength of the solution is of no great importance as long as their factors are correct, but I think that solutions *weaker* than N/10 should be used to avoid or lessen errors in reading off and afterwards, in calculation. As the correct reading off in a burette needs considerable experience and as one or two drops more or less often make a great difference in the final results, I think that Mr. Beringer is correct in asking for weaker volumetric solutions. As said before, it is not necessary for the professional analyst to use a specified solution in his own work.

Dr. A. B. Lyons suggests to use for titration N/10 volumetric solution HCl, standardization against pure crystallized morphine and lime water. Although Dr. Lyons' method works very nicely on comparative tests, I cannot find any great advantage over the old method of using H_2SO_4 and KOH. It is needless to say that the alkaline solution has to be standardized against the acid solution before each titration. Keeping the KOH solution under ideal conditions it will stay normal quite a while without changing the factor more than two in the third decimal place.

Dr. Lyons' method requires very accurate work and in my opinion it is not suitable for the average retail pharmacist.—Dr. Lyons' method of precipitating extractives, chlorophyll, etc., in fluidextracts of belladonna leaves, etc., with lead subacetate and precipitating the excess of the latter with dried sodium phosphate, seems to be very satisfactory. We are going to try this method in the near future.

I approve of Mr. Beringer's suggestion on extract of belladonna leaves. The extract should be first dissolved in water and alcohol and after the solution has been transferred to a separator the chloroform and ammonia should be added. We prefer to use the following method of Dr. Engelhardt for solid extracts. Place two or three grams, accurately weighed on a small sheet of clean white paper, together with the paper in a four ounce bottle, then add 50 c.c. of ether, 25 c.c. of chloroform, 10 c.c. of 10 per cent ammonia and about 5 to 8 grams of clean sand. Shake until the extract is dissolved (which takes only a short time), pour off the ether-chloroform layer through cotton into a separator, shake the contents of the bottle with 25 c.c. of ether, transfer the whole into a funnel containing a cotton plug and rinse the bottle and funnel with a few c.c. more of ether; allow the mixture to separate, draw off the aqueous layer and reject; wash the outlet of the separator with a little water, next shake out with three portions of H_2SO_4 5, 2 and 1 per cent respectively, make alkaline with ammonia, shake out with three portions of chloroform, evaporate and finish by titration. This method is not very suitable for the retail pharmacist, but is more so for manufacturing houses where there are facilities for recovering the ether, chloroform, etc.

Over the Drug Store Telephone.

The woman who waited in a drug store for a telephone message answered the call.

"Is Mrs. Smirnoff there?" some one asked.

She spelled the name back to be sure she got it right and was about to say, "No, she isn't here," when another woman who had been waiting jumped up and said: "That's me! Won't you find out what he has to say, miss?"

"Tell Mrs. Smirnoff," said the man, "that her son stood the operation pretty well but is not yet out of danger."

Mrs. Smirnoff and two young girls, evidently her daughters, went away weeping.

"My, but that is nerve racking!" said the woman. "Do you get many telephone messages like that?"

"Lots of them," said the druggist. "In this neighborhood only a few people have their own telephones. There are many hospital cases and when anybody is about to be operated on the relatives depend upon the drug store 'phone for news. Sometimes the whole family waits here while the operation is performed. They are a hysterical lot. About the hardest thing a druggist down here has to do is to pacify them."—*N. Y. Sun.*

A Little Free Advice.

"I say, doctor," queried the man who was looking for a little free advice, "what do you do when you have a cold?"

"The same as other people," answered the wise M. D. "I cough and sneeze."—*Chicago News.*

Substitution vs. Salesmanship.

By Bernard Colle of New York.

IT has been often asserted, with impunity, that druggists as a class are substituters. In all probability this uncomplimentary adjective originated among a low species of druggists who took up the slogan of "stop thief" as a means of catching trade. It is not infrequent that we encounter signs in the windows or interior of even the most up-to-date drug stores reading "We do not substitute," "No substitution practiced here," or the like. This tacitly implies that "the other fellow" does and that the practice is general. Such information emanating from druggists themselves has been largely augumented by an eager and sensational press with the result that pharmacists are generally regarded by the public with the greatest suspicion and apprehension. Only recently the news came from Chicago that Ainslee's Magazine offered a prize of $50 for the best motto with which to combat substitution, while a "leading" drug company of that city is engaged in an "educational campaign" and is paying for a series of fifty articles in the Chicago *Tribune* for the purpose of knocking the Universal "Substituters."

In justice to the great majority of pharmacists who conduct clean, honest and legitimate businesses, but who are not in a position to refute such ignoble and malicious insinuations by paying for the necessary publicity in the daily press, the charges should not pass unchallenged.

What do these philanthropic people mean by substitution? Reprehensible substitution can mean only one of two things, viz., the use of one ingredient in place of another on a physician's prescription without the physician's knowledge or consent, or the sale of one article under the label of another. Either of these practices is culpable and indefensible and in some cases may be criminal.

By the first-named method the physician's confidence is betrayed and the health or life of the patient may be endangered. By the second, deceit is practiced upon the customer and theft upon the manufacturer whose label is stolen and his product imitated. A druggist resorting to either of these practices is sorely deficient in the first principles of honesty and decency, and deserves the severest condemnation. In either case deception is implied because *the customer is unaware that he was getting something that was not called for.*

The first form of substitution would be peculiar only to the drug business, but judging from official records, it is safe to say that it has become almost unknown.

The second form of substitution could be applied to any line of business, but it would be preposterous to believe that anyone would commit great folly and business suicide by stealing another man's label. The mentioned activity of our Chicago philanthropic contemporaries is not directed against either of the two brands of substitution just cited. Their objection is hurled against the liberty taken by druggists to offer customers preparations or household remedies of their own make or which are made for them, and to suggest that such preparation be used in place of certain proprietary remedies of the advertised variety. This is evident from the fact that the prize offered by the before-mentioned magazine, was awarded to a man who submitted the phrase: "No, thank you. I want what I asked for. Good-bye."

The drug company which is spending so much energy and money in its "altruistic" efforts to "educate" the public, comments in the local *Tribune* on the above phrase, as follows:

"If every self-respecting man or woman would answer likewise, when an attempt is made by a dishonest druggist to substitute something of his own make for the article called for by the customer, it would soon end the rascally substitution game."

The veracity and benevolent motives of this drug firm may turn color and assume an opposite shade when subjected to the light of scrutiny. It will hardly be supposed that this angelic drug company has not any preparation put up under its own label which it would offer to its customers at every possible opportunity. Nor will it be assumed that its advertisements are conducted with eyes shut towards their possible bearing on its cash register. Its noble defence of the patent medicine game may throw some light on the variety of queer sounding preparations emanating from the "Windy City," which are advertised in the daily papers in a way to mislead the public, giving the impression that the advertisement is ordinary news matter and that the "new discovery" is mentioned out of mere benevolence towards the afflicted. The company will yet have to explain why so many makers of nostrums make sure to insert in their advertisements the phrase: "This is not a patent medicine," and why a number of the most reputable magazines absolutely refuse to publish patent medicine advertisements at any price.

Even physicians recognize the public demand and concede the right of the pharmacist to sell remedies for simple ailments, and it certainly conserves the best interests alike of physician, pharmacist and the public to supply in such cases remedies of which the composition may be known to all. I contend that the selling and offering for sale of such remedies of known merit and composition in preference to advertised secret nostrums, is as commendable and meritorious as that of attempting to popularize U.S.P. and N.F. preparations with physicians to be used in preference to secret nostrums. The analogy is identical.

The retail druggist who by circumstances is compelled to be a business as well as a professional man, must use all honorable and up-to-date business methods in order to be successful. He must make sure that every article in his store will add prestige to his name and that, though purchased at the most economical price, it should be of the best quality so that it may give complete satisfaction to the customer. Then the retail druggist must display, advertise and sell his wares. In attempting to do so his initiative and personal efforts are the greatest factors, and no one can deny his absolute right to use them to the best advantage. He certainly has a right to do for himself personally and for his own preparations what the proprietor of every secret nostrum has been doing through the newspapers for his preparation, and especially so, when he (the druggist) helps to safeguard and conserve the health and welfare of his customers. The patent medicine vender who plays so much on the credulity of the public and the attractiveness of his advertisements, cares little if his "Panacia" does fail to bring the many promised results, for he draws upon a large public and figures upon the law of average. The retail druggist, however, has but a limited number of customers that he is bound to see daily and with whom he must exercise the greatest caution and veracity in order to retain their confidence and patronage. He is bound, therefore, to give his customers full value for their money and preparations that will be a credit to his name and increase his popularity.

In thus dealing with the retail druggist the customer is perfectly aware that he is getting a preparation of the druggist's own make in place of the "enigma" which he called for, and he evidently feels satisfied with the transaction. There can be no allusion of dishonesty in the deal. The druggist merely preferred to be the agent of his own product, a choice which he is, no doubt, entitled to make.

This is not substitution, but salesmanship of the best kind.

The only hope of successfully staving off the large increase of the advertised nostrums is by rendering their advertisements an unpaying proposition, and this can be best done by the initiative and personal effort of each individual pharmacist.

* Read at the 32nd annual meeting of the New York State Ph.A., Saratoga, June 21-24, 1910.

The Practical Side of a Professional Pharmacist.

By J. Leon Lascoff, of the New York State Board of Pharmacy.

A GREAT deal has been said at pharmaceutical meetings, and in pharmaceutical periodicals concerning the elevation of pharmacy as a profession, all tending to raise the standard on a par with other professions.

However, most of what has been said, or at least the greater part of it, has seemed to me to be problematical, or rather speculative, and that because the remedy suggested was of such nature it would be almost impossible to accomplish the desired results under existing conditions.

My personal experience in this and foreign countries has taught me that there is a *royal road* to the success of modern pharmacy as a profession, if members will bear in mind some

or all the factors which I have attempted to outline for their consideration and approval.

In every civilized country of the world other than our own, a distinction is made between the mercantile druggist and the professional pharmacist. I have pointed out this fact before, in another article. Custom, however, has decreed our position and we are today encumbered because we confine our efforts in the direction of one goal, namely "money-making," and are practicing our art in a "store."

Now, inasmuch as we must live up to custom, and incidentally to the expense incurred in conducting our businesses, the remedy—I say the following with a marked degree of positiveness—lies in the "*divorcing*" or separating of our stores from our dispensing departments, not merely by putting up a counter or ground glass partition, but by having an entirely separate and distinct room in which there shall be, not only the necessary paraphernalia, such as scales, graduates, mortars, spatulas, etc., but a full line of the necessaries in every day use for compounding drugs, chemicals, tinctures, syrups, etc. The store should be divided in such a way that the prescription department would occupy the major part, the front being used for mercantile purposes only, and containing the soda fountain, and the departments for sundries, proprietaries, etc.

The prescription department should be an entirely separate feature and by itself, where strict silence and secrecy can be observed for the proper checking of prescriptions so as to avoid errors and complaints, and where we can properly fulfill the extreme responsibility thrust upon us and safeguard ourselves against erroneous dispensing.

Remembering that human life is at stake, accuracy is our salvation. Prescriptions should never be dispensed in such a way that the laity can see how the work is done. If a customer sees you measure off a liquid in a graduate, he may become nervous by thinking that perhaps you may make an error and give him a drop too much, thereby poisoning him, his wife, or his child.

Employ competent help. It will cost a little more, but it is cheaper in the end.

Now, a word regarding some of the "stumbling blocks" that we meet in our practice. Now and then a "stickler" shows up in the form of a peculiar mixture, pill, capsule or ointment prescribed by the doctors, which, if not properly put up will be undesirable. Either the mixture will be bad looking, too bulky, not uniform, or gritty, lumpy, etc., as in ointments, though you have followed the order and used the correct ingredients. There is a great deal of tact to be used in handling some of these cases. We should never consider the waste of a little material if it is necessary to bring about a good result, or to discard a poorly made prescription or experiment in various ways to attain the desired end. Neatness in the general appearance of the ointment, capsule or mixture counts for a good deal, and the credit one can get for attaining this end helps to build up our general reputation and incidentally our trade by gaining for us the confidence of the physician. Never let it be said by your brother pharmacist that he can make up a certain prescription which you have already dispensed and sold better than you can.

I might illustrate hundreds of prescriptions which come to my notice, but the following examples will suffice to show what may be achieved by using care and with but very little expense:

(1)

Codeine	0.6
Tincture of benzoin compound	30.0
Syrup	90.0
Water	180.00

M. Sig. As directed.

By dispensing this prescription in the way it is written, the benzoin will separate and stick to the bottom of the bottle, but, by adding one dram of powdered acacia, the mixture will become uniform and elegant in appearance.

(2)

Sodium bromide	4.0
Magnesium oxide	0.8
Water	4.00

M. Div. in capsules, No. XII.

To put this in capsule form the way the prescription is written is practically impossible, except a mass be made, and if [illegible] the capsules will be of an enormous size; by adding 10 grains of acacia into, however, the combination will form a nice dry powder and you can dispense it dry in No. 1 capsules, which will have a white and elegant appearance.

(3)

Oil of theobroma	12.0
Oil of sweet almond	15.00
Sulphur, precipitated	3.0
Resorcin	1.5
Oil of rose	4 drops

The best way to dispense this prescription is to melt the oil of theobroma and the almond oil, then dissolve the resorcin in a few drops of water and rub it up thoroughly with the sulphur; then rub the rest of the ingredients on a slab, little by little, with the melted cocoa butter, until the mixture forms a smooth and perfect ointment.

(4)

Balsam of Peru
Ointment of zinc oxide, of each 15.0
Make an ointment.

This prescription looks very simple, but you will be surprised when you rub the two ingredients together to find that they will form a gritty hard ointment which is absolutely impossible to apply to any sore. After long experience I found that a few grains of powdered acacia added to the balsam of peru and mixed with the zinc ointment will form a nice smooth soft ointment.

The prescriptions I have given above were dispensed in different stores in different ways, but after a little experimenting I think I have succeeded in doing them up in the most satisfactory way. Now a little code of "Ethics" which will do no harm and always does good to observe.

1—Always show a friendly and professional spirit to all physicians with whom you come in contact.

2—Always treat your competitor fairly and squarely.

3—Never criticise a prescription to the patient.

4—Never discuss with your customers the relative merits of a physician as shown by his prescription, even when they ask you to do so.

5—Never make a diagnosis—always leave that to one who should know—the doctor.

6—Never practice substitution.

7—Never practice medicine or surgery.

8—Never practice gossip.

9—Never practice knocking your competitor.

10—Never practice emmenology.

These observations may serve us all as the "Decalogue of Pharmacy."

To elevate the profession it is worth while to mention some good rules which, if observed, are of great importance to the professional pharmacist:

1—Never have any kind of window display other than that which relates to your own profession. Do not specialize with patent or unethical nostrums.

2—Use neat bottles, boxes and labels. Make neat packages.

3—Write labels distinctly and in full as per signature. Do not abbreviate.

4—Make notes of the size and weight of masses in pills and capsules on prescriptions, so that if repeated they will correspond with those originally dispensed.

5—Always keep the latest ethical remedies in stock and request the manufacturer to send notices to doctors informing them of this fact. This is good advertising and is strictly ethical; at the same time it shows you are abreast of scientific advancement.

6—Buy only the best drugs and chemicals from reputable houses and the physicians will obtain the desired result. Any preparation you manufacture should always comply with the standard of the U.S.P. and N.F. (our Holy Bible.)

By complying with all of the above mentioned rules, physicians and the public in general will have more confidence in you. This may not all appeal to all our members, but a little reflection on their part may awaken them to a realization of the vast importance of this feature. Many I know will say, "What's the use? we have been able to get along so many years in the old way, why change it now? And, gentlemen, there is where lies the danger. The warning note has been sounded, competition with the cut-rate stores is now so keen that we must find a remedy. Let the proprietors of such stores thrive on cut-rate prices and miscellaneous goods. You cannot do it. Let them spend money on advertising and displays, you cannot. Let them have candy and other specialties, you cannot do it. Let them carry an enormous stock of everything for the household, you cannot do it. But they

can't prove themselves truly and honestly professional pharmacists, and what is more, you can.

You are in direct communication with the doctors and patients. You can show that you can dispense their prescriptions, you can gain their confidence as to your ability and accuracy; you can show you are a pharmacist and not a merchant, pure and simple. They will then bring their prescriptions and buy what they need from you, and you will incidentally reap the harvest that is your due. That is why you should make a "specialty" of your store, and why you should practice a "specialty" as is done in other professions. Become a prescription specialist. Make your store look like a professional store, not a dry goods store, candy shop or patent medicine cut-rate establishment.

We pharmacists have been awakened from a long sleep and must be up and doing. Remember the story of the lion and the mouse. We must endeavor to put a net around the lion and then we can feel safe. We have taken the wrong step in our endeavor to compete with those who are trying to devour us. We imitate their methods. We try to do as they do. Gentlemen, we must not do this, for if we do, we will be signing our death warrants. We have neither the capital nor the facilities to follow in such a lead, but we have the brains, the knowledge to elevate ourselves far above the standard of the big stores today, by making our only "specialty"—and you know it is a paying one—dispensing. You will continue to sell all other things just as you have heretofore and if you should sell a few bottles less of some proprietary preparation, which is on our shelves and in our closets, you may be able to save a few dollars. Let the Blue Laws of our profession be revised. Let us be awake and looking toward the future. In fact the future is now very near, and we must be ready to face it, not as merchants, but as professional men.

The Advertising Cemetery.*

By Robert Frothingham.

Times without number have I referred publicly to the increasing population of the advertisers' cemetery. It's not a pleasant subject, but it must be faced just the same.

It is simply appalling to go through the files of the newspapers and magazines of from five to ten years ago and note the advertisers whose names were familiar at that time, who are not in evidence today.

If I were to set down here the mortality statistics in the advertising field, I would be considered a calamity-howler of the worst type. And these statistics would apply equally well to billboard and street railway advertising as to periodicals and newspapers. No one particular branch of publicity has a monopoly of either successes or failure. A list of those firms who have paid too dearly for their experience and who are today convinced that "advertising doesn't pay" would make a mighty significant exhibit.

What are the reasons? There are quite a number, and they are of the common garden variety at that.

First, there is the advertiser who thinks he requires neither an advertising manager nor an agent, and knows he can write better copy than any agent that ever lived. He also is the man who runs his advertising in the publication he likes to read without reference to its publicity value, who firmly believes that no magazine carrying his advertisement has any right to publish anything that might conflict with his religious, social or political beliefs. He has yet to learn that an independent editorial policy makes a newspaper or magazine unusually valuable to those who use its pages: that a weak-kneed publication carries weak-kneed advertising, and returns from its weak-kneed readers are not worth while going after; that editorial backbone presumes intelligent readers of individuality and discrimination, and that such are the people who make the money in the world and have it to spend.

Next—the advertiser who places his account in the hands of a competent agent and refuses to follow his advice.

Next—the advertiser who engages an incompetent agent and leaves the whole thing up to him. And when the publisher's representatives seek a personal interview will tell him he doesn't believe in "keeping a dog and doing his own barking," or something else equally wise and illuminating.

Next—the advertiser who regards publicity as a physical commodity to be bought in the open market, and farms out his account to the lowest bidder—generally a cut-rate agent who has about as much conception of real service as a steer has of going to church. And the advertiser thinks he's saving money, not realizing that the aforesaid cut-rate agent will take an exorbitant commission out of his "hide" before the deal is over. You wouldn't think it possible that an otherwise able business man would try and beat the grafting agent at his own game. That's what he does, however, and when he gets stung or bellyaches, says "all advertising is a gamble."

Then we have the "advertising expert," who, Aladdin-like, is going to solve your problems overnight. He doesn't need to know anything about the distribution of your goods or your trade conditions. He tells you that so much circulation at a given price, handsome copy with attractive half-tone illustrations and a pretty follow-up booklet is all you need to win the fickle public and—Whoopla—away you go. And the replies come sailing in. Good start—but replies aren't what you want, after all, especially when they come from all parts of the country where you have no goods on sale and cannot meet the demand you have created.

One of the pernicious features of the business is the tendency of so many advertisers to indulge in "flyers." And thus they spread their money out thin, deluding themselves with the idea that they are getting a line on the publicity value of this, that and the other publication. Sooner or later, if their money holds out, they learn to "bunch their hits" and get somewhere. They find out that nothing but keeping everlastingly at it brings success.

It seems that nothing short of an expensive experience serves to awaken some budding advertisers to the realization of the vast difference between extravagant "flyers" and steady plugging, and sooner or later they damn the publisher's representative and the advertising agent that "let them in."

The American public never has been sewed up and clinched by a flash-in-the-pan advertisement, no matter how big and impressive it was. Mr. Advertiser, you can't tell "the story of your life" in one insertion. The volume of business you do will depend upon how ably, how widely, how consistently and how steadily you advertise—not how many "flyers" you take in those publications which always have on hand some special lure for the unsuspecting advertiser. To paraphrase one of the notable sayings of that genial old Scot, Thomas Carlyle:

"No advertiser need ever have failed of success could he have found an advertising agent wise and good enough, with wisdom to truly discern what the advertiser needed, and ability to lead him on the right road thither."

*Extract from an address delivered at the Atlanta banquet given in honor of S. C. Dobbs.

His Haste Explained.

He walked boldly up to the gates of heaven, for he was young, strong and robust. The pearly gates were a little slow in swinging ajar, so he rapped—rapped long and loud—whereupon the gates swung open slowly, and—

St. Peter—Who are you?

Visitor—I am Josephus Johnes, of Brooklyn.

St. Peter (looking through the book)—Evidently you do not belong here, as I cannot find your name in the registry.

Visitor—There must be a mistake, for I certainly do belong here. Look again.

St. Peter (going farther into the book)—Oh, yes, here is your name. But how comes it that you are here so soon? You are down to arrive in 1930—twenty years hence.

Visitor—Oh, I changed to one of those dispensing physicians.

Drug Stores in Cairo.

Cairo, with about 700,000 inhabitants, has 124 pharmacies mentioned in the *Indicateur Egyptian*. The proportion, however, is no criterion, as three-quarters of the native population are poor and scarcely count as customers, and the pharmacies, being all crowded into the European and semi-European quarters, are sufficiently numerous for the amount of business.

The Druggist Scores.

"I've made up my mind to retire and give the young M. D.'s a chance," said the old doctor who had piled up a fortune. "My motto is 'Live and let live.'"

"Well," rejoined his friend, the druggist, "you can't very well live up to that motto without retiring."

BOOK REVIEWS

A MANUAL OF MATERIA MEDICA AND PHARMACOLOGY—Comprising all organic and inorganic drugs which are or have been official in the United States Pharmacopœia, together with important allied species and useful synthetics, especially designed for students of pharmacy and medicine, as well as for druggists, pharmacists and physicians. By David M. R. Culbreth, Ph.G., M.D., professor of botany, materia medica and pharmacognosy in the Maryland College of Pharmacy, Department of the University of Maryland. Fifth edition, enlarged and thoroughly revised. 8 vo., 986 pages, 487 illustrations. Cloth, $4.75 net. Philadelphia and New York, Lea & Febiger.

This new or fifth edition of Dr. Culbreth's encyclopedic work brings the whole subject of materia medica and pharmacology well up to date, including all of the changes and corrections that have been made in the text of the present Pharmacopœia since its first appearance in 1905. As in former editions, the volume opens with a discussion of materia medica and the physiological action of drugs, taking up the forms in which medicines can be used, the avenues by and through which they enter the human system, the means by which they are transmitted through the system, conditions which modify their action, dosage, etc. Then follows an outline of the classifications of medicines, viz., arrangement by alphabetic sequence, arrangement by chemical constituents, arrangement by morphology and anatomy and arrangement by therapeutic effect. In this volume the arrangement of the drugs under discussion is based upon the principle of associating as nearly together as possible those substances, organic and inorganic which have a common or allied origin, allowing those next related to follow in regular order, the basal or parental source being kept uppermost. Thus, vegetable drugs appear in botanic sequence, beginning with the more simple and gradually approaching the more complex. Similar treatment is accorded the various animal drugs.

The greater part of the volume is devoted to a discussion of the drugs themselves, an idea of its scope and the treatment accorded the subject is given in the following enumeration of the author's outline: Part I, organic drugs from the vegetable Kingdom; Part II, Organic drugs from the animal Kingdom; Part III, Inorganic drugs from the mineral Kingdom; Part IV, Organic Carbon Compounds; Part V, Non-pharmacopœial organic Carbon Compounds; Part VI, the Microscope and its use in Medicine. All of these subjects are authoritatively covered and both student and experienced pharmacist will find the volume valuable either as a text-book or as a work of reference.

A TEXT BOOK OF BOTANY AND PHARMACOGNOSY intended for the use of students of pharmacy, as a reference book for pharmacists and as a hand book for food and drug analysts. By Henry Kraemer, Ph.B., Ph.D., professor of botany and pharmacognosy and director of the microscopical laboratory in the Philadelphia College of Pharmacy, member of the Committee of Revision of the Pharmacopœia of the United States of America, and joint author with Prof. Joseph W. England of the Botanical Tables appended to the Pharmacopœia and Formulary. Fourth revised and enlarged edition. 8 vo., 888 pages, cloth, $5. Philadelphia and London, J. B. Lippincott Co.

This edition of Kraemer's work exhibits much painstaking [illegible] changes and additions, not only with the object of increasing its usefulness as a text-book for the student, but also for the purpose of making it still more valuable as an aid and guide in practice. In the present edition a number of improvements have been made in the text as well as in the illustrations. The botanical portion of the book has been revised, the author having been fortunate in securing the co-[illegible] of Dr. Thos. Howe, of Birmingham, D. C., who has [illegible] the entire botanical portion of the manuscript and [illegible] the Appendix and rendered it a valuable addition to the work. [illegible] the Appendix [illegible] the Appendix [illegible] the pharmacist and analyst who engages in practical pharmacognostical work.

Up until the present time, the anatomical or histological method has received the sole attention of pharmacognosists. By this method, based for the most part upon the study of tissues, the identity and general quality of drugs and foods are ascertained, and the results thus obtained, when taken in conjunction with those of chemical analysis, have been of great value in determining the purity of the products examined. Dr. Kraemer, however, has gone on the theory that the pharmacognosist should study the active and other constituents of drugs, such as may be obtained in crystalline form from sections, from extractions of small quantities of powders, or from a few drops of an extracted solution as obtained in assay work. To this end he emphasizes the study of these microscopical crystals by means of the petrographical microscope and the crystallographic method of analysis. Part IV, which constitutes an entirely new section of the book, is devoted wholly to micro-analysis and its application to the study and identification of drugs. In the preparation of this part of the work the author acknowledges his indebtedness to Dr. Charles Travis, of the University of Pennsylvania, for co-operation and assistance. The new illustrations include some thirty-five photographs of microscopic crystals; a four-color plate, made from Lumière autochrome photographs, showing salicin and cocaine hydrochloride under the micropolariscope, with crossed nicols; and a number of half-tone illustrations and drawings of medicinal plants.

For the purpose intended this book will compare favorably with any work extant on the subject, and it should in the truest sense further the progress of pharmacognosy in this country. As a teacher and specialist in this particular field Dr. Kraemer has accomplished much valuable work and he is to be congratulated on the successful publication of this edition of his Botany and Pharmacognosy. It is just what every pharmacist should have in helping him to identify and value drugs.

INTRODUCTION TO THE ANALYSIS OF DRUGS AND MEDICINES, an elementary handbook for the beginner. By Burt E. Nelson, Laboratory of the Binghamton State Hospital, and of Nelson and Landell, Binghamton, N. Y.; chemist to the New York State Hospitals, the Department of Health, Board of Water Commissioners, etc. 12 mo., 284 pages, cloth, $3 net. New York, John Wiley & Sons. London, Chapman & Hall, Ltd.

This book is intended by the author to furnish methods by which the student or analyst who has not specialized in drug chemistry "may obtain information which is often desired by Health Departments, the State, and the general public, as possibly furnishing formulas by which unknown medicines may be duplicated, or together with occasional pharmacological experiments, indicating their relative medicinal value and safety or danger for use by a lay-public." To this end, the author has brought together in his book most of the commonly used methods and tests which the beginner or analyst interested in other lines of work might employ—chemical, microscopical and physiological. There are also numerous tables essential for reference in carrying out various tests, and about seventy-five pages of original matter on "systematic microscopical drug analysis," the text being accompanied by a number of illustrations of ground vegetable drugs drawn from the microscope. So far as we have been able to determine the author's work is to be commended.

A MANUAL OF TOXICOLOGY. A concise presentation of the principal facts relating to poisons, with detailed directions for the treatment of poisoning. Also a table of doses of the principal and many new remedies. By Albert H. Brundage, A.M., M.D., Phar.D., M.S., professor of toxicology and physician to the Department of Medicine, psychiatry and neurology of Marquette University, etc. Seventh edition, revised and partly rewritten. 12 mo., 158 pages. Cloth, $1.50. New York, The Henry Harrison Co.

Brundage's book on toxicology has been before the pharmaceutical world for a number of years and is in general so well known that it does not require a detailed review. However, in this edition, the author has added considerable new matter, bringing the work up to present day requirements. The salient points of toxicology are discussed in an intelligent manner and we believe the book will supply most, if not all, of the information on this subject the pharmacist is likely to require at the drug counter. The arrangement of the text is excellent, important words and phrases or chapters and other portions being emphasized by presenting them in capitals and different type throughout the

work. As a convenient emergency book it can be recommended.

DIGEST OF COMMENTS ON THE PHARMACOPOEIA of the United States of America (Eighth Decennial Revision) and the National Formulary (Third Edition) for the calendar year ending December 31, 1907. By Murray G. Motter and Martin I. Wilbert. Washington, Government Printing Office.

This is the third volume of "Digest of Comments" compiled by these pharmacologists and published under the direction of the Surgeon-General of the Public Health and Marine Hospital Service of the United States. As noted in the above abstract of title, this volume covers the literature of 1907, bearing on pharmaceutical matters, a period in which the short-comings and errors of both Pharmacopœia and National Formulary were more than once called to attention, and resulting in the committees of revision of both works directing that a number of changes and corrections should be made in their respective volumes. That the compilers have given careful consideration to their work is shown by the character of the abstracts and the larger number of periodicals and works of reference they have consulted. Druggists who are interested in the subject of pharmacopœia making—and what druggist is not—should secure a copy of each of the volumes of the "Digest" for his working library.

STATE "PURE DRUG" LAWS enacted since the passage of the National Food and Drugs Act, June 30, 1906. Printed in September, 1910.

The above is the title of a 213 page pamphlet issued by the National Wholesale Druggists' Association and the Proprietary Association of America for the information of their members, and superseding a similar pamphlet printed in September, 1909. As indicated by the title, this compilation of statutes brings together those portions of the various State laws which are of direct interest to drug manufacturers and jobbers. In addition to these features the National Food and Drugs Act is reprinted in full, as is also the National Insecticide Act of 1910, the act of 1909 forbidding the importation of smoking opium, the Massachusetts Wood Alcohol law, the Ohio Turpentine law and the Canadian Proprietary Medicine law. Druggists who do an inter-state business will find in it the answers to many queries which concern them as manufacturers and shippers.

THE NEW STANDARD FORMULARY—Comprising in Part I all preparations official or included in the Pharmacopoeias, dispensatories or formularies of the world, together with a vast collection from other sources. The Parts following embracing domestic and veterinary remedies, perfumes and toilet articles, soda and other beverages and domestic utilities. By A. Emil Hess, Ph.G., and Albert E. Ebert, Ph.M., Ph.D. 8 vo., 1256 pages, cloth, $5. Chicago, G. P. Engelhard & Co.

There is always a demand for good formularies and the book before us can be safely classed as such. Besides the collection of formulas for pharmaceutical, or galenical preparations and official formulas from the leading pharmacopœias of the world brought together in Part I of the work, formulas appear under the following divisions: Part II, Domestic and Veterinary Remedies; Part III, Proprietary and Synthetic Remedies; Part IV, Perfumes and Toilet Articles; Part V, Soda Water Preparations, and Part VI, Domestic Utilities. As a whole the collection is representative and is likely to supply most of the wants of the average pharmacist.

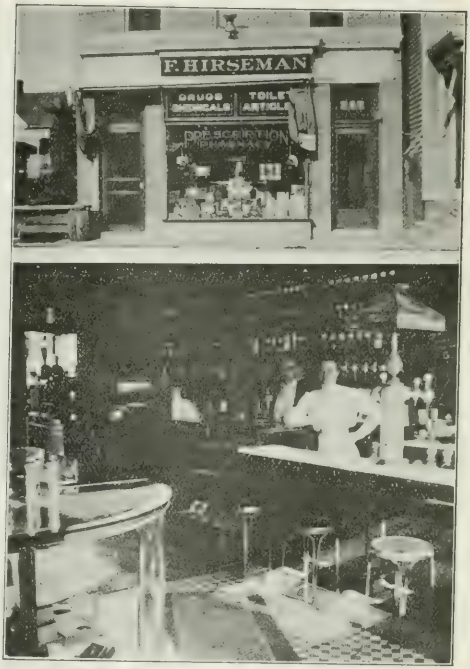
PRACTICAL PHARMACY FOR PHARMACISTS AND PHYSICIANS. A text book for student in medicine and pharmacy. By Lindsey L. Malthie. 12 mo., 431 pages. Newark, N. J. Physicians' Drug News Co.

This manual covers very well the range of elementary pharmacy demanded by students, and particularly by physicians who, as a rule, are wofully lacking in their knowledge of pharmaceutical technique. The arrangement of the book is logical and the various definitions are couched in language which should be easily understood by the veriest tyro. While the book can never take the place of the larger and well known standard works on pharmacy, yet it will find a place and should be of service to the particular classes for whom it was written.

OIL, ANIMAL, VEGETABLE, ESSENTIAL AND MINERAL. By C. Ainsworth Mitchell. Crown 8 vo., 128 pages, cloth, 8d. London, Sir Isaac Pitman & Sons, Ltd., 1 Amen Corner, E. C. Bath and New York.

This book is one of Pitman's "common commodities of commerce series," the avowed object of the series being to place before the business man or trader some of the facts pertaining to the more common commodities of commerce. The information given in the book before us can be said to be trustworthy, although not so very technical. The pharmacist will find little in it that he may not already find in general works of reference.

MR. HIRSEMAN'S MODEL PHARMACY.



Felix Hirseman, former president of the New York State Ph.A., and of the German Apothecaries' Society, and who sold his store and retired several months ago, has found it impossible to throw aside the cares of business and has just opened a model pharmacy on City Island, a semi-suburban section of New York City. The store is at 282 City Island avenue, Bronx Borough, a delightful part of the city. The exterior is attractive and the interior is thoroughly up-to-date, with a fine soda fountain in the foreground. Both Mr. and Mrs. Hirseman (she also is a registered pharmacist), are shown in the illustration.

RETAIL ADVERTISING—COMPLETE—By Frank Farrington, author of "Talks by the Old Store Keeper," "The Clerks' Book," etc. 12 mo., 272 pages, cloth, $1. Chicago, Byxbee Publishing Co.

The subject matter of this book is presented in twelve chapters, each one dealing in detail with some one form of store advertising. The text is attractively written and is far from being dry and theoretical. Instruction is given for the preparation and use of newspaper advertisements and advertising in general, and we can commend Mr. Farrington's book to anyone interested in the subject.

SCIENTIFIC AND INDUSTRIAL BULLETIN OF BOURE-BERTRAND Fils. April. Series 3, No. 1, 1910.

This bulletin contains much interesting information pertaining to the essential oil industry. Particularly worthy of note are the articles on perfumery, customs tariffs and the monographs on the oils of orange flowers, Javan oil of patchouli, oil of ylang ylang, etc. There is also a review of recent literature on perfumery and the essential oils.

THEORY & PRACTICE

Carbon Dioxide as an External Remedy.

Reference was made in the ERA recently to the use of solid carbon dioxide as a remedial agent and now a writer in Nature gives some additional facts pertaining to its application in the treatment of certain affections of the skin. The carbon dioxide is obtained in the form of a snow by allowing the gas to escape from a cylinder in which it is compressed. This snow is placed within a tube of metal or vulcanite, and packed by using a solid rod which fits into the tube as a rammer. In this way round or square rods of solid carbon dioxide can be obtained. A rod may be held in the hand with a turn or two of lint intervening, and the free end may be pared to any shape by means of a knife, as it is quite firm. On applying a rod of this kind to the skin with pressure, the frozen surface immediately becomes white and hard. The process of thawing occupies about the same time as the application. Reaction sets in at once, the treated area becoming perceptibly swollen in two or three minutes. A wheal forms within half an hour, and often a blister is produced within an hour, although with short applications this does not occur. An application of 30 seconds or more is followed by scarring. The application is practically painless. Among the several affections of the skin to which the treatment has been applied are capillary naevi, moles, and warts. Keratoses or horny growths of the skin are also among the diseases said to be amenable to this method of treatment.

Test for the Purity of Quinine Sulphate.

According to F. Tutin *(Pharm. Journ.)*, the ammonia test as described in the French Pharmacopœia has been found to be more satisfactory than those described in other pharmacopœias. The minimum amount of 10 per cent ammonia which will yield a clear solution at 15° C. with 5 cc. of a solution of pure quinine sulphate saturated at 15° C., is 4.4 cc. The saturated solution is prepared by dissolving the salt in 30 cc. of boiling water, cooling to 15° C. with shaking, then leaving at this temperature for 30 minutes with stirring. The requirements of the German, French and Dutch Pharmacopœias are either impossible of fulfilment or unnecessarily stringent. The author considers a minimum of 6 cc. of ammonia to be reasonable. Variations in the basicity of quinine sulphate affect the amount of ammonia required. Salts which are basic appear less pure than is actually the case. Inorganic salts exercise a considerable influence on this test; in fact, the ammonia test can only be used with satisfactory results on quinine sulphate, and not on the other salts. The present B.P. test for cinchonine and cinchonidine is to be preferred to the ammonia test, as the former can be applied to any salt. This test is more delicate if "æther purificatus" be used in place of "ether." The ammonia test is the only means of detecting hydroquinone, apart from actually isolating this alkaloid, the presence of which, however, may be no drawback.

Radium for Uranium.

A paper on this subject read recently before the London Physical Society, is of interest to practitioners who have made use of radium as a therapeutic agent. In an examination of three uranium solutions which had been purified three years previously it was found on measurement that the growth of radium was proceeding at a rate proportional to the square of the time. This result indicates the existence of only one long-lived intermediate product in the series between uranium and radium. The period of the average life of this body, calculated on [illegible] that no other intermediate bodies exist, is 18,500 years (*Journ. Am. Med. Assoc.*).

Detection of Mineral Acid in Vinegar.

[illegible] the following method of detecting the presence of mineral acid in vinegar: Shake, 4 to 5 grams, is dissolved in 10 cc. of the vinegar and the solution inverted on the [illegible] ethereal extract is then passed through a filter into a wide porcelain dish, allowed to evaporate at a low temperature and the residue heated on the water-bath until completely dry. To the residue add a few drops of a 1 per cent solution of resorcinol in concentrated hydrochloric acid. If the vinegar contains large amounts of mineral acid a deep red precipitate will form; if only small amounts are present, the liquid will be colored rose, then turning to a cherry red and on standing to a reddish-brown. If no mineral acid is present the liquid remains either colorless or turns a lemon yellow.

Liquid Mixtures for Maximum and Minimum Thermometers.

Robert E. Bradley gives a practical instance of how a homogeneous liquid mixture may, by a change of temperature or by certain additions, become separated into two layers. For example, a mixture of 15 Cc. amyl alcohol, 20 Cc. ethyl alcohol and 32.9 Cc. water is homogeneous above 20° C.; but the least lowering of temperature below this, even by one-tenth of one degree, causes the division of the liquid into two nearly equal layers. This phenomenon can be made use of in the construction of an exceedingly delicate minimum thermometer. Convenient volumes of amyl and ethyl alcohols are mixed together, brought to the required temperature, and water gradually added, drop by drop, until a slight turbidity results. The liquid is then sealed in a tube, being first colored with carmine whenever the temperature falls below that at which it was prepared, the two layers separate, and are of different shades. If methyl and ethyl alcohols be used in the same way a maximum thermometer can be prepared *(Jour. Indus. & Eng. Chem.)*.

Jasmine Flower Oil.

When jasmine flowers are extracted with petroleum ether the result, as is well known, is the so-called concrete oil of jasmine flowers. This consists only partly of volatile oil, the bulk being a mixture of wax-like bodies. L. G. Radcliffe and J. Allen have examined this wax and found it to possess the following constants: sol. point 56 to 57° C., sap. no. 65.8 (the wax being very difficult to saponify, it was necessary to carry out the work in a solution of amylic alcohol), iodine number, according to Wijs, 52 to 53. The high melting point of the wax made the examination in the Zeiss butter refractometer more difficult, but determinations were taken at various temperatures between 56 and 84°. As an example, the authors discovered that at 62° the scale registered 40 (Lewkowitsch gives 29.5 to 30 at 30° for beeswax). No separate constituents were determined *(Schimmel's Report)*.

Adulteration of Powdered Nux Vomica.

Powdered nux vomica handled by druggists is frequently adulterated with ground olive pits. These may be readily distinguished by means of the microscope in an examination of the tissue elements, the stone cells being characteristic. On warming the nux vomica with a 0.5 per cent solution of dimethyl paraphenylene diamine a blackish-gray deposit is formed, while if olive pits are present a more or less distinct lower layer of a red brown to red color appears. The different stainings are also apparent under the microscope as is also their different reactions to polarized light. Rasped nux vomica does not appear to contain olive pits, but has been found to frequently contain a large amount of raspings of vegetable ivory *(Report. pharm.)*.

Astrolin.

Astrolin, now being introduced in Germany as a substitute for migrainin mixtures containing antipyrine and caffeine which are not allowed to be sold promiscuously, is described as a colorless powder having a faint odor and an agreeable acid and slightly bitter taste. It melts at from 64° to 65.5° C. It is soluble in 0.6 parts of water, 0.5 parts of absolute alcohol, 1 part of benzol and 0.7 parts of chloroform at 20° C. Dose, 0.5 to 1 gram *(Pharm. Zentr.)*.

Wanted to Pay 75 Cents for $32 Prescription.

A woman recently entered the drug store of Hutton & Hilton, Washington, D. C., and asked for a price on a prescription containing calomel, absolute creosote, camphoric acid and four ounces of palmatin. She stated that her doctor told her not to pay more than 75 cents. The net cost to the druggist of the four ounces of palmatin would be $32.

? QUESTION BOX ?

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties, etc. Requests for information are not answered by mail, and ANONYMOUS COMMUNICATIONS WILL RECEIVE NO ATTENTION; neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Rat Paste.

(R. E. G.)—We cannot give the formula for the proprietary article. However, various formulas for rat pastes are extant, the poison in them being arsenic, barium carbonate or phosphorus. Here is one of each type:

(1)

Arsenic	1 ounce
Oat-flour	8 ounces
Indigo	1 dram

Mix well by trituration and add:

Oil of anise	10 minims
Melted dripping	12 ounces

Beat into a paste.

(2)

Tartar emetic	1 dram
Powdered squill	1 dram
Barium carbonate	2 drams
Beef dripping	1½ ounce

Mix well.

(3)

Phosphorus	1 dram
Pure carbon bisulphide	½ ounce
Beef dripping	5 ounces
Biscuit powder	3 ounces
Comp. tragacanth powder	½ ounce
Oil of anise	10 drops
Oil of peppermint	5 drops
Boiling water	3 ounces

Heat the dripping until it is quite clear, and transfer to a hot mortar; pour into this the carbon bisulphide into which the phosphorus has been dissolved; stir, then add the two powders and the oils, and finally the boiling water all at once, kneading the mass thoroughly until a perfect mixture is obtained.

Capsules of Calomel Compound.

(C. A. F.)—"I enclose the copy of a prescription which was sent to our drug store, as follows:

℞.
HgCl Comp. caps. VI.
Sig. One every 2 hours until three are taken.

———, M.D.

"As we knew of no comp. calomel capsules nor was the 'comp.' specified, we used compound calomel tablets put up by P., D. & Co. Did we do right or wrong in doing so?"

Opinions of equally competent and experienced pharmacists will doubtless differ in the character of the answer that should be given to this question. We believe that none of them, however, would attempt to put up the prescription without first endeavoring to call up the prescriber for an explanation of his meaning, but if this were impossible the greater number of them would dispense in capsules a corresponding number of calomel comp. tablets of simple formula and standard make and let it go at that. We say of simple formula, for it is well known that there is no official standard for "calomel comp.," pharmaceutical manufacturers applying the title to various combinations of calomel with other substances put up in tablet form. Thus, some list combinations of calomel with sodium bicarbonate in varying proportions as "calomel comp. tablets, Nos. 1, 2, 3," etc., as the case may be, while others use the title without any qualification for tablets containing "calomel, resin of guaiac and sulphurated antimony," or "calomel, sodium bicarbonate, ipecac and oleoresin of capsicum." Other examples might be cited, but the formulas mentioned go to show the lack of uniformity in nomenclature on the part of manufacturers and also, the lack of knowledge of this condition on the part of the prescriber and his failure to make his meaning clear.

Syrup of Terebene.

(C. C. G.)—The following formula has been published, although an ideal syrup containing terebene cannot be made, owing to its sparing solubility in aqueous mixtures.

Terebene	1 fl. dram
Powdered acacia	4 drams
Peppermint water	1½ fl. ounces
Syrup of tolu, enough to make	6 fl. ounces

Make an emusion of the terebene, acacia and 6 fl. drams of the peppermint water, then add the balance of the water, and finally the syrup. Some years ago J. W. England (Am. Journ. Pharm. June, 1898), recommended for the internal administration of terebene, a preparation made by admixing the terebene with an equal volume of olive oil, emulsifying with powdered acacia, sugar and water, and flavor with oil of gaultheria; each tablespoonful to contain 5 minims of terebene.

Scoville ("Art of Compounding") gives the following somewhat similar formula for "terebene emulsion:"

Terebene	160 minims
Powdered acacia	60 grains
Oil of peppermint	20 minims
Fluidextract of glycyrrhiza	1 fl. ounce
Glycerin	2 drams
Water, enough to make	2 ounces

Mix the terebene, oil and acacia in a dry mortar, add 135 minims of water and stir until the emulsion forms. Add the glycerin and the remainder of the water gradually, and lastly, the fluidextract of glycyrrhiza.

Tasteless Castor Oil.

(C. W. S. Co.)—A formula for the so-called "tasteless" or sweetened castor oil is given under the title "aromatic castor oil," in the October 1910 issue of the ERA, page 966. It may also be prepared by thoroughly washing the oil with hot water and incorporating sufficient (¼ to ½ per cent) of saccharin to impart a sweet taste. The oil is then flavored by adding small quantities of oil of cinnamon, extract of vanilla or other suitable flavoring substances. A formula of this kind is No. 3175 in the ERA FORMULARY. Another formula is the following from the Pharmaceutical Journal Formulary:

Gluside	1 grain
Alcohol, 90 per cent	1 fl. dram
Oil of peppermint	2 drops
Oil of wintergreen	1 drop
Castor oil	7 fl. drams

Dissolve the essential oils in the gluside (B.P. name for saccharin) in the alcohol; if oil of peppermint is objectionable other flavors may be substituted, such as that of oil of bitter orange or oil of cinnamon.

Fumigating Insecticide.

(F. F. Z.)—So far as we can recall we have not published an article on destroying insects, bed bugs, etc., by fumigation. It is possible, however, that the liberation of gaseous formaldehyde might answer your purpose, although we find no data regarding its effectiveness as an exterminator of Cimex lectularius. Other gaseous substances fatal to most insect life in a confined space, such as sulphur dioxide, chlorine and bromine, are not particularly adapted to household use owing to their property of bleaching the various colored fabrics or material that may be used in house furnishings or room decorations and which are not always possible to remove. No such objections obtain against the use of formaldehyde which is especially effective, both as an insecticide and a disinfectant, if liberated in a moderately warm and tightly closed room. The gas may be conveniently produced from the ordinary 40 per cent solution or from solid paraform, a number of methods being employed for this purpose.

Probably the most effective "bed bug" killer is one containing corrosive sublimate, at least it is the substance almost universally employed in preparations used for this purpose. Various formulas of this class have been published from time to time in previous volumes of the ERA. Of course, prepara-

tions containing benzin or gasoline are effective, but on account of their tendency to ignite or explode by contact with light or air they should not be employed. In fact, in many localities their use or that of any other readily inflammable substance in the manufacture of both insecticides and metal polishes is prohibited by city and town ordinances.

Red Solution for Show Globes.

(H. G. & Co.)—Most all of the colored liquids used in show globes tend to fade on exposure to light, especially if the tint is produced by means of an organic color or aniline dye. As permanent a solution as we know of may be made as follows:

Iodine	3 drams
Potassium iodide	3 drams
Hydrochloric acid	10 ounces
Water	2 gallons

Dissolve the iodine and iodide in 8 ounces of water, and dilute with the rest, to which the acid has been added.

Less permanent are the following:

(1)

Cochineal, bruised	1 ounce
Boiled water, distilled	1 gallon

Infuse for 24 hours, stirring occasionally. Bring up to boil, cool, strain; add—

Sulphuric acid	½ fl. ounce.

(2)

Fuchsine	20 grains
Acetic acid	2 fl. ounces
Distilled water	1 gallon

Other colors, almost any desired shade, can be made from the coal-tar colors. These come in endless variety and most of them dissolve readily in water, yielding a clear solution, particularly when dilute. The package dyes sold in most drug stores are quite suitable for this purpose. The cost is scarcely to be considered, and a change may be made as often as the druggist wishes.

Biniodide of Mercury and Potassium Iodide.

(O. & P.)—"Should the following prescription be dispensed:"

Mercury biniodide	4 grains
Potassium iodide	½ ounce
Syrup of sarsaparilla, comp. q.s. to make	6 ounces

Mix. One teaspoonful in a glass of water four times a day.

We answer the question "yes." The prescription is one of a type frequently prescribed in the treatment of syphilis, the combination of red iodide of mercury with potassium iodide forming a double iodide of mercury and potassium which is readily soluble in an excess of potassium iodide. The reaction is identical, under similar conditions, with that which takes place in the preparation of Mayer's reagent (potassio-mercuric iodide), used in the precipitation of alkaloids. As we have stated, this combination with compound syrup of sarsaparilla has been frequently prescribed as an alterative and has the sanction of medical authority.

To Fasten Cloth or Leather to Desk Tops.

(F. E. L.)—We suppose that almost any good furniture glue will answer the purpose. Or you might try the following, printed some years ago in a German technical publication and especially recommended for the purpose: Prepare a mixture of 1 tablespoonful of powdered rosin, and 2 tablespoonfuls of powdered alum; rub the mixture in a flat capsule or other suitable vessel, with water, to a uniform smooth paste, transfer this to a small kettle over a fire, and stir until the paste is perfectly homogeneous, without [illegible]. As soon as the mixture becomes so stiff that the stirrer remains upright in it, transfer to another vessel and cover it up so that no skin will form on its surface. [illegible] is poured in a cool place to the consistency of [illegible] the work, then add [illegible] and [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] with a cloth.

Removing Marking Ink From Linen.

(F. E. L.)—[illegible] if not [illegible] to [illegible]. However, you might try the following [illegible]:

(1) First soak in a solution of common salt, and then wash with ammonia. (2) Treat with a solution of potassium cyanide, 10 grains; iodine, 5 grains; in water, 1 fl. ounce. (3) Moisten with a solution of iodine in potassium iodide, and then wash with water. (4) Treat with a strong solution of zinc sulphate, and then touch with a piece of metallic zinc, afterwards washing. (5) Treat with solution of chlorinated lime, and then with a solution of acetic or citric acid in water. (6) Alizarin ink stains may be removed by treating with a solution of tartaric acid; the older the stain the more concentrated should the solution be. The variable composition of aniline marking ink makes chemical treatment an uncertainty. Fresh spirit of nitrous ether sometimes removes the stain.

Repairing Mirrors.

(W. H. S.)—Requests for formulas for repairing and resilvering mirrors come to hand periodically and are about as frequently answered in the journals. However, to help you out we reprint the following methods:

1. Clean the bare portion of the glass by rubbing it gently with fine cotton, taking care to remove any trace of dust or grease. If this cleaning be not done very carefully defects will appear around the place repaired. With the point of your knife cut upon the back of another looking glass around a portion of the silvering of the required form, but a little larger. Upon it place a small drop of mercury; a drop the size of a pin's head will be sufficient for a surface equal to the size of the head of a nail. The mercury spreads immediately, penetrates the amalgam to where it was cut off with the knife, and the required piece may be now lifted and removed to the place to be repaired. This is the most difficult part of the operation. Then press lightly the new portion with a piece of cotton; it hardens almost immediately, and the glass presents the same appearance as a new one.

2. Pour upon a sheet of tinfoil about 3 drams of quicksilver to the square foot of foil. Rub smartly with a piece of buckskin until the foil becomes brilliant. Lay the glass upon a flat table, face downward; place the foil upon the damaged portion of the glass; lay a piece of paper over the foil and place it upon a block of wood or piece of marble with a perfectly flat surface; put upon it a sufficient weight to press it down tight; let it remain in this position for a few hours. The foil will adhere to the glass.

For an outline of a silvering process, see the ERA of January 9, 1908, page 40.

Pharmacy in China.

Dr. David Starr Jordan, discussing at a dinner in Washington certain rulings of the International Fisheries Commission, said:

"The fish there get no chance. They have as hard a time of it as the whites in the interior of China.

"A Chinese druggist said to his clerk:

"'Didn't I see a foreign devil come out of here as I came down the street?'

"'Yes, sir;' the clerk answered. 'He wanted a permanent cure for headache, and I sold him a bottle of rat poison.'"—*Detroit Free Press.*

Floating Drug Stores in Malaysia.

According to Consul-General James T. DuBois, of Singapore, the sale of Western medicines in the Malay Peninsula should find impetus under the new system of distribution. A dispensary boat, an ordinary house boat, with a crew to pole upstream and paddle downstream, will be equipped with Western medicines and cruise on the Pahang River in charge of a Malay "dresser." It will also facilitate the free distribution of quinine to the natives, which work has hitherto been accomplished through the agency of police stations and vernacular school teachers.

Germany's First Female Druggist.

Miss von Gossler of Berlin, who has just passed examinations for apothecary, is the first woman druggist in Germany. Miss von Gossler is 21 years old. She will take a position as apothecary's helper in a pharmacy in Darmstadt.

Necessarily.

"Is this phonograph a good one?"

"It records the truth on [illegible]."—*Puck.*

Active and Prominent Participants in Proceedings of the N. A. R. D. at Pittsburg.

WILHELM RODEMANN, Chicago, chairman N.A.R.D. telephone committee.

HARVEY I. LEITH, Providence, elected treasurer of the N.A.R.D.

W. S. RICHARDSON, Washington, chairman National legislative committee

SELECTED FORMULAS

American Dentifrice.

Powdered castile soap	1 dram.
Magnesium carbonate, heavy	2 drams.
Precipitated chalk	5 drams.
Soluble saccharin	1 grain.
Oil of peppermint	2 drops.
Oil of wintergreen	4 drops.
Menthol	1 grain.

Rub the last four ingredients together, and triturate uniformly with the magnesia before adding the chalk and soap. This is said to be an excellent preparation and its use leaves the mouth fresh and antiseptic.

Massage Ointment or Toilet Cream.

White wax	250 grams.
Paraffin oil	500 grams.
Borax	2 grams.
Rose water	75 grams.
Orange flower water	75 grams.

Theatrical Cold Cream.

Spermaceti	1 pound.
White wax	3 pounds.
Liquid petrolatum	2 gallons.
Borax	4 ounces.
Water	1 gallon.
Perfume, enough.	

Violet Skin Cream.

Tragacanth	4 drams.
Benzoic acid	1 dram.
Sodium borate	1 dram.
Water	4 fl. ounces.
Orange flower water	4 fl. ounces.
Glycerin	8 fl. ounces.
Oil of orris	20 minims.
Extract of jasmine	4 fl. drams.

Put the tragacanth in a wide-mouthed bottle and add the water, leaving it standing for several days; dissolve the acid and the sodium borate in a mixture of the glycerin and orange flower water, and add this to the tragacanth mixture; shake occasionally for several days, squeeze through flannel, stir in the oil and the extract, and put in tubes or jars, adding more water, if necessary.

Hair Curling Cream.

White castile soap	700 parts.
Acacia	700 parts.
Japan wax	500 parts.
Glycerin	300 parts.
Tallow	1500 parts.

The soap and acacia are separately dissolved each in 1500 parts of distilled water, and the solutions mixed and kept hot on the water bath. The Japan wax is then added and then the glycerin and tallow in the order named. A small amount of salicylic acid may be added, if desired, as soon as the wax and tallow have melted, the mixture is removed from the water-bath and rubbed to a homogeneous cream-like consistence.

Menthol Cream.

Menthol	10 grains.
Salol	½ dram.
Glycerin	3 drams.
Lanoline	6 drams.
Vaseline	6 drams.

Melt the vaseline and dissolve the menthol in it. In a warm mortar rub the salol and glycerin together, and add the vaseline and lanoline, stirring well to make a creamy ointment.

Camphor Ice.

Mutton suet	50 ounces.
White wax	4 ounces.
Camphor	10 ounces.
Tincture of benzoin	12 fl. drams.

Melt the suet after cleaning well, then put on the stove with its own weight of water. After it is all melted strain both suet and water through cloth, and let stand for 12 hours, then let all of the water run off. Again add enough water to about equal weight of melted suet, and repeat the operation until the suet is perfectly clean and white. Then add the white wax and tincture of benzoin. Lastly, strain, add the camphor, previously powdered, and strain again.

White Capping Wax.

Melt 8 ounces of white wax over a spirit lamp. For this purpose the wax may be put into any cheap tin or porcelain vessel with a handle. When the wax is melted add 2 drams of thick mucilage of tragacanth and 1 ounce of bismuth sub-

nitrate. Stir briskly until a uniform mixture results. The preparation is now ready for use. Dip the necks of stoppered bottles in to the desired depth. The mixture will harden almost immediately. Repeat this operation about three times and you will have a beautiful white cap—firm and yet easily removed. During the capping process the mixture must be stirred and held over the lamp from time to time.

Ink for Celluloid.

Powdered tannin, 15 grams; dry ferric chloride, 10 grams; acetone, 100 grams. Dissolve each of the dry ingredients separately, each in one-half the acetone, and mix the solutions.

Colored Marking Pencils.

Ceresin	4 parts.
Carnauba wax	3.5 parts.
Japan wax	2.4 parts.

Melt together, stir in talc, 5 parts, and the desired coloring matter in powdered form. The following colors are recommended: Prussian blue, 1.25 parts; cinnabar, 1.5 parts; chrome green, 1.5 parts; zinc white, 1.5 parts; chrome yellow, 1.5 parts; or lampblack, 0.8 part. The heating is continued during half an hour on a boiling water-bath with uninterrupted stirring, and the mass then poured into glass tubes, 25 cm. long, closed with a cork at one end, and allowed to cool. The congealed cylinders may then be removed, and the hollow portion, which inevitably forms, cut off, to be included in subsequent operations.

Syrup of Wild Cherry, Cod Liver Oil and Malt.

Cod liver oil	40 fl. drams.
Extract of malt	40 fl. drams.
Glycerin	1 fl. ounce.
Powdered acacia	1 av. ounce.
Oil of peppermint	¼ fl. dram.
Syrup of wild cherry, sufficient to make	20 fl. ounces.

Mix together the two oils and prepare an emulsion by rubbing up with acacia, adding 6 fl. ounces of syrup of wild cherry. Then mix together the extract of malt, glycerin and remainder of the syrup of wild cherry, add to the emulsion and triturate well, adding syrup of wild cherry sufficient to make 20 fl. ounces.

Compound Syrup of Thyme (Pertussin).

Liquid extract of garden thyme (vulgare)	8 fl. drams.
Liquid extract of wild thyme (serpyllum)	8 fl. drams.
Alcohol, 90 per cent	4 fl. drams.
Potassium bromide	200 grains.
Simple syrup	60 drams.
Distilled water	4 drams.

Worm Lozenges.

Santonin	500 grains.
Calomel	350 grains.
Powdered sugar	1 pound.
Powdered acacia	300 grains.
Mucilage of acacia	1 fl. ounce.
Tincture of orange	½ fl. ounce.
Distilled water, sufficient to make a mass.	

Divide into 500 lozenges. Dry at ordinary temperature for several days. One for a dose.

Chocolate Emulsion of Cod Liver Oil.

Decoction of Irish moss (1 to 20)	150 grams.
Cod liver oil	250 grams.
Glycerin	60 grams.
Cacao powder	30 grams.
Essence of vanilla	0.50 gram.

Rub the cacao powder with the decoction, warm the mixture, add the oil and glycerin and emulsify with egg yolk.

Wine of Cascara Sagrada.

Bitterless fl. ext. of cascara sagrada	1 fl. ounce.
[illegible]	10 grains.
Distilled water	2 fl. drams.
[illegible]	1 av. ounce.
[illegible]	18 fl. ounces.

Dissolve the gelatin in the water by the aid of a gentle heat, add the wine, then the fluid extract and sugar, shake well, set aside [illegible] and filter.

N. Y. C. TRUSTEES WELCOME NEW MEMBERS.

Robert W. Johnson Bequest to be Turned Over as Soon as Treasurer Signs the Necessary Papers.

At the October meeting of the board of trustees of the New York College of Pharmacy Dr. Henry C. Lovis and Caswell A. Mayo, the new members, were welcomed by chairman Thomas P. Cook. Adolph Henning, chairman of the property committee, reported that the college building was in better condition than at any time since its completion. The secretary's report showed a total of 250 students matriculated, an increase over last year. As soon as treasurer Clarence O. Bigelow signs the necessary papers, it was announced, the college will receive from the executors of the estate of Robert W. Johnson, the bequest of $2500 which the deceased willed the institution. The following were declared graduates in pharmacy:

Charles C. Becker, Lyn Berbert, Julius M. Breitenbach, J. J. Deputy, A. J. Goldberg, Leslie W. Howard, Selim I. Kutibah, Otto L. Schroeder and Benjamin Schwaid.

A meeting of the college organization held later in the month, was well attended. Business transacted consisted mostly of committee reports, Dr. H. H. Rusby developing some very interesting points relative to the U.S.P. Convention; Thomas F. Main reported on the annual meeting of the A. Ph.A., and Dr. George C. Diekman, presented an exhaustive report on the N.Y.S. Ph.A. meeting at Saratoga Springs.

DEAD JAPANESE STUDENT AWARDED DIPLOMA.

Interesting Feature of the 1910 Commencement of the University of Minnesota—Other Graduates.

At the 17th annual commencement of the College of Pharmacy of the University of Minnesota a diploma was granted in the name of Kozo Yamagishi, a Japanese pharmacy student who was accidentally killed in March by a falling door during a wind storm. The scholarship, department and popularity of Mr. Yamagishi, in connection with the fact that he had very nearly completed all the required work, was thought of sufficient merit to entitle his parents to the satisfaction of his diploma. The latter has been sent by registered mail to the parents in Kobe, Japan.

Dean Wulling officiated at the commencement exercises, which were well attended and interesting. The following students graduated with the degree, Bachelor of Pharmacy:

Delbert E. Bersing, Blair, Wisconsin; Otto P. Doelz, Minneapolis; Wm. H. Ebeltoft, Lake Park, Minn.; Carl A. Errickson, Cashton, Wisconsin; Chester E. Harding, Santa Monica, California; Wm. F. Hoppe, Breckenridge, Minn.; Geo. A. Janecky, Hutchinson, Minn.; Thomas Klovstad, Milan, Minn.; Wm. W. Lundberg, Minnewauto, Minn.; Victor R. Noer, Colfax, Wis.; Claude H. Parker, Minneapolis; Carl M. Paulson, Minneapolis; Wm. M. Peters, Minneapolis; Hugo O. Peterson, Minneapolis; Anastasia M. Remes, New Prague, Minn.; Arthur W. Reum, Minneapolis; Emil G. Souba, Hopkins, Minn.; Kozo Yamagishi, Kobe, Japan; Pauline B. Zalesky, St. Paul, Minn.

Autumn Graduates at Southern C.P., Atlanta.

One woman was among the 29 graduates in pharmacy at the September commencement of the Southern College of Pharmacy, held in the Atlanta Grand Opera House. The list follows:

Mrs. Marvin H. Smith, of Florida; L. R. Brewer, of Georgia; H. L. Wright, of South Carolina; J. L. Parker, of Alabama; T. J. Darnell, of Georgia; J. C. Crumley, of Georgia; S. E. Brown, of Georgia; J. F. Wilson, Jr., of Georgia; W. P. Hodge, of Georgia; Dr. Marvin H. Smith, of Florida; B. D. Stoudemire, of South Carolina; I. S. James, of Mississippi; Frank Stone, of Tennessee; S. L. Reed, of Georgia; J. J. Peavy, of Alabama; H. H. Smith, of Georgia; J. C. Stokes, of New Jersey; O. W. Simpson, of Alabama; W. E. Avery, of Georgia; W. O. Carter, of Louisiana; W. O. Power, of Alabama; H. W. Mason, of Georgia; L. C. Pearman, of Georgia; C. T. Beacham, of Georgia; [illegible] of Georgia; W. T. Perry, of Georgia; H. C. Dozier, of Georgia; S. B. Ellis, of Mississippi, and C. F. Brooks, of Florida.

Iowa City College Classes Elect Officers.

At recent meetings of the classes of the Iowa University College of Pharmacy these officers were chosen:

Senior class: President, H. F. Lemke; LeMars, vice-president and [illegible] committee, C. F. Holmes, Keokuk; secretary-treasurer, Anna Jessie, Muscatine.

Junior class: President, [illegible] Wittington; vice-president, L. B. Peterson, Iowa City; secretary-treasurer, J. H. Pierce, Silver [illegible] representative, D. B. Brockside, Lewis.

Three Active N. A. R. D. Workers Elected to Office at the Pittsburg Convention.

PETER G. WALTER, Pittsburg, second vice-president N.A.R.D.

E. A. BERNIUS, St. Louis, third vice-president N.A.R.D.

E. H. THIESING, Cincinnati, member executive committee, N.A.R.D.

BOARD EXAMINATIONS

Pennsylvania.

WILLIAMSPORT, Oct. 20.—L. L. Walton, secretary of the Pennsylvania State Pharmaceutical Examining Board, announces the following list of successful applicants at the examination held in Williamsport in August:

Pharmacists—H. E. McAninch, Williamsport; William P. Webster, Erie; S. D. Lamb, Philadelphia; Elias Israelvitz, Philadelphia; Charles U. Long, Philadelphia; William S. Durban, Plymouth; Walter E. Ruch, York; Jacob C. L. Ritchey, Carlisle; Karl Werner, Glenolden; Carl N. Schmitt, Jr., Philadelphia; James H. McAdam, Sharon; Rudolph Lundgren, McKeesport; G. W. S. Humphreys, Brockwayville; Walter C. Dice, Allegheny; Claude W. Christenson, Kane; Harry Diamond, Pittsburg; Earle D. Seiss, Philadelphia.

Assistant Pharmacist—Robert H. Swartz, Jr., Harrisburg; Nervin A. Myers, Harrisburg; E. C. Rowse, Pittsburg; Alfred Carter, Pittston; James B. Black, Union City; Harry B. McHenry, Bradford; Grayle W. Howlett, Buffalo, N. Y.; Morton R. Coulter, Meadville; Ramsay Mebane, Wilkes-Barre; Donald Mebane, Wilkes-Barre; John M. Vogel, Williamsport; John B. Bader, Williamsport; Hugh L. Mattson, Philadelphia; Leroy Hillegass, Pennsburg; Fred M. Smith, Friendship, N. Y.; Harry R. Gehres, Goodspring; A. E. Walker, Buffalo, N. Y.; John H. Kintner, Easton; George Gibbons, Jr., Wilkes-Barre; Thomas J. Buss, Philadelphia; Nathan Finkelstein, Goldsboro, N. C.

The following rules have been adopted:

An applicant for registration as pharmacist must hereafter remit the examination fee of $3 to the secretary with his request for application form.

Colleges of pharmacy recognized by this board must furnish the secretary with a detailed sworn statement of the number of hours of instruction they give in their respective lecture, laboratory and recitation courses.

The next examinations will be held in Pittsburg and Philadelphia on Nov. 11 and 12.

Illinois.

SPRINGFIELD, Ill., Oct. 20.—At the September examination of the Illinois State Board of Pharmacy in Chicago 12 of the 65 applicants for registered pharmacist, 23 of the candidates for assistant pharmacist and 2 of the 3 applicants for local registration were successful. Their names follow:

Registered Pharmacists—Leslie R. Crawford; Frank A. Kuflewski; Joseph A. Merrill; Max Robins; Wm. Shafran; Arthur G. Sprague; Chas. K. Stulik; John S. Williams, all of Chicago and Waesland L. Daniel, Evanston; S. F. Flint, Lebanon; Carson H. Porter, Rockford and George A. Schwitzer, Riverside.

Assistant Pharmacists—Felix Daudelin; Jacob DeKoren; Everett A. Dunn; M. S. Edison; Aaron Goldberg; Paul R. Josenhans; Franklin L. Jones; Joseph A. Kapoun; Orval W. Lee; Vincenzo Marzano; Oscar W. Rogers; Adelbert W. Russell; Arnold F. Schnettgen; Virgil F. Selbert; Emil G. Silverberg; Herman F. Stalb; Longin L. Tabenski; Benj. H. Williams and Arthur M. Wheeler, all of Chicago and Patrick Keating, Kewanee; Wm. J. Richards, Oglesby; Melvin D. Sweetland, Highland Park; George L. Tierney, Decatur.

Local Registered Pharmacists—David B. Frey, Gillespie; Geo. W. Lyons, Chrisman.

Next meeting in Chicago for the examination of registered pharmacists will be held Dec. 6, at 9 a.m., at 87 Lake street. The next meeting in Chicago for the examination of assistant pharmacists will be held Dec. 8, at 9 a.m., at the same place.

Indiana.

INDIANAPOLIS, Oct. 20.—The Indiana Board of Pharmacy has announced that the following have received certificates:

Registered Pharmacists—Paul W. A. Batchelor, Wabash; Kelsey N. Crackel, Evansville; Thomas G. Cressner, Terra Haute; Frank S. Gray, Allendale, Ill.; S. Sam Herewitz, Gary; Everett D. Hess, Brook; John Thomas Jenkins, Valparaiso; Fred C. Musser, La Grange; Arthur C. Major, Shelbyville; Worley C. Pontius, Frankfort; Mark Emerson Stevens, Portland; Walter B. Tinsley, Indianapolis; Harley Anthony Tolley, Hampton, Ky.; Joseph C. Vermilya, Bloomington; Lee F. Remmeter, Indianapolis; Noah Alton Bash, Auburn; Otis Glenn Oblander, Angola; Robert Newton Sisson, Hazelton.

Assistant Registered Pharmacists—Mrs. Ruth B. Todhunter, Kokomo; Mark P. Jett, Valparaiso; Paul Kunkler, Terre Haute; Chauncey E. Magley, Decatur; Bert Alford Mills, Zionsville; Ralph E. Nash, South Bend; Guy Blackmore, Lawrenceburg; E. A. Bush, Reynolds; George B. Dean, New Albany; Harry Ewing, Indianapolis; John Michael Heinen, Ambia; Webb B. Hooper, Amboy; Tod B. Huron, Tipton; Joy B. Ritter, Valparaiso, and Cyril L. E. Wilson, Kendallville.

Wisconsin.

MADISON, Oct. 20.—In recent examinations by the Wisconsin State Board of Pharmacy out of 47 applicants, 27 were successful in meeting the requirements, the following having passed:

Registered Pharmacists—Peter Daleiden, Chilton; Bruno Leidel, Milwaukee; Charles L. Funk, Janesville; Charles F. Bassey, Madison, and J. H. Bliss, Janesville.

Registered Assistant Pharmacists—W. Harry Zimmerman, Waukesha; Leo A. Slawney, Milwaukee; Alvin A. Norton, Marinette; Constine Graffenberger, Milwaukee; Joseph B. A. Dorszynski, Milwaukee; Hazel E. Elwell, Tomah; Schiffe Dense Schiffender, Milwaukee; Harry E. Weiand, Milwaukee; J. Joseph Eisenberg, Milwaukee; Robert H. Leonhardt, Sheboygan; R. Thurow, Milwaukee; James A. Conway, Janesville; Carl Eckmeyer, Sheboygan; Carl C. Neubauer, Merrill; Cyril A. Kloety, Milwaukee; Fred Arnold, Appleton; Victor R. Noer, Colfax; Fred A. Quilling, Menomonie; Robert F. Bartlett, New Glarus; Charles A. Abbott, Amery, and Harry M. Lappley, Mazomanie.

Mississippi.

JACKSON, Oct. 20.—L. H. Wilkinson, secretary of the Mississippi State Board of Pharmaceutical Examiners, announces that as a result of the recent examination, licenses have been issued to 28 of 58 applicants, in addition to which licenses were issued to seven graduates of the Mississippi University, who are not required to stand an examination. Of this class of 58 six were negroes, two of them passed, and

most of the other class were applicants who had failed in previous examinations. Those who were granted licenses are: [illegible] Lee Magee, Frank P. Cassidy, Vicksburg; John T. Ellzey, E. Isaacson, R. L. Bennett, Lauria, C. F. Reckless, Lloyd S. Scott, M. Hodnett Mershon, Rudiff A. Tortenberry, [illegible], Edward H. Irby, Dorsett; Jesse C. Hutson, Isaac; Edgar Vs. McMurtis, Jackson; George M. Semple, Vicksburg; R. B. Harper, Fayette; William J. Bell, Okolona; R. C. Rush, Bay St. Louis; Frederick Wesley Richards, J. V. McMullen, Mize; J. J. McGehee, Carthage; Joseph F. Champion, Indianola; W. T. Phillips, Jackson; C. S. Jackson, Leakville; P. J. Fik, Jackson; I. L. Rountree, Independence; A. R. Walker, Port Gibson; C. T. Fleackerlin, Winona; Wiley M. Wood, Franklinton, La.; Joseph J. Gerache, Jr., Vicksburg; Claud V. Terry, Natchez; Earl L. Kinney, Greenville.

Montana.

BILLINGS, Oct. 20.—Secretary T. M. Kehoe announces that at the 32d semi-annual meeting of the Montana State Board of Pharmacy held at Helena this month, 38 candidates were examined of which 21 received certificates as registered pharmacists and 16 as assistant pharmacists. Their names:

Registered Pharmacists—F. Nash, Helena; J. R. Leeper, Chateau; Dell Bergen, Butte; Conrad Ber, Three Forks; W. C. Spaker, Hamlet; W. A. Crawford, Kalispell; W. R. Medilu, Butte; R. S. Hamilton, Conrad; E. S. Patten, Missoula; R. R. Mellon, Butte; L. G. Vicars, Livingston; R. H. Fuller, Havre; A. G. Gillispie, Standford; P. W. Savage, Miles City; R. J. Woods, Bozeman; E. Mallett, Helena; K. E. Anderson, Glasgow; W. F. Halliday, Kenspect; Wm. Schaffarzick, Livingston; A. R. Schoenig, Missoula; Albert Morin, Walhalla, N. D.

Assistant Pharmacists—I. O. Wheeler, Great Falls; Harold [illegible], Arendes, Frank Chastek, Bridger; J. F. Sullivan, Helena; J. R. Medford, Glendive; Harold Ferguson, Helena; B. M. Fletcher, Butte; F. R. Jacobs, Lewistown; L. H. Ieckel, Glendive; Wm. Arendsen, Glasgow.

The board is composed of J. L. Krakeroe, Bozeman, president; Sid J. Coffee, Missoula, treasurer, and T. M. Kehoe, Billings, secretary.

Missouri.

ST. LOUIS, Oct. 20.—At the examination of the Missouri Board of Pharmacy held Oct. 10 the following qualified:

Registered Pharmacists—H. C. Dyer, S. E. Kepler, A. G. Comber, E. C. Cordrey, C. T. Bixen, E. H. Breemer, C. F. Miller, W. W. Wilson, James Starke, A. C. Youngman, C. O. Burst, A. Felgenbaum, R. A. Dougley, St. Louis; B. W. Sharp, P. H. Brown, Kansas City; O. C. Burri, St. Joseph; L. Anderson, Gainesville; Henry M. Sigloch, Keytesville; Arthur Davis, Poplar Bluff; Joseph W. Stubblefield, Success, Ark.; S. E. Morlan, Pollock; Sam Carey Smoot, Campbell; O. L. Wilson, Southwest City; Fred K. Wheeler, Bethany; C. W. D. Fultz, Hale; W. C. Pearson, Corney; W. S. Riley, Kearney; J. H. Halter, Charleston; J. R. Holliday, Keytesville; W. J. Day, Benton City.

Assistant Pharmacists—W. B. Primm, Deerfield; Ramon Yohe, Holliday; Brinton S. Jones, Lorenz P. Elz, Abraham P. Cohen, William Blumel, Jr., St. Louis.

Virginia.

RICHMOND, Oct. 20.—Three cases of misconduct on the part of pharmacists were considered at the October meeting of the Virginia Board of Pharmacy and the accused were placed on probation. At the examination the following were successful in being licensed in Virginia:

Registered Pharmacists—J. Z. Layne, Abingdon, Hugh F. Hurst, Richmond; Howard Corbin, Norfolk; Crowder White, Newport News; C. W. Bibb, Roanoke; H. E. C. Schulze, W. A. Mercer, W. L. Grimes, Richmond; H. E. Grigg, Greensboro.

Registered Assistant Pharmacists—Vas A. Keister, Pulaski; C. E. Hall, Covington; R. E. Floyd, Nassawaddox; H. E. Crabtree, Bristol; P. E. Plunkett, C. L. Halstead, Paul C. Jones, Norfolk; Radford Royal, Richmond; O. L. Hurdle, Norfolk; W. [illegible] Hopkins, Richmond; M. M. Stephenson, Ashland.

Michigan.

DETROIT, Oct. 10.—Next meeting of the Michigan Board of Pharmacy will be held at Grand Rapids, Nov. 15-17. At the last [illegible] the following were qualified:

Registered Pharmacists—Clarence M. Jennings, William H. Klatt, Walter R. Kerr, Harry A. Boucher, Jame Ekelman, Edward Fallo, Arthur Groskopb, Dan Wilbur Hauser, Andrew N. Lindeberg, Frank J. O'Callagan, Clyde D. Rowe, Harry E. Roe, Mahon K. Smith, A. E. Widerfield.

Registered Assistant Pharmacists—[illegible] Albert Van Rossenberg, Anthony Roshek, Alexander Zoyn, Steward M. Dodge, Arthur Gidley, D. Glen Lowes, Earl R. MacKay, Edward R. Palshell, [illegible].

Massachusetts.

[illegible] Oct. 10, Edward J. Sweeney of Somerville was [illegible] at the examination of the Massachusetts Board of Pharmacy held in this city. [illegible] Other successful candidates were: [illegible] Arthur J. Zygmond, Newton; [illegible].

District of Columbia.

WASHINGTON, D. C., Oct. 20.—Secretary S. L. Hilton announces that at the [illegible] examinations of the Board of Pharmacy of the District of Columbia the following were listed as the successful candidates: Naomi E. Richardson, James F. Everett, Frank A. Robey, Julia H. Strobel, Minnie A. Crews, Henry D. Hughes, Francis A. Lucas, R. N. Mac Williams and Harry Lawrence. Each was licensed to practice pharmacy in the District of Columbia. The next examination will be held Jan. 12 and 13, 1911.

Texas.

GALVESTON, Oct. 20.—Secretary R. H. Walker, of the Texas State Board of Pharmacy, announces that the following applicants were successful at the September examination:

Registered Pharmacists—A. D. Paulus, Lockhart; Ward C. Figley, La Porte; Vidal C. Carlin, Galveston; R. S. Carsner, Victoria; C. E. Kee, Temple; A. A. Luckenbach, Luckenbach; W. B. Roman, Jr., Bryan; Edwin Bruce, Jr., Galveston; S. G. Odom, Rogers; B. B. Bowden, Galveston; C. M. Carr, Arcadia.

Prior to Nov. 1 the board will decide the question of adding bacteriology as a subject. The next examination will be at Dallas Jan. 17.

Colorado.

DENVER, Oct. 20.—As a result of the Colorado Board of Pharmacy's September examinations the following qualified as registered pharmacists: I. E. Arentz, Denver; A. J. Bacon, Pueblo; G. W. Bean, Pueblo; R. R. Bell, Denver; Earl D. Bradley, Denver; B. Carpenter, Grand Junction; George H. Chittick, Colorado Springs; Grover Coder, Denver; T. L. Edgar, Ordway; H. D. Feltz, Denver; F. F. Frye, Colorado Springs; Chester E. Harding, Denver; Chester E. Haskins, Salida; Fred E. Holland, Las Animas; Fred E. Judy, Denver; Herbert Luria, Denver; Le Roy Newbern, Pueblo; J. Albert Pierce, Denver; R. W. Riedel, Ault; A. H. Ryan, Sterling.

California.

SAN FRANCISCO, Oct. 20.—At the last meeting of the California State Board of Pharmacy the election of officers for the ensuing term resulted as follows: H. O. Buker, Fresno, president; E. J. Molony, San Francisco, treasurer; Louis Zeb, San Francisco, secretary.

The following branches were assigned to the respective members in which to conduct the examinations for the ensuing year: Chemistry, C. B. Wilden; Materia Medica, J. O. McKown; pharmacy, E. T. Off; practical pharmacy, E. J. Molony; Identification, H. J. Finger; toxicology, G. M. Sutherland.

Kansas.

ELLSWORTH, Oct. 20.—W. E. Sherriff, secretary of the Kansas State Board of Pharmacy, announces that the next examination will be held in Pittsburg, Nov. 16. At the August examination in Beloit the following applicants qualified:

Registered Pharmacists—Ethel Bunch, Beloit; Ivan M. Coldwell, Kansas City; Arthur Hill, Wichita; Bess M. Sharp, Kansas City; Lee F. Barker, Clay Center; J. H. Gray, Wichita; Nellie S. Johnston, Kensington.

Registered Assistants—A. T. Richardson, Topeka; Howard W. Harbaugh, Beloit.

Maryland.

BALTIMORE, Oct. 20.—At the September examination of the Maryland Board of Pharmacy the following passed:

Pharmacists—J. Fred Holden, Queenstown, Md.; W. Morgenstern, Walter Brenton, Baltimore, Md.; F. R. Stammer, Towson, Md.; Charles B. Boyle Zeller, Hagerstown, Md.; Enoch D. Dickerson, Frank H. Weaver, Baltimore, Md.

Assistants—D. Carl Wolf, Hagerstown, Md., and John C. Norton, Powell P. Towers, James W. Powers, Harry G. Lehr, Philip Raiva and Uriah Woodyard, all of Baltimore.

Iowa.

DES MOINES, Oct. 20.—Out of a class of 26 in the August examination of the Iowa Pharmacy Commission 23 failed. The successful three were M. S. Morris, Des Moines; John T. Voight, Burlington; Bernard Foster, Creston.

Loses His License for Lending It.

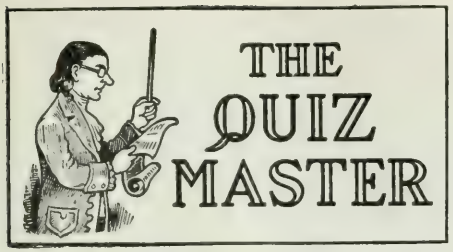
BURLINGTON, Oct. 20.—Vermont State Board of Pharmacy has cancelled the certificate to practice pharmacy held by Frank Eldred, of this city, for allowing it to be displayed in drug stores where he was not employed.

Auctioneer Preferred to be a Horrible Example.

Several times cynics had attempted to trap the auctioneer who was selling the retired druggist's stock of patent medicine into an admission that the nostrums he boomed was fake goods says the New York Sun, but always he was too quick witted for them. But when he got to the cough syrup, warranted to relieve tickling in the throat and stop the worst cough in five minutes after taking they thought they had him sure. The cold that had hampered the auctioneer throughout the day developed into a racking cough which punctuated his praises of the peerless medicine.

"Why don't you stop talking long enough to take some of your own cure, eh?" a wag called out.

"My dear sir," barked the auctioneer, "if I should do that I would have no cough handy to illustrate the kind of cough my medicine will cure."



A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

THREE PRIZES of $5.00, $3.00 and $2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each monthly series of questions. In the event of a tie for any one of the prizes offered, such prize will be equally divided among the successful contestants. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (8x10 in.), one side only, with your Name and Address at the top of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be sent at one time, and must be with us not later than the 15th of the following month.

CORRECT ANSWERS to each series of questions and the names of the three contestants who have been awarded the prizes will be published in the Era, after the close of the respective contests.

WE INVITE our readers to send us their questions for publication in this department, particularly questions related to the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

The Quiz Master
Care of Pharmaceutical Era 82 Fulton St., New York

Questions, November Series, 1910.

1—What is the valency of mercury in mercuric compounds; in mercurous compounds?

2—What would you dispense for "aether ext. felix-mas?"

3—What are four official solids which may be classed as emollients?

4—What official substance is sometimes called artificial or synthetic oil of bitter almond? What is the chief differences between this preparation and the natural oil of bitter almond?

5—Why should nitrobenzene or oil of mirbane not be substituted for either the natural or the true synthetic oil of bitter almond?

6—Has India-rubber any therapeutic action? Why is the substance of interest to pharmacists.

7—Of what substance does the precipitate which separates from tincture of rhubarb on standing, largely consist?

8—Why are soluble compounds of santonin not suitable for medical use?

9—What occurs when a fine stream of ethyl chloride is directed for a few minutes upon any part of the human body?

10—What are glucosides?

11—How does potassium ferrocyanide act as an antidote for copper sulphate?

12—What are electuaries?

13—Why is it better to contuse green or fresh drugs in mortars made of hard wood, or stoneware, instead of in metallic mortars?

14—Why do many pharmacists write the label before beginning to compound a prescription?

15—What is meant by the pharmacopœial statement that boric acid is "slightly unctuous to the touch?"

16—How much insect powder should remain in a 5 pound (avoir.) can of this powder after the following amounts (avoir. weight) have been removed: 7½ ounces, 4 ounces, 2 pounds and 180 grains? Show work.

17—What kind of containers are probably best adapted for the storage of crude drugs in such quantities as are usually found in drug stores?

18—What is the difference in the strength of solution of lead subacetate and of diluted solution of lead subacetate?

19—What is the reaction of quinine bisulphate to litmus paper; of quinine sulphate?

20—Why are glass pans preferable to metallic pans for the prescription scales?

21—What substances contained in the formula for syrup of ferrous iodide tend to prevent the oxidation of the ferrous iodide?

22—What is the more common name for methylthionine hydrochloride? What is the appearance of this substance?

23—What occurs when silver nitrate is triturated dry with iodoform?

24—What are hypnotics?

25—Stated in percentages of arsenic trioxide, what are the comparative strengths of solution of arsenous acid and Fowler's solution?

26—Given three solutions, how would you determine which was acid, which was alkaline and which neutral?

27—As used in pharmacy what is the meaning of the term "lutes"?

28—What is the official average dose of boric acid; extract of cascara sagrada; morphine sulphate; olive oil?

29—What are four common names for hyoscyamus?

30—What is the difference in the composition of living sponges and sponges as found in commerce?

31—If equal volumes of alcohol and water are mixed, will the volume of the mixed solution be the same as the total of the volumes of the two liquids before they were mixed?

32—What are the ingredients used in preparing solution of peptonate of iron with manganese?

33—What are amylolytic ferments?

34—How may monobromated camphor be prepared from camphor and bromine?

35—What occurs when salicylic acid is heated?

36—What may occur if borax is added to an emulsion in which the emulsifying agent is acacia?

37—Citric acid is used in preparing what official solutions?

38—What is usually dispensed in a drug store upon an order for arrowroot?

39—How would you briefly describe capsules in which liquids are usually dispensed?

40—Why should gelatin not be used as a base for suppositories containing tannic acid?

41—When a liquid is decanted from a vessel having no lip, how may the liquid usually be made to pass from the vessel in a small stream?

42—What are some of the reasons for the precipitation of fluidextracts on standing?

43—In dispensing nitrohydrochloric acid, what precautions should be observed?

44—Briefly, for what is zinc stearate used in medicine?

45—Iron and quinine citrate is sometimes found in the market in green scales; how do you account for this?

46—Why is a dried drug more easily reduced to a powder than a fresh drug?

47—Are the official elixirs, preparations which are liable to spoil?

48—If 100 gm. of opium, containing 7 per cent of morphine, are mixed with 200 gm. of opium containing 9 per cent of morphine, what is the morphine strength of the resulting product? Show work.

49—Why should the use of the name "coal tar creosote" be discouraged?

50—What effect does glycerin have upon the taste of tincture of ferric chloride?

Competitors, Please Notice.

The above list of questions is the complete series for November, and all who desire to compete for the prizes should see that their answers are received by the Quiz Master, not later than December 15. Do not send your answers in parts, but mail them all at one time, and be sure to follow the instructions given at the head of this department.

The judges in the September contest of the Quiz Master's Department have awarded the prizes as follows:

First prize, $5, to E. M. Holt, Quarantine, La.
Second prize, $3, to Carl A. Flandermeyer, Cleveland, Ohio.
Third prize, $2, to A. F. Donahower, Philadelphia, Pa.
Contestants wishing to know the grade which they have

made in the September contest may obtain this information on request by sending two cents for postage to the Quiz Master. THE QUIZ MASTER.

Questions and Answers, September Series, 1910.

1—Cantharides is used in preparing what U.S.P. preparations?

Cantharides cerate, cantharidal collodion and tincture of cantharides.

2—Which of the preparations mentioned in the answer to the previous question are intended for internal use?

Tincture of cantharides.

3—What is the difference between a solution of hydrogen dioxide and a solution of hydrogen peroxide?

They are both names for the same preparation.

4—What property is imparted to water in which soap bark is permitted to macerate?

When bruised and macerated in water soap bark imparts to that liquid, on agitation, the property of frothing like an aqueous solution of soap.

5—What are rhubarb fingers?

Rhubarb fingers are composed of powdered rhubarb compressed into forms. The term "fingers" is also applied to pieces of rhubarb rhizome which have been cut and trimmed until they have the general form of a finger.

6—What are some of the purposes for which a compound microscope can be used in a drug store?

For the examination of drugs as to their identity, quality and purity, detection of adulterants, particularly with reference to powdered drugs, spices, foods, etc., and for use in bacteriological examinations and urinalysis.

7—How may ammonium chloride be prepared commercially?

Ammonium chloride is now chiefly prepared by saturating the ammonia liquor from gas works with hydrochloric acid, evaporating the solution to dryness, and subliming the residue in iron vessels.

8—At what temperature does lard oil solidify? What is the appearance of this oil in the solid form?

Lard oil solidifies at or near 0°C(32°F). It has a white appearance, and is greasy and lard like.

9—To the presence of what substance is the green color of plants generally due?

Chlorophyll.

10—What are some excipients suitable for making pills containing creosote?

Soap and water, melted wax, or a mixture of licorice root and extract of licorice.

11—What is the appearance, odor and taste of potassium permanganate?

Potassium permanganate occurs in slender monoclinic prisms, of a dark purple color, almost opaque by transmitted light, and of a blue metallic lustre by reflected light, odorless, and having a taste at first sweet, but afterwards disagreeable and astringent.

12—Why should oils not be used in the treatment of phosphorous poisoning?

Oils are solvents of phosphorus and should not therefore be employed as antidotes in phosphorus poisoning, as their presence would tend to facilitate rather than to retard the absorption of the phosphorus into the system. Some toxicologists recommended the administration of French oil of turpentine in such cases, but this treatment is open to criticism.

13—What is the advantage in using ointment boxes having rounded bottoms?

The contents of an ointment box having a rounded bottom can be more easily removed than the old style box having a square cornered bottom.

14—Why will a piece of wood, placed upon the surface of water, sink much deeper than it will when placed upon the surface of mercury?

Mercury is a much denser liquid than water, and a piece of wood placed upon the surface of mercury is buoyed up with a greater proportional force than it is upon water.

15—How many Gm. of a 15 per cent solution of potassium iodide can be made from 800 gm. of a 20 per cent solution? Show work.

800 gm. in 100 gm. of a 20 per cent solution there are 120 gm. of potassium iodide (800 × 20 = 120). In a 15 per cent solution of potassium iodide one gram of potassium iodide will be found in 6⅔ gm. of solution (100 : 15 = 6⅔), and therefore 120 gm. will be present in 800 gm. (6⅔ × 120 = 800).

16—What U.S.P. acid will readily dissolve gold leaf?

Nitrohydrochloric acid.

17—What is the official average dose of antipyrine; compound tincture of guaiac N.F.; effervescent sodium phosphate; syrup of calcium hypophosphite, N.F.?

Antipyrine, 4 grains; compound tincture of guaiac, 1 fluidrachm; effervescent sodium phosphate, 120 grains; syrup of calcium hypophosphite, 1 fluidrachm.

18—What are the English equivalents for the following Latin contractions: (a) ejusd.; (b) frig.; (c) non-rep.; (d) pulv. subt.?

(a) of the same; (b) cold; (c) it is not to be repeated; (d) very smooth powder.

19—Which of the U.S.P. spirits are not precipitated by water?

Spirit of ether, spirit of nitrous ether, spirit of ammonia, whisky and brandy.

20—Unless carefully made, what may cause cerates to be lumpy?

Unless carefully made cerates may become lumpy, owing to the different melting points of the ingredients and the resultant difficulty in thoroughly mixing them. In preparing cerates the substance having the highest melting point should be melted first, then the remaining substances seperately added in the order of their melting points, care being taken to see that each is liquefied before making another addition.

21—The physiological action of stramonium closely resembles that of what other U.S.P. vegetable drug?

Belladonna leaves and root.

22—What is the narcotic or soporific ingredient in compound syrup of white pine, N.F.?

Morphine sulphate.

23—What official compound results from the action of hydrochloric acid upon marble.

Calcium chloride, the reaction being represented by the following equation: $CaCO_3+2HCl=CaCl_2+CO_2+H_2O$.

24—What should occur, when a test tube half filled with ether and containing some broken glass, is held for some time closely grasped in the hand?

When a test tube half filled with ether and containing some broken glass is held for some time closely grasped in the hand, the ether should boil.

25—As a rule what is the color of ferric salts? What U.S.P. ferric salt has a white color?

As a rule ferric salts are of a reddish brown color. Ferric hypophosphite.

26—How test oil of theobroma for the absence of wax, stearin or tallow?

If 1 gm. of oil of theobroma be dissolved in 3 cc. of ether in a test tube at a temperature of 17°C. and the tube frequently plunged in water at 0°C., the liquid should not become turbid nor deposit white flakes in less than three minutes; and if the mixture after congealing be again brought to 15°C., it should gradually form a perfectly clear liquid (absence of wax, stearin, tallow).

27—Why should hot water not be used in preparing a mustard plaster?

The active ingredient of mustard plaster is oil of mustard which is developed in the ground mustard in the presence of water by the ferment myrosin. Hot water destroys this ferment and mustard so treated loses its rubefacient or counter-irritant properties.

28—What is (a) chemical food; (b) cinnabar; (c) French white; (d) phenic acid?

(a) Compound syrup of the phosphates; (b) mercuric sulphide; (c) powdered talc; (d) phenol.

29—Briefly what are the two principal methods for marking the graduations on graduates?

The graduation of these measures is performed in two ways: in one the plunger used in making the utensils out of the molten glass is graduated; thus the finished graduate is produced in one operation. In the other, the graduating is done by hand, the quantity of liquid being poured into the ungraduated vessel from a burette and the quantity of liquid is carefully marked, the finishing of the graduate being done by the engraver.

30—What are the ingredients used in preparing (a) lead and opium wash (b) milk of magnesia?

(a) lead acetate, tincture of opium and water, (b) magnesium sulfate, sodium hydroxide and water.

31—What are two metals, the oxalates of which are usually

present in cerium oxalate?

Didymium and lanthanum.

32—Why must amyl nitrite be kept absolutely dry?

In the presence of moisture, amyl nitrite is rapidly decomposed into amyl alcohol and nitrous acid. Hence, the pharmacopœial direction that it should be kept in hermetically sealed bulbs.

33—What is meant by enteric pills?

Enteric pills are pills so coated that they do not, when administered, dissolve in the acid fluids of the stomach, but are soluble in the alkaline fluids of the intestines.

34—Why should the ordinary wooden cup-shaped measure, used in dividing seidlitz powders, be frequently standardized?

This measure should be frequently standardized because the cup wears away quickly and the capacity of the cup gradually diminishes. Much greater accuracy may be obtained by weighing each powder.

35—What are four liquids in which phenol is very soluble?

Alcohol, ether, chloroform and benzine.

36—What should be the color and reaction to litmus paper of a freshly prepared aqueous solution of sodium salicylate?

An aqueous solution of sodium salicylate when freshly made, should be colorless and should slightly redden blue litmus paper.

37—How would you prepare 100 cc. of a 2 per cent solution of apomorphine hydrochloride? Briefly explain.

Take 100 cc. of water, which will represent 98 per cent of the finished solution and calculate the weight of apomorphine hydrochloride required in every 100 parts by weight of finished solution, as follows: Since 98 per cent of the finished solution is 100 cc. of water or 100 gm. then 1 per cent represents 1 1-49 gm. (100÷98=1 1-49) and 2 per cent is 2 2-49 gm. (1 1-49×2=2 2-49), the amount of apomorphine hydrochloride which must be added to 100 cc. of water to make a 2 per cent solution. Having dissolved 2 2-49 gm. of apomorphine hydrochloride in 100 cc. of water, measure out 100 cc. of the solution.

38—What color changes occur when acetanilide is added to spirit of nitrous ether?

Acetanilide with spirit of nitrous ether gives a yellow solution, becoming red on standing for some time.

39—Why are bottles having the bottoms rounded to be preferred as containers for effervescing solutions?

Bottles with rounded bottoms permit the more equal distribution of the pressure developed from the expansive force of the gas which may be liberated within, hence their greater strength and usefulness as containers for effervescing solutions.

40—What is the most important alkaloid found in physostigma and what salts of this alkaloid are recognized by the Pharmacopœia?

Physostigmine. Physostigmine salicylate and physostigmine sulphate.

41—What is the source of camphoric acid?

Camphoric acid is obtained from camphor by oxidation with nitric acid.

42—What are diaphoretics?

Medicines which cause an increase of perspiration.

43—What occurs if veratrum is applied to the mucous membrane of the nose and throat?

Veratrum, applied to the mucous membrane of the nose and throat, produces violent sneezing and coughing.

44—Briefly, what is the internal medicinal action of castor oil?

Internally castor oil is a simple purgative, causing soft, but not liquid stools, without griping.

45—As used in pharmacy what is meant by the term "crystal"?

In pharmacy the term "crystal" is applied to the regular geometric forms, bounded by plane faces and definite angles, which many bodies assume in passing from the liquid to the state under certain conditions. Bodies without definite forms are termed *amorphous*.

46—How does purified animal charcoal differ from crude bone-black?

Purified animal charcoal differs from crude bone-black in having been repeatedly treated with boiling diluted hydrochloric acid, whereby all acid soluble impurities, such as calcium carbonate and phosphate, are removed.

47—Why cannot aqueous solutions of tartar emetic be mixed with strongly alcoholic liquids?

Aqueous solutions of tartar emetic cannot be mixed with strongly alcohol liquids without precipitation, as the salt is wholly insoluble in alcohol.

48—As applied to a class of plant principles, what is meant by "neutral principles"?

Neutral principles are neutral or feebly acid constituents of plants whose exact chemical structure is not well defined. They differ from glucosides in not being resolvable into glucose, and from alkaloids in not being precipitated by tannic acid or potassio-mercuric iodide.

49—What are three neutral principles recognizeed by the Pharmacopœia?

Aloin, chrysarobin, elaterin.

50—What is a urinometer?

A urinometer is a hydrometer intended especially for use in determining the specific gravity of urine.

ERA COURSE IN PHARMACY.

Matriculation Number. **Graduates to October 1, 1910.** *Examination Grade, P. Ct.*

6219. John Ash, Milwaukee, Wis. 98
6387. George Estes Bolen, Wildersville, Tenn. 96
6573. Frank W. Schroff, Terre Haute, Ind... 96

The above graduates will receive diplomas within a short time. A large and handsomely engraved diploma, printed on artificial parchment, with the graduate's name engrossed, especially suited for framing, will be furnished to those who request it for $2. Those who desire the latter should forward the necessary fee to THE PHARMACEUTICAL ERA.

A Popular Home Course in Pharmacy.

The ERA COURSE IN PHARMACY is a home study course in pharmacy which is divided into ten parts with recitations and examinations by mail. Thorough instruction is given in General Chemistry, Theoretical and Practical Pharmacy, Botany and Materia Medica. The cost of the COURSE is $10, and students of average ability can usually complete the work in from ten months to a year. New classes are organized each month and now is a good time to enroll, as studying the ERA COURSE would be an excellent way in which to profitably spend many long fall and winter evenings. A Prospectus will be sent by the publishers of THE PHARMACEUTICAL ERA to any one who applies.

To Meet Next Year on Blue Ridge Mountains.

BALTIMORE, Oct. 20.—The 1911 annual meeting of the Maryland Ph.A., will be held at the Blue Mountain House, in the Blue Ridge Mountains. This was decided upon by the executive committee of the organization recently, when the members, together with a number of members of the association, made a trip to the resort, and engaged quarters there. Those in the party were John B. Thomas, of the Thomas & Thompson Company; George G. Muth, of Muth Bros. & Co., and J. Emory Bond, of Parke, Davis & Co., who are the executive committee, and Charles Morgan, of Morgan & Millard, the new president of the association; David R. Millard, of the same firm; William M. Fouch, C. H. Knight, and E. F. Kelly, of Sharp & Dohme. The sessions will be held June 28-30.

Drug Clerks of the U. S. Invited to Join.

The National Association of Pharmacologists recently organized in Columbus, Ohio, has adopted resolutions inviting the drug clerks of the country to join its ranks and become active members. In order that all of the officers should be fully registered pharmacists two changes were made in the personnel of the official board at the meeting held last month. The officers are L. W. Sinclair, president; C. H. Bowersox and John A. Coram, vice-presidents; P. A. Mandabach, 428 S. High St., Columbus, Ohio, secretary and treasurer. Auditing committee, Arthur T. Thrall, D. N. Robin, Pittsburg, Pa., and F. M. Blank, Akron, O. National organizer, John C. Mandabach.

Would Close Drug Stores During Church Hours.

OWENSBORO, Ky., Oct. 20.—A petition is being circulated by the churches in this city, asking that the drug stores be closed during church hours on Sunday. This plan, if adopted, will involve closing between the hours of 10:30 to 12 a.m. and 7:30 to 9:00 p.m. and will enable the drug clerks and proprietors of this place to attend religious services.

ADVERTISING HINTS

FOR RETAIL DRUGGISTS.

Good-Will Advertising.

STUDENTS of advertising have noticed with satisfaction the growing evidence of good-will competition, and a resulting decrease in the criticisms of competitors. A striking example of this better and broader method of announcement was recently observed in an anniversary announcement of a large department store. The advertiser said:

> When we located on this corner sixteen years ago people laughed at us for starting "way back in G—— street." Now the largest store in the city has grown until its most windows face ours from an opposite corner. Between this other great store and ours there has always been vigorous competition, and as rivalry has grown, our good will has increased. On one of the other corners facing us will soon be the establishment of another great rival. A rival and yet a friend—we welcome it.

This liberal, manly sort of advertising makes a deep impression upon intelligent readers. A few lines of this style of expression will stamp a page of display with sincerity, honor and intelligence. It is to be regretted that the spirit of fair play is so often lacking from the advertising of retail druggists. In its place we find expressions of petty bitterness, which, unfortunately, often take the form of gross exaggeration of the advertiser's virtues and a laughable use of strings of personal pronouns and adjectives.

Convincing Modesty.

Instead of the moth-eaten bluster about "the Biggest store in town," "Most complete drug stock in the county" and "Most up-to-date store in the State," why not do a little real advertising instead of indulging in vanity-tickling bluff?

> This is not the largest drug store in town, neither is it the only good store. There are other stores older, larger and more costly than this one, and they are owned by honorable citizens who are good business men. But every business leads in certain lines, each good business man is a specialist. We make a specialty of home-use chemicals and handwork helps for housework. We believe that the following list and prices will convince you that we are really the town leaders in this line.

Read this advertisement carefully and then assume that it stands as the expression of your grocer, hatter or butcher.

In a typical case, possibly your own, as applied to a drug store, the advertisement would simply state what your intelligent patrons already know. Its novelty and chief advertising value as an advertisement for an average drug store would rest in the fact that the advertiser possessed enough common sense and modesty to acknowledge his own limitations. In closing the advertisement with a claim for superiority in housework helps, or some other line in which completeness does not necessarily mean a large investment, the acknowledgement of limitations becomes an advertising argument and a strong one. It is thus evident that although good will advertising may demand a confession and be looked upon by many as little more than blunt truth telling, the copy, to be effective, must be carefully prepared and critically analyzed before submitting it to the printer.

Good Will, But Not Servility.

There should be no cringing and no whining in good will advertising. One may [illegible] advertise even a drive line at special prices without placing a world-wide corner on certain goods or showing his competitors. An example of a type frequently used by a very prominent merchant and declared by him to be the best class of copy prepared by his advertising man is the following:

> There are some skilled pharmacists and bright business men among the druggists of this city. Competition is lively, but among the better class of us it is always friendly. As a specimen of good-natured rivalry, we just want to remind you that we have all of our competitors completely distanced with our offer of genuine, pressed castile soap at four cakes for a quarter of a dollar.

The Essence of Co-operation.

There can be little real co-operation among druggists who simply co-operate in buying, and then stoop to bitter and unfair competition in selling. If ten druggists club together for the purchase of ten gross of goods for the sake of a 5 per cent discount they would show much greater business acumen and a far clearer conception of what co-operation really means if they would purchase 25 gross at 10 per cent discount, and use half of the entire discount for co-operative, good-will advertising.

Members of one of our greater co-operative manufacturing concerns are engaging in joint, good-will advertising without any apparent fear that any one store will secure more than its share of the returns, or that any single man of the combination will use unfair methods to "work" his fellow advertisers. Why not carry this method farther? Why not frankly and honestly join in good-fellowship advertising of staple lines and policies?

Good Will Versus Chain Stores.

In our cities individual druggists are already feeling the inroads of chain store systems. One of the chief advantages of the great corporations over stores under individual ownership is in the decreased cost of advertising. If druggists would only throw aside their practice of petty rivalry and become broad-minded, intelligent competitors, they could unite in neighborhood or city advertising associations and give the corporation stores a real hustle for business.

Even in the smaller places the same policy would prove profitable. It is not unusual to find in a town with five to ten drug stores that the really unfair competition comes from one department, or general store. If the more intelligent and progressive half of the druggists in such a locality would unite in a carefully arranged campaign of co-operative good-will advertising they could bring their local commercial pirate to terms very quickly.

It is Less Direct.

Good-will advertising is less direct than individual effort, but it is far more convincing. It is and must be "reason-why" advertising. To state in a joint advertisement that the five named druggists are selling a certain line of fountain syringes at the same price is not enough. Such an advertisement would be more harmful than beneficial because it would lead readers to form wrong conclusions through lack of explanation.

In the following is given a suggestion for the handling of such an advertisement in proper, explanatory form:

> One of us, one of the druggists whose names appear below, had an opportunity to purchase a large lot of high grade fountain syringes at a very low price. The quantity, however, was greater than any single one of us could handle. Being broad enough to be friends although competitors, we joined together for the purchase of the lot, and as we thought of the welfare of our patrons as well as our own in making the purchase, we offer the goods at a heretofore unheard-of price. The goods and prices are just the same in all the stores. Take your choice. Go to the nearest store or to the store where you deal regularly.

The writer is fully aware that the suggestions made may seem very radical to many readers and impractical to others; but, if these readers will analyze the methods of their greatest competitors they should be convinced that radical co-operation among individuals is the only method of successful defense against the radical co-operation of capitalists

MOSTLY PERSONAL

Veteran Baltimore Druggist, True to Traditions, Has Rounded Out a Half Century in the Trade.

BALTIMORE, Oct. 20.—Quietly and without any formalities John B. Hurtt, senior member of John B. Hurtt & Son, 116 Light street, has completed the fiftieth anniversary of his connection with the drug trade. It was in 1860, when, as a boy of 14 years, he first became affiliated with the trade in the humble capacity of office boy in the wholesale establishment and drug mill of Canby & Gilpin, Light and Lombard streets, then one of the best known houses in the business Unlike many other office boys, who are always watching the clock and exercising great ingenuity when it comes to avoiding work, young Hurtt stuck close to business and kept a watchful eye on the method of doing things. He was not content merely to do his own duties, but he did not object to putting in an extra hour, when demanded, all the time endeavoring to get a correct idea of the routine and to absorb what there was to be learned. His advancement followed as a matter of course. From office boy he was promoted to entry clerk, and so on upward on the ladder of commercial efficiency and responsibility. As office boy he received $1.50 a week. Eventually he became a manager, getting $30 a week and standing well in the estimation of his employers. But even then Mr. Hurtt, by that time grown, was not content to remain where he stood. His ambition spurred him on to larger things, and as he seemed to have reached the limit on a salary basis, he concluded that the time had arrived for him to strike out on his own account, and accordingly, in 1870, he engaged in the selling at retail of patent medicines which were then far more profitable than they are at the present time, going into business in Baltimore street, near Gay. For five or six years he continued in this enterprise and then, by degrees, he drifted into the trade in American botanicals. He built up an extensive export business, occupying a warehouse in North street, and having an office in Holliday street. Subsequently, he established himself at 322 Light street, where he remained until 1906, when the widening of that thoroughfare compelled him to seek other quarters. Since then he has been at 116 Light street, where he is associated with his son, Thomas D. Hurtt. Mr. Hurtt is one of the old-timers in the trade. He has seen a number of once flourishing drug houses go down and has witnessed many far-reaching changes. All this time he has gone steadily on, pursuing the even tenor of his way and steering between the shifting currents of commerce. His custom is largely among the country population, from the Eastern Shore. His place having been along the steamboat wharves, it was only natural that travelers from the Eastern and Western Shore, coming up to town, either for business or for pleasure, should drift into Hurtt's for medicaments and other articles. It frequently happened that these visitors, when on the point of leaving, remembered that they had forgotten one thing or another, and Hurtt's offered a convenient place to get it. In this way he built up an extensive acquaintance, and he occupies a warm spot in the esteem of many of these callers at his place of business.

JOHN B. HURTT,
of Baltimore, Md.

Mr. Hurtt has adhered to old ways rather than followed modern methods. The numerous changes that have taken place have left him almost untouched. He is still the same courteous and rather old-fashioned druggist who fitted in with conditions before the Civil War. He not only sells goods, but he advises and gives counsel to his customers, who consult him on numerous occasions. His store has few of the modern fixings, The bottles on the shelves have done duty for decades and there is an absence to a considerable extent, of that nicety of arrangement characteristic of new establishments. But this does not trouble Mr. Hurtt, who can put his hands instantly on any article that may be wanted. No doubt his customers would feel unpleasantly affected if he were to introduce a lot of modern show.

He has made a close study of crude drugs and especially of the indigenous botanicals, and in this particular field he is regarded as an expert. His opinion has been sought in many instances where the question of grade or quality was concerned, and this specializing has become second nature to him. Notwithstanding his 64 years—he was born in Baltimore Dec. 16, 1846—he is still very alert and his faculties are undimmed. He follows the course of events closely and is keenly interested in the progress of his native city. He has allowed himself little leisure and his only hobby, if one may call it such, is botanicals. Below medium height, of spare figure, he has a large clear-cut face, with features indicative of attachment to and reverence for old things. His store appeals to his patrons. There are no new-fangled fripperies and intricate devices to confuse or disconcert them.

—J. LEON LASCOFF, of New York City, recently appointed by the New York Board of Regents to serve for one year on the Empire State's Board of Pharmacy, is an example of that rara avis—the truly ethical pharmacist. Mr. Lascoff's store is located at the northeast corner of Lexington avenue and 83d street, Manhattan Borough. It constitutes his field of fancy, study and work. Of his prescription department he is particularly proud and in this direction is a stickler. Prescriptions are compounded in a room aloof from the main portion of the store, where customers cannot enter, and silence is the rule. Here, conversation is not indulged in, but chemicals and pharmaceuticals are intelligently and deftly mixed, for there is no one to engage Mr. Lascoff's assistants in a quiet, little chat. Quickness is another quality Mr. Lascoff's clerks acquire for the new board member prides himself on having a "place for everything and everything in its place." Mr. Lascoff was born in Wilna, Russia, on August 28, 1867, and his school, college and pharmaceutical education was obtained in the country of his nativity. He practiced his profession until 20 years ago when he accepted a position with Frank B. Hays, the well known pharmacist and chemist, who at that time conducted a drug store at 5th avenue and 46th street under the firm name of David Hays & Son. Some time later he assumed charge of the prescription and tablet departments of Merck & Co., University Place, this city, and later still became connected with Dr. Adolph Tsheppe, whose pharmacy was located at Columbus avenue and 75th street. He engaged in business for himself in a pharmacy at 136th street and Willis avenue, but sold out shortly because his predecessor had not conducted the store in accordance with the ideas inculcated in him abroad

J. LEON LASCOFF,
Manhattan Borough, New York City.

and by his former employers. Mr. Lascoff lost no time, however, but immediately re-established himself at the corner of [illegible] and 58th street, and except for a change made within the last three years to the opposite corner, he has been a permanent fixture in that section of the city for more than a decade.

From early, personal experience in the pharmacies abroad, Mr. Lascoff found that the European pharmacist at that time busied himself with nothing but drugs. No patent medicines or proprietary articles, cigars, candy, surgical instruments, etc., were to be found in a pharmacy. The pharmacist was a professional man—not a merchant. Of course, each pharmacy in Germany and other Continental countries was limited by law to every 5000 population, but it would be very difficult to establish such conditions here. The great changes in the various American pharmaceutical organizations and the movement for better pharmaceutical education during the last few years remind Mr. Lascoff of the old country, and he thinks the trend is for much better conditions in the profession in the United States than have previously existed anywhere. The New York State Pharmacy Law recently enacted he believes to be a move in the right direction and that it will prove a benefit to the profession he is confident.

Mr. Lascoff has followed his natural bent in the dozen or more very interesting and highly instructive papers he has read before the American Pharmaceutical Association, the New York Branch of the A.Ph.A., and the five or six other pharmaceutical organizations local to New York City and of which he is a member. Mr. Lascoff has always taken a very active part in the proceedings of these associations and has become known among his colleagues as a sincere advocate of progress in his profession. An interesting paper by him will be found on page 1065 of this issue of the ERA.

—W. M. MCCORMICK, of McCormick & Co., is back at his desk in Baltimore after a trip to Europe, during which he visited a number of countries, saw numerous strange sights and made as close a study as possible of business methods abroad as compared with those in vogue in the United States. He came back delighted with what he saw, but more than ever convinced that the United States is the finest country in the world to live in. Richard H. Bond, of the firm, started later on a tour to the South and Southwest, which will take him as far as the Rio Grande, into Arkansas, Texas, New Mexico, Arizona, and a number of other Southwestern States.

—GEORGE W. HACKENBERGER, president of the Miner Drug Co., this city, is one of the grand stewards of the Grand Lodge of Free Masons of New York. At a recent meeting of St. Cecile Lodge, of which he is a Past Master, he was presented with an appropriate apron and his services to the craft were extolled in the presentation speech. Mr. Hackenberger also is in Corinthian Chapter, Constantine Commandery and Mecca Temple. He is 41 years old and was graduated from Philadelphia College of Pharmacy in 1891.

—WILLIAM T. BURKE, president of the Philadelphia Association of Retail Druggists, accompanied by Mrs. Burke, recently enjoyed an extended trip to Norfolk and other southern points in the interests of his health which has been somewhat impaired. His inability to preside at a meeting of the association resulted in a series of resolutions of regret and condolence being passed and sent to the popular official.

—GEORGE H. BENKHARDT, of the Smith, Kline & French Co., took an active part in the "Home-Coming Week" exercises of the Chester Springs Soldiers' Orphan School of which he is a graduate. Mr. Benkhardt, with his family, enjoyed a vacation at Atlantic City, as the result of which George is still entertaining his friends at the Drug Club of P[illegible] with stories of his prowess as a fisherman.

—H. M. PLAISTED, of Granite City, an East Side suburb of St. Louis, Mo., chief chemist for the Commonwealth Steel Co., is a brother of Col. Frederick W. Plaisted, Democratic governor-elect of Maine. Nothing was known of the relation during the Maine campaign but as soon as the returns came in the Granite City, Mr. Plaisted could no longer keep the secret.

—CURTIS P. GLADDING, the newly elected first vice-president of the A.Ph.A. [illegible] appeared on page 959 of the October ERA, has long been an active worker in the organization. He is the president of the Gladding Drug Co., of Hartford, former president of the Connecticut State Ph.A., and [illegible] of the Connecticut State Board of Pharmacy.

—RUSSELL T. BLACKWOOD, one of Philadelphia's well known pharmacists, has purchased the store of William M. Hill at Fifty-second street and Girard avenue, that city, which he will conduct in connection with his store at Fifteenth and Thompson streets. Mr. Hill will devote his time to his real estate operations and other investments.

—WILLARD GRAHAM, manager of the laboratory of the Smith, Kline & French Co., of Philadelphia, spent his vacation touring the United States and Canada with the team of the Belmont Cricket Club of Philadelphia. He is the leading batsman and played an important part in the excellent record made by the team.

—CHARLES E. VANDEBKLEED, chief chemist at the plant of the H. K. Mulford Co., and a prominent figure at the annual meetings of the American Pharmaceutical Association, is one of the leading spirits in the bowling team of the Mulford Company which has entered the Philadelphia Wholesale Drug Bowling League.

—S. B. DAVIS, one of Philadelphia's best known pharmacists, was a daily bather in the surf at Wildwood, N. J., during a recent vacation at that well known resort, so popular with Philadelphia representatives of the drug trade. Mr. Davis is an expert swimmer and a crack fisherman.

—JAMES QUICKENDEN, of Columbus, Wis., has sold his pharmacy to W. A. Kalk of Oconomowoc, Wis., after having been in the drug business 37 years in the same store. He was for 18 years a partner of John Swarthout, after whose death in 1904 he became sole proprietor.

—C. F. MICHAELS, vice-president of the Langley & Michaels Co., San Francisco, left for an extensive eastern trip about the middle of October. Indianapolis was one of the objective points of his itinerary and there he spent two days visiting the laboratories of Eli Lilly & Co.

—DR. C. C. HASKELL of the research department of the Lilly Laboratories at Indianapolis, has returned to his office in Indianapolis after an absence of about three months. Dr. Haskell spent the summer studying diseases of infants in the hospitals of New York City.

—MR. AND MRS. CHARLES REHFUSS, of Philadelphia, have returned from an extended western trip, part of which was spent at Mrs. Rehfuss' former home at Belvidere, Ill. Mr. Rehfuss is a brother to J. H. Rehfuss, president of the Brooklyn College of Pharmacy.

—NATHAN A. COZENS, secretary of the Philadelphia Association of Retail Druggists, enjoyed the bathing at Wildwood Crest, N. J., in the course of a recent vacation spent with his family at that resort.

—C. R. COSBY, manager of the New York branch of Eli Lilly & Co., has returned to his desk after a vacation spent near his old home on the Ohio River in Southern Indiana.

—E. O. AND O. E. SMITH of the Smith Drug Co. of Janesville, Wis., have returned from Boston, Mass., where they attended the annual convention of the Rexall druggists.

—WM. V. R. SELTZER has sold his drug store at North Duke and Lemon streets, Lancaster, Pa., to Charles P. Phipps, who has managed the pharmacy for several years.

—WOODS A. CAPERTON, of the traveling sales service of Eli Lilly & Co., recently made a visit to the Colorado Lilly salesmen, calling at Denver and Pueblo.

—HERMAN C. G. LUYTIES, president of the Sanitol Chemical Laboratories' Co., has purchased the Savoy apartments in St. Louis for $150,000.

—HOWARD B. FRENCH, president of the Philadelphia College of Pharmacy, recently enjoyed a ten days' trip to Denver, and points en route.

—HARRY L. RUSSELL, an executive of Parke, Davis & Co., visited the company's New York branch previous to his return to Detroit.

—FRANK R. ROHRMAN, president of the Philadelphia Wholesale Drug Co., was a Boston visitor earlier in the present month.

—MISS HESTER LAURIE, prescription clerk at the store of the Stiles Drug Co., Sturgeon Bay, Wis., has resigned her position.

—DAVID LOW, of the Red Lilly New York sales force, recently spent a week in the home city, Indianapolis.

—L. K. SNODGRASS, of Little Rock, Ark., was a recent visitor at the New York Drug and Chemical Club.

—HARRY SELTZMAN, advertising manager of Parke, Davis & Co., Detroit, was a recent visitor to this city.

—R. O. THIELE, Milwaukee, has gone to the Mooney Pharmacy, Ladysmith, Wis.

United Drug Co. Meeting Enthusiastically Endorses Mr. Liggett.

Directorate Enlarged, By-laws Amended to Prevent Litigation and Week of Business and Pleasure Ends with Inspection of New Plants and a Great Banquet.

Scene in the Boston Arena during the recent eighth annual convention of the stockholders of the United Drug Company.

BOSTON, Oct. 20.—The eighth annual convention of the stockholders of the United Drug Co. last month closed literally in a blaze of glory. For three days the stockholders to the number of nearly 1500 had met together, alternating solid business sessions with entertainments and outings, trolley and automobile trips, the theater, athletic events, a real airship ascension for their special benefit, and with lunches, clambake and finally a great banquet in the new Boston Arena. At the closing event 200 tables, each seating a group of eight, were spread in the Arena and the stockholders had as guests about 150 of their lady friends and the lieutenant-governor of Massachusetts.

After an absence of two years the stockholders of the U.D.C. came back to Boston to view an enormous addition to the manufacturing plant in Roxbury, and also to have a heart-to-heart talk with the president of the company, Louis K. Liggett, who during the past year had been the center of much discussion and some litigation with some of the stockholders. The stockholders had the heart-to-heart talk, they learned all about everything they asked, and then as the final act of the great convention, by a unanimous vote they expressed their absolute confidence in the president, in the board of directors and in the policy of the company. Matters had been approaching this climax ever since the opening business session on Tuesday, when in an address of more than two hours Mr. Liggett reviewed in great detail the progress of the year in a business way, and also told of the ramifications and causes of the year's litigation. That story has already been told to ERA readers. (See page 995, October ERA.) It was voted to hold the next convention at Richmond, Va. The invitation to meet there came from Polk Miller, and was seconded by W. T. Dabney, of the Richmond Chamber of Commerce. W. C. Bolton, of Brooklyn, spoke of the condition of the Drug Merchants of America, the buying club of the U.D.C. F. S. Rogers, W. C. Bolton and Charles Rapelye were re-elected directors of the Drug Merchants. A. W. Connor of Columbus, O., and J. D. O'Donahue of Negaunee, Mich., gave instructive talks on store management and advertising. The latter distributed several hundred postcards of his town which were eagerly received, and in which he thereby gave a concrete illustration of advertising. A. W. Campbell, of Boston, reported for the United Druggists' Mutual Fire Insurance Co., which now has written nearly $4,000,000 of business, received nearly $65,000 in premiums, distributed $17,000 in losses, and has assets of $130,000. Harry M. Taylor, of Boston, spoke of the new stationery department which had been established during the year.

At the last session attention was again turned to the litigation and the conflicts of the year. President Liggett read a letter from a stockholder in which was asked how much salary the officers and directors of the company received. Mr. Liggett gave the information and more. He said his present salary is $10,000, but as soon as the amount was named, a stockholder on the floor called out, "That is not enough," whereupon everybody burst into laughter and applause. When the company was organized the salary of president was $4000, he said, and then it was raised to $6000. The directors receive no salary, and no other officer or employe receives over $5000. When the company was organized he was given $140,000 worth of stock, of which he had afterward sold $50,000, but had since bought part of it back.

Board of directors of the United Drug Co.:
Back row (left to right)—E. L. Scholtz, Denver; J. C. Brady, Fall River; Byron M. Hyde, Rochester; Louis K. Liggett, Boston; Walter A. May, of Pittsburg; W. C. Bolton, Brooklyn.
Front row (left to right)—C. E. Ball, Holyoke; G. W. Bence and J. C. McCormick, Boston. The two other directors, E. R. Petty of Newark and T. A. Brannen of Atlanta, while at the outing, were not snapped by the photographer.

Several amendments were made to the by-laws. The number of directors was in-

crease from 11 to 15. A grievance committee of seven stockholders was provided, and a by-law which had been the indirect cause of litigation was repealed. All of the present board of directors were re-elected, and upon requests from the floor the 11 men filed up to the platform and were individually presented to the stockholders. They are: E. L. Scholtz of Denver, W. C. Bolton of Brooklyn, J. C. Brady of Fall River, Charles E. Ball of Holyoke, E. R. Petty of Newark, Walter A. May of Pittsburg, Byron M. Hyde of Rochester, Thomas H. Brannen of Atlanta, and Louis K. Liggett, G. W. Bence and James C. McCormack of Boston.

Then came the enthusiastic endorsement of the president and the directors, in which the absolute confidence in them was most fully expressed.

The social activities were planned on an elaborate scale. Adjoining the new Boston Arena, several tents had been erected, and lunch was served there at noon on the first day. In the Arena itself Liggett's confectionery and Ballardvale water and U.D.C. cigars were free. On Tuesday afternoon, during the business session, an automobile ride was provided for the ladies, taking them through the most beautiful suburbs, and thence down through the country to the south shore and along the famous Jerusalem road. A light rain was falling when the start was made, but this did not last long and the ride was altogether enjoyable. That night the company had bought the entire seating capacity of the Tremont theater, where "The Fortune Hunter," was the attraction, in which a drug store is a prominent feature of the play, and the hero marries the druggist's daughter. But there was also something else on the tapis. Special programs had been provided, and sealed on the inside cover, with instructions that it be opened after the third act, were two small silk American and British flags. In the program were also printed the words of the British national hymn, "God Save the King," the American popular song, "Dixie," and the Canadian hymn, "The Maple Leaf Forever." The conductor of the orchestra had already made provision for the event, and at the right moment started up the British hymn. Everybody arose, waved the flags and sang a verse of the hymn, following it with Dixie and then the Canadian hymn. It was a patriotic and dramatic moment.

The social program for Wednesday was even more elaborate. The ladies were transported in special cars during the forenoon to Riverside where boating, canoeing and bathing were available, and where there were water stunts by professionals. Box lunch was served there, and the men hurried from the convention at 1 to join the party. The program of athletic events that followed was a long one, and included many humorous things, one of which was sparring on a mast, two of the bold contestants being President Liggett and William C. Neilly, the head of the Canadian branch. But the star feature of the afternoon was the presence of Charles Foster Willard with a Curtiss biplane, who made a number of ascensions, raced with an express train, and thoroughly delighted everybody. Then came a New England clambake, and in the evening there was dancing and a vaudeville entertainment.

Thursday there were sight-seeing guides for those who wished to see historic Boston, and at noon everybody went to the laboratories in Leon street in Roxbury. Lunch was served there, and then an inspection of the great plant was made, especial attention being paid to the two large buildings erected during the past year, costing $200,000, and accommodating the administration department and the perfumery department.

In the evening came the final banquet, when 200 tables, each seating eight persons were set in the Arena, presenting a wonderful sight, with the decorations of glass, silver and brilliant gladioli. President Liggett presided, and with him were Lieutenant-Governor Frothingham of Massachusetts, Rev. Dr. A. A. Berle of the Shawmut Congregational Church [illegible] of Cornwall-on-the-Hudson, F. H. Sullivan of Manchester, N. H. and Mart King of Newark, N. J. Walter E. Anderson sang and a letter of regret was read from Col. Theodore Roosevelt.

Gasoline Explosion Wrecks Drug Store.

WATERTOWN, Wis., Oct. 20.—An explosion of gasoline in the basement of Charles A. Gamm's drug store recently wrecked the interior and placed the lives of many people in jeopardy. Dell Ruedic, a clerk, barely escaped with his life. Mr. Gamm was injured.

PATENT-MEDICINE NOTES NOT NEGOTIABLE.

In North Dakota Druggists Cannot Be "Taken In" On Obligations of the Lightning Rod Branch.

IN the *Bulletin* of the North Dakota Food Department, the commissioner, E. F. Ladd, calls attention to the existence of a law of that State which clips the wings of persons who may try to exploit fake remedies, etc., at the expense of the North Dakota druggists. He says:

"As previously stated in several bulletins, there have been firms selling patent medicines in this state, the parties purchasing the same supposing that they were to handle the products on commission, and signing an agreement which turns out to be a note which has been negotiable; in many cases the face-value collected; and in other cases a compromise made whereby settlement was made for one-half of the face-value. In the Revised Codes of North Dakota for 1905 we find the following:

"'Section 9445. UNLAWFUL OBLIGATIONS IN WRITING. Every person who takes any obligation in writing for any lightning rod, or any of its attachments, or for any patent right or claimed to be a patent right, or for which any stallion or jackass shall form the whole or any part of the consideration, or for any patent medicine, or for which the whole or any part of the consideration shall be the future cure of any disease or ailment, shall, before it is signed by the maker, stamp or write in red ink across the face of such written obligation in plain, legible writing, or print, the words 'given for a lightning rod,' or, 'given for a patent right,' or, 'given for a stallion,' or, 'given for a jackass,' or, 'given for patent medicine' or, 'given for the cure of disease,' as the case may require. Such obligation so stamped shall not be negotiable and shall be subject to defenses in the hands of every holder or owner thereof. Any person who shall violate the provisions of this section is guilty of a misdemeanor, and upon conviction thereof is punishable by a fine of not less than two hundred and fifty dollars and not exceeding one thousand dollars, or by imprisonment in the county jail not more than one year, or by both such fine and imprisonment, and shall be liable in a civil action to the party injured for all damages sustained by him.'

"It would seem to the writer as though a paper which had been signed and proved to be negotiable note, such as has been given in several instances, should properly be made to come under this provision of our Law. I trust that those who have been taken in by such fake remedies, cures, etc., will take steps to contest the collection of such an unjust bill."

Mistrial in Enforcing a Disputed Contract.

READING, Pa., Oct. 20.—After 23 hours the jury in the suit of the Renol Sales Co. against Samuel H. Bell, was unable to agree upon a verdict, standing 10 to 2 in favor of the defendant. The case involved an effort to recover $330.88, alleged to represent a balance due for medicine purchased from the Renol Co. Druggist Bell alleged that the plaintiffs furnished a written guarantee to cure all patients, who underwent the treatment. A number, he alleged, were reimbursed for failure to cure, but the plaintiffs refused to live up to their guarantee.

Fatal Mistake of a Druggist Costs $2000.

LOUISVILLE, Ky., Oct. 20.—Daniel S. Eldridge, administrator for the estate of Hensley H. Morton, cigar salesman of this city, who was killed by drinking formaldehyde in Council Bluffs, Ia., has settled his damage suit against the Moore Drug Co., whose employee gave Morton the poison by mistake for mineral water. The settlement was for $2000. Morton's death occurred ten minutes after he had swallowed the fluid.

Chinese Drug Stores Seen by A.D.S. Party.

The members of the A.D.S. party which recently visited the Pacific Coast, while in San Francisco inspected several of the Chinese drug stores and were struck with their neat appearance and the extreme nicety with which the Chinese apothecaries weighed out their drugs. The shelves were covered with strange plants and other articles used by the Chinese as medicine, and in the windows were several dead snakes.

BOTH FOUNDERS OF SHARP & DOHME ARE ILL.

Each is Over 70 Years Old and There Has Been Some Apprehension, but the Reports are Encouraging.

BALTIMORE, Oct. 20.—By a strange coincidence both of the founders of Sharp & Dohme, the well known manufacturers of pharmaceuticals and chemists of Baltimore, are sick at the same time, and the condition of both gives rise to some apprehension. Charles E. Dohme has been ill for a year, and about twelve months ago he was so low that his family and friends were prepared for the worst. Later he rallied, much to the satisfaction of his numerous friends and for months he has been strong enough to take occasional automobile rides. Last summer he spent some months in Maine, and appeared to hold his own surprisingly well. Since the cool weather set in he has been home again, his condition being practically unchanged.

On Oct. 7 the family received word by wireless from the North German Lloyd Steamship George Washington, then at sea, that Louis Dohme, the senior member, had been taken seriously ill after the vessel left Bremen. His trouble was diagnosed as neuritis. Ernest Stauffen, New York representative of Sharp & Dohme, and Dr. A. R. L. Dohme, a son of Charles E. Dohme, and a nephew of Louis Dohme, were on hand to receive the patient on his arrival at New York, and he was sent to a private sanitarium where he improved enough to be brought to Baltimore on Saturday last. His condition is encouraging. Louis Dohme went abroad early last summer, as has been his custom, to spend the warm season in Europe, and took the waters at Wiesbaden, which had always given him much relief from a gouty condition. He showed great improvement and had taken in some of the notable points in Europe before he started for home.

Connecticut Druggist Drowned While Hunting in Alaska.

SEWARD, Alaska, Oct. 20.—H. B. Smith, a druggist of Norwich, Conn., who came to Alaska to shoot big game, and Alfred Lowell, eldest son of one of the founders of Seward, were drowned in Lake Kenai Tuesday while returning from following moose in the mountains. With William Walker, a guide, they were crossing the lake in a small dory and encountered a storm. The waves swamped the boat and threw the occupants into the water. They were only 150 feet from shore, but Mr. Smith and Mr. Lowell could not swim. The guide reached shore. The body of Mr. Smith will be sent to Norwich for burial.

Death Ends Druggist's Talk With Doctor.

VINCENNES, Ind., Oct. 20.—Frederick Ries, 54, manager of the drug store of Ries & Co., 211 Main street, suddenly expired from heart trouble, shortly after reaching his home a few days ago. Death came while he was telling Dr. Joseph W. Smadel who had been summoned by Mrs. Ries, that he had had trouble in breathing throughout the entire morning. Mr. Ries came here from Chicago three years ago, his company buying the Schoenfield drug, wall paper and paint store, one of the oldest in the city. Before entering the drug business he traveled in this country and in Europe for some prominent firms.

Robbed and Murdered While Boat Riding.

SOUTH BEND, Ind., Oct. 20.—Emil J. Kuss, a druggist, formerly of South Bend, was robbed and murdered near Portland, Ore., according to information received by the family. Kuss went boat riding with an unidentified man. This companion returned soon after without Kuss, declaring he had fallen overboard and drowned. Later he said he put Kuss ashore. The body was found by Portland police, badly decomposed. The authorities believe Kuss was murdered during the boat ride, the motive being robbery, his companion throwing the body into the stream after the assault.

DR. HALLBERG, PHARMACAL EDUCATOR, DEAD.

Held Many Important Positions In Pharmaceutical and Medical Institutions of This Country.

CHICAGO, Oct. 22.—Carl Svante Nicanor Hallberg, Ph.G., M.D., professor of pharmacy at the University of Illinois College of Pharmacy for many years, died today at his home in this city. The exact nature of the fatal illness is not known, although three weeks previous to his demise he was attacked by an affection of the brain and from that time sank gradually to death.

Professor Hallberg was born in Helsingborg, Sweden, October 13, 1856, the son of Carl and Anna Hallberg. He attended the Latin school in Helsingborg from 1860 to 1864 and later the Gymnasium in his native town from 1865 to 1869.

July 4, 1869, the young Hallberg arrived in America and seven years later graduated from the Philadelphia College of Pharmacy. He was granted an honorary degree of doctor of medicine by the Harvey Medical College in 1893. In order to accept the chair of pharmacy at the Chicago College of Pharmacy, he had proceeded to Chicago in 1890, and in 1891, Professor Hallberg was made a fellow of the Chicago Academy of Medicine and in 1895 and 1896, occupied the chair of pharmacy of the Illinois Medical College. On Dec. 20, 1893, he married Therese Bergstrom.

The late C. S. N. HALLBERG, of Chicago.

For the past five years, Professor Hallberg had edited the *Bulletin* of the A.Ph.A. From 1883 to 1893, he was editor of the *Western Druggist*. For three terms he served on the committee of revision of the U.S.P. and since 1886 was a member of a similar committee for revising the N.F. During the last decade he has sat in the council of pharmacy and chemistry of the American Medical Association. At Detroit in 1888, the American Pharmaceutical Association presented Prof. Hallberg with a gold medal struck in his honor, and the board of trustees of the World's Columbian Exposition in Chicago, 1893, bestowed on him a diploma of honorary mention.

Professor Hallberg was a man possessing an immense fund of general, as well as pharmaceutical, knowledge. A constant attendant at the annual meetings of the A.Ph.A., he participated in all its debates and discussions, thereby contributing much to the interest and edification of its members, and the effectiveness of the work accomplished by that organization. Prof. Hallberg was a man of considerable impulsiveness and often in his argument he proceeded directly contrary to the opinions of his best friends, but he possessed that quality of fearlessness that enabled him to openly acknowledge his own mistakes. A widow and a fourteen-year old son, Carl Hallberg, survive.

Student Electrocuted in Drug Store Basement.

EVANSVILLE, Wis., Oct. 20.—Eli Cook, 21, a clerk in the Pioneer Drug Store, was electrocuted recently in the basement of the store. Cook was a student at the Evansville academy and worked at the drug store outside of school hours to earn money to pay for his education. In turning on the electric lights he grasped a wire where the insulation had been worn off and received the full shock. Cook was dead before a physician arrived.

Facing a Divorce Suit Ends His Life.

CORRY, Oct. 20.—Charles D. Mather, aged 60, druggist at Bear Lake for many years, committed suicide recently by shooting himself. He died almost instantly. Mr. and Mrs. Mather had not lived happily and the latter had begun proceedings against her husband to secure a divorce.

One Druggist Uses Pistol, Another Poison.

CHARLES P. GIBBON, a well known pharmacist, of Washington, D. C., killed himself recently with a revolver. He had

been made despondent by injuries received when hit by a motorcycle. He was 42. A widow and two children survive.

CHARLES R. H. HERSON, 47, of South Side, Pittsburg, after a nervous breakdown, recently ended his life with carbolic acid. A widow and son survive him.

Wholesale Druggist's Son Victim of Catarrh.

LOUISVILLE, Oct. 20.—Henry Daniel Richardson, aged 34, son of Warren H. Richardson, of the Peter-Neat-Richardson Drug Company, died recently of acute gastric catarrh. He was one of the best known younger druggists in Louisville, being a graduate of the Louisville School of Pharmacy and a member of the Kappa Psi fraternity. Several months ago he established a drug store in Central City, Ky., and was conducting that business when he was forced to return to Louisville on account of ill health.

Druggist's Wife Found Dead in Cistern.

NEW RICHMOND, Wis., Oct. 20.—The body of Mrs. A. C. Van Hee, wife of a well known druggist of Hammond, was found recently in a cistern underneath their residence. She had been in poor health for some time.

Obituary Notes.

—DR. J. V. SHOEMAKER, 52, who died recently in Philadelphia had been president of the Medico-Chirurgical College since 1890 and was the author of several books used by pharmacists and by students of pharmacy, besides being a prolific contributor to medical literature. He was prominent in the A.M.A. and similar National organizations.

—AXEL A. E. RUSCHKE, aged 41, druggist, died recently of pneumonia at his home, 233 Seventeenth street, Brooklyn. He was born in Denmark, and left a widow, a son and a daughter.

—GEO. J. LITTLE, prominent in Colorado pharmaceutical circles and greatly liked by many friends through his connection with Sharp & Dohme, died Oct. 6, at Toronto.

—GEO. MACKENDRICK, 60, former mayor and prominent citizen of Kincardine, Ont., died recently. He was unmarried.

—JOHN F. HELMECKE, 30, who died recently at Tuckahoe, N. Y., is survived by his father and two sisters.

—JOHN H. SURRATT, 27, Elkins, W. Va., is dead of Bright's disease. A widow and five children survive.

—DR. S. L. BEELER, 68, pioneer druggist of Hamilton, O., is dead. He was disabled in the Civil War.

—MARSHALL C. HOLMES, 51, Trenton, N. J., is dead of Bright's disease. A widow survives him.

—FRANK ROUDEBUSH, 27, of Davis & Roudebush, Colfax, Ind., died recently of typhoid fever.

—E. R. GODDING, of Eau Claire, Wis., died recently after undergoing a surgical operation.

—JAMES CLARKE, ORANGE, N. J., died of apoplexy Oct. 5.

—HARRY T. BUTTS, Washington, D. C., recently died.

—JOHN ANKENBROCK, Dayton, O., is dead of apoplexy.

—K. O. KNUTZEN, 46, is dead at Manitowoc, Wis.

—JOS. R. HART, Wilkes-Barre, is dead, aged 50.

—TODD MILLER died recently at New Carlisle, O.

—GEO. M. WOOD, 62, Bloomfield, N. J., is dead.

—D. B. FERRIS, 76, is dead at Wilmington, Del.

Fair Pharmacist Bride of Drug Store Patron.

READING, Pa., Oct. 20.—A romance which started in a drug store has just culminated most happily in the marriage of Miss Lillian M. Fisher, a registered pharmacist in the drug store of W. H. Raser here, and George F. Weidman of Tampa, Fla. The latter in the course of a business trip to this city became ill and secured medicine at the Raser store, Miss Fisher waiting on him. Mr. Weidman's symptoms were discussed and the fair young pharmacist sympathized with him. The acquaintance thus begun continued by mail when Mr. Weidman returned to Florida, and when in one of the letters he asked her to become his wife, she accepted. The wedding was postponed until Mr. Raser returned from a European tour and then was quietly solemnized in Philadelphia. The happy couple are now at their home in Tampa where Mr. Weidman is a member of the box manufacturing firm of Sheib & Weidman.

Maine Schools Kitsee for 1911 Meeting.

Dr. M. L. Porter, secretary of the Maine Ph.A., announces that the 1911 meeting will be held June 28-30 at Kitsee

What Some Folks Are Doing.

—LOUIS K. LIGGETT, president of the United Drug Co., of Boston, and Robert R. Updegraff, of the Mellin's Food Co., of Boston, are both included in the list of speakers secured by the Boston Y.M.C.A. School of Commerce and Finance, in a course on "Publicity." Mr. Liggett is announced to give a lecture on "Plan and Work of the Selling Department," and Mr. Updegraff's subject is "Direct Advertising."

—J. ARTHUR BEAN, president of the Boston A.R.D., was one of the speakers at the reunion of the John Bean association, consisting of the descendants of John Bean who came to this country from England in 1660. The reunion was held in Boston Oct. 7. Mr. Bean was also appointed one of the corresponding members of the association.

—E. LEHNHARDT, of 1159 Broadway, Oakland, Cal., who has been active in enlisting Congressional support for holding the Panama-Pacific International Exposition of 1915 at San Francisco, has used neat pictorial post cards for the purpose, copies of which he has sent in large numbers to persons whose interest might be obtained.

—D. N. ROBIN, of Pittsburg, long an active worker in behalf of better conditions for drug clerks, is now a proprietor, having purchased Irwin D. Miller's Corner Drug Store, Eighth street and Third avenue, Freedom, Pa.

—JOHN C. NEHR has sold his pharmacy in Eau Claire, Wis., to Capt. Becker, of Menomonie and is now living in Milwaukee, having retired from active business life.

—R. R. LENT, Iowa City, '09, has purchased an interest in the business of W. N. Switzer, at Pilot Mound, Iowa. The firm name will be the Switzer-Lent Drug Co.

—EDWARD MALLINCKRODT, president of Mallinckrodt Chemical Works, recently returned to St. Louis after a short visit to the New York branch.

—EDWARD LOEW, Wautoma, Wis., has sold to Mr. Jarvis his interest in Loew & Hunt and will move to Texas.

—A. H. VAN GORDER, of Hall-Van Gorder Co., Cleveland, recently visited the drug trade in this city.

Medicine Manufacturer Takes a Bride.

ST. LOUIS, Oct. 20.—Miss Vennie Alene French broke her engagement to another young man recently to marry Ernest W. Rose, secretary of the E. W. Rose Medicine Co. The ceremony was performed by the Rev. Dr. W. C. Bitting of the Second Baptist Church. Miss French and Mr. Rose first met in August, when a young woman out driving with Mr. Rose stopped at Miss French's home for a package she had left there. Cupid began at once to tie up another kind of package for Mr. Rose and Miss French. Miss French is a daughter of Mrs. J. H. French and is a relative of Ed Vandeventer for whom the famous Vandeventer avenue was named and who owned much property in St. Louis.

Kentucky Druggist Has Romantic Wedding.

LOUISVILLE, Oct. 20.— A romantic story of the love of a young druggist for a runaway waif has developed at Paducah, and is now going the rounds of Louisville drug circles, after the marriage of the young couple. Bonnie Verlines ran away from her uncle's shanty-boat on the Tennessee River one night last winter because the old man mistreated her. She took refuge in a house next door to the drug store of Guy Bonds, the hero of the tale, and the young man was at once struck with the appearance of the runaway. After the girl had spent a few months in the Presbyterian Home at Paducah, young Bonds persuaded her to elope with him to Anchorage, where they were married.

Rosengarten-Sims.

PHILADELPHIA, Oct. 20.—One of the most interesting weddings from a social viewpoint, that has occurred in this city this fall took place recently when Miss E. Marion Sims, daughter of Mrs. John Clark Sims became the bride of Frederic Rosengarten, son of Mr. and Mrs. Harry Rosengarten. The ceremony took place at noon at the bride's home in Chestnut Hill with the Rev. J. Andrews Harris, officiating. The bridegroom is a member of the well known family of chemical manufacturers and is a member of the board of directors as well as a department manager of the business of the Powers Weightman Rosengarten Co.

DEAD-BEATS NO LONGER FEARED IN THIS STORE

Louisville Chain to be Equipped With Double Cash Register Checks on Both Patrons and Employes.

A GOOD system for keeping tab on sales and preventing petty frauds that often occur in the drug business has been introduced at Pharmacy No. 4, of T. P. Taylor & Co., Inc., in Louisville. For quite awhile the stub pocket sales book system was used but the volume of business increased to such an extent that it was soon seen that a handier and more modern method of recording sales must be used.

Accordingly, a check-issuing cash register was placed in the rear of the store and another was installed at the cashier's desk, near the store entrance. The check-issuing register in the rear of the store does not contain a cent in cash, as it is merely used to record the sales and, at the end of the day, provides a total of the day's sales by the simple operation of pulling the lever that manipulates the adding machine attachment. Each customer receives a check from the rear machine and pays for his purchases at the cashier's desk, where the front register records the sale in the same manner as did the back register, with the money deposited at the cashier's desk in the front register.

Each customer's check is numbered consecutively, and the cashier notes these numbers as they come in at the front desk, always keeping the last number to arrive in mind. As soon as the succeeding number fails to tally consecutively with the preceding number, the cashier calls out the missing number and every clerk in the store is immediately on the alert to discover the holder of the missing number, for each clerk is required to remember the last number that he issued from the register. In this way, the holder of a check who fails to "come to taw" with his money for his purchases, is quickly located, and the class of unscrupulous persons who are always on the qui vive to slip out of the store unnoticed, without paying for their purchases, is out-witted. Every drug store manager has his troubles with this variety of undesirable citizens and the check system for purchases will be a means of easing the mind of the manager with regard to losses by frauds, which amount to a considerable sum if they are allowed to go unnoticed. Another advantage of this check system is that it protects the store from loss by dishonest employees who swindle the firm by switching checks, or by other means known to the cult. The rear register contains an accurate total of the day's business, which affords a substantial working basis for the cashier to balance the cash at the end of the day, while the front register reading gives an additional check on the day's business. The amount of cash on hand at the end of the day, with the total of the soda checks and other purchases which are not recorded at the rear register, subtracted, should tally exactly with the reading of the rear register.

"This is the safest and cleanest sales system that has ever been introduced into one of our stores," said C. B. Davis, manager of Pharmacy No. 4, "and we are installing it as fast as possible into the other three drug stores which our firm maintains in Louisville. It is practically impossible for a customer to slip out without paying for his or her purchase, and strict account is kept upon the operations of the clerks, not to speak of the ease and accuracy with which we balance up at the end of the day."

Former President Buescher in New Drug Store.

BUFFALO, Oct. 20.—Many attended the formal opening of the Potter-Buescher Drug Co.'s new store at 702 Main street, recently. F. W. Buescher, secretary and manager, has had 27 years experience in the drug business and for some time represented Parke, Davis & Co. He was president of the Travelers' Auxiliary of the New York State Ph.A. Charles Edward Potter, president, is the head of a Toronto concern, but formerly lived in Buffalo.

PROF. REMINGTON STICKS UP FOR SMALL MEN.

Drug Combines, Attempts to Control N.A.R.D. and Secession of P.A.R.D. Discussed at Potts' Farewell.

PHILADELPHIA, Oct. 20.—Secretary Thomas H. Potts, of the N.A.R.D., formally said "goodbye" to his friends in the Philadelphia A.R.D. at the Drug Club one evening recently and ceased to be a Philadelphian. But, as Mr. Potts fervently declared, the separation was in residence only, for he is still heart and soul with the "boys" with whom he had worked for organization in the retail ranks for so many years. Those present included not only men who are prominent in organization circles but two of equal prominence from an educational standpoint in the persons of Professor Joseph P. Remington, dean of the Philadelphia College of Pharmacy and Professor I. V. S. Stanislaus, dean of the department of pharmacy of the Medico-Chirurgical College. Representatives of both sides of the issue which was settled in January last by the withdrawal of the P.A.R.D. from the N.A.R.D., were there.

THOS. H. POTTS, Chicago.
re-elected secretary of the N.A.R.D.

For an hour an excellent menu was enjoyed and then Toastmaster David J. Reese rapped for order and as cigars were lighted, the speaking began. Mr. Reese, after explaining the object of the gathering, called upon Professor Remington to discuss organization in pharmacy from a national standpoint. In his usual entertaining and convincing manner, Professor Remington, declaring that he did not believe as had been hinted by one that he had to be careful in what he said, called a "spade a spade" and commanded the rapt attention of his hearers. While he emphasized the value of organization and said that each of the commercial bodies, as well as the professional ones, doubtless had a mission to perform, the tendency of the combination of large capital in drug store enterprises in his opinion was to destroy the individuality of the retail pharmacist. "It is that individuality," he continued, "that is the pharmacist's most valued asset—it is his personal ability to conduct his business and when you take that away, he has nothing. Big things come of organization, it is true, but I say that it is radically wrong when these combined interests take away from the proprietor of the corner drug store his opportunity to follow his profession and make a living."

Referring to the relations between the N.A.R.D. and the P.A.R.D., the speaker expressed the hope that the object of the withdrawal had been accomplished and that the local association would again renew its affiliation with the parent organization and form one big family.

Warren H. Poley, a former president of the P.A.R.D., in emphasizing a strong, undivided national association, discussed the possibilities of such a body from the standpoint of ethical pharmacy and the propaganda for the popularizing of the preparations of the U.S.P. and N.F.

And then came the guest of the evening who hit right out from the shoulder, devoting particular attention to the incidents which led up to the withdrawal of the P.A.R.D., and the attack made upon the N.A.R.D., by the *Journal of the American Medical Association*. The withdrawal of the Philadelphia organization as well as the refusal of the United States Pharmacopœial Convention to recognize the delegates of the N.A.R.D., he declared had been of inestimable benefit to the N.A.R.D., from an advertising standpoint and in strengthening the bonds of the individuals and the organizations who stood by it.

In citing the incidents which led up to the editorial attack by Dr. Simmons, Mr. Potts declared that when an effort was made to stay the publication of this editorial, the representatives of two prominent manufacturing houses had been communicated with by telegraph and that the answer had come back to go ahead with its publication. The speaker gave this incident to prove his declaration that this attack was actuated by ulterior motives.

In acknowledging the spirit which had actuated his friends

in Philadelphia to thus formally express their regret at his departure from their midst, he said that he hoped for the day when Philadelphia would be once more in the fold.

There was more "straight-arm" work when Charles Rehfuss was called upon by Toastmaster Reese. Mr. Rehfuss drew upon his experience as a member of the Executive Committee of the N.A.R.D., and cited instances where organizations and corporations, representing commercial issues tried to inject their policies and their influences into the affairs of the N.A.R.D. and how he had always opposed them. Down through the history of the N.A.R.D., he brought his hearers, from one convention to another, reaching a climax when he declared that it was at the Louisville convention that the repeated attempts to capture the N.A.R.D., by commercial interests, in his opinion, were finally successful. Then it was, he declared, that as he viewed conditions it was time to teach a lesson to all commercial interests, to all manufacturing concerns, that they must keep hands off of the affairs of the retail druggists' organization. And it was for that reason and for the protection of that principle, he said most emphatically, that he had advocated the stand subsequently taken by the P.A.R.D.—that of seceding.

Professor Stanislaus proved a warm champion of the retail druggists who had voted against reaffiliation with the N.A.R.D. William L. Cliffe declared that he hoped for reaffiliation with the N.A.R.D. Others who spoke briefly were Frank W. Fluck, Charles Leedom, William E. Lee, Otto Kraus and Samuel W. Strunk. Then at the suggestion of Mr. Reese, the party joined hands and sang with a will "For He's a Jolly, Good Fellow" and "Auld Lang Syne." Mr. Potts was kept busy shaking hands for another half-hour and it was long after midnight before the last good-night was said and the guests departed for their homes.

"Methyl Hydroxide" As Name For "Wood Alcohol."

BALTIMORE, Oct. 20.—Dr. H. P. Hynson, has come out with a suggestion regarding wood alcohol, which finds approval among a number of pharmacists. Dr. Hynson suggests the adoption of the appellation methyl hydroxide, which is in reality its chemical name. Wood alcohol, he says, is entirely misleading, since wood may have nothing at all to do with the manufacture, so that the proposition to adopt the term "wood naphtha," must be rejected in favor of some more accurate designation. "Methyl alcohol" has also been urged, but Dr. Hynson opposes this for the reason that "wood alcohol" is not really alcohol, the closest definition being, as stated, "methyl hydroxide."

Fair Sex at Social Session of Louisville R.D.A.

LOUISVILLE, Oct. 20.—On Sept. 28 one of the first social sessions of the Louisville Retail Druggists' Association, in company with the wives of the members, was held at the Galt House. The fair sex aided materially in increasing the sociability of the evening and "shop talk" was relieved by friendly amenities which proved enjoyable in the extreme. A new constitution and by-laws were adopted. President Simon N. Jones talked interestingly upon "Organization Among Druggists," and Prof. Gordon L. Curry, of the Louisville School of Pharmacy, discussed "Harmony Among Druggists." A sumptuous banquet followed.

Doctors Endorse Mr. Walton's Opium Bill.

WILLIAMSPORT, Pa., Oct. 20.—The Lycoming County Medical Society has unanimously adopted the bill which is to be presented to the Pennsylvania Legislature, restricting and regulating the sale of opium, etc. This action followed an interesting address on the proposed law, delivered by L. L. Walton, secretary of the Pennsylvania board. Mr. Walton prepared this bill which was endorsed at the recent meeting of the Pennsylvania Ph.A. and has taken a leading part in securing for it the support of both the druggists and the [illegible] of the State.

President Ruf Buys Antikamnia Building.

St. Louis, Oct. 20.—Frank A. Ruf, president of the Antikamnia Chemical Co., purchased the property at 1622-24 Pine street, [illegible] now occupied by his company, for $250,000. The structure was built for the chemical company some years ago and contains about 25,000 square feet of floor space. Mr. Ruf is one of the largest real estate investors in St. Louis and is a director of the Mercantile Trust Co.

MERRELL RECEIVERSHIP LIFTED—ALL PAID

Judge Compliments Company for Splendid Showing Made Following the Panic Trouble of 1907.

CINCINNATI, O., Oct. 20.—The receivership of the Wm. S. Merrell Chemical Co. was raised by order of the Superior Court in Cincinnati, Sept 30, Judge Shattuck stating it was a matter of great satisfaction to him to dismiss the receivership on account of the splendid showing made by the company since its misfortune caused by panic conditions of 1907. What was known as the "George Merrell" plan accomplished the much desired result—the company making full settlement with its creditors.

The Merrell Co. was founded in 1828 by the late Wm. S. Merrell, A.M., M.D., who is credited with having contributed more to high-class medicinal preparations than any one man. In 1881 George Merrell organized the present company, and while strictly adhering to the policy of the founder to manufacture only what was best, he has by personal effort made the Merrell Co. a familiar word in medical and pharmaceutical circles throughout the length and breadth of the land.

Mr. Merrell was the first man who traveled for the company and for many years had entire charge of the traveling service, No man is better known to the drug trade, and his strong personal following was never more fully demonstrated than in the splendid business done by the company during the trying period of the receivership, the net earnings averaging nearly $70,000 a year. The world admires a plucky fighter and everywhere the news that George Merrell has won out in his effort to save the company was met with honest praise. The company was never stronger than it is today and President Merrell expressed himself very strongly in gratitude to the trade for its fine loyalty to the Merrell Co.

INGRATE SWINDLES A CHICAGO HOSPITAL.

Is Picked Up on Street in Precarious Condition and Repays His Benefactors With "N.G." Check.

A mean swindle in Chicago was recently called to the attention of McKesson & Robbins, New York City. A person calling himself George Graham was picked up in a street in Chicago and taken to a nearby hospital where he was found to be in a critical condition, suffering from heart failure. He said he was a traveling salesman for McKesson & Robbins. After the doctors had with considerable difficulty brought him around from his attack, he gave them a check on a New York bank in consideration of their services. The check was later returned marked "No funds."

The hospital authorities communicated with McKesson & Robbins and were informed that the company had never heard of Mr. Graham. Before leaving, the ingrate further assured his benefactors he was going to locate in Chicago as the Western representative of McKesson & Robbins. He was a smooth talker and was well dressed.

Rival "Medicine Service" Concerns in Litigaton.

The Consolidated Medical Co. lost a point recently in its suit against the New York Medical Service Co. for $100,000 damages, when Justice Maddox signed an order precluding testimony on all the paragraphs describing the alleged damage because the plaintiff had failed to file a bill of particulars as ordered by the court. The plaintiff company sets forth that it is a corporation with principal places of business in Brooklyn Borough, for supplying physicians' services, medicines, etc., by contract to the public upon stated weekly or annual payments, and that from about Feb. 1, 1908, the defendant conspired to injure the plaintiff in its business. A general denial was entered upon behalf of the defendant corporation.

The Old Corning Pharmacy Again Sold.

The pharmacy conducted for many years by the late Dr. A. J. Corning, a prominent Baltimore druggist, has been acquired by Gabriel Rettalinta. It is at Mosher and Bolton streets, and after Dr. Corning's death was purchased by the Robertson-Duck Co., which has now disposed of it.

Banker-Druggist Enters Bankruptcy.

LOUISVILLE, Oct. 20.—John W. Gosdel, prominent druggist of Henderson, Ky., has filed a voluntary petition in bankruptcy, the amount involved being $25,000 to $30,000. He was president of the Henderson County Savings Bank.

UNIQUE DISPLAY OF CRUDE DRUGS MADE BY RIKER CO. AT RECENT ELECTRICAL SHOW IN N. Y.

FULL advantage of an exceptional opportunity to exploit their business to the thousands of people who attended the recent Fourth Annual Electrical Show, held at Madison Square Garden, New York City, was taken by the Wm. B. Riker & Son Co., druggists. Their exhibit took the form of an entrance to a Riker drug store—two doors finished in green on which was the firm's name and motto, "You Are Safe When You Buy at Riker's," and the customary display window on either side.

The righthand window of this exhibit was a veritable lesson in pharmacognosy. A map of the world hung in the center on the wall. In front of it were trays of uniform size, each of which contained superb samples of crude drugs, rhubarb, squills, ginger, etc. From each tray a colored baby ribbon extended to the point on the map where the country of its origin was represented. On each "country" was pinned its National flag so the observer could tell at a glance, for instance, that ginger came from the island of Jamaica or rhubarb from China. The wall at the rear and sides of the window was covered with "shingles" made of elm bark and against the plate glass front were suspended strings of orris root fingers and colocynth apples. Bundles of licorice and other root and bark drugs, bags of senna, saffron, etc., completed the display. All the samples were perfect and constituted an education to the interested layman.

The lefthand window was not quite so technical in the nature of its exhibit and consisted of a display of perhaps more direct appeal to the purchasing public. Two wax figures occupied the center: one represented a grayhaired physician sitting at a table, the other a rosy-cheeked boy standing alongside. The boy had a thermometer in his mouth at which the physician would glance every so often, mechanically lower his head and "write" a prescription. Three certificates to practice pharmacy hung in this window and on the floor were laid open files of prescriptions put up by Riker's in 1846, 1847, through the '50's and later years. The finished prescriptions were represented by bottles and jars of various preparations.

Educational Exhibit at Pure Drug Show.

MILWAUKEE, Oct. 20.—The University of Wisconsin will make an exhibit at the National Pure Drug Show to be held in this city by the Wisconsin Ph.A. during the week of Nov. 28. A complete laboratory will be installed in the Auditorium for the purpose of giving practical demonstrations. Lectures will be given, with stereopticon views, on "The Evolution of the Drug Store" and "The History of Perfume," including the quaint old apothecary of six centuries ago and the various steps up to the present time.

Elaborate preparations are under way for the educational exhibit that will be made under the auspices of the university. The heads of the crude drug, botanical, chemistry, pharmacy and pure food departments have been instructed to cover every phase of the drug trade. Dr. Kremers, dean of the college of pharmacy, will have personal charge of the work.

Druggists to Aid in Building New Hospital.

LOUISVILLE, Oct. 20.—Retail druggists are rallying to the cause of building a new city hospital. On Sept. 28, the Louisville R.D.A. unanimously decided that each of the 125 retail druggists of this city should receive a personal letter from President Addison Dimmitt, urging that the recipients cooperate in gaining a one million dollar bond issue from the city officials, with which a new hospital may be built.

New Owners for Hoge Drug Company.

MACON, Ga., Oct. 20.—Claude H. Murray and Robert Sparks have purchased all the stock of the John S. Hoge Drug Co., and will in future conduct the business as equal partners. Mr. Murray has been manager of the company for several years. Mr. Sparks is also an experienced drug man, and one of the brightest young business men of Macon.

Drug Clerk Tries to Save Blazing Automobile.

BOSTON, Oct. 20.—Arthur Glace, a clerk for Clark & Mahoney, druggists, in East Boston, proved himself the man of the hour one night recently when some children playing in the street set fire to the dried leaves. The flames spread rapidly, then ignited a newspaper, and the newspaper blew along the street and lodged under an automobile standing in front of the drug store. Almost immediately the oil and grease in the drip pan underneath the engine and gasoline tank, caught fire. Without considering his own personal safety, Glace took a hand fire extinguisher from the store and ran out to the automobile to put out the flames. He rendered material assistance, but the fire was too great to be handled by any one person alone and a box alarm brought the fire department to the scene.

Five Per Cent Dividend for Stein-Gray Creditors.

CINCINNATI, Oct. 20.—H. C. Yergason, trustee in bankruptcy of the Stein-Gray Drug Company, says the recent sale of the company's entire wholesale stock of drugs, sundries, office fixtures, etc., netted about $20,000. A five per cent dividend has been declared, and Trustee Yergason says probably another dividend may be declared in about three months time. The stock was invoiced at cost of over $60,000, and was appraised at less than $30,000. The examination of the firm in bankruptcy is now under way.

Cultivation of Ginseng in Wisconsin

More than $50,000 worth of dried ginseng root were shipped out of Langlade County, Wis., last year and present indications are that this amount will be doubled this year. The soil of Langlade County, especially in the vicinity of Antigo, seems to be well adapted to the raising of the root and people all over the county are beginning to cultivate ginseng.

NO FEDERAL INTERFERENCE IN MERGER.

Riker-Hegeman Officers Discredit Story and Assert There is no Ground for Adverse Action.

Retail druggists in New York City were greatly interested in the latter part of October in a report that the Federal Government at Washington might interfere with the merger of the Wm. B. Riker & Son Co. and the Corporation of Hegeman Co. The druggists who are opposed to chain stores were especially interested in the rumor, which, however, could not be traced to any authentic source. At the Federal Building in this city nothing was known about the matter.

Treasurer Phelps, of the Hegeman Co., said:

"If any one had made any such move against us, I certainly would have been informed of it. We are effecting the consolidation exactly as we planned originally, except that it has taken us more time to get things in order than we thought would be necessary. It had been intended the two firms should become one on Oct. 1. That only gave us a month to go through our accounts preparatory to combining them with the Riker accounts. We have found two months instead of one will be necessary. So far as I know there is absolute harmony between the Hegeman corporation and the William B. Riker & Son Co."

President Cosden, of the Riker Co., made a similar statement. He said he could see no possible way in which the Riker-Hegeman consolidation could be charged with violation of the Sherman Anti-Trust law. He added he believed the merged corporation would be in working order in a few weeks.

May be a Riker-Hegeman Store in Trenton.

TRENTON, N. J., Oct. 20.—The Riker Drug Co., of New York, is negotiating with Benjamin Lissner, owner of the old City Hall property, for a lease of the first floor of the building, to be used as a drug store. It was learned that the deal is in a preliminary stage and that there is no certainty just now as to whether it will be closed. Under the plan of Mr. Lissner, the City Hall building will be entirely renovated so as to make a modern store on the first floor, with up-to-date offices on the second and third floors.

Million Dollars in A. D. Thompson's Expansion.

MINNEAPOLIS, Oct. 20.—Two large real estate deals were completed recently by which the buildings at Nicollet avenue and Fourth street and at First avenue S and Third street, occupied by the A. D. Thompson Drug Co., have been purchased and the sites leased in each case for 99 years on a flat rental basis. The A. D. Thompson Drug Co. will continue to occupy both corner stores.

The Albert D. Thompson Co., with the same officers as the drug company, has been formed with $100,000 capital to handle the real estate end of the business. Albert D. Thompson is president and treasurer; Charles W. Thompson is vice-president; George H. Kulp, secretary. The officers are the only stockholders in either company.

The A. D. Thompson Drug Co. was one of the first to recognize the great value of Nicolett avenue frontage. Seven years ago it took possession of the ground floor of the Wetherby building, which had just been remodeled, agreeing to pay an annual rental of $6000 a year. The amount at that time, just before the city took its tremendous start forward, was considered almost prohibitive and the opinion was general that the company could not pay the rent with profit from its business. It has proved that the drug company was more far-sighted than the critics, and it has now determined to take another advance step and make its positions as drug-[illegible] the two strategic corners. The two transactions by the Albert D. Thompson Co. aside from the annual taxes, involve a total sum of $1,601,100, to be paid in the life of the leases.

To Stop Sale of Injurious Drugs.

[illegible], Ky., Oct. 20.—A new drug ordinance, providing a [illegible] recording of $100 fine and 50 days in jail for the sale of [illegible] drugs in Lexington, has become a law.

Cracking Office on Doctors and Sanitariums.

A [illegible] against [illegible] that [illegible] to place [illegible] has been instituted by Mrs. [illegible] at Lake Mineral Springs, [illegible] to M. Gould Pharmacal Co.

FORMER PHARMACIST IS NAMED FOR GOVERNOR

While Working in Drug Store Studied Law and is Now a Practicing Attorney in Massachusetts.

Frederick W. Mansfield, of Boston, who was nominated by the Democratic State Convention as the temporary candidate for governor of Massachusetts, after the convention had been unable to agree upon a candidate in a triangular contest, is a registered pharmacist, but is now practicing law.

Mr. Mansfield was born in East Boston 33 years ago, and while attending school worked for Henry D. Huggan, druggist. He received his certificate as a registered pharmacist in 1898. When the Spanish War broke out he enlisted as an apothecary in the U. S. Navy, and for the three interesting months of that war he was stationed on board the Vulcan, the repair ship, in the harbor of Guantanamo in Cuba. He was mustered out Jan. 15, 1899, and four days later was behind the counter in East Boston again in the employ of the man with whom he learned pharmacy.

Early and late he was at the drug store putting in all his spare time studying law, being admitted to practice at the bar Aug. 26, 1902. He has been counsel for the American Federation of Labor. Mr. Mansfield is married and now lives in Dorchester.

Druggist Candidate Denies Sale of Cocaine.

Paul Borchard, a druggist at 42 Amsterdam avenue, New York City, and a candidate for the Assembly on the Republican and Independence League tickets, was arraigned in the West Side police court recently on a charge of having sold cocaine without prescription to Hattie Brown, a negress.

"I didn't sell her cocaine," Hugh Masterson, a Health Department inspector, says the druggist insisted. "She asked for cocaine, but I gave her something else."

Mr. Borchard maintained his innocence in court later and pleaded not guilty. Masterson promised to have the purchased powder in court together with a statement of the findings of a chemist. Thereupon Magistrate Krotel adjourned the case. Mr. Borchard furnished $1000 bail.

Druggists Nominated for Political Offices.

ALBERT W. MILLER, of Hartland, druggist, farmer and justice, has been elected member of the Maine Legislature. He has been a drug store proprietor for 45 years.

JOHN M. GROSVENOR, JR., manufacturer of plasters, Boston, has been renominated by the Republicans of Essex County, Mass., as county commissioner. His home is in Swampscott.

OTIS S. BEACH, Democratic nominee for Assemblyman in Tioga County, New York, is a druggist in Owego. He has been a member of the New York State Ph.A. since 1896.

EMMET D. HEES, of Avoca, Steuben County, has been nominated by the Independence League for Representative in the 33d New York Congress District.

Mr. McElhenie's Girl Cashier a Heroine.

Fire recently in an alley next to the drug store of Thomas D. McElhenie, at DeKalb avenue and Ryerson street, Brooklyn, caused a great deal of excitement. Miss Elizabeth Merry, cashier of the branch post office in the pharmacy, when she found that the building was threatened with destruction, seized the post office books, cash box, stamps, registered letters and all other government belongings that she could lay her hands on, and turning her apron into a post office, made a bee line for the candy store on the opposite side of the street. Mr. McElhenie is the superintendent of the branch and he called Assistant Postmaster Nowell's attention to her bravery. Mr. McElhenie had a close call in making his way out through the smoke.

Cost $25 to Practice Pharmacy Unlawfully.

Louis Bell, of 403 Myrtle avenue, Brooklyn Borough, New York City, was recently found guilty in the Court of Special Sessions of having practiced pharmacy without lawful authority in violation of the Public Health law. He was fined $25, which he paid rather than spend five days in jail, which was the alternative given him.

Formulas.

Just 1311 formulas are given in the new edition of the Dispensers Soda Water Guide. Every fountain operator needs it.

NEW IMPETUS FOR AN OLD ESTABLISHED FOOD.

Arthur B. Harlow Becomes Interested in Promulgating the Virtues of the Ridge Product.

ON the office door of one of the old-time business buildings of Boston, on the site in fact of the very first store in that old city, opposite the Old State house and the towering Ames building, has been placed a new sign, which reads: "Ridge's Food Co." At that place (the address is 4 State St.), is the downtown office of a new company which has recently secured control of one of the oldest proprietary articles now on the market, and is preparing to once more make it a factor in the modern needs of families and households.

ARTHUR B. HARLOW.

Ridge's Food, by the way, originated in England, where it is still manufactured and holds a large place in the dietary of infants. About 40 years ago it was brought to this country by an English druggist as the one thing in all England that he believed would find a welcome by the American and Canadian public. This English druggist, whose name was Woolrich, brought with him the rights of manufacture and sale of Ridge's food in North America. He settled in Halifax, N. S., but soon found that a greater demand for his article came from the United States, and he transferred the business to Massachusetts, with a laboratory at Palmer. For the next quarter of a century, by means of judicious advertising and business methods, Ridge's food became one of the prime articles in the stock of American druggists.

When Mr. Woolrich retired with a competency, 15 years ago, he turned over the business to a friend who continued it until last September, when the business, formula, copyrights, patents and good-will were taken over by a new organization under the name of the Ridge's Food Co.

The new company now proposes the rejuvenation of the business. Two capitalists have put up the money for the new enterprise, and they have associated with them, Arthur B. Harlow, who for the past 14 years has been connected with the Mellin's Food Co. of North America in the advertising department, and for the past three years had been manager of that important department.

Mr. Harlow talked interestingly to a representative of the ERA of the plans of the new company. "While in late years the demand for Ridge's Food has not been large, I was quite unprepared to find the excellent condition that prevails. The food has a well nigh perfect distribution, it is well known all over the country, by both druggists and the public, and a majority of druggists carry a little of it in stock. Another very important thing is that not in the slightest degree has the formula been changed in all these years, and the grade of goods turned out this year measure up to the high grade of the first year.

"Although I left the Mellin's Food Co. to go into a rival food company," said Mr. Harlow in speaking of his former business connection, "I left their service with their best wishes. Thomas Doliber and all the people of that company are the very salt of the earth. They are the finest people that live. I enjoyed working with them, and now that I am with another company, and apparently in competition with them, it will be fair competition. It will be our policy to build up and not tear down, although it is possible that we may scrap over principles of infant feeding.

"The opportunity to join this company came to me. Something was going to be done with the company. Personal friends of mine, men of wealth, were putting their money into it, and it was such a good chance I felt I would not be doing right not to take it. So I left the Mellin's Food Co. with some feelings of regret at the separation, yet I look forward with highest hopes to the building up of the new company in making Ridge's Food 'for baby and all the family.'"

NEW HOME FOR MULFORD'S PACIFIC BRANCH.

Commodious and Finely Equipped Building in Seattle is Well Stocked With Company's Specialties.

DURING the past five years the work and policies of the H. K. Mulford Co. of Philadelphia, have been closely associated with the progress and prosperity of the North Pacific drug trade. As a result of this association and growth, they have recently opened a North Pacific Coast Branch House at 307-309-311 Third ave., South Seattle, Washington, the first large pharmaceutical house to establish a branch in that territory. This in itself is evidence of the confidence the Mulford Co. have in the future growth of the North Pacific trade. In establishing the new branch, a picture of which is herewith printed, they announce that druggists will receive the same terms and discounts from the Seattle House as are given at their headquarters in Philadelphia, and sufficient stock will at all times be carried to insure prompt shipments. The history of the H. K. Mulford Co. has been one of progress and continued success. This success has been doubtless due in great measure to the efforts of the house to place the practice of pharmacy upon a strictly scientific basis, also to the position which has been taken by the house against accepting business from mail order houses, department stores, or aggressive cutters. Their work in the direction of assay and standardization has been extended throughout the entire biological and pharmaceutical line wherever such products can be standardized, either by chemical assay or physiological test. By consistently pursuing this policy, they have been able to furnish products of uniform reliability and excellence, and have acquired a high reputation for their laboratories, winning the confidence of the medical and pharmaceutical professions.

Of particular interest to druggists is the fact that the Mulford Co.'s products can be purchased through the jobber at a discount of 40 per cent without signing a contract. In addition, the house has a yearly plan enabling the druggist to secure extra discounts on his purchases without any obligation on his part and without compelling him to purchase a stock line. This is the most favorable proposition to enable the druggist to save money on his current purchases that can be extended, as it does not require the investment of a dollar in a stock line, but permits him to secure his pharmaceuticals as needed at the minimum cost.

Chop Suey Restaurant Sells Opium Sandwich.

CHICAGO, Oct. 22.—The "opium sandwich" is the latest wrinkle in restaurant novelties. The price is $1. The novel scheme for the distribution of the drug was unearthed yesterday, when Ching Sing, proprietor of a chop suey restaurant in West Randolph street, was arrested. The "sandwich" consisted of a several days' old bun, with the center hollowed out. Reposing in its interior was a small package containing opium.

Pittsburg Druggist Wins $20,000 Suit.

WASHINGTON, Oct. 20.—By refusing to review the writ of certiorari the judgment of $20,000 given by the lower courts against William D. Mann and others, owners of *Town Topics*, of New York, for libelling Samuel Dempster of Pittsburg, the Supreme Court in effect has affirmed that judgment. *Town Topics* printed some untrue gossip about Mr. Dempster, who is a prominent druggist of Pittsburg.

Marinette Drug Stores Pass Inspection.

W. P. Fletcher, an inspector of the Wisconsin dairy and food commission, after an inspection of the drug stores at Marinette, Wis., reported them all to be in first-class condition and that the sanitary regulations had been lived up to.

NEW ASSOCIATION ACQUIRES NEW NAME.

A.D.S. Organization Will be Local to City—Long Debate as to Use of "A.D.S." in Its Title.

The October meeting of the A.D.S. Association of the State of New York, now the A.D.S. Association of Greater New York, was held at Teutonia Hall and presided over by president Peter Diamond. The work accomplished by the new organization consisted in the adoption of a new constitution and by-laws drawn up and presented by Dr. William C. Anderson, vice-president of the American Druggists' Syndicate. About two hours of debate followed the reading of section I, article I, which provided for the new name given above. Sentiment, so far as could be gathered from the speakers, was about equally divided as to whether the letters "A.D.S." should be included in the organization's title. The arguments presented hinged on these points:

The association was intended by some of its originators to be an open and general organization in which all N. Y. City retail pharmacists might discuss current questions. It was thought that the inclusion of "A.D.S." in the name would keep non-Syndicate members out and the association would thus fall short of its purpose. Also, that the wholesalers were opposed to the American Druggists' Syndicate and would find in such a name a vulnerable point of attack.

Others argued that there were already too many associations in the city and that a general organization was not needed, that the association would be sailing under false colors under any other name, and finally that the American Druggists' Syndicate would be well-advertised by the publicity, and pharmacists who wouldn't join on account of the Syndicate wouldn't join whatever the name might be.

As Dr. Anderson quoted, "A rose by any other name would smell as sweet," but "A.D.S. smells sweetest" to its members. When A. Gardner, Brooklyn; Dr. Joseph Weinstein, Manhattan; W. A. Guthrie, Manhattan, and the other speakers had concluded, president Diamond said that the association was not organized solely to advance A.D.S. interests, but that it was organized to bring all the druggists in the city together. He further asserted that the trouble with the local associations lay in the unnecessary delay in "referring back" to committees or to the association itself, every question that arose.

Membership is open to anybody actively engaged in retail pharmacy in New York City. Meetings will be held every third Thursday of each month in a hall which will be later permanently secured.

Druggists Oppose Merger of Corporations.

LOUISVILLE, Oct. 20.—The public service corporations which control the artificial lighting and heating facilities of Louisville are attempting to merge and both boards of the General Council were on the point of considering the passage of the merger ordinances when a communication was received from the Louisville Retail Druggists' Association, protesting against the passage of the measures. The communication was signed by President Simon N. Jones and urged that the city appoint experts to investigate every detail of the merger, and its consequences, before taking final action.

Mr. Treber Buys Another Pharmacy.

LOUISVILLE, Oct. 20.—F. W. Treber, well known druggist, has purchased the drug establishment of Joseph Millheizer in Frankfort avenue, after Mr. Millheizer filed a voluntary petition in bankruptcy. Mr. Treber is conducting an up-to-date and handsome pharmacy in his new location in Crescent Hill.

Candy, Carnations and Music at Formal Opening.

[illegible] Strassmeyer Drug Store at Appleton, Wis., was formally opened to the public recently, when [illegible] a dinner attended and Mr. Strassmeyer gave [illegible] 1000 carnations and [illegible] boxes of candy [illegible]

Changes of Ownership in Baltimore.

[illegible] pharmacy, [illegible] engaged at Lexington and Howard streets, Baltimore, has been purchased by [illegible] corner of North and Madison avenues. The latter [illegible] the former proprietor of the E. L. Lee Williams [illegible] corner of Eutaw & Watts

MICHIGAN R.D.A. TO AMEND DICKINSON ACT.

Proposes Changes Which Will Make State Liquor Law Less of a Burden—All Officers Re-elected.

KALAMAZOO, Oct. 20.—Possibly 200 members attended the [illegible] second annual meeting of the Michigan State Retail Druggists' Association. President C. A. Bugbee, in his annual address, classed druggists who sold liquor for the sake of pecuniary benefits as a disgrace to the profession and said they should be forced to pay the $500 liquor license to the government. He urged close co-operation, the adoption of a higher code of ethics and recommended the restoration of the old term "assistant pharmacist" instead of "registered pharmacist," the new term resulting in confusing the drug clerk with the proprietor.

Resolutions incorporating proposed changes in the State liquor law, the Dickinson act, were adopted as follows: That liquor shall be sold to consumers only on a sworn statement from a customer that he needs it for medicinal purposes, and a false statement in the affidavit shall be punishable in the same manner as forgery. No responsibility shall be on the druggist when a clerk sells liquor illegally. A list of all posted drunkards must be furnished to each druggist. County clerks must furnish druggists with blanks for recording liquor sales.

The point was developed that whereas the druggist could sell liquor only on a physician's prescription, this did not protect him from prosecution. The association recommended that the legislature abolish this "unjust" feature of the law. One of the strongest speakers in favor of an amended law was Lee M. Hutchins, Grand Rapids. The following officers were re-elected:

[illegible] C. A. Bugbee, [illegible] Kalamazoo; [illegible] Muskegon; [illegible] [illegible] vice-presidents; H. B. Mc[illegible], [illegible] Henry Rachel, Grand Rapids. Executive committee: W. J. Kirchgessner, Grand Rapids; R. A. Wyatt, Muskegon; D. D. Allan, Lockwood; J. S. Bennett, Lansing; S. L. [illegible] Hart and George D. Davis, Howard City.

Charles E. Abell, of South Haven, presided as toastmaster at the banquet held at the Rickman Hotel.

Druggists Interested in Louisville 'Phone Fight.

LOUISVILLE, Oct. 20.—A big newspaper campaign has been inaugurated against the Louisville Home Telephone Co. by two of the most prominent daily papers. The company proposes to inaugurate arbitrarily a "zone system" and charge everybody outside of a two mile radius $36 per year, as against the old service charge of $30. Incidentally, the Home company is not putting in any service except over party lines, and it is alleged that this is in direct violation of its contract with the city, whereby it obtained a franchise.

Two hundred or more retail druggists have joined with the newspapers to take up the cudgels against the Home and Simon N. Jones, president of the Louisville Retail Druggists' Association, is heading the campaign from a druggists' standpoint. Benjamin Sauter, secretary of the association, declared: "We do not intend to allow the 'phone company to put this thing over on us."

Wholesalers to be Entertained in St. Louis.

ST. LOUIS, Oct. 20.—Arrangements are being made by the wholesale drug interests of this city to entertain the 200 delegates who will pass through St. Louis on their way to the National Wholesale Druggists' Convention in Dallas, Nov. 14. The delegates will arrive in St. Louis Saturday, Nov. 12 and will be given an automobile ride and banquet. They will leave St. Louis for Dallas Sunday morning, Nov. 13.

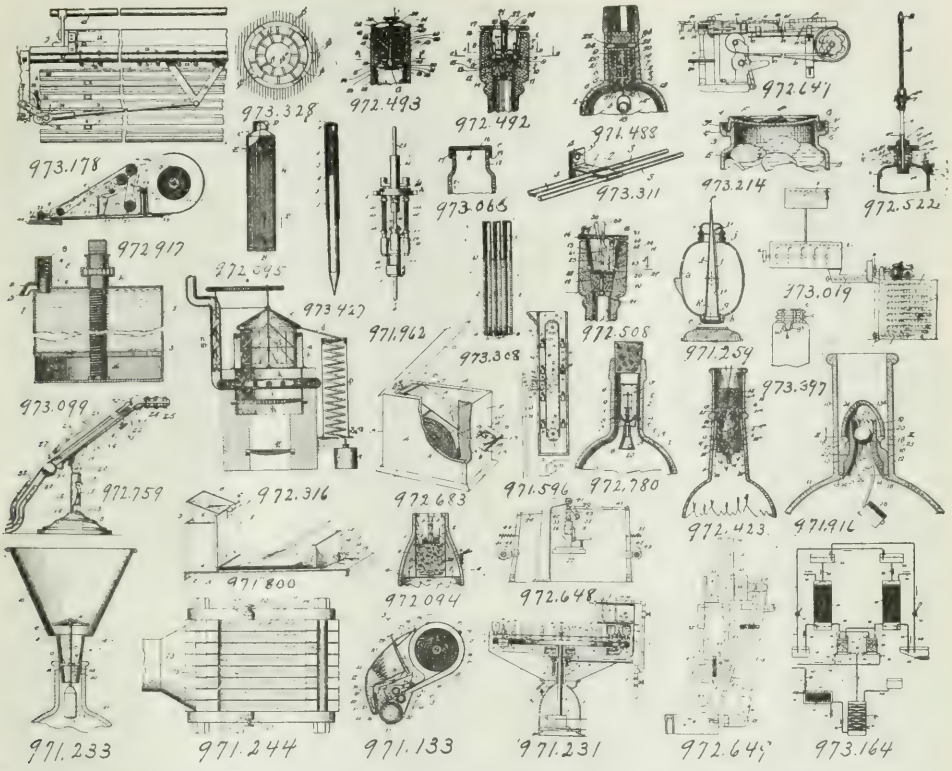
Cannot Restrict Sale of Bottled Liquors.

MILWAUKEE, Oct. 20.—The effort which has been made by members of the Retail Liquor Dealers' Association to prevent others than saloon keepers from selling liquor in bottles or other small quantities, has failed. Druggists were aimed at.

Government's Hog Cholera Serum Stands Test.

[illegible] a committee of [illegible] the sale of the new [illegible] serum for preventing hog cholera at South Omaha, Neb., [illegible] on the Bureau of Animal Industry of the United States Department of Agriculture.

PATENTS, TRADE MARKS, ETC.—(See Next Page)



PATENTS.

Granted September 27, 1910.

971,135—Hyla F. Maynes, Gaines, Pa. Labeling machine.

971,144 and 971,145—Heinrich Reitz, Griesheim-on-the-Main, Ger., assignor to Chemische Fabrik Griesheim-Elektron, Frankfort-on-the-Main. Preparing caustic soda and caustic potash.

971,149—Karl Schick, Griesheim-on-the-Main, assignor to Chemische Fabrick Griesheim Electron. Catalytic body and method of making same.

971,194—Fritz Hasselmann, Munich. Wood-preserving solution.

971,198—Paul L. Hulin, Grenoble, France, assignor to Societe d'Electro-Chimie, Paris, and P. L. Hulin. Process for the manufacture of metallic sodium.

971,206—Anton Messerschmitt, Frankfort-on-the-Main, Ger., assignor to Corporation Internationale "Wasserstoff" Aktiengesellschaft. Process of producing hydrogen.

971,211—Jalmar G. Nathurst, Kingston, N. Y. Trinitrotoluene mixture for explosives.

971,231—Leopold Weissopf, New York. Bottle-rinser.

971,233—Charley J. Wilson, Roger, N. D. Funnel.

971,244—Charles S. Bradley, New York. Ozonizer.

971,259—Stanislas Effantin, St. Cloud, France. Apparatus for distributing liquids in measured quantities.

971,488—Leon Buenon, Seattle. Non-refillable bottle.

971,501—Fritz Haber and Robert Le Rossignol, Karlsruhe, Ger., Ludwigshafen-on-the-Rhine. Production of ammonia.

Granted October 4, 1910.

971,596—Wm. J. Cooper, Stockton, Cal. Postal-card-display device.

971,681—Samuel Knopf, Vienna, Aust.-Hung. Process of making artificial ointment-bases.

971,799—John W. Stevenson, Goldfield, Nev. Preserving compound.

971,806—Walter Sutton, Sacramento, Cal. Label-pasting device.

971,916—John Missall and Albert Sommer, New York. Non-refillable bottle.

971,962—Chas. L. Bastian, Chicago, assignor to Bottlers' Machinery Mfg. Co. Bottle-filling machine.

972,094—John T. Bluff, Butte, Mont., assignor of one-half to Frank F. Hayes. Non-refillable bottle.

972,095—Thos. C. Booth, New Rochelle, N. Y., assignor to Consolidated Fruit Jar Co., New York. Compressible tube.

Granted October 11, 1910.

972,316—Jos. Zehetner, Vienna, Austria. Process of preparing a tooth-healing preparation.

972,318—Edward S. Balthrop, Jackson, Tenn. Inhaler.

972,423—John Wiberg, New York. Non-refillable bottle.

972,492 and 972,493—Alford C. Appleton, Dayton, O., assignor to Hayner Distilling Co. Bottle-stopper.

972,508—E. S. Church, Dayton, O., assignment as above. Bottle-stopper.

972,522—Thomas W. Evans, Jersey City. Nozzle-stopper for bottles and other receptacles.

972,523—Ernst Fischer, Gronau, near Hanover, Ger. Iron-albumin-glycero-phosphate and process of making same.

972,647 and 972,648—William Rose and Henry Rose, Gainsborough, Eng. Feeding mechanism for label or wrapping machines, and mechanism for applying labels or wrappers.

972,649—Henry Rose. Apparatus for feeding articles to wrapping mechanisms.

972,683—Chas. W. De Laney, Hammond, Ind. Label and ticket cabinet.

972,759—James H. Flower, Ashtabula, O. Blowpire.

972,780—I. B. Solomon, Boston, assignor to H. C. Rand. Non-refillable bottle.

Granted October 18, 1910.

972,917—Frank D. Rettich, Cincinnati. Label-attaching means.

972,952—Henry V. Walker, Brooklyn, assignor to the Maas & Waldstein Co., Newark, N. J. Chlorhydrins and process of

Copy of any TRADE-MARK or PATENT, with 64 page Booklet on LEGAL TRADE-MARKS, PROTECTIVE PATENTS, and FOOD AND DRUGS ACT, sent for 25 cents. G. H. DAVIS, Attorney, 908 G St., N.W., Washington, D. C.

[illegible]

97,206—H. V. Walker, assignment to Home Solvent for Powders, Ill., and Boston, for treating same.

97,[illegible]—H. V. Walker, assignment to Home Process of making [illegible]

97,[illegible]—Theodore De Haen, Berlin, Ger. Process of granulating [illegible] and the granulated powder.

97,[illegible]—Hugo C. Prahl, Jr., Rochester, Mass., assignor to Russ[illegible] Co., Boston, and Rochester, Mass. Process of [illegible] and the product obtained.

97,[illegible]—Ernest E. Bender, Dresden, Germ. Non-refillable bottle.

97,[illegible]—Josef Barth, Vienna, Austria-Hungary, Ger. Process of obtaining [illegible] and [illegible] from [illegible].

97,[illegible]—Adolf Gerngross, Barmen, Ger. Process of treating [illegible] chloride and [illegible] chloride for producing [illegible] and [illegible] of the said metals.

97,[illegible]—Joseph W. Dowd, St. Louis, assignor to Barry-Wehmiller Machinery Co., Both Cleaning machine.

97,[illegible]—Ernest L. Richter, Cedar Rapids, Ia. Sifting device.

97,[illegible]—Francis L. Roddy, Watertown, N. Y. Thermometer case.

973,311—Ernest L. Smith, Bradford, Pa., assignor to The Clark Soles Co., Buffalo. Tooth-brush holder.

97,[illegible]—Joseph Wilkinson, Derby, Conn. Emulsifier.

973,397—Arthur Wilzin, Paris, Fr. Screw-closure for bottles and the[illegible]

97,[illegible]—Jesse W. Hayes, Baltimore, assignor of one half to Louis Stepp[illegible] Combined pencil holder and [illegible]

TRADE MARKS.

Published September 27, 1910.

Nozox Company, New York; to manufacture and deal in patent medicines, drugs and chemicals, etc. Capital, $50,000. Incorporators, E. J. Forhan, J. J. Harper, G. F. Martz.

Listerated Pepsin Gum Co., New York; to manufacture and deal in chewing gum. Capital, $25,000. Incorporators: F. Opoblasky, D. L. Grossman, G. L. Grossman.

The Acker Chemical Co., Wilmington, Del.; to engage in selling medicines, drugs, etc. Capital, $100,000. Incorporators: Dr. Albert W. Acker, Andrew J. O'Halloren, John D. Riggs and Ludwig Erlenbach, all of Selma, Ala.

Tri-State Drug & Stationery Co., Memphis, Tenn. Capital, $50,000. Incorporators: B. L. Clark, P. D. Wynne, J. T. Pitts, W. S. Turnage and C. C. Swinney.

Tripho Lithia Spring Co., Inc., Norfolk, Va.; to sell lithia water. Capital, $25,000 to $50,000. Incorporators: President, J. L. Roper; vice-president, W. B. Roper; secretary, R. H. Riddleberger.

Patterson & McKervey, New Orleans, La.; to do a general drug business. Capital, $100,000. Incorporators: Andrew P. Patterson and John P. McKervey.

VIOLATIONS FEWER IN NUMBER RECENTLY.

One Firm Ships Gum Asafetida Containing Much Foreign Matter, Another Tragacanth Not U.S.P.

WASHINGTON, Oct. 20.—The Department of Agriculture has given public notice of judgments 569 to 606, imposed by the courts in cases brought by the United States involving violation of the Food and Drugs Act, most of them relating to misbranding or adulteration.

Four cases of misbranding were prosecuted. Frederick F. Ingram & Co., Detroit, shipped three consignments, each of one gross bottles of "Our Compound Elixir of Cod Liver Oil" labeled in such a manner as to be adjudged misbranded. Defendant entered plea of nolo contendere and court imposed $5 fine.

Leon T. Leach, Indianapolis, shipped drug product in glass bottle labeled "Cancerol, a compound of essential oils for the treatment of malignant diseases, etc." Alcohol, 14 per cent and opium present, were not noted on label. Fined $25 and costs.

Howe Medicine Co., Philadelphia, shipped "Howe's Headache Tablets." Misbranded because full quantity acetanilid present was not given and properties of preparation were erroneously set forth on label. Fined $50.

Bruen, Ritchey & Co., New York, shipped a package of "Gum Asafetida" which was misbranded because same was found to contain much foreign material. Fined $50.

Three prosecutions were made for adulteration and misbranding. Towns & James, New York, shipped "U.S.P. H_2O_2, Peroxide of Hydrogen. 3% Hydrogen Dioxide, etc." Same contained acetanilid, but upon defendant establishing manufacturing chemist's guarantee the information was dismissed.

The National Aniline & Chemical Co., Brooklyn, shipped "Powdered Gum Tragacanth," differing from U.S.P. and N.F. tests. Fined $25.

E. DeTrey & Sons, Philadelphia, shipped a consignment of "Soemnoform. This mixture contains chloride of ethyl 60%, chloride of methyl 35%, bromide of ethyl 5%, Etc." No ethyl bromide was present. Fined $25.

Would Extend Drug Law Censorship to Advertising Displays in the Newspapers.

WASHINGTON, D. C., Oct. 23.—Plans for extending the present Federal control of food and drug labels so as to cover newspaper advertising were discussed today at a conference of officials of the Agricultural Department. Dr. Harvey W. Wiley believes that there is urgent need for a drastic Federal censorship of such food and drug advertising. It was to consider his proposal on this subject that the conference was called. If Dr. Wiley's plan is carried out, Uncle Sam may undertake the prosecution of all advertisers who sell through the medium of newspapers and magazines wares which fail to come up to the requirements of the Food and Drugs Act. He believes the government is authorized under the act to prosecute a firm for making a misstatement concerning its product in a newspaper advertisement as well as in its private literature or on a label of its goods.

Manufacturers of Insecticides Are Heard on New Law.

WASHINGTON, Oct. 21.—At the recent hearing, required prior to drawing up regulations for the enforcement of the new Insecticide Law, representatives of half a dozen manufacturing firms were heard. The different kinds of insecticides on the market, regulations for the prevention of sales of low-strength preparations of this nature, the time test necessary for water-soluble arsenic compounds employed as insecticides and fungicides, labels, and time allowed for disposal of present stock were the principal subjects discussed. The manufacturers objected to the ten-day limitation for tests which has been intimated to be a provision of the new law. Parke, Davis & Co. presented a brief in which it contended that the law should be left open for interpretation by the courts.

New President for Meyer Bros. Drug Co.

FORT WAYNE, Ind., Oct. 20.—Gottlieb H. Heine has been elected president of the Meyer Bros. Drug Co., to succeed the late J. F. W. Meyer. Mr. Heine was formerly treasurer of the company.

ENFORCING KENTUCKY'S PURE DRUG STATUTE.

First Offenders Are Given Hearings and Warned Not to Err Again—Names of Accused Are Withheld.

LOUISVILLE, Oct. 20.—Accompanying the recent campaign against impure ice cream that was being vended to Louisvillians, the matter of impure drug sales was recently investigated by R. M. Allen, head of the State Pure Food and Drug Commission, with the result that about fifty druggists appeared before Mr. Allen to answer charges of alleged violations of the Kentucky Food and Drug Act of 1908. About 80 cases were heard. Since all of the hearings were concerned with first offenses, no penalties were assessed. The names of the offenders were also withheld.

The chief matter of difference seems to have been that a number of tinctures, essences and spirits sold by local druggists have not been up to standard strength of from 10 per cent to 60 per cent, as prescribed by the United States Pharmacopœia. Sulphur and asafoetida were also alleged to have been adulterated.

One of the main defenses was that a number of the druggists had bought stocks of drugs from other persons and were ignorant of their constituents, while other pharmacists had been using the German Pharmacopœia, which differs in some respects from the American standard. Mr. Allen warned the druggists that second violations of the act would be followed by heavy penalties and the cases were dismissed.

For the purpose of better understanding the present pure food and drug laws, the Louisville Retail Druggists' Association recently met at the Seelbach Hotel in secret session. Attorney Scott Bullitt explained the statutes to the pharmacists, and a number of disputed points were elucidated.

Want Russia's Import Laws Changed.

WASHINGTON, Oct. 20.—Parke, Davis & Co. have asked the Department of State to look into the matter of the exportation of patent medicines to Russia, and the State Department has set in motion the diplomatic machine to see what can be done. It is claimed that the Russian Government forbids the entry of certain patent medicines without redress. This restriction it is the purpose of the American manufacturers to have withdrawn.

According to information here there are other countries which have regulations similar to Russia. Italy, for instance, has made specific regulations, naming the drugs which shall not be taken within their borders. It is possible that the matter will now be taken up with all the foreign nations that restrict such importations.

German Firm Wins Coal-Tar Customs Case.

The Farbenfabriken of Elberfeld Co., has won a customs victory before the board of United States general appraisers in a controversy regarding the classification under the tariff of an article invoiced as "meta toluylene diamine." Collector Loeb returned the merchandise for duty at the rate of 30 per cent under the provision for coal-tar colors. The importers objected to this assessment, and set up the claim that the product should be given a rate of 20 per cent under the tariff's provision for coal-tar preparations. After a consideration of the facts in the case, General Appraiser Chamberlain finds that the collector erred in his classification. The protest is accordingly sustained.

Fraud Order Against a Remedy Manufacturer.

KANSAS CITY, Mo., Oct. 20.—The Post Office authorities have issued a fraud order against Dr. G. M. Branaman and the Branaman Remedy Co., which, according to their advertisements, specialize on deafness, nasal catarrh, noises in the head, etc. The company has offices in the Gumbel building.

Metropolitan Drug Club Re-elects Officers.

At the recent annual meeting of the New York Metropolitan Drug Club the following officers were re-elected:

President, Wm. P. Ritchey, of Bruen-Ritchey Co.; vice-president, Albert Plaut, Lehn & Fink; secretary and treasurer, Thomas F. Main, of the Tarrant Company.

Will Have Larger Store in New Building.

A. W. Pauley, North St. Louis druggist, will enlarge his drug store, when a new building is erected.

NOTE—A, advanced; D, declined; C, correction; N, new.

See page 1127 and following pages for Prices Current.

NEW YORK, October 24.—Business in jobbing quantities during the past month has been of average volume with general market conditions fairly satisfactory to dealers. Opium prices are somewhat irregular and show a wider range. Quotes [illegible] and unchanged. Angostura Tonka beans are higher. In a large way Canada balsam of fir quotations have been reduced, but Oregon is unchanged owing to light stocks. Levant wormseed on the spot is without material change although European markets are called materially higher. Asafetida is offered in small lots at the lowest in years. True Venice turpentine is held at higher prices and smaller quantities have been advanced. Flaxseed and jalap are both higher, the export demand for the latter causing dealers to mark up their quotations. [illegible] cottonseed, wormseed and American wormwood are all higher. Among the unchanged lots declines are cerium [illegible] flowers, senega root, soap tree bark and green strophanthus seed.

Opium—Unchanged [illegible] with [illegible] and [illegible] at $5.20 per pound, a slight reduction. Granulated and U.S.P. powdered [illegible] unchanged at $5.40@$5.60 per pound. Advices from Smyrna under date of October 1 [illegible] 3,000 cases on the same date last year. During the month sales in Smyrna have been unusually large, amounting to practically half the crop in the last three months.

QUININE—Is without new feature and quiet with manufacturers' prices unchanged on the basis of 14c per ounce for bulk sulphate in 100 ounce tins.

BEANS, TONKA—Angostura are reported scarce and firmly held at $3.35, the market having a strong undertone with the tendency of prices upward owing to crop advices from the producing country that the yield this year is exceedingly small. Only a limited quantity is offered, the prices ranging from $3.35@$3.50 per pound.

ASAFETIDA—Continues extreme scarce, the small stock being closely concentrated and firmly held, jobbers quoting from $1.75@$1.90 per pound with very little obtainable at the inside figure. Powdered also is scarce and only limited quantities are available at the quoted range of $2.05@$2.25.

VENICE TURPENTINE—True continues in good consuming demand with spot supplies steadily diminishing and with conditions abroad favorable to holders the tone of the local market is firmer; quotations having been advanced to 33c@34c per pound.

LYCOPODIUM—Is again stronger abroad and cables have reported a further advance. Dealers offer somewhat cautiously and jobbers are quoting 52c@58c.

ALCOHOL—Is firmer and first hands have advanced prices with jobbers quoting commercial 95 per cent U.S.P., at $2.07 per gallon by the barrel, and $2.80 per gallon for smaller quantities.

MENTHOL—The market is firm, values reflecting the stronger tendency abroad. Advices from Japan indicate a shortage of the crop in some of the producing districts and these reports have not been without some effect on prices. Jobbers are quoting $3.56@$3.65 per pound.

ROCHELLE SALT—Owing to the increase in the cost of crude material manufacturers recently announced a slight advance in their prices, but as yet jobbers' quotations remain unchanged at 18½c@25c per pound. It is believed, however, that another advance is probable as the announcement has been made that makers of this product had declined to enter contracts and were accepting orders only for prompt delivery.

SANTONINE—An advance became operative in the early part of the month, jobbers now quoting $13@$14 per pound. The upward move is believed to be due to the reported strong control of the primary situation.

LAVENDER FLOWERS—New supplies of this year's crop have come to hand and as a consequence quotations have been materially lowered, jobbers asking 28c@40c per pound. Oil of lavender flowers is receiving rather more attention and the situation in France is reported to be very much unsettled. At the beginning of the season a large output was expected, and while the actual yield may have fallen somewhat below the first estimate, the crop probably was up to the average. However, in a jobbing way the price of the oil remains unchanged.

STROPHANTHUS SEED—Green is slightly easier with prices ranging from 65c@75c per pound. Attention is called to the fact that strophanthus kombe is the only variety entitled to admission into the country, the Hispidus variety not being recognized by the Pharmacopœia.

GINGER ROOT—African is fairly firm at 15c@20c per pound for whole and 20c@22c for powdered. All descriptions of ginger are reported strong and supplies of Race are said to have been concentrated on spot.

JALAP ROOT—Is reported higher both here and in Europe, and sellers have advanced quotations to 60c@65c per pound for sliced and 65c@70c for powdered.

OIL LEMONGRASS—Has been in good demand and this condition with reports of stronger advices from primary markets have caused holders to advance their prices. Jobbers are asking $1.40@$1.50 per pound.

OIL OF WORMSEED—Baltimore is [illegible] $2.75@$2.85 per pound being asked.

TARTARIC ACID—The small yield of grapes in foreign producing countries and the resultant strength in crude materials have caused makers to advance their prices, jobbers quoting 32c@35c per pound for crystals and 34c@38c per pound for powdered.

DIGITALIS LEAVES—German, in consequence of low arrivals, are [illegible] prices [illegible] 28@33c per pound.

OIL COD LIVER—Norwegian [illegible] and good yet [illegible] toward the end of [illegible]

Don't Neglect the Staples

Don't forget the good old rent-payers like Diamond Dyes. Don't give too much attention to new, untried stock. New articles sometimes sell well but you can depend on the year-in and year-out sales of

DIAMOND DYES

No new article can approach them for steady sure profits.

You never had in your store a 10c article that totals as much money for you as Diamond Dyes. Give them your best attention.

Diamond Dyes have been a staple for more than 25 years.

This year is sure to be a record maker for Diamond Dyes. Despite the tremendous sales of previous years, the first nine months of 1910 sales have broken all records.

Two Hundred Thousand Dollars Helping You

To make sure of big sales for you, we are spending $200,000 *each year* in advertising Diamond Dyes. Think of an average of nearly $17,000 a month spent in advertising one 10c. article.

Hosts of women are being sent to you by our advertising. *Sell them what they ask for.* Make steady customers of them.

To do this, you must

Keep a Good Stock on Hand

Have a complete stock of *Diamond Dyes* for Wool and Diamond Dyes for Cotton. Keep a full line of colors. Give the Diamond Dyes Cabinet a prominent place in your store. Tell your clerks to PUSH Diamond Dyes.

If your stock is low, send your order *now.* Don't wait. Staples like *Diamond Dyes* should never be out of stock.

Facts That Will Help You

Always be sure that your customers get the right kind of Diamond Dyes for the materials they intend to dye. For while it is almost impossible to fail with Diamond Dyes, if the directions are carefully observed, it is imperative that the right dyes be used.

Frequently, customers want to know why one dye won't do for any kind of materials. Then tell them this:

Wool, silk and like materials are made up of animal fibres, while cotton, linen and mixed goods are composed of vegetable fibres, which are entirely different in composition and slower to take up the dye. And the only way to get absolutely sure and satisfactory results is to use the kind of dye especially adapted to the fabric. This is supported by the authority of all the most eminent dye-chemists.

If care is taken to secure the proper dye, there is positively no reason for failure. For dyeing at home with Diamond Dyes is just as simple, as sure of success as washing a shirt-waist.

But be sure to explain carefully the reasons for the separate dyes. For every imitation that is sold undermines the confidence of your trade in the possibilities of home-dyeing and kills possible profits.

WELLS & RICHARDSON CO.

BURLINGTON, VERMONT

Now is a Good Time to Resolve

You want Welch's Grape Juice. Your customers want Welch's. When placing your next order for Grape Juice, whether it be now or in 1911, see that it is for Welch's.

Others claim to have a grape juice "Just as good as Welch's." They make large promises as to what they are going to do and they offer special inducements in the way of price or free goods; but if you have been handling Welch's you know that it sells, you know that it gives satisfaction and this means a growing grape juice trade. If you have tried other brands you know that the manufacturers have usually failed to "Make good" on their claims to you and to the public, and the proposition which appeared to offer you a larger profit really lost you customers and many repeat grape juice sales. The extra effort put forth in pushing the other brand is worth considering, too. A dealer aptly referred to Welch's as "The brand that needs no pushing," yet it is this sort of product that you like to push and which is really worth pushing.

Welch's Grape Juice

is not an experiment. You can depend upon the finest quality of grape juice in 1911 and in every year being under the Welch label and you can depend upon a larger and more vigorous advertising campaign that will make Welch's known to more people in 1911. Welch's Grape Juice is a success because its superior quality is backed by persistent and truthful advertising.

It's a good time to resolve and you can stick to it—**"I will have Welch's for 1911 and so long as it maintains its present pre-eminence in the grape juice field."**

We supply attractive display material and a valuable little booklet for the dispenser to dealers pushing Welch's.

BUSINESS NOTICES

Souvenir Post Cards for the Approaching Holidays.

The approaching holidays offer opportunities for the druggist who desires to sell a profitable side line. The Sanford Drake Card Co., 3702 Harrison St., Chicago, Ill., call attention in their advertisement in this issue of the ERA to forty rich designs for Christmas and New Year Post Cards, printed in eight colors and gold, and deeply embossed which they supply at prices that will afford the dealer a handsome profit. They also carry a large stock of Thanksgiving cards at prices ranging from 60 cents to $3 per hundred. It will pay you to get acquainted with them as they fill orders promptly and co-operate with their customers in profitably selling the goods. Write for samples and their illustrated monthly bulletin. Please mention the ERA when you write.

Marguerite Playing Cards Good Sellers.

Dougherty's Playing Cards, manufactured by A. Dougherty, 76, 78 and 80 Centre street, New York, have been the standard for more than half a century, the finish, dealing and wearing qualities of these cards making them the prime favorites of players everywhere. In his advertisement in this issue of the ERA the manufacturer calls attention to the playing cards known as "No. 130 Marguerites," which are of French or whist size, made of linen stock with a highly enameled or linoid finish, gold edges, each card being perfumed and the back designs floral in character and printed in colors and gold. The cards can be easily shown to prospective buyers, being packed two packs in a box, three boxes (six packs) in a display carton. For illustrations of the various back designs used on the "Marguerites" and the terms of the offer the manufacturer makes to send purchasers of these cards a 50-cent sachet or lingerie bag free, see the advertisement on page 1141.

If you haven't read page 1042 of this issue, do it now.

Nurnberg's Advance Fever Thermometer.

The most important manufacturer of clinical thermometers in the world and the largest of them all is the Charles Nurnberg Company (Inc.), Carr Building, East 138th street and Third avenue, New York, with factories in Brooklyn, and Berlin, Germany. This great enterprise was founded by Charles Nurnberg in 1895 and was incorporated in 1907. The output is enormous, and the sales have increased from 51,376 thermometers in 1904 to 995,864 in 1909. The company supplies the clinical thermometers for the Medical Supply Department of the United States Government and its products reach all parts of the United States, Canada and European countries. The "Advance" a clinical thermometer, manufactured by the company, is particularly recommended to the trade. It is perfectly aseptic, equipped with lenz-finders and anti-rolling devices, and is provided with means to limit the extent to which it should be inserted into the body. For further information read the advertisement of the Charles Nurnberg Co. (Inc.) on another page of this issue of the ERA.

Originator of Benger's Food An English Pharmacist.

The late Mr. Benger, the originator of Benger's Food, was a well known English pharmacist, who is best known for his work along the line of digestive ferments. It is claimed that he was the first to introduce peptonizing powders to the trade and profession. He was also the first to introduce a reliable extract of red bone marrow.

In this country Benger's Food is the best known of the Benger products, and it is fast becoming a recognized factor in the dietetic treatment of the sick. It is used in many of the royal nurseries abroad, and has been admitted free of duty in Australia, the Government ruling that "to tax it would be to tax sickness." It also enjoys the reputation of being mentioned in standard text books, medical articles, and by well known authorities, perhaps more than any other dietetic preparation. E. Fougera & Co., 90 Beekman St., New York City, are the distributing agents, and will be glad to send advertising matter to those interested. The retail prices are 25c, 60c and $1.75 per package.

It Leads in Applying the Powder
It Leads in Price

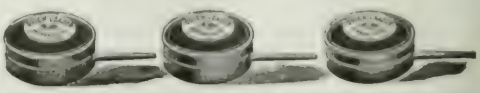
There is as much profit and much more satisfaction in selling the "Quick Loader" than any other gun made.

If you buy in lots of 25 gross or more we will place your name on the top plate in place of ours, and in addition will furnish you with a reasonable quantity of attractive powder gun circulars, with your imprint.

Advise us the probable quantity of guns you will wish this coming season and we will make you an attractive price and help you to sell them.

American Can Company

New York Chicago San Francisco



Special Offer on Capsules.

H. Planten & Son of Brooklyn, N. Y., are making a special offer on Capsules in their page advertisement in this issue of the ERA. They inform us that these special prices are from 20 to 25 per cent below their regular list, and the offers consist entirely of staple goods. Pure Sandal Oil (10 minims.) at $7.50 per 1000; Copaiba and Cubebs $5.00 per 1000; Pure Castor Oil (2½ grammes) in boxes of six capsules at $7.50 per gross boxes. From these prices they allow 5 per cent additional on orders for 5000 or more and same can be assorted to suit the buyer.

Every druggist who wants to replenish his stock of capsules at this time will surely be interested in this offer, but it is only open for the balance of this year and orders should be placed at once. See their full page advertisement in this issue, and when writing please mention the ERA.

Taking Advantage of Manufacturers' Advertising.

The advertisement which appears in this issue of the ERA as a four-page colored insert, is put out by Good Housekeeping Magazine and is an exposition of the belief by magazine publishers in the importance of reaching the trade paper field. Manufacturers are spending vast sums of money and energy to stimulate retail sales, and the publishers of Good Housekeeping Magazine now come forward and invite the retailer to a monthly inspection of its advertising section. The advantages to the dealer of reading a consumer's magazine to find out what a consumer will buy are apparent.

The efforts of Good Housekeeping Magazine to give the dealer definite assistance in getting the fullest advantages of the manufacturer's advertising do not stop with the suggestions embodied in their trade paper copy. The work of their New England manager at Springfield, Massachusetts, is still further devoted to unifying the interests and efforts of manufacturer and seller. Howard W. Dickinson, in charge of the Springfield Office, is employed particularly in an advisory capacity for looking into and analyzing trade conditions and situations. It is significant that he is turning his knowledge of merchandising as much to the merchant's account as to the manufacturers'.

Richard H. Waldo, Advertising Manager of Good Housekeeping Magazine, makes this statement: "We have a magazine of wide circulation in the better class of homes throughout the country. From our work in the advertising field we have become convinced that the largest advertising waste in the last ten years has been the indifference or neglect which the retail merchant has paid to the manufacturer advertising to create sales over the retail counter. It is for this reason that we are advising the retailer to study the advertising section of our magazine and take advantage of the opportunities offered there for quick and profitable sales. We are delivering this message through the trade papers because we know they are carefully read by the progressive retail trade. In doing this we are bridging a gap between the retail merchant and the manufacturer in the belief that we shall serve the interests of both."

New Fever Thermometer.

Among the new advertisers in this issue of the ERA is the Sadtler Drug Sundry Co. of Baltimore. They are advertising a new special fever thermometer at very low price.

This concern is making a special of high grade fountain syringes, water bottles, rubber and other sundry goods. They guarantee their products in every particular, and are endeavoring to build up a trade on quality and fair dealing. Send for one of their catalogues. Please mention the ERA.

Drug Store Posters.

The attention of readers is invited to the special advertisement of the National Printing and Engraving Co., in this issue of the ERA. This company is one of the largest lithographing houses in the country, and has justly earned a reputation for the excellence of its products. They are making a specialty of Drug Store Posters for retail druggists, and it will pay all enterprising druggists to note their announcement.

Buttermilk Growing In Favor As a Beverage.

As a beverage, buttermilk is fast becoming a favorite. More was consumed last summer than ever before and next year, it is safe to say, a host of people will be drinking it who never before tasted it. That it is a wholesome drink has been known for a long time but, in the past, it has not been easy to obtain it (in a fresh, clean condition) outside of rural settlements. Now it can be made in any kitchen, from sweet milk, by means of tablet cultures of the lactic organism. One of these lactic products is Galactenzyme, a pure culture of the true bulgarian bacillus made by the Abbott Alkaloidal Co. of Chicago. The Abbott product, the manufacturers state, makes a fine quality of buttermilk in less time and with less trouble than any other ferment —one that is rich, smooth and always delicious. Last summer many druggists found it profitable to serve it at the fountain and to supply it in bulk to people in their localities. Doctors are prescribing it more and more as a food and will often refer their families to druggists who are known to carry it. Buttermilk is a good all-year-round beverage and not a few people are drinking it in place of tea and coffee at the table. Galactenzyme is sold in the form of tablets in bottles of 100; two tablets will convert a quart of sweet milk into buttermilk in from eight to twelve hours. The tablets are also given by mouth in intestinal and other diseases caused by fermentation in the bowel. Inquire of your jobber who is supplied or write for trade price list to The Abbott Alkaloidal Co., Ravenswood, Chicago.

Turn right now to page 1042 of this issue.. You surely should know this.

To-Kalon Manufacturing Co.'s Premium Offer.

An interesting offer in this issue of the ERA is that contained in the advertisement of the To-Kalon Manufacturing Company, of Syracuse, N. Y., who agree to send this month and for one time only to any retail druggist who will order 2 dozen Lavona de Composee, a varied assortment of high-grade Parisian beauty and toilet products which sell at retail for $12, enabling the dealer to make a clear profit of 150 per cent on the transaction.

Lavona de Composee is the principal ingredient of Harriett Meta's Gold Medal Hair Tonic which the manufacturers state is very popular and extensively sold throughout Europe. The formula for this Tonic, which has been widely published in the leading newspapers all over the country, calls for 2 ounces of Lavona de Composee, 6 ounces of bay rum and ½ dram of menthol crystals, the purchaser buying the ingredients and mixing them at home, an idea which catches the public fancy, the product when once tried holding it. The manufacturers further state that the toilet products they are offering in their advertisement as a premium with a purchase of Lavona de Composee are the exact duplicates of those they produce in their laboratory at 7 Rue Auber, Paris, which are having such a good sale throughout Europe, and they may be considered as truly Parisian Toilet Products with all the prestige and charm that the name of Paris brings and which should make them ready sellers in every drug store in America. For full particulars of this premium offer see the company's advertisement on page 1047 of this issue of the ERA.

Evans' Ale and Brown Stout Profitable to Handle.

The house of C. H. Evans & Sons, Hudson, N. Y., has been in existence since 1786, being well known to the trade as manufacturers of Evans' Ale and Evans' Brown Stout, both of these products being recommended by physicians as flesh-makers and strength-builders. Both are profitable specialties to handle and the manufacturers ask "Why not add a profitable line?" Read their advertisement on another page of this issue and write for particulars. Please mention the ERA when you write.

SUPREMA
VANITY BOX

A beautifully decorated little metal box, just the size of a lady's watch and fits the purse perfectly.

It appeals at once to ladies as more refined and pleasing than the ordinary chamois, as it may be used unnoticed whenever desired.

The box contains a cake of hard powder and the tiny powder puff, which is a French importation.

Inside the cover is a reducing mirror, which reflects perfectly the entire face.

They come one dozen in a counter display box at $4.00 and retail for 50 cents each.

The Big Selling

COUGH REMEDY

This remedy was designed by a pharmaceutical chemist to take the place of a thousand and one home-made remedies used by housewives to cure coughs.

People that used to come to the druggist for five cents worth of glycerine and a nickel's worth of Horehound tea, licorice or something else, are now buying 50 cents worth of Pinex.

They get a better remedy and they pay the druggist a better profit.

Pinex has created a lot of brand new, profitable cough medicine sales to a class of people who would not buy an ordinary cough syrup.

If you're not selling it you should.

WE GUARANTEE THE SALE. Unsold bottles returnable at any time.

Any jobber will supply you.

$4.00 per dozen. Retails at 50c. the Bottle

Marvelette Egg Shampoo a Ready Seller.

A new product now being placed on the market is the Marvelette Egg Shampoo Cream which is put up in a unique package in the form of an egg and displayed on a handsome lithographed tin easel. These goods are manufactured by the Marvelette Laboratories, Rochester, N. Y., who now have their traveling men out among the retail trade. Marvelette Shampoo Cream is put up in most attractive packages, is a ready seller, and druggists looking for such novelties should write to the manufacturer. Please mention the ERA.

American Girl Calendars For 1911.

The Pabst Extract Co., Milwaukee, are already preparing to supply the trade with their 1911 calendar, declared to be even more beautiful than former high-class art calendars issued by this concern. This calendar is in twelve beautifully blended colors and typifies the American girl in all the surpassing beauty of vigorous youth. This company each year mail thousands of calendars to those who answer their advertisements and send 10 cents in stamps. There are also many thousands distributed through the drug trade.

However, the company have this year adopted a plan which they believe gives the retailer a greater share in the benefits accruing from the distribution than ever before. The plan which is explained in their advertisement in this issue is to the effect that with every order for one cask (8 dozen) of Pabst Extract placed with the jobber the Pabst Extract Co. will send the retailer by express prepaid fifty American Girl Calendars for 1911, easily worth $5. They will also furnish a beautiful window hanger announcing, in the dealer's name, a calendar with every purchase of one or more bottles of Pabst Extract. Interior store signs and other attractive advertising matter are also given to the retailer. On account of the limited supply of calendars which have been allotted for distribution through retailers, the Pabst Co. have confined this offer to full cask purchases made on and after Nov. 1. Use the coupon attached to the Pabst advertisement appearing in another part of this issue.

Cholax Manufacturers' New Booklet.

The Kelvan Company, Inc., Philadelphia, Pa., have just issued for the laity an interesting 16-page booklet concerning Cholax, "the Sparkling Health Salt" manufactured by them and advertised to the trade in this issue of the ERA. Druggists particularly will be interested in this booklet which represents an effort the manufacturers are making in their advertising and literature to raise the standard of proprietary medicines. They print the open formula, an innovation, and state that they make no exaggerated claims or false statements concerning their preparation and use no suspicious testimonials. They also believe that cleanliness is paramount, and they extend an invitation to physicians and pharmacists generally to visit their laboratory 4914-20 Parkside ave., Philadelphia, and note the conditions under which Cholax is manufactured. This specialty is being extensively advertised and should prove a good and profitable seller.

A Cough Syrup That Proved a Speedy Money-Maker.

When Parke, Davis & Co. launched their Syrup Cocillana Compound, two or three years ago, and proceeded in characteristic fashion to exploit it to physicians by an expensive campaign of advertising, sampling and "detailing," not a few druggists were inclined to question the success of the undertaking. Events proved their doubts to be ill-founded. It was not long before prescriptions began to appear in the drug stores of the country, and pharmacists soon saw the wisdom of being prepared to dispense the new product. Today Syrup Cocillana Compound is probably the most widely prescribed cough preparation on the American market. It has marked therapeutic efficiency, is elegant pharmaceutically, attractive in appearance, and agreeable in taste. It is unusual both in name and composition, there being nothing in either to suggest to the lay mind the nature of its use, and this fact has doubtless done much to popularize it with prescriptionists. The manufacturers are inaugurating another aggressive campaign among physicians and retail druggists will do well to prepare for this bigger business.

Reliability in a Clinical Thermometer

RELIABILITY should mean that a clinical will invariably register the exact temperature of the patient not only while the instrument is in the mouth, but also until it has been read and the mercury stricken back into the bulb.
RELIABILITY should mean that the mercury will not retreat or creep so as to give a false reading.
RELIABILITY should also mean that the instrument will not change its reading with age.

HARVARD Clinicals

ARE RELIABLE—We guarantee them to remain so while unbroken.

Students Special Fountain Pens.

Aikin-Lambert Co., manufacturers of Fountain Pens, 15-19 Maiden Lane, New York, advertise in this issue of the ERA a line of superior low-priced pens with which a druggist can readily build up a fine trade for his stationery counter and earn a liberal margin of profit. The manufacturers particularly emphasize their Students Special Fountain Pens which, they say, are the best that have ever been offered to the trade at such favorable prices. These Pens are made from the finest materials, the holders of the best rubber, hand turned and well finished, and the pen points of 14 kt. gold with hand-tempered nibs and pointed with finest hard iridium. For illustrations and prices of the various styles see page 1043. Students are particularly fond of fountain pens and it requires no great effort to make sales especially at this time of the year when almost everybody is looking for something to serve as a gift and yet which shall be of practical service.

Pharmacists Should Stock Ichthynat.

Ichthynat (Ammonium Sulphoichthynat) is a new preparation being exploited and introduced by the Mallinckrodt Chemical Works. According to Prof. Von Hayek, whose investigations were published in the Wiener Klinische Rundschau, 1907, the fundamental substance from which Ichthynat is manufactured is identical wtih that from which the preparation Ichthyol is made, a bituminous shale found in great abundance in the Karwendel Mountains in North Tyrol. Prof. Blaas, Director of the Geological Institute at Innsbruck, Germany, expresses it as his opinion that the two geological formations are completely identical in their nature.

The Mallinckrodt Chemical Works wishes to make it clear that Ichthynat is not offered as a substitute for Ichthyol, but rather as its equivalent as a therapeutic agent, and on account of the lower price at which it is available, it is safe to say that it will come into more general use than has heretofore been possible. Pharmacists should call the attention of their local physicians to this valuable introduction and order a quantity for their dispensing department, so that they will be able to fill prescriptions for it.

E. W. Rose Medicine Co.'s Attractive Exhibit.

According to newspaper accounts, one of the busiest and most attractive exhibits at the "Made-in-St. Louis Exhibition" held in that city last month was that of the E. W. Rose Medicine Co., manufacturers of the Zemo remedies—Zemo, Zemotone and Zemo Soap. Visitors who saw the exhibit were favorably impressed with the unique display which told them so much about the value and usefulness of Zemo products which are all made in St. Louis and have an extensive sale. The success of the E. W. Rose Medicine Co. and its hearty belief in St. Louis and plans for advancing the interests of the city have well earned the praise that was bestowed on it and its exhibit.

A New Size of Van Buskirk's Sozodont.

Hall & Ruckel, New York, have an advertisement in this issue of the ERA in which they call the attention of druggists to the new 50-cent size of Van Buskirk's Sozodont now on the market and for sale by all wholesale druggists. Attention is also called to the beautiful cutout, illustrated in the advertisement, which they offer to mail to druggists on request. It has an easel back, is lithographed in seven colors and suitable for display in any pharmacy. For further particulars see the advertisement on page 1121 and send for one of these cutouts which will help you to sell an already popular specialty for the teeth.

Real Soda Fountains at Reasonable Prices.

The Acorn Brass Manufacturing Co., Green, Peoria and Fulton streets, Chicago, Ill., have just issued their new 1911 catalogue descriptive of the Soda Fountains manufactured by them and which they will be glad to send you on request. They state that their fountains embody all the latest and best ideas in modern construction and that they manufacture real soda fountains at a reasonable price. They prefer selling you through your jobber as they have no salesmen. Read their advertisement on page 1116 in this issue of the ERA for particulars, fill out the coupon, get the catalogue and place your order early so as to avoid the Spring rush.

Every druggist in the United States ought to read page 1042 of this issue.

The Imprint of Cargill GRAND RAPIDS stands for Quality

TO THE POST CARD DEALER:

HIGH GRADE VIEW CARDS ARE QUICK SELLERS

HIGH grade local view post cards are as profitable an item as most any of those you now carry in stock. It is no longer considered a speculative investment to carry a number of desirable views of your locality, as they are a staple article, having a good steady sale and are actually entitled to as much, if not more, consideration than many of the so called standard items you are carrying year in and year out.

THE PUBLIC DEMANDS THEM

"View Cards Like They Make in Germany" and bearing our imprint are the ***best made*** and cost only a trifle more than the poorer grades. If you would increase your sales, you should have the best cards obtainable. If your jobber does not handle our line, let us send you samples and allow you to judge for yourself.

Special Offer

HARTWIG DRUG COMPANY, 1954 Milwaukee Ave., Chicago

Post Cards for Equal Suffrage Week.

The Cargill Company, manufacturers of "view cards like they make in Germany," Grand Rapids, Mich., have sent a notice to the trade requesting every retailer of post cards to make a full window display of Suffrage post cards, Suffrage Stationery and Suffrage Jewelry on Monday Oct. 31 until after Election day, Nov. 8, this period being known as Equal Suffrage Week as set by the National American Woman Suffrage Association. By special arrangement *The Woman's Journal*, the organ of the association, will request all suffragists and sympathizers to patronize the stores which comply with this request. To further this campaign the Cargill Company has spent thousands of dollars to place the proposition before the public and they have designed and written a series of exceedingly clever aphorisms that are intended to "wake up" and create an interest in the minds of women and men who have never given the matter consideration. They have also designed a beautiful line of suffragist stationery, endorsed and approved by the above association. It will pay druggists to look over the line of these wide-awake manufacturers and put in a stock of stationery, post cards, etc. The Cargill Co., in view of the fact that there is not much time left to distribute these cards to the retail trade before election, advise druggists to not wait for samples but to send them a trial order of 500 or 1000 of a subject and get busy. There are thirty subjects in the series, beautifully printed in five colors and gold, on high grade post card stock, and are to be sold to the consumer at two for a nickel. The price to the retail trade is $1.25 per hundred, assorted. Read the Cargill Co.'s advertisement on another page of this issue of the ERA and take advantage of the offer. There is a good margin in selling these post cards and the dealers does not have to contend with cut prices.

Fill Out the Coupon and Get a Dollar Box Free.

The Coonley Medicine Co., Inc., offer to send free of expense a full sized $1 box of Dr. D. M. Coonley's "Orange Lilly Suppositories" to any druggist who has not handled their remedy. Fill out the coupon which forms a part of their advertisement on page 1122 of this issue of the ERA and mail it to their address, Detroit, Mich.

Goldfish an Attractive and Profitable Side Line.

That the sale of Goldfish as a side line to the drug business is a paying proposition has been repeatedly proved and particularly by druggists who have among their customers people of the better class who delight in making their homes attractive. A globe or an aquarium of goldfish is an interesting object in any home and no great effort is necessary to make sales which are highly profitable. Druggists who wish to make some easy money should read the offer that Bishop, "the Bird Man and Pioneer Goldfish King," 12 N. Front St., Baltimore, Md., makes in his advertisement in this issue of the ERA. Read the ad carefully and send for a copy of Mr. Bishop's latest catalogue on Goldfish, Aquaria Supplies, Birds, Cages, Bird Foods, etc. Please mention the ERA when you write.

Popular and Attractive Toilet Necessities.

The Toilet Set Bottles advertised in this issue of the ERA by Whitall Tatum Co., are extremely popular and attractive toilet necessities. In the manufacture a thorough knowledge of the requirements has been shown, the labels being different from those used on druggists' shelfware, but of most attractive design, distinctive in appearance and lettered so that they may be read at a glance. The use of liquid-tight stoppers also minimize the possibility of the contents of the bottles becoming affected. In these respects the manufacturers consider that they have met all the conditions and that this line of Toilet Set Bottles cannot be duplicated elsewhere. These sets are often supplied by druggists filled with the various household remedies and in thus selling them the druggist further increases his profit. Read Whitall Tatum Co.'s advertisement on another page and send in your order for a supply at the earliest possible date.

Electric Signs for Druggists.

The "Flaming Mortar" is a brilliant electric sign for enterprising druggists which is made by the Rotary Sign Company, 14 East 42d St., New York City, and said to cost but one cent an hour to operate. See the advertisement on page 1126 of this issue of the ERA and write to the manufacturers for particulars.

Style No. 1185

OUR STANDARD
Xmas Post Card Assortment

There are 50 subjects in these two numbers.
This has been our most popular line of season cards for the last five years.
The designs are all new and copyrighted.

Illuminated texts, assorted borders, small scenes, odd shaped, a touch of gold here and there, giving the line the happiest sort of a combination of colors.

MAIL ORDER PRICE, $1.00 per 100 Assorted

ERA PRICE LIST, $1.00 per Copy

With Subscription to the PHARMACEUTICAL ERA for 1 year, $1.50

WHAT IS IT?

The "YALE SPECIAL"

Automatic Clock Sales Machine

is a handsome eight day Mantel Clock, with our Patented Coin Operating Check Delivery Device attached.

It is the greatest novelty you can bring into your store. No gambling.

For every nickel deposited one 5c. trade check is returned and sometimes an extra one or two. It is a marvelous stimulator of Cigar and Fountain sales. It will make every customer loosen up and get the boys coming your way.

The price is $15.30 including 100 checks bearing your name and address. Checks marked "Good for one 5c. Cigar," "Good for one 5c. Fountain Drink," "Good for 5c. in Trade." Order from your Jobber, or the

This is SCOTT'S EMULSION'S 35th Year

Every day we hear of wonderful cures it has made. ¶Every day we have more and more faith in it. ¶We make it every day, and every day we try to make it better. It ought to be the best. It has stood a long test.

We are sure you, too, have faith in Scott's Emulsion, and we are sure you have no trouble with it. It is only a question of our customer going to you or going somewhere else. When he comes in, will you please give it to him? That is all we ask—just give him **SCOTT'S EMULSION.**

THE BONUS PROPOSITION

This proposition is made to those who retail only, and is as follows:

Orders amounting to $25.00 worth (either size or assorted), are subject to a 5% discount, allowed by the wholesaler, and ⅓ dozen Scott's Emulsion, Small, as a bonus for window display. The four bottles of Emulsion will be sent **by us direct, charges prepaid,** upon receipt of acceptance of order by wholesaler.

Make up the amount any way you like, this is the way it figures out:

3 Doz. Large Emulsion, @ $8.00	**$24.00**	**6 Doz. Small Emulsion, @ $4.25**	**$25.50**
Less 5%	**1.20**	**Less 5%**	**1.27½**
	$22.80		**$24.22½**
Less 4 Bottles, Small	**1.42**	**Less 4 Bottles, Small**	**1.42**
	$21.38		**$22.80½**
or $7.13 per dozen, net.		**or $3.80 per dozen, net.**	

Your advantage is in the large size, so is ours, as the small size costs proportionately more to put up.

Send your orders direct to us on any wholesaler, and if you would like advertising matter, please request it.

SCOTT & BOWNE - - Bloomfield, N. J.

COCOA POWDERS

You have not exhausted the possibilities in Cocoa Powder buying, without at least seeing what we can do for you.

We make nearly one hundred varieties, and certainly some one of these should suit your requirements. Our Cocoa plant is one of the finest in the world and we keep abreast with all improvements.

Our machinery enables us to furnish not only a Cocoa more completely freed from the oil than others but also ANY degree of dryness desired.

We can give you the Dutch processed Cocoa of highest grade and fuel equal to the finest imported, and we can give under the same process Cocoa that is slightly processed or heavily processed. We can give the same QUALITY of Cocoa not Dutch processed.

We can give you a Cocoa Powder that could only be sold at a small profit at $1.00 per lb., and from that absolutely pure Cocoa down to a price that would SURPRISE YOU.

If you are a large user we can and will make a blend solely for your purpose. We make only absolutely pure Cocoa powders.

We pack in barrels, half barrels, 50 and 25 lb drums and 10, 5 and 1 lb. tins.

PLEASE REMEMBER other manufacturers MAY be able to please you, BUT you should see what we can do before you place your contracts or orders.

PLEASE REMEMBER other manufacturers MAY be able to satisfy you, but WE CAN and our capacity assures you of prompt deliveries.

YOU SIMPLY DON'T KNOW UNTIL YOU TRY

ROCKWOOD & CO.

Re Price Protection on SANATOGEN

We wish to reiterate with all emphasis that as the sole licensees of the United States Patent under which Sanatogen is manufactured and sold, we are invested by law with the privilege to insist that retailers strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating this condition renders himself liable to injunction and damages.

Gentlemen of the drug trade, this is no mere "say-so," but a true statement of fact. We do not wish to intimidate anyone, but merely to give proper notice that we mean to enforce our rights wherever necessary.

This means *true protection*, the kind of protection that gives everybody a square deal and puts the small druggist on an even level with the biggest "chain corporation" or department store.

Three sizes, sold by all wholesalers and jobbers, at $9, $17.25 and $33; to retail at $1, $1.80 and $3.00, and *no less*.

Write to us today for effective display matter.

Get Our Exclusive Newspaper Advertising QUICK

It Never Fails To Pay

ROOT JUICE can be bought, from any jobber, at $8.00 per doz., but we will do exclusive advertising, over the name of one druggist in every town, which has a weekly newspaper, if the druggist will deal with us, direct, thus enabling us to keep tab on results of the advertising. We will also allow deduction of freight, and liberal discounts, on quantity lots. Write us. Scores of druggists throughout the country are having a wonderful sale on Root Juice.

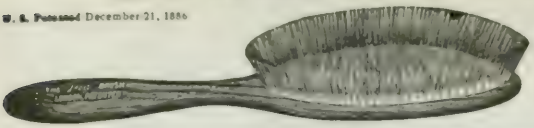
AIR CUSHION.

The Ideal Hair Brush.

U. S. Patented December 21, 1886



SIBERIAN BRISTLES.

Nothing Like it on the Market.

Do not confound this brush with the rubber back wire brushes. It is entirely different. The "Ideal" has an Air-Cushioned Back and Genuine Siberian Bristles. It is the best selling brush on the market. Order through your jobber, wholesale drug or dry goods.

A Necco Trade Headed Your Way

There's a big Necco trade headed your way, for Necco Sweets advertising is again predominating in all the most popular magazines and papers.

As usual, the Necco Sweets Message is "Look for the Necco Seal for Confectionery of known quality"—a message that applies with equal force to dealers—to *you* as to customers. One of our leaders is

NECCO WAFERS

In 5c Rolls

Other five-cent package goods are Necco Chewing Gum, Necco Chocolate Pecan Fudge, Pastilles, Necco Licorice Drops, Necco Chocolate Mints, Peerless Wafers (the last named variety sold also in bulk).

10c Package Goods: Necco Chocolate Almonds, Necco Chocolate Maple Walnut, Necco Chocolate Molasses Cream, Necco Chocolate Caramels. Over five hundred varieties of Necco Sweets in all, including the famous Necco Chocolates. *We help you sell.*

Order from your jobber. Write us if he doesn't carry them.

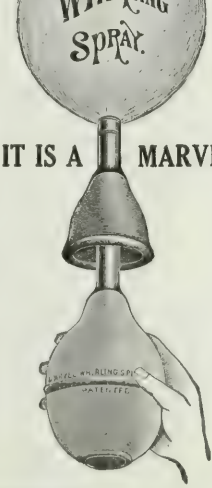
THE MARVEL "WHIRLING SPRAY" SYRINGE



WAS AWARDED THE GOLD MEDAL, DIPLOMA, AND CERTIFICATE OF APPROBATION, BY THE SOCIETE D'HYGIENE OF FRANCE, OCTOBER 9, 1902,

as the latest and best improvement in Vaginal Syringes. Particular attention is called to the fact that by reason of its peculiar construction the Marvel Syringe dilates and flushes the vagina with a volume of whirling spray, which smooths out the folds and permits the injection to come into contact with the entire surface, instantly dissolving and washing out all secretions and discharges.

NEW YORK IN 1911 FOR THE N.W.D.A.

Selection of New York City for the 1911 convention of the National Wholesale Druggists Association was not altogether expected, for in three previous years the association met here, but it was a gratifying recognition of the pre-eminence of this city in its relation to the importing and wholesale drug industry. It was in line also with the recognition given to Dr. William Jay Schieffelin, as the present head of one of the city's oldest and most important houses, by making him president of the association. Aside from any local or other considerations, Dr. Schieffelin's services as chairman of the committee on proprietary goods have been of such an exceptionally high order of merit that his preferment undoubtedly was based chiefly, if not entirely, upon that fact alone, although he has long been an earnest, intelligent and assiduous worker in less conspicuous branches of the work of the association.

New York has been doubly honored and the incentive is great to make the 1911 convention of the N.W.D.A. the most memorable thus far in its more than a third of a century of life. There can be no question of the realization of this expectation, for there are the men and means to do and the stage will be ready for the entertainment.

THE WORLD LARGE ENOUGH FOR ALL.

Nothing more noteworthy in the drug trade at the present moment can be found that will appeal to all interests than the confirmation by President Martin, of the National Wholesale Druggists' Association, of the theory that the world is large enough for all of us. Mr. Martin, at the Dallas convention, which is reported elsewhere in this ERA, takes occasion to say, in a thoughtful and well-considered annual address:

> The outlook for the future is also full of encouragement to renewed effort and I confidently predict continued satisfactory results by those who are fully organized to meet the more and more exacting requirements of our business. This condition of affairs should be very gratifying, *considering the unprecedented competition of co-operative enterprises among the retail druggists and the extension of large combinations in that branch of the trade, as it indicates that the wholesale druggists have been able to more than hold their own, where dire disaster had been threatened*, and are strong and permanent factors in the distribution of their goods from the manufacturer to the retailer.

Looking at President Martin's picture, which is printed on page 1211, those who do not know him

personally will see that he is not a natural optimist, but simply a clean cut business man who has been successful because he is always abreast of the times and conditions, if not just a trifle ahead, which is desirable in every business. Mr. Martin in the amplification of his conclusions justifies the general proposition that the position of the jobber in the drug trade is permanent. While the big chain stores, like the Riker-Hegeman aggregation, the Liggett series, the Owl emporiums on the Pacific coast and many other chains are able to profit through combination, it is doubtful if they ever can get along entirely without the jobber. The A.D.S. has, according to *Voice*, abandoned its idea of operating a great chain of stores. This takes out of consideration an element of interest and of opposition to the 35,000 druggists who are not in the 10,000 army of members of the A.D.S. There still remains, therefore, the opposition of only the present big store chains to be combatted by the unchained drug stores of the country—probably 45,000 in number.

While numbers do not always count, the retail druggists may as well take these figures into mind and if the wholesalers have found results so satisfactory as President Martin reports—and there is absolutely no reason to doubt either his information or conclusions—there is ample basis for a prosperous future for retail druggists who decline to become worried and who use their best efforts to improve their stores, amplify their attractions and satisfy their patrons. The jobbers were doomed by some people more than three years ago, but their convention has shown that they are now on a more secure footing, on a better foundation, than ever before, that is, of course, for the progressive ones; but even the unprogressives do not seem to have suffered much, for there was only one failure of a member of the N.W.D.A. during the year, with a couple of mergers of small concerns, leaving a net membership of 276. There is a great big illuminating object lesson for retail druggists in the convention of the wholesalers.

THE INSECTICIDE ACT OF 1910.

Rules and Regulations for the enforcement of the Insecticide Act of 1910, which becomes operative on Jan. 1, 1911, had not been made public when this issue of the ERA went to press. This duty rests with the three secretaries who are charged with similar duties in connection with the Federal Pure Food and Drugs Act. The Insecticide Act greatly resembles the law just mentioned and so far as applicable the provisions of the same are applied to the manufacture, sale or transportation of adulterated or misbranded paris greens, lead arsenates, other insecticides, also fungicides, and for regulating traffic in these products.

Until the rules and regulations are ready the merchants affected can do little or nothing in the way of preparation for the observance of the law, for the sort of labels to be required, etc., is purely problematical. In view of the delay it would be only reasonable to provide in the rules for an extension of time for the enforcement of the same. The secretaries could not well extend the time fixed by Congress to make the act effective, but it would be quite within their moral rights to give the manufacturers and others concerned sufficient opportunity to comply with the requirements of this legislation.

REGULATION VS. LEGISLATION.

Chief Justice Clabaugh's decision in the celebrated antikamnia suit in the Supreme Court of the District of Columbia is of much more than passing consequence, for it takes up the subject of the delegation of legislative powers by law-making bodies. The court holds that Congress while it had power to give authority to the three cabinet officers to make regulations for the administration of the Pure Food and Drugs Act could not delegate to them the right to take legislative action. When this board undertook to compel the litigating corporation to name on its labels the parent substance of a derivative, as provided in Food Inspection Decision 112, the board was going into the realm of legislation, as distinguished from regulation, according to the court. This is a very nice point and emphasizes the danger of administrative officers exceeding the authority given to them to enforce laws.

Unless the Government appeals the case to the United States Supreme Court and obtains a reversal, the acetanilid provision in Decision 112 is void. In this connection much favorable comment has been made regarding the fight for a principle which was made by Frank A. Ruf, president of the Antikamnia Chemical Co., who, while willing to label his product in conformity with law was not willing to submit to what he considered an illegal law. In general the test is of importance as drawing a line between regulation and legislation and forms an important precedent.

DELEGATING LAW-MAKING POWERS.

In connection with the antikamnia decision at Washington there can be found some parallels in this State. One of the chief objections urged in some quarters against the old Board of Pharmacy was that it was a private body, to which the Legislature could not delegate police power. This point was never finally adjudicated, as it probably would have been had not the old board been superseded.

The morphine ordinance enacted by the New York City Board of Health has some similar characteristics and following precedent in the antikamnia suit the courts would hold that the board had no right or power to pass it. In this case the Sanitary Code corresponds with the Pure Food and Drugs Regulations. The New York Legislature at its last session considered the morphine question and took legislative action. It would be sounding a far cry to imagine that the Legislature would delegate power to a city board that would enable the latter within the year to upset its own enactment of law. That the morphine ordinance is legislation, not regulation, is perfectly obvious from the fact that the Legislature at its last session made it the subject of legislation. If this view should prevail the courts could take no

other course than to throw out the morphine ordinance should it be carried to them for test purposes.

It is to be regretted that the board should take such ill-advised action, for the upsetting of any of its ordinances in court would reflect unfavorably upon its work generally, as the public would have less respect for its edicts and officers, thereby lessening its influence.

SUBSTITUTION IN FRANCE IS FRAUD.

According to advices from France substitution and misbranding by pharmacists are quite as much under the ban as in this country. At Amiens, in the Department of Somme, a pharmacist was recently condemned to pay penalties to an association of druggists for having sold as syrup of ipecac a quantity of that drug to which had been added tartar emetic. The court sustained the right of the pharmacists to maintain an organization for the preservation of a high professional standard and declared that they had an indisputable moral interest in prosecuting offenders against their ethics. As to the offending pharmacist he was quickly convicted of fraud and penalties were assessed accordingly.

They do some things in France differently than we do, but, after all, the instinct, purpose and standard of the good druggist are the same all the world over, regardless of habitat, language or other conditions.

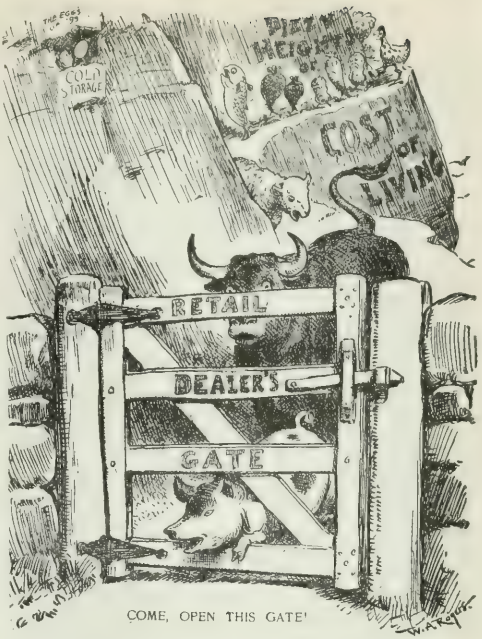
NO SUBSTITUTE FOR THE U.S.P.

Among other changes made in the new rules of the New York State Board of Pharmacy, recently approved by the Regents of the University and printed on page 1185 of this issue of the ERA, is one which provides that—

> Every pharmacy and drug store shall own and have on file at all times the eighth decennial revision of the Pharmacopœia and the latest edition of the National Formulary, and no registration certificate shall be issued a pharmacy or drug store till it complies with this rule.

The old rule omitted the National Formulary and in relation to the Pharmacopœia provided that a store might have on file the "Pharmacopœia, or some other publication embodying its text in full." It is evident that the new board intends to see to it that the drug stores of the State are fully equipped with these two standards of pharmacy. As a matter of ethics no rule ought to be needed to regulate a matter of this nature. As well might we have a law requiring all churches to possess a copy of the Bible.

Druggists as well as other people are interested in the problem of the high cost of living. At the November election this issue no doubt was paramount with many of the voters and the reversal of parties seems to have been popularly attributed more to that cause than to any other. Even the meat barons apparently recognized the fact, for, following the election they made reductions in the wholesale price of that commodity. The retail butchers, however, in many cities would not reduce their prices, which was the occasion for the cartoon reproduced on this page from the New York *Herald*, thus justifying the claim of the wholesalers that the high price of meat was due to exorbitant demands of the retailers. Druggists generally have not advanced their prices in consonance with the increases in meats and other food products



COME, OPEN THIS GATE!

a fact which is overlooked by the public, but which ought to go to the credit of the druggists.

That the efforts and energy put forth in behalf of the profession of Pharmacy by the late Prof. Hallberg are fully appreciated is made obviously evident by the recognition shown in the form of resolutions of sympathy and regret which are being passed by pharmaceutical bodies in all parts of the country. Dr. Stewart's tribute to the late educator and editor, printed on page 1174, will be read with interest as reflecting some views of Prof. Hallberg not treated by others who have lamented his untimely departure from this life. Summed up it is said of him: "His policy was favorable to professional pharmacy, practiced in co-operation with the medical profession, as opposed to commercial pharmacy carried on as a separate vocation in competition with physicians." Truly a position most ideal in its nature!

Efficiency in service to its members is disclosed in marvelous degree in the report of the proceedings of the National Wholesale Druggists' Association. A syllabus, if we may use the term, is printed beginning on page 1211, but as a matter of fact every one of the papers offered, much of the extemporaneous discussion, as well as other incidents would be worth while for retail druggists to read, but it is a physical impossibility to print all of the proceedings in one issue of the ERA, without neglecting many other things. What we do print is the clarified cream and there is in it all a justification for President Martin's strong plea for even better organization. It affects retailers more than wholesalers, for the latter have little opportunity to improve upon their present effective machinery.

Henri Durant, founder of the International Red Cross Society, had a checkered career. It seems impossible that a philanthropist of his great usefulness should have had to spend part of his life in a poorhouse, but to the credit of his fellow-citizens this neglect was remedied before it was too late. Recognition of his worth to the world also was belated, but was made prior to his death.

BOOK REVIEWS

A TREATISE ON PHARMACY for Students and Pharmacists. By Charles Caspari, Jr., Ph. G., Professor of the Theory and Practice of Pharmacy in the Maryland College of Pharmacy, Baltimore. New (fifth) edition, thoroughly revised. Octavo, 827 pages, with 230 engravings. Cloth, $4.25 net. Philadelphia and New York: Lea & Febiger.

Professor Caspari has seized the opportunity presented by the passage and enforcement of the National Pure Food and Drugs Act, the adoption of the National Formulary as a standard under this Act, and the revision of the Pharmacopœia at the recent U. S. P. Convention, to revise for the third time his Treatise on Pharmacy. This standard text book is divided, as previously, into three parts, the subjects of general pharmacy, practical pharmacy and pharmaceutical chemistry, each being treated in turn. Part I includes the study of weights and measures, specific gravity, the application and control of heat, mechanical subdivision of drugs, methods of solution and separation, etc.; part II is devoted to the official galenical preparations and the many operations of the dispensing counter, and part III is confined to official compounds or those of special interest to pharmacists.

The author has given more attention in this edition to N. F. preparations, their character and composition, and considerable space has been devoted to changes authorized by the recent Pharmacopœial Convention. The great value of Professor Caspari's work has long ago been proven by its adoption in many of the pharmaceutical institutions throughout the country. It is undoubted that its revision in accordance with recent momentous departures in the profession will greatly facilitate the student in coping with pharmacy as the law requires that it shall now be practiced.

ANNUAL REPORT OF THE RECENT ADVANCES IN PHARMACEUTICAL CHEMISTRY AND THERAPEUTICS. Volume xxiii, 1902. E. Merck, Chemical Works, Darmstadt, 1910. 281 pages, paper.

E. Merck's Annual Report, 1909, contains an exceedingly instructive chapter on Serum Therapy and bacteriotherapeutic preparations in which the desirability of human immunity to diseases and poisons is interestingly enlarged upon, and the most important curative sera are described and their therapeutic applications explained. A short chronological reference is made in this chapter to tuberculin preparations. The remaining portion of the report is devoted to the usual comprehensive review of methods, observations and literature pertaining to preparations and drugs, and to an extensive bibliographical index and index of authors.

MEDICAL CHAOS AND CRIME. By Norman Barnesby, M. D. 12 mo. 284 pages. Cloth, $2 net. London and New York: Mitchell Kennerley.

The followers of osteopathy, Christian Science, mental suggestion, drugless therapy and kindred beliefs and fads will delight in the perusal of "Medical Chaos and Crime," for they can see their ranks swollen by the astounded and horrified laymen, or rather, laywomen, who will assimilate with avidity the grewsome recounting of the many alleged inhuman practices of the medical profession. If of a sufficiently credulous train of mind, he or she will doubt the average practitioner after reading Chapter I, "The Reign of Greed." After Chapter II, "'Ethics' Real and Criminal," and succeeding chapters, that old friend, the family physician, will be indicted of any manner of horrible crimes. The book, bristled and an able candidate and be read for any patience find. Nevertheless, there is much that is good in this book. Chapters V and VI constitute an excellent defense of and deride many of the foolish arguments advanced against vivisection. Malpractice in cases of appendicitis, and other more serious disorders, for which it has succeeded success upon the article to operate, whether or not necessity demands or the law and humanity forbid, is touched upon in several chapters. Some of the subjects De Barnesby discusses are vivisection at the cost of human life, the unwarrantable cruel, universal outrages and the surgical toilet, the needless anæsthetic, crimes against posterity, hospital abuses, etc. If the author had quoted the *Journal of the A.M.A.* and other medical authorities less, the impression left by this book on the reader not impelled by mere morbid curiosity could be regarded as negligible by the profession attacked and the accusations dismissed as the extreme opinions of an unsuccessful practitioner.

Dr. Barnesby favors the establishment of a National bureau of health, having under its supervision each of the state health authorities. State health boards should have under their guidance, supervision and jurisdiction the numerous city health boards of their respective states. The National bureau would exercise jurisdiction over all medical education, regulate medical requirements, examine all graduates, have the right to issue and revoke licenses, etc, etc. Pharmacists accustomed to criticize the medical profession from their own point of view will be interested to learn from "Medical Chaos and Crime" how it is looked upon by one of its own number

Economy or "The Joy Riders."

We are very much interested in an essay by L. G. Blakeslee, of the Mallinckrodt Chemical Works, St. Louis, and a well-known member of the American Pharmaceutical Association, on "Economy or 'The Joy Riders,'" a subject pertinent to the day. In this essay, which has been published in pamphlet form, Mr. Blakeslee explains that articles on economy and national and individual extravagance appearing in our great commercial and financial journals, do not, as a rule, reach the so-called middle class, and to this class he addresses his argument. Mr. Blakeslee says:

"'Joy-riding' is an expression that usually conveys to the mind a party of young people in a large car riding swiftly, and recklessly, through our parks and streets without a thought of their own safety or that of others. Sometimes these expeditions are halted by a sudden collision with a post or street car with more or less serious results, and the fragments are then simply gathered up * * * to make room for another party following swiftly in their wake."

The great middle class of this nation, the author seems to think, is on an economical joy ride and sooner or later there is surely coming "a day of settlement." Particularly, does he point to the greatest extravagance of the present age, the automobile, for which this year, according to a leading financial journal, was spent $700,000,000, and because of this deflection of capital several of our railway companies have been recently obliged to sell their bonds in foreign countries. Aside from this tremendous item of expense, the desire for ostentation and display is largely responsible for much of the discontent prevailing in our society.

"Everybody seems to have a desire to get into the other fellow's band wagon," and Mr. Blakeslee pictures a "procession of band wagons arranged in succession, according to the wealth of the occupants of each; the multimillionaire, of course, being in the lead. Those in the second and succeeding band wagons seem to be discontented with their surroundings and associates and are determined, at all hazards, to get a seat on the wagon next in front of them."

It is thus that Mr. Blakeslee preaches not only the doctrine of economy in the sense in which it is generally understood, but also the doctrine of economy in the form of bodily health, the essential of success and source of human happiness. Pharmacists will find good wholesome advice in this essay which represents much clear-headed thinking. Copies are obtainable through the Lambert-Deacon-Hull Printing Co., St. Louis, Mo.

Short Lengths for Christmas.

By Emma Gary Wallace.

ONE Merchant Prince who began life as a small retailer and rose steadily from rung to rung of the commercial ladder, adopted as a business motto, "You make money by your turn-overs—you lose money by your left-overs." Perhaps this is truer of holiday goods than of any others because people are very likely to desire something for a gift with a distinctly Christmasy appearance—and the left-overs become hopelessly unseasonable the twenty-sixth of December and are quickly spotted as old stock if brought forward another year.

For this reason it is economy to have the decorations suggest the festive season rather than the goods themselves. In the very unusualness and lavishness of the holiday trims there is a suggestion to buy and to give that would be difficult to convey by means of the goods alone. The decorations need not be expensive if they but show good taste and careful arrangement.

Feathery evergreens strung loosely, or crepe paper cut into narrow strips the length of the roll, with ruffled edges and the strand twisted, give the mass of green coloring the eye expects. As an effective novelty dozens and dozens of gold stars may be used in place of the customary combination of red and green.

The making of these stars would be no more than an evening's pleasure for a merry crowd of friends at "the house." The stars should be of three sizes, three, four and five inches across respectively. The foundations may be cut from bristol board or thin pasteboard boxes and the foundation covered with gold paper or gold paint. It is wise to have a number finished on both sides. The stars may be artistically placed among the greenery, here and there above the fixtures and in the window.

Few Good Holiday Windows.

Speaking of the windows, calls to mind the notable Christmas windows of the past. There were some that were the acme of the window trimmer's art and they attracted attention; some that fascinated by ingenious mechanical devices, but few that appealed to the shopper and sold goods as they should have done. The elaborate arrangements come hazily back to mind but their selling connection with the goods or what the goods were has faded entirely. Simplicity is preferable to over-elaboration and the skillful showing of salable goods to contrivances of a vaudeville nature which collect crowds but do not succeed in selling goods.

A simple and beautiful display-base for a window may be prepared by fitting some light boards together sufficient to cover the surface. Coat the boards with a thick paste and arrange crumpled white paper over this so that the edges adhere to the paste but form an irregular and "mountainous" surface elsewhere. When dry paint the whole over with any desirable shade of water-color paints—possibly green to represent grass or blue to suggest water and waves. Touch up the little hillocks or wave crests with dashes of gold or diamond dust.

Before beginning this decorative work, however, it is necessary to decide what goods are to be displayed and to outline with a pencil the places they will occupy. These places can then be left flat or nearly so, that the goods may have a firm foundation. If a background is required an appropriate stencilling design is easily prepared. It may be conventionalized forms, green trees, bare brown trees, or a rocky bluff. This too, makes interesting work for the women in the home who are anxious to help.

A display of stationery supplies, with the terse card—

On land or sea,
Please write to me!

points to the future use of the articles. Or a display of perfumes bearing the sentiment—

All the way from old Cathay
Fragrance rare for Christmas day!

Or a camera assortment saying—

Upon my films the sunshine stays
Of happy, care-free, joyous days.

* * * * * * * *

The Expense Account.

The amount of money spent for useless Christmas presents is appalling. Lots of it is mere trash that the recipients would have been as well without and the givers a deal better off with the money in their pockets. Too often presents are made out of a sense of obligation and with a frantic desire to discharge it in the least troublesome way. Every year sees less and less of this sort of thing fortunately. People are coming to regard the cluttery purposeless gift with suspicion and to favor practical ones both in giving and receiving.

This is the natural swing of the pendulum. In years not long past, when many of the readers and the writers were in the hey-day of childish anticipation a few beautiful cards setting forth carefully read and cherished mottoes, some simple gifts and another one on the Sunday School Christmas tree gave as much pleasure as the child of a later day felt in a surfeit of everything that could be procured. It was then that people awoke to the knowledge that "The gift without the giver is bare," to the realization that a genuine outpouring of love in the form of a Christmas gift should entail no obligation except that of sincere appreciation.

The Practical Expression.

What percentage of the holiday trade of his neighborhood can the druggist reasonably hope to gain? That all depends on how hard he goes after it. Yes, the locality may have something to do with it, but not all—not all. Some one has said that heredity should not handicap us, as that is only the beginning. Education and our own aim and ideals are the continuation and the end. The same way with business. The heritage of a given locality is but the beginning, the development and general business campaign are the continuation and the end.

Every person in the community uses soap. It may not have occurred to the confused shopper that a box of pure soap daintily wrapped is infinitely preferable to a lace gew-gaw that will fall apart in the first washing. A bottle of liquid soap and a small roll of absorbent gauze for face cloths—to be discarded after use—in a dainty case, is a joy and a sanitary safeguard to the traveler as long as they last.

Suggestive lists used in store posters or newspaper advertising will help many to decide on something that has a real value because it is useful.

Lists for Father, Mother, Brother, Sister, Sweetheart, Traveler, Student, etc., can be made out. Do not restrict father to a safety razor alone, or mother to a bottle of smelling salts. Make the list so comprehensive that it will hold something every mother will want from the wife of the Congressman to the washerwoman.

Some of the women folk of the druggist's household would like no better fun than to canvass the stock and make out lists that would appeal to everybody from the tired dressmaker who only has evenings in which to look about to the wondering man who frenziedly asks himself, "What on earth can I get for Sue and Bess and Jack. Let me see, they have hosts of things for everybody down at Wide Awake's, I'll go there and I'll be sure to get quality stuff that will fit every case without the fuss of chasing around and being elbowed and crowded on every side."

A Nice Custom.

A pleasing practice is to enclose in each Christmas package a neat card folded once. Of course it must be on fine stock and the work executed in a creditable manner. A deckle edge is desirable. The card for this purpose is usually about six inches long with two of these inches used as a left-hand fold. The width may be as desired but from two to two-and-a-half inches makes a symmetrical proportion. On the lap so that it shows when folded is a dainty spray of holly and the words "Christmas Greeting."

On the main body of the card appears these words:

Dear Friend:—

You have been so kind as to favor us with your custom today. Thank you.

We hope to keep it all through the year by meriting it and your confidence.

If what you have purchased today is not perfectly satisfactory, do not hesitate to tell us. We are here to stay and we wish to please you. Very truly,

THE WIDE AWAKE DRUG CO.

People will read these cards, be pleased with the thoughtful courtesy shown and be sure to come back.

A Means of Demonstration.

At this season of the year the bazar of all kinds is in its glory. Church Aid Societies, Clubs, etc., have fairs to raise

money because they know that people are in a buying mood.

No better means need be asked for to demonstrate one's own make of toilet goods, than by donating a reasonable quantity to each sale that has a worthy object in view—provided such sale is within your purchasing territory.

A card of presentation, accompanying such goods, bearing the firm name will usually be given a prominent place without any especial request to have this done, and later steady customers are sure to be gained if the articles donated were meritorious.

The Christmas Spirit.

There is a peculiar kind of glass called "platinized glass" which if backed with an opaque substance has the appearance of being a powerful mirror but when the light shines through it, is perfectly transparent.

It is prepared by coating a piece of glass with a platinum-charged liquid and then raising it to red heat. The union forms this odd kind of mirror.

If it were within the power of any one person to give all the rest of the world a Christmas present of lasting value, the gift of a mirror so constructed that each could see himself exactly portrayed would or ought to make this world a better place—for it would bring each face to face with the truth concerning himself.

Some would gain immensely in self-respect—for what had been credited to timidity and failure to make good would be revealed to be an exercise of right principles, while others who had regarded themselves in a complacent light would be shocked to discover a reflection which showed a pandering to self-esteem and self-seeking.

The power of keen self-analysis is a wonderful gift but analysis of any kind must have a standard up to which to measure and what better standard can we find than the One whose birthday we celebrate on the 25th of December.

As the years go past more and more swiftly, we appreciate our opportunities—our shortcomings. In work and in play, in business and in pleasure let us give the best of ourselves.

Better a handicap and a smile of genuine welcome than a grudgingly given necklace of pearls. Better a letter of kindly greeting and helpful appreciation than a bridge of silence.

This December will never come again. For some, another one may not dawn. Then let us sound the message from hill-top to hill-top so that all may hear—Peace—Peace—on this grand old earth. Good will. G-o-o-d W-i-l-l to all men.

May the closing weeks of the kind old year—the patient, just, old year be fraught with quiet joy—with a retrospect tinged with no remorse and may it be imbued with the strong courage for a new record—the record of an untried new year.

The Patronizing Lady.

The door opened and the Patronizing Lady advanced slowly into the store. Her countenance was luminous with an expression of pleasant anticipation. The clerk looked at her inquiringly.

"Is the proprietor of this Apothecary shop in?" she asked blandly.

"He is," the clerk replied, "but he is very busy this morning."

"I am glad to hear it," she remarked agreeably, "when a man is busy he is prosperous. I shall detain him but a short time. Ask him if I may see him privately on a matter of business."

The clerk disappeared.

"Step this way," he said a moment later.

The Patronizing Lady walked into the office-laboratory.

"Good morning," she chirruped, "I suppose you will be surprised, but I am selling stocks, and I thought I'd give you one of the first chances to get some gilt-edged stock for almost nothing. I have been a good customer of yours now for several months and everybody knows there are big profits in the drug business, so it sort of looked to me, as if it was almost a duty of yours to patronize me. Of course I wouldn't ask it, if it wasn't an exceptional opportunity to get rich immediately, if not sooner. No sort of need waiting two or three years before you begin to roll in wealth, just buy a few hundred shares of Blue Jay Mining stock and you'll fly high in no time.

"No, the stock is not listed. It isn't necessary to list as good stock as this with me and Jim a-sellin' it. Jim, he's my partner, you know, and he is right on the board of directorates. All you have to do is to pay me the money, say five hundred dollars that will buy a lot, as it is only ten cents a share at present, but it is liable to go soarin' skyward any minute—and I'll write you a sistificate. Jim says they are the prettiest sistificates he ever saw. I've got some right here. They are handsome enough to frame. It's touchin' to think of you toilin' away here, perhaps three or four years to get rich, and such wealth being dug right out of the bowels of the earth."

The Patronizing Lady mopped her ample brow, and unrolled a large chromo-like affair. A dark brown hole represented the mouth of the gold mine, beside which lay an immense pile of nuggets as big as oranges, labelled "virgin gold." Upon the pile of nuggets perched a villainous looking bird of brilliant plumage.

The morning was dark. Back of the proprietor's chair the sliding door that led into the poison closet stood open. In the wall of the poison closet was a window, and the man of drugs leaned back in his chair to get a better light on the promise of wealth that he held in his hand. A wintery smile flickered across his countenance. The Patronizing Lady saw it, and considered him as good as landed. It *was* easy to sell stock.

"It is the chance of a life-time," she urged enthusiastically, "and you are a rich man if you buy Blue Jay; just look at that gold! Somethin' says to me, 'go right over to the Apothecary Man,' may be it was the whisperin's of your destiny. I tell you, you are a rich man if you take your chance," and in her zeal she hit him an emphatic blow on one knee.

The center of gravity of the chair suddenly changed, and it careened wildly on its hind legs, and then lunged viciously backwards. One of the projecting upright chair-posts caught in the groove of the sliding door, and fenced in by the chair arms, the man was helpless. Possibly in the sudden journey he had been called upon to take so unexpectedly, he struck his funny bone, but the Patronizing Lady did not stop to analyze the situation. She saw him in an unnatural position, his entire frame shaking convulsively and his face apoplectic in appearance.

"Quick, quick," she screamed, "he's a-havin' an awful fit," and seizing a soda siphon that stood near she promptly opened fire with one hand while she fanned him vigorously with the "sistificate" which she had seized with the other.

The clerk rushed in and lent a hand to rescue his employer, and the latter, weak and dripping, was restored to a vertical position.

"All right, are you? Well, I guess you are not. No man is all right who is subject to such awful spells until he has a good block of this stock stored away to keep the wolf from the door in case he becomes helpless permanently. What would you do in such an emergency? Don't want any! I am astonished, sir; astonished! Can't see your way clear to buy any now? That, my dear sir, is the effect of the medicine I was forced to apply externally to restore you. Blue Jay's a-goin' up. No doubt about it. Very well, sir, I wouldn't urge you for the world, but I wish to assure you I shall not continue to bestow my patronage on a man who has fits, and who does not know a good thing when he sees it! Good-day."

Pure Food Work and Songs for Chapter 1.

BOSTON, Nov. 21.—The November meeting of Boston Chapter, No. 1, W.O.N.A.R.D., was held at the Vendome last Thursday afternoon, with a large attendance of members. Dr. Charlotte Farrington told of the pure food work of the Massachusetts Federation of Woman's Clubs. Mrs Stokely Morgan read a paper on China and Japan, and Mrs. Sidney V. Rintels sang delightfully a group of songs. Tea was poured by Mrs. C. C. Hearn, Mrs. I. P. Gammon, Mrs. C. H. Davis and Mrs. G. A. Edmands. Mrs. Roxa K. Stover presided at the meeting.

Clergyman Invents a Stamp-Affixing Machine.

Daily Consular and Trade Notes says that a Trinidad clergyman has designed a postage stamp machine that, by automatic action when a proper coin is placed in the slot and the handle pulled, will separate a penny stamp from a roll inside and securely fix it upon the envelope held in an aperture. The machine is about the size of an ordinary typewriter and stamps envelopes, newspapers or circulars at the rate of 4,000 an hour with seemingly absolute accuracy. The machine will hold 50,000 stamps, and as used each stamp is automatically registered.

Assumed Severity.

By Joel Blanc.

AMONG my intimate friends there is a retail druggist who, in his personal and social relations, is a good-natured, whole-souled fellow. Wherever druggists most do congregate, wherever his social pleasures lead him, in his own happy home, his kind words and hearty laughter brighten and vivify all the atmosphere around him. And yet, I know of no retailer who has more clerk trouble or store discord.

Sometime, sometime so far back that he has forgotten when, or, sometime when he was unconscious of it, this man got a kink in his crown in the form of a wrong hypothesis, and that kink has tied knots in all his business life. In spite of his grave error my friend is a very successful druggist; but I know of other druggists who, with less force of character, have made the same mistake and in making it, more than one of them has brought business misfortune upon himself. I have in mind one man who, by making this great mistake of judgment at the time of opportunity in his business career, left a youth of sunshine to spend all the balance of his life beneath the dripping clouds.

And what is this not uncommon error that changes laughter to tears, the sweetness of hope to the gall of despair? It is simply the erroneous belief that responsibility and severity are hand-maidens in business. And no greater mistake did any druggist ever make than to imagine that business demands a severity that is not natural to man.

Not infrequently one may enter a drug store to find the owner cheerfully chatting with a patron, but should a clerk or the boy address the owner upon some ordinary, routine matter, his face assumes a basilisk-like glare and he answers the perhaps trifling question in a manner and bearing that one would expect of a judge sentencing a vile criminal to death.

I have investigated men who labor under this dark delusion and found that they were themselves unconscious of their assumed severity. I have found that all they saw was a reflection of their own manner in others. I have heard such men accuse every employee of being ill-natured, when the fact was that the frigid severity of the employer forced his subordinates to be coldly, fearfully reserved. I have not only found this unfortunate assumption of severity among wholesalers and manufacturers, but I have found victims of it among every class of men with whom I have come in contact.

Now, you, old man, may be an unconscious victim of this self-created injustice to yourself. With you, up to the present time, it may be but a germinating seed growing so deep within the subconscious self as to be but vaguely felt and as yet not clearly seen by those with whom you come in contact. Being aware of the existence of this false growth within the character of any man, you should realize the unfortunate results that follow living such a double life. Your intelligence must surely enable you to understand that none will so severely condemn you for your assumed severity as those upon whom you bestow the smiles of your better, natural self. Surely you must know that it places the brand of hypocrite upon you, because the vast majority of people will say that your dark and seamed side is the natural side and that your bright and smooth side is the assumed, the hypocritical, the contemptible, the cowardly side.

It is not difficult to trace the cause, or rather the excuse for this assumption of severity. The prime cause may be found in the not uncommon fact that the sufferer from this mental malady has himself been the victim of some employer who suffered from it. It is a striking example of those cases which go to prove the saying that the greater the curse the more contagious it is. Then, it not infrequently happens that the young proprietor is unfortunate enough to hire a boy or man with whom severity is absolutely necessary to preserve discipline, and the immature judgment of the young employer leads him to decide that because he has to break one colt with the curb bit he must use it on all.

However, I am going to say something very plain to the younger ones among you fellows who own stores. This self-placed burden of assumed severity is a burden that grows with time as did the burden of Bunyan's Christian in his progress, and it is most often the fruit of the seed of conceit. The first step which many a young man takes within his own drug store is a step from modesty to egotism, from the perhaps cringing humility of a servitor, to that of an employer, and his success has given him an exaggerated idea of his own importance. Blinded by the rays generated by his ego, he assumes that the easiest way to impress an appreciation of his new gilt grandeur upon the world is by sternly lording it over those to whom he pays a weekly pittance. Fortunate indeed is the young employer who carries his assumed severity to the extreme of the ridiculous, for he is laughed out of it. Ridicule will oftentimes awaken where logic only strengthens mental opacity.

It matters but little what shackles commercial practices of the time may place upon the tongue and purse, the mind of man is free. Mental freedom grows so rapidly as to amaze the intelligent observer. This growing freedom, this development of universal intelligence is making clear translations of the one-time enigmatic pages of the book of human nature. We know men as they are, not as they would have us believe they are. The multi-millionaire who a few years ago sat growling in his den and by his gruffness terrorized the financial world, has seen a light. And in that light he has seen a world laughing at him, instead of the world, as it once was, prostrate before him. Some of these powerful personages whose names you can easily call to mind, men who, until within a few years ago, led the lives of recluse kings, have suddenly realized that the world's fear of their scowls has passed and they have come into the open as their natural, kindly, human selves. Whether fear or a newly won common sense has prompted their actions, matters not. Those actions have proved that even for the greatest employers and richest men in the world, assumed severity has been found to be a mighty poor business asset. If it made these powerful men ridiculous, what a buffoon it must make of you.

Do you realize that the word "grouch" has spread like a prairie fire through all lands where the English language is spoken? Have you noticed that while it was first spoken with anger and resentment, it is rapidly coming into use as a descriptive appellation of the man who is to be pitied or laughed at rather than to be cursed? Why is this so? Because the world is learning that a large portion of the ill-nature, gruffness, crankiness, imperiousness and surliness of humanity is but assumed. Scratch a grouch or change his environment and beneath the corrugated exterior you will find the emotional lover, the gentle father, the jolly companion or the physical coward who cries like a baby when the doctor lances a boil upon his neck. Humanity, with its clearer vision sees this other, this natural side. Seeing that in the majority of cases severity is only assumed; having found that the previously supposed thick hide is but a transparent membrane, the world looks through it and laughs. And as the world laughs, it asks "What's the use of it? Why is the fellow making a self-sacrificing, merry-andrew of himself?" Why? Who knows? Even those who temporarily cover the light of their faces with this witch's veil, do not themselves seem to know why they do it!

Wake up pard! Clerks and boys who are worth having, worth training, will move much quicker along the sunlit path of laughter than they can grope along the dark passages of ill-nature. The echo of naturally cheery words is repeated much more often than the echo of verbal thunder. Cut it out; There is nothing in it. In the old Puritanical, fire and brimstone time, when fear ruled, there may have been something in it; but, thank God, that time has passed. Fear no longer rules our religious or social life. Why pretend, for it is only a pretense that assumed severity will scare your store people into doing right. Look at the situation as a man among men. Your business demands the very best that you have to give it. Then you should impress upon it your natural, best self. Assumed severity! Ha, ha! Once it made the world tremble, but now we laugh at it. Drop it out of your life! Help the world laugh at it—laugh the last of it out of existence!

Not Able to Follow in Father's Footsteps.

"When you are grown up," queried the visitor, "will you be a doctor, like your father,"

"Oh, dear me, no! Why, I couldn't even kill a rabbit," replied the boy with great frankness.—*Ladies' Home Journal.*

Bub Gives it Away.

Big Sister—Come, Stanley, do as the doctor wishes. Take your powder as I do.

Little Brother—Then I'll daub it on my face.

ADVERTISING HINTS

FOR RETAIL DRUGGISTS.

Tongue and Elbow Advertising.

THE funny men are still making capital out of the druggist's postage stamp, directory and other free-service advertising. The druggists continue to put in more time kicking about the stamps they sell than they do in selling the stamps. One might kick about this free service work if he had a prominent corner in a great city; but, strangely enough, most of the kicking comes from those who seem to have time to put up a ten-minute howl about each stamp they sell. Two striking instances of the way some retail druggists throw good advertising into the hands of more enterprising competitors have been recently noticed in one of our large cities, the circumstance being more noticeable by the fact that each of the druggists has a prominent city corner.

In the first case the druggist relinquished his branch post office because it was "too much trouble." He even went so far as to suggest that "the news depot" across the street might take the office. The "news depot," which is a first-class news, cigar, stationery and novelty store did take it and since the change, that druggist and his clerks have sent hundreds, possibly thousands of people to the store across the street, to buy stamps—and cigars, stationery, post cards and dozens of other things that the druggist advertises and wants to sell.

Within a mile of the News depot there is another pharmacy even larger. Directly across the street from it is located a large department store. The druggist repeatedly and vehemently declares that the department stores and not the other druggists, are his competitors. When there was a demand for a sub-station in that neighborhood, the authorities asked the druggist to take it. He refused. He said it was "too small a proposition to fool with." But the department store took the office and *advertised* it!

Few people look in a glass without first looking at its frame. Take the illustrations we have cited as extremely vivid frames and then look within them and see if your own minor inconsistencies are not reflected before your mental eyes. If the sale of postage stamps, or providing a directory and similar things are not profitable advertising, it is because of an ill-natured, systemless way of handling them. There is no part of any business which demands such careful thought and system as that which pertains to its advertising. Consider and systematize your free-service features as part of your advertising and you will cut the labor of that free-service in half and double its value. When people have to ask for the directory, it is labor to tell or show them where it is; but when you keep it so that they cannot help but see it, you reduce your own labor to nothing and, by saving the user the labor of asking or looking, you double the advertising value.

In a small railroad town of five or six drug stores there are two druggists who aptly illustrate how to and how not to get advertising value out of cleanliness. As in the majority of small and smoky towns, the buildings soon become soot-soiled and usually remain so. In comparing the interiors of the two drug stores there is little choice—both are scrupulously kept. One of the druggists prides himself upon, and advertises the fact that the exterior of his store is painted once each year. The other fellow, his competitor advertises: "We scrub our store-front once a month." Thirty-six monthly washings save two paintings and cost much less, and all the town knows the washed place as "the clean front store." That's elbow advertising.

Novel Free-Service Advertising.

An Ohio druggist has a motor tricycle for delivery purposes. To any purchaser who may be bearing bundles of [illegible] purchased elsewhere, the druggist or one of his clerks invariably offers to deliver the merchandise, providing it is on the [illegible], at the same time the drug store purchases are delivered.

Work of this character may seem like doing free delivering for rivals. Not at all! It leads the public to demand that the other dealers improve their delivery service, and as many dealers are usually too deaf to hear demands for progress, their very negligence in this direction advertises the man who is obligingly progressive, and that without a demand that he be so.

The News Bulletin.

Another enterprising druggist in a town of about 20,000 has arrangements by which the publishers of the leading paper 'phone him the pith of any important news event as soon as it is received. This news item he at once posts on a permanent bulletin board outside of his store, and between or below the news items he places short, crisp advertisements for his "drives" or "leaders." The publisher secures an advertisement which increases the demand for his papers as soon as they come from press, and for a trifling cost the druggist secures advertising space that is just as valuable as if it was "between reading leaders" in the paper.

The Watering Trough.

In a small town which had previously depended for its water upon wells, a water works system was installed. Some one started a demand for a free watering place for horses. Shortage of money led the aldermen into a seemingly endless squabble over the matter. A druggist stepped into the breach and offered to install a good trough in the "square" before his store, if the town would lay the pipes and furnish the water. His offer was accepted, and every horse-owner in the county became his verbal advertising agent. The iron tablet which is part of that trough stands as the druggist's permanent advertisement. When he paid for the trough his investment was made. The town still furnishes the water, and the druggist is still getting the advertising.

Advertising Containers.

A druggist in a distinctively farming town purchased a few thousand collapsible boxes or "shells," such as proprietary medicine people use for window display. He bought three stock sizes of the shells without printing. From time to time he has printed advertising circulars adapted to the sides of these shells. He has his boy paste these circulars on the shells, which are then given to all who ask for them, as containers for packing small parcels compactly. "Go over to Hustleman's and get a box" is the advice given to many a bundle laden farmer or farmer's wife, and those who "go to Hustleman's to get a box," go to him to get their drugs.

The Rest Room Annex.

One more about the man of the watering trough. The "big store" of his town copied the city fad and fitted up a "rest room" for women. It was a good idea, and the "big" man deserved thanks and praise. However, the druggist noted one thing that had been left out. He fitted up a rest room. It was smaller and less luxurious than that of his "big" brother; *but* he took advantage of the newly installed water system and added a ladies' lavatory and toilet that the other fellow had forgotten. Ask your wife what that meant to every woman who drove into town and you will appreciate the advertising value of that free-service.

Suggestions of Environment.

The watering trough and rest room illustrate how environment and local changes may suggest valuable mediums for free-service advertising. Study up local conditions and home people. Find what is lacking in public conveniences, personal comforts and commercial courtesy in your town as well as within your own store, and then supply as many of these things as your circumstances will permit. A hitching post and carriage step may land many people in front of your store and many dollars within it.

Two of the biggest kicks druggists make are about free service at home and money going to the big stores or entirely out of town. There are many who would do well to take some of the time spent in complaining and look into the free service given by the big stores of which they complain, even though they must take a railroad trip to make the inspection. The free service which the average retailer treats as an unavoidable curse is considered by the great and progressive rivals as a welcome blessing—and it is mighty good advertising!

Had to Live up to It.

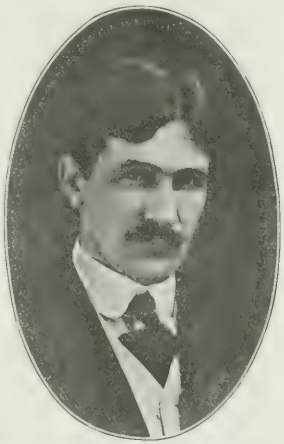
"Your novel is evidently the result of inspiration."

"Yes; I didn't start it until after reading the advertising notices my publishers got up."—*St. Louis Star.*

Some Pharmacy Not Taught in Schools.*

By P. Henry Utech, Ph.G., Meadville, Pa.

THE practice of pharmacy has been variously defined as an art having to deal with the identification, general characteristics and preparation of drugs, together with a knowledge of materia medica, pharmacognosy, pharmacology, chemistry, etc. Having mastered these, many persons engaged in our profession believe themselves perfectly capable and amply qualified to successfully conduct a retail pharmacy without any further application, investigation or personal effort. Neglecting the principle that pharmacy is no less a science than an art, they mistake the means for the end itself. Neglecting to apply the knowledge at their command toward the solution of the many problems which arise from day to day they devote their leisure time bewailing the shortcomings of present day pharmacy and enlarge upon the fact that the good old days of profit and plenty are gone never to return. Laboring under this delusion and investing a minimum of effort in their work, they receive scant pay in return. Fortunately, however, such pessimism is not over prevalent among our clientele and therefore need give us no serious cause for alarm. To the wide awake conscientious pharmacist in love with his vocation and who is giving to it the best that is possible—who is utilizing to the best of his advantage the tools at his command in the form of intellectual equipment and opportunity—to such a one the world pays large dividends in sterling coin named, material prosperity, a measure of security and an abiding satisfaction in having done well whichever one's hands find to do. The sage of East Aurora, Elbert Hubbard, aptly says "the business man who can't get an education out of his work while engaged in it is immune from the microbe of success." To those of us who are still attending the great school of experience there is a constant eagerness to penetrate the more intricate problems that arise in the daily routine of work, which is exceedingly fascinating. To the interested worker each operation whether it be the manufacture of a preparation, the determination of an analysis, or the compounding of a prescription, presents new conditions calling into play all the latent knowledge and faculties at our command. Indeed, few other professions call for such an extensive knowledge of miscellaneous information as does our noble profession of pharmacy. Physicians and laity alike have somehow come to regard the pharmacist as a *vade mecum*—a court of last resort, as it were.



P. HENRY UTECH, Meadville, vice-president Pennsylvania Pharmaceutical Association.

No matter what his aims may be, the pharmacist cannot reasonably expect to retain all the information he digests from time to time and it is the purpose of this paper to present to you at this time some of the notes and observations which were gathered en route and which have been of practical utility in daily store experience. It is not claimed that these notes are all original, but were merely collected from authentic sources, tested, tried and not found wanting.

I first call your attention to a few hints regarding suppositories. Our Pharmacopœia suggests several methods and several different bases to be used in making suppositories. Of the bases glycerinated gelatin is seldom employed in retail practice, and hence will not be commented upon. Another, insoluble soap—forms the base of one suppository only, viz., that of glycerin. Both of these are directed to be made by the hot or molded process. The other base, cacao butter, appears to be the only one that is universally employed, approaching more nearly an ideal vehicle for the purpose. The physical constants given for the oil state that it should be brittle at 59° F. and completely liquefied at 86° to 95° F., and it is because of this peculiar characteristic, *i, e.*, the temperature of liquefaction and solidification being within such narrow limits, that this substance is so admirably adapted for the purpose; in fact no other single substance or combination of substances has yet been dicovered which supplies so many desirable requirements.

With reference to suppositories made of this substance, two methods are suggested, first: that of mixing intimately the medicinal ingredients with grated cacao butter and adding sufficient expressed oil of almond to make a plastic, pliable mass. In our experience, we have had excellent results from the use of lanolin as well as petrolatum as an excipient. The second method, known as the hot or molded process, has many decided advantages. Suppositories made in this manner dissolve at a much lower temperature and are therefore much more quickly effective than when made either by hand or by cold compression in the regular way. Another point is this: the repeated heating of cacao butter causes rancidity within a very short time.

Papers enough to fill a large volume have already appeared on the syrups of the United States Pharmacopœia. One writer criticizes a formula, another finds it faultless; another has difficulty in preserving properly, and still another finds some unlooked for chemical interaction, as in the case of the compound syrup of phosphates, which results in an unsatisfactory product; and then to counteract all these different complaints the chairman of the present Revision Committee comes out boldly and declares the syrups of the Pharmacopœia to be the most permanent and elegant preparations in the book. "If made according to official directions and kept in proper condition," he says, "they are perfect products." So now you may have your choice of opinions. Following are some of the precautions to be observed if superior results are expected. Much of the difficulty is in having sugar of inferior quality. The brands known as "Crystal A," or "Confectioners A" give most excellent results. Though costing a trifle more, the economy is considerable. The sugar must be free from moisture, made with distilled—not sterilized—water, and the container previously sterilized, that's the whole secret. Syrups not thoroughly saturated are also much more liable to fermentation. With regard to preserving medicated syrups, considerable precaution is necessary. The ordinary light of the store will render syrup of wild cherry entirely devoid of taste and odor within a very few months.

Syrup of hypophosphites occasionally gives trouble, due to insolubility of the calcium salt. The present formula is an improvement over the one formerly official which made a product of greater density. By omitting a part of the sugar, the difficulty was partially overcome, but a basic calcium salt appears to be deposited on long standing. The addition of a few drops of dilute hypophosphorous acid prevents this trouble.

In preparing emulsions of castor or any other fixed oils by incorporating powdered castile soap in the proportion of 1 gram to each 30 cc. of oil it is possible to make an emulsion holding in suspension as much as 50 per cent of oil. In the case of castor oil emulsion it is also said that the aperient action of the soap increases the efficacy of the finished product.

You have doubtless all observed the coloration which occurs somewhat quickly in solutions of eserine salts. This has been attributed to the action of light and oxygen, together with the alkali found in the glass container. By coating the inner surface with paraffin, including a thin layer or film of the same over the surface, and by keeping the solution in a dark closet this difficulty is obviated in large part. When wanted for use, an eye pipette is used to penetrate the paraffin layer and to draw out as much of the solution as is wanted.

In compounding prescriptions for eye ointments, we generally use the variety of vaseline which is supplied in collapsible tubes because of its greater purity and sterility. In order to distinguish eye solutions from other solutions and as a precaution against possible error through carelessness on

*Paper read before the Pittsburg Branch of the American Pharmaceutical Association.

the part of the patient, a special sticker marked "for the eye" is attached in a conspicuous place on the front of the bottle.

Chloroform water when freshly prepared is a very excellent preparation, but unfortunately it is exceedingly unstable, being affected by both heat and light. The addition of about 4 per cent of alcohol insures a product which will keep indefinitely.

We have all experienced considerable trouble in keeping satisfactory solutions of potassium iodide, the objection coming from the liberation of free iodine which, in turn, forms the iodate, even under normal keeping conditions. The use of a copper still in preparing distilled water is also given as a contributory cause. This difficulty may be overcome in large part by the addition of .2 per cent of sodium thiosulphate.

The operation of benzoinating lard, in my experience, has always been more or less unsatisfactory, due to the heat agglutinating the benzoin into a plastic mass. This difficulty may be overcome and a much more satisfactory product obtained if the benzoin be first coarsely comminuted and mixed with an equal quantity of anhydrous sodium sulphate, which prevents the formation of the gummy mass on heating. The finished product can be strained in the regular way.

An ointment base capable of absorbing large quantities of light oils such as olive, gaultheria, etc., can be made of equal parts of beeswax and lanolin. The proportion may be modified to meet different requirements. Used in the proportion suggested, as much as 50 per cent of methyl salicylate may be incorporated without liquefying the base.

An ammonia liniment possessing superior advantages to the one now official is made by mixing sesame oil, 75 parts; ammonia water, 25 parts. This preparation can be made instantaneously, is snow white, perfectly homogeneous, does not separate on long standing, and is less irritating than the U.S.P. preparation, because less alkalai is employed.

Having considerable sale for Fowler's solution for veterinary practice, we were for a long time under the impression that the official formula was faulty, because our finished product was always more or less turbid and never of a clear reddish color. On following the official directions we found that the formula was right and we were in error. The coloring principle in the compound tincture of lavender is santalin, which is resinous in character. By adding the tincture to the hot solution the resin is precipitated, causing the trouble referred to.

The commercial manufacture of artificial camphor of U.S.P. quality seems a possibility of the near future, in fact, two foreign firms—one in London, another in Germany—are marketing an article of excellent quality at the present time.

The exorbitant price which this commodity attained a few years ago furnished the required incentive for perfecting the process. I take pleasure in exhibiting a specimen of this artificial camphor which has almost every physical and chemical property of the natural product, but which like all organic synthetics, is optically inactive. This specimen was made from turpentine indirectly, by what is known as the borneol process after the method of Prof. A. Behal, the famous synthetic chemist.

Lloyd Library Receives Large Tract of Land.

According to the November *Eclectic Medical Gleaner*, Curtis G. Lloyd and Prof. John Uri Lloyd and his wife, Emma Rouse Lloyd, have deeded to the Lloyd Library a tract of 93 acres of land, located at Crittenden, Grant County, Ky., for a botanical and ornithological preserve. Upon it, says the *Gleaner*, still grows one of the primitive forests, never cut by an axe, and in it is to be found an unusually wide and varied distribution of native shrubs and plants. The gift will be maintained as a natural park, for the benefit of the public. Provisions are being made for increased acreage, in which an arboretum of shrubs and botanical plants will be established.

Arizona Now Has a Pharmaceutical Association.

PHOENIX, Nov. 20.—At a recent meeting here of druggists from various parts of the territory, the organization of the Arizona Pharmaceutical Association was effected and the following officers were elected:

President, Harry Jelinek, Prescott; first vice president, E. J. Mathews, Tempe; second vice president, H. M. Cate, Florence; third vice president, M. V. Hunter, Flagstaff; secretary-treasurer, R. F. Evans, Phoenix.

Carl Svante Nicanor Hallberg.*

An Appreciation.

By his friend and classmate, F. E. Stewart, Ph.G., M.D.

OUR meeting this evening has two objects. We are here to honor the memory of Professor Hallberg, and to discuss the future of the new *Journal of the American Pharmaceutical Association*, of which he was to have been the editor. It is therefore permissible to consider these two objects together.

I have been requested to present a memorial paper in honor of Professor Hallberg, as a classmate and lifelong friend. At the last annual meeting of the American Pharmaceutical Association, the subject of earnest consideration by us both in long conference was the new journal. Professor Hallberg and I were in harmony, and I believe what I now have to say would be approved by him if he were here to listen.

Professor Carl Svanté Nicanor Hallberg, whose life record was an inspiration to many a young man entering pharmacy, has closed his earthly career, and we are here to honor his memory, and consider some of his achievements, that we may profit from his example.

Dr. Hallberg was born in Sweden, Oct. 13, 1856. He joined the A.Ph.A. in 1879, and the Illinois Pharmaceutical Association in 1881, and served both associations faithfully as an officer and a private. He became a member of the A.M.A. and served as secretary of the Section on Pharmacology. He was also a member of the Council on Pharmacy and Chemistry of the American Medical Association.

For years Hallberg fought the pharmaceutical manufacturing houses, believing that every pharmacist ought to make his own galenical preparations. Yet, he became a manufacturer himself and conducted a business at wholesale, therefore apparently violating the principle for which he had so strenuously fought. If you had asked him to explain his seeming inconsistency, he would probably have told you that he was not opposed to the supplying of manufactured products by licensed pharmacists to other licensed pharmacists, but he was opposed to the invasion of the pharmaceutical field by unlicensed practitioners. His ideal of a manufacturing house was exemplified by Dr. E. R. Squibb—an expert who practiced pharmacy at wholesale as a professional vocation, not solely as a commercial business.

A member of the Committee on the National Formulary since its formation in 1886, Professor Hallberg contributed largely to its first edition, and doubtless did his share of work on subsequent editions. A delegate to the Pharmacopœial Convention of 1890, he went to the meeting and fought on what he believed was the side of the retail druggist against the manufacturers in opposing the extension of galenical standardization.

He was elected a member of the Committee on Revision, and chosen a member of the sub-committee on pharmaceutical preparations, and served his constituency well. But before the next convention was called, ten years later, he had learned that standardization is the foundation stone of professional pharmacy, and that opposition to standardization on the ground that it raises manufacturing above the reach of the retail druggist means sacrificing humanity to commercialism.

Professor Hallberg had learned the important fact that public welfare demands that the true value of every therapeutic agent, including its untoward effects, limitations and comparative worth in relation to other agents recommended for the cure of the sick, should become matters of scientific record. In regard to medicines, he had learned to recognize that the only way for its accomplishment is by complete study of each medicine on the market, as to its origin or genesis, physical, chemical and pharmacodynamic properties, and methods of application as a therapeutic agent. He also recognized that the function of the pharmaceutical profession, aided by its press, is to do this work except in so far as therapeutics is concerned and that only by doing it can pharmacy become a profession in fact as well as in name.

It was his desire that the *Journal of the A.Ph.A.* should be permanently the organ of the pharmaceutical profession in its work of standardization. He discovered that standardi-

*Read at the November meeting of the Philadelphia Branch of the American Ph.A. An obituary sketch of Dr. Hallberg appeared in the ERA for November, page 1101.

Attendants at Fourth Annual Convention West Virginia Pharmaceutical Assc.

zation in its broader meaning includes the proper grouping, naming and classifying of medicines, and when he commenced to apply that principle in a practical manner, he soon found that when thus standardized, many of the alleged therapeutic discoveries so extensively advertised and sold, proved to be only mixtures of old and well known drugs under fanciful names. These mixtures when properly classified fall into the several classes adopted by pharmacopœial nomenclature and appear as elixirs, syrups, etc., which when placed in the various price-lists of the manufacturers, brought out in marked contrast the fanciful prices hitherto demanded for them, and made it impossible for the advertisers to obtain the fanciful prices at which these products had hitherto been sold.

Thus he was placed in position to successfully defend the National Formulary from the charge of being a mere substitution text book, intended to aid the retail druggists in depriving the manufacturers of nostrums of their so-called "vested rights." He found that the proprietary rights claimed in many instances by the manufacturers and advertisers of these nostrums were for the most part unwarranted.

When the American Pharmaceutical Association decided to issue a monthly bulletin, Professor Hallberg was chosen as editor, a position for which he was eminently qualified by past experience and pronounced views regarding policy. His editorial policy was favorable to professional pharmacy, practiced in co-operation with the medical profession, as opposed to commercial pharmacy carried on as a separate vocation in competition with physicians. He clearly recognized the advantages of manufacturing galenical as well as chemical products on a large scale and acknowledged that there is a field for large manufacturing pharmaceutical as well as chemical houses, but he was opposed to the commercializing of that field by either.

The American Pharmaceutical Association is now about to embark on a larger enterprise by converting its bulletin into a monthly journal. Professor Hallberg was expected to have been its editor. With his views and strong personality he would have shaped its editorial policy in harmony with the professional ideal. One of the first problems he would have been forced to solve is the question of what kind of advertising is permissible for the journal to accept.

The true function of such a journal being to impartially discuss medicinal drugs and chemicals and preparations of the same, the question that the editor has to consider is, "Can the *Journal of the A.Ph.A.* perform its function as the organ of an association of professional pharmacists, while drawing upon the manufacturers of monopolized products for a large proportion of its income?" This is the problem now before the association and this is the problem that Professor Hallberg was in position to consider with more than usual ability. Let us hope we can find a man of equal ability and equal devotion to professional pharmacy, as Professor Hallberg's successor.

Never before in the history of pharmacy has it been so important as now, to clearly define the boundary line between pharmacy as a profession and the commercial drug business. Much of the drug business now existing will sooner or later be wiped out by legislation and the enforcement of pure food and drug laws, medical and pharmacy laws, and other laws intended for the protection of the public. Then true pharmacy will come into its own, and the apostles of true pharmacy will receive that honor which is their due. When that time shall come, the name of Hallberg will stand high in the lists of the immortals.

The Activities of the American Pharmaceutical Association.*

By Henry E. Kalusowski.

THE American Pharmaceutical Association after its organization in 1852, declared its purpose to promote the diffusion of the scientific knowledge of Pharmacy, to encourage Pharmaceutical Education and to effectively establish high ethical standards for the guidance of its members in their relations to physicians and the public. This declaration may seem to exclude consideration by the association of purely commercial interests, that it did not is shown in the first paragraph of Section 1 of the constitution which reads: "To improve and regulate the drug market by preventing the importation of inferior, adulterated or deteriorated drugs and by detecting and exposing home adulterations." Any enforcement of a part or the whole of this section would necessarily draw the association into due consideration of trade interests.

To promote the scientific knowledge of Pharmacy, was one of the prime objects of the association. The methods adopted, briefly summarized, were: preparation and reading of papers covering a wide range of subjects that directly and indirectly had a bearing upon Pharmacy. The papers were not compilations; they conveyed the conclusions following original investigation and experimentation upon selected subjects, the beginnings of many valuable scientific discoveries are found in these papers.

The constantly increasing numbers, the erudition, technical and scientific character and breadth of scope of the yearly presentation of papers, whether volunteered or requested by the Association and bearing as they did upon Pharmacy, Materia Medica, Chemistry, Pharmacognosy and other sciences, must be taken as a measure of the success that has attended the efforts of the association. By way of contrast and indication of progress, a comparison of the report of the earlier proceedings with those of recent date will show that in the earlier annual meetings discussions of any subject was by the assembled convention. In these days, besides the general meetings, there are some six sections, each of which devote several meetings to the special consideration and discussion of scientific, technical, educational and commercial group of subjects.

In the matter of Pharmaceutical Education, it is to be remembered that when the association was organized there was

(*Read at a meeting of the City of Washington Branch of the American Pharmaceutical Association.)

but one school in the United States in which Pharmacy as an art apart from others, was taught. In our day, eighty-two schools of Pharmacy testify to the success of the association's half a century of labor in encouraging pharmaceutical education.

During the gloomy depression that fell upon Pharmacy in the last two decades of the 19th century, which were due to the development of new trade conditions, the discouraging results following the efforts of Pharmacy to adjust itself to an order of things growing out of a commercialism that had run mad, schools of Pharmacy came into existence and were deficient in methods and equipment to carry on educational work in the way desired by the association. The American Conference of Pharmaceutical Faculties was organized for the purpose of establishing educational standard for admission to schools of Pharmacy; kind and extent of instruction that schools of Pharmacy shall give and the time in which it shall be given. The work of the conference in pointing out deficiences has met with response. A number of schools of Pharmacy have increased their equipments, broadened their courses of instruction and increased their hours for instruction.

Not the least in educational value is the compilation and annual publication of the report on the Progress of Pharmacy. The title suggests a restricted application. The report on the contrary covers the latest ascertained facts gleaned from all the natural sciences. How valuable and in what estimation it is, by many, felt, can be briefly summarized by quoting an expression made to the writer: "The report on the Progress of Pharmacy placed before its readers the results of the labors of the great scientific thinkers throughout the world and that in reading it was like taking a post-graduate course in Pharmacy."

In ethical matters, the position of the association has never for a moment changed from that set forth in its constitution, it has maintained and stood for the highest and best ideals. The association has been criticised because in a late day it saw fit to create a section on Commercial Interests; that it neglected important questions bearing upon these interests and confined itself exclusively to scientific and ethical questions. The earlier reports of the proceedings of the association do not show that commercial questions or interests were neglected; the reports on the drug market received attention and consideration. Papers on methods for conducting the drug business so as to lead to greater pecuniary gain are in evidence. It should also be remembered that the urgency for a commercial section was not felt prior to 1880. The trade conditions, rather demoralization, that developed after this date had not then arisen.

A distinctly commercial question was the adoption in 1875 of the report of the Committee on Formulas for Elixirs. This was the response of the association to the general and urgent demand from pharmacists for relief from a condition which at this period was qualified as the elixir nuisance. The publication of a series of standard formulas and their use by pharmacists soon caused elixirs to find their level and for not a few, their exit. In 1884 the effect of "cut prices" and inroads of department stores began to be seriously felt. The association took up the matter of relief. It is contemporary history how one plan after another was put into operation, first by the association, then in co-operation with the Wholesalers' Association, then with manufacturers, and failure attended them all, not so much through any defects in the plans, perhaps more to inherent defects in human nature, and without any doubt due to the fact, that the most promising and satisfactory of all the plans was by judgment of the United States Court declared to be contrary to the Anti-Trust Law.

The association is clearly on record as using all of its efforts for the betterment of the financial remuneration of Pharmacy from 1852 to 1899, when the National Association of Retail Druggists was organized for the purpose of taking up commercial interests and finding a solution for trade conditions which were depriving them of their just emoluments.

The American Pharmaceutical Association has not abandoned its desire and willingness to bring about or to co-operate with others in any plan which may bring about such a desirable and laudable end. At the same time the discussions in the annual meetings show some tendency on the part of some members to avoid any action which in its effects would seem to magnify the importance of the nostrum traffic to Pharmacy. The efforts of the association seem directed towards the advancement of the interests of Pharmacy by arousing a sentiment among pharmacists and physicians to the end that a higher regard and appreciation of the United States Pharmacopœia will follow. In this way the interests of the two allied professions and the welfare of the public will be best served.

Drug Clerks Will Profit by Reading The Pharmaceutical Journals.*

By Chas. H. Bowersox, First Vice-President of The National Association of Pharmacologists.

I HAVE frequently heard it said that many of my brother drug clerks do not read the pharmaceutical journals. Since my affiliation with the National Association of Pharmacologists (an association for the drug clerks), I have been thrown in contact with a large number of clerks and to my surprise, I find the number of non-readers to be far greater than one would imagine.

The following are some of the reasons given: "I cannot afford to subscribe to a drug journal just now;" "I thought the drug journals were intended only for the proprietors;" "The boss does not permit me to read pharmaceutical literature in the store;" "We do not take drug journals at our Pharmacy."

To the first one, I would say: Why not read your employer's journal? The second case looks like the result of a neglected employer. I believe it should be the duty of the employer to call attention to, and recommend the faithful reading of the pharmaceutical journals. In the third instance, the boss is standing in his own light, and someone ought to apprise him of the fact.

According to the statement of the fourth party, the situation might be looked upon as a deplorable state of affairs. Just imagine a drug store without a drug journal: It would be quite as reasonable for a hotel to attempt to do business without subscribing to a newspaper. I am a firm believer in drug journals. I have been a subscriber to as high as five at different times. I discontinued some of them recently owing to the fact that the store in which I am employed at present is taking four different ones. I shall, however, continue to take at least two different journals, while serving as a clerk. I consider them a great aid and guide, and I find much in every issue, that is of account to me.

Most of what the journals contain should prove profitable and interesting to any drug clerk who is desirous of becoming thoroughly posted and up-to-date. I preserve all of my journals and at the end of each year, after receiving the index, I have them neatly bound, in which form they serve as a work of reference. In conclusion I would say to my brother drug clerks, study the journals carefully. If your time is limited and you cannot devote sufficient time to peruse them from cover to cover prescribe for yourself that portion which you may think will prove of greatest value to you for the particular position you are holding.

*Read at a meeting of the executive board and members of the National Association of Pharmacologists.

Mother a Pharmacy Co-Ed—Son a Student.

SEATTLE, Nov. 20.—The manager of the *University of Washington Daily*, Walter Stoll, prominent in athletics and a well known fraternity man, has the distinction of attending the university with his mother, Mrs. Samuel Gloor of 4727 Twelfth avenue northeast. Mrs. Gloor is a freshman in the department of pharmacy. The course Mrs. Gloor is taking is the realization of a long felt desire to complete her education.

Together with her regular work Mrs. Gloor is taking the prescribed gymnasium training. She takes great pride in saying that she excels all of her class in the running and jumping contests. When asked the other day by some friends how she liked her work, and whether or not she was kept busy, Mrs. Gloor laughingly said:

"Busy? Why, I never knew before what it was to be busy. Last night I 'boned' until 2 o'clock. You may notice I have learned the co-ed slang."

It is Mrs. Gloor's great pride to have her lessons prepared perfectly for every recitation, until she can readily grasp and interpret every position of the assignment.

World's Camphor Industry and Prospects of Formosan Monopoly.

Decline of High Prices Which Prevailed Formerly Under Government Control and Interesting Features of the Methods of Gathering and Marketing Product.

As the United States has abundant supplies of turpentine oil, it is suggested that artificial camphor might be produced therefrom, as is done in Germany, thus saving the million dollars yearly sent to Asia for natural camphor. In a small illustrated monograph on the camphor industry in foreign countries, just issued by the Bureau of Manufactures, Department of Commerce and Labor, are given reports from American consular officers on the production of natural camphor in Japan, Formosa, Borneo, and Ceylon, and the competitive manufacture of synthetic camphor in Germany. The pamphlet describes the preparation of camphor from the wood of camphor trees, the principal sources of supply, and the various methods of producing synthetic camphor. Reference is also made to the extent of the camphor trade and the influence of the synthetic product on the price of natural camphor.

Consul Samuel C. Real, of Tamsui, contributes the following review of the camphor industry of the island of Formosa:

Camphor trees are found only in the mountainous districts, in the heart of the island, that have been and are in the possession of the head-hunting tribes of Formosa. By an apparent perversity of nature the camphor trees seem to flourish best in the regions inhabited by the fiercest tribes. It is into the mountain fastnesses, to the very habitations of the hostile aborigines, that the camphor workers must penetrate. Truces with the savages, effected by gifts, have at times brought temporary tranquility, but these periods have been short and of uncertain duration.

Since the Japanese occupation fatalities in this work have decreased. This, in part due to a conciliatory policy adopted by the Japanese officials, is the result of civilizing influences, difficult to define, yet unmistakably at work. In spite of the improved conditions, 451 people connected with the camphor industry were slain by savages during the last three years, the number in 1909 being 96.

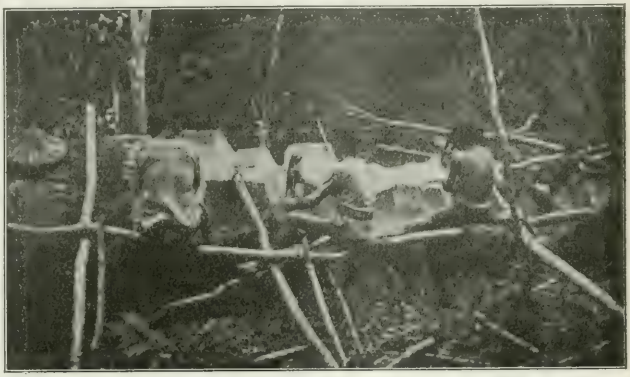


Figure 1.—Natives chiseling chips from a camphor tree.

The camphor monopoly, directed by the Formosan Government, has been operating ten fiscal years. The first eight years were remarkably successful, and in 1906-7, a phenomenal year, the profits of the Formosan Government are said, upon the most trustworthy authority, to have reached $1,500,000 gold. This may be partially verified by comparing the price that camphor brought that year (as high as $80 per picul of 133 pounds) with the estimated price paid by the Government to the camphor producer, which is said to have been about $15 per picul.

Decline of High Prices—The Monopoly.

These high prices could not be maintained. A reaction followed in 1907, caused in part by the appearance in the market of German synthetic camphor, and in part by business conditions depressing the world's markets generally. At the close of the fiscal year in 1908 there developed no indication of a satisfactory profit for the camphor monopoly.

The year 1909 shows a recovery of the business, with a foreign trade of 10,525,400 pounds at prices ranging from $38.50 to $45 per picul. The minimum price of 1907 was higher than the maximum price of 1909.

Under the Formosan Government monopoly regulations all camphor and camphor oil that have been produced in Formosa must be sold to the Monopoly Bureau. Under this system the amount of camphor to be placed on the market, the price to be paid to the producer, and the price to be paid to the vendee are fixed by the Government.

The privilege of engaging in the camphor industry is granted by the Government to individuals and companies upon application. The applicant is required to furnish some evidence of his financial standing. A certain territory is allotted to each operator, and he must confine his operations within the particular district designated in his license.

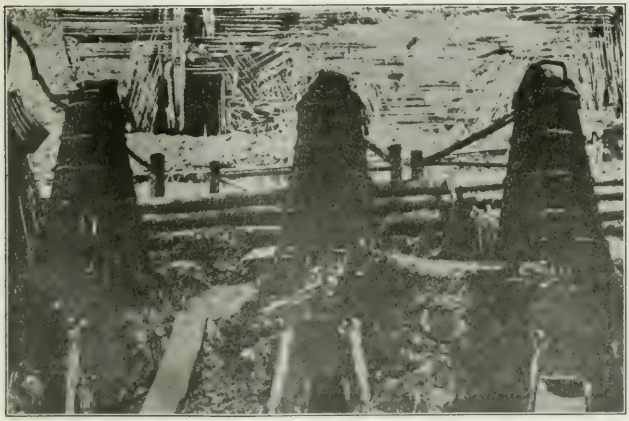

Figure 2.—A typical Formosan camphor stove or still.

Distillation Methods.

As soon as an operator is allotted his district he has a stove, or still, erected in some suitable place near the largest supply of camphor trees. While this stove is being constructed a tree is selected and the workers begin to cut the chips with a chisel-like knife; the finer the chips the more readily is the process of

distillation carried on. Figure 1 shows the workers chiseling or cutting chips from the body of a large camphor tree, while to the right is a rifle—an ever-needed protection in his hazardous undertaking.

The camphor still is crude, but it is more satisfactory for the extraction of camphor than a mechanical device imported from a European country some time ago. Figure 2 gives a correct outline of a camphor still. Over the fireplace is a pan filled with water. Above the pan is constructed a very tight wooden receptacle, about 3 feet in diameter at the bottom, 1 foot at the top, and 5 feet high. This receptacle, or circular retort, is filled through an opening at the top with chips of camphor wood. This opening is closed by a double lid, and earth banked around the lower section of the retort prevents escape of the camphor fumes. Just above the water pan are thin slats of perforated bamboo through which apertures the steam passes into the chips above, extracting the camphor. Near the top of the retort are two bamboo pipes through which the vapors are conducted into a cooling box, some 10 feet distant. This cooling box is divided into two compartments; the lower is filled with cool water and the upper is equipped with a wooden screen, upon which the camphor vapors crystallize. Connected by a bamboo pipe with the cooling box is the crystallization box, its construction being the same as the cooling box. Both boxes are immersed in water, which hastens the process of crystallization. The distillation requires about twenty-four hours. The chips are then removed by an opening in the lower section of the retort.

Disposition of the Products.

The two products of the distillation are crude camphor and camphor oil. The camphor is crystallized on the screens of the boxes, and has much the appearance of coarse salt; the oil is caught in leads and also skimmed from the water in the cooling box.

Both products are sent direct to the Monopoly Bureau, to be weighed and graded, and occasionally treated to mechanical pressure to remove the oil. There is no further industrial treatment of the crude camphor. It is now ready to be put into tubs for shipment to America and into boxes for shipment to European countries. In America the "B" grade only is required by the trade. European countries take both "B" and "BB" grades. The latter is in the crude state and contains a higher percentage of camphor than "B."

There are no camphor refineries in Formosa, and four refineries at Kobe, Japan, receive all of the camphor and camphor oil that the Government wishes to have refined. The refineries at Kobe and four refineries in Osaka are owned by private companies. The Government owns a refinery at Kobe, but found it unprofitable and discontinued its operation. The Formosan Government has as its sole selling agency the firm of the Mitsui Bussan Kaisha.

The total number of camphor stoves in the island is 7,834, with 909 out of commission. The number of stoves is limited by the Government. The average daily wage of a camphor worker is 90 cents gold for a native (Formosan) and $2 for a Japanese. The workers, as a rule, are paid by piecework. The official explanation for the high price paid to the laborers is not the cost of living or the scarcity of labor, but the danger of attacks from wild tribes.

The total number of companies engaged in the camphor business is 14, the number of camphor workers employed being 24,803 native (Formosan) and 4,776 Japanese. The production of camphor during the past three years was as follows (kin=1.33 pounds):

	1907. Kin.	1908. Kin.	1909 Kin.
Crude Camphor	3,914,598	3,534,970	3,365,000
Camphor oil	4,180,894	4,446,823	3,527,674

The exports and price of camphor were as follows:

	Kobe. Kin.	Foreign countries. Kin.	Price per 100 kin.
1907	806,161	5,347,157	$47.00-$80.00
1908	1,178,700	5,178,595	38.50-57.00
1909	1,261,804	7,894,172	38.50-45.00

Camphor Forest Area and Afforestation.

It is frequently stated that the camphor forests are inexhaustible. Again, the statement is made that the camphor forests of Formosa will be exhausted within perhaps twenty years. Both statements are relatively incorrect. The Government has not yet been able to make the calculation of area, except with respect to a comparatively small portion of the forests which is accessible; but, roughly speaking, camphor trees are scattered over the eastern half of the island, extending from Shinko in the north and Bansboryo in the south. The yearly production averages about 5,000,000 kin, and it is estimated that with this annual consumption the forests will doubtless last for forty-five years or more. The young trees which have been planted yearly since 1901 are not included in this estimate.

The wise measures taken by the Government to check the depletion of its camphor forests by passing laws relating to the conservation of this important resource and by afforesting large tracts of land will long keep Formosa the chief source of the world's supply of camphor. Since afforestation began 10,231,335 trees have been planted by individuals, companies, and societies, and 5,885,880 by the Government. The Government imports most of the seed from Japan. At the experimental stations there are large nurseries of young trees for free distribution.

Without doubt commercial conditions have been improving during the last year, and the temptation to fix a higher price under such circumstances is very strong. Thus the question of price, as well as the amount of camphor to be placed upon the market, is an ever-recurring and perplexing matter to be decided by the Monopoly Bureau.

The recent budget of the Government estimates the income of the camphor monopoly for the next fiscal year at $1,982,000 and the expenditures at $584,000.

LAW ELUCIDATED FOR OHIO VALLEY DRUGGISTS

Joint Meeting of Retailers With the Hamilton County Branch of the Ohio Pharmaceutical Ass'n.

CINCINNATI, Nov. 20.—An elucidation of the pure drug laws by Renick W. Dunlap, Ohio State Food and Drug Commissioner, was a feature of a recent meeting of the Ohio Valley Druggists' Association and the Hamilton County branch of the Ohio State Pharmaceutical Association which proved to be one of the most interesting and instructive sessions held here for some time.

Commissioner Dunlap cautioned druggists that it is necessary to label habit-forming drugs, and that they must be very careful not to lay themselves liable for selling rock-rye and-glycerine, malt extracts and other remedies containing alcohol for any but medicinal use. If these articles are sold as beverages, druggists are liable for the $1,000 Aiken tax. He told them they must use their own judgment as to whether the purchaser intends to use the remedy for medicinal purposes or as a beverage.

Asked how they are to decide this, Commissioner Dunlap explained that if somebody made two or three purchases of a quantity of rock-rye-and-glycerine in one or two days claiming he was using it for a cold, the druggist's suspicion should be aroused and he should and probably would come to the conclusion that the purchaser was using it too freely for the inspectors to class such purchases as having been made for purely medicinal use, were the case brought to the inspector's attention.

He added, too, that druggists who are doing business in a "dry" district must be more careful about the number of purchases of such remedies than would a druggist in a district where there are saloons, as the suspicion of inspectors is naturally sooner aroused in such cases in "dry" than in "wet" districts.

Commissioner Dunlap thanked the druggists for their cooperation in the past, and assured them he believes he will have their good-will and support in such matters in the future. The applause which followed his remarks showed he had not misplaced his confidence.

Prof. Theodore D. Wetterstroem, chemist for Commissioner Dunlap in drug law work, read an interesting paper on the drug business of today as compared with that of 15 years ago as to prices, prosecutions for violations of the laws, etc.

The druggists adopted resolutions on the death of Prof. Hallberg, of Chicago. The Professor spoke at the Lloyd Library here several months ago on the U.S.P. and N.F. work.

A banquet for the near future, at which it is hoped to have present a large number of druggists and physicians in order to promote an even better feeling between them, was discussed, and a committee consisting of Otto E. Kistner, Charles Ehlers and H. E. Igler was appointed to look into the matter.

Dr. Wiley Outlines Opinions and Methods in the U.S.P. Revision.

Prominent Pharmacists and Physicians Discuss Various Phases of the Work of the Committee at November Meeting of Washington Branch of the A.Ph.A.

WASHINGTON, Nov. 20.—The November meeting of the City of Washington Branch of the American Pharmaceutical Association was held at the Hotel Raleigh, with the members of the Association of Official Agricultural Chemists, as guests. The subject under discussion was the Pharmacopœial Convention of 1910 and the prospective Pharmacopœia of the United States.

Dr. H. W. Wiley, the president of the U.S.P. Convention, presented a communication in the course of which he outlined his opinions regarding the Pharmacopœia and the methods to be followed in revising it. He referred to the use of the Pharmacopœia as a standard under the provisions of the Food and Drugs Act of June 30, 1906, and expressed the belief that the interests of the public would have been more effectually safeguarded if no variation from the recognized standard were permitted.

In commenting on the changes in the nature and size of the committee of revision he quoted from the report of the former board of trustees of the U.S.P. Convention the several reasons for suggesting the change and the duties of the general and the executive committees of revision.

In discussing the scope of the Pharmacopœia he pointed out that although this book is not strictly speaking a text book on therapy it must be admitted that a drug only finds a place in the Pharmacopœia because of its alleged therapeutic effects. He believes that the medical members of the committee of revision have a right to object to the introduction into the Pharmacopœia of drugs the therapeutic effect of which is unknown or nil.

Publicity and Economy of Management Promised.

Discussing the business of the Pharmacopœial Convention he expressed the hope that the present board of trustees would be able to turn over to the next convention a sum of money sufficiently large to be used as an endowment for the continuance of the work. To do this it will be necessary to avoid all essential expenditure of money beyond sums that are absolutely necessary to make the coming book the best of its kind.

He expressed the opinion that the work of revision would be greatly aided by a frank practice of publicity and can see no reason why all of the acts of the executive committee of revision and of the board of trustees should not be given wide publicity through medical and pharmaceutical journals and by means of public addresses and discussions.

This would be in harmony with one of the general principles to be followed in revising the Pharmacopœia adopted by the convention and would, no doubt, be instrumental in securing the cordial co-operation of all who are in any way interested in the Pharmacopœia.

In concluding he expressed the belief that the work of revising the Pharmacopœia is one in which conscience should figure and in which all considerations other than those relating to the purity of the drug and the efficiency of its description should be laid aside.

Neither a Skeleton Nor a Padded Pharmacopoeia.

Prof. Joseph P. Remington, chairman of the committee of revision, expressed the opinion that the convention was indeed fortunate in having Dr. Harvey W. Wiley as its president, and presented a short communication in the course of which he commented on some of the more important points referred to by Dr. Wiley and outlined the nature and amount of work that had been accomplished during the summer months.

Commenting further on the scope of the Pharmacopœia he expressed the belief that the real sentiment of both physicians and pharmacists was neither in favor of a skeleton Pharmacopœia nor of a padded Pharmacopœia but of what he was pleased to designate as a sane Pharmacopœia.

He then called attention to a prospective communication by Prof. Rusby, for the Association of Official Agricultural Chemists, in which he points out the need for having a book of standards for all drugs that are widely used, so as to facilitate and simplify the work of the United States Custom House Officials in connection with the importation of drugs.

Prof. Remington also pointed out that for many years the Pharmacopœia was a closed book to the medical profession because its members had been led away from it by the detail man of the manufacturer and proprietary medicine maker. The resulting decay of therapeutics has brought about a state of confusion and a tendency to therapeutic nihilism that he considers to be most unfortunate.

Physicians do not know a sufficient number of U.S.P. preparations and do not appreciate the fact that their fellow practitioners in different parts of the country, and in different cities, use totally different medicines, for which the Pharmacopœia of the United States should furnish standards.

Prof. I. V. S. Stanislaus, of Philadelphia, asserted that the paper by Dr. Wiley had been a revelation and a treat true and rare. He had been particularly impressed by the reference to needless duplication of drugs having similar properties and willingly endorsed the proposition to delete useless duplications from the Pharmacopœia.

He pointed out that the content of previous Pharmacopœias represented the selection and dictates of the few and not of the many and expressed the hope that in the forthcoming Pharmacopœia greater care be exercised regarding admissions and deletions.

In Line With Purpose and Intent of Trustees.

Dr. Murray Galt Motter, secretary of the Pharmacopœial Convention, discussed a number of the more important points embodied in Dr. Wiley's paper and pointed out more particularly that the work and the function of the executive committee, as outlined by Dr. Wiley, was in accordance with the intent and purpose of the board of trustees of the former convention.

He also pointed out that the professional representation on the general committee of revision was not alone interesting but rather significant. Of the total number 34 (indeed 35 when a vacancy was filled), were nominees of the pharmaceutical caucus and but 16 were nominees of the medical caucus. Of the latter it is also interesting to note that only two reached the executive committee.

In connection with the scope of the Pharmacopœia he pointed out that the Pharmacopœial Convention by a vote of 95 to 47 emphatically recorded its conviction that substances "whose value and use have not been established" should not be included. And then, on the plea that it was unnecessary to hamper the committee elected for the purpose of carefully selecting the list of substances, the convention was induced to strike out, by a vote of 123 to 40, this "ambiguous and dangerous provision," thus leaving the final decision regarding scope with the members of the general committee of revision.

The Business Side of Pharmacopoeia Making.

With reference to the business of the Pharmacopœial Convention he asserted that it had been pointed out by several observers that "the financial statement made to the convention was in no wise satisfactory, explicit, or in justice to the intelligence of the body to which it was delivered." In commenting on the enormous sales of the book amounting to nearly 40,000 copies the first year, he pointed out that as a matter of fact the sales of the Pharmacopœia did not reach 40,000 until the middle of 1908.

In concluding, Dr. Motter expressed the belief that if those who are to effect the work of revision do not clearly realize their responsibility to the convention and to the several professions represented, and produce a book of standards indeed, but of standards for substances of established value and use, the next Pharmacopœia, instead of being a force, will be a farce.

Dr. Reid Hunt, chairman of the American Medical Association committee on the U.S.P., pointed out that regarding the scope of the book there are two diametrically opposed views, both of which deserve consideration. The manufacturer and the pharmacist desire to have a book of standards that will include all of the substances that are, have been or may be used as medicine, while the medical practitioner desires to have a book of standards for the approved therapeutic agents only so that the book may be used as a

basis for instruction in medical schools and as a guide to the physician who is willing to adopt and to use recognized standard remedies. It must be evident that these two objects are so totally different that it would be practically impossible to agree on a compromise and any attempt to do so would be considered a straddle that would be acceptable to but few.

He heartily endorsed the stand taken by Dr. Wiley regarding the scope of the book and expressed the belief that physicians and pharmacists should not be expected to furnish standards for Custom House Officials and patent medicine manufacturers. As chairman of the U.S.P. committee of the A.M.A. he had been able to get into communication with thousands of medical practitioners in various parts of the United States all of whom were willing to use the best medicines that were available and desirous of obtaining authentic information regarding the probable efficiency of drugs.

Dr. Hunt Says Physicians' Wishes Were Ignored.

Dr. Hunt outlined the methods that had been employed by his committee to secure the co-operation of the several sections of the A.M.A., and referred more especially to the correspondence that had been had with teachers of materia medica and therapeutics in medical schools and colleges, and asserted that despite the fact that the evidence thus secured represented the wishes of men in active practice and had been submitted in due form through the Pharmacopœial Convention to the committee of revision, an appreciable number of the members of the general committee appeared to be inclined to ignore the wishes of physicians and the indications now are that the scope of the forthcoming Pharmacopœia will again practically represent the views of but three or four individuals.

As an indication of the opinions held by the better informed medical men he quoted Dr. Abraham Jacobi, the Nestor of American physicians, who in discussing the content of the present Pharmacopœia deplored the fact that the makers of the Pharmacopœia were not willing to restrict the book to the best remedies only; and further pointed out that unless the scope of future editions of the Pharmacopœia could be restricted to medicinally active substances he and other clinicians would be impelled to withdraw their support.

Opposed Positions as to Scope of the U.S.P.

Dr. W. M. Barton seconded the remarks made by Dr. Hunt and asserted that he had also come to the conclusion that there are two diametrically opposed opinions regarding the scope of the Pharmacopœia and was satisfied that the book cannot, as it now stands, be accepted by medical men as a guide. He suggested the possibility of limiting the medical recognition of drugs by introducing a fair statement of the physiological action of the substance with each description.

Dr. Wiley in closing the discussion expressed himself satisfied with the feast of oratory that had been supplied to the members of the City of Washington Branch and their guests and felt sure that all were now ready to partake of the more material feast that had been provided by members of the branch.

DR. WILEY HITS AT SOME "SHOT-GUN" USERS.

A Growing Prejudice Against Drugs, Due to Methods of Cure-All Fakirs, Should be Checked.

WASHINGTON, Nov. 20.—At one of the recent meetings of the Association of Official Agricultural Chemists, Dr. Harvey W. Wiley, chief of the bureau of chemistry, made some picturesque remarks in his own half-serious, half-humorous way, about "shotgun pharmacy," and "shotgun therapeutics" that owing to the lateness of the hour at which he fired his shots were largely lost sight of by the public, but which were very interesting, and, in their way, important.

Dr. Wiley protested strongly against the use by physicians of elaborately prepared drugs consisting of a great many substances. He stated that these drugs seemed to be prepared with the idea that there might be something in the compounds that might possibly hit the mark. Drugs, as a rule, according to Dr. Wiley, do not cure. He said that there is a growing disposition to discredit their therapeutic power.

The reaction of disbelief should not be allowed to go too far, he thought, because it is a matter of general knowledge that drugs are beneficient and useful. The drugs that do good must be called to the attention of the public by good physicians. The prejudice against drugs, Dr. Wiley thinks, has been greatly augumented by the cure-all nostrums which have been so widely advertised and he added that in spite of all that has been said the cure-all fakers still have a hold on the American people. As for himself he has often been surprised by the unqualified confidence imposed in patent medicines by intelligent people.

Dr. Wiley advised a revision of the present Pure Food Act, so that drugs intended for consumption in the State in which they are produced, manufactured or sold, should not be permitted in inter-state or foreign commerce if they differ from the standards set by the Pharmacopœia. Under the present laws drugs do not have to conform to the provisions of the U. S. P.

"Until this action is taken by Congress," Dr. Wiley, said, "there is danger that dishonest druggists will swindle their customers by giving them drugs that are not efficient. I shall do my utmost to have the law amended.

ADVISES A.M.A. PLAN OF REPRESENTATION.

Physician Also Discusses Relations of Druggists and Doctors—What National Associations Have Done.

BALTIMORE, Nov. 20.—The Baltimore branch of the American Pharmaceutical Association held its first meeting of the season of 1910-11 early this month with Charles L. Meyer, vice-president, in the chair in place of President W. J. Lowry, Jr., who sent in his resignation, which was accepted with regret. The program provided for reviews of the work of three National associations. Dr. John B. Thomas was delegated to speak for the A.Ph.A., M. S. Kahn for the N.A.R.D., and Dr. H. G. Beck for the A.M.A.

Mr. Thomas went briefly over the work of the A.Ph.A. meeting at Richmond. Mr. Kahn, in discussing the last meeting of the N.A.R.D., said he felt much as did Mr. Thomas in reference to the annual meeting of the A.Ph.A., that the members had read reviews of the meeting. He would therefore, he said, confine himself to a few important points. One of these was the relations between physicians and pharmacists. He vigorously defended the N.A.R.D. against the accusation that it was controlled by a business organization, and maintained that it was wholly unfair to base such a conclusion upon the single fact that many of the N.A.R.D. members were also affiliated with the corporation.

Whatever action was taken by the association with reference to dispensing by physicians applied with equal force to counter-prescribing by pharmacists. The work of this meeting demonstrated conclusively the value such an organization could be to pharmacists, and constituted a striking argument in favor of co-operation.

Dr. Beck was prevented from attending by death in his family and Dr. S. T. Earle gave a brief talk. He took up the relations between druggists and doctors, and pointed out that the pharmacists must be so organized as to best co-operate with physicians and at the same time protect their own interests. Dr. Earle was president of the Medical and Chirurgical Faculty of Maryland at the time of the reorganization of the American Medical Association, and he said he could not do better than to advise pharmacists to shape their organization along lines as nearly similar to those of the A.M.A. as possible. The unit representation, as embodied in the organization of the A.M.A. had brought about even better results than were hoped for, securing as it did the opinion and help of every member, but in such a way as to be neither cumbersome nor ineffective. Such a perfected organization among pharmacists would make it possible for the physician and pharmacist to deal more effectively with the problems that confront both bodies. The number of pharmaceutical associations now in existence, he said, tended to complicate the situation.

In addition, Dr. Earle pointed out that there must be an encouragement of closer relations between individual physicians and pharmacists, and a recognition on the part of each of their respective rights and duties. He advocated more frequent joint meetings of pharmacists and physicians, but cautioned that such meetings should be well arranged and such speakers, both medical and pharmaceutical, engaged as

would command the attendance as well as attention of the rank and file of both professions. A poorly conducted and ineffective joint meeting, he said, was worse than none at all. He suggested that when a joint meeting is proposed, a committee representing both professions should meet and arrange for the gathering.

Dr. John F. Hancock took up the suggestion and moved that a meeting of the branch be held and that the physicians be invited. The motion was amended so as to provide for a branch meeting on Dec. 1, to discuss the joint meeting and make arrangements for it, in accordance with Dr. Earle's ideas, in which form it received approval.

Mr. Thomas brought the death of Dr. Hallberg officially to the attention of the branch, and spoke feelingly of his character as well as of his work in behalf of the A.Ph.A. Dr. Hancock followed with some remarks on Dr. Hallberg's character in a more personal vein. He moved that a committee of three be appointed to draft suitable resolutions, the secretary to be directed to send a copy to Mrs. Hallberg and another to the acting editor of the *Bulletin*.

Chairman Meyer seconded the motion, paying a glowing tribute to the deceased, whose work for the association he had learned to value most highly. Dr. Hancock, John B. Thomas and Dr. Daniel Base were named as members of the committee

DR. NEWCOMB MEETS MINN. PHARMACISTS.

Gives Entertaining Lecture—Mourn for Dr. Hallberg—Dean Wulling on Joint Legislative Committee.

MINNEAPOLIS, Minn., Nov. 20.—The fall meeting of the Northwestern Branch of the A.Ph.A. was held Nov. 3 in the large amphitheater of the College of Pharmacy, University of Minnesota, and attended by about 150 members. President W. A. Frost, of St. Paul, occupied the chair. The business meeting was preceded by a lecture by Dr. Edwin L. Newcomb, the new instructor in pharmacognosy.

In introducing Dr. Newcomb, Dean Wulling emphasized particularly the aim which the college has cherished for a long time to establish and maintain a botanical garden of medicinal plants. The experience that Dr. Newcomb has had in the cultivation of such plants was largely the cause of his selection to carry on the work here.

The lecture was on "The Adulteration of Crude and Powdered Vegetable Drugs." An exhibit of about 150 specimens of crude and powdered drugs and their adulterants was made. Fields showing sections of drugs and adulteration of about twenty powdered drugs were exhibited under microscopes. These and similar slides were later projected upon the screen and the microscopic fields explained.

Dr. Newcomb first considered the preparation of crude material for examination and the apparatus necessary to carry on the work and then took up the study of several drugs and spices and pointed out many of the common adulterants met with and methods for their detection. He emphasized the desirability and necessity on part of the pharmacists of purchasing their drugs in a crude or entire condition and comminuting them in their own establishments. It was demonstrated with what ease drugs can be reduced from the entire to the powdered form. Growing specimens of medicinal plants were exhibited and the possibility of the cultivation of such plants in this climate was considered. The lecture was concluded by a practical demonstration of structural characteristics of several vegetable drugs and adulterants.

Upon motion of Dr. Newcomb, seconded by Dean Wulling, a committee was appointed to formulate resolutions on the death of Professor Hallberg and a suitable tribute to his memory was adopted.

The State Medical Association through its president, Dr. W. A. Jones, had invited the pharmacists through Dean Wulling to appoint a representative on a committee created to take in hand the matter of legislation on public health. Stewart Gamble moved that the branch request the president of the Minnesota Ph.A. to appoint Dean Wulling. The latter declined, but upon further discussion, especially by Charles H. Huhn, the motion was finally passed despite the protest of Dean Wulling, who wanted some other pharmacist, preferably one engaged in active practice, to be the appointee.

President Frost was authorized to appoint a committee to nominate officers for the ensuing year.

Dean Wulling spoke on the proposed new *Journal of the American Pharmaceutical Association*. Considerable local interest in the *Journal* was evidenced, and it was decided to hold an adjourned meeting to discuss the matter further. The next meeting will be held Dec. 8.

ADVOCATES MEMORIAL FOR PROF. HALLBERG.

Illinois Pharmacy Law Changes and Joint Meeting at South Bend Also Discussed by Chicago Branch.

CHICAGO, Nov. 20.—The November meeting of the Chicago branch was devoted to a discussion of the proposed new pharmacy law for Illinois. The meeting was held at Northwestern University building. C. H. Avery, member of the Illinois Board of Pharmacy, presented the draft for discussion, setting forth the various points in which it differs from the law now in force—chief among these being the graduation pre-requisite feature which met with the unanimous approval of those present.

Messrs. Becker and Gray, hospital pharmacists, discussed the section which provides that the dispensaries of hospitals must be supervised by a registered pharmacist, saying that in their opinion several of the smaller hospitals were now getting along without registered men, in some cases the internes and in others the nurses doing the work which a pharmacist should do.

Mr. Eliel said that he was very much interested in the proposed law, especially as his State, Indiana, is now considering amendments to its pharmacy law. Professors Clark, Day and Patterson and President Larsen of the C.R.D.A. also took part in the discussion.

After the approval of the draft as revised by the executive committee of the Illinois Ph.A., Mr. Eliel discussed the proposed meeting of the branch in South Bend, and asked that it be held in January and consist of a joint meeting of the pharmacists and physicians of South Bend together with as many of the Chicago members as could arrange to attend.

Upon motion of Prof. Clark a committee was appointed to draft suitable resolutions regarding the death of Prof. Hallberg. President Storer appointed on the committee Messrs. Clark, Becker and Knoche. Mr. Sawyer discussed a suggestion made by Mr. Lorenz to the effect that some suitable memorial to the late Prof. Hallberg should be made. Mr. Eliel said that no doubt the parent association would do so at the meeting in Boston next August. All of the members of the Chicago Branch who can attend the Boston meeting, will constitute a committee for this purpose with Leo Eliel as chairman.

The program committee announced that the December meeting would be devoted to a discussion upon advertising by B. S. Cooban, and that the nomination of officers for the ensuing year would also be made at the same meeting.

B.A.R.D. MEETS WITH NEW ENGLAND BRANCH.

Propaganda Work Successful—Suggestions for Use of Pharmacopoeial Revision Committee—Election.

BOSTON, Nov. 20.—The October meeting of the B. A. R. D. emphasized the interest that the association's propaganda work is arousing in greater Boston, and the reports of progress were decidedly encouraging. E. C. Marshall, one of the best known men in the profession, who is now engaged in the propaganda work, reported that physicians generally were looking upon the movement with favor, and the druggists were correspondingly satisfied. Three new members were elected—A. H. Grimshaw and Henry W. Perry, of Somerville and William H. Glover, of Lawrence.

In the evening the members were invited to meet with the New England branch of the American Pharmaceutical Association at the Hotel Plaza, which was holding its first meeting of the fall. President James F. Finneran presided at the dinner and at the exercises following, when the topic was "Suggestions to the Pharmacopœial Committee." Prof. C. F. Nixon, of that committee, was present and personally took notes on the suggestions made by the members and guests. Preceding the dinner the New England branch re-elected the following officers.

President, James F. Finneran, Boston; vice-president, Prof. James O'Hare, Providence; secretary-treasurer, R. A. Newton, of the Massachusetts College of Pharmacy, Boston; chairman committee of professional relations, Frank B. Ernst, Jamaica Plain; chairman committee on membership, William H. Glover, Lawrence; member of the council, Prof. Elie H. LaPierre, Cambridge.

? QUESTION BOX ?

THE OBJECT of this department is to furnish our subscribers and their clerks with reliable and tried formulas, and to discuss questions relating to practical pharmacy, prescription work, dispensing difficulties etc. Requests for information are not answered by mail and ANONYMOUS COMMUNICATIONS WILL RECEIVE NO ATTENTION, neither do we answer questions in this department from non-subscribers.

In this department frequent reference is necessarily made to information published in previous issues of The Era, copies of which, if not out of print, may be obtained for 25 cents each.

Sodium Fluoride Roach Powder.

(S.K.)—The use of sodium fluoride as an ingredient of insect powders, especially those powders which are to be employed for the destruction of roaches, is not new and the salt is said to be employed in certain proprietary preparations on the market. A formula for a roach powder containing sodium fluoride, published in the ERA some years ago, is the following:

Silex	22 parts
Sodium fluoride	40 parts
Sodium chloride	10 parts
Sodium carbonate	15 parts
Sodium sulphate	10 parts

Another formula for a roach powder which is said to produce a reliable preparation, is this one from the Modern Formulary:

Borax	37 ounces
Starch	4 ounces
Sugar	3 ounces
Cocoa	4 ounces
Tartar emetic	5 ounces

Reduce all to fine powder and mix thoroughly. The cocoa gives a brownish tint which may be deepened by the use of a little ochre or Venetian red. Sprinkle freely wherever roaches are troublesome.

Insolubility of Menthol.

(C.C.)—"Please criticise the following prescription:

Menthol	½ dram
Listerine	2 drams
Glycothymoline, enough to make	2 ounces

Mix. One teaspoonful night and morning in hot water as spray.

I found it impossible to dissolve the menthol without alcohol."

The combined solvents of the proprietary preparations are too weakly alcoholic to dissolve the quantity of menthol prescribed hence most of the later is deposited on allowing the mixture to stand for a very few minutes. Upon the addition of alcohol the menthol is dissolved, but whether such addition or the prescribing together preparations of secret formula is wise is for the physician to determine and he should therefore be informed of the difficulty.

Deodorizing and Coloring Gasoline.

(W.I.G.)—The following formula has been recommended for "deodorizing" gasoline:

Gasoline	1 pint
Oil of lavender	1 dram
Potassium bichromate	1 ounce
Sulphuric acid	1 ounce
Water	1 pint

Dissolve the potassium bichromate in the water, add the sulphuric acid, and when the solution is cold shake up the gasoline with it. Shake every hour during the day, allow to stand all night, decant the gasoline, wash with a pint of water, and again decant. Lastly, add the oil of lavender.

In a somewhat similar process potassium permanganate is employed with sulphuric acid. The gasoline is then again washed with more permanganate and some caustic soda, and finally with water. The quantity of permanganate necessary is in direct proportion to the impurities existing in the gasoline. Another process consists in repeatedly shaking the gasoline with plumbate of soda, made by dissolving oxide of lead in caustic soda, and rectifying. Simply shaking with charcoal and filtering will partially remove the odor.

Any of the oil-soluble aniline reds may be use for coloring gasoline red. Only a very small quantity is necessary. Eosin and some other of the anilines greatly increase the fluorescent properties of gasoline. For use as a solvent or cleaning fluid gasoline carrying a dye in solution is not desirable.

Skin Bleach.

(D.Y.S.)—Various preparations are recommended for application to the skin, but frequently conditions which produce coloration can be removed only by a course of systematic treatment under the direction of a competent physician. However, here are two formulas for preparations to be applied directly to the skin:

(1)

Dilute nitric acid	2 drams
Rectified spirit	3 ounces
Essence of white rose	½ ounce
Oil of neroli	10 minims

Mix and add:

Solution of hydrogen peroxide	2 ounces
Glycerin	3 ounces
Tincture of cochineal	1 dram
Water, enough to make	40 ounces

Mix. Allow to stand for a few days and filter. Directions for use: Wet a corner of a serviette with the lotion and apply to the face, neck, arms and hands each time after washing; then dry.

(2)

Lactic acid, U.S.P.	2 fl. ounces
Glycerin	4 fl. ounces
Tincture of benzoin	2 fl. drams
Water, enough to make	32 fl. ounces

Mix, perfume as desired, and filter clear through Kaolin or talcum. The lotion may also be tinted with carmine.

Solution of hydrogen peroxide is probably the most used and least harmful skin bleach. It is usually applied somewhat diluted or in the form of the so-called "peroxide cold cream" or peroxide lotion, formulas for which have frequently appeared in previous volumes of the ERA.

Toothache Cement.

(J.A.S.)—See ERA of Sept. 16, 1909, page 298. Here are two other formulas:

(1)

Venice turpentine	½ ounce
Paraffin oil	4 fl. drams
Salol	¾ ounce
Yellow wax	3¼ ounces
Alkanet root	q.s. to color

Triturate together the salol, turpentine and oil, then add the wax, previously melted and colored with the alkanet root, allow the mixture to cool and roll into sticks or pencils.

(2)

Paraffin	3 ounces
Burgundy pitch	3 ounces
Oil of clove	1 ounce
Carbolic acid	1 ounce

Melt the paraffin and pitch together and add the other ingredients when nearly cold, mix with cotton and cut into short rods, wrap in thin waxed paper, and keep in small bottles.

Fire Extinguishing Powder.

(F.B.)—All dry-powder fire extinguishers contain bicarbonate of sodium and usually some substances intended to prevent caking of the bicarbonate. This salt is decomposed by heat, yielding carbon dioxide and sodium carbonate, the latter a quite stable substance. The carbon dioxide by displacing the atmospheric oxygen necessary to combustion is relied upon to extinguish the fire. This is the theory on which such powders are employed, but whether they afford much protection against fires is, in the minds of engineering experts, a matter to be determined. However, in the case of ignition of oil such powders are said to be fairly efficient. It should also be stated that any value that dry-powder extinguishers may have is doubtless much reduced by caking of

the powder in the tubes or containers, as proper spreading of the powder over the seat of the fire is then much less likely to take place. Here are some formulas which have been published for the preparation of these powders:

(1)

Common salt, 8 parts; sodium bicarbonate, 6 parts; Glauber's salt, 2 parts; calcium chloride, 2 parts; sodium silicate, 2 parts.

(2)

Common salt, 60 parts; sal ammoniac, 60 parts; sodium bicarbonate, 80 parts.

(3)

Ammonium chloride, 5 parts; sodium sulphate, 3 parts; sodium bicarbonate, 2 ounces.

(4)

Johnstone's (Sci. Am. Cyc. of Receipts).—Make a mixture of equal parts of pyrolusite (manganese dioxide), potassium chlorate and potassium nitrate. Moisten with waterglass and press into a block. Place the block into a pasteboard box. Several boxes, connected by fuses, are suspended from the ceiling of a room.

Home Made Splints.

(Dr. O.H.F.)—Dissolve one pound of gum shellac in 1½ pints of alcohol (95 per cent), and 1 dram of borax. Let the mixture stand until all of the shellac has been dissolved, when it is ready to be applied. Old cloth makes the best splints. Apply the solution to one side of the woolen cloth with a brush and dry thoroughly before a hot fire (it takes about an hour to dry properly). Then apply a second coat on the same side and dry as before. If a stronger piece is desired apply the mixture on one side of two pieces that have been previously prepared, dry, and place them together and press with a hot iron when they will unite and become as one piece. Always be sure to dry out all of the alcohol. To temper the cloth for use, hold before a hot fire until soft, then apply. It will adapt itself to the shape of the limb at once. To make it set quickly, hold in cold atmosphere or dip in cold water (Red Cross Notes).

A stiffening solution for splints with several qualities to recommend it is potassium silicate, although sodium silicate is almost as serviceable. Any desired degree of rigidity can be imparted to a splint by using this solution, the amount of rigidity depending upon the strength of the solution. Dextrine in the proportion of 8 ounces to pint of water adds some tenacity besides stiffness. A splint made with its aid, according to Dr. E. A. Tracy, of Boston, can be moistened with water and remolded—quite an advantage in many cases.

Japan Dryer.

(H.L.S.)—We have had no practical experience in manufacturing along this line, but a formula to serve as a type, or basis, for experiment directs to mix thoroughly and pass three or four times through a paint mill, 15 pounds dry sulphate of zinc, 4 pounds sugar of lead, 7 pounds litharge with sufficient linseed oil; keep in airtight containers.

Here are some others from various sources:

(1)

Into 1 gallon linseed oil put ¾ pound gum shellac; ¼ pound each litharge, burnt umber, and red lead; and 6 ounces sugar of lead. Boil together for four hours, or until all the ingredients are dissolved. Remove from the fire and add 1 gallon spirits turpentine.

(2)

Japan Dryer (cheap)—Mix together 4 gallons pure linseed oil; 4 pounds each litharge and red lead, and 2 pounds powdered raw umber. Boil slowly for two hours, add by degrees 7½ pounds of shellac, and boil ½ hour longer; when well mixed, add by degrees 1 pound powdered sulphate of zinc, and when nearly cold mix in thoroughly 7 gallons spirits turpentine.

Creme de Menthe.

(H.L.S.)—We have no information beyond that published in the October, 1910, ERA, page 964, relating to the preparation of creme de menthe for use in soda water beverages. With the suggestions in the reference cited at hand, you should have no trouble in making a satisfactory syrup.

The wise drug clerk recognizes his employer's virtues and his own faults.

CORRESPONDENCE

Dr. Taylor on Pharmaceutical Syllabus Progress.

Editor The Pharmaceutical Era:

At a recent meeting of the Minnesota State Board of Pharmacy the question of adopting the Pharmaceutical Syllabus was presented and after some discussion it was given a qualified approval. It was voted that the board should follow the lines of the syllabus in so far as the conditions in Minnesota at the present time warrant. While this is not as satisfactory as an unqualified indorsement, yet it is like the syllabus—it is a step in the right direction. The action of the board is commendable and wise.

There is no disposition to make the syllabus ironclad in its effects. It is a growth and not an imposition; hence boards of examiners, schools of pharmacy, and all interested students in education must recognize this fact, and adjust themselves to the suggestions made in the syllabus, only so far as they are applicable. The revised edition of the syllabus will be a much more complete and scientific work. The present edition, in force for the present syllabus period, is tentative only and must be ever so regarded; hence, the necessity of providing for discussion and revision.

At the last meeting of the Oklahoma State Board of Pharmacy, the board adopted a resolution approving the action of the syllabus committee and notice will be given from the office of the State board to all schools of pharmacy now recognized by the Oklahoma State Board that no school will be given recognition after the January, 1911, meeting of the board, except such schools as comply with the Pharmaceutical Syllabus. The board made no recommendations regarding changes, improvements or modifications of the edition.

H. L. TAYLOR,
Secretary National Committee, Pharmaceutical Syllabus.

Druggists in Politics—Work for State Associations.

Editor The Pharmaceutical Era:

It seems to me with all the drug journals advocating and advising druggists to go into politics, and after seeing the results from not attending to such matters that the State associations, could well take up this matter. And were they not able to nominate a druggist, to see that both candidates were pledged *before election*, and after as well. We would then have less cause for complaints of abuse and encroachments on our rights.

Kentucky druggists are not much interested in politics from a business standpoint. Hence there are no druggists' candidates for Congress in this state this year. They do not seem to realize how much it means to them, but permit their brother physicians to attend to all of their legislation for them and then complain about being encroached upon.

Milton, Trimble County, Ky. JOHN R. INGLIS.

Liquid Carbonic Company Retains Identity.

Editor The Pharmaceutical Era:

Kindly favor us by giving the widest possible publicity to this emphatic denial of rumors that have been published to the effect that this company was about to combine with competing firms.

Tell your readers that the Liquid Carbonic Co. has no intention of giving up its independent identity as the largest soda fountain and supply house in the world; now, or at any future time.

With the vastly increased producing capacity afforded by our new plants, we are in better shape than ever to serve the industries with whose remarkable growth we have been so prominently identified and every advantage that this new plant affords us will be made the advantage of our customers.

Chicago, Nov. 17, 1910. THE LIQUID CARBONIC CO.
JACOB BAUR, president and treasurer.

An Earthy Thought.

When grim dyspepsia haunts the land
Man's disposition, harsh or bland,
Doth not depend on what he thinks
So much as what he eats and drinks.
—*Washington Evening Star.*

SELECTED FORMULAS

Liquid Metal Polish.

(1)

Levigated silica	10 pounds.
Kerosene	5 gallons.
Oleic acid	2 gallons.
Stearic acid	2 pounds.

(2)

Kieselguhr	56 parts.
Paraffin oil	30 parts.
Methylated spirit	20 parts.
Oil of turpentine	5 parts.
Solution of ammonia	3.75 parts.

(sp. gr. 0.910)

(3)

Oxalic acid	½ ounce.
Rottenstone	10 ounces.
Kerosene	30 fl. ounces.
Hard paraffin	2 ounces.

Powder the oxalic acid and mix it with the rottenstone; melt the paraffin, add to it the kerosene, and incorporate the powder; when cool, add oil of mirbane or lavender to perfume.

(4)

Kieselguhr	1 pound.
Oleic acid	20 fl. ounces.
Benzole	40 fl. ounces.

Laxative Fruit Lozenges.

Senna, in powder	1 ounce.
Sugar, in powder	1 ounce.
Jalap, in powder	1 ounce.
Tamarind pulp	5 ounces.

Mix so as to form a stiff paste, then divide into lozenges weighing 45 grains each. The mass is best rolled out on a pasteboard with a rolling pin, and cut out with an oval mold. The lozenges are then dipped into melted chocolate and dried.

Floor Polish for Ballrooms.

(1)

Spermaceti	20 parts.
Hard paraffin	20 parts.
French chalk	40 parts.

Shave the spermaceti and paraffin very finely; mix with the French chalk, and pass through a sieve.

(2)

Powdered stearin	20 parts.
Powdered yellow wax	5 parts.
Powdered soap	2 parts.

Prepare as in the preceding. Perfume may be added if desired.

Paint for Black Eyes.

Bismuth subcarbonate	2 drams.
French chalk	1 dram.

Mix and color with carmine, Armenian bole, or calamine to skin tint. Apply after washing the parts with a mixture of

Glycerin	1 dram.
Water	5 drams.

Mange in Dogs.

(1)

Olive oil	1 pint.
Oil of turpentine	¼ pint.
Sulphur	2 ounces.

(2)

Olive oil	1 pint.
Creolin	1 ounce.
Sulphur	2 ounces.

The dog should be thoroughly washed with plenty of soft soap and warm water. After drying, either of the foregoing applications will eradicate the pest, the hair generally growing freely again. Two or three dressings at intervals of three days will usually suffice.

Ginger Ale.

Ginger ale is a beverage supposed to beguile the artless teetotaler into an idea that he is doing something naughty, or at all events, placing himself on the very verge of tampering with the accursed thing "beer." Hence its name. But what a difference in the two drinks! Here are two receipts for making it:

(1)

Plain syrup, 42° T.	1 gallon.
Compound tincture of ginger	4 fl. ounces.
Acetic acid	4 fl. ounces.
Sugar coloring	½ fl. ounce.

(2)

Plain syrup, 42° T.	1 gallon.
Tincture of ginger	4 fl. ounces.
Tincture of capsicum	1 fl. ounce.
Sugar coloring	½ fl. ounce.

Use 1 to 1½ ounces of flavored syrup to each bottle. If desired, the bouquet may be enriched by the use of one or more of the following ingredients:

Essence of vanilla (per gallon)	3 drams.
Butyric ether (per gallon)	4 minims.
Otto of rose (per gallon)	1-3 minim.

Half an ounce of Spanish licorice to the gallon will considerably improve the flavor *(Drinks of the World)*.

Old-Fashioned Shoe Blacking.

Boneblack	1 pound.
Lampblack	¼ pound.
Treacle	¾ pound.
Sperm oil	2½ fl. ounces.
Sulphuric acid	1¼ fl. ounces.
Vinegar	5½ fl. ounces.

This forms a paste. Mix in the order named.

Photographer's Photo-Mountant.

Wheat flour	½ pound.
Alum	1 dram.
Boric acid	1 dram.
Water	½ pint.

Make a smooth paste and add—

Acetic acid	1 fl. ounce.
Water	1 pint.

Mix and heat with constant stirring until nearly gelatinous. If too stiff, add more water. When nearly cool add—

Oil of cloves	20 drops.

Pine Tree Lozenges.

Powdered acacia	1 pound.
Extract of licorice	1 pound.
White sugar	14 pounds.
Arrowroot	7 pounds.
Tartaric acid	1 ounce.
Paregoric elixir	2 ounces.
Powdered ipecac	½ ounce.
Oil of pumilio pine	2 drams.

Mix into a paste with sufficient water, and divide into lozenges 25 to the ounce. In place of paregoric elixir a mixture of camphor, 1 dram; menthol, 1 dram, in spirit of chloroform, 2 ounces, may be used with advantage.

Johnson Legacy Nucleus of Inheritance Fund.

A very interesting trustees' meeting was held at the New York College of Pharmacy on Nov. 1. Prof. Chandler presided. The treasurer, C. O. Bigelow, reported the receipt of the legacy of $2,500 left to the college by Robert W. Johnson. It was decided to deposit this money in a savings bank where it will bear interest and form the nucleus of a fund to be known as the "Inheritance Fund of the College of Pharmacy of the City of New York." It was hoped that all members and friends of the College might in a like manner remember the institution. The board thanked M. J. Breitenbach for two valuable donations to the department of physics.

Frigid.

"She got cold comfort from him, I hear."

"Yes; he told me she ate seven plates of ice cream."

New Rules and Regulations of N. Y. Board of Pharmacy as Approved by Regents.

ALBANY, N. Y., Nov. 20.—The new rules prepared by the State Board of Pharmacy and approved by the Regents of the University, have been promulgated by the secretary, Warren L. Bradt. In the examinations for pharmacists' and druggists' licenses, there are five subdivisions each, as follows: (1) Materia medica and botany, (2) toxicology and posology, (3) pharmaceutical chemistry, (4) practical pharmacy, (5) theoretical pharmacy.

The division of subjects and the assignment of examiners are as follows:

LICENSED PHARMACISTS.

	Subject.	*Examiner.*
(1)	in Materia Medica and Botany	Dr. Huested
(2)	in Toxicology and posology	Dr. Diekman
(3)	in Pharmaceutical chemistry	Mr. Bigelow
(4)	in Theoretical Pharmacy	Mr. Raubenheimer

LICENSED DRUGGISTS.

(5)	in Materia Medica and Botany	Mr. Todd
(6)	in Toxicology and posology	Mr. Reimann
(7)	in Pharmaceutical chemistry	Mr. Hurley
(8)	in Theoretical Pharmacy	Mr. Hyde

BOTH PHARMACISTS AND DRUGGISTS.

(9)	in Practical pharmacy	Mr. Lascoff

Revised Rules New York Pharmacy Board.

The new rules are as follows:

1. OFFICERS, THEIR POWERS AND DUTIES.—The officers of the board shall be a president, a vice-president and the secretary.

a. *President and Vice-President.*—These officers shall be elected by ballot for the academic year. In case of the inability, neglect or refusal of the president to perform any duties of his office, the vice-president shall perform such duties. The president may call meetings at such time and place as in his judgment the work of the board may demand; he shall call special meetings on the request, in writing, of three members of the board; at the annual meeting he shall appoint the standing committees, and he shall appoint such other committees as may be necessary for the proper carrying out of the provisions of the law and of the rules.

b. *Secretary.*—The secretary shall discharge the duties imposed on him by law, by rules and by the board; shall file with the department a surety company bond in the sum of $3,000, the expense thereof becoming a proper expense pursuant to Article XI of the Public Health Law; shall prepare the annual report for transmission to the regents by the first of October; shall notify the members in writing of all meetings of the board; shall be ex-officio chairman of the question committee; shall conduct the official correspondence of the examiners.

2. QUORUM.—Five members shall constitute a quorum at the meetings of the board and two members shall constitute a quorum at the meetings of the violation committee.

3. PER DIEMS.—Each examiner shall receive $10 for each day's service in the performance of his duty, under the provisions of this article and shall be entitled to all necessary expenses.

4. COMMITTEES.—At the annual meeting the president shall appoint the following committees:

a. *Violations Committee.*—Three committees of three members each—for Albany, for Buffalo, and for New York—shall be appointed to investigate alleged violations of the provisions of this article; to conduct hearings in respect thereto, and when necessary, to bring the same to the attention of the Attorney-General. Meetings of such committees, when necessity exists, shall be held the first Wednesday of each month at the call of the secretary.

b. *Questions Committee.*—The questions committee shall consist of the secretary and one examiner, whose duty it will be to edit the examination questions submitted by the examiners.

Other committees shall be appointed by the president at such times and for any purpose that may be found necessary for the proper enforcement of the provisions of the law.

5. CORRESPONDENCE.—All official correspondence received by examiners shall be referred to the secretary for reply.

6. GRATUITIES.—No employee of the board shall be permitted to receive any money or other gratuities from pharmacists, druggists or certified storekeepers for any services rendered.

Requirements for a Pharmacy, Drug Store and Store.

7. PHARMACOPOEIA AND FORMULARY.—Every pharmacy and drug store shall own and have on file at all times the eighth decennial revision of the Pharmacoepia and the latest edition of the National Formulary, and no registration certificate shall be issued a pharmacy or drug store till it complies with this rule.

8. REMOVAL OF STORE.—When the proprietor of a pharmacy, drug store or store has taken out a store registration certificate and subsequently moves the store to another locality, he may have the change in location certified upon the face of the certificate without the payment of another fee.

9. SIGNS UPON STORES.—The surname only is not sufficient; either the full name of the proprietor or the initials of the proprietor's given name prefacing his surname shall be placed upon the exterior of the premises where the pharmacy, drug store or store is located.

10. RELIEF CLERKS.—A relief clerk must deposit his license with the secretary while using a card license.

11. TEMPORARY ABSENCE CONSTRUED.—"Temporary Absence," provided for by Section 234 of Article XI, of the Public Health Law, is construed as not permitting a licensed druggist to be in personal charge of a registered pharmacy for a period of more than eight hours in each twenty-four.

Licenses and Certificates.

12. SIGNATURES.—Licenses must be signed in india ink.

13. EXCHANGE OF LICENSE.—Any person that holds a license as a pharmacist granted by any legally constituted board of this state previous to the first day of January, 1901, may apply to the board; surrender his license; pay a fee of $5 and receive a license to practice as a pharmacist anywhere within this state.

14. SUBSTITUTE OR DUPLICATE LICENSES.—Substitute or duplicate licenses may be issued to persons in good standing, whose licenses have been lost or destroyed, whether they have been licensed by the present board or by one of the former boards, on the payment of the fee, $5, legal evidence of the loss or destruction of the license must accompany the application for the substitute or duplicate license.

15. STOREKEEPER'S CERTIFICATE.—All certificates granted certified storekeepers shall contain a list of such articles as may be sold under this form of registration.

a. *Fee.*—The fee for storekeeper's certificate of permit and registration of store shall be $5, $3 for the certificate of permit and $2 for registration of the store.

b. *Poisons.*—The following poisons sold by certified storekeepers must be sold in original packages only and must be put up by a licensed pharmacist whose name and business address must be displayed upon the package: Laudanum, carbolic acid, tincture of iodine, tincture of aconite, tincture of belladonna.

c. *Prohibitions.*—The sale of chloral, cocaine, morphine and opium by certified storekeepers is prohibited.

16. APPRENTICES.—a. *Registration.*—Every person that shall enter a pharmacy or drug store with the intention of becoming a pharmacist or druggist shall report to the secretary within three months thereof such facts as the board may require for registration.

b. *Experience.*—Half time experience may be credited to registered apprentices while employed in a pharmacy or drug store and in attendance on a school other than a school of pharmacy.

Examinations.

17. APPLICANTS.—a. *Admission of.*—Applications for examinations shall be accompanied by the fee and must be filed with the Examination Division of the department at least ten days prior to the examination.

b. *Failing in Subjects of the Pharmacists' Examination.*—An applicant that attains 75 per cent. or over, in four subjects and fails in the fifth subject may be examined in that subject within six months without payment of additional fee.

An applicant failing in any subject a second time must be re-examined in all subjects. The applicant that fails in more than one subject must be re-examined in all subjects and may take a subsequent examination within six months without payment of an additional fee.

c. *Failing in Subjects in Druggists' Examination.*—An ap-

plicant that fails in one or more subjects in the examination for assistant druggist, must be reexamined in all subjects and may take a subsequent examination within six months without payment of an additional fee.

18. EXAMINERS.—a. *Number Present; Assistants.*—At least two examiners shall be present at the practical examination of the candidates. Examiners may appoint one or more licensed pharmacists to act as assistants if it shall be necessary.

b. *Report Ratings.*—Examiners shall make their reports of ratings in duplicate and send one copy to the department and one to the secretary of the board.

c. *Minimum Rating.*—Papers should be rated by the examiners at the minimum rate of twenty a day, from the date of receipt.

19. TIME AND PLACE.—The examinations shall be held four times a year in accordance with the Regents' rules, at Albany, Buffalo, and New York.

20. PROGRAM.—The examination for pharmacist and druggists shall occur on the Wednesday and Thursday of the week in which the other professional examinations are held: Wednesday, 9:15 a. m. to 12:15 p. m., materia medica, botany, toxicology and posology; 1:15 p. m., pharmaceutical chemistry; Thursday, 9 a. m. to 12:15 p. m., practical pharmacy, including manufacturing, tests, prescription work and identification of substances; 1:15 p. m., theoretical pharmacy.

21. QUESTIONS.—a. *Purposes of the Pharmacists' Examination.*—The examination for licensed pharmacists shall include questions for determining the ability of the candidate to select and preserve the quality of drugs handled by him, as well as for testing the thoroughness of his knowledge of the business in all its branches. The candidate must attain a general average of 75 per cent. with no less than 60 per cent. in any one subject.

b. *Purpose of the Druggist Examination.*—The examination for licensed druggist shall have for its object to determine whether the candidate has a reasonable knowledge of pharmacy, dispensing, compounding of drugs and the detection of incompatibilities and overdoses. The candidate must attain a general average of 75 per cent. with no less than 60 per cent. in any one subject.

c. *Number of Questions in the Written.*—In the written examinations there shall be fifteen questions of ten credits, in each paper, ten of which must be answered as specified on the paper.

d. *Samples in the Practical.*—In the practical examination ten samples shall be submitted for identity, which shall be Pharmacopoeial or National Formulary origin, five of which shall be crude drugs and five shall be galenicals or chemicals.

2. PRACTICAL EXAMINATIONS.—a. *For Licensed Pharmacists.*—These shall consist of the manufacture of two galenicals; the dispensing of three prescriptions and two tests for identity or impurity. The values in this examination shall be: official title, per cent.; common name, 20 per cent.; prescriptions, 30 per cent.; manufacturing, 20 per cent.; tests, 20 per cent.; total, 100 per cent.

b. *For Licensed Druggist.*—These shall consist of the identification of four crude drugs; four galenicals or chemicals; the manufacturing of two galenicals, and the preparation of two prescriptions. The values in this examination shall be: official title, 16 per cent.; common name, 24 per cent.; manufacturing galenicals, 40 per cent.; prescriptions, 20 per cent.; total, 100 per cent.

23. CANDIDATES.—a. *Identity.*—The names of candidates shall not appear on answer papers. Candidates shall be identified by numbers on file in the department.

b. *Answer Papers.*—An answer paper bearing the candidate's name or any other designation which could or would reveal the candidate's identity to the examiner, must be forwarded to the secretary unrated. He shall thereupon send such answer paper to one of the other examiners for rating, making sure that no evidence of the candidate's identity remains on the paper.

24. [illegible] EXPERIENCE *In Lieu of Study.*—A full [illegible] in any school of pharmacy registered by the Regents shall be accepted as the equivalent of the same [illegible] of study.

Profession and Preliminary Educational Requirement.

25. [illegible] The license of another state board of pharmacy [illegible] to the Regents that was issued prior to January 1, 1910, may be accepted as meeting the professional requirements for admission to the examinations for licensed pharmacist when the applicant affords evidence of having had the general preliminary education, the experience and the other qualifications required under the present law and the rules.

26. PRELIMINARY EDUCATION.—The pharmacy student certificate issued by the Regents or its equivalent, must be filed with the executive officer of the pharmacy school not later than Dec. 31, of the year in which he enters on his first course, but students unable to meet the English essential for qualifying certificates prescribed by Section 365, of the Regents' Revised Rules, may pass the same before entering on the second year of the course. Students in course for a degree are not permitted to begin their attendance on any session later than Nov. 15. The department shall revise the list of matriculates submitted by the pharmacy schools of the state on or before Nov. 15, each year, and shall report the result of such revision to the dean on or before Jan. 1, following.

27. PROFESSIONAL EDUCATION.—The rules adopted by the Regents' and the board for the inspection and registration of schools of pharmacy under the amended law of 1905 remain in force unless specifically repealed by Article XI, of the Public Health Law or by these rules.

NEW YORK PH.A. SCHOLARSHIPS AWARDED.

Fine Class of Applicants and Every One Deserving of Preferment—All But One Matriculates.

Editor The Pharmaceutical Era:

A great deal of interest was aroused at last annual meeting of the New York State Pharmaceutical Association held in Saratoga last June, by the announcement of the gift of several scholarships in the different colleges of pharmacy throughout the State, these scholarships to be awarded by a committee appointed by the president of the State Association.

Although little time remained between the time these scholarships were announced and the opening of the colleges of pharmacy, nevertheless the committee made plans at once for the awarding of the Albany and Buffalo scholarships—those in the New York and Brooklyn colleges not being available this year. The committee decided that applicants should be at least seventeen years old; have fifteen Academic Regents counts; worked for at least two years in the drug business in New York State; and be of good moral character.

There were numerous applications for these scholarships. For the John L. Thompson & Sons Co. and the Samuel C. Bradt scholarships in the Albany College, five qualified. For the Buffalo College scholarship seven qualified. Members of the committee met these young men and gave them an examination covering work which the average clerk would have during his first two years in a drug store, and this gave the committee a good opportunity to note the personality of each applicant. In making its award the committee considered age, experience, scholarship, character and personality.

The John L. Thompson & Sons' Co. scholarship was awarded to John L. Hemstead, Waterford, N. Y., the Samuel C. Bradt scholarship to Nelson R. Frasier, Glens Falls, N. Y., and the Buffalo College scholarship to Lorne P. Cottrill, Buffalo, N. Y.

Many interesting facts were brought out by the committee. The writer came in contact with the applicants for the Albany College scholarships and among other facts were brought out that every applicant was supporting himself and had some money deposited in a bank, although some of the young men had started work for four or five dollars a week and paid some board out of this amount. This certainly speaks well for the class of young men who applied for these scholarships and showed that they certainly had grit, thrift and perseverance. Every one of them was worthy of a scholarship and how much the committee wished it had a scholarship for each applicant.

Of the unsuccessful candidates, all except one who applied for the Albany College scholarship, matriculated in that college and in the Buffalo College all applicants matriculated.

It is, of course, impossible to say how many of these young men were induced to enter college by the scholarship agitation but it cannot help but be productive of much good, and an increase in the number of young men entering the drug business.

The committee earnestly hopes that it may have many more scholarships at its disposal next year.

Hudson, N. Y., Nov., 1910 ARTHUR S. WARDLE.

KINGS CO. USES POSTAL PROPAGANDA MEDIUM.

Pharmaceutical Society, However, Will Continue Detail Work Upon Which It Has Spent $4,000.

CONSIDERABLE discussion was aroused at the November meeting of the Kings County Ph. S., held at the Brooklyn C. P., by the report of Charles Heimerzheim, chairman of the Trade Matters Committee, which was to the effect that the detail man, Dr. Van Horne, was better received by the physicians than ever before. Mr. Heimerzheim was of the opinion that the only solution for successful propaganda was continuous and energetic detail work and he thought that the use of any kind of literature, such as postal cards, pamphlets, etc., would not entirely take the place of the detail man.

Dr. Muir spoke of the $4,000 spent on propaganda by the society during the past four years, for which no contributions had been solicited, a record, he declared, which probably could not be beaten by any other pharmaceutical society. Philadelphia druggists, he said, had accomplished great results through their propaganda, but their organization taxed them $12 per year.

President Rehfuss favored sending literature to the physicians each month enlarging on one U. S. P. or N. F. preparation, the expense for this to be additional to the detail work. It was voted that the committee have printed 1,000 postal cards, expounding the qualities of one or two seasonal official preparations, the same to be sold to members at 60 cents per half hundred, and to be stamped by the druggist with his name and address. The committee was granted $60 to continue its work.

Relative to the 'phone question, Mr. Heimerzheim reported that Mr. Cox, of the New York Telephone Co., had assured him that the matter of better commissions for Kings County druggists had not been dropped. The Public Service Commission, Mr. Heimerzheim said, contemplated paying some attention to this question and that the society's committee would attend any hearings that might be granted.

Thomas J. Keenan presented an interesting address on foreign pharmaceutical journals, in the course of which he discussed the subscription rates, time of publication, professional standing, editorial ability, technical capacity, the surprising absence, in a few cases, and the great bulk of advertising, in at least one, of these publications. Mr. Keenan read a letter written by a misinformed physician and an editorial based on the letter, both of which touched on the local morphine ordinance situation and were published in a recent issue of a New York morning paper, and also a reply thereto, the latter meeting the hearty approval of the majority.

A subject pertinent to the local profession, discussed by the members was the advisability of the pharmaceutical associations being represented before the charter revision committee of New York City, in order to be protected from the ordinance-making power of the Board of Health. Dr. Joseph Kahn suggested that under the new charter, an advisory pharmaceutical committee be given power to confer with the Board of Health on all ordinances affecting pharmacists.

Otto Raubenheimer reported the untimely death of Professor Hallberg, and it was decided to send engrossed resolutions to his widow, and the Chicago C. P., deploring the great loss to pharmacy. Mr. Raubenheimer announced that at the December meeting, J. Leon Lascoff would read a paper on "Difficult Prescriptions."

Treasurer Adrian Paradis reported balances of $415 on hand in the society treasury, and $9,735 in the college treasury. Five new members, George Whitmough, Fred. V. Spamer, Alexander Kamenetsky, Alfred M. Gay and Arthur W. Florence, were voted in.

N.Y.R.D.A. Hot After Souvenir Givers

At the November meeting of the New York Retail Druggists' Association the custom of giving away souvenirs by which certain druggists on the East side of New York City seek to attract trade to their stores was the principal subject of discussion. The practice was considered obnoxious by the members and it was decided that a $10,000 fund be raised with which to put a stop to it, even if the same weapons had to be employed or legislation secured to obtain such result.

The association will hold as usual its annual New Year's Eve ball and banquet at Westminster Hall, 73 Lenox avenue, and a splendid time is anticipated. Officers will be elected at the monthly meeting, Dec. 23.

BOARD EXAMINATIONS

Ohio.

COLUMBUS, Nov. 20.—The following is a list of successful applicants at the October examination of the Ohio State Board of Pharmacy:

Pharmacists—J. B. Wilson, John S. Greenwood, Columbus; Aubrey Goldrick, Harry Conners, M. K. Larkworthy, Harry M. Ackermann, Cleveland; E. G. Hegeman, Robert A. Woestmann, E. W. Niederhofer, Mathias Kleiber, Jr., John G. Burkhardt, Edw. C. Matlock, Wm. P. Meissner, Ernest W. Wilfert, Daniel Hawkins, John P. Kuhn, Albert P. Krause, Cincinnati; Ralph Cutler, Frank M. Blank, Akron; F. S. Simmerman, Medina; Frank R. Smith, Fremont; Rudolph H. Raabe, Ada; Bart F. Blosser, Hicksville; Wm. H. Ostot, Springfield; Chas. S. Roberts, North Baltimore; Howard M. Bergert, Canton; John C. Holdgraf, Oak Harbor; Chloe E. Greiner, McComb; Clarence B. Jameson, Lebanon.

Made a grade high enough on their pharmacist examination to entitle them to an assistant pharmacist certificate—Frank R. Ripley, Edw. H. Helms, H. F. Hagedorn, A. C. Serra, Cleveland; Bert R. Mull, Bryan; M. N. Ford, Delphos; C. G. Ungericht, Greenville; John Pamfile, Hubbard; C. P. Sohn, Jr., Allegheny, Penn.; H. C. Zimmerman, Dayton; Howard McLees, Zanesville; A. H. Finley, Washington, C. H.

Satisfactory Assistant Pharmacists—J. Frederick Moser, Columbus; John R. White, Jr., Cleveland.

Illinois.

SPRINGFIELD, Nov. 10.—At the November examination of the Illinois State Board of Pharmacy in Springfield 9 of the 32 applicants for registered pharmacist and 14 of the 17 candidates for assistant pharmacist were successful. Their names follow:

Registered Pharmacists—J. Elmer Arkins, LaSalle; Walter A. Fish, Springfield; John W. Finley, Decatur; Walter T. Gerding, Collinsville; Jacob Kohn, Chicago; John Larsen, Chicago; Justus T. Millen, Springfield; Ralph S. Nichols, Peoria; John Regus, Jr., Melrose Park.

Assistant Pharmacists—Samuel B. Adler, Chicago; Grover B. Carter, Rushville; Samuel J. Denton, Beardstown; Albert Gerding, Collinsville; Louis A. Gorham, Jacksonville; Isadore E. Kitowski, Chicago; Edgar F. Riffey, Springfield; C. G. Robison, Carlinville; Raymond E. Roberts, Springfield; Wm. J. Schelble, Springfield; Frank W. Steimle, Kewanee; Orville C. Smith, Springfield; Clarence A. Withey, Chicago and Charles R. Withee, Jacksonville.

The next examination for registered pharmacists will be held in Chicago, Dec. 6, at 9 a.m., at 87 Lake street, and for assistant pharmacist will be held in Chicago on Dec. 8, at 9 a.m., at 87 Lake street. The next apprentice examinations throughout the State will be held Dec. 2.

Kentucky.

FRANKFORT, Nov. 10.—At the meeting of the Kentucky Board of Pharmacy held in Winchester in October of a class of 23 applicants Clifford J. Dill, Ashland, Ky., qualified as a registered pharmacist and the following passed the examination for assistant—A. T. Bassett, Mt. Sterling; William Dern, Maysville; C. E. H. Buschemeyer, Louisville; C. J. Kline, Louisville; H. M. Hubbard, Lexington; W. H. Mahood, Catlettsburg; T. K. Richards, Owingsville; B. A. Newhall, Louisville; Gilbert Satterwhite, Mt. Sterling; H. A. Oelrich, Covington; G. V. Theobald, Williamstown.

At the annual meeting of the board the following officers were elected for the ensuing year—president, James O. Cook, Hopkinsville; treasurer, Robin H. White, Mt. Sterling; secretary, J. W. Gayle, Frankfort; chairman executive committee, James H. Martin, Winchester. Addison Dimmitt, Louisville, qualified as the newly appointed member of the board, succeeding James E. Cooper, Lexington, whose term expired. The next examination will be held in Covington, Jan. 10-11. Applications must be filed at least ten days earlier.

North Dakota.

LISBON, Nov. 10.—At the October meeting of the North Dakota Board of Pharmacy, held at Fargo, Bert Finney, of Bismarck, qualified as a member. H. L. Haussman was elected president and W. S. Parker was re-elected secretary-treasurer. The next meeting will be held at Fargo on March 21. At the October examination the following qualified:

Registered Pharmacists—George R. Dougherty, Ross; Joseph Evander, Williston; A. J. Gunderson, Valley City; Herman E. Hansen, Willow City; Walter A. Knoop, Hebron; Leroy N. Larson, Atwater, Minn.; Luke O'Reilly, Bisbee; J. F. Schulte, St. Paul, Minn.; Roy C. Stinson, Grand Forks; Mark L. Varnholt, Leeds; Perry N. Walters, Minot, and O. E. Nerby, Thor, Iowa.

Assistant Pharmacists H. N. Counter, Rolette; Earl Davis, Lehr; E. A. Helleman, Minot; Arthur Anderson, Oberon and N. O. Wright, Kermit.

Massachusetts.

BOSTON, Nov. 10.—Less than one-fifth of those who took the examinations before the Massachusetts State Board of registration in Pharmacy during October succeeded in passing. The three classes examined contained 52 members, and certifi-

cates of registration were issued to 10 as follows: Adin F. Fred[illegible] of Peabody; Harry S. Jaskiel, Everett; Edwin J. Mars[illegible], East Boston; Edward I. Campbell, Hyde Park; Howard F. Gilchrist, Roxbury; Charles J. Shattuck, Pawtucket, R. I.; Arthur H. Jenness, Worcester; John Nesson, Gloucester; Robert C. Donelson, Boston; William H. Phelps, Fall River.

Assistants' certificates were granted to 18 as follows: John F. Barrett, Chestnut Hill; Ralph Gualdieri, Chelsea; Herbert J. Mc[illegible], New Bedford; Jos. Weiner, Boston; Adolph C[illegible], Chelsea; Cornelius D. Lynch, Hyde Park; James I. Moriarty, Pittsfield; Charles A. Papanti, Boston; Herbert R. Richardson, West Somerville; Walter S. Silsby, Springfield; Albert A. Stein, Boston; Wayne A. Gross, Salem; Max Mattuson, Boston.

Oklahoma.

STROUD, Nov. 10.—Secretary J. C. Burton, of the Oklahoma State Board of Pharmacy announces that the following were successful at the October examination in Oklahoma City:

Registered Pharmacists—Harry Courtney, Lamont; E. C. Herrington, Shawnee; S. A. Howell, Geary; H. S. Miller, Oklahoma City; J. D. Owens, Norman; I. T. Stockdell, Oklahoma City.

Granted certificates as registered pharmacists on diplomas from schools of pharmacy recognized by the board—Geo. S. Alcorn, Oklahoma City; Frank F. Ballman, Wall Lake, Iowa; C. F. Blankenship, Fairview; Benjamin H. Day, St. Paul, Minn.; S. E. Gilkeson, Claremore; Stuart L. Kleckner, Mifflinburg, Pa.; A. S. Lindemann, Chicago, Ill.; Frank A. Maselli, Pittsburg, Pa.; Chester A. Mace, Lockland, Ohio.; Harold W. Ott, Duncan; W. O. Poole, Williamson, W. Va.; Ned J. Peabody, Sapulpa; Chas. A. Vanzandt, Ida, Miss.; Chas. M. Walker, Britton.

After the January 1911 meeting no schools of pharmacy will be recognized by the Oklahoma board, for the registration of candidates on diploma, without examination, except such schools as comply with the requirements of the National Pharmaceutical Syllabus Committee. The next regular meeting will be held in Oklahoma City, Jan. 10-11. Applications should be filed at least ten days earlier.

Minnesota.

ST. PAUL, Nov. 10.—Charles T. Heller, secretary of the Minnesota State Board of Pharmacy, announces that the next examination will be held in Minneapolis, Jan. 15. At the October examiation the following qualified:

Pharmacists—Floyd H. Hubbard, Minneapolis; Emma Minder, Ortonville; M. J. Johnson, Fulda.

Assistant Pharmacists—B. A. Baldowsky, Milaca; W. J. Mueller, Duluth; W. A. Gokey, St. Paul; John A. Roth, Springfield; J. E. Morgenson, Minneapolis; H. H. Snyder, St. Paul; D. C. Alcott, Aitkin; A. G. Doty, Faribault; E. A. Eichinger, Rochester; C. J. Miller, Mankato.

Utah.

SALT LAKE, Nov. 10.—The following passed the examination held last month by the Utah State Board of Pharmacy and qualified to practice pharmacy: Walter Dupont, Murray; Roy E. Rudolph, Logan; L. A. Allen, Salt Lake; W. B. Sams, Franklin, Ida.; Carl A. Ibk, Ogden.

Rhode Island.

PROVIDENCE, Nov. 20.—At the October examination of the Rhode Island Board of Pharmacy the following applicants were successful: Earl O. Swindells, Frederick C. Gill, Henry J. Vaillancourt, all of the city of Providence.

N. Y. PHARMACISTS MAY FIGHT HEALTH BOARD.

Conference to Await Latter's Decision out of Courtesy —Ready to Take Case to Supreme Court.

Representatives of the various pharmaceutical organizations of New York City met in conference recently at the New York College of Pharmacy in order to discuss the status of the amended morphine ordinance. Dr. Wm. Muir, chairman, reported a likelihood of the Board of Health modifying the measure. A resolution, in effect to permit the sale of U. S. P. and N. F. preparations containing not more than two grains of opium to the ounce and of Sun cholera mixture without prescription, was presented but not adopted.

Several present advocated that the issue be brought immediately into the courts and pointed out that the various organizations throughout the city had sufficient finances at hand to carry their case before the Supreme Court. Dr. Muir objected to any such action at present in view of the courtesy shown by the Board of Health in hearing and considering objections. The meeting was adjourned subject to chairman's call.

National Pharmaceutical Society to Hold Annual Ball.

The National Pharmaceutical Society will hold its second annual ball at Liberty's Casino, St. Ann avenue and 156th street, New York City, Dec. 15. An elaborate program has been prepared for the occasion, a feature of which will be a number of attractive stunts by prominent pharmacists.

NEW FILTER PAPER, SALARIES, "AD" ADVICE.

New York Branch Listens to Pertinent Discussions— Clerks Can Do Much to Aid Their Employers.

AT the November meeting of the New York Branch of the A.Ph.A., held at the New York College of Pharmacy, Dr. George C. Diekman presented a very interesting report as chairman of the committee on pharmacy. A black filter paper now being manufactured excited considerable wonder that it hadn't been thought of before. A tabulation of German pharmacists, licensed and unlicensed, was remarkable in that practitioners in the empire were probably fewer in number than in the State of New York. Salaries vary from an average of $450 for assistants, $600 for pharmacists of five to nine years practice, $720 after 10 to 14 years, to $1,080 after 25 years of professional work. These figures, however, are all computed from the number of marks actually used in payment, and, as was pointed out, the buying power of the mark was higher in Germany than that of an equivalent amount of money in the United States.

M. P. Gould delivered an address on "Advertising for Pharmacists," in the course of which he discussed the commercial development of the drug store. He began by stating that he was not a pharmacist, and that he looked at the drug business as a customer, not as a druggist. In entering a drug store, a "professional pharmacy," he said, the outsider saw first the soda fountain, the candy department, cigar stand, and other departments, in fact, a small-sized department store. In the rear was the scientific part of the pharmacy, the prescription department.

Mr. Gould emphasized the fact that there was no use advertising a "junk-shop." Another principle he laid down was that 'the more people you get into your store, the more you are likely to sell something." A factor against which the department stores are fighting and which constitutes the main strength of the small store, particularly the drug store, is, he said, the "lightning sale," the ability to hand over instantly the goods purchased and the change.

Relative to using 1-cent or 2-cent stamps on circular letters, he thought that the 1-cent stamp would bring just as many replies and orders, providing a suitable announcement was printed on the envelope. Cards enclosed in envelopes brought twice as many replies, in his experience, as cards not so delivered. Blotters sent to physicians he considered a good "ad" if the druggist kept at it, but one batch could not be expected to bring any results. The profitless sale of stamps, Mr. Gould considered an unfortunate but necessary form of accommodation from which the druggist has no relief. Another form of advertising, quite direct in its action, was the treatment accorded the clerk by the proprietor. In this, Mr. Gould was supported by George J. Alexion, the latter a clerk. A clerk can advance his employer's business of his own accord to a greater extent than it can be done by any other means. On the other hand he can retard and harm the business more than can any other factor. Every proprietor "loves" his clerk, said the speaker, but upon the latter's good treatment depends much of the success of any store.

Resolutions were adopted expressing the loss that pharmacy had sustained by the death of Prof. Hallberg and a page to his memory was set aside in the minutes. A similar honor was accorded to the late Michael Rafter, of Manhattan.

Manhattan Ph.A. to Meet in Afternoon.

A radical change was instituted by the members of the Manhattan Pharmaceutical Association at their November meeting held at the New York College of Pharmacy, those present voting to absolve all delinquents of back dues, to reduce the annual dues to $2 and that hereafter meetings shall be held at 2.30 p.m. on the third Monday of each month.

A membership committee was appointed and it will make a strenuous effort to increase the association's membership under the new conditions. To induce enthusiasm in this direction, J. Leon Lascoff, member of the New York Board of Pharmacy, will present, at the annual meeting in April, a copy of the latest edition of the U.S.P. or a standard text book on pharmacy of corresponding value to the person responsible for the largest number of applications.

A pleasant and interesting evening was spent in discussing and acting upon the changes mentioned and it was the unanimous opinion that under new conditions interest in the organization should take a decided boost.

A MONTHLY SERIES OF PRACTICAL AND EDUCATIONAL QUESTIONS FOR DRUG CLERKS AND STUDENTS, WITH THREE CASH PRIZES EACH MONTH FOR THE MOST CORRECT ANSWERS.

THREE PRIZES of $5.00, $3.00 and $2.00 respectively, will be paid each month to the three persons submitting the largest number of correct answers to each monthly series of questions. In the event of a tie for any one of the prizes offered, such prize will be equally divided among the successful contestants. This competition is open to all who may desire to compete.

ANSWER BY NUMBERS and write your answers upon letter size paper (8x10 in.), one side only, with your Name and Address at the top of each sheet. Also number your sheets.

ALL ANSWERS for each month's series of questions must be sent at one time, and must be with us not later than the 15th of the following month.

CORRECT ANSWERS to each series of questions and the names of the three contestants who have been awarded the prizes will be published in the Era, after the close of the respective contests.

WE INVITE our readers to send us their questions for publication in this department, particularly questions related to the practical work of drug clerks.

ALL COMMUNICATIONS relating to this department should be kept separate from other correspondence, and addressed to

The Quiz Master
Care of Pharmaceutical Era 82 Fulton St., New York

First Prize Winner, October Quiz Series.

CARL H. FLANDERMEYER,
Cleveland, O.

Carl H. Flandermeyer, of Cleveland, Ohio, who wins first prize in the October Series of Questions propounded by the Quiz Master, comes of a family of pharmacists whose names have been familiar to the drug trade of the Lake City for more than a generation. In preparing for his life work it was therefore natural that he should study pharmacy. After leaving the public school he attended the Cleveland School of Pharmacy for three years, graduating with the degree of Ph.C. He later passed the Ohio Board of Pharmacy examination, was registered as a pharmacist and has been following the business ever since. He has been a frequent contestant in the Quiz Master's contests and his papers show that he is a student of more than average ability.

Questions, December Series, 1910.

1—What method is used in the nomenclature of the Pharmacopoeia for indicating the titles of the various official substances?

2—Why should the word "colchicum" without any qualification be insufficient as the official Latin name for colchicum corm?

3—Why are the words "mild" and "corrosive" respectively employed in the names of two official chlorides?

4—What number of persons constitute the Pharmacopoeial Committee of Revision of the Board of Trustees?

5—How many more grains in a troy than in an avoirdupois ounce?

6—How many apothecary ounces in 1½ pounds (avoirdupois) of potassium iodide? Show work.

7—How many grains will each of the following quantities of water weigh? Aqua, ℥xvi? Aqua, f. ℥xvi? Aqua, 16 oz.?

8—What is the official Latin name for magnesium sulphate? Bismuth subnitrate? Oil of wintergreen? Spirit of peppermint?

9—Which of the following are Pharmacopœial and which are National Formulary preparations? Garlic, aromatic, elixir, emulsion of castor oil, antiseptic solution?

10—What is the volume in cc. of two pints of alcohol? Show work.

11—Name at least three of the advantages claimed for the metric system of weights and measures.

12—What relation exists between the units of length, measure and weight of the metric system?

13—What poisonous substance is liable to be mistaken for Epsom salt and what is the antidote for that poison?

14—What drugs enumerated in the Federal Food and Drugs Act are required to be declared upon the label when present in any medicinal remedy?

15—How do you find the approximate percentage of alcohol in a mixture when the percentages of alcohol in the various substances forming the mixture are known?

16—What is the approximate percentage of alcohol in a mixture made by combining tincture of opium, 6 fl. drams; tincture of capsicum, 3 fl. drams; tincture of rhubarb, 3 fl. drams; spirit of camphor, 6 fl. drams; spirit of peppermint, 6 fl. drams, and alcohol, 6 fl. drams? Show work.

17—Why is diluted alcohol used in making belladonna and stramonium ointments?

18—What is meant by "valency"? Does any element possess different valencies? If so, give an example.

19—What three official fluidextracts are made with acetic acid as a menstruum and why?

20—What official fluidextracts are made with a hydro-alcoholic acid menstruum? What is the function of the acid constituent in each of these fluidextracts?

21—How many minims of a 5 per cent solution of morphine are equal in strength to one-fourth of a grain of morphine?

22—What is an ester and what are the official esters?

23—What is the official Latin name for coriander fruit? Into what Pharmacopoeial preparations does the drug or its principal constituent enter?

24—What is the object of (a) drying drugs? (b) of the sand bath in the processes involving heat?

25—What two official acids are obtained from nutgall?

26—What menstrua would you recommend in the extraction of aromatic drugs? State briefly your reasons.

27—What are the characteristic allotropic modifications of phosphorus? Which of these modifications is official and into what U.S.P. and N.F. preparations does it enter?

28—Give an example of a drug which the Pharmacopoeia describes as a rhizome, a tuber, petals, flower buds, bulb.

29—What are the official Pharmacopoeial oxalates?

30—What is phenol? Phenic acid? Phenylic alcohol? What unsaturated aromatic phenol is official?

31—What conditions are required for making large crystals?

32—What is a supersaturated solution?

33—What is the meaning of the term "awn" as used by botanists? In the description of what drug does the word appear in the Pharmacopoeia?

34—What is the difference in weight of a U. S. pint of distilled water and an Imperial pint of the same liquid at standard temperature?

35—What is the equivalent of 0.4873 avoirdupois pound in units of apothecaries weight?

36—How are oleoresins made?

37—What is a styptic? Name a U.S.P. preparation which conforms to your definition.

38—What are five official Pharmacopœial liquids which have a lower boiling point than water?

39—What are five official Pharmacopoeial liquids which have a higher boiling point than water?

40—What are two official digestive ferments? In what media is each most active?

41—What are three Pharmacopœial substances characterized as or derived from the milky juices of plants?

42—What quantity of strychnine acetate, expressed in the apothecaries system, is contained in each dose of the following prescription?

Strychnine acetate	0.21 gram
Diluted acetic acid	3.50 cc.
Alcohol	25.00 cc.
Compound tincture of cardamom	1.00 cc.
Water enough to make	100.00 cc.

Dose, ten minims 3 times a day.

43—What is the object of triturating the tar with sand in the preparation of syrup of tar?

44—What two salts of hydrocyanic acid are official and what are their respective average doses?

45—What is fusel oil and what products are named by the Pharmacopœia as likely to be contaminated with it?

46—What is the difference between emulsification and saponification?

47—What reaction occurs in compounding a mixture containing syrup of tolu and sodium bicarbonate?

48—What substances increase the solubility in water of (a) iodine? (b) saccharin? (c) corrosive sublimate?

49—What are four salts of mineral bases which possess astringent properties?

50—What acid is obtained from argols? What are two official double salts of this acid?

Competitors, Please Notice.

The above list of questions is the complete series for December, and all who desire to compete for the prizes should see that their answers are received by the Quiz Master, not later than January 15. Do not send your answers in parts, but mail them all at one time, and be sure to follow the instructions given at the head of this department.

The judges in the October contest of the Quiz Master's department have awarded the prizes as follows:

First prize, $5, to Carl H. Flandermeyer, Cleveland, Ohio.
Second prize, $3, to Chas. K. Stottlemeyer, Hancock, Md.
Third prize, $2, to C. M. Morse, Lawrence, Mass.

Contestants wishing to know the grade which they have made in the October contest may obtain this information on request by sending two cents for postage to the Quiz Master.

Questions and Answers, October Series, 1910.

1—What is the nature of the mixture which results from triturating myrrh with water?

When triturated with water, myrrh yields a brownish-yellow emulsion.

2—What changes does creosote water tend to undergo if allowed to stand for some time?

Creosote water on standing, becomes turbid, and deposits tarry-like bodies formed by the decomposition of the creosote.

3—What is meant by a saturated solution?

A saturated solution is one formed when a liquid has dissolved all of a solid it can take up at that temperature. Saturation of a liquid with one solid does not prevent it from dissolving other solids, and in some cases the solvent power of the liquid is thereby increased.

4—Does the sign "℥" apply to the same system of weights as the sign "oz."?

No, the sign "℥" represents the apothecary ounce of 480 grains, while the sign "oz." represents the avoirdupois ounce of 437.5 grains.

5—How would you mix a powder containing bismuth subnitrate and powdered gambir, if the product so formed were directed to be used by inhalation?

Mix the powders lightly with a spatula on a powder paper, but do not triturate in a mortar, as such trituration may cause the bismuth subnitrate and the gambir to aggregate and thereby render the finished product unsatisfactory.

6—What is the therapeutic action of Irish moss?

Demulcent, nutrient and dietetic, although some authorities state that the gum which enters largely into its composition does not digest very readily.

7—What is meant by calcination?

Calcination is the process of separating volatile substances from fixed inorganic matter by the application of heat without fusion.

8—How many liters in five gallons of alcohol? Show work.

18.927 liters. Since there are 16 fluid ounces in a pint and 8 pints in a gallon, then in one gallon there are 128 fluid ounces (16 × 8 = 128). In one fluid ounce there are 29.5737 cc. and in 128 fluid ounces there are 3785.43 + cc. (29.5737 × 128 = 3785.4336) which is equivalent to 3.7854 + liters [3785.4336 ÷ 1000 (cc. in a liter) = 3.7854+]. Then in five gallons there are 18.925 + liters (3.7854 × 5 = 18.927).

9—What occurs when calcium hydroxide test solution is added to an aqueous solution of tannic acid?

On adding to an aqueous solution of tannic acid a small quantity of calcium hydroxide T. S., a pale bluish-white flocculent precipitate is produced, which becomes more copious and of a deeper blue by the addition of a moderate excess of calcium hydroxide T. S., while a larger excess of the latter, imparts a pale pinkish tint to the solution.

10—What effect do salts which are alkaline to litmus paper have upon aqueous solutions of alkaloidal salts?

All salts having an alkaline reaction to litmus precipitate alkaloids from solutions of alkaloidal salts.

11—How should petroleum benzin be kept?

Petroleum benzin should be carefully kept in well-stoppered bottles or in tin cans, in a cool place, remote from lights or fire.

12—What precautions does the Pharmacopœia give for the storing and handling of silver oxide?

According to the Pharmacopœia, silver oxide should be kept in dark amber-colored vials and should not be triturated with readily oxidizable or combustible substances and should not be brought in contact with ammonia.

13—What two U.S.P. tinctures are solutions of inorganic substances in alcohol?

Tincture of iodine and tincture of ferric chloride.

14—What is a least one volatile oil which is frequently an important constituent of the perfume for dentifrices?

Oil of peppermint and oil of wintergreen are extensively employed in the manufacture of dentifrices on account of their agreeable odor and the refreshing and stimulating properties they impart to such preparations.

15—What is meant by antiseptics?

Antiseptics are substances which have the power of preventing putrefaction.

16—Is oil of cade soluble in water or alcohol?

Oil of cade is almost insoluble in water; it is only partially soluble in alcohol.

17—With one exception, what proportion of volatile oil to purified talc is used in preparing those U.S.P. waters in which purified talc is employed as a filtering medium.

Two cc. of volatile oil and 15 gm. of purified talc are used in preparing 1000 cc. of the finished product.

Oklahoma Druggist a Prize Winner.

W. R. WILES,
Braman, Okla.

W. R. Wiles, a prize winner in the June Contest of the Quiz Master's Department, is associated with his father as joint proprietor of the Braman Pharmacy, Braman, Okla., the firm name being Wiles & Son. Mr. Wiles is an Iowan by birth although he has resided in Oklahoma since he reached 17. He graduated from the Blackwell High School and later entered the University of Oklahoma School of Pharmacy. He did not remain long in the latter institution, however, but entered a drug store at Nardin, where he continued for some time, taking in the meantime instruction in the ERA COURSE IN PHARMACY from which he graduated in 1901. He then went before the Oklahoma Board of Pharmacy and successfully passed the examination as a registered pharmacist. Years of work as a drug clerk and as a proprietor have not caused him to lose interest in the sciences which go to make up pharmacy or to begrudge the time to test his knowledge concerning the profession.

18—What water is the exception referred to in the previous question?

There is really no exception as would appear from a reading of the previous question. In the formula for camphor water a larger proportion of medicament is employed than in the official waters made from volatile oils, but camphor is not classed as a volatile oil. In the preparation of bitter almond water no talcum is used, the oil being directly dissolved by agitation in the distilled water.

19—What is the nature of odor evolved, when saccharin is heated above 220° C.

When saccharin is heated above 220° C., the odor evolved is that of bitter almond.

20—In preparing oleates, which will dissolve more rapidly, freshly precipitated oxides of the metals, or metallic oxides which have been prepared for some time?

In the preparation of oleates freshly precipitated oxides of metals dissolve more rapidly than oxides which have been prepared for some time.

21—What is the appearance, odor and taste of oil of theobroma?

Oil of theobroma is a yellowish-white solid, having a faint, agreeable odor, and a bland, chocolate-like taste.

22—In physical appearance how does diluted hydrochloric acid differ from concentrated hydrochloric acid?

Diluted hydrochloric acid is a colorless, odorless watery liquid, while concentrated hydrochloric acid is a colorless, fuming liquid, of a pungent odor.

23—What is the chief constituent of the crystalline deposit which frequently separates from oleoresin of malefern on standing?

It consists chiefly of filicic acid, which should be reincorporated before the oleoresin is dispensed.

24—What N.F. preparation does the U.S.P. compound tincture of cardamom closely resemble, and what is the principal difference between these two preparations?

Compound tincture of cardamom closely resembles compound spirit of cardamom of the National Formulary, and differs from it mainly in that the latter preparation does not contain any coloring matter.

25—What are the ingredients used in preparing "Beef, Wine and Iron" N.F.?

Extract of beef, tincture of citro-chloride of iron, compound spirit of orange, water, alcohol, syrup and sherry wine.

26—How may oxalic acid be distinguished from all other common acids?

Oxalic acid is distinguished from all other common acids by the form of its crystals, and by its solution yielding a precipitate with lime water, insoluble in an excess of the acid or in acetic acid.

27—What effect do ammonium salts have upon the solubility of precipitated calcium carbonate in water?

Ammonium salts increase the solubility of precipitated calcium carbonate in water.

28—What should be the colchicine strength of colchicum corm; of colchicum seed?

Colchicum corm should yield not less than 0.35 per cent. of colchicine; colchicum seed, not less than 0.45 per cent of colchicine.

29—The names of substances belonging to what group of organic compounds have the ending "ose"?

The names of members of the carbohydrate group of organic compounds have the ending "ose", thus glucose, saccharose.

30—What is the average official dose of phenacetine; fluidextract of wild cherry; magnesium carbonate; pepsin?

Phenacetine, 7½ grains; fluid extract of wild cherry, 30 minims; magnesium carbonate, 45 grains; pepsin, 4 grains.

31—Considered as a class, what can be said about the odors of volatile alkaloids?

The odor of volatile alkaloids is generally characteristic of their origin. As a rule, they have a peculiar and disagreeable ammoniacal odor.

32—What is the reaction of blood to litmus?

Alkaline.

33—What is mace?

Mace is the testa and arillode of nutmeg.

34—What is known as "virgin" turpentine?

"Virgin" turpentine is the turpentine obtained from a pine tree the first year it is boxed or cut.

35—Why should rubber water bottles be protected from oils and grease?

One Winner or Two? Here's the Picture.

C. M. Morse, of Lawrence, Mass., has been a regular contestant in the Quiz Master's Department for some time and as a prize winner has acquitted himself in a highly creditable manner. With all of his intellectual attainments, however, Mr. Morse has not yet solved the problem of appearing in two places at one and the same time as the accompanying picture would indicate. By a double exposure on the same negative the photographer has succeeded in producing a very good representation of him as a hospital steward at the Soldiers' Home in the dual role of "off and on duty, yet always a pharmacist."

Oils and grease tend to dissolve rubber and therefore are destructive to goods made of this material.

36—What is the solubility of urethane in water; in alcohol; in ether; in chloroform?

Urethane is soluble in less than one part of water; 0.6 parts of alcohol; 1 part of ether and 1.3 parts of chloroform.

37—What is the objection to giving emetics in the treatment of poisoning due to strong acids?

Strong acids usually cause considerable destruction of tissues and thereby weaken the walls of the alimentary canal. If emetics are given in such cases, the walls of the alimentary canal may be ruptured by the spasmodic contractions produced by the action of emetics.

38—How may ferric oxide be detected as an impurity in copper sulphate?

If hydrogen sulphide gas be passed through 10 cc. of the aqueous solution of the salt (1 in 20) to which 1 cc. of diluted hydrochloric acid has been added, until all of the copper is precipitated as sulphide, one-half of the colorless filtrate should not be colored or rendered turbid upon the addition of ammonia water, nor should the remaining portion of the filtrate yield, upon evaporation and ignition, a weighable residue.

39—Is ethyl chloride soluble in water; in alcohol?

Ethyl chloride is slightly soluble in water, and readily soluble in alcohol.

40—If sodium phosphate loses five molecules of water of crystallization upon exposure to air, what will be the weight of seven pounds (avoir.) of sodium phosphate (considered as 100 per cent pure) after the salt has effloresced in air to the extent just stated? Show work.

5.2402 lbs. The molecular weight of the official sodium phosphate is 355.61 and the molecular weight of 5 molecules of water is 89.40 [17.88 (weight of one molecule of water) $\times 5 = 89.40$], then the molecular weight of the effloresced salt would be 266.21 ($355.61 - 89.4 = 266.21$). Since 7 lbs. is the weight of 355.61 parts of sodium phosphate then the weight of one part is .019684 lbs. ($7 \div 355.61 = .019684$) and that of 266.21 parts is 5.2402+lbs. ($.019684 \times 266.21 = 5.2402$), or the weight of the effloresced sodium phosphate.

41—Syrups are closely allied to what other class of U.S.P. preparations?

Syrups are closely allied to the honeys.

42—In what part of plants do volatile oils exist?

Volatile oils may exist in every part of the plant from the root to the seed, and sometimes several oils may be found in different parts of the same plant. They do not all pre-exist in the plant, however, some being the result of fermentative

action between certain constituents of the latter, and others being produced by destructive distillation.

43—What is the botanical name for India senna; for Alexandria senna?

The botanical name for India senna is Cassia angustifolia; for Alexandria is Cassia acutifolia.

44—Briefly state what is about the size and appearance of staveacre.

Staveacre is a seed about 1-5 in. long and ⅛ to ¼ in. broad; it is flattish and has the general outline of a tetrahedron with the broadest side convex.

45—The odor of menthol closely resembles that of what official volatile oil?

Oil of peppermint.

46—Upon exposure to air, what changes does a freshly prepared aqueous solution of pyrogallol undergo?

A freshly prepared aqueous solution of pyrogallol gradually acquires by exposure to air a brown color and an acid reaction, due to the absorption of oxygen. These changes take place very rapidly if the solution contains an alkali hydroxide.

47—What would you dispense upon an order calling for thyroid extract?

Dispense dessicated thyroid glands; thyroid extract is a synonym for this preparation.

48—For what is veronal chiefly used?

Veronal is chiefly used as a hypnotic in the various forms of insomnia, especially that accompanying hysteria, neurasthenia and mental disturbances.

49—What is vinegar?

Vinegar is diluted acetic acid (about 6 per cent), containing often other substances, such as coloring matter, compound ethers, etc., depending upon the method and materials employed in manufacture. The laws of most of the States define vinegar about as follows: Cider or apple vinegar is the product made by the alcoholic and subsequent acetous fermentation of the juice of apples. Wine or grape vinegar is similarly made from the juice of grapes, while malt vinegar is the product from the fermentation of an infusion of barley malt or cereals whose starch has been converted by malt. Sugar vinegar is produced from the fermentation of solutions of sugar, syrup, molasses, etc.; glucose vinegar from the fermentation of solutions of starch, sugar or glucose, and spirit, distilled or grain vinegar is produced by the acetous fermentation of distilled diluted alcohol.

50—What change does honey of rose tend to undergo soon after it is prepared?

Honey of rose deposits honey sugar even upon standing a short time.

A Popular Home Course in Pharmacy.

The ERA COURSE IN PHARMACY is a home study course in pharmacy which is divided into ten parts with recitations and examinations by mail. Thorough instruction is given in General Chemistry, Theoretical and Practical Pharmacy, Botany and Meteria Medica. The cost of the COURSE is $10, and students of average ability can usually complete the work in from ten months to a year. New classes are organized each month and now is a good time to enroll, as studying the ERA COURSE would be an excellent way in which to profitably spend many long fall and winter evenings. A Prospectus will be sent by the publishers of THE PHARMACEUTICAL ERA to any one who applies.

Pharmacy Classes Elect Officers.

CHICAGO, Nov. 20.—The classes of the School of Pharmacy of the University of Illinois have organized and elected the following officers:

[illegible] President, William A. Smith, [illegible] Carl Bode, [illegible] president, L. H. Underhill, vice-president; W. G. Stolzer, secretary; L. E. Stoelzer, treasurer.

BALTIMORE, Nov. 20.—The Junior Class of the Department of Pharmacy University of Maryland, has elected these officers for the year:

President, Charles E. McCormick; vice-president, J. K. Brown; [illegible] D. M. [illegible] Robert R. Bacon.

Prof. Eberle is Now a Chicago Veteran.

CHICAGO, Nov. 22.—At the last meeting of the Chicago V.D.A., E. G. Eberle, president of the A.Ph.A., was duly elected an [illegible] the association.

LIVE DRUG CLERKS ORGANIZE IN HARTFORD.

Objects Social and Educational and Governors are Planning Series of Lectures for Winter.

HARTFORD, Ct., Nov. 20.—The Hartford Licensed Drug Clerks' Association recently organized with 25 charter members, and has secured quarters in room 27, Charter Oak Bank Building, Asylum and Trumbull streets. The objects of the new organization are purely social and educational and the board of governors is planning a series of lectures on pharmacy and materia medica for the winter months, to which the sixty drug clerks in the city will be invited. It is anticipated that the latter will be enrolled as members in the near future inasmuch as the association has already earned the good will and support of the drug store owners. A drug clerks' association flourished in Hartford in 1894 but died on account of lack of interest, and it is the aim of the moving spirits of the present organization to make it more successful than the old one.

The officers are as follows:

President, J. J. Keefe; vice-president, Lester H. Tracy; financial secretary, J. Dolan; recording secretary, C. E. Shaddrick; treasurer, Frank Tierney; board of governors, J. Foster, chairman; John W. Ghent, Alexander Thompson, Frank W. Dunn, James Lynch and Richard Hefters.

The board of governors represents the best sections of the city, being well proportioned among the principal drug stores of Hartford. Meetings occur on the first and third Tuesdays of each month.

Portrait of First Woman Graduate of Phila. C.P.

PHILADELPHIA, Nov. 20.—With unique exercises the women graduates of the Philadelphia College of Pharmacy recently presented to the college a portrait of the late Dr. Susan Hayhurst, of the class of '83, and the first woman graduate in pharmacy in America. Howard B. French, president of the college, presided. The presentation address, prepared by Prof. Joseph P. Remington, was read by Prof. Henry Kraemer. Miss Susanna G. Haydock read a sketch of Dr. Hayhurst, in which she referred to her many-sided character. Tributes were also paid by Charles W. Parsons, of New York; Dr. Anna E. Broomall, Miss Sara L. Naly, Professor Kraemer, Professor Edward Boring, Dr. C. B. Lowe and Mr. French. The portrait was painted by Miss Florence Newton, a young Philadelphia artist.

Eighty-three women have been graduated from the Philadelphia College of Pharmacy since 1883, when Dr. Hayhurst became the pioneer. Of this number, more than half have died. Four were at the presentation. They were Miss Sara L. Naly, of the Women's Hospital; Mrs. L. A. Hance, of the West Philadelphia Women's Hospital; Miss Susanna Haydock, who owns and conducts her own drug store at 2123 Locust street, and Mrs. Charles H. LaWall, wife of the pure food chemist. The committee in charge consisted of Misses Naly and Haydock and Miss Florence Yaple.

Brooklyn Druggists Organize a Social Club.

A number of Brooklyn retail and wholesale druggists met recently at the Kaiser Haus and organized a social club. Plans are under way for several bowling tourneys, card parties and dinners. Officers for the ensuing year are as follows:

President, Adolph Sarnitzsch; vice-president, Henry Barnes; secretary, John Rippinger; treasurer, Stanley Dorn; board of governors, the above officers, Henry Meyer, Martin Kleine and Alexander Gardner.

Committee to draw up constitution and by-laws and select name for organization consists of J. H. Millen, R. H. Richards, Stephen Dorn and Martin Kleine.

Prison Terms for Robbers of Drug Stores.

BOSTON, Nov. 21.—Five of the men who were concerned in robberies of drugstores in Somerville, Dorchester and Roxbury, in October, have been sentenced to state prison for terms varying from six to nine years. They were caught after they had raided a south end restaurant, and were identified by druggists who were held up at the point of their revolvers. The Beacon pharmacy in Somerville and C. L. Blake in Dorchester, were thus victimized, while a few hours after the latter was held up the drugstore of C. H. Davis in Dorchester was robbed.

MOSTLY PERSONAL

T. P. Taylor, United Drug Director and Successful Projector of Chain of Pharmacies in Louisville.

LOUISVILLE, Ky., Nov. 20.—Thomas P. Taylor, president of T. P. Taylor & Co., Inc., one of the leading druggists of the South, who was recently elected a director of the United Drug Co., is chief stockholder of a Louisville company, which now operates four drug stores, and has won fame through its satisfactory and courteous treatment that is offered to all patrons. The reputation of this corporation is widespread throughout Kentucky and neighboring states and Mr. Taylor is no less renowned for having built up his present extensive interests from a nucleus furnished by one store that he began to operate in 1881. An account of the methods by means of which the extraordinary growth of the company has taken place should be interesting to very druggist who contemplates extension of his line.

THOMAS P. TAYLOR,
(Photo by Standiford, Louisville.)

Mr. Taylor began his career in the drug business at Owensboro, Ky., about 1877, entering the employ of W. T. Courtney & Co., as a clerk, the Courtney concern being at that time one of the most prominent drug companies in the state. After remaining with the Owensboro druggists for some time, Mr. Taylor came to Louisville to clerk for Dr. L. E. Eddy, and to gain a thorough knowledge of prescription work from this well known physician. After spending four years in the capacity of clerk, first for a drug firm and next for a physician, Mr. Taylor bought the drug store of A. C. Williams, in this city, at Third and Jefferson streets.

This store furnished an embryo from which the present array of Taylor stores developed and in which the "Taylor-Made" policies first made themselves evident to the public. Mr. Taylor first illustrated his progressiveness and modern methods by establishing two branch Taylor stores, operated in conjunction with the main establishment in Jefferson street. The branches were located in Portland, a western suburb of Louisville. Additional branches were soon established at Third and Market streets and Third and Catherine streets, and the operation of various of these sub-stations in connection with the main store was carried on for some time by Mr. Taylor with great success.

However, in 1902, Mr. Taylor decided that Louisville stood in need of another first-class store in the heart of the downtown district, so the branches were gradually disposed of, and on July 1, 1902, he bought the business of Muswick & Co., in Fourth avenue, between Market and Jefferson streets. This company originated cut-rate prices in Louisville and Mr. Taylor expanded the cut-rate plan. The Muswick house was transformed into Taylor Pharmacy No. 2, the first establishment being continued in operation at Third and Jefferson streets.

With 1904 came the opening of the Seelbach Hotel, the South's premier hostelry, at Fourth and Walnut streets. Mr. Taylor readily saw an opening for a drug store, located in close proximity to the Seelbach, and he secured a site a few doors away from the corner of Walnut street, in Fourth avenue. Here Pharmacy No. 3 was established. Finally, in 1909, to complete a chain of stores, embracing every portion of Louisville's downtown district, Mr. Taylor purchased the business of Foster Baird, at Fourth avenue and Chestnut street. The Baird store was but recently erected and the fixtures and equipment were new, so Mr. Taylor secured Pharmacy No. 4, with all accoutrements ready for land-office business in drug lines.

"In building up my array of stores in Louisville, I have simply expanded with the growth of business conditions surrounding me," said Mr. Taylor, in outlining the plan of campaign that has successfully introduced a chain of Taylor stores into the city. "From the impetus given me at my first store, in Jefferson street, I opened up other stores, and they prospered on account of the attentive service, complete stock, and courteous treatment that is accorded to every one who patronizes a Taylor store.

"Of course, my good fortune in obtaining very favorable locations figured largely in the success of the Taylor stores, but I believe that favorable locations will fall to the lot of any druggist who exercises a little perspicacity and judgment in renting and leasing sites.

"Thorough departmentization and popular prices are the rule in each of the Taylor stores. By combining the preceding factors, you will have a formula that will unlock a door to a new and broader field of activity, such as is not dreamed of by the druggist who is not wide awake to every possibility in his own town."

Believing that the public of the present age look for attractive fixtures and a spick and span appearance in a modern store, of any character whatever, Mr. Taylor makes it a point to equip each store with handsome fixtures, beautiful decorative schemes and to insure absolute cleanliness in every nook and corner of the store. The soda fountains in each of the four Taylor stores are regarded as models of their respective kinds, and each is of beautiful design, with a lavishness of costly material displayed in their construction such as is seldom found.

The soda fountain department in the Taylor business policy forms one of the big items, for each fountain is kept up to the highest possible standard The "Taylor-Made" policy of liberality to customers is exemplified in the fact that each ice-cream soda contains a scoop of whipped cream, while each lemonade contains a scoop of the suitably flavored ice to combine with the drink. These finishing touches to sodas, sundaes and lemonades constitute the liberality feature of soda operations. Absolute purity of ingredients and sanitary service of the highest degree is offered to Taylor soda patrons.

CHARLES A. HAUPT,
of Terre Haute, Ind.

Another big department is the cigar and liquor section, where the best known brands are always kept advertised and on display. Popular prices are also the rule in this department, and a great deal of newspaper advertising is used to exploit the cigar and liquors. In line with the newspaper advertising, it might be said that to the daily newspapers Mr. Taylor attributes much of his success, for he has been a heavy advertiser since his start in the drug business.

The expert service that is offered to the public in the prescription departments of the four Taylor stores is a revelation. The prescription counters in each store are separated from the remainder, not only nominally, but also in reality, for the prescription desks are partitioned off and the prescriptionists, each a registered pharmacist, have absolutely nothing to do but compound remedies according to prescriptions that are brought in by the trade. Every Taylor

store contains a complete stock of rubber goods, and a lady attendant is in charge to cater to the needs of her sex and to show goods in private. Pharmacy No. 2 has a big optical department, in charge of two graduate opticians.

Although Mr. Taylor has general supervision over the entire system he has surrounded himself with a corps of top-notch managers. Pharmacy No. 1 is under the direction of E. J. Isaacs; No. 2 is supervised by E. G. Stetzel, who has been with the concern for more than thirteen years; No. 3 is operated by Horace Taylor, son of T. P. Taylor, and Herman Obrecht; and Clarence B. Davis is manager of No. 4.

Socially, Mr. Taylor is prominent in Louisville. He is a leading Elk and belongs to the Louisville Commercial Club, both bodies being strong organizations, fraternally and commercially, of the Gateway of the South. Mr. Taylor was recently elected as a member of the Louisville Automobile Club. He is an enthusiastic motorist and one of his chief diversions lies in occasional journeys through the Blue Grass State, in his big touring car.

—CHARLES A. HAUPT, proprietor of the Montrose Pharmacy, Terre Haute, Ind., whose photograph is reproduced on the preceding page, is one of the enterprising and progressive druggists of his section of the State, which fact led to his election as first vice president of the Indiana Ph.A., at its 1910 meeting. Mr. Haupt is only 35, but has been in the drug business ever since he was 14, except for a year and a half which he spent in the United States Field Hospital Service as a hospital steward during the Spanish War. His first position after leaving High School was in the drug store of T. B. Glazebrook and he has been in business for himself at his present location, 17th and Franklin avenue, Terre Haute, for five years. For one year he was president and for two years was a member of the executive committee of the Vigo County R.D.A.

—MRS. NELLIE FLORENCE LEE, president of Philadelphia Chapter of the W.O.N.A.R.D., met with a painful accident the latter part of October, fracturing a knee. Her many friends will be pleased to know that recent advices were that she was able to sit up and was on the road to permanent recovery from her injury.

—FOLLOWING the meeting of the N.W.D.A., Clarence M. Kline of Philadelphia, Mr. and Mrs. Arthur S. Raymond, Lincoln, Neb. and Woods A. Caperton, Indianapolis, spent a few days duck hunting on the coast in the vicinity of Aransas Bay. The Port Bay Hunting and Fishing Club of Rockport was made headquarters.

—JOHN BURNSIDE, of Parke, Davis & Co., New York Branch, was recently confined to his home for a period of six days as the result of a bad fall. His many friends will be pleased to hear that he sustained no serious injury and is again at his desk.

—DAVID JONES, formerly a member of the Detroit American baseball team, has purchased the Nairin Pharmacy, Detroit, and with his brother, Arthur, will cater to the pharmaceutical wants of their many friends in the City of the Straits.

—C. MAHLON KLINE and Clayton French, of the Smith, Kline & French Co., Philadelphia, stopped recently in Indianapolis, while enroute to the N.W.D.A. meeting in Dallas, to visit the Red Lilly laboratories.

—SAMUEL CABOT, chemist, and a member of the corporation of Samuel Cabot, Inc., and Louis O. Duclos, of the Massachusetts Chemical Co., have been elected to membership in the Boston Chamber of Commerce.

—C. G. COPP, manager of Greil Bros. Co., wholesale druggists, Montgomery, Ala., spent a few days in Indianapolis recently, visiting the wholesale drug trade of that city and seeing the Lilly laboratories.

—W. A. HOVER, of Denver, chairman of the committee on credits and collections of the N.W.D.A., preceding the Dallas convention last month spent some time cleaned in fishing in the streams of Fannin, Tex.

—W. ASHTON EVANS, Ph.G., Washington, D.C., proprietor of the Astoria Pharmacy, 3rd and G streets, has opened his second store, the Ashton Pharmacy, at 2434 18th street, N. W., in the same city.

—J. A. T. Jones, advertising manager of Frederick Stearns & Co., Detroit, has resigned to accept a similar position with Chester Kent & Co., Boston. In his advertising connection, Mr. Jones has been associated by the Stearns company for nineteen years and for many years has been editor of the *Nine Idea*. He has twice served as president of the Detroit Adcraft Club.

—LESTER H. CARRIGAN, University of Michigan School of Pharmacy, '03, with Parke, Davis & Co., New York Branch, recently joined the University of Michigan Club of New York.

—FRANK P. DREXEL, of the Yahr & Lange Drug Co., Milwaukee, has returned to his desk from a trip to Indianapolis where he visited the jobbing trade and the laboratories of Eli Lilly & Co.

—THEODORE MUELLER, proprietor of the Central Drug store at West Allis, Wis., has become one of the principal stockholders in the First National Bank of West Allis.

—DR. WILLIAM DILLON HACKER, a prominent dentist of Indianapolis, spent a few days in New York City on his return from the recent dental convention in Boston.

—GEORGE R. WHITE, President of the Potter Drug & Chemical Co., has been elected a member of the executive committee of the Algonquin Club, of Boston.

—JOHN WORTHINGTON, probably the oldest pharmacist in Brooklyn Borough, New York City, on Nov. 3 celebrated his 85th birthday. He retired 10 years ago.

—OTTO KALMUS, proprietor of the Otto Kalmus Chemical Co., Cincinnati, sailed Nov. 15 from New York for Germany, on the steamship Kronprinzessin Cecelie.

—WILLIAM HALL, salesman for Eli Lilly & Co., with headquarters at Albany, N. Y., was a recent visitor at the firm's branch in New York City.

—ALBERT DEFAUT, lately with the Washburn Drug Co., Memphis, Tenn., will enter business for himself in the same city on or about March 1 next.

—ROBERT A. HEVENOR, sales manager of Morrisson, Plummer & Co., wholesale druggists, Chicago, was a recent visitor in New York City.

—W. D. ROWLES, of Parke, Davis & Co., New York branch, recently spent a couple of days at the firm's home office in Detroit.

—H. S. ROSS who travels Western Michigan for the Red Lilly Line recently spent a few days in Indianapolis visiting the home office.

—L. R. DARLING, general manager of the W. A. Nelden Drug Co., Salt Lake City, Utah, was in Indianapolis recently on a visit.

—RALPH M. STORMONT, of the Illinois Lilly sales force, is in his territory after a short visit to the home office in Indianapolis.

—WILLIAM STEINLE, of Marinette, Wis., attended the 50th wedding anniversary of his parents recently at Madison, Wis.

—HUGO DUBOIS, of the Roessler & Hasslacher Chemical Co., this city, sailed for Europe on Nov. 20.

Paxson & Co. Out of Bankruptcy.

E. D. Paxon & Co. (corporation), druggists at 771 Sixth avenue, Manhattan Borough, New York City, has made a settlement with creditors at 50 cents on the dollar, payable 10 cents cash and 40 cents in notes at 4, 8, 12 and 16 months, and Judge Hough has dismissed the petition in bankruptcy filed against the corporation, last September.

A Model Drug Store is Being Remodeled.

W. E. Porter, proprietor of the Model Drug Store at North Milwaukee, Wis., is installing new fixtures and floor cases in his store. The building is also being generally remodeled.

Detectives Find a Druggist's Stolen Watch.

LOUISVILLE, Ky., Nov. 15.—Some hurry-up detective work on the part of two local sleuths recently resulted in the return of a valuable gold watch to Leon Abraham, druggist.

Burglars Descend on a Green Bay Pharmacy.

GREEN BAY, Wis., Nov. 20.—The pharmacy of August Nevan was broken into recently by burglars, who secured about $100 in cash and made their escape.

New Owners for Oline Chemical Co.

F. G. and B. A. Woehlmann, of Wausau, have purchased the Oline Chemical Co., at Merrill, Wis. They have taken possession of the business.

The Directory will be ready in December. Price $5 per copy. Orders should be placed now.

N. W. D. A. Approves Federal Drug Act as Model for All States.

Uniformity of Laws Urged and Greater Restriction of Opium Advocated—Prosperous Year for Jobbers, Despite Trade Combinations and Chain Stores—Next Convention to be Held in New York—Many Important Subjects Considered.

CHARLES S. MARTIN,
of Nashville, Tenn.,
retiring president of the N.W.D.A.

DR. WILLIAM JAY SCHIEFFELIN,
of New York City,
elected president of the N.W.D.A.

GEORGE W. LATTIMER,
of Columbus, Ohio,
elected first vice president N.W.D.A.

THE NEW OFFICERS OF THE N.W.D.A.

President—Dr. William Jay Schieffelin, of New York City.
First Vice President—George W. Lattimer of Columbus, Ohio.
Second Vice President—L. E. Lyons of New Orleans, La.
Third Vice President—Adam Pfromm of Philadelphia, Pa.
Fourth Vice President—B. B. Gilmer of Houston, Tex.
Fifth Vice President—A. J. Tapping of Peoria, Ill.
Secretary—J. E. Toms of New York City.
Treasurer—S. E. Strong of Cleveland, Ohio.
Board of Control—Charles Gibson, chairman, Albany; William B. Strong of Milwaukee; C. E. Bedwell of Omaha; A. J. Geer of Charleston, George R. Merrell of St. Louis.
Chairman Proprietary Committee—Wm. P. Ritchey, New York.
General Representative—F. E. Holliday, New York.
Meeting in 1911—New York City, October, Second Week.

DALLAS, Nov. 20.—With the election of the officers named above the National Wholesale Druggists' Association begins a new year of endeavor for the benefit not only of the members, but of the retail druggists and the public generally. The convention last week disclosed a broader scope, an increasing diminution of self as it might interfere with the general good and altogether an unselfish trend and brotherly interest in all branches of the drug trade, considering alike the interests of honest manufacturers, the jobbers, the retailers, the consumers.

It was a remarkable convention in many ways. There were no spectacular incidents, the year had been quiet yet prosperous, but in the reports and proceedings there was ever a pervading sentiment of saying or doing something that would be of benefit to everybody in the chain from producer to ultimate consumer. Recent conventions of the N.W.D.A. have all tended in this direction, but this assemblage went the limit in the new and better order of business association. In the action taken there never appeared to be a thought of personal profit, beyond what would naturally flow from the reports made on credits, insurance and various other matters of internal management. A strong stand was taken for uniform drug laws, based on the Federal Act.

The social features were more than ample. W. E. Greiner and the members of the entertainment committee literally covered themselves with glory in the true Texas hospitality which they showered on the visiting druggists and their families. The association has had some other Southern experiences, but this of Dallas will be difficult to eclipse. In fact New York, where the 1911 convention will be held, will have to begin early and work hard to make next year's convention as memorable personally and socially as was the Dallas meeting just ended, ignoring in that conclusion the vast amount of work that was done by the committees and the members.

A.Ph.A and New York Ph.A. Delegates Welcomed.

After Charles S. Martin had called to order the 36th annual convention of the N.W.D.A. there were addresses of welcome on behalf of Texas and Dallas to which M. Cary Peter and R. M. McKnight responded. There were delegates present from the A.Ph.A. and the New York State Ph.A. These delegates were:

A.Ph.A.—Lyman F. Kebler, Washington, D. C.; R. H. Walker, Gonzales, Texas; Milton Hickok, Dallas; H. L. Carleton, Austin, Texas; George B. Kauffman, Columbus, O.

New York Ph.A.—Sidney H. Carragan, New York; Fred S. Rogers, Middletown; Nelson P. Snow, Syracuse; Lee Wiltsee, New York; Alfred M. Palmer, Olean.

The reception of delegates was an early and interesting feature. Dr. Kebler spoke at some length of the work being done by the Government in fighting the drug habit and of the initiative taken by the A.Ph.A. in clearing the way for it. Prof. Eberle, president of the A.Ph.A., followed with a felicitous address and congratulations for the stand which the N.W.D.A. has taken in public policy. Mr. Wiltsee spoke for the New York Ph.A. The replies were by Albert Plaut and George W. Lattimer.

With these formalities finished, President Martin delivered his annual address, which was full of interesting information and presented an optimistic view of conditions in the world generally and in the drug trade particularly. Progress, commercially and scientifically, formed the keynote. Regarding business conditions he said:

From information gained from different distributing points, I can confidently state that the past year has been a prosperous one, and in this general prosperity the business in which we are engaged has had a full share of the good times, and as a whole, is upon a substantial basis. In many sections of our country the wholesale drug trade is reported to be in better

conditions [illegible] for many years past, the confident belief being expressed that the present year will prove very satisfactory to them. [illegible] satisfaction is reported as to the [illegible] if endless [illegible] ded if not entirely with the net profits obtained.

The outlook for the future is also full of encouragement to renewed effort, and I confidently predict continued satisfactory results by those who are fully organized to meet the more and more exacting requirements of our business. This condition of affairs should be very gratifying, considering the unprecedented competition of co-operative enterprises among the retail druggists and the extension of large combinations in that branch of the trade as it indicates that the Wholesale Druggists have been able to more than hold their own, where dire disaster had been threatened, and are strong and permanent factors in the distribution of the goods in their line from the manufacturer to retailer.

National Pure Drugs Act a Model.

President Martin referred to the work of the committees appointed by his predecessor to revise the constitution and to attend the conference on uniform legislation at Washington last January. He considered it especially gratifying that the conference had passed a strong resolution recommending the adoption of the National Pure Food and Drugs Act as a model uniform statute by the legislatures of all States which have not already so acted. Representation in the U. S. P. Convention and the honors bestowed upon members of the N.W.D.A. were next commented upon. Tariff and National legislation were referred to and the favorable decision of New York's highest court in the John D. Park & Sons suit was commented upon. After paying a tribute to the distinguished dead of the year, Mr. Martin said:

The world has reached that stage in its progress that nothing is accomplished except through organization and united effort. There are giants in the earth in these days and all measures and movements that tend to achievement and success are on a gigantic scale. The day of small things is passed and it is the duty of all to participate in the organized effort that makes for the good of the whole. The work accomplished at these annual meetings, the benefit of contact between members and the exchange of ideas, goes to the good of the whole trade and those who fail to bear their part of the work of the association, or to contribute to its progress by participation in the annual meetings, show a lack of appreciation if not gratitude, and what is worse, reap a reward from other people's work.

As an ethical proposition, the thesis may be well sustained that every individual member of any trade or industry, owes it to the association representing that industry, to give it the benefit of his knowledge and experience in matters tending to the general progress and uplift, and to participate in such work as may be necessary to that desirable end. That is what organization means, and without organization and combined effort there is no substantial achievement—no onward movement.

It is not fair—it is in fact a gross wrong that the burden of organization be left on the shoulders of the most enterprising and conscientious, while the selfish, the indolent and those without a proper scruple in appropriating the fruit of other people's labor, remain at home.

It is not pure altruism alone—the duty of doing good to others—that demands an active participation in the affairs of this association by all wholesale druggists, but common honesty—a desire to render the proper returns for the benefits received. A quickened sense in rendering the quid pro quo should be the governing principle.

I shall not trespass upon the report of the committee on local associations, but what has been said of our National association can be equally applied to membership and attendance upon the meetings of the local associations, where the work is somewhat different but equally important.

Legislation Committee Urges Uniformity of Laws.

Charles A. Weed, chairman of the committee on legislation, made a report earnestly recommending uniformity of legislation, not only in the interest of the dealers, but also for the welfare of the consumer. The National Wholesale Grocers have taken action seeking this. Especial bewilderment is met with in attempting to comply with the laws of the various States upon narcotics and habit-forming drugs. A definition of adulteration and misbranding is entirely arbitrary, he said. Different states require different labels and an earnest [illegible] made to those in authority to secure uniformity. The Mann bill, now before Congress, regulating the transportation of habit-forming drugs, was declared to be worthy of careful consideration of the members, and it was stated the association favors reasonable and effective legislation.

A [illegible] of views looking toward harmonizing the conditions of the various members, through correspondence, was recommended. It was stated that the United States, with a population of [illegible] people imports 400,000 pounds of opium, of which 300,000 pounds are said to be for illegal use.

Reference was made to the Cullom bill in the Senate and the Foster bill in the House, providing for the regulation, control and sale of opium, chloral, etc. For the control, manufacture and sale of opium, the committee recommended an amendment to the present laws prescribing a penalty for vessels concealing on board or transporting opium prepared for smoking and also a prohibitive internal revenue tax. It was declared that the public is not familiar with the Pure Food and Drugs Law, and the hope was indulged that manufacturers will be required to place in their advertisements the same reading matter as on their labels. Parcels post was declared to be becoming a great political issue and that some enactment will soon be made seems imminent.

"Freak" Bills in Congress Criticised.

Several of the pending measures in Congress were denominated "freak bills," consistent with the "radicalism of the times, but few promise to be pushed," unless some of the hold-overs conclude to prove their "progressiveness." With the make-up of the next House, said the report, some radical legislation will probaly be proposed.

That the name of wood alcohol should be changed, to prevent mistakes, was suggested. "Wood naphtha," it was stated, had been recommended. [Later this change was approved.] An avalanche of bills affecting the drug business, said the report, will probably be introduced in the approaching sessions of the Legislatures of the various states.

Upon motion of Mr. Pfromm a vote of thanks was extended to the legislative committee.

Board of Control on Legislation Report.

Later in acting on the report of the committee on legislation, the board of control recommended the prevention of legislation inimical to the public welfare and that a model or standard law, passed by Congress, should also be enacted by the State legislatures. A stop should be put to the ever-increasing interpretations of laws by department officials, amounting to new legislation.

After considerable discussion, a resolution was passed that the association oppose all legislation requiring weights and measures being branded on the containers of packages of drugs or medicines.

Resolutions were adopted looking toward discouraging the importation and manufacture of opium, as recommended in a committee report. This resolution provoked a discussion as to whether the poppy plant can be profitably grown in the United States for smoking purposes. There was a division of opinion on this subject.

The chairman of the committee on legislation was empowered by resolution to employ such legal aid as he may find necessary from time to time.

The report of the committee on paints, oil and glass was warmly indorsed.

Federal Inspection Should Be Uniform.

A resolution was adopted insisting upon a uniform system of inspection by Federal officials at ports of entry. Instances were cited where importations were brought to ports distant from the point of destination and in this devious manner securing distribution in the United States. Another incident was recited of the attempted landing at New York of eighty-four cases of hair brushes bearing a misleading trademark.

The new committee on legislation was instructed, if possible, to secure a ruling from the Department of Agriculture to not publish the names of defendants where cases are investigated and not found guilty.

All members, by resolution, were urged to watch legislation in their respective territory affecting the drug trade.

A resolution was adopted opposing a proposed increase by the railroads of freight rates upon "classified freight." This was originally to have gone into effect July 1, but has been postponed to February of 1911. It was explained that "classified" freight represented about 25 per cent., the other 75 per cent. representing various commodities.

"Most Legislators Honest."—Mr. Douglass.

George L. Douglass, counsel of the Proprietary Association of America, was invited to the floor. He congratulated the association upon its harmonious proceedings and evident desire to work along lines of right, even subordinating that to every other phase of business.

"Honest men are in the majority of nearly every Legislature, and if you appeal to them and you are right you will

ADAM PFROMM,
of Philadelphia, Penn.,
third vice president of N.W.D.A.

LUCIEN E. LYONS,
of New Orleans, La.,
second vice president of N.W.D.A.

CHARLES GIBSON,
of Albany, N. Y.,
new chairman of board of control.

nearly always get what is right," said Mr. Douglass. "At every Legislature the association has a correspondent, not to do any lobbying, but to keep the association informed of any pending legislation pertaining to the interests represented."

Mr. Douglass read a paper upon uniform laws. The Pure Foods and Drugs Law, he said, has for its essence, "Thou shalt not lie, tell neither a big nor a little lie," "and why isn't that right?" he asked. He recommended that veracity also be encouraged in other business lines.

Ridicule was heaped upon the conviction of some States as to their requirements for packages and the size of type and color in which labels must be printed. The printing of newspapers and magazines was cited as a possible parallel case, in that if different States required each such publication to use certain size columns, type, etc., the publishers would necessarily abandon circulation in some of the States. The work of the American Pharmaceutical Association and the subsequent conference in Chicago was dwelt upon in great detail, and the bill prepared in consequence, seeking to regulate the sale of narcotics, was eulogized.

Opposed to Drug Habit—Criticizes Bulletin.

Mr. Douglass placed himself upon record as being opposed to the drug habit, characterizing it as "one of the most menacing evils of the country."

In this connection he displayed a copy of Farmers' Bulletin 39, issued by the Department of Agriculture, which he declared was unfair in that it contained the names of reputable manufacturers who were complying with the law, this publication being in connection with disclosures concerning concoctions that are disreputable. He excoriated Dr. Kebler of the Bureau of Chemistry for having assailed certain manufacturers without having given them notice and opportunity to be heard. He said he had filed a protest with the department against manufacturers being attacked by the department before they have had the opportunity to be heard. Up to the present time the department has taken no action, so far as the speaker knows.

"600,000 Preventable Deaths Yearly"—Dr. Schieffelin.

Dr. Schieffelin indorsed the remarks and the attitude of Mr. Douglass. He said that while there are 100 sanitariums in this country for the treatment of drug addictions and while everyone deplores this condition and seeks to improve it, it should not be attempted in an unfair or indirect way. He commended, however, a crusade against dishonest drugs, but urged that the pendulum should not swing too far the other way, so as to defeat its very object.

He advocated men in authority of broad minds: "big men," he said. "It is absurd to have to go to an agriculturist upon subjects pertaining to pharmacy. The President should have in his Cabinet one who could of his own knowledge give advice.

"There are 600,000 preventable deaths every year. It may seem wild to say that 300,000 deaths in this country can be prevented every year." In this connection he mentioned preventable diseases, polluted rivers, etc.

Proprietary Medicines—Some Good Suggestions.

In the report of the Committee on Proprietary Medicines, Dr. Schieffelin, the chairman, felicitated the country that there has been a complete recovery from the panic of 1907, and that a prosperous condition now prevails. The combinations of retail druggists have had no untoward influence upon the wholesale druggists. The cost of conducting the wholesale business is 12.85 per cent. Regret was expressed that some of the proprietors distribute free goods to retailers who purchase certain quantities of goods, and recommending appropriate resolutions being adopted by the present convention, protesting against this practice. [This recommendation was adopted by the convention.]

The National Pure Food and Drugs Act has been vigorously enforced during the year by the Federal officials, which has effected much good to the consuming public. Considerable progress has been made during the year in securing uniformity of legislation relative to pure food and drugs between the States and Federal Governments. It was recommended that the States pattern their laws after the Federal statute. [This was adopted.] Uniform legislation is vitally necessary for the economic and safe conduct of the interstate and intrastate business. The health of our people is the most valuable asset of our Nation, and every safeguard should be provided to protect them against imposition, the report declared.

Jobbers Necessary to Business Routine.

The report cited a decree of a Canadian Judge in which he declared that a wholesale house is an essential to the economic conduct of business in that the jobber can more economically, through its salesmen handling 300 or 400 articles, dispose of such articles than can a manufacturer through its salesman, representing but one article, sell direct to the consumer inasmuch as the salary and expenses of such salesmen be practically the same.

Wholesalers were urged to require from manufacturers that the latter shall guarantee insecticides and fungicides under the National Act of 1910. Reference was made to a recent conference in Washington with the Federal officials, but it was stated that the officials did not disclose when this act would be promulgated.

Better Laws Advocated to Prevent Fire Waste.

The report of the committee on fire insurance, read by

George W. Lattimer, the chairman, reviewed the subject very thoroughly. It spoke of the handling of explosive drugs, the keeping of stocks and even the packing of drugs and of the instruction that should be given employers of wholesale drug houses. The committee recommended co-operation in the movement started by the credit men looking to the prevention of fire waste by securing the enactment of better laws, the stopping of fires for the purpose of securing the insurance, with a view of reducing the rate on good risks, and the distribution of insurance literature among the retail druggists, whose losses by fire are often shared by the wholesalers.

At the conclusion of the report President Martin remarked that the association was accustomed to carefully prepared, strong reports on the various subjects engaging the attention of the organization, but that the paper by Mr. Lattimer was one of the best he had ever heard and deserves special mention. Mr. Lattimer dwelt chiefly on the ability of the wholesale druggists to place their establishments in a condition which would give them a rate to which no objection could be raised. He said the lowest rate in the United States on buildings is 15c to 16c and on stocks 20c to 30c. This is where sprinkling systems, electric alarms, systematic inspection and other precautionary measures have been established. The highest rate was $2.46, "and the firm said they thought it was rather steep." (Laughter.)

Mr. Lattimer said his committee had received a suggestion from one member that buildings in which wholesale houses are located "contain no combustible materials and that all inflammable articles be stored at least three blocks away." This brought laughter from all parts of the room.

Not in Favor of Mutual Insurance.

In acting on the report of the fire insurance committee, the board of control stated that it deemed it inadvisable to form a mutual fire insurance company to be composed of wholesale druggists only, "as we believe in concentration and specialization and should not attempt to conduct a fire insurance company at the same time."

It was stated that reciprocal companies give better satisfaction than the stock companies, and it was recommended that those who are not members should so equip their premises as to become eligible to membership.

Charles A. West of Boston gave his experience with the mutual and stock companies, saying that the latter had reduced their rates from $1 to 50c when they found themselves in competition with the mutual company. Mr. West carries $250,000 with the mutual company and the same amount with the stock companies. Several others recited experience similar to that of Mr. West.

Reports of the Treasurer and Secretary.

The report of S. E. Strong, the treasurer, was read by Secretary Toms, showing that $21,536.41 has been disbursed during the year, leaving a balance of $8,197.17. Secretary Tom's report reviewed the events of the year as he had observed them. The bureau of employment and information had proved more effective than ever before. The membership report: Net number of active members, 270; net number of associate members, 256.

During the year one wholesale firm failed, two merged and one retired from business in the active list. Of the associates one merged with another and six resigned from membership after paying dues. There were 11 net losses, but applications were presented later in the proceedings. D. D. Philips, chairman of the committee on membership, reported on new applications mentioned by the secretary. There were seven for active membership and 27 for associate membership, bringing the new year figures up to: Actives, 277; associates, 283; total, 560.

Unnecessary Changes in the U.S.P. Opposed.

Albert Plaut, of New York, offered a resolution that this association protest against any change in form, style and spelling of the coming revision of the United States Pharmacopœia, except those which may be necessary in cases where more exact information and research make a change advisable. The resolution was adopted.

Thomas F. Main, chairman of the committee on standards and tests of the U.S.P. and N.F., presented an interesting report which reviewed the relations of the N.W.D.A. to the revision of the U.S.P., etc. The committee was specially thanked and its recommendation was adopted that members who thereafter desire to make suggestions as to changes, additions, etc., should communicate direct to the chairman of revision.

Resolutions Anent Buying Clubs and Premiums.

A resolution was adopted recommending "that wholesale druggists individually protest against the action of those manufacturers who sell buying clubs. The services of the jobber are indispensable to the manufacturer. It is clearly good business policy for the manufacturer to deal fairly and not foster a movement that tends to deprive the jobber of a considerable part of his best trade, while at the same time using him as a convenience to supply the remainder of the retailers."

Another resolution adopted deprecated "the growing tendency among proprietors to furnish free goods to retailers with certain sub-quantities." The retailer was tempted to overstock and would sell the surplus to scalpers and brokers, so the custom was bad for everybody affected.

Less Advance in Drugs Than in Other Commodities.

The report of J. L. Hopkins of New York, chairman of the committee on drug market, was submitted and the secretary, in the absence of Mr. Hopkins, read only the introductory remarks, the statistics to be later printed for the benefit of the members. It was stated therein that the advance of the drug market during this era of high prices showed less advance than that alone of household goods, thereby bearing less heavily upon the consumer than the public is likely to concede. The board of control later recommendeed that publicity be given to this important fact.

Getting too Familiar With the Word "Adulteration."

The committee on adulterations, Christian Beilstein, chairman, submitted as its report an exhaustive paper, which was read by the secretary. The committee declared that the words "adulterated" an "imitation" had been used so much and in such various connections with foods and drugs that the people have come to attach little if any meaning to them, and that as a result some retailers are more interested in the guarantee of some well-known manufacturer than they are in the quality of the goods, and that the rigid and specific standards of the U.S.P. have no more prospered in giving the people pure and genuine drugs than the Ten Commandments have succeeded in making all people honest and just.

The report proceeded at length to specify the drugs that are usually adulterated and the ways in which they are adulterated or which are mixed with cheaper and inferior drugs, especially in vegetable preparations, which arises from the difficulty of finding the proper plants in paying quantities, or of being able to gather enough at the season when they should be gathered. The report declared that it was a mooted question whether the standards of the United States Pharmacopœia are not too high.

Excellent Report on Credits and Collections.

W. A. Hover, chairman of the committee on credits and collections, submitted an excellent report, a report which recommended that past-due accounts be closed with interest-bearing notes; that salesmen be not allowed to make collections and that the abuse of the free delivery system in large cities be stopped, to all of which the convention gave its approval.

John T. Kennedy, chairman of the committee on fraternal relations, showed that in the majority of localities the friendliest relations exist between retailers and wholesalers.

C. E. Bedwell, chairman of the committtee on relations with local and other associations, made a favorable report on the more thorough organization of druggists.

Thomas F. Main submitted a report on revision of the constitution and by-laws which was adopted seriatim.

Eastern Members Entertained in St. Louis.

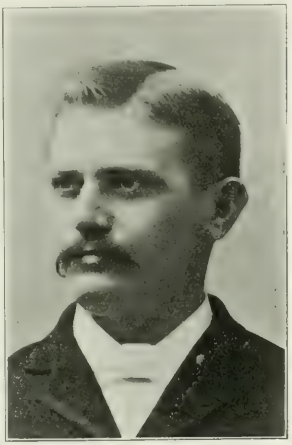
ST. LOUIS, Nov. 20.—St. Louis members of the National Wholesale Druggists' Association, entertained the Eastern delegates who stopped over in St. Louis on their way to the 30th annual meeting of the wholesale druggists at Dallas. The visiting druggists were met by a committee of druggists, headed by Fred W. Sultan and Theodore F. Meyer, who took them to the Jefferson Hotel. The visitors were given an automobile ride in the afternoon and a dinner in the evening, the latter being attended by about 150. The menu at the banquet was very satisfying. The speakers were Mayor Kreismann, former Mayor Cyrus P. Walbridge, Edgar D. Taylor of Richmond, and M. Gary Peter of Louisville.

HEGEMAN & CO. APPEALS AGAINST DECISION.

Judge Holt Orders Party to Riker-Hegeman Merger to Buy Jungmann Store Near a Riker Store.

JUDGE HOLT, of the United States District Court, recently granted a motion of Thomas & Oppenheimer to compel Hegeman & Co., druggists, New York City, to carry out a contract for the purchase of two stores of J. Jungmann, Inc., at 1020 Third avenue and 1 East 42 street. The Judge is of the opinion that the contract between Hegeman & Co. and the committee of creditors of J. Jungmann, Inc., was a valid contract, not void under the statute of frauds, the offer was duly signed by Hegeman & Co., the acceptance by the creditors' committee was not in writing, but there was an absolute and unconditional acceptance of the offer by parole, which is sufficient under the statute of frauds. Later on Hegeman & Co. declined to carry out the contract.

Since the alleged contract at issue was made the Riker-Hegeman Co. was formed and Riker & Son Co., a party to the merger has a drug store at 6th avenue and 42d street a block from the Jungmann store at 1 East 42d street. Judge Holt asserted that at substantially the same time that the merger was announced in the daily press, Hegeman & Co. refused to carry out the contract with the receiver of Jungmann, Inc., Harry S. Patterson. That any connection exists between the two facts is strenuously denied by Hegeman & Co., but the Judge considered the sudden change of intention to be suggestive. The Hegeman company has appealed to circuit court. The case will probably come up within the next month.



EDWARD J. SCHALL, St. Louis, popular manager proprietary department of Meyer Bros. Drug Co.

DRUGGISTS GO TO SENATE.

One, a Democrat, Wins by Good Plurality in Republican District.

WAUSAU, Wis., Nov. 20.—W. W. Albers, former president of the Wisconsin State Ph.A., was elected a State senator from the 25th district of Wisconsin at the recent election. He was a candidate on the Democratic ticket and his victory for that reason is worthy of some note as the district has always been a strong Republican one. His majority was 238.

MILWAUKEE, Nov. 20.—George J. Weigle, well known druggist, Twenty-first and Wells streets, was elected to the State senate from the Fifth district at the recent election. Mr. Weigle was the Progressive Republican candidate and an indication of his popularity can be taken from the fact that he ran far ahead of his ticket. The campaign was one of the hardest that has been waged in Milwaukee for many years, the Socialists through continued efforts having worked up an organization of great strength. Notwithstanding this fact, and as well, the fact that the Republican party was badly disintegrated, his plurality was 1010.

Massachusetts Druggists in the Legislature.

BOSTON, Nov. 20.—Three druggists who served in the lower branch of the State legislature last year were all re-elected in the November elections. They are Thomas W. White of Newton, Laurence J. Dugan of Webster, and Thomas Cuff of Lowell.

Manitoba Wholesalers Suffer by Fire.

WINNIPEG, Nov. 22.—Fire today in the Martin, Bole & Wynne Co.'s wholesale drug house did damage amounting to about $215,000. The insurance amounts to $171,800. Fire originated from unknown causes in a bin containing the permanganate of potash.

King Co. Ph.S. Holds Meeting at Seattle.

SEATTLE, Wash., Nov. 20.—The King County Pharmaceutical Society held its November meeting in the assembly hall of the Chamber of Commerce, Central Building.

DRUG TRADE SECTION FAVORS ACTUAL TARES.

New York Board of Trade and Transportation Pharmaceutical Members on Record to This Effect.

THAT the Drug Trade Section of the New York Board of Trade and Transportation favored the general adoption of actual weight tares so far as is feasible, was the sense of a resolution unanimously carried at the November meeting of that organization. The subject of tares was introduced by Irving McKesson, chairman of a special committee on tares, who reported that the city of Chicago had won suits under an ordinance requiring actual tare, and there was at present a bill before the National Congress to enact an actual tare law. Mr. McKesson discussed the difficulty in determining drug tares, because of the great disparity in sizes, and the aged and rotted containers in which most American drugs are delivered. Average losses may be from 3 to 5 pounds per bale, due to inability to determine correct official average tares.

Wm. Archibald, of Archibald & Lewis Co., reported that a city ordinance did not permit any allowance for tare except for purchases below 10 cents, and in reply to another member's suggestion that one clean sweep be made to compel actual tare of foreign and domestic goods, further stated that the foreign houses could not be made to change a trade custom of long standing. He also called attention to the delay of the Federal authorities in acting on appeals of importers in the seed line and cited one case where the question of the duty to be imposed on celery seed was raised. The matter was brought before the Board of Appraisers, that body waiting for six months before a decision would be rendered. The section resolved that the Committee on Customs Administration make a vigorous demand for quick settlement.

Secretary Wm. McConnell read the report of the Committee on Legislation, which committee had taken up the matter of the morphine ordinance under advisement, and protested by letter to Health Commissioner Lederle that the measure should be amend l or repealed. In this letter the committee recalled the section's previous support of narcotic legislation in general.

It was voted that the secretary draft a letter of condolence to be delivered on behalf of the section to the widow of Samuel W. Bowne.

Enforcing the Kentucky Pure Drug Law.

LOUISVILLE, Nov. 20.—The campaign that was recently inaugurated by Kentucky Health Officers in favor of pure food and drugs being sold in the Bluegrass commonwealth took militant form a short time ago when a number of Louisville druggists were assessed fines of $15 each in Magistrate Dacher's Court, for violations of the Pure Food and Drug Act. The cases against the druggists were worked up by R. M. Allen, of the Kentucky State Experiment Station, at Lexington, and L. A. Brown, the State chemist. The aggregate fines against the druggists amounted to $345, exclusive of court costs.

Laboratory Assistant in Chemistry.

Civil service examinations will be held Jan. 4-5 to make an eligible list for appointment as laboratory assistant in chemistry in the bureau of standards, Department of Commerce, Washington, D. C. Salaries $1000 to $1400. Application can be made to the U. S. Civil Service Commission, Washington, D. C., or any local secretary.

Sewage Disposal Symposium for Chemists.

At the Chemists' Club, Dec. 9, the New York Section of the American Chemical Society will hold a joint meeting with the American Institute of Chemical Engineers. Experts will present papers on sewage disposal. The usual informal dinner at the Hotel Savoy will precede the meeting.

DRUG CLERK'S BRIDE TELLS WOES TO COURT.

No Wedding Ring for Luckless Young Woman Who Asks Annulment of a City Hall Marriage.

IN the New York Supreme Court the other day, Justice Greenbaum reserved decision in the shattered romance of a young woman and a former New York City drug clerk, but following custom in an undefended suit of this nature a decree will probably be filed against the clerk.

Sarah Sachs, a good-looking girl of twenty-two years, had known Abraham Abelsky, a young drug clerk, just three weeks when she was married to him by an Alderman at the New York City Hall. Her signature to the marriage certificate was hardly dry when Abelsky took possession of her bank account, amounting to $1120.

This was Dec. 9, 1908, and last month Mrs. Abelsky told the court of a shattered romance and asked that the union of Abelsky and herself be annulled on the ground of fraud. Justice Greenbaum heard another case earlier in the day of a marriage that took place at the City Hall.

"Most of these divorces," he observed, "seem to be where persons were married at the City Hall."

"Well," said young Mrs. Abelsky from the witness stand, thinking the Judge's remarks were addressed to her, "everybody else who got married at the City Hall that day had a marriage ring, but I didn't have anything."

"Where did you go after the ceremony?" asked the court.

"To the Bowery Savings Bank," answered Mrs. Abelsky. "My husband said he wanted to have my account changed to his name. He said it didn't look well in my name."

"Well, what happened next?"

"Why, the next thing I knew he had taken all the money from the bank. When I asked him why he had done it he laughed and said that was all he married me for."

"Didn't you live with him?"

"No; I returned to my parents' home, 135 Forsyth street, where I have been ever since."

"You had your husband arrested soon after you were married, didn't you?" asked Emerich Kohn, counsel for Mrs. Abelsky.

"Yes—for taking my money," she said.

"Did you get any of the money back?"

"About $800. He was told he would have to give it back or go to jail."

Mrs. Abelsky then referred to her first meeting with Abelsky. They met at a dance; it was a case of love at first sight—on her part. Abelsky called to see her five or six times a week after that until they were married.

"When did you tell him of the money you had?"

"The night before we were married."

"What did he say?"

"Nothing. He was very quiet after that. He seemed to be thinking a whole lot."

Next morning, Mrs. Abelsky said, Abelsky called at her home before breakfast.

"We must get married at once," he said.

She was disposed to wait, but finally consented.

"He said we'd get married at the City Hall, and then on the following Sunday we'd have a Jewish ceremony performed," added Mrs. Abelsky.

"Did you do that?"

"No. My husband didn't show up on Sunday. When I saw him later he said he had changed his mind; he couldn't support me, and so he didn't intend to have another ceremony.

"But," she said she told him, "you can't trick me like that."

"Oh, that's nothing; I've done worse than that before. I don't love you, anyhow," she quoted him as saying.

Abelsky continued [illegible] to his wife, after he had been [illegible] to return $500 of her money to her, and he did not locate him until a few months ago. He was then working in a drug store in Jersey City. Abelsky didn't defend the annulment suit.

Cut-Rate Drug Store Forced to Close.

St. Louis, Nov. 19.—After 20 years in business the Anti-Monopoly Drug Co., known for several generations as the [illegible] and in Market street for about as long as most [illegible] is closing. The stock must "get out of its present location, Fourth and Market streets by Jan. 1," the notice reads. Adverse business conditions and high rents are given as the reasons.

PUZZLES USED TO ADVERTISE A DRUG STORE.

Druggist Publishes Neat Little Monthly in Which He Combines Brain-Twisters, Humor and Business.

LOUISVILLE, Nov. 20.—The *Puzzler* is the name of an attractive little drug paper distributed monthly from the drug store of Otto E. Mueller, at Baxter and Highland avenues, in this city. The *Puzzler* contains a number of interesting and instructive puzzles which are designed to appeal especially to children and incidentally to older folks who are of a puzzle-solving turn of mind.

In addition to the array of perplexing brain food that appears in the columns of the sheet, a sprinkling of "classy" drug jokes inject a bit of humor into the contents of the paper for the benefit of Mark Twain's devotees. The advertising feature is embodied in various cuts and reading notices scattered throughout its columns and the back of the two-page sheet contains an ad for the Mueller pharmacy, with special monthly bargains "played up" extensively.

"The *Puzzler* is one of the best advertising mediums that could be devised for a druggist who caters to a neighborhood trade," said Mr. Mueller. "The modus operandi in publishing the paper is very simple. I have contracted with a New York firm of novelty manufacturers to furnish me with a half dozen or more puzzles monthly and these are embodied in the paper, together with pharmaceutical jokes that are culled from various humorous sources. The circulation of the *Puzzler* numbers from one to two thousand copies per month. My distribution system consists of a couple of small boys who distribute the paper in the residence districts surrounding the store, and a stand upon which some copies of the paper are piled, to be offered to chance customers of the establishment. Needless to say, the subscription price is nil."

AN IMPOSTOR ABROAD IN THE DRUG TRADE.

Warning Issued Against a Swindler Who Has Been Defrauding Druggists, Doctors and Others.

DETROIT, Nov. 20.—Hotels, druggists, physicians, livery men and others are warned against a man traveling from place to place presenting a card with the name "R. F. Hall" printed in the center. In the lower left hand corner are the words "Parke, Davis & Co." and in the lower right hand corner are the words "Detroit, Mich." This man is described as follows:

"5 ft. 6 or 8 inches, 150 lbs., fiend for Turkish cigarettes, about 27 years, complexion medium, wears nose glasses and continually takes them off and on; he is a swell dresser, good talker, fine appearance, wears one of those light colored slip on or off rain coats."

This individual has no connection with Parke, Davis & Co. and so far as heard uses the card to facilitate the passing of bogus checks.

Because of incidents like these nearly all concerns employing "drummers" forbid them to borrow money or seek credit, except upon individual responsibility and acquaintanceship. Therefore, those seeking credit or loans, especially from comparative strangers, on the strength of their alleged connection with some important concern, should be treated as impostors.

Business Troubles of Cincinnati Druggists.

CINCINNATI, Nov. 20.—Druggist John A. Moesker, McMillan and Henlock streets, was thrown into the hands of a receiver recently as result of suit by creditors. His liabilities are placed at $2,000 and his assets $4,500. Attorney Harry F. Freking, the receiver, is continuing the business.

Druggist Edward J. Gibbons, of 3201 Coleman avenue, made an assignment to Mr. Freking recently, naming his assets at $4,500 and liabilities at $8,500.

Druggist George U. Panzer, Sixth and Mound streets, made an assignment to Attorney Louis H. Capelle recently. Assets, $1,000; liabilities, $4,500.

Salesman Gets $650 for Being Dismissed.

BOSTON, Nov. 20.—The suit of Charles F. Copp of Passaic, N. J., against the Chalmers Chemical Co., of Dedham, Mass., for $20,000 was terminated when the parties reached an agreement, the company paying $650 to Mr. Copp. The suit arose over the discharge of Mr. Copp, who was a salesman, on salary and commission.

United Drug Co. Invades Local Field in New York and Boston.

Will Pay $110,000 a Year for Store in the Metropolis—New Directors—Members of Grievance Committee—Answer Filed in Riker $250,000 Guarantee Suit.

BOSTON, Nov. 23.—Almost simultaneously the United Drug Co. has adopted a policy of expansion in both New York and Boston, the two cities in which its Rexall products are not handled in a manner satisfactory to the officers of the company. Just what the new move means is not yet wholly apparent.

In New York the company has concluded a lease for the first floor of the new Greeley Square Hotel, in 6th avenue, corner of 34th street. The lease will run for 21 years and is at the enormous rental of $110,000 a year. The store has an area of about 5,500 square feet, and is on the most prominent corner in America.

Two Important Leases Made in Boston.

In Boston, two very important leases have been made. One is of a store, small in area, but in one of the newer office buildings, which has hitherto had nothing of the character in it. The easterly corner of the Brazer building, at 27 State street, is now being remodelled, and will be as nobby a confectionery store as brains and money can provide. It will be known as "Liggett's Chocolate Box," and will at least be an outlet for the confectionery department of the United Drug Co. The location is significant and auspicious. It is but a few doors above the new confectionery store of Bailey's in State street, which has developed an enormous confectionery business in a few months among State street habitues, and but a short distance from Thompson's Spa. More significant still, the store is but a block from the Adams square store of the Riker-Jaynes Co.

At the southerly corner of Washington and School streets, the entire building has been leased by the United Drug Co. This is another most significant and valuable location. It is not only on the corner of two of the best streets in the city, but it is directly opposite the Milk street entrance to the tunnel, one of the busiest of the downtown stations. The building is four stories high, and the first floor is now occupied by one of the W. L. Douglas shoe stores.

Branching Out to Protect Stockholders.

In speaking of the new leases tonight to an ERA representative, Louis K. Liggett, president of the United Drug Co., said:

"The United Drug Co. has secured these leases in order to protect itself and its stockholders. At the present time the company has no adequate outlet in the metropolis of the country and in the home city of the company. Such a condition affects its agents outside. Whatever the outcome of the suits now pending with the Riker Co., the United Drug Co. will use the places just leased for either business or advertising purposes.

"One purpose of getting hold of the New York location was for advertising purposes. I consider that the most prominent corner in the United States. Every person in New York and every visitor to the city will in some part of the day pass that point. While the rental seems high, it is no higher than rentals for stores in Washington street, Boston, between R. H. White's and Shuman's corner. In fact, since we made the lease, we have been offered a 10 per cent. advance over what we shall pay for it. So as a matter of fact, the lease is a cheap one. We are looking out for the interests of our stockholders."

New Directors Chosen—Grievance Committee.

Following the vote of the stockholders of the United Drug Co. at the annual convention in Boston last month, the board of directors was increased from 11 to 15, and the following elected to places on the board: W. M. Federman, Kansas City, Mo.; Thomas Voegeli, Minneapolis; Thomas P. Taylor, Louisville; Fred S. Rogers, Middletown, N. Y.

The selection of members of the grievance committee, with alternates, has also been made, and constitutes what many of the stockholders of the company consider the most important action in the history of the company. The object of the new committee, which is composed of stockholders who are neither officers nor directors of the company, well be to adjust differences arising between the company and stockholders. Either party will have the right to appeal to the grievance committee, and their decision will be binding on both parties.

The grievance committee consists of seven members chosen to represent certain sized towns in order to more fairly represent the interests of the individual druggist. Meetings of this committee will be called by the executive committee of the company at such place as will be most convenient to the appealing member. Membership of the committee is as follows:

Towns up to 5,000 population, F. J. Hoffman, Geneva, O.; towns of 5,000 to 10,000, William S. White, Dover, N. J.; towns of 10,000 to 20,000, H. M. Thompson, Carnegie, Penn.; towns of 20,000 to 30,000, J. W. O'Sullivan, Burlington, Vt.; towns of 30,000 to 50,000, G. H. Boyson, Cedar Rapids, Ia.; towns of 50,000 to 100,000, A. S. Evans, Utica, N. Y.; towns of 100,000 and over, E. J. Wolff, St. Louis.

The alternates, arranged in the same order as above, are as follows: J. D. Merritt, Roswell, Ga.; Paul V. McCoy, Minot, N. D.; Frank E. McClure, Boise, Idaho; Gus Schlegel, Davenport, Ia.; Daniel Chamblyss, Knoxville, Tenn.; W. A. Druehl, Salt Lake City, Utah; Withers Miller, Richmond, Va.

New Plants to Manufacture Drugs and Candy.

Plans are under way by the United Drug Co. for two extensive additions to its manufacturing plant. It is the intention of the company to begin at once the erection at Kansas City, Mo., of a plant for the manufacture of drugs and candies, but not of perfumes, and to have the plant in operation by next September. This step has been forced by the increasing western business and the enormous monthly bill for freight between Boston and Chicago.

The other addition is the establishment of another factory for the making of Liggett Chocolates and Fenway candies exclusively. This will be located on the waterfront, where so many Boston confectionery establishments have located. The new factory will have a floor area of 100,000 square feet.

President Liggett stated that when these additions are finished the floor space of the manufacturing departments in Boston, Chicago, Kansas City and Toronto will aggregate 500,000 square feet, and will give employment to between 2,300 and 2,500 persons.

Record Rental for the Store in New York.

The Greeley Square Hotel, in New York City, in which the United Drug Co. has leased a store, is being erected on the easterly side of Broadway, between 33d and 34th streets, and will cost $5,000,000. The lease, which becomes operative upon the completion of the building, is for 21 years at $110,000 a year. The United Drug Co.'s store will have a frontage in Broadway of 60 feet and the floor space will be 5,500 square feet, or $20 a square foot, which establishes a new rental record.

INTERESTING POINTS IN RIKER SUIT ANSWER.

Denial That United Drug Co. Ever Has Been Co-Operative Concern—By-Laws Cited and Intent Ascribed.

TRENTON, N. J., Nov. 20.—The answer of the United Drug Co., of Boston, to the injunction suit of Wm. B. Riker & Son Co., et al, has just been filed with the Clerk in Chancery. The suit was begun last December and in April Vice-Chancellor Howell granted an injunction in favor of the Riker Co., which will continue until the merits of the litigation are settled. The trial, it is expected, will be held in February, 1911.

The defendant's attorney is John R. Hardin, of Newark, prominently mentioned for United States Senator of New Jersey. The plaintiffs are represented by Albert E. Seibert, of New York City, and Robert H. McCarter, of Newark, former Attorney General of New Jersey. It is probable that Jones Fuller, Boston counsel for the United Drug Co., will be associated with Mr. Hardin in the defense.

The Riker Co.'s complaint (summary of which appeared in the ERA for January, 1910, page 59), contained 10 sections, to which the United Drug Co. replies seriatim. First,

the corporate existence of the Riker Co. is admitted. Second, proof is demanded of the ownership of the Jaynes Drug Co., Boston, by the plaintiff.

The third division of the complaint recited the organization of the United Drug Co. as a co-operative concern, giving the exclusive sale of its products to one stockholder in each locality, etc. To this the United Drug Co. replies as follows:

"This defendant admits the organization and existence of this defendant under the laws of the State of New Jersey, as alleged in paragraph 3 of the said bill of complaint. **This defendant denies that this defendant now is, and ever since its organization has been operated as a co-operative concern, and denies that the articles manufactured and sold by it have been sold exclusively to its own stockholders at uniform prices and on uniform terms, and denies that not more than one stockholder has been at any time located in any one city or town.** This defendant admits that its stockholders are largely retail druggists located in cities and towns of considerable size in the United States, and that such druggist stockholders are referred to in the publications and literature of the defendant as agents for the sale of the articles manufactured and sold by it. **But this defendant denies that such stockholders are regarded by this defendant as agents, or that the relation between this defendant and such druggist stockholders is that of principal and agent.** This defendant admits that the Boroughs of Manhattan and Brooklyn in the City of New York have always been treated by this defendant as separate and distinct cities or towns.

Paragraph 4 admits that defendant has built up an enormous business, that its names and trade marks enjoy great reputation and that its goods are of high character.

"and this defendant has no doubt that the 'right' to purchase from this defendant and to act as its agent in any city or town is a valuable right, but this defendant does not admit that any retail druggist, stockholder or otherwise, has any right except as the same may be authorized in the conduct of its business."

The next paragraph admits the ownership by the Riker Co. of 40 shares of the original capital stock of the United Drug Co. Paragraphs 6 and 7 in effect deny that the Jaynes and Bolton companies, in Boston and Brooklyn respectively, have any exclusive rights to sell United Drug products.

In paragraph 8 it is admitted that a by-law was passed in relation to control of exclusive sales by stockholders within their territory, but other claims made by the Riker Co. in this section of the complaint are denied.

Paragraph 9 admits that in Manhattan the Riker Co., has bought and sold large quantities of Rexall Goods, but this is denied as to Boston and Brooklyn. It is also denied as to the Jaynes Co., in Boston.

Paragraph 10: "This defendant denies that it has at any time done anything in disregard of the rights of" the Riker Co., but it admits notifying the Riker Co., that it intended on and after Jan. 1, 1910, to cease furnishing goods to the Riker Co. unless the latter guaranteed to purchase and sell $250,000 worth of defendant's goods during 1910.

Continuing, the defendant "denies that such notice is wholly illegal and regardless of the rights of the complainants." The United Co. claims that it has the lawful right to cease selling its goods as per notice and denies that "irreparable damage" will be suffered by the complainants if United goods are withdrawn from their stores.

Paragraphs 11 to 26 further reply to the complaint. The ownership of the stock of the Jaynes and the Bolton companies is gone into at length. While it is conceded that the Riker interests own control of these companies, it is insisted that the original corporations still exist and perform corporate deeds and acts, nor has the United Drug Co. stock held by them ever been transferred on the corporation's books to the Riker Co.

William C. Bolton, of Brooklyn, is mentioned as owning 35 shares common and 25 shares preferred in his own right. These holdings in Manhattan are quoted: A. H. Burroughs, 20 shares; John B. Cobb, 500 shares; Geo. W. Gales, 10.

Article 8, of the United Drug Co.'s original by-laws, is quoted at length, followed by Article 9 (which became his title when amended in 1906), the same being set forth to show that complainants had not complied with the by-laws in relation to alleged change of ownership, which, under the by-laws was part of the contract or agreement between the U. D. Co. and its stockholders. The amendments to the by-laws were asserted to by the Riker, Jaynes and Bolton companies. The by-laws provide that a stockholder desiring to sell his shares must first offer them to the U. D. Co., which has never been done by the Jaynes and Bolton companies.

Special stress is laid on the following legend which is printed in red ink on the face of the certificates of stock issued by the United Drug Co.:

"This certificate is issued upon the express condition and agreement that the holder thereof shall be bound by and conform to any and all existing by-laws of this corporation and any and all by-laws which shall hereafter be made by this corporation relating in any way to the issue, sale, transfer, assignment, surrender or validity of stock."

The contention appears to be that the defendant disputes the legality of the control of the Bolton and Jaynes corporations by the Riker interests. If the complaint states correctly the ownership status of the Brooklyn and Boston companies, the defendant asserts that under the by-law it has no stockholders in those places and is free to dispose of its goods therein as it deems wise.

Paragraph 17 declares that in calling distributing concerns "agents" "the word has at no time been properly applicable except in a very popular sense; that the relations between this defendant and the persons, firms and corporations to which it sold its goods, whether stockholders or not, have at all times been merely that of vendor and vendee; that goods sold were uniformly shipped f.o.b. Boston and sold on terms substantially alike to the various customers."

The answer further sets forth that greater loyalty to the company has been expected from customers who were stockholders than from those who were not. The proper conduct of defendant's business not only permitted but required defendant's officers to demand that customers force the sale of defendant's goods. In many instances, it is averred, customers were forced to sever their relations with defendant for not meeting the officers' expectations in the amount of goods purchased and sold, this action being taken even in the absence of agreements.

Under the present by-laws, it is asserted, provision is made that a stockholder, as well as a customer, must perform all of his agreements with the defendant company, if business relations are to be continued.

Formerly contracts were made with customers and a special agreement made in 1903 with the Jaynes Drug Co. (the Maine corporation), is given in full. It narrates the purchase of 40 shares of United Drug Co. stock, for $4,000, and gives the Jaynes people exclusive rights, except in Waltham, within a radius of 10 miles of the Old State House in Boston. Price protection, etc., is provided. A similar contract made in the same year with the Bolton Drug Co., also is quoted. These contracts, it is stated, have never been abrogated or modified except as to the volume of sales.

With the Riker Co. there was no express agreement in writing, but defendant alleges there were verbal understandings similar to the contracts with Bolton and Jaynes.

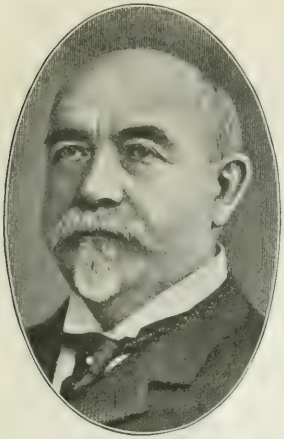
Defendant became dissatisfied with the volume of sales in Manhattan, Brooklyn and Boston, under Riker domination, and decided to sever contract relations with the plaintiffs on Jan. 1, 1910. The answer gives the facts of the demand for the $250,000 guarantee of sales during 1910 substantially as stated in the complaint and printed in the ERA of January, 1910. It is set forth that the contract relations of the United Co. with the plaintiff corporations have now ceased and that the defendant is under no obligations to supply goods to the plaintiffs. The answer says concerning the by-law cited by plaintiffs as giving them exclusive rights:

"Said by-law was enacted to promote and not to paralyze the business of this defendant and is not intended to perpetuate in an unbreakable and continuous relation to this defendant customers whose business fails to justify further exclusive dealings with them, even if such customers are stockholders of this defendant."

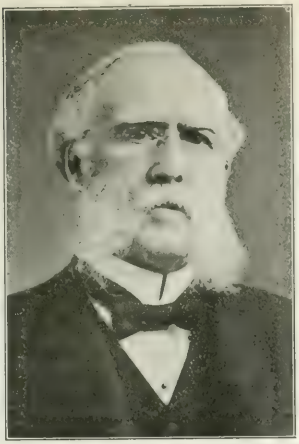
The expansion of the Riker Co., in opening new stores, some of them in competition with Rexall stores, is made the subject of a paragraph. It is charged also that the Riker Co. has pushed its own goods in preference to Rexall products.

Theft of Letters Charged to a Doctor.

CHICAGO, Nov. 10.—Dr. David E. Lucas, 898 Walnut street, was recently arrested on an accusation made by postal inspectors to the effect that he had appropriated letters containing money orders belonging to a lodge of Odd Fellows, which meets in the Occidental Hall building, where the physician also has an office. It is claimed that a druggist identified him as having cashed one of the stolen money orders. Dr. Lucas is said to have a good medical practice and is one of the owners of the Camphorzone Co.



The late SAMUEL W. BOWNE, of New York City.



The late JAMES A. WEBB, of New York City.

The late JOHN H. Von STEIN, of Columbus, Ohio.

HEART DISEASE TAKES VETERAN MERCHANT.

Founder of James A. Webb & Co. and Prominent in Public Affairs, Dies Suddenly at Age of 80 Years.

JAMES A. WEBB, founder and head of James A. Webb & Son, dealers in drugs, alcohol and cologne spirits, 50 and 52 Stone street, New York, died suddenly of heart disease in this city last month. Mr. Webb, who was 80 years old, had suffered with heart trouble for 10 years, but the fatal attack came practically without warning. Despite his age he continued in active business up to the time of his death.

Mr. Webb was born in Norwich, N. Y., coming to this city when a boy. His first position was in a dry goods store, which he secured when only 13. Ten years later he entered the alcohol trade, in which he was a pioneer. For 40 years he carried on this business at 165 Pearl street, first under his own name and later as James A. Webb & Son, moving a few years ago to Stone street. The son died in 1887.

Mr. Webb resided in Madison, N. J., where he was active in public affairs, having been for 50 years prominent in the development of the town and in the affairs of the First Presbyterian Church. He was an officer in Madison First National Bank and two local trust companies. He was treasurer in the American Distributing Co. and a director of the Central Stamping Co., of this city. He was a Harrison Presidential elector in 1892 and was a member of various civic and patriotic societies. He was president of the Madison Y.M.C.A. and a liberal contributor to charitable and philanthropic objects. He is survived by his widow, a daughter, Mrs. E. P. Holden and his son's widow, Mrs. James A. Webb, Jr.

Ohio State Ph.A. Loses One of its Founders.

UPPER SANDUSKY, Nov. 20.—John H. Von Stein, aged 57, for over 30 years of the firm of Von Stein & Berg, is dead after a long illness at his new home in Columbus. Last May Mr. Von Stein sold his interest to Fred Berg and the latter's son Karl. Going to Columbus, Mr. Von Stein and his son-in-law, Rae Stockton, purchased a drug store. Besides his daughter, a widow survives. Mr. Von Stein was one of the founders of the Ohio State Ph.A., was its treasurer for 18 years and never missed a meeting until stricken.

Michael Rafter Found Dead in His Laboratory.

Just before closing for the night recently, a clerk in the drug store of Michael Rafter, 97 Lexington avenue, New York, found his employer dead in the laboratory. The cause was given as heart disease. Mr. Rafter was born in Kildare, Ireland, 51 years ago. A widow and two sons survive. Mr. Rafter was prominent in the Manhattan Ph.A. and other associations, besides being an A.D.S. member.

HEAD OF SCOTT & BOWNE DIES OF PARALYSIS.

Used His Large Fortune in Philanthropy and Aided Many Educational and Religious Institutions.

SAMUEL W. BOWNE, of the well known firm of Scott & Bowne, chemists and proprietors of Scott's Emulsion of Cod Liver Oil, Bloomfield, N. J., died recently in his residence, at 35 West 57th street, New York, from the effects of paralysis. He built a fortune as a manufacturing chemist and was well known through his philanthropies and generous gifts at various times to educational and religious institutions.

Mr. Bowne was born 68 years ago at Walden, in Orange County, and on the death of his father the management of the home farm fell to him. Later he started in business life in Newburg and came to New York in 1865. His first position here was in a broker's office, in Wall street, and he later became connected with the firm of Scott & Platt, manufacturing chemists, as a traveling salesman.

In 1874 he became a partner in the business, which then took the style of Scott & Bowne. Mr. Bowne's activities broadened, and he became president and director of the Cold Process Co. of New York, director of the Aetna National Bank, the Independent Milk Products Co. and the Baldwin Steel Co., of Charleston, W. Va.

For many years Mr. Bowne had been actively associated with the life of the Methodist Episcopal Church in both the city and the state. He was president of the New York Church Extension and Missionary Society. In 1901 he gave $100,000 to the Twentieth Century Thank Offering Fund, and in 1907 gave a similar sum to Syracuse University for the establishment of the Bowne Hall of Chemistry. The Drew Seminary, at Madison, N. J., was another object of his beneficence. He erected a gymnasium at a cost of about $35,000, and, with William Hoyt, shared the cost of the $100,000 Hoyt-Bowne dormitory. In mission and church work in this city he was associated with John S. Huyler, who preceded him in death by a month. He was interested in the McAuley Mission, in Water street, New York, and in the Hadley Rescue Hall, in the Bowery.

Mr. Bowne married Miss Nettie Youngs in 1875, and she survives him. He left no direct heirs, but he had many nephews in different parts of the country. He was a member of the Union League, New York Athletic, Republican, City, Downtown, Hardware and Knollwood Country clubs of New York City.

Mr. Bowne left in his will bequests to various institutions amounting to $120,000 and the widow was given $25,000 and the income on $50,000. A number of nephews and nieces were given stock in the concern.

The Drug Trade Section of the New York Board of Trade

and Trommer, Inc. was represented at the funeral by the following committee: C. R. Cosby, C. S. Littell, Dr. H. C. Lovis, T. P. Cook, Albert Plaut, Irving McKesson, S. J. Child, I. F. Stone, F. Black, W. P. Ritchey and W. A. Hamann.

John G. Benedict, Retired Wholesaler.

BOSTON, Nov. 21.—John G. Benedict, a former member of the wholesale drug house of Smith, Benedict & Siegemund, which for several years had headquarters under the old Boston Museum, died at his home in Bourne, Mass., yesterday, aged 65. Mr. Benedict, before entering the wholesale business, conducted drug stores at 154 Chandler street, in the south end, and at 1 Blue Hill avenue, in Roxbury. He retired from the wholesale business in 1895. He moved to Bourne in 1893 and had taken a prominent part in the civic affairs of the Cape. He attained a high place in Masonry.

Was Father of a Druggist and a Druggist's Wife.

CINCINNATI, Nov. 22.—The Rev. Edward Voss, 74, for 31 years pastor of the St. Paul's German Evangelical Protestant Church, and the venerable father of Edward Voss, Jr., of the drug firm of Voss & Ehlers, who is also a member of the Ohio State Pharmacy Board, died here recently. Mrs. Ermina Wiebold, wife of Druggist William Wiebold was his daughter. Cincinnati's German-American residents and the city in general have lost in his death a man whose personality was always potent for good.

Quarter of a Century With a New York House.

CHARLES EMERY CORNELL, 65, manager of the fancy goods department of McKesson & Robbins, New York, died last month from an apoplectic stroke at his residence, 214 West 136th street. About 25 years ago he entered the employ of McKesson & Robbins as a traveling drug salesman. He is survived by a widow, a son, Charles E. Cornell, Jr., and a daughter. He was a graduate of the New York College of Pharmacy and was a Mason.

Retired Druggist, Aged 93, Fatally Burned.

CINCINNATI, Nov. 20.—While attempting to kindle a fire in the kitchen stove at his home at 913 Race street, without calling his nurse, who had taken care of him for several years ad who, at the time, was indisposed, Francis B. Eckstein, 93, a member of a prominent Cincinnati family, and who, about twenty-five years ago conducted a drug store at Fourth and Main streets, was so badly burned that he died soon afterward.

Veteran in New York Chemical Trade is Dead.

W. E. Bennett, for many years well-known in the chemical trade of New York City, died Nov. 5, at St. Vincent's Hospital. He was born 57 years ago in Manhattan borough. Since May, 1910, he had been connected with the Mallinckrodt Chemical Works, and previous to that was for some thirty odd years with Powers-Weightman-Rosengarten Co. He was a Mason and belonged to the Royal Arcanum.

Turpentine Afire Takes Life of Young Druggist.

EARLVILLE, Ill., Nov. 20.—Willard Alyea, aged 28, registered pharmacist and son of Thomas Alyea, druggist, died recently from burns received when some turpentine accidentally spilled in the basement was ignited by the furnace. He was well-known and popular in town.

Automobile Causes Death of Lester Lorah.

PITTSBURG, Nov. 20.—Lester Lorah, 35, died recently as the result of injuries caused by his being struck by an automobile. Mr. Lorah and his wife were prominent in entertaining the visitors to Pittsburg on the occasion of the recent N.A.R.D. convention. Mrs. Lorah being one of the speakers in welcoming the members. Much sympathy is felt for her, as her father died within a week of her husband's death.

Crushed to Death in a Dummy Elevator.

BOSTON, Nov. 21.—Samuel L. Paul, a general utility man, met with a fatal death at the establishment of the Eastern Drug Co. early in the morning. Paul was in the basement, and had occasion to go to the fourth floor. Disregarding the rule which forbids employes to use the dummy elevator, Paul squeezed himself into it and started to ascend. When between the third and fourth floors he either tried to stop the elevator, or else forgetful of the shape of the shaft up which he was passing, he thrust his head out of the little car. He was caught by the projecting wall above the entrance to the third floor, and was horribly crushed. He was extricated as soon as possible and hurried to the hospital, but he died on the way. Paul was about 25 years old, and had been employed by the Eastern Drug Co. about three weeks.

Students Attended Prof. Hallberg's Funeral.

CHICAGO, Nov. 20.—The University of Illinois School of Pharmacy was closed on the day of Prof. Hallberg's funeral. Both classes sent handsome floral pieces.

Professor Hallberg's illness had prevented his giving any class instruction this year, and his work has been taken from the beginning of the year by his assistant, Prof. C. M. Snow. Prof. Snow has been assistant to Prof. Hallberg for eight years and was able to take all classes in pharmacy and carry the work along smoothly, and in a manner that was entirely satisfactory to both students and the Faculty.

Obituary Notes.

—THEODORE H. EATON, head of T. H. Eaton & Son, chemicals, Detroit, is dead, aged 68. Born in Skaneateles, N. Y., he went in 1842 to Detroit, succeeding in 1888 to the chemical business founded in 1838 which his father had purchased. He was prominent in patriotic societies. A widow, a son and a daughter survive him.

—AUGUST SAALBACH, 70, who recently died, was father of Louis Saalbach, instructor in the pharmacy department of the University of Pittsburg and of Carl, of Saalbach Bros., Pittsburg. A widow survives.

—ROMANTA WELLS, for 50 years a retail druggist and lately secretary of the Kansas City D.D.A., died recently in Chicago, aged 76. He was father of Dr. H. G. Wells, assistant dean of the University of Chicago.

—SMITH W. PEEBY, aged 44, Green and Elm streets, Jamaica Plain, Mass., died at the Lynn Hospital, Nov. 3. An operation was performed in the hope of saving his life.

—GEO. N. ROOT, treasurer of the Lenox (Mass.) Savings Bank, recently killed in an auto accident, was a pharmacist until he entered the bank last year.

—THOMAS L. BIDDLE, 70, Fort Wayne, Ind., who recently died, was a pioneer druggist and later perfume manufacturer.

—HENRY R. GILLESPIE, for 20 years a Chicago druggist and a 32d degree Mason, is dead. He leaves a widow.

—MELVIN E. CORNWALL, 78, retired, is dead at Therasa, N. Y. His wife, married 48 years ago, survives him.

—CHARLES W. MENK, of Newark, N. J., has been the recipient of sympathy for the recent death of his wife.

—ADAM M. GRUBBS, 48, of the West End Pharmacy, Butler, Pa., is dead. A widow and five children survive.

—JAS. A. VANDEBBECK, at one time proprietor of several drug stores in South Philadelphia, is dead, aged 60.

—DR. HENRY WURTZ, chemist and scientist, is dead in Brooklyn, N. Y., aged 82. He discovered Wurtzelite.

—WM. M. MELVILLE, 65, banker and druggist, is dead at Lima, O. Allen County D. A. attended the funeral.

—BEN WILLIAMS, for 25 years a resident of Texarkana, Ark., is dead, leaving a widow and two children.

—WM. H. SCRAPE, for 25 years a druggist of Memphis, Tenn., is dead, leaving a widow and two children.

—LOUIS G. HOMEIER, 52, Columbus, O., died of heart failure on his way home. He had a wife and daughter.

—WILLIAM F. HEAGNEY, 44, proprietor of a drug store at 150 Derby street, Salem, Mass., died recently.

—JAS. J. LARKIN, 57, manufacturing chemist, died recently of appendicitis in a hospital in Baltimore.

—AL. J. SMITH, former druggist, later successful lawyer and official, died recently in Minneapolis.

—W. H. VINCENT, for 40 years in the drug business in Missouri, is dead at Polo, aged 75.

—CHAS. H. HARVEY, 45, Lancaster, Mass., formerly of Ware and Manchester, died recently.

—GEO. W. GRADY, 72, retired, Norristown, Pa., is dead.

—ROBT. S. GRANT, retired, died recently at Norfolk, Va.

—WM. REYNOLDS, 68, retired, is dead at Bristol, Ct.

—AUGUST FRANCK, 72, retired, is dead in Chicago.

—DR. R. C. TUTTLE, Roscoe, N. Y., died recently.

—EDGAR SWADLEY, 52, is dead at Wabash, Ind.

CANNOT REGISTER "REXALL" AS TRADE MARK.

Patent Office Sustains Owner of "Rex," Who Opposed Granting the Application of the United Drug Co.

WASHINGTON, D. C., Nov. 20.—H. E. Stauffer, examiner of interferences in the United States Patent Office, has sustained the objection made by E. M. Regis & Co., to an application made by the United Drug Co., of Boston, for the registration of the word "Rexall" as a trade mark. Unless an appeal is filed before Dec. 9 the decision will stand.

The action was prosecuted for the Regis concern, which manufactures the Rex dyspepsia remedy, at Haverhill, Mass., by Browne & Woodworth, counselors at law, of Boston.

The Regis Co. registered the trade mark Rex, as applied to medicines, on Nov. 27, 1900, securing trade mark certificate 35,503. In the argument and evidence it was claimed that Mrs. Regis and later the company bearing her name, had used the name Rex for more than 30 years.

The United Drug Co.'s application for registration of the word Rexall as a trade mark was made Nov. 20, 1908, but the company had previously understood that there was no reason why the application could not or would not be granted.

The objector claimed that the addition of the syllable "all" to "Rex" had caused confusion and loss, some of her patrons thinking the Rex and Rexall remedies were similar, if not the same. Litigation between the Regis Co. and Jaynes & Co., Boston, resulted in the decision by the Supreme Judicial Court of Massachusetts that the word Rexall as a trade mark for dyspepsia tablets was an infringement upon the Regis trade mark Rex, an injunction being granted to prevent the defendant Jaynes Co. from further use of the trade name Rexall.

The papers in the case cite many similar instances where the courts have held that the addition to or alteration of trade names has been an infringement. Some of those quoted are as follows: "Colonial"—"Colonial Dame"; "Pepko"—"Pep-Kola"; "Diamond"—"Diamonddust"; "Velvet"—"Velva"; "Ivy"—"Ivory"; "German"—"Germania"; "The Hero"—"The Heroine", etc., to the number of 30 or more.

Some other cases in which the prominent feature or catchword was appropriated and which were decided against the infringers, are quoted: "Charter Oak"—"Old Charter" "Black Caps"—"Black Capsules"; "Gin Phosphate"—"Genuine Phosphate Gin"; "American Lady"—"American Girl"; "Green Ribbon"—"Green River," etc.

Examiner Stauffer holds "that with respect to many of the remedies and preparations named in the application of the United Drug Co. the mark sought to be registered so nearly resembles a mark proved to be owned and in use by the opposer and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the mind of the public." The application therefore is denied by the examiner.

In a statement made by the United Drug Co. an explanation is made of the use of the word Rexall in connection with dyspepsia tablets. After the injunction against the Jaynes Co. the name of these tablets was changed to the Kroh dyspepsia tablets. The U. D. Co. states that prior to using the word Rexall, trade mark authorities were consulted and informed the company that there were no similar registered names which would interfere with the use of Rexall. The experts evidently overlooked the Regis Rex registration. The U. D. Co. states that when it discovered the existence of the Regis Co., rather than carry the case into court, it offered to buy the Regis business at a reasonable figure, "but that an abnormal price was put upon it."

Sells His Drug Business and Moves to St. Louis.

LOUISVILLE, Ky., Nov. 20.—L. H. Hall, who recently established a drug store at Sixth and Breckenridge streets, has retired, sold his store and moved with his family to St. Louis, Mo., where they will reside in the future.

Fountain Pens and Cigarettes in the Plunder.

BOSTON, Nov. 20.—Fountain pens, cigarettes, postage stamps and cash to a total of over $90 were stolen from the drugstore of Frank M. Frost at 907 Broadway, Chelsea, a few nights ago.

ERA DRUGGISTS' DIRECTORY *will be ready in December. Price $5 per copy. Orders should be placed now.*

BULLETS FAIL, BUT DISEASE CAUSES DEATH.

Dr. C. F. Simmons, Medicine Manufacturer, St. Louis, Had an Exciting and Picturesque Career.

ST. LOUIS, Nov. 20.—Dr. C. F. Simmons, medicine man and impromptu duelist, died of Bright's disease, recently at Excelsior Springs, Mo. He was a picturesque St. Louis character, where he was as well known as his medicine. He made a fortune in the manufacture and sale of his patent medicine, then ten years ago announced that he would retire from business and departed from St. Louis. He went to Texas and made $1,000,000 selling land and dealing in cattle.

In St. Louis in 1898 he had an affair of honor with Emil Davison, a bank clerk. While Davison was trying to take a revolver from his pocket Dr. Simmons shot him twice. There was no prosecution as Davison said the fight was the result of a misunderstanding. Dr. Simmons, while in St. Louis, also fought with his bookkeeper, George McBain, and the bookkeeper was stabbed with an erasing knife.

At Beeville, Tex., in 1905, Dr. Simmons was wounded in a revolver battle with J. H. Hamilton in a quarrel over stray cattle. At Excelsior Springs, in 1906, Dr. Simmons and Norman H. Chamberlain exchanged shots from behind telegraph poles in the main street of the town.

Friend of Druggists and Enemy of Tights is Missing.

MILWAUKEE, Nov. 20.—Assemblyman John F. Hughes, of Reeseville, well known publisher and popular because of his efforts in the assembly in behalf of the druggists, has disappeared. On Sept. 14 he attended the State fair in this city and has not been seen since that time. He became known almost nationally as the legislator who introduced the anti-tights bill in the last legislature, providing that no woman should appear on the stage in a costume that did not come within six inches of her ankles.

Druggist Ends His Life With Hydrocyanic Acid.

MILWAUKEE, Nov. 20.—Wm. Lorentz, 49, proprietor of a drug store at 19th and Greenfield avenues, recently killed himself with hydrocyanic acid, while despondent.

KOMMERS AT G.A.S. NOVEMBER MEETING.

Entertainment Committee Asks for $1,000 to Celebrate the Society's Sixtieth Anniversary.

At the November meeting of the New York German Apothecaries' Society, S. V. B. Swann presented a report on the status of the morphine ordinance question, asserting in its course, that it was generally understood that the Board of Health contemplated a modification of the obnoxious measure. A letter of protest against the ordinance addressed to Mayor Gaynor, on behalf of the G. A. S., was read by E. C. Goetting, as was also the former's acknowledgment of the same.

That the sum of $1,000 would be necessary, in order to fittingly celebrate the society's sixtieth anniversary, next October, was reported by Otto P. Gilbert, chairman of the entertainment committee. President George Kleinau appointed as a nominating committee, S. V. B. Swann, August Diehl, Fred. H. Plump, George Leinecker, and Felix Hirseman. F. H. Weyer, A. S. Schetter, and A. Sanntrock, of New York City, were elected members.

The meeting concluded with a kommers, over which the vice-president, Dr. Charles F. Klippert, officiated as master of ceremonies. Dr. Klippert delivered an address, arranged in poetic rhythm, and crowned each of the officers with a carnival cap, bearing the legend "Tugendbund." Dr. W. C. Alpers referred feelingly to the death of Prof. C. S. N. Hallberg, who had presided at the society's kommers to the A.Ph.A. A "trauerschoppen" was drunk to his memory.

Nineteen musical numbers were furnished by an orchestra led by Helmuth Jarchow, 'cellist, and of which Dr. F. W. Stechmann was the pianist. E. C. Goetting and Otto P. Gilbert contributed songs written by themselves.

New York Bowlers Going to Philadelphia.

The Eli Lilly & Co. New York branch bowling team will go to Philadelphia, Dec. 10, to roll against the Lilly Philadelphia team in the first of a series of contests arranged for this season.

NEW VOEGELI STORE WILL BE A MODEL ONE.

Brothers Will Have Three Pharmacies and They Have Not Yet Quit Growing—Some of the Features.

MINNEAPOLIS, Nov. 20.—Improvements in the West Hotel building make possible the opening of the third Voegeli Bros. drug store at Hennepin avenue and 5th street. More than $15,000 was expended in lowering the double store three feet to the street level and improving it otherwise.

"We expect to have one of the finest drug stores in America," said Thomas Voegeli in discussing the opening of the place, which will take place in a few days. "It will not only be beautiful, but modern and up-to-date in every particular."

The new Voegeli store will be the lone retail drug establishment in America to be finished in Circassian walnut. Fixtures and furniture are in Circassian walnut, as are the tasty panels which extend around the store, and the immense beams which run vertically and perpendicularly along the brown tinted ceiling. The whole effect is restful in the extreme, and excites one's admiration. There is nothing loud nor distasteful.

At intervals around the room, which has a 44-foot frontage in Hennepin avenue and a depth of 80 feet, are large plate glass mirrors, which add greatly to the beauty. In the center of the room show cases form a half circle, completely surrounding the three gigantic, onyx colored posts, which loom up 19 feet in height and have a circumference of seven feet. A balcony of Circassian walnut also extends circularly around nearly the entire store.

Especial attention will be paid to the soda water patronage. The fountain itself will probably be one of the prettiest in the city. A large plate glass runs along the rear length of 28 feet. The counter portion is in Mexican onyx. The part of the balcony nearest the 6th street side of the store will be given over to soda water tables. The furniture is all of Circassian walnut.

There will be innumerable show cases. The cigar counter is directly to the left as one enters from Hennepin avenue. The prescription department in the rear of the store has been ingeniously arranged. On the rear balcony is the large office. Four telephone booths take up the rear end of the store.

The Voegeli Brothers, Thomas and Henry, began in Minneapolis in 1887 in a "band-box" store at Hennepin and Washington avenues. The store was one-sixth the size of the present establishment at that corner. In 1892 they took over two additional stores, adjoining the Washington avenue establishment, increasing the total space to its present size. They bought the corner of Nicollet avenue and 7th street in 1903, opening another drug store there.

They say they haven't quit growing yet. During the winter they will increase the size of their Nicollet avenue store, taking over the adjoining store on Nicollet avenue. They have already secured the lease of that building. This will give the Nicollet avenue place a frontage of 40 feet.

New Building for Wholesale Druggists.

CINCINNATI, Nov. 20.—The Alfred Vogeler Drug Co., 217-223 East Sixth street, has moved into the building in East Fourth street which was occupied by the Stein-Gray Drug Co., which recently went into bankruptcy. The quarters are only temporary, however, as plans are under way for the construction of a big concrete building for the Vogeler Co. on the site of the old Vogeler store. The new building will cost about $200,000 and will not be ready for occupancy under a year or more.

Elephant Swallows 600 Grains Potassium Cyanide.

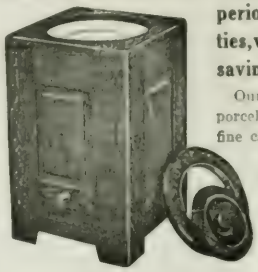
"Queen," one of the largest female elephants in the Frank A. Robbins circus, was put to death recently by being administered 600 grains of potassium cyanide. The poison was mixed up with three pailsful of moist bran. "Queen" was 87 years old, weighed 7,650 pounds and was 8 feet, 7 inches high. She succumbed 44 minutes after partaking of her last meal. In her lifetime she killed two people, for which crimes she was executed.

New Pharmacy Opened at Marshfield, Wis.

The new Potter Pharmacy has been opened at Marshfield, Wis. It is handsomely equipped with modern fixtures and a well arranged prescription department.

The Grand Rapids
ICE CREAM CABINET OF QUALITY.

Grand Rapids Ice Cream Cabinets save their cost in less than one season through their superior insulation properties, which effects a large saving in ice and salt.



Style No. 1

Our one can, 20 quart, porcelain lined cabinet. A fine cabinet at a right price. Made also in two can, 20 quart size.

Finely finished, perfectly insulated. Has brass faucet for drawing off water.

Three Can, Paneled Cabinet

Style No 2
Is insulated with two inch Cork Board of the best quality.

Style No 4

Our all wood ice cream cabinet which we guarantee to be unsurpassed by any on the market.

The two strongest features of the Grand Rapids Ice Cream Cabinets, features which should go a long way in getting your orders are perfect insulation and fine, durable finish. Combine these with the careful construction for which our product has been noted for years, and you have a pretty good proposition. Our finish is a specially prepared, secret process varnish, which we evolved after months of experimenting. We put on three thick coats which we guarantee makes it insurmountable to the attacks of salt water and prolongs the life of your cabinet indefinitely. That's the kind of goods you want to buy. Write us today for particulars, or ask your Jobber. New Catalogue Just Out.

CHOCOLATE COOLER COMPANY

75 Alabama Street **Grand Rapids, Mich.**

IMITATION BLACKBERRY CORDIAL LIBELLED.

Radams Microbe Killer Ordered Destroyed—Four Manufacturers of Headache Remedies Prosecuted.

WASHINGTON, Nov. 20.—The Department of Agriculture has given public notice of judgments 606 to 646, imposed by the courts in cases brought by the United States involving violation of the Food and Drugs Act, most of them relating to misbranding or adulteration.

The Failing-Nellis Drug Co., Albany, fined $125, shipped a quantity of an alleged remedy for headache, neuralgia, etc., same guaranteed as containing no narcotics and as a cure. Acetanilid was present and statements on label proven contrary to fact.

Other cases of misbranded drug products consisted in the following: Emmert Proprietary Co., Chicago, shipped 144 bottles of "Dr. Winchell's teething syrup, etc.," labels on which misstated contents to be a cure for a number of diseases, fined $25 and costs; A. J. Hilbert & Co., Milwaukee, shipped "Distilled Extract of Witch Hazel (Hamamelis). Dr. Scott Medicine Co., etc.," same claimed on label to be cure for a number of diseases and conditions, and on label of which amount of alcohol-content was not stated, fined $25, and 25 cases of "William Radams Microbe Killer, kills all diseases, etc.," which would not cure all or any disease at all. In the last case claimant upon payment of costs and execution of $500 bond might have secured goods but failed to disburse former sum and goods were destroyed.

Three consignments of "H. F. L. Hamilton Blackberry Cordial, artificially colored, etc. Henry H. Shufeldt & Company, rectifiers and wholesale liquor dealers, Apple street, Peoria, Ill., etc.," consisted wholly or in part of the fermented solution of starch sugar, artificially colored and flavored. Same was an imitation blackberry cordial and did not comply in any particular with the N. F. product. Upon payment of costs and filing of $400 bond, goods were returned to claimant for disposal per law.

Four headache remedy manufacturers were prosecuted as follows: Delaware Drug Co., Hancock, N. Y., shipped "Dr. Peters' Headache Powders, 1 oz. 280 grains phenylacetamide. They will relieve headache, neuralgia, etc.," misbranded because statements on label were untrue and proportion of acetanilid present was not given; defendant fined $50. Sure Pop Co., Terre Haute, Ind., shipped "Sure Pop Cures Headache and Neuralgia, etc.," claim of efficiency false, company fined $25 and costs; Gabriel R. Summers, doing business as Vanderhoof & Co., South Bend, Ind., shipped "Mrs. Summers' Harmless Headache Remedy," same being misbranded since it contained caffein, acetanilid, camphor and sodium salicylate, and was injurious to health, defendant fined $10 and costs, and W. A. Wells, doing business as the Wells Medicine Co., Lafayette, Ind., shipped "Wells Dime Headache Cure, etc.," misbranded since preparation would not cure headache, defendant fined $10 and costs.

Charles Crescelius, New Albany, Ind., shipped two boxes of a drug product sold as cocaine. Same contained 80.34 per cent. acetanilid and 19.64 per cent. cocaine hydrochloride, and label of either box failed to bear statement of proportion of these drugs. Fine of $10 and costs was imposed.

A. J. Miller, St. Louis, shipped two boxes of ointment sold as a cancer cure. The preparation analyzed as containing 31.8 per cent. acetanilid, no statement concerning same being made on label. Mr. Miller was fined $25 and costs.

The Bradfield Regulator Co., Atlanta, Ga., shipped a quantity of "Mother's Friend. For the relief of the suffering incident to child birth, etc." Claims of properties of preparation were decided false and fine of $25 and costs imposed.

470 Druggists in This Co-operative Concern.

MILWAUKEE, Wis., Nov. 20.—Forty-five stockholders in the Wisconsin Pharmacal Co. were the guests of the company at a dinner, Nov. 15, at the Blatz hotel. The affair was such a success and so thoroughly enjoyed by all those present that it was voted to make it an annual occurrence. E. G. Raeuber, manager of the company, acted as toastmaster. President C. Widule, Senator-elect George Weigle, Robert Dadd, E. B. Heimstreet and Henry C. Schrank responded to toasts. The reports of President Widule and other officers showed that the year just ending had been most successful and a cash dividend of six per cent was declared. There are 470 stockholders. The old officers were re-elected.

ANTIKAMNIA WINS FEDERAL COURT VERDICT.

Justice Clabaugh Holds That Action of Food and Drug Board was Legislation, Not Regulation.

WASHINGTON, Nov. 20.—In the Supreme Court of the District of Columbia last week Justice Clabaugh handed down a decision in the case of the United States vs. the Antikamnia Chemical Co., St. Louis, Mo., finding against the Government. The court finds that the tablets manufactured by this company were not misbranded under the Pure Food and Drugs Act and that the provision of Food Inspection Decision 112 relating to the labeling of derivatives, as enforced against the defendant, was illegal. The court holds that this action of the Board of Food and Drug Inspection, as promulgated by the Secretary of Agriculture, Secretary of the Treasury, and the Secretary of Commerce and Labor, was in the nature of legislation and not of regulation as authorized by Congress in connection with preparing regulations for the enforcement of the Pure Food and Drugs Act.

While the decision deals with the particular matter of the alleged misbranding of antikamnia tablets, in that it was stated that they contained no acetanilide, but did contain acetphenetidin, the application, it is believed here, extends to all of Decision 112 which relates to the naming parent substances of derivatives on labels.

Decision 112 declared acetphenetidin to be a derivative of acetanilide and provided in effect that this fact should be stated on labels of products containing the derivative. It is probable that the Government will appeal the case, although no conclusion to that effect has as yet been announced by the officials The regulation was passed by the three secretaries, in accordance with an opinion rendered by Charles J. Bonaparte, the then Attorney General.

The libel charges were two in number. The goods were claimed to be misbranded because each of the packages of the drug contained a large quantity of acetphenetidin, which was said to be a derivative of acetanilide, and under the Pure Food Act and Regulations made thereunder it is provided that the label on each package should bear a statement that acetphenetidin contained therein is a derivative of acetanilide. Secondly, it was claimed that each package was further misbranded and misleading for the reason that each label bore the statement that no acetanilide was contained therein and that this statement signifies that there was no proportion of any derivative of acetanilide contained in the product.

The court held that the secretaries exceeded their authority when they attempted to require manufacturing druggists to add to the name of the derivative the fact that it is derived from a parent drug, such as alcohol, cocaine, acetanilide, etc. Such action the court determined to be legislation and not regulation.

Elated Over Victory After a Four Years' Fight.

ST. LOUIS, Nov. 20.—Frank A. Ruf, president of the Antikamnia Chemical Co., is much elated over the decision of the United States Court in the famous tablet misbranding case. Mr. Ruf said:

"This decision knocks out Inspection Decision 112, which was simply bureau-made law, not regulation. We spent four years getting this case before the court and have finally proved our contention that the three secretaries have no right to make laws, but can only make regulations as empowered by Congress.

"We have always been willing to label our products in full compliance with the law and every right-minded citizen will approve our course in fighting against bureau legislation. We have Congress to legislate for us and that is enough.

This Co-operative Company in Good Condition.

BALTIMORE, Nov. 20.—The Calvert Drug Co., a co-operative corporation, held its annual meeting recently. John B. Thomas was re-elected president and Dr. John G. Beck was again chosen general manager. Dr. Beck reported the company to be in excellent financial condition, with every obligation met and a surplus.

Temporary Receiver for Wholesale Drug Concern.

RALEIGH, N. C., Nov. 22.—Judge Cooke has appointed A. W. Medlock temporary receiver of the Acme Drug Co., wholesale druggists, on the application of D. T. Worley, a stockholder, who claims that the concern is not making money. There will be a further hearing next Monday.

NEW CORPORATIONS.

Perfume Drug & Chemical Co., New York City. Capital $50,000. Incorporators: E. J. Hutter, Great Neck, N. Y., and Vincent J. Lascurain and John Langbrant, Long Island City, N. Y.

Palmetto Pharmacy, Greenville, S. C. Capital $5,000. Presidents, R. H. Jones; vice president, secretary and treasurer, H. C. Wells.

Lucky Cuticura Co., Chicago, Ill., to manufacture chemicals, drugs, toilet articles. Capital $200,000. Incorporators, L. Clark, L. R. Young and J. O. Hall.

Osage Manufacturing Co., Bloomington, Ind. To manufacture and deal in toilet articles and supplies. Capital, $15,000. Incorporators, B. H. Rifenbark, W. H. Fisher and J. L. Murray.

Adams Remedy Co., New York. To manufacture patent medicines, laxatives, etc. Capital $30,000. Incorporators, L. M. Herman, Jersey City, Aaron Broomhall, M. A. Nestor, New York.

David B. Levy, New York. To manufacture medicines, drugs, chemicals, etc. Capital, $24,000. Incorporators, David B. Levy, Chas. A. Buerk, and James P. Williams.

Goldenthal Pharmaceutical Co., Brooklyn, N. Y. Capital, $1000. Directors, Sophie Goldenthal, Brooklyn, and Oscar Stelnberg and George Apfel, New York.

Canisteo Drug Co., Canisteo, N. Y. General drug business. Incorporators, J. W. Mitchell, Canisteo, and Albert E. Gray, East Aurora, N. Y.

Wendell Pharmacy, Pittsfield, Mass. To take over Willard Pharmacy. Capital, $10,000. President and treasurer, Luke J. Minahan; clerk, J. W. Lewis; directors, the officers named and Frederick McCoy.

Unit Chemical Co., Newark, N. J. Druggists and chemists. Capital, $100,000. Incorporators, Herbert Goldsmith, Mortimer Koehler, and Emanuel Berger.

Neches Drug Co., Beaumont, Texas. Capital, $10,000. Incorporators, W. C. Whitney, M. E. Rowzee, and W. S. Stevens.

Miller-Hanson Drug Co., New Britain, Conn. Capital, $12,000. Incorporators, Aaron Danielson, Sven P. Hanson, both of New Britain and Carl E. Miller, Hartford.

Walter Bywaters Drug Co., Roxton, Texas. Capital, $8000. Incorporators, Walter Bywaters, K. Hunter Bywaters and T. F. Julian.

Emerson Drug Co., Denver, Colo. Capital, $10,000. Incorporators, William H. Kent, Edward K. Davidson and P. J. E. Robinson.

Nuera Pharmacal Co., Detroit, Mich; to manufacture pharmaceutical specialties. Capital, $1000. Incorporators, Clarence R. Burrell, Max A. Kean, and Harry S. Schneider.

Lexington Drug & Chemical Co., New York, chemists, druggists, etc. Capital, $10,000. Incorporators, William D. Meagher, Geo. E. Palmer and Martha Best.

Dehossen Pharmacy, Chicago, Ill. Prescriptions and drugs. Capital, $5000. Incorporators, Charles E. Schieck, F. C. Ravens, F. Bagley.

Olympia Drug Co., Gloucester, Mass. Capital, $5000. Incorporators, Albert S. Maddocks, J. Richard Clark, William G. Clark and Harold S. Maddocks, Jr.

International Non-Refillable Bottle Co., Lowell, Mass. Manufacturing bottles. Capital, $25,000. President, J. C. Burke; treasurer and clerk, J. J. Corbett.

Grenier Chemical Fibre Co., Philadelphia, Pa. To produce raw cotton and deal in absorbent cotton, wood pulp, etc. Capital, $200,000. Incorporators, Christian A. Grenier, Ernest Grenier, Norristown, Pa., and James C. Roberts of Arlington, N. J.

Covington Turpentine Co., Jacksonville, Fla. Capital, $100,000. President, A. D. Covington, Rosalie, Fla.; vice-president, D. R. McNeill; secretary, and treasurer, W. J. Kelly, Jacksonville.

Hammon Drug Co., Hammon, Okla. Capital, $3000. Incorporators, A. North and J. North, Davidson; and R. J. Schropen, Hammon.

Nulomoline Co., New York. To manufacture and deal in Nulomoline, etc. Capital, $100,000. Incorporators, Noah W. Tansaig, New York; William H. Mason, Hurley, N. Y., and Chas. T. Teigeler, Rutherford, N. J.

Young-Roberts Drug Co., Waycross, Ga.; wholesale and retail drugs. Capital, $20,000. Incorporators, J. M. Young, Jr., H. K. Robertson and J. M. Warren.

Everyman's Safety Razor Co., Arlington, N. J. Capital, $125,000. Incorporators, E. J. Forhan, G. I. Martin and H. P. Jones, all of 154 Nassau St., New York City.

Miller Drug Co., Hamilton, O. Capital, $5000. Incorporators, Harry A. Junkins, U. F. Buckley, Charles J. Parrish, Charles Z. Mitchell and Geo. M. Cummings.

Cameron Drug Co., Cameron, Texas. Capital $10,000. Incorporators, I. C. Cochran, M. E. Mack and R. B. Johnson.

McLean Drug Co., Cleveland, O. Capital, $10,000. Incorporators, Alfred McLaren, Alfred G. Cooper, James McLaren, J. E. McLean and J. Cooper.

Best Drug Co., Hobson, Mont. Manufacture drugs and chemicals. Capital, $50,000. Directors, Geo. R. Fisher, Henry B. Lamoreaux and R. H. Kleinschmidt.

International Color and Manufacturing Co., Chicago, Ill. To manufacture dyes, chemicals, compositions, etc. Capital, $25,000. Incorporators, William M. Gager, B. H. Sherman and Robert Rose.

Langford Drug Co., Sherman, Texas. Capital $10,000. Incorporators, W. H. Langford, P. C. Keith and T. H. Parr.

Thompson Hospital Co., Denver, Colo. Capital, $50,000. Incorporators, L. A. Whitney, C. F. Armstrong, Marion Cowell.

Mineral Chemical Co., New York. Manufacturers' chemicals of all kinds. Capital, $25,000. Incorporators, J. H. Williams, Brooklyn; C. D. Ellis, S. Y. W. B. Duncan, New York City, M. C. Peters, N. Y.

The Wyandotte Manufacturing Co., South Pearl Ind. To manufacture patent medicines and medicines. Capital, $12,000. Incorporators, W. L. Kreer, Samuel Whitehall, A. B. Prance and John Wolverton.

Medical Pharmacy Co., Marion, N. C.; general drug business. Capital, $5,000 with $2,000 subscribed. Incorporators, M. L. Berry, H. J. Sanders, D. L. Perry, Jr. and W. R. Zeigler.

Booth Hinds Co., New York; drugs and chemicals. Capital, $10,000. Incorporators, Clement G. Booth, New York City; Richard W. Pharr, Summit, N. J., and W. J. Hinds, Kent, Ohio, and two others.

A. G. Lansing Co., New York City. To manufacture and deal in bath salts, drugs, medicines, etc. Capital, $125,000. Incorporators, James J. Bridgman, Geo. E. Horton, Theo. S. Mackbell, Jr., and two others.

Central Chemical Co., Boston, Mass. Capital, $50,000. Incorporators, Daniel E. Loweree, Lucius K. Thayer and Henry D. Padelford.

Langham Pharmacy, Boston, Mass. Capital, $6000. Incorporators, Howard W. Nowell, Joseph P. Ryan and Rufus B. Sprague.

Clay-Godson Chemical Mfg. Co., New York City. To manufacture drugs, chemicals, paints, oils, etc. Capital, $500,000. Incorporators, D. Robins, H. Rapp, and J. Moses.

Vitalitas, Inc., New York City. To manufacture and deal in drugs, medicines, etc. Capital, $20,000. Incorporators, Paul S. Schwengers, Geo. D. Hart and Thomas F. Walsh.

W. F. Norris Co., South Whitley, Ind., Pharmacists. Capital, $6000. Incorporators, W. F. Norris, S. H. Norris and Moses Mayer.

L. L. Harlan Co., Druggists, Hawarden, Ia. Capital, $15,000. President, L. L. Harlan; vice-president, L. L. Harlan, Jr., and secretary-treasurer, Guy Burket.

Herlkraft Medical Co., Boston, Mass. General drugs. Capital, $100,000. President W. Junker, New York City; treasurer, F. L. O'Leary, Boston, Mass.

International Remedy Co., Boston, Mass. To manufacture and deal in drugs. Capital, $50,000. President, A. E. Burrell, East Weymouth; treasurer, J. F. Lynch, North Attelboro.

Mount Croghan Drug Co., Mount Croghan, S. C. Capital, $7000. President, William J. Perry; secretary-treasurer, Karl F. Taylor.

John Gates Co., Utica, N. Y. To manufacture and deal in drugs, etc. Capital, $40,000. Incorporators, J. Gates, J. G. Slauson, and R. T. Gilbert.

Benedict Tablet Co., Utica, N. Y. To manufacture and deal in drugs, chemicals, etc. Capital, $50,000. Incorporators, G. W. Benedict, Ilion; A. G. Miller, E. W. Hobin and R. A. George, all of Utica.

Newark Chamois Co., Newark, N. J. To deal in chamois skins, etc. Capital, $75,000. Incorporators, Chas. G. Drueding and Henry G. Drueding of Philadelphia; John K. Kaiser, Mt. Vernon, N. Y. and Alfred K. Schrauce, Newark, N. J.

Milban Drug Co., Eastchester, N. Y. Capital, $1000. Directors, R. B. Gray and B. R. Bates, New York City, and Chas. V. D. Peck, Mt. Vernon, New York.

Cantor & Dillon Co., New York. To deal in drugs, medicines, paints, etc. Capital, $10,000. Incorporators, Herman H. Cantor, Conrad C. Dillon and Edward L. Thompson.

Medico-Tabloid Co., New York. To manufacture and deal in drugs, medicines, etc. Capital, $25,000. Incorporators, J. F. Egerton, F. C. Schwarz and J. L. Crotta, M. D.

Dreier Drug Co., Ft. Wayne, Ind. Capital, $30,000. President, W. H. Dreier; vice-president, C. F. Freese; secretary, Martin Scheele; treasurer, Geo. F. Miller.

O. U. K. Bottle Manufacturing Co., Wilmington, Del. Capital, $1,000,000. Incorporators: W. H. Nook, G. D. Hopkins and B. M. Grawl.

Electric Drug Co., Webb City, Mo. Capital, $6000. Incorporators: John Barron, James Crawford and W. S. Barron.

Mutual Chemical Manufacturing Co., Chicago, Ill.; to manufacture and deal in chemicals, food products, etc. Capital, $10,000. Incorporators: L. H. Clanchard, C. J. Breitsprecher, N. F. Sawyer.

Tailby-Nason Co., South Berwick, Me.; chemists, druggists, etc. Capital, $100,000. President, treasurer and clerk, F. A. Hobbs, South Berwick.

Davies, Rose & Co., Boston, Mass.; general drug business. Capital, $25,000. President, J. W. Davies; treasurer, G. H. Rose, Boston.

Moxum Drug Co., Salt Lake City, Utah. Capital, $5000. President, Thomas Elliott; vice-president, G. J. McGonigle; secretary and treasurer, Edith S. Elliott.

Longnecker Drug Co., Struthers, Ohio. Capital, $10,000. J. E. and Daisy B. Longnecker, B. F. Harris, W. C. Carman, D. B. Cooper.

Cooleemee Drug Co., Cooleemee, N. C.; general drug business. Capital, $10,000 ($2500 paid in). Incorporators: W. D. Turner, Claude Ramseur and A. L. Taylor, Concord.

Sunset Perfume Co., Los Angeles, Cal. Capital, $240,000; subscribed, $200. Directors: John D. Smith, Eugene Merrick, E. M. Smith, G. M. LeRoy, T. A. Smith.

Pierre Carbonating Co., Pierre, S. D.; to manufacture and sell carbonated beverages. Capital, $100,000. Incorporators: P. F. McClure, C. Enger, J. C. Adam and Richard Purcell.

K. N. W. Pharmacy, Spartanburg, S. C. Capital, $5000. President, G. D. F. Wilson; vice-president, R. E. Kibbler; secretary-treasurer, O. W. Nettles.

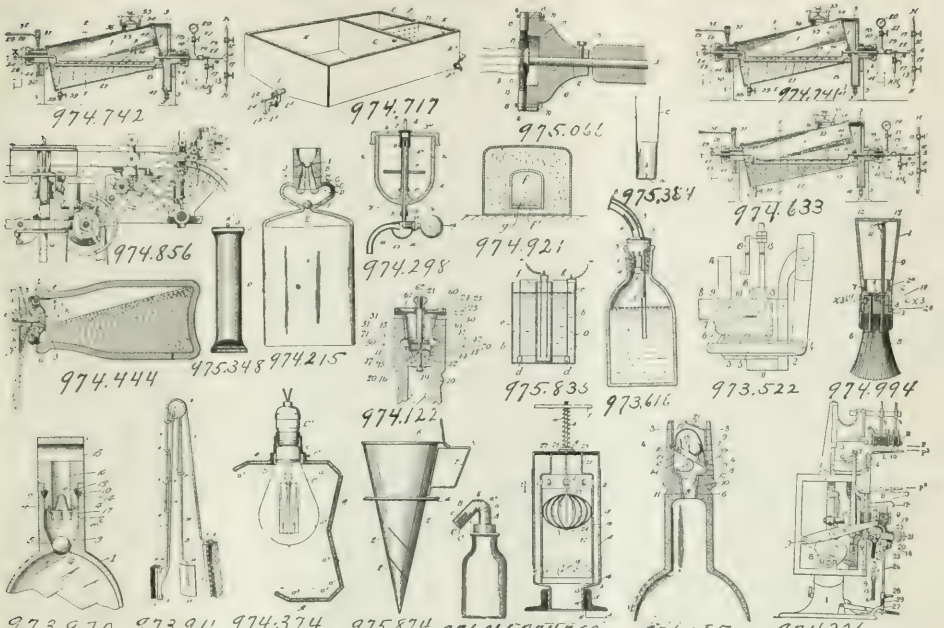
Thomas W. Read Manufacturing Co., Cincinnati, Ohio; to manufacture drugs and medicines. Capital, $5000. Incorporators: T. W. Read, J. A. Campbell and James Casey.

Anti-Pyorrhea Chemical Co., St. Louis, Mo.; to manufacture and deal in medicines. Capital, $50,000. Incorporators: Lorwin N. Cates, R. W. Parker and Arthur Wolf.

John W. Cobbs Drug Co., Springfield, Ill. Capital, $18,000. Incorporators: Alice L. Cobbs, Vincent Y. Dallman, Sidney B. Breese.

Crosby Chemical Co., Round Brook N. J.; to engage as chemical manufacturers, in real estate, etc. Capital, $125,000. Incorporators: James G. Fisher, Joseph H. Fisher and Rose A. Fitzgerald.

PATENTS, TRADE MARKS, ETC.—(See Next Page)



PATENTS.

Granted October 25, 1910.

973,522—Johannes K. Lannmark, Stockholm, Sweden. Corking-machine.

973,616—Ernest L. Beck, New York, assignor to Dodge & Dent Mfg. Co., Inc. Bottle-stopper.

973,832—Arnold Wiens, Bitterfeld, Germany, assignor to Electrochemische Werke, G. M. B. H. Process of making oxalates from formates.

973,908—Hans Belart, Huddersfield, Eng. Preparation of eugenol and albumin.

973,911—Philip Buck, Rugby, Tenn. Bottle and lamp-chimney cleaner.

973,970—Ward B. Powell, Chant, Okla., assignor of one-half to W. W. Wingo, Hartford, Ark. Non-refillable bottle.

Granted November 1, 1910.

974,122—Edmund S. Church, Dayton, O., assignor to The Hayner Distilling Co. Bottle-stopper.

974,215—Peter Vice, New York. Non-refillable bottle.

974,298—Chas. B. Rider, Ocean City, N. J., assignor of one-half to Samuel H. Hann, Camden. Disinfecting apparatus.

974,326—Frank O. Woodland, Worcester, Mass. Feed-controlling means for labeling-machines.

974,374—Thomas Gaggs, Chicago, assignor to Thomas H. Sidney. Reflector for store windows and the like.

974,444—Chas. J. Stauffiger, Buffalo. Bottle-stopper.

974,448—Frederick Supf, New York, assignor to the Arabol Mfg. Co. Process of liquefying organic colloids.

974,633 and 974,742—Henry S. Blackmore, Mt. Vernon, N. Y., assignor to Robert E. Robinson and Daniel C. Spruance, trustees, New York. Process of making ammonia, or ammonia bases.

974,717—Davis B. Spahler and Benjamin F. Bryan, Taft, Fla. Turpentine-separator.

974,741—H. S. Blackmore, assignment same as 974,633. Process of making ammonia or other nitrogen-hydrogen binary compounds.

Granted November 8, 1910.

974,739—David S. Henney, Newark, N. J. Ozonizer.

974,856—George Brand, Felix Marelle and Edward P. Sheldon, Brooklyn. Labeling-machine.

974,921—Charles Rollin, Newcastle-upon-Tyne, Eng., assignor to himself and Hedworth Barium Co., Ltd. Process of making barium oxide

974,993—Charles Rollin, assignment as above. Process of making anhydrous barium hydroxide.

974,994—Walter T. Schaefer, Los Angeles, and Joseph E. Steers, San Francisco. Fountain toilet-brush.

975,066—Wm. Penman, Denison, Tex. Neck-cleaning device for bottle-washers.

975,129, 975,353 and 975,354—Reinhold Gruter and Heinrich Pohl, Charlottenburg, Ger., assignors to Chemische Werke vorm. Dr. Heinrich Byk. Stable mixture for producing hydrogen peroxide.

975,151—Max Neumann, Weisbaden, Ger., assignor to General Chemical Co., New York. Formic acid.

975,224—Gilbert Fowler, Urmston, near Manchester, Eng. Process for obtaining pure shellac from stick-lac or the like.

975,348—Oscar Gerdtzen, Valparaiso, Chile. Discharge-head for collapsible tubes.

975,384—Fred L. Norman, Baltimore ,assignor of one-half to Herman Bealmear. Cork-extractor.

Granted November 15, 1910.

975,656—Jokichi Takamine, New York. Process of converting starchy material into sugar.

975,814—Albert Westlake, New York, Mouth-tablet.

975,835—Herman Damkohler and Hugo Schwindt, Bremen, Ger. Process of electrolytically treating tannic infusions of plants.

975,863—Eduard Hepp, Frankfort-on-the-Main, and Christoph Hartmann, Hochst-on-the-Main, Ger., assignors to Farbwerke vorm Meister, Lucius & Bruning. Anthraquinone derivatives and process of making same.

975,866—Henry Howard, Boston. Formic acid.

975,874—Herrmann E. Korn and Edmond Kuhn, East Orange, N. J. Apparatus for preparing infusions.

976,051—Frank M. Davis, Butler, Pa. Milk Extract of wild spikenard.

976,065—Seth E. Gill, Brooklyn. Non-refillable bottle.

976,066—Chas. J. Gillette, Washington, D. C. Measuring device.

TRADE MARKS.

Published October 25, 1910.

42,374—Rich. Schubert & Co., Weinhohla, near Dresden, Ger. Ointments to be used in cases of herpes, eczema, and similar skin diseases.

49,486—Allcock Manufacturing Co., Ossining and New York.

Copy of any TRADE-MARK or PATENT, with 64 page Booklet on LEGAL TRADE-MARKS, PROTECTIVE PATENTS, and FOOD AND DRUGS ACT, sent for 25 cents.
G. H. DAVIS, Attorney, 908 G St., N.W., Washington, D. C.

[illegible] medicinal tablets, medicinal wafers, etc.
51,234—Hospital Pharmacal Co., New York. Toxicological medicine.
51,269—Dr. [illegible] Asthma Remedy Co., Ada, Mo. Remedies for [illegible].
51,[illegible]—Satiskine Co., Boston. Hair-tonic, face-powder, and cold-cream.
51,995—Richard J. Parrett, Elkhart, Ind. Remedy for diseases of blood, kidneys, and liver, etc.

Published November 1, 1910.

46,775—The Andrew Jergens Co., Cincinnati. Perfumes and toilet waters.
47,251—Clarence S. Brant, Avon, Ill. Ointment for treatment of eczema, pimples, redness of skin, etc.
49,396—Mayole (1910) Co., New York. Face-creams, skin-lotions, hair-tonics, face-powders, perfumes, toilet waters, etc.
49,697—Alfred Dalle, Berlin, Ger. Hemoglobiniferous preparations.
50,651—Wm. H. Grimes, New York. Cough drops.
50,763—Schieffelin & Co., New York. An analgesic and antiseptic for use both external and internal use.
51,137—Osteopathy Supply Co., New York. An antiseptic and remedial preparation.
52,138—Julius Schmid, Inc., Astoria, N. Y. Styptic pencils.

Published November 8, 1910.

46,690—Oxygenator Co., Buffalo. Oxygenators.
47,242—Fred F. Frontz, New York. Remedies for treatment of diseases of the vagina, ovaries, and womb.
50,559—Elsa Bunzl, New York. Skin-lotions.
51,054—Max Queisner, Charlottenburg, Ger. Chemical preparation for cleaning straw hats.
51,327—George Lueders & Co., New York. Peroxide of hydrogen.
51,856—Rural Home Chem. Co., Wellsboro, Pa. Substance adapted for use as a disinfectant, deodorant, germicide, and insecticide.

Published November 15, 1910.

46,203—Cuticipel Co., New York. Skin disease remedies.
47,630—Smith, Kline & French Co., Philadelphia. Remedies for coughs, liquid dentifrice, powder dentifrice, remedies for diseases of the skin, liniment, etc., etc.
50,566—Joseph C. Wunder, Baltimore. Constipation remedy.
51,672—Rural Home Chem. Co., Wellsboro, Pa. Compound to aid digestion, assist assimilation and quicken elimination in animals.
52,198—General Drug Co., New York. Headache remedies.
52,297—Albert Rudolph, Edgewater, N. J. Hair Tonic and remedy for dandruff, etc.

Produce Show at Traverse City.

Hannah & Lay Mercantile Co., Traverse City, Mich., have issued a catalogue of premiums to be awarded for the best displays of an agricultural character exhibited in their second Produce Show, to be held in their buildings during Grange week, December 12-17. The purpose of the show is to supplement the advertising which has been done by the Traverse City Board of Trade and the Western Michigan Development Bureau, and also to give strangers an opportunity to see for themselves how the Grand Traverse region of Michigan excels in horticultural and agricultural lines.

Third Store of Spiegel Chain Opened in Milwaukee.

MILWAUKEE, Nov. 20.—Under the management of H. P. Harris, formerly of Chicago, the A. Spiegel Co. has opened the third of its chain of drug stores at 126 Wisconsin street, which is one of the most handsome and best appointed pharmacies in the city. Crowds thronged the new store during the entire day of the formal opening, when souvenirs in the way of cut flowers, candies and samples were given away. The prescription department is a model and is large enough so that four clerks can work at the same time.

Druggists Interested in Proposed Credit Bureau.

MILWAUKEE, Nov. 20.—Local druggists are much interested in the proposed movement of the retail division of the Milwaukee Merchants' & Manufacturers' Association to establish a credit bureau, modeled after that now in use in Indianapolis. Many of the druggists are becoming affiliated with the association so that they can secure the benefits of this bureau, which will at all times keep an accurate record of all persons who have ever secured credit in the city.

May Reorganize the American S. F. Co.

BOSTON, Nov. 20.—Affairs of the American Soda Fountain Co., as per Treasurer North's report, show that the business has improved and during the year has been conducted with a slight profit. Cash on hand exceeds indebtedness. Under restrictions of the corporation law a reorganization will probably be made. Until then dividends are improbable.

ERA DIRECTORY. DIRECTORY *will be ready in December. Price $5 per copy. Orders should be placed now.*

NOTE: A, advanced; D, declined; C, correction; N, new.

See page 1239 and following pages for Prices Current.

NEW YORK, Nov. 23.—Business during the period since our last report, and more particularly within the past week, has been of very fair proportions, with an apparent steady increase in volume and price changes largely in favor of sellers, some of which are of more than ordinary importance. Opium, natural, is slightly lower, although cabled higher abroad. Quinine is without change. Manufacturers have advanced

prices of bromide preparations. Yerba Santa is further advanced and Elecampane and golden seal roots are higher. Couch grass and German dandelion are cabled higher abroad. Jalap is easier, and large German fennel seed somewhat lower. Tartaric acid and cognate preparations—cream tartar, Rochelle salt and seidlitz mixture—have been advanced. Camphor, refined, has been reduced, as also santonine. Prickly ash bark is scarce and higher. Ergot is again cabled higher abroad with a consequent advance in prices here. Cocculus Indicus is in moderate demand at higher prices. Both yellow and green olive oil are quotably higher, as are oils of lemongrass, rose geranium, peppermint and Dutch Haarlem oil. Levant wormseed is cabled materially higher abroad but without change in spot quotations. With November elections over and the Christmas holiday season in sight, dealers are looking forward to a period of increased business activity.

OPIUM.—The demand is light and unimportant and while the present quotation for natural is slightly lower, cable advices indicate a stronger position abroad. Reports from Smyrna on the 1st of the month note arrivals there to date of 3,724 cases against 1,629 cases on the corresponding date last year, the stock held amounting to 1,540 cases. The weekly arrivals seem to indicate an important quantity still remaining in the interior. The total arrivals in the three principal markets of Turkey equal 8,774 cases, the total available stock being 3,000 cases. Ruling quotations in this market are $5@5.20 for natural, and $7.10@7.35 for granulated and U. S. P. powdered.

QUININE.—Is moving in a routine way and chiefly in jobbing quantities with manufacturers' prices unchanged and fairly steady on the old basis of 14c in bulk for 100-oz. tins. Cable advices report that the shipments of cinchona bark from Java to Europe for the first half of November amounted to 240,000 kilos. Bark shipments from Java continue fairly large, the total for the first ten months of the year being 15,380,600 pounds against 13,041,000 pounds for the corresponding period in 1909.

CREAM TARTAR.—Is firmer, owing to the strong position abroad of the crude material. Powdered is now quoted at 30@36c per pound.

BROMIDES.—Are firmer and manufacturers have advanced their prices 4c per pound for ammonium, potassium and sodium. It is expected that a new scale of prices will be issued in the near future.

GOLDEN SEAL ROOT.—Is scarce, the available stock being concentrated in few hands. Quotations have been advanced and jobbers are now asking $2.50@2.60 per pound for whole and 2.70@2.80 for powdered.

ELECAMPANE.—Primary markets are said to be about bare of stock and jobbers are now quoting 18@20c per pound for whole root and 22@25c for ground.

DANDELION ROOT.—German is cabled higher abroad, this year's crop, on account of wet weather, being unusually small. Ordinary jobbing quantities are quoted at 22@27c for whole and 24@29c for powdered.

JALAP.—Is easier, owing to reports of weaker primary market, jobbers asking 45@50c for selected root, and 50@55c for powdered.

FENNEL SEED.—German large is meeting with a considerable demand, at lower range of values, 20@24c per pound as to quantity being asked.

QUICKSILVER.—Is easier in sympathy with lower primary markets, first hands having reduced flask prices. Jobbing quantities are quoted at 75@80c per pound.

TARTARIC ACID.—Has been again advanced by manufacturers, owing to the higher cost of crude material, and the revised quotations for crystals are 34@37c; powdered, 36@40c.

ROCHELLE SALT.—Both this salt and Seidlitz mixture are firmer in sympathy with other tartar preparations, 21@24c being asked for the former and 17½@19c for the latter.

YERBA SANTA.—Is firmer in sympathy with stronger primary markets and quotations have been advanced to 25½@30c per pound.

ERGOT.—Both Russian and Spanish continue firm and the outlook is considered favorable to further improvement. Cables from Hamburg have reported a marking up of prices for Russian and only a limited amount is offered. In this market available supplies are gradually shrinking, with jobbers quoting 60@65c per pound for whole and 68@72c for powdered.

BUCHU LEAVES.—Shorts are again easier, owing to keen competition and some pressure to realize and quotations have been reduced to $1.10@1.20 for whole, and $1.15@1.25 for powdered. The long variety is also lower, 75@85c being asked for whole and 85@95c for powdered.

PRICKLY ASH BARK.—Owing to scarcity, prices are higher, 50@55c being asked.

GLYCERIN.—Is again higher, owing to the strong position of crude abroad and all manufacturers have advanced quotations 1c per pound.

OLIVE OIL.—Is stronger owing to reports from Italy and Spain that the yield this year will be unusually small. For Lucca cream oil jobbers are asking $2.90@3.50 per gallon as to quantity, kind of container, etc., and $1.75@1.85 for Malaga.

COCCULUS INDICUS.—Is in lighter supply and firmer with quotations advanced to 12@14c per pound.

TONKA BEANS.—Under steadily diminishing supplies Angostura are much firmer, with small stock in hands of dealers and poor crop outlook. Quotations have been advanced to $4.20@4.30 per pound, as to quality, quantity and holder.

IPECAC.—Carthagena is firmly held at $2@2.15 per pound and the small spot stock is closely concentrated.

SAW PALMETTO BERRIES.—Advices from Florida are to the effect that the hurricane, which swept over producing districts early in the month, practically destroyed the crop already gathered and in process of curing, and no more will be available for several months. Jobbers' prices in this market have not yet been changed, however.

SPACE IN DEMAND AT WISCONSIN DRUG SHOW.

Plenty of Exhibitors at Auditorium, Milwaukee, in Which the Display is Being Made.

MILWAUKEE, Nov. 20.—Preparations for the Wisconsin Drug Show, to be held in the Auditorium during the week of Nov. 28, are rapidly being completed with indications that the affair will be a huge success. The expectations of those in charge of the affair have more than been realized in the way of demands for space. Applications have been received in large numbers daily and it would not be surprising if the immense hall would prove too small to accommodate all those who wish to be among the exhibitors.

One of the most unique displays will be that of the Wisconsin Pharmacal Co. A portion of the booth will be given over to a working display of sealing headache wafers without moisture. Two machines, said to be the only ones of their kind in the United States, will be used in this work. The wafers are imported from Germany. Another prominent exhibit will be that of Peter Van Schaack & Sons, of Chicago.

Among the other concerns which have secured allotments of space are the following: Richard Leffman, Dean Medicine Co., Milwaukee Drug Co., Emerson Drug Co., Pluto Water Co., Bass Island Vineyard, Bromo Lithia Chemical Co., Horlick's Malted Milk Co., Valhalla Co., and numerous others.

San Francisco Wants Panama Exposition.

The people of California and San Francisco are making energetic efforts to have Congress designate the Western Metropolis as the site for a Panama-Pacific Exposition to celebrate the completion of the Panama canal, which, it is expected, will be ready for traffic early in 1915. The literature sent out by the promoters of the scheme is full of facts and figures which go far toward convincing the average individual that San Francisco is the logical place for the celebration. Benjamin Ide Wheeler, whose services have been enlisted in the work, writes an introduction in which he says that the opening of the Panama canal marks a supreme epoch in the history of mankind on the earth.

Antikamnia Calendar for 1911.

Attention is called to the advertisement of the Antikamnia Chemical Co. in this issue of the ERA, in which they offer to mail a copy of their beautiful 1911 Antikamnia Calendar free on January 1 to anyone of your friends and customers if you will send them a list of the names. Drug clerks as well as druggists are asked to send in these lists and to do it to-day as the first received will be the first served. Antikamnia calendars have a reputation as reproductions of artistic paintings, and the calendar for the coming year will compare favorably with any previous issues.

ERA DRUGGISTS' DIRECTORY *will be ready in December. Price $5 per copy. Orders should be placed now.*

BUSINESS NOTICES

New Plant for Liquid Carbonic Co.

In the completion of the million dollar plant and the installation of the manufacturing departments in their new quarters, Jacob Baur, president and founder of the Liquid Carbonic Co., Chicago, rounds out another epoch in his career and is a happy man. Starting the business in a small way in Chicago he has seen it grow in a way that would furnish facts for a story of dramatic interest. The new plant occupies more than two city blocks of land, the main building

itself being 1000 feet long. Its construction and equipment costs about $1,250,000, and Mr. Baur believes the money well expended because it will enable his company to serve soda water industries of the country more expeditiously than was possible in the old plant. Every time-saving and labor-saving device known to modern manufacturing equipment is installed in the new plant. Departments are arranged so that raw materials enter at one end of the plant and the finished fountains, carbonators or fruits and syrups emerge at the other. It is described as not only the largest plant of its kind in the world, but one of the most complete and perfectly appointed manufacturing establishments of any kind.

Badger Cigar Moistener Works Automatically.

The Milwaukee Novelty Co., 390 Hanover street, Milwaukee, Wis., claim to have perfected a cigar moistener that is intended to replace any similar contrivance on the market.

The moistener is built on scientific principles and is calculated to keep cigars uniformly moist. It is called the Badger Cigar Moistener, is 16 inches long, 2¼ inches in diameter and costs $1.50. Druggists will do well to get in touch with these manufacturers whose advertisement appears on another page of this issue.

Says President Taft Erred in Whisky Ruling.

Joseph Wolf, of Chicago and Lexington, Ky., president of the James E. Pepper Distilling Co., according to an interview published in a recent issue of the Seattle Sunday Times, is of the opinion that President Taft erred in overruling the decision of former President Roosevelt and Dr. W. H. Wiley when he decided that a liquor concocted from cologne spirits, water, coloring and flavoring matter might legally be labeled and sold as whisky. Mr. Wolf said

[illegible]

which are rank poisons, might be labeled whisky was a step backward.

"The manufacturers of real whisky got the worst of their fight in Congress for no other reason than that the money and the strongest political influences were on the side of the so-called whisky makers. It costs 20c a gallon to make whisky over-night after it does be distilled and matures an honest article. Hence the big profits that contributed to knock pure food legislation."

Mr. Wolf holds rather advanced views on the regulation of the liquor traffic. He believes in high license, limitation of the number of licenses, asserts that the liquor interests should demand that licenses be issued only to reputable retail dealers, and that all laws regulating the traffic, even if unreasonable, should be enforced to the letter rather than broken through hypocrisy.

Karith Co. Works for Actual Price Protection.

Druggists who believe in price protection will appreciate the stand taken by the Karith Chemical Co. in the case of a Chicago druggist who committed the foolish act of cutting the price on Karith, the cleaning compound manufactured by the company and advertised on another page of the ERA. The facts as stated in a recent issue of "Notes" are to the effect that when the Karith Co., which has a fixed policy of maintaining full prices on its product, heard of the action of the druggist, it sent one of its representatives to the cutter with the request that he sell Karith at full retail prices.

The druggist replied that he would sell Karith at full retail price if the Karith Company would give him gratis $3.96 worth of Karith in 8-oz. jugs, net price. Disregarding the insulting response the Karith Company wrote to the druggist, as follows:

"We are frank to say that we cannot recognize the justice of your position, but at the same time we accept your proposition above quoted, i. e., in consideration of your selling at full retail prices all Karith supplied you by us, we will make you a gift of $3.96, either in Karith at net prices to retail dealers, or in cash. If you are willing to give us our preference, we should be glad to pay you in cash rather than supply you the additional Karith."

At the same time the Karith firm wrote Chicago and nearby jobbers that "for the protection of the retail drug trade, you are requested to fill Mr. ———'s future orders for Karith only upon his signing a proper agreement not to cut regular retail prices."

This incident illustrates the absolute fool-hardiness of price-cutting and at the same time, shows just how such conditions may be met by energetic work on the part of the manufacturer. The action of the Karith Company is most commendable and deserves the indorsement of all right-minded druggists who should support any manufacturer who makes reputable products and works for actual and effective price protection.

Something New in Chocolates.

Rockwood's Maple-Milk Honey Almond-Chocolate, advertised in this issue of the ERA is something new in chocolates. According to the manufacturers this chocolate has two great merits—it sells quickly on its name and keeps going on its goodness, the blending of the various ingredients satisfying the popular taste and assuring its continuous sale. It is put up in 5-cent cakes, 24 to a box and can be sold at a good profit. Read the advertisement on page 1207 and write to Rockwood & Co., Washington, Park and Waverly aves., Brooklyn, N. Y., for samples and prices.

Goldfish an Attractive and Profitable Side Line.

As a money making side line to the retail drug business attention has been repeatedly called to the sale of goldfish. Wide awake druggists have been handling them in many localities and they have found good financial returns in their venture. Try the experiment yourself and write to Bishop, "the Bird Man and Pioneer Goldfish King," whose advertisement appears on another page of this issue of the ERA. He has an offer which means a profit of 165 per cent on an investment of $9.50. Read the advertisement carefully and send for a copy of Bishop's latest catalogue on goldfish, aquaria supplies, birds, cages, bird foods, etc.

Druggists Did Not Violate Wisconsin Cigarette Law.

Prescott, Wis., Nov. 20.—The firm of Corbett & Ackerman, druggists, has been acquitted from the charge of selling cigarettes in violation of the State law. The charge was made by the Anti-Saloon league.

Don't Overlook the Steady Money

The profits from Diamond Dyes come in regularly—day in and day out. If you give Diamond Dyes the attention they deserve the results will surprise you. Others are selling them in ever increasing quantities.

Why not you?

DIAMOND DYES
Are Advertised

We advertise Diamond Dyes in nearly every important publication in the country. We do it year after year to the tune of $200,000 annually. This would be money thrown away unless you dealers profited greatly by it. Are you getting your share of the profits?

You Should Never Let Your Stock Run Low

Keep your stock of Diamond Dyes up to the mark. Staples should never be out of stock. Keep your Diamond Dye Cabinet in a prominent place. Push Diamond Dyes. You and our powerful advertising together can make this year's sales of Diamond Dyes your record breaker. Ours is a record breaker now. Look your cabinet over and send your order now for any colors that it lacks.

Facts That Will Help You

Always be sure that your customers get the right kind of Diamond Dyes for the materials they intend to dye. For while it is almost impossible to fail with Diamond Dyes, if the directions are carefully observed, it is imperative that the right dyes be used.

Frequently, customers want to know why one dye won't do for any kind of materials. Then tell them this:

Wool, silk, and like materials are made up of animal fibres, while cotton, linen and mixed goods are composed of vegetable fibres, which are entirely different in composition and slower to take up the dye. And the only way to get absolutely sure and satisfactory results is to use the kind of dyes especially adapted to the fabric. This is supported by the authority of all the most eminent dye-chemists.

If care is taken to secure the proper dye, there is positively no reason for failure. For dyeing at home with Diamond Dyes is just as simple, as sure of success, as washing a shirtwaist.

But be sure to explain carefully the reasons for the separate dyes; for every imitation that is sold undermines the confidence of your trade in the possibilities of home-dyeing and kills possible profits.

Twinplex Manufacturing Co.'s Demonstrating Case.

The Twinplex Manufacturing Co. is putting out a unique demonstrating case, handsomely lithographed in six colors and designed to hold four of the Twinplex Rotary Safety Razor Sharpeners, each in a different position. The case is

Strops two edges at once
Twinplex Stropper
Strops your blades - Stops your expense
Twinplex Safety Razor Stropper
Two edges at once
Sold on 30 days' trial

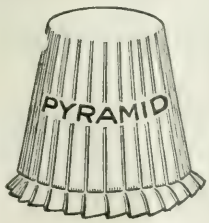
12 inches wide, 4½ inches deep and eleven inches high, covered with heavy glass to protect the sharpeners from dust and to prevent a person from walking away with one of the sharpeners. Filling one of these cases with Twinplex Sharpeners enables the dealer to place it on his counter, where the unique features of the sharpener will be quickly seen. Wherever this demonstrating case has been used, it has resulted in selling numbers of the Twinplex Sharpener. The cases are loaned to dealers who purchase a half dozen or more of the sharpeners. For particulars of how the cases may be secured see the advertisement on another page and then write to the Twinplex Manufacturing Co., 309 Frisco Building, St. Louis.

Exploiting the Soft-Mass Pill.

It is no secret that the soft pill as developed by Parke, Davis & Co., was several months in the making. When success was assured, and physicians became acquainted with the achievement, prescriptions for pills "P.D. & Co., soft," began to appear in the drug stores of the country. Today there is an established demand for the goods and it is not surprising to learn that the advertising machinery of the manufacturers is to be put in motion to make soft-mass pills (P. D. & Co.) more widely known to physicians. Full-page space is being taken in the medical journals. Letters and literature are to be mailed to physicians. Detail men will be busy in the field. In view of this campaign it is a safe assumption that there will be an augmented demand for Parke, Davis & Co.'s soft pills within a very short time, a fact which druggists may well bear in mind. The company now puts out twenty-eight formulas by the soft-mass process. The list appears in full in this number of PHARMACEUTICAL ERA and will repay a careful study.

Sold on Protected Price Plan.

One of the successful toilet preparations now on the market is Pink Blush Massage Cream, a combination disappearing and rolling massage cream all in one. It is manufactured by the A. J. Krank Mfg. Co., of St. Paul, Minn., and the large sale it is securing is the best evidence of the satisfaction it is giving to users. This product is sold entirely on the protected price plan and affords the dealer a good profit. The manufacturers are advertising it largely to the public through the general magazines and are making a special offer to druggists in the shape of free goods. For particulars, see their advertisement in this issue.



"PYRAMID" Reinforced Paper Bottle Caps

These Bottle Caps possess several distinct advantages over imported makes:

They are lined with white paper.

The pleats being closer together, the caps are more readily affixed and give the bottle a better finish.

They are fast colors and do not stain the fingers.

They cost much less.

The WILLIAMS VISIBLE TYPEWRITER Is Best Adapted for This Work

$100 Machine in Fine Condition $30

STANDARD TYPEWRITER EXCHANGE -:- 1022 Arch Street, Philadelphia

Andrae Electric Moisteners for Cigars.

The building shown in the accompanying illustration is that of Julius Andrae & Sons Co., manufacturers and distributors of electrical supplies, dynamos, motors, etc., Milwaukee, Wis.

Recently the company celebrated the 50th anniversary of its business career, keeping open house during the day and giving a banquet in the evening to its 126 employees.

In its 50 years of business life the company has kept pace with the wonderful progress made in the application of electricity to the requirements of modern life. One of its most recent successes was accomplished when it perfected the Hygro Electric Moistener which was presented, three years ago, to the company by the inventor, who unfortunately, was better as an inventor than a manufacturer, for the machines did not come out uniform. The Andrae Company quickly realized that the device furnished the only practical method of moistening cigars, took over the manufacture, put it in the hands of its own expert mechanics with the result that it is now turning out, under the name of the Andrae Electric Moistener, a device that automatically keeps cigars in an absolutely uniform and perfect condition. It gives splendid satisfaction in all parts of the country and will pay all who are interested in sending out cigars to their customers to investigate the merits of this machine which is advertised on another page of this issue of the ERA.

Mitchell Plasters Again on the Market.

The Novelty Plaster Works, formerly of Lowell, Mass., have an advertisement in this issue of the ERA calling attention to their reorganization and removal to Chicago, and also announcing that Mitchell's Plasters are again on the market, new goods having been supplied to nearly every jobber in the United States and Canada. The plasters and specialties turned out by this concern have always enjoyed an enviable reputation and an extensive sale, the late Geo. E. Mitchell who established the business in 1864, being a pioneer and expert in this particular line of manufacture.

The jobbing trade will be supplied by the Williams Manufacturing Co., Cleveland, O., an arrangement that should prove profitable to the manufacturers and of great convenience to the jobber. Frank S. Henry, the well known "commercial evangelist" of the Williams Co. enjoys a wide personal acquaintance in the drug trade, extending over many years, and his connection with the business is sure to be helpful. For list of plaster specialties, prices, etc., see the advertisement on page 1156, and if your jobber cannot supply with these goods send your order with your jobber's name to the Novelty Plaster Works (Austin Station), Chicago, Ill.

Warns Dealers Not to Infringe on Trademark Rights.

In his advertisement on another page of this issue of the ERA Henry L. Hughes, manufacturer of high class toilet articles, Chicago, calls the attention of the trade to attempts that are being made to introduce hair brushes which are an infringement upon his trademark rights in the word "Ideal" as applied to hair brushes. This trademark, No. 54,282, was adopted by him in 1893 and duly registered as such June 26, 1906, under the law of 1905, in the Patent Office of the United States, and he warns the trade that he will defend his rights from any infringement by the use in connection with hair brushes of the word Ideal, or the words "Good Idea," "New Idea" or any similar words which might be mistaken for "Ideal."

Sterling Borax

Borax is sold exclusively to the retail Drug Trade. It is not Price-stamped on the carton, allowing the druggist to make his own price, and Profit.

It costs 90c. to one dollar a case less than other, and widely advertised brands. It is not sold in competition with Grocery, Department and Cut-rate stores. It co-operates with the Retail Druggist in every possible selling policy. It is packed when desired, in single assorted cases containing 16 pkgs. 1 lbs., 28 pkgs. ½ lbs., and 120 pkgs. ¼ lbs., saving 15 to 20% over single case lots. Refined by the only Independent Borax Refiners in the United States.

STERLING BORAX CO., - - CHICAGO

THORKILDSEN-MATHER CO., Selling Agents

Calmine—The New Hypnotic.

In medical circles throughout the country a good deal of interest and even enthusiasm over this new hypnotic is noticeable. In the language of the chemist Calmine is sodium diethylbarbiturate. It appears as a fine, white, water-soluble powder with an alkaline taste. The Abbott Alkaloidal Co., of Chicago, supply it in the form of 2½ grain tablets—twenty-five in a package.

According to the manufacturers, it induces a condition more nearly resembling natural sleep than any other known drug. It operates promptly. It acts gently, being a *coaxer*, instead of a blunt, *compelling* hypnotic, and is followed by no bad after effects. It may be dissolved and administered per rectum when it is not feasible to give it by mouth. It is reasonable in price and is being widely advertised and generously sampled. Although announced only a month ago, there is already considerable demand for it. Jobbers everywhere are rapidly being supplied. The price to the trade is $4.00 per dozen bottles of twenty-five tablets; 35c per bottle. Write The Abbott Alkaloidal Co., Chicago, for samples and printed matter.

New Silver Proteid in Powder Form.

Hegonon (silver nitrate ammonia albumose) is a new silver proteid in powder form, said by the manufacturers to contain approximately 7 per cent. of organically combined silver, and soluble in water with alkaline reaction. It contains no free ammonia, and an aqueous solution of it does not coagulate albumen even on heating, nor is it precipitated by sodium chloride. It is recommended for use in the treatment of gonorrhea by injection of one-fourth per cent solutions, and also for irrigations of the anterior and posterior urethra with solutions of from 1:6000 to 1:2000. Solutions for dispensing are best prepared by adding the desired amount of Hegonon to the necessary quantity of water in the course of one or two minutes, stirring energetically all the time with a glass rod until solution is effected. The solution should be dispensed and kept only in well stoppered bottles of dark glass. Hegonon is marketed by Schering & Glatz, importers of fine medicinal chemicals, 150-152 Maiden Lane, New York.

Buy Pape's Diapepsin in Quantity.

According to the manufacturers it is really wasteful not to buy such a staple preparation as Pape's Diapepsin to get the best discounts which wholesalers usually allow. The preparation is well advertised and a good seller. Pape, Thompson & Papé Co., the manufacturers, know their business thoroughly and have made thousands of friends because of their liberal fair dealing. They have just notified us that in addition to their already tremendous advertising campaign they have this week added nine thousand county weekly newspapers to their advertising list, and they suggest that it would not be amiss for druggists who are located in the small towns and rural districts to stock Diapepsin at once, as the sales are always prompt and heavy wherever this concern goes after the trade. Only a good, effective and meritorious product could stand a million dollars' worth of advertising in one year. This fact alone, the manufacturers believe, should convince any pharmacist that Pape's Diapepsin can be safely recommended, but if in doubt, ask your Diapepsin customers what they think of it.

New Drug Store Keeps Mr. Huels Busy.

E. J. Huels, an energetic druggist of Brooklyn Borough, New York City, last Spring opened a new pharmacy in the Flatbush section of the city, Albemarle road and Flatbush avenue, which became such a success that he recently decided to dispose of another pharmacy which he had been conducting for the last 12 years at Broadway and Gates avenue, another busy section of Brooklyn. With this object in view Mr. Huels consulted Herman H. Breuer, the drug store broker, who quickly found a purchaser in the person of Theodore H. Bohlk.

Improvements in Plant of an Omaha Wholesale House.

OMAHA, Nov. 20.—The Richardson Drug Co. has practically doubled the size of its plant during the past year. The sundry room is now on the first floor, having been moved into the new building. The entire building is now 132 feet square and is complete in every detail. The company is also building a new fireproof laboratory in the rear of the present structure.

Eye strain forms a large share of the eye troubles that are so prevalent among motorists, travelers, etc., which is creating a big sale for

EYE-MO

An excellent soothing, antiseptic lotion which may be freely recommended for inflamed and ailing eyes.

SPECIAL FEATURE

One of the unusually strong selling points about EYE-MO is the handy way it is put up—a bottle-shaped container which is also a dropper. It offers you a quick 50-cent sale and a good profit at $4.00 per dozen.

H. PLANTEN & SON Founded 1836 **BROOKLYN, N. Y.**

California Fig Syrup Co.'s Special Offer.

The Special Offer of the California Fig Syrup Co. to the retail trade of free goods for window displays in connection with that company's great advertising campaign for the coming year, which appears in its advertisement on page 1238 of this issue of the ERA, should be read by every druggist. This advertising is sure to result not only in a large increase in sales to the mutual advantage of all concerned, but more particularly will it increase the profits of the retail druggist, for there are few, if any, druggists who cannot afford to buy a half gross or more of Syrup of Figs and Elixir of Senna and display the company's signs for a week in order to obtain the free goods. This arrangement enables the individual buyer to get these goods at as low a figure as if he were a member of a buying club, to make a good profit on every bottle he sells and to sell a great many more bottles during the course of the year. For full particulars of the offer, see the advertisement and act at once.

Detailed to Physicians as Strictly Ethical Remedy.

Pneumo-Phthysine, manufactured by the Pneumo-Phthysine Chemical Co., 215 Institute Place, Chicago, is now being advertised to the trade and detailed to physicians as a strictly ethical remedy for the treatment of acute febrile diseases, pneumonia, and all bronchial affections. For particulars regarding prices, illustration of package, etc., see the manufacturer's advertisement on page 1230 of this issue of the ERA, who also offer to send by mail or express free samples to physicians who do not prescribe Pneumo-Phthysine if you will supply the names and addresses.

The Walrus "Eitherway" Soda Fountain in Nebraska.

As showing the wide distribution and use of the Walrus "Eitherway" Soda Fountain, the Walrus Manufacturing Co., Decatur, Ill., in their advertisement in this issue of the ERA show a map of the southeastern part of the State of Nebraska, on which has been marked with arrows the various towns in which a Walrus Fountain has been sold. This is a most graphic representation of facts and when the manufacturers tell us that Nebraska is no exception for Walrus "Eitherway" Fountains are in evidence everywhere throughout the United States, the conclusions are significant and clearly indicate the popularity of these fountains. The manufacturers have many good reasons why they contend that it pays to buy a Walrus and intending purchasers should hear what they have to say before placing orders elsewhere. They have showrooms, agencies and representatives throughout the United States.

Five Drops Advertising Campaign for Druggists.

The Swanson Rheumatic Cure Co., 174 Lake street, Chicago, are extensively advertising their well known remedy "Five Drops" in a great many sections of the country, and are cooperating with druggists in endeavoring to build up and maintain the sale of this really meritorious patent. They would also inform druggists that they will consider an advertising campaign in the daily papers in any territory over the name of any local druggist who will purchase a reasonable amount of "Five Drops" to warrant the expenditure, and at the same time make them feel that they will be treated fairly and squarely. The Swanson Co. pride themselves on having always lived up to the very letter of their contracts. Better get in touch with them. The advertising is placed by the E. H. Clarke Advertising Agency, 112 Dearborn street, Chicago, Ill.

Wayne Chemical Co.'s Special for December.

The Special for December offered by the Wayne Chemical Co., Clarion, Pa., in its advertisement on another page of the ERA should be read by every druggist who is looking for a good investment. Soda Mint Tablets are always salable, and when he can get them bottled in vest-pocket flasks—42 tablets to the bottle, 12 bottles to the carton,—for 38 cents per dozen, including delivery, he is getting a standard article at a price which will enable him to make some good money. But turn to the advertisement and read the offer for yourself.

An Ideal Pan for Contagious Cases

WHITE PORCELAIN

The broad flanges at the sides being curved to fit the body the weight of the patient is evenly distributed, avoiding discomfort or spinal pressure.

Every part being accessible permits ready and thorough cleaning.

Its capacity is ample and its shape prevents tilting when in use.

Per dozen - $30.00

Discount to the Trade, 50% *Special Discounts in quantities*

SPECIAL OFFER from November 15th, 1910, to May 15th, 1911

In conjunction with our Extensive Advertising Campaign this season, we have decided to make the following Special Offer to the druggists of the United States:

For displaying our signs one week, or more, and purchasing

6 Doz. Syrup of Figs and Elixir of Senna at $4.00, less 5%, 1/2 Doz. Free
12 Doz. Syrup of Figs and Elixir of Senna at $4.00, less 8%, 1 Doz. Free
24 Doz. Syrup of Figs and Elixir of Senna at $4.00, less 8%, 2 Doz. Free

Freight prepaid on 24 doz. order, but not on smaller lots.

To get the benefit of the above Special Offer sign one of the Special Offer blanks, to be had of us or of all wholesale druggists, stating quantity desired and send to your wholesaler. This offer is not open to aggressive cutters.

Our Prices are Right; our Discounts Liberal; our Advertising Extensive; our Remedy Excellent.

Now is the time to get the benefit of this Special Offer.

Andrae Case Moistener

Moist Cigars

Not too moist but just moist enough. Automatically controlled and requiring no attention, meaning greater sales and more profits. That is what the

Andrae Electric Moistener

will give you. You cannot get it by any other means. It is not an expense but a revenue producer and is backed by a business record of fifty years and ample financial responsibility. It is built for business and for business men.

Andrae Stock Room Moistener

STOCK ROOM MOISTENING

When you want real common-sense moistening automatically regulated at a low first cost and a low operating expense, try the Andrae Stock Room Moistener. It does 4 times the work at one-half the cost.

The Imprint of Cargill GRAND RAPIDS stands for Quality

TO THE POST CARD DEALER:

HIGH GRADE VIEW CARDS ARE QUICK SELLERS

HIGH grade local view post cards are as profitable an item as most any of those you now carry in stock. It is no longer considered a speculative investment to carry a number of desirable views of your locality, as they are a staple article, having a good steady sale and are actually entitled to as much if not more consideration than many of the so called standard items you are carrying year in and year out.

THE PUBLIC DEMANDS THEM

"View Cards Like They Make in Germany" and bearing our imprint are the ***best made*** and cost only a trifle more than the poorer grades. If you would increase your sales, you should have the best cards obtainable. If your jobber does not handle our line, let us send you samples and allow you to judge for yourself.

The Cargill Company

Grand Rapids, Michigan

Prices Current *of* Drugs *and* Chemicals

TO SUBSCRIBERS—In comparing your invoice with the prices in this Price Current, remember that the prices here given are those ruling in the New York market, and are the average prices charged to retail druggists. For larger quantities and original packages lower prices should be secured. Quality should always be taken into consideration.

This is SCOTT'S EMULSION'S 35th Year

Every day we hear of wonderful cures it has made. ¶ Every day we have more and more faith in it. ¶ We make it every day, and every day we try to make it better. It ought to be the best. It has stood a long test.

We are sure you, too, have faith in Scott's Emulsion, and we are sure you have no trouble with it. It is only a question of our customer going to you or going somewhere else. When he comes in, will you please give it to him? That is all we ask—just give him SCOTT'S EMULSION.

THE BONUS PROPOSITION

This proposition is made to those who retail only, and is as follows:

Orders amounting to $25.00 worth (either size or assorted), are subject to a 5% discount, allowed by the wholesaler, and ⅓ dozen Scott's Emulsion, Small, as a bonus for window display. The four bottles of Emulsion will be sent by us direct, charges prepaid, upon receipt of acceptance of order by wholesaler.

Make up the amount any way you like, this is the way it figures out:

3 Doz. Large Emulsion, @ $8.00	$24.00	6 Doz. Small Emulsion, @ $4.25	$25.50
Less 5%	1.20	Less 5%	1.27½
	$22.80		$24.22½
Less 4 Bottles, Small	1.42	Less 4 Bottles, Small	1.42
	$21.38		$22.80½
or $7.13 per dozen, net.		or $3.80 per dozen, net.	

Your advantage is in the large size, so is ours, as the small size costs proportionately more to put up.

Send your orders direct to us on any wholesaler, and if you would like advertising matter, please request it.

SCOTT & BOWNE - - Bloomfield, N. J.

We Want Your Business

Our New Plant is completed, and we need orders.

Beautiful and artistic Drug Outfits at prices so low you will wonder how we can do it. Remember the quality is GRAND RAPIDS make—as good as the best Grand Rapids furniture.

Drink Dole's Pure Hawaiian Pineapple Juice

The Drink Delightful! The Drink Healthful! Drink It All The Year Round!

Nothing whatever is added to the juice. No water, sugar, preservative or poisoning matter — absolutely nothing in the bottle but the breath of a ripe Hawaiian Pineapple sold so that nothing of delicacy escapes your table.

Quarts
Pints
Half-Pints
Quarter-Pints

Serve Dole's Pure Hawaiian Pineapple Juice from the thoroughly chilled bottle poured over cracked ice, or in iced tea, a slice of the usual size of lemon.

Try Hot Pineapple Juice. Just as a hot lemonade, instead of lemon. Three times [illegible] to two of the boiling water poured over a little sugar is better than hot lemonade and much more economical to prepare. It was [illegible] made us his favorite

James D. Dole

Be sure this name in red is on the label.

Re Price Protection on SANATOGEN

We wish to reiterate with all emphasis that as the sole licensees of the United States Patent under which Sanatogen is manufactured and sold, we are invested by law with the privilege to insist that retailers strictly maintain the minimum retail rates plainly stamped on each box of Sanatogen. Any dealer violating this condition renders himself liable to injunction and damages.

Gentlemen of the drug trade, this is no mere "say-so," but a true statement of fact. We do not wish to intimidate anyone, but merely to give proper notice that we mean to enforce our rights wherever necessary.

This means *true protection*, the kind of protection that gives everybody a square deal and puts the small druggist on an even level with the biggest "chain corporation" or department store.

Three sizes, sold by all wholesalers and jobbers, at $0, $17.25 and $33, to retail at $1, $1.20 and $3.60, and *no less*.

Write to us today for effective display matter.

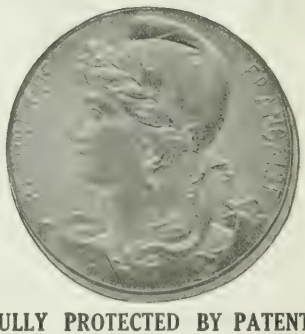
THE MARVEL "WHIRLING SPRAY" SYRINGE

IT IS A MARVEL



WAS AWARDED THE GOLD MEDAL, DIPLOMA, AND CERTIFICATE OF APPROBATION, BY THE SOCIETE D'HYGIENE OF FRANCE, OCTOBER 9, 1902,

as the latest and best improvement in Vaginal Syringes. Particular attention is called to the fact that by reason of its peculiar construction the Marvel Syringe dilates and flushes the vagina with a volume of whirling spray, which smooths out the folds and permits the injection to come into contact with the entire surface, instantly dissolving and washing out all secretions and discharges.

PINEX

The Big Selling

COUGH REMEDY

This remedy was designed by a pharmaceutical chemist to take the place of a thousand and one home made remedies used by housewives to cure coughs.

People that used to come to the druggist for five cents worth of ipecac and a nickel's worth of Horehound tar, honey or something else, are now buying 50 cents worth of Pinex.

They get a better remedy and they pay the druggist a better profit.

Pinex has created a lot of brand new, profitable cough medicine users, to a class of people who would not buy an ordinary cough [illegible].

If you're not selling it you should.

WE GUARANTEE THE SALE. Unsold bottles returnable at any time.

Any jobber will supply you.
